From the depths of his religious faith, no doubt, sprang Paderewski's quality of selflessness. He served his people always—himself never.

No one can forget the example he set for leaders of free countries when, in the fall of 1919, he voluntarily stepped out as Prime Minister of Poland.

Paderewski could easily have assumed control of his war-torn nation as dictator, but he felt that he had done his duty. He had served as the unifying force, as no other man could have done, to draw together the Polish people in their first, faltering steps toward existence as an independent nation.

When this was done, he turned the reins of power over to others. He sought not power, but a free native land.

Paderewski was possessed of an innate generosity. Less that 5 years after first visiting the United States he established an award to encourage American composers.

Throughout his life, he was a continuing benefactor of the young of his native Poland and of our own country. He encouraged them to develop their resources, in the study of music, language, and philosophy.

It was Paderewski's generosity with his own personal fortune, during and after World War I, in fact, which required his return to the concert stage in 1922.

But when I speak of his generosity, I do not mean only of his worldly goods. Far more important, Paderewski was generous with himself. Early in life, Paderewski coined a motto which he adopted as his own—"The fatherland first, art afterward."

This was his real generosity. He gave of all his talents to the cause he felt most right and important.

We must remember that Paderewski made fortunes many times over through his skill as a musician. I would hazard the guess that he was the highest paid concert artist of his age.

Yet he hesitated not an instant before turning to the service of his country when he was needed. Without regret or fear, he turned his back on the piano, and all the material riches it had earned for him.

He saw his duty as a man of genius, and directed his efforts toward helping his Polish people toward independence, and in guiding them into being a free, self-sustaining nation.

Again, when the conquerors from both East and West devastated Poland in 1939, Paderewski gave fully of himself. Almost 80 years old, he journeyed to France to accept the Presidency of the Polish Parliament in exile, and once again fulfill his destiny to unify and lead the Polish people in their fight for freedom.

He was a sick man, and could well sense that shouldering this tremendous burden of political leadership could constitute his death warrant.

He nevertheless answered this call to duty, giving his physical powers, his heart and soul, and his genius without sparing, in answer to the summons of country and conscience.

It is because of this lifelong service to his country and to the principles of freedom that I have directed the Post Office Department to issue special stamps in the "Champions of Liberty" series, honoring Paderewski.

The special stamps will be placed on sale for the first time on October 8, here in Washington, D.C.

This event will coincide with our remembrance of the great contributions made by the Revolutionary War hero, General Pulaski, to our American cause of independence.

Living in today's troubled world, we have an obligation to ourselves and our fellow man to study the qualities that made Paderewski great, and to emulate them in our own lives.

The free world cries out today for leaders and for citizens who will put moral principle first, and accept their responsibility to ward off the forces that threaten our way of life, whether external or internal.

We need today men of Paderewski's self-discipline and courage, who will not retreat before threats, who will not be bullied, who will be confident that a just cause is worthy of any sacrifice.

Too many national leaders, both then and today, would seek the easy way out, of compromise and appeasement.

Often we forget what Paderewski knew so well, that justice is its own strength. It requires only men of character and courage to take a stand and emerge victorious.

Paderewski's dedication to a cause, surpassing any thought of himself or his own personal glory, is a trait of character so essential in these times of tension.

We have seen a recent example of this in the dignified and unselfish manner in which President Eisenhower has carried himself.

But too often we see the opposite—a man retreating and maneuvering, determined to protect not the cause for which he stands, but only himself.

As we remember this great man today, we should rededicate ourselves to the abiding Christian faith that sustained him.

Finally if there is but one lesson we can draw from Paderewski's life, and one element of character to which we pay tribute, it is the generosity of spirit which he displayed.

We live today in times that test the intellect, the moral courage and the dedication of every man.

Abroad, we face the blackest tyrannies—more ruthless and deadly than civilization has ever known.

In our own ranks, too often, we face self-interest, moral cowardice, and retreat.

If we are to survive—and survive we will—we must study well the example left to us by such giants as Paderewski.

We must learn and believe, as he did, that the phrase, "Right makes might," is not an old-fashioned, out-of-date slogan.

We must feel, as he felt, that devotion and dedication to a just cause cannot but succeed in time, if we carry ourselves with determination and confidence.

We must believe, as he did, that the freedom of mankind is the highest value, and pledge ourselves to do our utmost to achieve it.

Above all, we must draw the lesson from this great patriot that the first, and all-compelling duty of genius, is to his fellow man.

Let no one who has ever heard or seen Paderewski, has read about him, or has heard of his role in history, say:

"My business is too important to take time for public affairs, or;

"I am devoted to the world of arts and cannot be bothered with political life, or;

"I am too busy taking care of the home," or;

Any of the other thousands of excuses we in public life hear every day from those who will not contribute their talents to the all-important mission of making this country,

and every country in the world, a place in which man can live in freedom and dignity.

Late in life, Paderewski said:

"The vision of a strong and independent Poland has always been the lodestar of my existence. Its realization is the great aim of my life."

Paderewski's vow was to his native land. We know from this heroic man's career that he would have taken the same vow to protect his fellow man, wherever oppressed and persecuted.

In respect for the immortal soul of the man who lies here with us, I urge that we take—each of us—this same solemn pledge—that we dedicate ourselves to pit all our talents, abilities, and energies, as he did, to achieving strength, freedom, and independence for our fellow man, in whatever country he may live, or in what state of bondage he may now be.

With courage, with determination, and with the strength borne of confidence in the justness of our cause, we shall accomplish our mission.

With God's help, we shall go forward to the final victory, when every man can say with pride, "I am free."

ORDER OF BUSINESS

Mr. JOHNSON of Texas. Mr. President——

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. JOHNSON of Texas. Mr. President, may I have the attention of the minority leader?

Mr. CARLSON. Mr. President, are we in the morning hour?

The PRESIDING OFFICER. The Senate is in the morning hour.

Mr. JOHNSON of Texas. I yield to the Senator from Kansas.

COMMUNIST PROPAGANDA IN THE CONGO

Mr. CARLSON. Mr. President, we read daily, hear over the radio, and see on television reports about the distressing situation in Congo Africa and in Africa generally.

Our Nation has been fortunate in the many years past to have a fine group of dedicated men and women who have gone to that continent as missionaries. I received a letter this morning which I think ought to be brought to the attention of all Members of Congress. The letter reads:

I am a missionary doctor's wife who has just returned from the former Belgian Congo. We were in the Equator Province where things have been relatively peaceful. My husband is still there and our four mission doctors are probably the only doctors left in the whole Ubangi area since the Belgian doctors have all left. Our men missionaries are still there trying to ride out this trouble, but all women and children have been evacuated.

I came home with a heavy burden on my heart—that of propaganda for Africa. For the last 5 months our evening shortwave news broadcasts from BBC and Voice of America have been jammed. As we turned along the 25-meter band there were five places where Peiping was broadcasting their lies about America in perfect American English—obviously beamed to Africa with a powerful transmitter. It disturbed me so much I had to turn it off. About every 10th word was "imperialist U.S.A." and one wonders how anyone can twist the truth into such lies. But, even worse, was that we could not find any programs from the United States to counteract these lies. Where is the Western World in this propaganda campaign? What effect are these lies having on English-speaking colonies in Africa such as Ghana, Rhodesia, Kenya, South Africa?

In our area we use the "Lingala" trade language. Broadcasts have been heard in Lingala and Swahile (another Congo trade language) originating in Moscow and Cairo. Our Belgian state man told us 6 months ago that they were aware of a school in East Germany that was teaching Lingala. Recently one of our bewildered African school teachers asked us, "Tell me, who is the worst—America or Russia?" Our people are just getting radios and are unable to judge truth from lies. Thus far they have relied upon us as missionaries to help them but "if you tell a lie long enough, they'll believe it." This is what they said about China—"The missionaries taught us to read but the Communists gave us literature." Is the same thing going to happen in Africa?

What are we as a country doing in the line of propaganda both in radio and literature? I may not be well informed but as I dialed all over our radio in Congo I could not find anything being done to counteract these lies. Can't we do something quickly to save the situation? Can't our many American missionaries who have had to leave the Congo or those still out there who know the native language be contacted and used for radio and literature and flood the country with the truth about America? If we don't, Congo and Africa are going to be a lost cause, and faster than we think.

Thank you for reading my letter—please try to impress on those in power this tremendous need and the urgency of immediate action.

I thought this subject should be called to the attention of the Senate, because I know of no group who is more familiar with the situation in Africa than those who have given their lives in this area.

Mr. FREAR. Mr. President, will the Senator yield?

Mr. CARLSON. I shall, if I have time remaining.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. JOHNSON of Texas obtained the floor.

Mr. JOHNSON of Texas. I yield to the Senator from Delaware.

Mr. FREAR. I am happy that the Senator from Kansas has brought to the attention of the Senate this grave problem in the Congo. I should like to have printed in the RECORD at this point as a part of my remarks an AP story from Brussels dated as of yesterday, which substantiates the remarks that were made on the floor of the Senate on Monday of this week, stating the physical condition of those people who have been taken out of the Congo and transported back to their homeland in Belgium.

There being no objection, the story was ordered to be printed in the RECORD, as follows:

[From the Wilmington Journal-Every Evening, Aug. 30, 1960]

BRUSSELS, August 30.—The Belgian Foreign Ministry today denied a Congo atrocity charge by U. S. Senator J. ALLEN FREAR, JR., Democrat, of Delaware.

Senator FREAR told the Senate yesterday that a planeload of children whose hands had been chopped off were flown back to Belgium from the Congo a month ago.

A spokesman for the ministry said only one such case of a child whose hand and forearm had been severed had been verified so far.

He added, however, that at the start of the Congo army mutiny early in July, several children had been maltreated by mutineers.

"The situation is bad enough as it is," the spokesman said. "There is no need to invent atrocities with all the official verified accounts of rape, brutalities and looting which the Ministry of Justice commission has in its files.

FREAR declined to reveal the source of his information but later told reporters he had it on "good authority."

Mr. YARBOROUGH. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield to the junior Senator from Texas.

Mr. YARBOROUGH. I wish to commend the distinguished Senator from Kansas for calling this subject to the attention of the Senate. I hope the Voice of America will devise means to get the story of our policies over to the people in the Congo, in Africa.

Meanwhile, while they are doing so, I do not believe our Government should send defenseless American soldiers into danger areas unarmed and with no protection. I believe it is the duty of the Defense Department, when we either draft boys into the Armed Forces or enlist them on a voluntary basis and then send them into zones of known danger where fighting is going on between hostile forces, and sometimes indiscriminate attacks are made, that our forces should either go into the territory armed or under the protection of an armed guard.

I believe the distinguished Senator from Delaware advocated the same principles here on the floor yesterday or the day before, and I wish to join him in those remarks.

There was a time in the days of Teddy Roosevelt and in the days of Grover Cleveland when Americans in different parts of the world were beaten up indiscriminately and left unconscious. Our Government demanded restitution, indemnity, and apology. We wonder what policy the Government now follows when members of the American Armed Forces can be beaten and left unconscious, and we find the Government too weak to demand indemnity and apology. What does American citizenship mean if it does not carry the protection of that flag which is back of the Vice President's desk wherever Americans lawfully go on official Government missions?

Mr. HOLLAND. Mr. President, I compliment the Senator from Kansas for bringing to our attention the communication which he has given to the Senate, coming as it does from a missionary source, and indicating the want of adequate information as to activities on behalf of our Nation in the Congo and the other important parts of central Africa which he mentioned.

I merely call attention to the fact that the Congress has been generous in the granting of requested appropriations for the U.S. Information Agency. As one who has been active in the field of that legislation, as a member of the subcommittee and the committee, I would like to see more imagination, more willingness to step out into new fields, and more

willingness to be ahead of those who are our potential enemies on the part of our U.S. Information Agency.

We have been through the same situation with reference to Cuba. We have had to listen to humiliating and completely irresponsible broadcasts as to our country from Cuba; at the same time there was no adequate coverage being given to the story of America, the best friend that Cuba has ever had, broadcast to reach into the homes and the families of Cubans.

Apparently we are now waiting until a potential enemy has walked in through the airways, if we may use that term, into this important area in central Africa, and has made great progress. Then we move. I call attention to the fact that we have been generous and responsive to the requests of the U.S. Information Agency and of the Department of State in this same field, and that we have a right to expect more imagination, and more responsiveness to sense the danger before it actually is as great as it now is in that area. There should be more willingness to go on new adventures in the areas of the world in which needs are constantly cropping up, and which require this kind of attention. We need to have a clear exposition of America's position in world affairs, by which we want nothing except peace and enduring prosperity among people, which will foster peace. I think we have been very slow, and our U.S. Information Agency has been very derelict in living up to its very high responsibilities in this matter.

OUR RESOLVE IS RUNNING STRONG

Mr. WILEY. Mr. President, in the space age, the American people are searching for crystallization and clarification of principles of purpose and spiritual realizations needed to serve as the foundation for progress in our Republic.

In these fast-changing times, there is a constant need, not only to reevaluate and redefine goals and ideals, but also to design the methods of accomplishing such objectives.

As necessary, this means modifying old concepts and creating new ones to meet the newly emerging challenges.

Regrettably, some of our so-called leaders have felt it necessary to trample upon, or at least deprecate, the policies and programs of the past, which have served as the foundation of progress for our great country.

Personally, I think this is nonsense.

Historically, the Nation has undergone a series of successive efforts to reevaluate goals and objectives, a "necessity of life" in a free country, and in complete accord with our traditions.

In 1860, Abraham Lincoln said:

> As our case is new, so must we think anew and act anew.

In 1960, this is also true, if we are to progress as a nation.

In recent weeks, Life magazine has published a series of constructive, thought-provoking articles on national purpose.

In these articles, outstanding individuals from a great many walks of life, including politics, have presented laudable ideas. Of themselves, these have been meritorious; as well, they have stimulated additional thought among our people on our national purpose.

The August 29 edition of Life published the views of Vice President NIXON entitled "Our Resolve Is Running Strong."

In a creative, constructive way, the article reviews our progress in adhering to fundamental principles as presented in the Preamble of the Constitution, as well as adoption of different ways and means for coping with the great challenges in each era of our history.

The theme running through the article emphasizes a positive, not a negative, philosophy. Importantly, it rejects the idea that we, as a nation, have lost our national purpose. More truly, it reflects the specific ways in which we, as a nation, acting upon fundamental principles and ideas, have met, and are continuing to meet, the challenge in each era.

As an outstanding contribution to public thinking on our national purpose, I ask unanimous consent to have the article printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OUR RESOLVE IS RUNNING STRONG

(By Vice President RICHARD M. NIXON)

It is particularly appropriate that Life has stimulated a comprehensive reexamination of our national purpose at a time when the American people are making some important decisions about their future, as they are in the election of a new President.

A common denominator of agreement among the eminent contributors to this series is that the Nation has mounted insufficient response to the Communist challenge to free society.

We can all agree that we have never faced a more formidable challenge. Yet contrary to some of the other viewpoints which have been presented, it is my belief that never has the American purpose been more clear.

For me the discussion has served the very useful function of pointing up the difference between interest and purpose. Some of those who have participated seem to have been talking mostly about interests; others were truly dealing with the more elusive thing which we can recognize as purpose.

That there is a difference between the two was recognized by a man who was caught up in one of the several reexaminations of our national purpose which have already taken place in this century. Woodrow Wilson noted prophetically just before the struggle over the League of Nations, "Interest does not bind men together. Interest separates men." Only purpose, Wilson said, can unite men.

Since we are now engaged in a national political campaign, it is well to keep in mind this difference between interest and purpose. In the Wilsonian sense an interest is an end peculiar to a group or individual. It is the kind of end sought by what we call an interest group. It is not an end that recommends itself for general adoption; it sets no goal that can unite a whole people. Such a goal Wilson called purpose.

Too often we wage our political campaigns and evaluate our national posture in terms of interests. Too often the parties put forth platforms, and the candidates make campaign promises, which seek a mere compromise of conflicting interests, which propose some "splitting of the difference." Would it not be more in keeping with our best tradition if we sought a larger purpose within which our separate interests could be united in a more elevated conception of our destiny? Fundamentally, purpose must be examined in terms of what an entire people can regard as the ends of human existence and their relation to the external universe and to God.

The first problem in reexamining national purpose, then, would be to separate interest from purpose. The second would be to distinguish purpose from fulfillment.

If our purpose, as I believe it does, comes from a higher authority than ourselves, we still retain the responsibility. It rests with us, as men, and as a nation, whether we will or will not fulfill our purpose. From this point on when I speak of national purpose I will mean both the purpose that should unite us and the dedication of mind and spirit necessary to achieve it.

Life's editor in chief said before a Senate committee recently, "The founding purpose of the United States was to make men free, and to enable them to be free and to preach the gospel of freedom to themselves and to all men. That purpose has withstood all manner of trial and tribulation, stress and strain."

While I concur that this has proved to be the American purpose reduced to its purest terms, we should remind ourselves that it was not unmistakably so at the time. At the very least we should differentiate between the stated purpose and the processes of fulfillment which are revealed in the continuing thread of our history. Capability, as well as intent to fulfill purpose, is and always has been part of this unfolding destiny.

Stated in the more practical terms which then obtained, the founding purpose was to establish in the new land a society founded on principles of equality under God, dedicated to the general welfare and the blessings of liberty. These were the stated purposes written into the charter documents by the Founding Fathers—philosophers whose collective wisdom under stress we find so worthy of emulation today.

But while Jefferson said we act not "for ourselves alone, but for the whole human race," we know that the English colonies struggling for survival between the wilderness and the sea—a sea open to the warships of predatory monarchies—had not the capability to make all men free. We also know that the founders did not even have the intent to make all men free because they established the United States, partially at least, as a slave society.

Moreover the founders suffered agonizing uncertainties and soulsearching doubts as they went about the fulfillment of the great purpose, of which we can now see that they were seized. As late as the year 1774 so well-informed a man as Benjamin Franklin could say in all seriousness that he "never had heard in any conversation from any person, drunk or sober, the least expression of a wish for a separation" from England.

We now know that even as Franklin said these words, the American sense of purpose was running at full tide. In no time, as we reckon these things, independence had been declared and a war to confirm it was in progress.

Today we look back to the author of the Declaration of Independence as a man truly aware of the purpose that was flowing around him. Yet at the time even he was writing, in his "Notes on Virginia," in almost the exact vein of several of these modern essays on national purpose: "From the conclusion of this war we shall be going downhill. It will not then be necessary to resort every moment to the people for support. * * * They will forget themselves, but in the sole faculty of making money, and will never

think of uniting to effect a due respect for their rights."

The people did unite. They did rise above their material self-interest. The Constitution was written and adopted including, in the end, the Bill of Rights.

Fifty years later the Americans were speaking of a manifest destiny. The new Nation had begun to be stirred by the technological revolution which has changed the world. The age of Jackson brought the rise to prominence of the common man, politically and economically. The word democracy was becoming respectable. The United States could feel its muscle, and its face was turned westward.

But again, not all saw it so. One particularly prominent essayist of the time saw a serious absence of purpose and a dangerous national tendency to materialism. Americans, Emerson wrote, spent their money on trifles and lost themselves in seeking "after fine garment, handsome apartment, access to public houses and places of amusements." He detested what he called the mediocrity which he saw about him and wanted us to be "away with this hurrah of the masses."

There was a difficulty about democracy, but it was not the chasing after fine garments and handsome apartments. It was the revelation of a fundamental conflict in the Constitution.

As the westward movement continued, the ever-present, overriding question was: Shall the new territory be free or slave? By the middle of the 19th century this unresolved question of purpose clearly threatened to destroy the American dream.

The issue was irreconcilable. William Lloyd Garrison and the Antislavery Society held, "The right to enjoy liberty is inalienable. Every man has a right to his own body—to the products of his own labor—to the protection of law—and to the common advantages of society."

Against them Calhoun argued: "It is a great and dangerous error to suppose that all people are equally entitled to liberty. It is a reward * * * reserved for the intelligent, the patriotic, the virtuous and deserving;—and not a boon to be bestowed on [those incapable] either of appreciating or of enjoying it."

From the national dialog one would conclude the American purpose was muddy and confused.

A sure grasp of the right seemed to fail even Lincoln, who was obliged to confess as the slavery issue was joined, "if all earthly power were given me, I should not know what to do as to the existing institution."

Slowly, reluctantly, but nonetheless inexorably, the answer came to him. He declared the Negro slaves emancipated.

It might have been said, as the Civil War ended and the bitter Reconstruction began, that the national purpose was finally to make all Americans free, and by example to encourage the spread of freedom on earth. But not yet could it be said that America was ready to act to make all men free.

With the obstruction of slavery removed the Nation exploded again to the westward—over the Continental Divide to the western ocean. The expansion was coupled with industrialization. For the next three decades our people pursued their separate but converging interests with a vigor unparalleled in history.

Opportunity was the watchword in America and its sound exerted a pull on the entire Western World.

The poet's inscription for the Statue of Liberty ("Give me your tired, your poor") truly represented an invitation which was heard round the world. They came, by the hundreds, by the thousands, ultimately by the millions: Irish, Germans, Italians, Scandinavians, Poles, Slavs, and many others.

The preoccupation with the western expansion, with the industrialization, increased.

Our political men fell under the influence of the spell of economic conquest. The public dialog became strongly flavored with arguments—for example, about the survival of the fittest—that bore little resemblance to the purpose of making men free.

America abruptly entered the 20th century on a new tack. If we had lost our national purpose, we seemed to have found it again. The public dialog began to accentuate again the voices addressed to the general welfare and the blessings of liberty, to government by law and not by men, to faith in government by the people.

Theodore Roosevelt became the man of the hour by denouncing the malefactors of great wealth and by reinforcing his words with actions to restrain their arrogance.

"The only safe course," he warned, "to follow in this great American democracy is to provide for making the popular judgment really effective. When this is done, then it is our duty to see that the people, having the full power, realize their heavy responsibility for exercising that power aright."

The surge of annexation ended and the United States became the first western power, of those which had tasted its fruits, to renounce colonialism.

A voice speaking again with the ringing tones of freedom suddenly echoed over the world.

"The world must be made safe for democracy. Its peace must be planted upon the tested foundations of political liberty. But the right is more precious than peace, and we shall fight for the things which we have always carried nearest our hearts—for democracy, for the right of those who submit to authority to have a voice in their own governments, for the rights and liberties of small nations, for a universal domination of right by such a concert of free peoples as shall bring peace and safety to all nations and make the world itself at last free. America is privileged to spend her blood and her might for the principles that gave her birth."

Those words from Wilson's war message of April 1917—which pointed a new direction toward fulfillment of the American purpose to make all men free—were often mocked in the disillusioned twenties and thirties. But they proved to be fully valid in the fourth and fifth decades of the century when the always recurring assaults on freedom came from across the Rhine in 1940 and Yalu in 1950.

The American resolve to spend her might for freedom has been even more recently tested and not yet has it been found to waver. Nor, I predict, will it ever be, so far as any of us living can foresee.

In my opinion we are definitely and demonstrably a young country. We can, I am confident, put aside for this century, as far as America is concerned, Professor Toynbee's image of a dead civilization which has only its artifacts, covered with jungle vine or sand blasted in the desert sun, to recall it.

We have the vigor and imagination of youth. We are ready to go ahead and explore new approaches. We are a society of individuals. Our institutions project outward from people, not downward to people. The individual initiates, society imitates. The individual follows his endless curiosity, society builds roads that follow his footprints.

Our institutions are the creations of individuals and groups of individuals. They are not ordered into existence by the state. We have no state socialism. We have no state religion. We have no state aristocracy. Our schools—whether they be public or private—remain enterprises shared by men and women actively interested in them.

Our businesses—commercial, industrial, agricultural, and professional—number more than 10 million, 10 million separate ventures which voluntarily serve society and are voluntarily accepted by society. Our capitalists are not the few but the many. There are more than 12½ million shareholders in American business, more of them women than men. Many of our larger corporations have, in fact, more shareholders than employees.

There are, in addition, tens of millions of indirect capitalists. Every person taking out an insurance policy, contributing to a pension plan, or putting his money in a bank is indirectly investing in America.

We are also a nation of land capitalists—we have no landed aristocracy. More than 60 percent of American families own their own homes.

Our technology is surging ahead so fast that it is hard to perceive just what breakthrough in industrial productivity the immediate years ahead will bring, what 10 years will bring, or 15, or 20. Let those who blithely tell us what the gross national product of the United States or the U.S.S.R. will be in 1965, 1970, or 1975 ponder the evidence recently submitted by the Stanford Research Institute to the Senate Foreign Relations Committee.

The institute reminded us that even the most sophisticated predictions can go sadly awry. For example, a report to the National Resources Committee in 1937 tried to anticipate the kinds of new inventions which may affect living and working conditions in America in the next 25 years—or by 1962. In this report most of the major technological developments between 1937 and now were completely unforeseen—despite the fact that many of the Nation's then leading scientists and engineers had been consulted in its preparation.

The 1937 report, for instance, anticipated certain developments in vitamins and synthetic drugs but was silent on antibiotics. There was a long section on power but not a single gazer into the future envisioned atomic energy. Communication was treated at length but there was no hint of radar. Aircraft speeds of 240 miles at 20,000 feet were predicted—but on condition that the problem of cabin-pressurization could be solved. Jet-propulsion was not even mentioned.

It has been argued in some of the essays on national purpose, just as Emerson argued in the last century and Jefferson argued in the century before, that America is threatened by preoccupation with materialism and that we suffer a major cultural crisis. There is little doubt that our level of appreciation for art and literature leaves much to be desired, but it is my sincere conviction that we are only at the beginning of our cultural thrust.

So far, our unique achievement has been the political achievement. We still have to equal the contributions to the fine arts, to philosophy, and to unlocking the fundamental secrets of the universe which have been our heritage from the older societies. But I suggest that the greatest American achievements in these fields lie ahead. Even now we see all about us—in art gallery, in symphony hall, in scientific laboratory—new creative activity in every branch of human aspiration. And all our accomplishments, along with those of other times and countries, are immediately made available to all Americans through our unrivaled channels of print and electronics.

We cannot yet determine the full implications of the effect of massive cultural exposure on national taste and creativity. There is no previous example.

More important, in my judgment, than any of these other descriptions of our society is that we are openly prepared to share it with the world. We are, in this respect, comparable to the society which generated the creativity of the Hellenic civilization.

As Pericles said of his beloved Athens, "We throw open our city to the world, and never by alien acts exclude foreigners from

any opportunity of learning or observing, although the eyes of an enemy may occasionally profit by our liberality; trusting less in system and policy than to the native spirit of our citizens."

Finally, I believe we often fail to see the full dimensions of our Nation's purpose. In my opinion the truth is that the American purpose has continued to broaden as the country has matured and our capabilities have grown. We can see the process in retrospect, in the painful separation from England, in the establishment of government of the people, in the bloody eradication of slavery, in the great expansion and technological adaptation, in the renunciation of conquest, in the willingness to fight for freedom anywhere in the world.

I have a deep conviction that the American purpose is running strong in the 1960's.

I am struck by the fact that in the 15 years since the Communist challenge emerged in full force out of the ashes of World War II, the American people have been the principal effective force to keep it from overrunning the world. They have levied upon themselves the immense sum of $565 billion to preserve the security of the free world and contain the military threat of communism. American forces have stood guard along the frontiers of communism around the world in numbers never before sent forth by a nation for the general security.

If there have been moments of doubt and reversal, we should remember that the American Nation has dealt with a threat to freedom more virulent than any which has existed in human history and continues to deal with this threat day by day. I doubt that a greater dedication, with or without the urgency of open warfare, can be found in our own history or in that of any other people.

So much for what we are and what we have done to fulfill our national purpose.

It can never be said that we have done enough while Communist power exists in such magnitude as to threaten the total end of freedom and of humanity itself.

Several of the contributors to this series have called for action to strengthen the American purpose so that we may more adequately meet this threat.

Dr. Graham called upon the American people as individuals to look particularly to their fitness, their courage and their moral strength. I know of no better place to begin and I truly hope his message has been heard.

Mr. Gardner, in an eloquent plea for the pursuit of excellence, says, "When we raise our sights, strive for excellence and dedicate ourselves to the highest goals of our society, we are enrolling in an ancient and meaningful cause: the age-long struggle of man to realize the best that is in him."

Certainly he and Dr. Graham have supplied ringing answers to the question: What can I do?

I believe that we should also take special account of General Sarnoff's call for an unequivocal decision to win the cold war and hi point that news of this be plainly told to the world.

Mr. Luce, in his own statement on national purpose, delivered as testimony to the Senate Committee on Government Operations, accepted General Sarnoff's proposition as his own, with an amendment. In the atomic age, he suggested, no nation capable of launching a war of annihilation can be presented with the alternative of unconditional surrender. He proposed a more limited aim: severance of the state power of Russia and China from the mission of their present rulers to communize the world.

We all know that the struggle with communism must be fought without atomic war. Mr. Khrushchev himself knows that, though he has yet to convince his Chinese partner, Chairman Mao, who openly has foreseen a Communist victory, and more probably a Chinese Communist victory, from a war of general annihilation. Khrushchev in this instance is right and Mao is wrong. No one, not even the Chinese nation, will survive a general atomic war.

It is, therefore, essential to the American purpose that atomic war must be prevented. I know of only two ways this can be assured: by the maintenance on our part of invulnerable military strength, or by honest disarmament. Until the latter is within our grasp, we cannot temporize with the former.

It is essential to the American purpose that communism shall not be permitted to spread.

These are negative aspects of our national purpose to which not only most Americans, but most of the free world will subscribe. They are, as Wilson said, purposes which unite men.

Beyond this, and insofar as God grants us power to see these things, I believe we are even now witnessing a further broadening of national purposes for achievement of affirmative goals which will also unite us.

Since the end of World War II the core of American foreign policy has been support of the United Nations. Immediately second have been our efforts, still widely debated among us, to give strong economic support to the free nations. We have gone to the relief of distressed populations, rehabilitated the shattered economies of our allies and former enemies alike.

We have assisted the technological adaptation of the emergent societies. In all of these programs one can find self-interest. In fact, they have often been defended as such by their hard-pressed supporters in Congress. It could be argued that we have merely been stimulated by the Communist challenge. I prefer, as an American, to think these things would have come if communism had never spread beyond the pages of Marx and Engels.

Moreover, it is my belief that there is something more fundamental here than interest. We have already converted more than $78 billion from our own uses for these efforts, and they are certain to continue.

Most of us know instinctively that there is no more important human event occurring today than the revolution of expectations among the peoples of newly emerging nations, representing a third of the human race and uncommitted as between the free world and the Communist tyranny.

It is my firm belief that it is America's national purpose to extend the goals of the preamble of our Constitution to our relations with all men. At this point I should like to repeat these propositions:

Form a more perfect union.
Establish justice.
Insure domestic tranquillity.
Provide for the common defense.
Promote the general welfare.
Secure the blessings of liberty for ourselves and posterity.

Four of these six goals communism purports to offer mankind. That is why their cause has wide appeal. In place of two of them, justice and liberty, they demand a social discipline enforced by tyrannical state power.

I am as certain as I am certain of anything in life that these propositions were not conceived in the minds of men solely or unaided, and that they are inseparable. I am also certain that the inseparability applies not to ourselves alone but to all mankind.

I believe that the inseparability of these propositions from human destiny is the American purpose and that it will prevail.

SHOULD FEDERAL AID GO TO PRIVATELY SPONSORED SCHOOLS?

Mr. WILEY. Mr. President, nationally there is recognized need for improving and expanding our educational system. To fulfill these needs, both the Senate and the House of Representatives have approved measures—although somewhat different—for giving a shot in the arm to the program.

Traditionally, the question of extending Uncle Sam's role in our educational system has been controversial. For the most part the major responsibility has been left to the States and the local communities—as it should be.

Because our Nation is having critical problems—which better educated people can help resolve, however—the present Congress has expressed its will for assuming a larger responsibility in this field.

During the debate on allocation of taxpayers' funds from the Public Treasury, the question, too, arose on the idea of allocating Federal funds to private, as well as publicly supported educational institutions.

As all of us know, there are very strong feelings on this issue. Particularly in my State of Wisconsin, the question has arisen on whether or not Federal assistance should be made available to parochial schools.

Recognizing the need for clarifying, insofar as possible, the traditional relationship between church and state, I ask unanimous consent to have a number of items printed in the RECORD:

First. Excerpts of a statement by Senator KENNEDY.

Second. A statement reviewing constitutional interpretations and decisions by the Supreme Court relating to the separation of church and state prepared by Legislative Reference Service of the Library of Congress.

Third. "Fighting Off Religious Prejudice," the Evening Star, August 17.

Fourth. An article appearing in the August 21, 1960, issue of the Milwaukee Journal entitled "School Bills Periled by Catholic Protests."

There being no objection, the excerpts, statement, and articles were ordered to be printed in the RECORD, as follows:

EXTRACT OF STATEMENT BY SENATOR KENNEDY IN AN ADDRESS BEFORE THE AMERICAN SOCIETY OF NEWSPAPER EDITORS ON APRIL 21, 1960

Federal assistance to parochial schools, for example, is a very legitimate issue actually before the Congress. I am opposed to it. I believe it is clearly unconstitutional. I voted against it on the Senate floor this year, when offered by Senator MORSE.

STATEMENT REVIEWING CONSTITUTIONAL INTERPRETATIONS AND DECISIONS BY THE SUPREME COURT RELATING TO THE SEPARATION OF CHURCH AND STATE BY THE LEGISLATIVE REFERENCE SERVICE OF THE LIBRARY OF CONGRESS

Based upon a literal evaluation, the historical record together with the relevant Supreme Court opinions will be found to provide more than adequate support for the thesis that amendment I renders unconstitutional Federal aid to sectarian educational institutions. Admirably suited for this purpose is, of course, the statement of Thomas Jefferson, in his letter to the Danbury Baptists in 1801, that the first amendment built a "wall of separation between church and state" (O'Neill, op. cit., p. 286). The significance of this conclusion would appear to be further amplified by the fact that in

the drafting of the same Jefferson had the prior counsel of Attorney General Lincoln (R. Freeman Butts "American Tradition in Religion and Education" (1950), pp. 93–94). Virtually identical in import is the assertion of James Madison, an active participant in the drafting of the first amendment to the effect that "strongly guarded [thereby] * * * is the separation between religion and government in the Constitution of the United States" (Beverly Fleet "Madison's Detached Memoranda," William and Mary Quarterly (3d ser., 1946 3: 555)).

Although proponents of Federal aid have labored valiantly to devise a correct interpretation of these statements, principally by reexamining the circumstances under which they were uttered and by offering other quotations from the writings of Madison and Jefferson favorable to their cause, they cannot erase the fact that the wall of separation concept has been frequently reaffirmed both by historians, constitutional commentators, public officials, and Justices of the Supreme Court. Thus, in his "Civil Liberty and Self-Government," published in 1852, Francis Lieber asserted that:

"It belongs to American liberty to separate entirely that institution which has for its object the support and diffusion of religion from the political government. We have seen already what our Constitution says on this point. * * * No warship shall be interfered with, either directly by persecution, or indirectly by disqualifying members of other sects, or by favoring one sect above others; and no church shall be declared the church of the state, or the established church; nor shall the people be taxed to support the clergy of all churches. (Quoted by Anson Phelps Stokes. "Church and State in the United States" (1950), 3: 716–717; also quoted with approval, along with Jefferson's statement, by the Supreme Court in *Reynolds* v. *U.S.* (1868) 98 U.S. 145, 166).

Also recorded as subsequently expressing concurrence with Jefferson's "wall of separation" concept were President Grant, Elihu Root, and Justice Jeremiah S. Black who concluded that the founders of the Constitution "built up a wall of complete and perfect partition" between church and state (quotations attributed to Grant, Root, and Black are reproduced by Justice Frankfurter in *McCollum* v. *Board of Education*, op. cit., pp. 218–219). Charles A. Beard later interpreted such utterances as indicative of an intention of the sponsors of the first amendment to prevent Congress from voting "money for the support of all churches" ("The Republic" (1944), pp. 165–166, 170).

To refute the contention that the statements attributed to Jefferson and Madison have been quoted out of context and that history does not sustain the interpretation accorded to them, one need merely point to the record of consistent, literal application thereof over a period of 160 years during which the "Congress has never enacted a general appropriation bill for religion on a nonpreferential basis" (Leo Pfeffer. Church and State: Something Less than Separation. U. Chic. L.R. (1951), 19: 24). Moreover, not the slightest deviation from the aforementioned utterances can be attributed either to Jefferson or Madison during their tenure of public office. Thus, in 1784, Madison vigorously opposed a bill of the Virginia Legislature allotting funds for "Teachers of the Christian Religion" and permitting taxpayers averse to allocation of their contributions for the support of any Christian sect to designate that their payments be utilized for "general educational purposes" (quoted in appendix to *Everson* v. *Board of Education*, op. cit., p. 74). When serving as President, Jefferson and Madison also were of the opinion that not even a proclamation of Thanksgiving to God was constitutionally permissible (Stokes, op. cit., 1: 649, 697; Butts, op. cit., p. 94). According to Madison, appointments of Chaplains in the Houses of Congress and the granting of tax exemption to houses of worship contravened the prohibition of the First Amendment (Fleet, op. cit., p. 559, n. 56; Stokes, op. cit., I: 421).

Finally, reference must be made to the fact that the historical record similarly affords virtually no sustenance for the propositions advanced by proponents that Americans consistently "have been a religious people, that those who helped to frame the first amendment were the friends, not the enemies, of religion, and, therefore that they could not have intended to have religion by depriving it of constitutional support" (Pfeffer, op. cit., p. 20). According to others, the period during which the Constitution and the first amendment were adopted was marked by a widespread indifference, if not hostility, to church religion" (Stokes, op. cit., I:229–230; Charles A. Beard. "The Rise of American Civilization" (1927), p. 449). Even among those framers who could be deemed sympathetic to organized religion there was widespread acceptance of the conclusion advanced by Madison that "religion flourishes in greater parity without the aid of government" (William A. Blakey, "American State Papers on Religious Freedom" (1943), p. 194).

In the light of this historical background, it is understandable that the Supreme Court, in the recent decisions sustaining the released time programs and free bus transportation for children attending parochial schools, should reiterate that Jefferson's "wall of separation" doctrine has not lost its vitality. Thus, in *Everson* v. *Board of Education* (op. cit., pp. 15–16), Justice Black declared that: "The 'establishment of religion' clause means at least this: Neither a State nor the Federal Government can pass laws which * * * aid all religions * * * no tax in any amount, large or small, can be levied in support of any religious activities or institutions, whatever they may be called, or whatever form they may adopt to teach or practice religion. * * * In the words of Jefferson, this clause [Am. I] was intended to erect 'a wall of separation between the church and state.'"

Again, in *Zorach* v. *Clauson* (op. cit., p. 312), the Court asserted that "Government may not finance religious groups nor undertake religious instruction, nor blend secular and sectarian education."

Independently of these statements, none of the recent rulings of the Court in which they are contained lend tangible support to the thesis that nondiscriminatory Federal aid is constitutionally tenable. Pertaining as they do to State, rather than Federal, action, these decisions did not present the Court with an opportunity to pass on the validity of an appropriation of Federal tax revenues directly to denominational schools. In fact, in none of these cases was a comparable State appropriation at issue. Thus, in the Louisiana textbook decision, in which first amendment freedoms were not even pleaded by the litigants, the Court had before it merely an allocation of funds to make public school texts available on loan to pupils attending parochial and other private schools. The children, not the schools, were the immediate beneficiaries thereof; and by no stretch of the imagination could the materials provided be viewed as affording any intended, or direct, governmental assistance to the teaching of religion. All that was fostered was secular education, a matter of concern to the entire populace (*Cochran* v. *Board of Education*, op. cit., p. 375). Again, in the bus transportation case, wherein the State action sustained was declared to go to the verge of what was permissible under amendment I, the immediate recipients of the funds allocated were the parents of schoolchildren, and the primary objective sought to be promoted thereby was held to be public safety, or the avoidance of traffic accidents, a goal in which the public interest was by no means limited to the pupils in question, much less the religious schools which they attended (*Everson* v. *Board of Education*, op. cit., pp. 17–18). Likewise, in the released time controversy, the State conduct finally meriting judicial approbation also entailed no expenditure of public funds to, nor any use, and corresponding expense in terms of maintenance, of public property; that is, the school buildings, by sectarian groups. Affirmative State aid for secular education under religious auspices, or for religious instruction by denominational institutions thus not having been directly at issue in any of these decisions, they provide dubious constitutional support, if at all, to the sponsors of Federal aid to sectarian schools (*Zorach* v. *Clauson*, op. cit., pp. 306–309, 311).

What proponents of such aid persist in ignoring, when they attempt to justify Federal expenditures as benefiting primarily students in quest of a secular education, is that many of the groups operating sectarian schools are doctrinally obligated not to recognize any distinction between secular and religious teaching. To the latter "no teaching can be 'neutral'," but on the contrary must "be permeated with Christian piety." To the extent that such groups must yield to this doctrinal compulsion they would appear to undermine irreparably the constitutional merit of their contention that disbursement of Federal aid on a nondiscriminatory basis entails no more than just compensation to religious institutions for offering students electing to attend the same quality of instruction as is made available in publicly maintained schools. Indeed, the burdens imposed by such doctrinal considerations would seem destined unavoidably to render such expenditures indistinguishable from the disbursement of tax revenues in aid of religion itself. Constitutional support for the latter can be derived neither from decisions of the Court nor from opinions of the Founding Fathers (Milton R. Konvits, "Separation of Church and State: The First Freedom," Law and Contempt. Prob., op. cit., pp. 58–59; Jackson, J., dissenting in *Everson* v. *Board of Education*, op. cit., p. 24).

[From the Evening Star, Aug. 27, 1960]

FIGHTING OFF RELIGIOUS PREJUDICE—DEFEAT OF SLANDERERS DURING CAMPAIGN IS CALLED RESPONSIBILITY OF ALL

(By Ralph McGill)

According to a wire service dispatch, Mrs. Loretta Clodfelter of Knoxville, Tenn., has contributed a minor footnote to the 1960 political campaign.

The Knoxville housewife has filed suit for a separate maintenance, charging that her husband refused to allow her to take her 3-year-old son to church because "Baptist preachers are against KENNEDY for President." Mr. Clodfelter, she reports, ordered her out.

It is perhaps inevitable that the religious controversy will attract attention in the weeks ahead, with incidents preposterous, tragic and senseless.

The basic problem of the candidates is to make sure their own staffs, both at headquarters and in the various States, scrupulously avoid any political use of religion. The Nation also has a responsibility.

The mails already are filling up with a lot of hate stuff, some of it ridiculous, some of it vicious and false. It is this we need to watch. For many thoughtful persons there is a problem wholly outside the area of prejudice. These may be expected to resolve this dilemma logically and sensibly as the campaign continues, the issues are discussed, and the candidates make plain their positions.

There remains a personal and national responsibility not to permit the slanderers and smearers, professional and amateur, to practice their evil arts without being publicly revealed for what they are.

A part of the complexity of the political problem is the parochial or church-supported schools. This has never been wholly an issue restricted to the Roman Catholics, although their schools were, and are, the most numerous.

But today there is a tremendous burgeoning of parochial schools. This is especially true in the South, but it is by no means confined to that region. The national increase in per capita income, and the desire of parents for schools able to give special instruction or more individual attentions have caused a great leap forward in private schools. Churches have sponsored many of them. Until about 10 years ago the church schools were largely Roman Catholic, with Episcopalians and Presbyterians next. But today all of these have increased and there are, in addition, many Baptist, Methodist, Lutheran, and other sectarian schools initiated by churches.

Most of them are in need of money. Many of them were begun "because we ought to have a school." Others, without surveys or planning, "built on faith." A shocking number of church schools, more particularly the new ones, are not well staffed and cannot possibly make a go of providing first-rate accredited education. A substantial percentage of them have no valid reason for existence save for what might be called church vanity.

Hence, there is a growing clamor for the private parochial schools to be included in Federal aid. That this pressure may defeat public school aid is possible and tragic.

It seems to be necessary to face up to certain facts.

It is true enough that persons who send their children to private schools still pay taxes for public education. But that they should share in this is a specious argument.

The public schools are there—and they are free. The honest parents who send a child to private school must admit they do so because they want something extra. It may be they wish their child to have extra religious instruction not received in public schools. Or, the smaller classes, the emphasis on individual instruction, or, for the time being, at least, an escape from possible integration, may be the motivating factor.

But whatever it is, there is a desire for something not found in public education. A choice is made. There is no reason then why the parent who makes such a choice should not pay the bill. He should not call on the Federal Government to assist him to buy something extra for his children.

Public education will always be the backbone of our way of life, our system of government. It must not be hurt by private schools.

SCHOOL BILLS PERILED BY CATHOLIC PROTESTS—U.S. LAWMAKERS GET LETTERS ON FAILURE TO PROVIDE PAROCHIAL AID IN PROPOSALS

(By Laurence C. Eklund)

WASHINGTON, D.C.—Federal school aid legislation, placed on the "must " list for this session by the Democratic leadership, is imperiled by a deluge of letters from Catholics who oppose it.

In the last 2 weeks, Congressmen have received thousands of letters from persons identifying themselves as Catholics who object to the pending House and Senate bills because they exclude benefits to parochial schools.

This last minute, well organized letter writing campaign dramatizes a sharp difference on this issue between Senator KENNEDY, of Massachusetts, the Democratic Presidential nominee, and a large number of his fellow Catholics.

KENNEDY, who insists on aid to education as part of a "minimum" program for this resumed session of Congress, was criticized by some Catholics recently when he spoke against the Federal Government's extending support to sustain any church or its schools.

WILEY GETS 300 LETTERS

KENNEDY has consistently maintained that the separation of church and state is fundamental to our American concept and heritage and should remain so.

Senator WILEY, Republican, of Wisconsin, has received more than 300 letters from Wisconsin Catholics and Catholic organizations in the last 2 weeks urging him to vote against school aid legislation. The letters pour in at WILEY's office at a rate of about 20 a day.

Actually, WILEY already has favored the legislation. He was paired for the McNamara bill, passed by the Senate February 4, providing $928 million a year for 2 years for both school construction and teachers' salaries. Senator PROXMIRE, Democrat, of Wisconsin, voted for it.

The House-passed bill, not quite so broad, provides $325 million a year for 4 years for school construction only.

CONFERENCE REFUSED

The House Rules Committee has refused to grant the necessary joint conference between House and Senate, and action is therefore stalemated. Any conference report would have come before both House and Senate for approval.

Neither proposal allocates funds for parochial or private schools, and that is what most of the letter writers are complaining about.

Scores of letters from parish priests and the Knights of Columbus, Catholic fraternal organization, complain that the legislation would discriminate against parents of 5,090,000 children in parochial schools.

They were particularly bitter about provisions of both House and Senate bills allotting funds to the States on the basis of school age (5–17 years) population, including those in parochial and private schools, at $20 a child, while such schools were excluded from benefits. Many of them reminded WILEY that they were paying for both public and parochial schools.

DISCRIMINATORY NATURE

Here are a few typical complaints to Wiley from Wisconsin constituents:

Mineral Point Council of Knights of Columbus: "We are opposed to the discriminatory nature of the Senate bill. We have no quarrel with the public schools but object to being penalized for exercising our civil rights to educate our children in another system by paying for both systems. Under this legislation the Federal Government would count our children as a basis for distributing funds to each school district but would exclude all but the public schools from the benefits. We feel you should exert every effort to have this precedent-shattering bill defeated."

Ashland K. of C.: "It is unfair, discriminatory, and inequitable."

GREATLY DISTURBED

River Falls Catholic priest: "I am not opposed to aid for public schools for an increase in teachers salaries if this is deemed necessary. However, I am greatly disturbed at a bill that counts all the children of our parochial schools in arriving at the amount of help but counts them out as recipients of any aid distributed. This is taxation without representation. Is this bill designed to force private schools out of existence by making it impossible for them to compare favorably with our public schools? Is this aid designed to punish parents for exercising their rights granted under the Constitution?"

Sun Prairie priest: "It is a $100 million steal from the Catholics of the United States."

Burlington priest: "As a high school teacher, I take pains to point out to my students it is a violation of distributive justice for the State to require Catholics desiring their own schools to support them at their own expense and at the same time support State schools by their taxes. These bills violate justice. The system of allotting aid to States according to the number of school-age children is pure fraud."

DEFEAT IS URGED

The Knights of Columbus councils at Marshfield and Fond du Lac sent telegrams urging defeat of the legislation.

"We do not wish to pay for what we do not receive," protested a Marshfield chiropractor.

"We pay taxes, but our kids can't ride the school buses," complained a Catholic from Willard.

A Milwaukeean insisted that educational costs could best be administered through "local, State, and private initiative" and he expressed opposition to "Federal subsidies for education."

A Sun Prairie woman who said she and her family were able to take care of their 93-year-old mother without Federal aid contended, "Government handouts will be the downfall of our country."

While noncommittal as to how he might vote if the matter came before him again, WILEY replied to his Catholic correspondents that they could be sure that he would keep their thoughts in mind. He agreed with them that private and parochial schools "have made many significant contributions to our American educational and public life."

When the House bill was acted upon in May, Representative ZABLOCKI, Democrat of Milwaukee, vainly sought approval of an amendment providing construction loans for parochial schools.

The amendment was denounced by Protestants and other Americans United for Separation of Church and State as undermining an important foundation stone "in the wall of separation between church and State."

Representative THOMPSON, Democrat, of New Jersey, author of the House bill, who like ZABLOCKI is a Catholic, denied ZABLOCKI's charge that his bill discriminated against seven million children in parochial and private schools.

"Those who attend nonpublic schools do so entirely voluntarily," THOMPSON told ZABLOCKI. "This is their right, for which they choose to pay."

THOMPSON insisted that he intended his bill to relate only to public schools and public school facilities.

ZABLOCKI's amendment was ruled not germane, but even without the amendment he voted for the bill, along with the four other Wisconsin House Democrats and Republican O'KONSKI.

Republicans BYRNES, LAIRD and VAN PELT voted against it, and Republican WITHROW was paired against it.

REPORT OF U.S. CONSTITUTION 175TH ANNIVERSARY COMMISSION

Mr. JOHNSON of Texas. Mr. President, if the Senate acts on the housing amendments, it will be necessary for the House to act also. In view of the fact that we are in the concluding hours of the session, I ask unanimous consent that we proceed to the consideration of Calendar No. 1987, with the understanding that if that bill becomes the pending business, notwithstanding the agreement entered into in connection with the Freedom Commission—and this request would in no way affect that agreement

except to delay proceeding to it for about 20 or 30 minutes——

Mr. MUNDT. Mr. President, reserving the right to object——

Mr. JOHNSON of Texas. I have not made my request yet.

Mr. MUNDT. So there will be no misunderstanding, since I think the Senator is leading up to a request, may I ask how much delay would be involved?

Mr. JOHNSON of Texas. Not over 30 minutes, because we have a consent agreement on it.

Mr. MUNDT. Would it be the plan of the majority leader to proceed with the debate on the Freedom Commission?

Mr. JOHNSON of Texas. I would not have brought it up, if I did not have that intention.

Mr. MUNDT. I shall not object.

Mr. JOHNSON of Texas. It is with the understanding that the unanimous-consent agreement will not affect the unanimous-consent agreement previously entered into, and with the understanding that at the conclusion of the consideration of the housing amendments, we will take up consideration of the Freedom Commission bill and conclude action on it under the unanimous-consent agreement previously entered into.

Mr. GORE. Mr. President, would the unanimous-consent agreement apply to other amendments offered to the bill, or does the majority leader confine his request to the housing amendments?

Mr. JOHNSON of Texas. The housing amendments.

Mr. FULBRIGHT. I did not understand whether the limitation applied to the housing amendments.

Mr. JOHNSON of Texas. There are three housing amendments. It would apply to them.

Mr. FULBRIGHT. On the housing amendments. Is that correct?

Mr. JOHNSON of Texas. That is correct.

Mr. FREAR. Mr. President, reserving the right to object, I should like to ask if by agreeing to the unanimous-consent request it will mean that any other amendment may be offered.

Mr. JOHNSON of Texas. We already have an agreement on the three amendments to extend the programs that are being closed out.

Mr. FREAR. The joint resolution is a very good vehicle for it. Because of my interest in it, I might wish to submit some amendments. I do not want to preclude my position. However, I recognize the desirability of passing a housing bill, and I am in favor of it, and I want to see it passed.

Mr. JOHNSON of Texas. The agreement has already been entered into. All I am doing is to bring it up ahead of the Freedom Commission bill.

Mr. FREAR. Then my words are useless, apparently, if that agreement has already been entered into. Perhaps I should apologize for taking the time. I thought I was reserving my right to object.

Mr. JOHNSON of Texas. The Senator may reserve his right. I did not gather that the Senator recognized the fact that we had entered into an agreement on the housing amendments.

The PRESIDING OFFICER. Is there objection to the unanimous-consent agreement? Without objection, it is entered.

The joint resolution will be stated by title for the information of the Senate.

The CHIEF CLERK. A joint resolution (H.J. Res. 784) amending the act of July 14, 1960, to extend the time within which the U.S. Constitution 175th Anniversary Commission shall report to Congress.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The resolution is open to amendment.

Mr. SPARKMAN. Mr. President, I send forward an amendment and ask that it be reported. I offer this amendment on behalf of myself and the senior Senator from Indiana [Mr. CAPEHART].

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. At the end of the bill insert a new section, as follows:

SEC. 2. (a) Section 2(a) of the National Housing Act is amended by (1) striking out "1960" and inserting in lieu thereof "1961", and (2) striking out the last sentence of the first paragraph thereof.

(b) Section 401(d) of the Housing Act of 1950 is amended by striking out "$1,175,000,000", "$125,000,000", and "$50,000,000" and inserting in lieu thereof "$1,675,000,000", "$175,000,000", and "$100,000,000", respectively.

(c) Section 203(a) of the Housing Amendments of 1955 is amended by striking out "$100,000,000" and inserting in lieu thereof "$150,000,000."

The PRESIDING OFFICER. Is there objection to the consideration of the amendment en bloc? Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I yield to the Senator from Alabama such time as he may desire.

Mr. SPARKMAN. Mr. President, on June 16 the Senate passed a general housing bill, S. 3670. On June 20, the Committee on Banking and Currency of the House of Representatives favorably reported a general housing bill, H.R. 12603. Both of these bills contain provisions essential to the national welfare. Unfortunately, both bills are pending in the House of Representatives primarily because the President and his supporters oppose the enactment of general housing legislation this year.

It is clear to me that the President's opposition will prevail, and the House of Representatives will not act upon either of these bills. I am advised that those who oppose general housing legislation at this session will not obstruct the enactment of legislation to continue three programs which will expire or will become inoperative for lack of funds. These three programs are as follows:

First. The FHA title I home repair and improvement insurance program—scheduled to expire on October 1, 1960.

Second. The college housing loan program which has been without funds since November 1959.

Third. The public facility loan program which has applications on hand totaling an amount in excess of uncommitted funds.

I am reluctant to initiate an emergency action which fails to deal with housing problems in general. On the other hand, if we fail to act, three essential programs will die and the public will suffer. Faced with these two distasteful alternatives I believe that the extension of these programs, and the abandonment of general housing legislation, is the lesser of two evils. Consequently, my proposal would amend existing law as follows:

First. The FHA title I home repair and improvement insurance program would be extended for 1 year, until October 1, 1961; and the ceiling on the title I insurance authorization would be removed.

Second. The revolving fund for college housing loans would be increased by $500 million—an amount sufficient to cover the existing backlog of approximately $300 million, and sufficient to permit processing of applications to be received between now and the time that the Congress can review this program next year.

Third. The revolving fund for public facility loans would be increased by $50 million—an amount sufficient to cover the backlog of applications now on hand and to permit processing of applications to be received in the future.

These three provisions are identical with provisions contained in S. 3670 as it passed the Senate on June 16.

Mr. President, this is the third consecutive year in which the executive branch of the Government has obstructed the passage of general housing legislation. In 1958, this obstructionism succeeded and resulted in the exhaustion of the FHA general insurance authorization, the depletion of the college housing loan fund, and the depletion of contract authority for urban renewal projects. In 1959, this obstructionism was expressed through two Presidential vetoes and was climaxed by the reluctant approval of the third general housing bill passed last year. In 1960, this obstructionism will result in the expiration of the home repair and improvement insurance program, the depletion of the college housing loan fund, and the depletion of the public facility loan fund—unless these three programs are continued as I am proposing.

Mr. President, I recommend and urge favorable consideration of these three amendments to existing law.

Mr. JOHNSON of Texas. I yield 3 minutes to the Senator from Pennsylvania.

Mr. CLARK. Mr. President, with deep reluctance I shall support these amendments. It appears to be the only way, operating as we do under divided government, by which we can get any kind of housing program through Congress at this session, and signed by the President. I should like to point out the inadequacy of the bill. It does not deal with the following programs which we put into the excellent housing bill that passed the Senate earlier in the session:

First, it does not deal with the FHA general insurance authorization; second, it does not deal with the urban renewal

grant authorization; third, or low-rent public housing; fourth, it does not provide for the FNMA special assistance, mainly for urban renewal housing. Fifth, it eliminates very badly needed authorization for additional housing for the elderly, which was strongly supported by the distinguished Senator from Michigan [Mr. McNAMARA]. Sixth, it does not permit the FHA to move actively into rehabilitation of blighted areas. Seventh, it does not facilitate urban renewal in areas needed for expansion of hospitals and colleges. Eighth, it does not provide for facilitating cooperative housing.

In all these respects it is inadequate.

However, Mr. President, we have divided government, and under divided government, with the legislature on one hand and the executive on another, we always have to accept limited programs if we are to get anything at all.

I must in all candor admit that some of our difficulties in connection with this legislation arise not from the executive, but from those in the other body who are opposed to any housing bill. Under their peculiar, archaic rules, a few men can prevent action over there. I hope they will change their rules next year in the interest of effective representative government.

Accordingly, because I believe we should extend the home improvement program, because we do need something to be done for community facilities, and because I know institutions of higher education are desperate in their efforts to get Federal funds in order to get college housing, I shall support the bill.

I should like to ask my friend from Alabama a question or two, if he will be kind enough to respond. It is my understanding that it is the intention of the Senator from Alabama to convene the Housing Subcommittee early next year in order to write a comprehensive Housing Act of 1961.

Mr. SPARKMAN. That is certainly my intention.

Mr. CLARK. Is it the opinion of my friend from Alabama that we could well include in the housing bill provisions which now deal with middle income housing, sponsored by Senator JAVITS and me, reported by the Committee on Banking and Currency, and now on the calendar, but which have no chance of adoption at this session of Congress?

Mr. SPARKMAN. I think it can be done. The Senator will recall that such a program was not included this year because we did not have the time to go into it adequately in order to incorporate it in a bill that we felt we could put through Congress.

Mr. CLARK. I assume that the Senator from Alabama will give me some support in the Senate, as he did last year, in an attempt to set up a Department of Metropolitan Urban Affairs in the executive establishment.

Mr. SPARKMAN. That has been put on the calendar in the form of a separate bill. I fully agree with the Senator on the inadequacy of the measure we are asking to put through, but we are being realistic and we are getting some things we desperately need. I am sure the Senator agrees with me.

Mr. CLARK. I thank my friend for his candid response to my questions.

Mr. CAPEHART. I yield myself 1 minute. Mr. President, Congress has no other choice but to pass this proposed legislation. We strongly recommend it. I yield 5 minutes to the Senator from New York.

Mr. JAVITS. All of us have heard the expression about a pistol being held to someone's head. We now see a pistol being held to the heads of a hundred people.

I do not know of anyone who will not agree with us that this is completely inadequate legislation. Yet I know of few better friends of housing than the Senator from Alabama [Mr. SPARKMAN]. He is pretty much of a barometer in this field. If he feels it must be done—and both the Senator from Pennsylvania [Mr. CLARK] and I agree—then it ought to be done. It is sad that it must be done this way.

I say that for this reason. It is almost inexplicable to me. The stimulation of housing is one of the root bases of American prosperity. Why? All the fears that the FHA mortgage plan, public housing, and urban renewal housing would become socialized or would become Government controlled have been found to be absolute nonsense. On the contrary, the housing industry is probably as much a private industry as anything in the country. It could not have done the job it did, for its own prosperity and future, without these governmental aids. Yet in the final analysis we are completely inhibited and prohibited from doing what is required to promote better housing.

The Senator from Indiana [Mr. CAPEHART], who is such a valued and extremely important member of the Committee on Banking and Currency, has pointed to many of the other phases of housing legislation which are contained in the Senate bill. I think all of us, whatever may be our views concerning individual details, must be deeply disappointed, even disheartened, that the comprehensive housing bill got nowhere.

I call particular attention to the fact that in the bill we sent to the other body the FHA program was reduced from one-half to one-quarter of 1 percent, an extremely important saving to the small homeowner. I hope this will be impressed upon our colleagues in the House of Representatives in terms of what we must do when we return in January.

The 12½-percent limit on what a State could get for college housing was dealt with in the bill. There were increases in the relocation allowances for families having low incomes, and for the many families in the lowest income groups who were displaced by housing projects. Substantial money was provided for State and urban renewal projects.

So there has been a real loss. We are experiencing a real reverse in passing this bobtailed housing bill. I think we ought to realize that. I think that message ought to go out to the country, because it will have a major influence in the next campaign, when candidates are asked: "What do you intend to do about housing when Congress convenes next year?"

Finally, one of the casualties of this session is the middle-income housing bill, which the Senator from Pennsylvania [Mr. CLARK] and I had the honor to sponsor, in which the committee showed tremendous confidence, based upon what we have presented in the report. The distinguished Senator from Alabama gave fine leadership to the measure, and the Senator from Indiana [Mr. CAPEHART] gave us help, based upon the pattern which we had established and approved in New York in the so-called Mitchell-Armour program, of providing low-interest credit to cooperatives and other reduced-rental projects, especially for middle-income families.

I should like to ask the Senator from Alabama what might be his intention concerning that phase of the program when we return in January, in view of the fact that it is falling by the wayside, although it was reported by the committee.

Mr. SPARKMAN. I believe the Senator from New York heard my answer to the question asked by the Senator from Pennsylvania [Mr. CLARK]. I said it would be my purpose to hold meetings at an early time next year, following the convening of Congress. I see no reason why, next year, we should not have ample time to consider a middle-income housing program, with which I was greatly impressed, but which, as the Senator knows, we reported as a separate bill this year. We did this because we felt we simply had not had the time to explore the proposed program sufficiently to bring it to the floor as a part of the omnibus bill.

The PRESIDING OFFICER. The time of the Senator from New York has expired.

Mr. JAVITS. Mr. President, may I have 1 additional minute?

Mr. CAPEHART. I yield an additional minute to the Senator from New York.

Mr. SPARKMAN. I am in accordance with the statement of the Senator concerning the inadequacy of the bill. However, let us remember that the Senate did its job. We passed a good housing bill.

Mr. JAVITS. We certainly did.

Mr. SPARKMAN. I regret, as much as does the Senator from New York, the circumstances which make it impossible for us to have that bill enacted at this session of Congress. Nevertheless, we are faced with a realistic situation; and since three items are noncontroversial and are bipartisan, I feel we ought to salvage at least those three programs.

Mr. JAVITS. Could we say, therefore, that a middle-income housing bill will be eligible for inclusion next year in the omnibus bill?

Mr. SPARKMAN. I certainly am one who would support that idea.

Mr. JAVITS. I thank the Senator from Alabama.

Mr. CAPEHART. Mr. President, first, I congratulate the distinguished Senator from New York for what he has said on this subject. The Senate passed a good housing bill weeks and weeks ago. The fact that a housing bill is not to be

enacted is not the fault of the Senate. The bill was held up in the House Committee on Rules. What we are doing today is the best we can do for the housing industry of America, namely, to pass these three items. Title I, which relates *to housing* repairs, will expire at midnight tonight. There would be no legislation at all on the subject if we did not pass the so-called bobtailed bill today. So we have no choice except to do what we are doing.

Mr. BUSH. Mr. President, will the Senator yield?

Mr. CAPEHART. I yield.

Mr. BUSH. I am very glad we shall have a chance to vote on the bill today. I congratulate the chairman of the Subcommittee on Housing, the distinguished Senator from Alabama [Mr. SPARKMAN] upon bringing the bill up, even at this late moment.

I have attended every meeting of the Subcommittee on Housing and all its hearings this year. While there is more that, perhaps, we should like to have in the form of housing legislation, the three items which are in the bill constitute the bare minimum. They are all absolutely necessary for the continuance of programs which are of considerable importance to our country.

I am delighted to join with my distinguished senior colleague on the committee in endorsing the passage of the bill.

Mr. CAPEHART. Mr. President, I shall yield back the remainder of my time, if the Senator from Alabama will do likewise.

Mr. SPARKMAN. Mr. President, since I have no other requests for time, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the committee amendments en bloc.

The amendments were agreed to.

The PRESIDING OFFICER. The joint resolution is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the joint resolution.

The amendments were ordered to be engrossed, and the joint resolution to be read a third time.

The joint resolution (H.J. Res. 784) was read the third time, and passed.

The title was amended, so as to read: "Joint resolution amending the act of July 14, 1960, to extend the time within which the U.S. Constitution One Hundred and Seventy-fifth Anniversary Commission shall report to Congress including certain amendments relating to housing."

Mr. JOHNSON of Texas. Mr. President, I move that the Senate reconsider the vote by which the joint resolution was passed.

Mr. DIRKSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FREEDOM COMMISSION

Mr. JOHNSON of Texas. Mr. President, under the unanimous consent agreement, I ask that the Senate proceed to the consideration of S. 1689, the Freedom Commission bill.

The PRESIDING OFFICER. The Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the bill (S. 1689) to create the Freedom Commission for the development of the science of counteraction to the world Communist conspiracy for the training and development of leaders in a total political war.

Mr. JOHNSON of Texas. Mr. President, do Senators desire to discuss the bill further?

Mr. MUNDT. I shall be glad to discuss the bill briefly.

Mr. McCARTHY. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Minnesota will state it.

Mr. McCARTHY. Does the agreement provide for one hour on the bill?

The PRESIDING OFFICER. The Senator is correct.

Mr. McCARTHY. And one-half hour on any motion or amendment that may be offered?

The PRESIDING OFFICER. The Senator from Minnesota is correct.

Mr. McCARTHY. The amendments did not have to be pending at the time the agreement was entered?

Mr. JOHNSON of Texas. No.

Mr. President, does the Senator from Connecticut desire to speak on this subject now?

Mr. DODD. Not at this time, except that I would like to read a wire which I received this morning from our distinguished colleague from Illinois, Mr. DOUGLAS. Senator DOUGLAS is the coauthor of this bill and is one of its most eloquent and effective advocates. His wire reads as follows:

AUGUST 31, 1960.

Hon. THOMAS J. DODD,
U.S. Senate, Washington, D.C.:

I have just learned that the Senate will come to a vote on S. 1689, the Freedom Commission and Freedom Academy Act, on Wednesday before I can hope to be back for the rollcall. I want to assure you of my continuing warm support for this measure.

As you pointed out so well in your thought-provoking and challenging analysis in the Senate last Friday, the free world desperately needs to understand better and to be better prepared to meet and counteract the political, economic, and propaganda, as well as military, thrust of Communist tyranny. S. 1689 provides the essential framework and authorization for such programs of research and training, which are clearly not being carried on today.

In view of the full hearings and committee review already devoted to this bill, I hope that technical questions of Senate committee jurisdiction will not serve to prevent consideration of S. 1689 on its merits.

With the accelerating tempo of the cold war on the part of the Communist nations, we cannot safely defer action for another year on this long overdue measure.

Despite the shortness of time remaining in this Congress, therefore, I hope the Senate may give its clear stamp of approval to the crucial and basic programs that will be set up by the Freedom Commission and Freedom Academy bill. Thus we can signify once again to our friends in the free world as well as to the enemies of freedom that we are determined with all our skills to maintain human freedom and dignity against the massive forces seeking to destroy them.

With all best wishes,

PAUL H. DOUGLAS.

Mr. MUNDT. Mr. President, I yield myself 5 minutes on the bill.

Mr. President, we are now approaching the voting stage on what the Senate Committee on the Judiciary has stated in its report it believes is one of the most important bills ever to be introduced in Congress. It is the bill to establish a Freedom Commission, and a Freedom Academy.

Senators are well aware, generally, that the United States must do something different from what it has been doing in order to tighten our offenses in the battle against communism in the cold war. We debated this bill on the Senate floor last Friday and we discussed it at some length on the floor again yesterday. The time is now here for Senate action.

I was interested in the colloquies which took place during the morning hour, following the reading by the distinguished Senator from Kansas [Mr. CARLSON] of a letter from a Christian missionary.

Mr. JOHNSON of Texas. Mr. President, will the Senator from South Dakota yield to me, so that I may ask that the committee amendments be considered and agreed to en bloc?

Mr. MUNDT. Certainly.

Mr. JOHNSON of Texas. Mr. President, I so request.

The PRESIDING OFFICER (Mr. FREAR in the chair). Is there objection to the request that the committee amendments be considered en bloc? Without objection, it is so ordered.

The question now is on agreeing to the committee amendments.

The amendments were agreed to, as follows:

On page 2, line 3, after the word "the", to strike out "free world" and insert "Free World"; in line 4, after the word "the", where it appears the first time, to strike out "free world" and insert "Free World"; in line 8, after the word "tests", to strike out "the"; in line 14, after the word "the", to strike out "free world" and insert "Free World"; in line 16, after the word "intensive", to strike out "continuous"; on page 3, line 3, after the word "the", to strike out "free world" and insert "Free World"; in line 5, after the word "the", where it appears the second time, to strike out "free world" and insert "Free World"; in line 11, after the word "the", where it appears the second time, to strike out "free world" and insert "Free World"; in line 13, after the word "the", where it appears the second time, to strike out "free world" and insert "Free World"; at the beginning of line 15, to insert "and of the dimensions and nature of the global struggle between freedom and Communism"; at the beginning of line 19, to strike out "true nature of the international Communist conspiracy" and insert "dimensions and nature of the threat"; on page 4, line 3, after the word "conspiracy", to insert "and of the dimensions and nature of the global struggle between freedom and Communism"; in line 20, after the word "Freedom", to strike out "Academy; and" and insert "Academy"; after line 21, to strike out:

"(3) The term 'joint committee' means the Joint Congressional Freedom Committee."

On page 5, line 8, after the word "United", strike out "States" and insert "States, one of whom shall be selected from the higher echelon of the State Department"; on page 7, line 11, after the word "Commission", to strike out "is authorized and empowered to" and insert "shall"; in line 16, after the word "the", where it appears the second time, to insert "Commission and"; after line 17, to strike out:

"(1) the development of systematic knowledge about the international Communist conspiracy;

"(2) the development of counteraction to the international Communist conspiracy into an operational science that befits and bespeaks the methods and values of free men, and to achieve this purpose the entire area of counteraction is to be thoroughly explored and studied with emphasis on the methods and means that may best be employed by private citizens and nongovernmental organizations and the methods and means available to Government agencies other than the methods and means already being used;

"(3) the education and training of private citizens concerning all aspects of the international Communist conspiracy and in the science of counteraction to that conspiracy;

"(4) the education and training of persons in Government service concerning all aspects of the international Communist conspiracy and in the science of counteraction to that conspiracy to the end that they can be more useful to their Government in defeating the international Communist conspiracy."

On page 8, after line 14, to insert:

"(1) to carry on a research program designed to develop an integrated operational science that befits and bespeaks the methods and values of free men and through which the free world will be able to meet and defeat the carefully patterned total aggression—political, ideological, psychological, economic, parliamentary, and organizational—of the Soviet bloc, and through which we, as a nation, may work toward our national objectives in a systematic manner. To achieve this purpose the full range of methods and means is to be thoroughly explored and studied including the methods and means that may best be employed by private citizens and nongovernmental organizations and the methods and means available to the Government other than the methods and means already being used. This research program shall include the study of our national objectives and purpose and the development of proposals for intermeshing and integrating the full spectrum of methods and means into a coordinated, short- and long-range strategy for victory, seeking the utilization of our full potential in the public and private sectors,

"(2) to educate and train governmental personnel, private citizens, and foreign students concerning all aspects of the international Communist conspiracy, the nature of the global struggle between freedom and communism, and the science of counteraction to the Communist conspiracy."

On page 9, line 19, after "(a)", to strike out "Academy students shall be selected, insofar as is practicable and in the public interest, from a cross section of the diverse groups, within and without the United States, in which the total political war is being fought. Before accepting any student for training who is an officer or employee of a Government agency, the Commission shall first obtain the concurrence of that agency." and insert "Academy students, other than Government personnel, shall be selected, insofar as is practicable and in the public interest, from the diverse groups within and without the United States where trained leadership and informed public opinion are most needed."; on page 10, line 9, after the word "All", to strike out "other"; in line 10, after the word "to", to strike out "aid and assist the Commission in the selection of students" and insert "assign officers and employees to the Academy for designated training"; in line 20, after the word "Act", to strike out "Foreign students selected for training"; at the beginning of line 22 to insert "(c) Foreign students selected for training"; on page 11, after line 15, to strike out:

"NONACADEMY TRAINING OF ACADEMY STUDENTS

"SEC. 8. The Commission is authorized to provide students selected for training at the Academy (either before, after, or during Academy training) with such additional education and training at colleges, universities, or technical schools other than the Academy, or with such on-the-job training in industry and business as the Commission shall determine to be in the public interest."

On page 12, at the beginning of line 2, to change the section number from "2" to "8"; in line 5, after the word "to", to strike out "disseminate" and insert "disseminate,"; in line 6, after the word "without", to strike out "charge" and insert "charge,"; in line 7, after the word "assist", to strike out "persons" and insert "people"; in line 9, after the word "and", to strike out "the ways and means of defeating that conspiracy" and insert "of the dimensions and nature of the global struggle between freedom and communism, and of ways they can participate effectively toward winning that struggle"; in line 16, after the word "level", to strike out "instruction" and insert "instruction, and also to publish such research materials as may be in the public interest"; at the beginning of line 23, to change the section number from "10" to "9"; on page 13, at the beginning of line 4, to change the section number from "11" to "10"; at the beginning of line 19, to change the section number from "12" to "11"; on page 16, at the beginning of line 16, to change the section number from "13" to "12"; at the top of page 17, to strike out:

"ESTABLISHMENT OF JOINT CONGRESSIONAL FREEDOM COMMITTEE; MEMBERSHIP

"SEC. 14. There is established the Joint Congressional Freedom Committee hereinafter referred to as the "joint committee" to be composed of seven Members of the Senate to be appointed by the President of the Senate, and seven Members of the House of Representatives to be appointed by the Speaker of the House of Representatives. In each instance not more than four Members shall be the members of the same political party.

After line 10, to strike out:

"AUTHORITY AND DUTY OF JOINT COMMITTEE

"SEC. 15. The joint committee shall make continued studies of the activities of the Commission and of problems relating to the development of counteraction to the international Communist conspiracy. During the first sixty days of each session of the Congress the joint committee shall conduct hearings in either open or executive session for the purposes of receiving information concerning the development and state of counteraction. The Commission shall keep the joint committee fully and currently informed with respect to all of the Commission's activities. All bills, resolutions, and other matters in the Senate or House of Representatives relating primarily to the Commission shall be referred to the joint committee. The members of the joint committee who are Members of the Senate shall from time to time report to the Senate and the members of the joint committee who are Members of the House of Representatives shall from time to time report to the House, by bill or otherwise, their recommendations with respect to matters within the jurisdiction of their respective Houses which are referred to the joint committee, or otherwise within the jurisdiction of the joint committee."

On page 18, after line 8, to strike out:

"CHAIRMAN AND VICE CHAIRMAN OF JOINT COMMITTEE; VACANCIES IN MEMBERSHIP

"SEC. 16. Vacancies in the membership of the joint committee shall not affect the power of the remaining members to execute the functions of the joint committee, and shall be filled in the same manner as in the case of the original selection. The joint committee shall select a chairman and a vice chairman from among its members at the beginning of each Congress. The vice chairman shall act in the place and stead of the chairman in the absence of the chairman. The chairmanship shall alternate between the Senate and the House of Representatives with each Congress, and the chairman shall be selected by the Members from that House entitled to the chairmanship. The vice chairman shall be chosen from the House other than that of the chairman by the members from that House."

At the top of page 19, to strike out:

"POWERS OF JOINT COMMITTEE

"SEC. 17. In carrying out its duties under this chapter, the joint committee, or any duly authorized subcommittee thereof, is authorized to hold such hearings or investigations, to sit and act at such places and times, to require by subpena or otherwise, the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, to take such testimony, to procure such printing and binding, and to make such expenditures as it deems advisable. The joint committee may make such rules respecting its organization and procedures as it deems necessary: *Provided, however,* That no measure or recommendation shall be reported from the joint committee or by any member designated by him or by the joint committee, and may be served by such person or persons as may be designated by such chairman or member. The chairman of the joint committee or any member thereof may administer oaths to witnesses. The joint committee may use a committee seal. The provisions of sections 192–194 of title 2, United States Code, shall apply in case of any failure of any witness to comply with a subpena or to testify when summoned under authority of this section. The expenses of the joint committee shall be paid from the contingent fund of the Senate from funds appropriated for the joint committee upon vouchers approved by the chairman. The cost of stenographic services to report public hearings shall not be in excess of the amounts prescribed by law for reporting the hearings of standing committees of the Senate. The cost of stenographic services to report executive hearings shall be fixed at an equitable rate by the joint committee. Members of the joint committee, and its employees and consultants, while traveling on official business for the joint committee, may receive either the per diem allowance authorized to be paid to Members of Congress or its employees, or their actual and necessary expense provided an itemized statement of such expenses is attached to the voucher."

On page 20, after line 12, to strike out:

"STAFF AND ASSISTANCE; UTILIZATION OF FEDERAL DEPARTMENTS AND AGENCIES; ARMED PROTECTION

"SEC. 18. The joint committee is empowered to appoint and fix the compensation of such experts, consultants, and staff employees as it deems necessary and advisable. The joint committee is authorized to utilize the services, information, facilities, and personnel of the departments and establishments of the Government."

After line 20, to strike out:

"CLASSIFICATION OF INFORMATION BY JOINT COMMITTEE

"SEC. 19. The joint committee may classify information originating within the committee in accordance with standards used generally by the executive branch for classifying restricted data or defense information."

At the top of page 21, to strike out:

"RECORDS OF JOINT COMMITTEE

"SEC. 20. The joint committee shall keep a complete record of all committee actions, including a record of the votes on any question on which a record vote is demanded. All committee records, data, charts and files shall be the property of the joint committee and shall be kept in the offices of the joint committee or other places as the joint committee may direct under such security safeguards as the joint committee shall determine in the interest of the common defense and security."

And at the beginning of line 12, to change the section number from "21" to "13," so as to make the bill read:

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

"SHORT TITLE

"SECTION 1. This Act may be cited as the 'Freedom Commission Act'.

"CONGRESSIONAL FINDINGS AND STATEMENT OF POLICY

"SEC. 2. (a) The Congress of the United States makes the following findings:

"(1) The Soviet Union and Communist China are waging a total political war against the United States and against the peoples and governments of all other nations of the Free World.

"(2) Unlike the Free World, the Soviet Union has systematically prepared for this total political war over several decades. Drawing on the experience of previous conquerors and upon their own elaborate studies and extensive pragmatic tests, Soviet leaders have developed their conspiratorial version of political warfare into a highly effective operational science. Recognizing that political warfare is a difficult science making unusual demands on its practitioners, the Soviet Union and Communist China have established an elaborate network of training schools, within and without the Free World, in which have been trained large numbers of highly skilled activists. These activists continue to receive intensive training throughout their party careers.

"(3) In this total political war the Soviets permit no neutrals. Every citizen, every economic, cultural, religious, or ethnic group is a target and is under some form of direct or indirect Communist attack. The battleground is everywhere, and every citizen, knowingly or unknowingly, through action or inaction, is involved in this continuous struggle.

"(4) Since the end of World War II, the Soviets, taking full advantage of their better preparation and often superior organizational and operational know-how, have inflicted a series of political warfare defeats on the Free World. The total sum of these defeats is nothing less than a disaster for the United States and the Free World and the continuation of this political war by the Soviets confronts the United States with a grave, present, and continuing danger to its national survival.

"(5) In order to defeat the Soviet political warfare offensive and to preserve the integrity and independence of the nations of the Free World, it is imperative—

"(A) that the knowledge and understanding of all the peoples of the Free World concerning the true nature of the international Communist conspiracy and of the dimensions and nature of the global struggle between freedom and Communism be increased as rapidly as is practicable;

"(B) that private citizens not only understand the dimensions and nature of the threat, but that they also know how they can participate, and do participate, in this continuous struggle in an effective, sustained, and systematic manner;

"(C) that Government personnel engaged in the cold war increase their knowledge of the international Communist conspiracy and of the dimensions and nature of the global struggle between freedom and Communism, develop a high esprit de corps and sense of mission and a high degree of operational know-how in counteracting the international Communist conspiracy.

"(b) It is the intent and purpose of the Congress that the authority and powers granted in this Act be fully utilized by the hereinafter created Commission to achieve the objectives set forth in the preceding subsection (a)(5) of this section. It is the further intent and purpose of the Congress that the authority, powers, and functions of the Commission and the Academy as hereinafter set forth are to be broadly construed.

"DEFINITIONS

"SEC. 3. When used in this chapter—

"(1) The term 'Commission' means the Freedom Commission;

"(2) The term 'Academy' means the Freedom Academy.

"ESTABLISHMENT OF THE FREEDOM COMMISSION; COMPOSITION; CHAIRMAN AND ACTING CHAIRMAN; QUORUM; OFFICIAL SPOKESMAN; SEAL

"SEC. 4. There is established in the executive branch of the Government an independent agency to be known as the Freedom Commission which shall be composed of six members and a Chairman, each of whom shall be a citizen of the United States, one of whom shall be selected from the higher echelon of the State Department. The Chairman may from time to time designate any other member of the Commission as Acting Chairman to act in the place and stead of the Chairman during his absence. The Chairman (or the Acting Chairman in the absence of the Chairman) shall preside at all meetings of the Commission and a quorum for the transaction of business shall consist of at least four members present. Each member of the Commission, including the Chairman, shall have equal responsibility and authority in all decisions and actions of the Commission, shall have full access to all information relating to the performance of his duties or responsibilities, and shall have one vote. Action of the Commission shall be determined by a majority vote of the members present. The Chairman (or Acting Chairman in the absence of the Chairman) shall be the official spokesman of the Commission in its relations with the Congress, Government agencies, persons, or the public, and, on behalf of the Commission, shall see to the faithful execution of the policies and decision of the Commission, and shall report thereon to the Commission from time to time or as the Commission may direct. The Commission shall have an official seal which shall be judicially noticed.

"MEMBERS: APPOINTMENTS; TERMS; COMPENSATION; EXTRANEOUS BUSINESS

"SEC. 5. (a) Members of the Commission and Chairman shall be appointed by the President, by and with the advice and consent of the Senate. Not more than four members, including the Chairman, may be members of any one political party. In submitting any nomination to the Senate, the President shall set forth the experience and qualifications of the nominee. The term of each member of the Commission, other than the Chairman, shall be six years, except that (1) the terms of office of the members first taking office shall expire as designated by the President at the time of the appointment, two at the end of two years, two at the end of four years, and two at the end of six years; and (2) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term. The Chairman shall serve during the pleasure of the President. Any member of the Commission may be removed by the President for inefficiency, neglect of duty, or malfeasance in office. Each member, except the Chairman, shall receive compensation at the rate of $20,000 per annum; and the Chairman shall receive compensation at the rate of $20,500 per annum.

"(b) No member of the Commission shall engage in any business, vocation, or employment other than that of serving as a member of the Commission.

"AUTHORIZATION TO ESTABLISH THE FREEDOM ACADEMY; FUNCTIONS OF COMMISSION AND ACADEMY

"SEC. 6. The Commission shall establish under its supervision and control an advanced training and development center to be known as the Freedom Academy. The Academy shall be located at such place or places within the United States as the Commission shall determine. The principal functions of the Commission and Academy shall be—

"(1) to carry on a research program designed to develop an integrated operational science that befits and bespeaks the methods and values of freemen and through which the free world will be able to meet and defeat the carefully patterned total aggression—political, ideological, psychological, economic, paramilitary, and organizational—of the Soviet bloc, and through which we, as a nation, may work toward our national objectives in a systematic manner. To achieve this purpose the full range of methods and means is to be thoroughly explored and studied, including the methods and means that may best be employed by private citizens and nongovernmental organizations and the methods and means available to the Government other than the methods and means already being used. This research program shall include the study of our national objectives and purpose and the development of proposals for intermeshing and integrating the full spectrum of methods and means into a coordinated, short- and long-range strategy for victory, seeking the utilization of our full potential in the public and private sectors,

"(2) to educate and train governmental personnel, private citizens, and foreign students concerning all aspects of the international Communist conspiracy, the nature of the global struggle between freedom and communism, and the science of counteraction to the Communist conspiracy.

"ACADEMY STUDENTS; SELECTION; GRANTS AND EXPENSES; ADMISSION AS NONIMMIGRANT VISITORS; DEPORTATION

"SEC. 7. (a) Academy students, other than Government personnel, shall be selected, insofar as is practicable and in the public interest, from the diverse groups within and without the United States where trained leadership and informed public opinion are most needed. Persons in Government service coming within the provisions of the Government Employees Training Act may be trained at the Academy pursuant to the provisions of said Act. All agencies and departments of Government are authorized to assign officers and employees to the Academy for designated training.

"(b) the Commission is authorized to make grants to students and to pay expenses incident to training and study under this chapter. This authorization shall include

authority to pay travel expenses to and from the Academy or other authorized place of training under the chapter, and authority to give financial assistance to the dependents of students during the time they are undergoing training authorized under this Act.

"(c) Foreign students selected for training under this Act shall be admitted as nonimmigrants under section 1101(a)(15) of title 8, United States Code, for such time and under such conditions as may be prescribed by regulations promulgated by the Commission, the Secretary of State, and the Attorney General. A person admitted under this section who fails to maintain the status under which he was admitted, or who fails to depart from the United States at the expiration of the time for which he was admitted, or who engages in activities of a political nature detrimental to the interest of the United States, or in activities in conflict with the security of the United States, shall, upon the warrant of the Attorney General, be taken into custody and promptly deported pursuant to sections 1251–1253 of title 8, United States Code. Deportation proceedings under this section shall be summary and findings of the Attorney General as to matters of fact shall be conclusive. Such persons shall not be eligible for suspension of deportation under section 1254 of such title 8.

"AUTHORIZATION TO ESTABLISH AN INFORMATION CENTER

"SEC. 8. The Commission is authorized to establish an information center at such place or places within the United States as the Commission may determine. The principal function of the information center shall be to disseminate, with or without charge, information and materials which will assist people and organizations to increase their understanding of the true nature of the international Communist conspiracy and of the dimensions and nature of the global struggle between freedom and communism, and of ways they can participate effectively toward winning that struggle. In carrying out this function, the Commission is authorized to prepare, make, and publish textbooks and other materials, including training films, suitable for high school, college, and community level instruction, and also to publish such research materials as may be in the public interest. The Commission is authorized to disseminate such information and materials to such persons and organizations as may be in the public interest on such terms and conditions as the Commission shall determine.

"RESTRICTIONS ON DISCLOSURE OF INFORMATION

"SEC. 9. Nothing in this chapter shall authorize the disclosure of any information or knowledge in any case in which such disclosure (1) is prohibited by any other law of the United States, or (2) is inconsistent with the security of the United States.

"SECURITY CHECK OF PERSONNEL

"SEC. 10. (a) Except as authorized by the Commission upon a determination by the Commission that such action is clearly consistent with the national interest, no individual shall be employed by the Commission until such individual has been investigated by the Civil Service Commission to determine whether the said individual is a good security risk and a report thereof has been made to the Freedom Commission.

"(b) In addition to the foregoing provisions, the Commission may request that any individual employed by the Commission, or under consideration for employment by the Commission, be investigated by the Federal Bureau of Investigation to determine whether the said individual is a good security risk.

"GENERAL AUTHORITY OF THE COMMISSION

"SEC. 11. In addition to the authority already granted, the Commission is authorized and empowered—

"(1) to establish such temporary or permanent boards and committees as the Commission may from time to time deem necessary for the purposes of this Act;

"(2) to appoint and fix the compensation of such personnel as may be necessary to carry out the functions of the Commission. Such personnel shall be appointed in accordance with the civil service laws and their compensation fixed in accordance with the Classification Act of 1949, as amended, except that, to the extent the Commission deems such action necessary to the discharge of its responsibilities, personnel may be employed and their compensation fixed without regard to such laws: *Provided, however,* That no personnel (except such personnel whose compensation is fixed by law, and specially qualified professional personnel up to a limit of $19,000) whose position would be subject to the Classification Act of 1949, as amended, if such Act were applicable to such position, shall be paid a salary at a rate in excess of the rate payable under such Act for positions of equivalent difficulty or responsibility. The Commission shall make adequate provision for administrative review of any determination to dismiss any employee;

"(3) to conduct such research, studies and surveys as necessary to carryout the purposes of this Act;

"(4) to make, promulgate, issue, rescind, and amend such rules and regulations as may be necessary to carryout the purposes of this Act;

"(5) to make expenditures as may be necessary for administering and carrying out the provisions of this Act;

"(6) to utilize, with the approval of the President, the services, facilities, and personnel of other Government agencies. Whenever the Commission shall use the services, facilities, or personnel of any Government agency for activities under the authority of this Act, the Commission shall pay for such performance out of funds available to the Commission under this Act, either in advance, by reimbursement, or by direct transfer;

"(7) to utilize or employ on a full- or part-time basis, with the consent of the organization or governmental body concerned, the services of personnel of any State or local government or private organization to perform such functions on its behalf as may appear desirable to carry out the purposes of this Act, without said personnel severing their connection with the furnishing organization or governmental body; and further to utilize personnel of a foreign government in the same manner and under the same circumstances with the approval of the Secretary of State;

"(8) to acquire by purchase, lease, loan, or gift, and to hold and dispose of by sale, lease, or loan, real and personal property of all kinds necessary for, or resulting from, the exercise of authority granted by this Act;

"(9) to receive and use funds donated by others, if such funds are donated without restrictions other than that they be used in furtherance of one or more of the purposes of this Act;

"(10) to accept and utilize the services of voluntary and uncompensated personnel and to provide transportation and subsistence as authorized by section 73b–2 of title 5, United States Code, for persons serving without compensation;

"(11) to utilize the services of persons on a temporary basis and to pay their actual and necessary travel expenses and subsistence and in addition compensation at a rate not to exceed $50 per day for each day spent in the work of the Commission.

"GENERAL MANAGER; APPOINTMENT; COMPENSATION

"SEC. 12. The Commission is authorized to establish within the Commission a General Manager, who shall discharge such of the administrative and executive functions of the Commission as the Commission may direct. The General Manager shall be appointed by the Commission, shall serve at the pleasure of the Commission, shall be removable by the Commission, and shall receive compensation at a rate determined by the Commission, but not in excess of $18,000 per annum.

"APPROPRIATIONS

"SEC. 13. There is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, so much as may be necessary to carry out the provisions of this Act."

Mr. MUNDT. Mr. President, during the colloquy engaged in by the distinguished Senator from Florida, the distinguished Senator from Kansas, and other Members of the Senate during the morning hour. It was pointed out that Congress has certainly been appropriating large amounts of funds for the purpose of fighting the cold war. Congress has been appropriating billions of dollars for mutual security.

We have finally gotten appropriations for the so-called Smith-Mundt Act and the Voice of America so they average beyond the $100 million mark. But we have failed to recognize sufficiently that it takes more than dollars and more than individuals to win the cold war. It takes individuals who know what the cold war is all about. It takes individuals who have been trained, so they can understand the devious and deep methods of the Communist movement. It takes persons who are able to go out and do battle in the cold war with a background of training similar to that had by our military men who receive training in the War College or at West Point or at Annapolis or at the wonderful new Air Academy in Colorado. It requires persons who have had special training in order to meet the specific problems presented aggressive, atheistic communism, the greatest challenge ever to face Christendom.

I am pleased that even at this late hour in the session, while there is still time for the House to act, the majority leader has been gracious enough to provide this body with an opportunity to vote today on legislation of the significance of the pending measure.

The Communists conquered nearly a billion people during a period when the Communist sphere was markedly inferior in industry, technocracy, science, military capabilities, and production. In fact, the Communist side has been inferior in practically every aspect of the cold war except for the sending of trained emissaries of communism into every country of the world. We have been sending diplomats, technicians, agricultural specialists, and military advisers; but we have sent persons who have had no adequate opportunity—because our Government has not provided such opportunity—to obtain training and background information on the methods of communism. However, such training is required if our representatives

are to be able to do an effective job out on the periphery where the battle between communism and freedom is being fought every day in the cold war.

This point was brought home very dramatically to me just this week. A young man called at my office, and wanted to talk to me, because he had seen my name on the legislation which is known as the Smith-Mundt Act. He said he was about to go to Africa, and that he had just been cleared and trained and prepared to go there as part of our cold-war offensive; but he asked me if I would tell him something about what he might expect the Communists to be doing there. I spent a considerable time talking to him, although I certainly am not an expert in the field of African politics. But I was certainly shocked when I realized that he was about to go to Africa, to fight in the battle for the minds of men, and he was about to utilize some of our millions and our billions of dollars to help preserve peace, to fight against communism and to promote freedom, and yet he was saying to a Member of the United States Senate, "Can you give me a little background information in regard to what I should expect and what I need to know about Communist tactics and targets in Africa?"

I did my best, even though I am not an authority on that subject. But he should have had an opportunity to take advantage of the facilities which will be afforded by the Freedom Commission, and he should have been able to study there for 4 or 5 or 6 weeks, in order to learn what this is all about. Fighting communism abroad in the cold war is not a job for amateurs.

Mr. JOHNSON of Texas. Mr. President, I wonder whether the Senator from South Dakota is prepared to yield back the remainder of the time available to him, on condition that the other side do likewise.

Mr. MUNDT. Yes. I was speaking under a time allotment on the bill. Mr. President, if the Senate is prepared to vote I shall be pleased to yield back the remaining time available to me.

Mr. JOHNSON of Texas. Then, Mr. President, I yield back the remainder of the time available to the other side.

Mr. KEATING. Mr. President, I ask unanimous consent to have printed at this point in the RECORD certain remarks of mine.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR KEATING

S. 1689—FREEDOM ACADEMY

I support enthusiastically the proposal to create a Freedom Commission and a Freedom Academy, which would be given the task of mobilizing America in the great battle against international communism. An imposing amount of evidence has been collected to demonstrate the need for this bold move in the cold war.

I am impressed by the wide diversity of the groups and individuals who support this bill. It has bipartisan senatorial sponsorship and is supported by the AFL–CIO and by a number of eminent professors and researchers in Soviet affairs. It is supported too by millions of Americans who recognize the importance of emphatically combating the Soviet menace.

It was my privilege, as a member of the Senate Internal Security Subcommittee, to participate in the hearings on this bill. Witness after witness, many representing the groups to which I just referred, testified to the soundness of this proposal and to their belief that the creation of the Commission and Academy would be a vital factor in preparing the American people to better combat the Communist menace.

Experts in foreign affairs and students of Soviet tactics have warned repeatedly about the need for increasing our knowledge about communism, its aims and objectives. In a very real and concrete sense, we must know the enemy and what he is up to. Enactment of S. 1689 would contribute significantly to the great effort which must be mounted in this field.

The organization and structure of the proposed Freedom Commission was given much careful study. The Commission is to be a seven-member independent agency with two fundamental objectives. The first, that of carrying out research to develop and synthesize a systematic approach to the cold war operations of the Soviet-Sino bloc. The second objective of the Commission would be to train Government personnel to deal effectively with the Soviet challenge.

The work of the Commission's Freedom Academy will supplement and build upon the activities of the Foreign Service Institute, other similar governmental and military programs, and the academic offerings of our Nation's colleges and universities in subjects related to government, foreign affairs, and international economics. The curriculum would be oriented to the needs of both American students and to students from other free world countries studying the United States.

I cannot let this occasion go by without paying tribute to the many dedicated Members of this body who have strongly supported and worked for this measure. Among those most deserving of commendation are the distinguished senior Senator from Illinois, Mr. DOUGLAS, the senior Senator from South Dakota, Mr. MUNDT, the senior Senator from New Jersey, Mr. CASE who cosponsored the original bill and, of course, the junior Senator from Connecticut, Mr. DODD, who yesterday addressed the Senate on this subject.

The hard work and careful planning which have gone into this measure have indeed been warranted. Mr. President, S. 1689 should be passed by the Senate and cleared for signature before we adjourn. It is a long and important step in America's cold war offensive efforts.

The PRESIDING OFFICER. All remaining time has been yielded back.

The question is on the engrossment and third reading of the bill.

The bill (S. 1689) was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I move that the vote by which the bill was passed be reconsidered.

Mr. DIRKSEN. Mr. President, I move to lay on the table the motion to reconsider.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

AMENDMENT OF FEDERAL EMPLOYEES COMPENSATION ACT

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1995, House bill 12383, to amend the Federal Employees Compensation Act to make benefits more realistic in terms of present wage rates, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. JOHNSON of Texas. Mr. President, the primary purpose of H.R. 12383 is to correct inequities that exist with respect to benefits paid to employees of the Federal Government, other than military personnel, who are injured in the performance of their duties and the dependents of those who died as a result of such injuries. The Federal Employees' Compensation Act has not been amended since 1949, and, as a result, the compensation paid to employees who were injured prior to 1946 is much less than the compensation for disability or death computed on the basis of present day Federal pay scales. At the same time the rise in the cost of living has created a further inequity.

Mr. President, I think this is a good bill and will be good legislation. The House has carefully considered it, and has passed it.

The cost of the bill is estimated to be $4 million a year. The bill has the approval of the Department of Labor, and has been unanimously reported by the Committee on Labor and Public Welfare.

Mr. DIRKSEN. Mr. President, will the majority leader yield to me?

Mr. JOHNSON of Texas. I yield.

Mr. DIRKSEN. Mr. President, I have discussed this bill with the distinguished Secretary of Labor on several occasions within the last few days. He is deeply anxious that this inequity be cured; and he does advocate and urge that the bill be acted on at this session of Congress.

The PRESIDING OFFICER. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 12383) was ordered to a third reading, read the third time, and passed.

PRINTING OF LEGISLATIVE HISTORY OF COMMITTEE ON FOREIGN RELATIONS

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar 2001, Senate Resolution 360, authorizing the printing of the "Legislative History of the Committee on Foreign Relations, U.S. Senate, 86th Congress," as a Senate document.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question now is on agreeing to the resolution.

The resolution was agreed to, as follows:

Resolved, That the "Legislative History of the Committee on Foreign Relations, United

States Senate, Eighty-sixth Congress" be printed as a Senate document, and that two thousand additional copies be printed for the use of the Committee on Foreign Relations.

Mr. JOHNSON of Texas. Mr. President, I move that the vote by which the resolution was agreed to be reconsidered.

Mr. MANSFIELD. Mr. President, I move to lay on the table the motion to reconsider.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

PRINTING OF "STRENGTHENING FREE WORLD SECURITY" AS A SENATE DOCUMENT

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 2002, Senate Resolution 362, to print "Strengthening Free World Security" as a Senate document.

The motion was agreed to; and the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 362) was agreed to, as follows:

Resolved, That the committee print entitled "Strengthening Free World Security", prepared by the Foreign Affairs Division of the Legislative Reference Service of the Library of Congress, be printed as a Senate document, and that nine thousand five hundred additional copies by printed for the use of the Committee on Foreign Relations.

PRINTING OF ADDITIONAL COPIES OF HEARINGS ON "U.S. FOREIGN POLICY"

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 2003, Senate Resolution 363, to print additional copies of certain hearings on "U.S. Foreign Policy."

The motion was agreed to; and the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 363) was agreed to, as follows:

Resolved, That there be printed for the use of the Committee on Foreign Relations five thousand additional copies of part 1 of the hearings entitled "United States Foreign Policy", held by that committee during the Eighty-sixth Congress, second session.

PRINTING OF ADDITIONAL HEARINGS RELATING TO COMPULSORY JURISDICTION OF THE INTERNATIONAL COURT OF JUSTICE

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 2004, Senate Concurrent Resolution 115, to print additional hearings on Senate Resolution 94, relating to the compulsory jurisdiction of the International Court of Justice.

The motion was agreed to; and the Senate proceeded to consider the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The concurrent resolution (S. Con. Res. 115) was agreed to, as follows:

Resolved by the Senate (the House of Representatives concurring), That two thousand additional copies of the hearings on S. Res. 94, "A resolution to amend S. Res. 196, Seventy-ninth Congress, second session, relating to the recognition of the jurisdiction of the International Court of Justice in certain legal disputes," be printed for the use of the Committee on Foreign Relations.

PRINTING OF ADDITIONAL COPIES OF REPORT ENTITLED "THE INSURANCE INDUSTRY—AVIATION, OCEAN MARINE, AND STATE REGULATION"

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 2005, Senate Resolution 379.

The PRESIDING OFFICER. The resolution will be stated by title.

The LEGISLATIVE CLERK. A resolution (S. Res. 379) to authorize the printing of 2,000 additional copies of S. Rept. No. 1834, 86th Congress, entitled "The Insurance Industry—Aviation, Ocean Marine, and State Regulation."

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the resolution was considered and agreed to, as follows:

Resolved, That there be printed for the use of the Committee on the Judiciary two thousand additional copies of Senate Report Numbered 1834, Eighty-sixth Congress, second session, entitled "The Insurance Industry—Aviation, Ocean Marine, and State Regulation", a report issued by the Committee on the Judiciary and made by its Subcommittee on Antitrust and Monopoly pursuant to S. Res. 238, Eighty-sixth Congress.

ERECTION OF STATUE OF TARAS SHEVCHENKO

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 2006, House Joint Resolution 311.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The LEGISLATIVE CLERK. A joint resolution (H.J. Res. 311) authorizing the erection of a statue of Taras Shevchenko on public grounds in the District of Columbia.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the resolution was considered, ordered to be engrossed for a third reading, read the third time, and passed.

Mr. JAVITS. Mr. President, I ask unanimous consent that I may have printed in the RECORD a statement on House Joint Resolution 311, which is similar to a bill which I introduced in the Senate to authorize an erection of a statue to Taras Shevchenko.

The PRESIDING OFFICER. Without objection, the statement will be printed.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR JAVITS

More than 100 years ago Taras Shevchenko hailed the first President of the United States, George Washington, and the new Republic, hoping for the day when the Ukraine will join the family of free nations.

Taras Shevchenko (1814–61) was without doubt one of the foremost Ukrainians of the modern period. His poetry has inspired the men and women of his period and later times with a renewed love of freedom and a consciousness of their identity and traditions as Ukrainians. It has been the medium through which the Ukrainians, in his day a downtrodden mass of serfs on the lands of their Russian and Polish masters, have become a self-conscious group of patriotic citizens, willing to risk their lives and fortunes in pursuit of their national independence. More than that, Shevchenko's poetry has taught them the need for human brotherhood and provided them with ideals of Ukrainian participation in the great company of free nations.

The centenary of Shevchenko's death will serve to remind his countrymen now behind the Iron Curtain of their heritage and ideals of liberty and independence. The statue to be erected in his honor in 1961 will serve notice to his countrymen that they are not forgotten by the free world.

MEMORIAL TO GEN. JOHN J. PERSHING

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 2007, Senate bill 3901.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 3901) to authorize the erection of a memorial in the District of Columbia to Gen. John J. Pershing.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the resolution was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the American Battle Monuments Commission is authorized to provide for the erection of a memorial to the late John J. Pershing, general of the armies of the United States, such memorial to be erected (1) in accordance with the plans and design submitted by the American Battle Monuments Commission to the Congress pursuant to Public Law 461, Eighty-fourth Congress (70 Stat. 84), and (2) on that parcel of federally owned land in the northwest section of the District of Columbia bounded on the north by Pennsylvania Avenue; on the south by E Street; on the west by Fifteenth Street; and on the east by Fourteenth Street.

(b) The authority granted by subsection (a) of this section shall cease to exist unless within five years after the date of enactment of this Act (1) the erection of the memorial is begun, and (2) the Commission determines that sufficient funds are available for completing the memorial.

SEC. 2. The maintenance and care of the memorial herein authorized to be erected shall, upon completion, be the responsibility of the Secretary of the Interior.

SEC. 3. The Commission may accept from any source, public or private, money or other property for use in carrying out its functions under this Act; and is authorized to cooperate with interested public and private organizations in carrying out such functions.

MARY E. PASCO

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 2008, Senate Resolution 381.

The PRESIDING OFFICER. The resolution will be stated by title.

The LEGISLATIVE CLERK. A resolution (S. Res. 381) to pay a gratuity to Mary E. Pasco.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the resolution.

Mr. LAUSCHE. Mr. President, may I inquire the nature of the resolution?

Mr. JOHNSON of Texas. This is a routine resolution we always adopt. It involves the payment of 6 months' compensation to the widow of an employee of the Senate.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to, as follows:

Resolved, That the Secretary of the Senate hereby is authorized and directed to pay, from the contingent fund of the Senate, to Mary E. Pasco, widow of John Pasco, an employee of the Architect of the Capitol assigned to duty in the Senate Office Buildings at the time of his death, a sum equal to 6 months' compensation at the rate he was receiving by law at the time of his death, said sum to be considered inclusive of funeral expenses and all other allowances.

ELECTION OF MEMBER TO THE JOINT COMMITTEE ON PRINTING AND THE JOINT COMMITTEE ON THE LIBRARY

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 2009, Senate Resolution 380.

The PRESIDING OFFICER. The resolution will be stated by title.

The LEGISLATIVE CLERK. A resolution (S. Res. 380) electing a member on the part of the Senate to the Joint Committee on Printing and the Joint Committee on the Library.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the resolution was considered and agreed to, as follows:

Resolved, That Mr. MARTIN be, and he is hereby, elected a member on the part of the Senate of the Joint Committee on Printing and the Joint Committee on the Library.

MOTION TO TABLE RECONSIDERATION OF CERTAIN RESOLUTIONS

Mr. JOHNSON of Texas. Mr. President, I move that the votes by which the Senate acted on the measures beginning with Calendar No. 2001, Senate Resolution 360, through Calendar No. 2009, Senate Resolution 380, be reconsidered.

Mr. DIRKSEN. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Illinois to lay on the table the motion of the Senator from Texas to reconsider.

The motion to lay on the table was agreed to.

JACK KENT COOKE

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 2012, House bill 8156.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 8156) for the relief of Jack Kent Cooke.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the bill was considered, ordered to a third reading, read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. DIRKSEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EDUCATION AND TRAINING FOR CHILDREN OF VETERANS

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1708, House bill 4306.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 4306) to provide education and training for the children of veterans dying of a service-connected disability incurred after January 31, 1955, and before the end of compulsory military service.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Labor and Public Welfare with an amendment.

MALICIOUS DAMAGE TO CERTAIN COMMUNICATION FACILITIES

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield.

Mr. LAUSCHE. I direct attention to order No. 1451 on page 9 of the calendar, S. 3560, a bill contemplated to protect the internal security of the United States by providing penalties for malicious damage to certain communication facilities.

It is my understanding the Department of Defense has requested the passage of this bill as having relationship to the security of our country. The bill was reported by the committee on May 17. The committee is headed by the Senator from Mississippi [Mr. EASTLAND].

Is there any prospect of that bill being called up for consideration?

Mr. JOHNSON of Texas. There is always a prospect. There are several Senators who desire to be notified before it is called up. There is a prospect, but I have no intention to call it up at the moment. I think the pending business will require some discussion, and I want to notify Senators who desire to be notified about it. I am going to suggest the absence of a quorum. Then I will give consideration to the Senator's request. There is a notation on my copy of the calendar that certain Senators be notified.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. (Mr. LUSK in the chair). Without objection, it is so ordered.

THREATENED PENNSYLVANIA RAILROAD STRIKE

Mr. BUTLER. Mr. President, I feel obliged to make some brief remarks about a threatened strike on the Pennsylvania Railroad, a major carrier with extensive commuter and freight service from New York to Florida and as far west as Chicago and St. Louis. I do not wish to make recommendations, Mr. President, nor to take sides; indeed, I would never interfere with orderly processes or negotiations between labor and management.

Because of the effect of this threatened strike upon my State, particularly upon the Eastern Shore which would be nearly isolated without railroad transportation, I feel compelled to address both the management and the labor unions of the Pennsylvania Railroad: "Gentlemen, I urge you to remember that you are not operating in a vacuum, and therefore must bargain in good faith and do everything within your power to bring about a sensible and swift end to your differences."

It is not exaggeration, Mr. President, to state that major industries and hundreds of thousands of citizens throughout the eastern half of the United States join with me in making this plea.

Differences can be settled, Mr. President, if parties in dispute sincerely attempt to resolve them.

THE FREEDOM COMMISSION

Mr. FULBRIGHT. Mr. President, unfortunately when the Senate temporarily laid aside consideration of S. 1689 and took up the housing proposal, I was called to the reception room by a very prominent lawyer from my State. Before I returned to the Chamber, action on the housing proposal had been completed and S. 1689 had been passed.

I wish merely for the RECORD to state that I think this bill should have been sent to the Committee on Foreign Relations. I think it is clearly within the

jurisdiction of the Committee on Foreign Relations. I doubt that the bill will be passed by the House.

I wish to serve notice that, if a similar bill is introduced in the next Congress, I expect to raise the question of jurisdiction and to insist that a bill of a similar nature be sent to the Committee on Foreign Relations for its consideration. I do not think a bill of this character should be passed without the Department of State being consulted and, as a matter of fact, appearing before the committee. Careful consideration should be given to it, because passage of such a bill would definitely affect our foreign relations in many important respects.

TEMPORARY SUSPENSION OF IMPORT DUTY ON HEPTANOIC ACID—CONFERENCE REPORT

Mr. KERR. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 12659) to suspend for a temporary period the import duty on heptanoic acid. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of today, p. 18755, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. KERR. Mr. President, the bill passed the Senate as it came from the House with the exception of an amendment which was added at the end to provide for a different import description of waterproof cloth.

For a number of years the Customs Bureau identified waterproof cloth as that which could pass a simple test which they originally set up. A loophole was discovered by foreign producers by treating cloth so that, temporarily, it could meet that simple test, and they could thereby obtain a much lower rate of duty. The Department of the Treasury thereupon adopted a more rigid test to help close this loophole, but the Court ruled that after many years of use this test could not be changed administratively; it could only be done by legislation. The Senate, therefore, amended H.R. 12659, and in conference the Senate conferees prevailed. The bill exactly as it passed the Senate was agreed upon, and I move the adoption of the conference report.

OPPOSITION TO HOUSE BILL TO PERMIT SERVING OF ALCOHOLIC BEVERAGES IN THE DISTRICT OF COLUMBIA ON NEW YEAR'S DAY, WHEN IT FALLS ON SUNDAY

Mr. MORSE. Mr. President, I wish to discuss another matter while the conference report is being considered.

I understand a bill has come to the Senate from the House, and that there is a desire on the part of some of my colleagues to have the bill placed directly on the Senate calendar, without its reference to a Senate committee.

I wish the leadership to know that I shall oppose the bill as hard as I can oppose it.

Mr. JOHNSON of Texas. To what bill does the Senator refer?

Mr. MORSE. A bill which should go to the Committee on the District of Columbia. It is a bill which proposes that because New Year's Day 1961 falls on Sunday, we should permit the sale of liquor on New Year's Day in the District of Columbia.

Mr. President, some cities in this country have suffered the handicap of smog. Others have suffered various other types of handicaps, such as dust storms or crime waves, cyclones, and various types of bad weather. I wish to say that Washington, D.C., is becoming notorious for alcoholic breath. There is no city in the Nation in which there is a higher consumption of hard liquor per capita than the city of Washington, D.C.

I think it is a shameful thing. I think it particularly shameful, Mr. President, for it to be proposed, simply because New Year's Day falls on Sunday, that we should forget the sanctity of the day and should permit, on this New Year's Sunday, the city of Washington, D.C., to become a big drunken rendezvous.

As a member of the Committee on the District of Columbia, as I said to one of the proprietors of one of the "joints" this morning, I do not intend to put a dollar sign on the Sabbath. So far as I am concerned, to the extent I can stop the bill I serve notice I shall try to stop it. I hope that I shall have some colleagues in the Senate who will help me stop the bill.

I say to the ministers of Washington, D.C., "Where are you?" Too many of them are out raising money for new churches, rather than going to work on the problem which I think falls within their responsibility of doing something to defend the standards of morality in the District of Columbia.

In fact, Mr. President, I am shocked by the growth of the tendency to consume liquor in this country, so that one can even get a cocktail served these days in a chancery of some of the churches.

Mr. President, it is about time we come to grips with this moral problem. I should like to have the leadership know that when the bill is called up before the Senate, if it is called up, I wish to have notice, so that I can be present, because I intend to do what I can to stop the passage of the bill. I think its passage would be a shocking thing. I am against any proposal that in this year, of all years, we should open wide the bars of the District of Columbia on New Year's Day.

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. JOHNSON of Texas. Mr. President, I know of no suggestion which has been made to the leadership on either side that we short-circuit the committee. I hope the parliamentarian and those at the desk will take judicial notice of the statement made by the Senator from Oregon and, if or when any such suggestion is made, that the committee be short circuited, that the Senator from Oregon be notified.

Mr. MORSE. I expected that cooperation from my leader, but, as a member of the Committee on the District of Columbia I thought I had a duty to serve notice as to my position.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. I yield to the Senator from Delaware.

Mr. WILLIAMS of Delaware. Mr. President, I support the Senator from Oregon [Mr. MORSE] in his opposition to the bill. Yesterday I called this same question to the attention of the Senator from Montana, who was acting as majority leader. He has already given us assurance that we will be notified prior to either placing this bill directly on the calendar or to any consideration of the bill following that time. I join my many colleagues in opposing the bill.

Mr. JOHNSON of Texas. No Senator anticipates that will be done.

TEMPORARY SUSPENSION OF IMPORT DUTY ON HEPTANOIC ACID—CONFERENCE REPORT

The Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 12659) to suspend for a temporary period the import duty on heptanoic acid.

The PRESIDING OFFICER. The question is on agreeing to the conference report on H.R. 12659.

The report was agreed to.

Mr. KERR. Mr. President, I move that the Senate reconsider the vote by which the report was adopted.

Mr. JOHNSON of Texas. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXCLUSION OF LOCAL ADVERTISING CHARGES FROM MANUFACTURERS SALE PRICE—CONFERENCE REPORT

Mr. KERR. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12536) relating to the treatment of charges for local advertising for purposes of determining the manufacturers sale price. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of today, pp. 18753–18754, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. KERR. Mr. President, there were three Senate amendments.

The House conferees accepted amendment No. 1 without change.

In regard to amendment No. 2, which recognized as qualified certain pension plans which did not qualify until some years after adoption, the House accepted this amendment with an amendment to the effect that each trust specified in the Senate amendment is to be deemed a qualified trust for the period specified in the Senate amendment if it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize its beneficiaries.

The House accepted the third amendment which was offered by the Senator from Delaware [Mr. WILLIAMS], but the conferees agreed that the legislation should be prospective only and that no attempt should be made by the Treasury Department to give retroactive action to the amendment. Thus, the Treasury would not be in a position to continue litigation under existing law with respect to taxable years ending before December 31, 1960.

Amendment No. 1 provides that producers of minerals used in making cement may for open years prior to 1961 elect to use as the base for computing depletion the gross income which may be derived from the minerals just prior to the introduction of the kiln feed into the kiln. In effect, this provides a legislative settlement procedure for cement producers which will permit them to settle their back years on the same basis as Congress provided in the Public Debt and Tax Rate Extension Act of 1960 for future years.

Amendment No. 2: This amendment provides that certain pension trusts established under collective bargaining agreements are to be considered qualified trusts from the date they were established to the date they actually qualified. The House conferees accepted this amendment with an amendment which provides that the exemption is to be available only if the trusts satisfy the Secretary of the Treasury that they have never been operated in a manner which would jeopardize the interest of the beneficiaries.

Amendment No. 3: This amendment is designed to prevent a doubling up of deductions for State taxes in the case of accrual basis taxpayers where the doubling up is a result of the action of a taxing jurisdiction taken after December 31, 1960. The House receded from this amendment but the conferees agreed that it should be made clear that the Treasury Department should not contest cases involving deductions taken as a result of action of the taxing jurisdiction taken before December 31, 1960. In other words, the amendment is designed to be prospective only.

With the exception described under amendment No. 2, the House conferees accepted the Senate amendments on this bill.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

Mr. KERR. Mr. President, I move to reconsider the action whereby the conference report was agreed to.

Mr. JOHNSON of Texas. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXCISE TAX ON CIGARS—CONFERENCE REPORT

Mr. KERR. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10960) to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of today, pp. 18749–18751, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. KERR. Mr. President, I wish to call up the conference report on H.R. 10960. There were 10 Senate amendments to this bill. The House accepted amendments Nos. 1, 3, 4, 5, 6, 7, 8, and 9.

The House conferees refused to accept amendment No. 2, relating to a lease to a medical clinic by a scientific organization engaged in medical research. This amendment, which was offered by Senator ANDERSON, was designed to give relief to the Lovelace Foundation. The Treasury was very much opposed to the adoption of this amendment and pointed out that this particular case was still in process of administrative determination and that action on this amendment should await such determination. While the House conferees refused to accept the amendment and the Senate was forced to recede, it was agreed that a statement should be made on the floor indicating that the Treasury should expedite the administrative determination of this case and that the national office should endeavor to have the matter finally determined.

Amendment No. 10, which provided that the pension fund of the Plumber's Local Union No. 775 should be considered to have been a qualified trust for the period May 1, 1957, to May 11, 1959, was agreed to by the House conferees with an amendment which, in effect, provided that this qualification should be deemed to be met only if it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize its beneficiaries.

I ask unanimous consent that a statement on the amendments be printed in the RECORD at this point in my remarks.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT SUBMITTED BY SENATOR KERR

Amendment No. 1 provides that the 85 percent intercorporate dividends received deduction is to be available with respect to dividends of a foreign corporation which were accumulated by a predecessor domestic corporation subject to U.S. income tax.

Amendment No. 2 would have amended the business lease provision of the code to provide a new exception in the case of a lease by a medical research organization to a medical clinic. The Senate receded on this amendment.

Amendment No. 3: This amendment deals with two basic subjects. The first limits the extent to which income tax liability incurred in the Virgin Islands can be reduced by subsidies, grants or similar payments. The second subject makes it plain that the Federal estate and gift tax is to apply to residents of the U.S. possessions who are also citizens of the United States.

Amendment No. 4: This amendment is intended to eliminate the filing of 1.7 million nontaxable declarations of estimated tax by (1) increasing the "other income" limit from $100 to $200, (2) providing that no declaration need be filed where the estimated tax is less than $400, and (3) eliminating the gross income test of $400 plus $600 times the number of exemptions.

Amendment No. 5: This amendment provides that expenditures by farmers for fertilizer, lime, limestone or marl can be expensed rather than be treated as a capital item required to be written off over a period of a year.

Amendment No. 6 provides a charitable contribution deduction (not over $50 a month) for school students maintained in the taxpayer's home under sponsorship of a charitable, veterans, or fraternal organization.

Amendment No. 7: This amendment treats capital contributions to the Federal National Mortgage Association as ordinary and necessary business expenses to the extent they exceed the value of the stock on the issue date.

Amendment No. 8: This amendment revises the excise tax on mechanical lighters to provide that the tax shall be 10 cents per lighter or 10 percent of the manufacturers sales price, whichever is lesser.

Amendment No. 9: This amendment treats real estate investment trusts for tax purposes in substantially the same way regulated investment companies are treated under present law.

Amendment No. 10: This amendment permits a multiemployer union negotiated pension plan established under a collective-bargaining agreement to be considered a qualified trust from the date it was established. The House receded on this amendment with an amendment requiring the trust to satisfy the Secretary of the Treasury that it has never been operated in a manner which would jeopardize the interest of its beneficiaries.

With the exception of amendments Nos. 2 and 10 described above, the House conferees receded and accepted all the Senate amendments.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. ANDERSON. Mr. President, I think I should say that under all the circumstances I believe the Senate conferees did everything that was reasonable and all that could have been expected of them. I thank the able chairman of the committee, the Senator from Virginia [Mr. BYRD], the Senator from Oklahoma

[Mr. KERR], and the Senator from Delaware [Mr. WILLIAMS] and the other colleagues.

Under the conference agreement on H.R. 10960, the Senate amendment to section 514(b)(3)(A) of the 1954 code was stricken. This amendment provided that a lease to a medical clinic by a medical research foundation of premises adjacent to those occupied by the foundation should be considered as related—and thus not subject to the tax on unrelated business income—if treatment of clinic patients, medical histories of clinic patients, and donated services of clinic doctors are used by the foundation for medical research purposes.

The Senate amendment was occasioned by the facts of a specific case, the Lovelace Foundation for Medical Education and Research, in Albuquerque, N. Mex. As the conference deliberations were described to me on the basis of the facts of this case as described to the conferees, the conferees in my opinion believed that the leases in question were entered into for purposes substantially related to the exercise or performance of the exempt functions of the lessor within the meaning of the exception to the definition of business leases in the existing law, and that, consequently, the Senate amendment was unnecessary.

The example contained in the report of the Senate Committee on Finance on the Revenue Act of 1950 of leases by tax-exempt hospitals to doctors' associations to use as clinics is illustrative of a general class of cases in which Congress meant leases to be excepted from the definition of taxable business leases because of the relationship of the activities and the personnel of a clinic lessee to the exempt functions of the lessor. A bona fide lease of part of the premises in its buildings to a clinic by an exempt medical research organization which engages extensively in research activities which rely on clinical material is one of the type of cases Congress intended to illustrate by the example in the 1950 report.

The House conferees were reported to me to be unwilling to legislate further on this matter until the Internal Revenue Service has had an opportunity to review on its merits the facts of the specific case which prompted the Senate amendment. The national office of the Revenue Service hitherto has not taken into account the legislative history in this Congress and in the last Congress bearing on congressional intent in this type of case as to the interpretation of the "related" exception to the definition of business leases. While the conferees understood that the case is now in the jurisdiction of the District Director's Office, it can be returned to the national office for technical advice, thus affording the national office an opportunity to review the case fully in the light of the legislative history. It is my understanding that the so-called certiorari procedure within the Internal Revenue Service for handling requests by taxpayers for referral of issues to Washington for technical advice will permit the national office to call such a case back to Washington and assume jurisdiction over it, even though the field office has rejected the taxpayer's request that it be referred here for technical advice.

I close by saying that I appreciate the services of my colleagues on the Finance Committee in trying to perfect this legislation. We have not been able to get much of a determination by the Treasury Department, and the active work of the Senate and House conferees has put this report in shape for handling. I thank the Senator from Oklahoma for his interest in it.

Mr. KERR. Mr. President, I appreciate the attitude of the distinguished Senator from New Mexico, and wish to say to him that the conferees were all very favorable to the purpose that he had in mind, but when confronted by the position the Treasury took, and the position the House conferees took, we felt that the committee should retreat on the basis that the Treasury Department would expedite the administrative determination of these questions, and that the national office should endeavor to have the matter finally determined, and then if adversely determined, I would say to the Senator that in my judgment the committee would be disposed to look favorably upon the proposed legislation, which would be clearly limited to the matter which the Senator had in mind.

Mr. ANDERSON. Mr. President, will the Senator yield further?

Mr. KERR. I yield.

Mr. ANDERSON. Do I not understand that the Treasury Department assured the conferees it would move to expedite this case?

Mr. KERR. I would say that we received the impression that they would do what they could to cooperate to bring that about.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

Mr. KERR. Mr. President, I move to reconsider the action whereby the conference report was agreed to.

Mr. JOHNSON of Texas. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RELIEF OF CERTAIN ALIENS

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1997, a joint resolution for the relief of certain aliens.

The PRESIDING OFFICER. The joint resolution will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A joint resolution (H.J. Res. 721) for the relief of certain aliens.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas?

There being no objection, the Senate proceeded to consider the joint resolution, which had been reported from the Committee on the Judiciary, with amendments, on page 1, at the beginning of line 3, to strike out "That, for the purposes of the Immigration and Nationality Act, Consolacion M. Rapa (Consolacion M. Johnson) shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this section of this Act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available."; on page 2, at the beginning of line 3, to strike out "SEC. 2. For" and insert "That, for"; at the beginning of line 8, to change the section number from "3" to "2"; at the beginning of line 13, to change the section number from "4" to "3"; after line 17, to strike out:

SEC. 5. For the purposes of the Immigration and Nationality Act, Terata Kiyoshi Johnston shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this section of this Act, the Secretary of State shall instruct the proper quota-control officer to deduct one number from the appropriate quota for the first year that such quota is available.

On page 3, at the beginning of line 3, to change the section number from "6" to "4"; at the beginning of line 5, to strike out "Lorne" and insert "Loene"; at the beginning of line 8, to change the section number from "7" to "5"; after line 17, to insert a new section, as follows:

SEC. 6. For the purposes of sections 101(a)(27)(A) and 205 of the Immigration and Nationality Act, Kim Hyoung Geun shall be held and considered to be the minor natural-born alien child of Mr. and Mrs. Burlin B. Hamer, citizens of the United States.

After line 22, to insert a new section, as follows:

SEC. 7. For the purposes of the Immigration and Nationality Act, Maria Luisa Martinez, Angel Ardaiz Martinez, Franciszek Roszkowski, Stamatis Zeris, Andros Szasz, Matias T. Falcasantos, Eduardo Giron Rodriguez, Cesar S. Wycoco and Kyung Ok Ahn shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fees. Upon the granting of permanent residence to each alien as provided for in this section of this Act, the Secretary of State shall instruct the proper quota-control officer to deduct the required numbers from the appropriate quota or quotas for the first year that such quota or quotas are available.

On page 4, after line 10, to insert a new section, as follows:

SEC. 8. For the purposes of the Immigration and Nationality Act, Man-Yeh Chow shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act. The number of refugees to whom permanent residence in the United States may be granted under the provisions of section 6 of the Refugee Relief Act of 1953, as amended, is hereby reduced by one.

After line 18, to insert a new section, as follows:

SEC. 9. Notwithstanding the provisions of section 212(a)(9) of the Immigration and Nationality Act, Janis Papulis may be issued

a visa and be admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that Act: *Provided*, That the exemption provided for in this Act shall apply only to a ground for exclusion of which the Department of State or the Department of Justice has knowledge prior to the enactment of this Act.

On page 5, at the beginning of line 3, to change the section number from "8" to "10", and at the beginning of line 4, to insert "sections 1 through 6 of".

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution is open to further amendment.

If there be no further amendments to be proposed, the question is on the engrossment of the amendments and third reading of the joint resolution.

The amendments were ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution was read the third time, and passed.

Mr. DIRKSEN. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. JOHNSON of Texas. I move to lay that motion on the table.

The motion to table was agreed to.

EDUCATION AND TRAINING FOR CHILDREN OF VETERANS

Mr. JOHNSON of Texas. Mr. President, what is the pending business?

The PRESIDING OFFICER. The pending business is Calendar 1708, H.R. 4306.

The Senate resumed the consideration of the bill (H.R. 4306) to provide education and training for the children of veterans dying of a service-connected disability incurred after January 31, 1955, and before the end of compulsory military service, which had been reported from the Committee on Labor and Public Welfare with an amendment to strike out all after the enacting clause and insert:

That paragraph (1) of section 1701(a) of title 38, United States Code, is amended—

(1) by striking out in the first sentence of such paragraph "or the Korean conflict" and inserting in lieu thereof "the Korean conflict, or the induction period";

(2) by inserting in the second sentence of such paragraph immediately after "disability" the following: "arising out of service during the Spanish-American War, World War I, World War II, or the Korean conflict"; and

(3) by adding at the end of such paragraph the following new sentence: "The standards and criteria for determining whether or not a disability arising out of service during the induction period is service-connected shall be those applicable under chapter 11 of this title, except that the disability must (A) be shown to have directly resulted from, and the causative factor therefor must be shown to have arisen out of, the performance of active military, naval, or air service (but not including service described under section 106 of this title), or (B) have resulted (i) directly from armed conflict or (ii) from an injury or disease received while engaged in extrahazardous service (including such service under conditions simulating war)."

SEC. 2. Subsection (a) of section 1701 of such title is amended by adding at the end thereof a new paragraph as follows:

"(9) The term 'induction period' means (A) the period beginning September 16, 1940, and ending December 6, 1941, and the period beginning July 26, 1947, and ending June 26, 1950, and (B) the period beginning on February 1, 1955, and ending on the day before the first day thereafter on which individuals (other than individuals liable for induction by reason of a prior deferment) are no longer liable for induction for training and service into the Armed Forces under the Universal Military Training and Service Act."

SEC. 3. Subsection (d) of section 1701 of such title is amended by striking out "or the Korean conflict" and inserting in lieu thereof the following: "the Korean conflict, or the induction period".

SEC. 4. Subsection (c) of section 1723 of such title is amended—

(1) by deleting "television" and inserting in lieu thereof "open circuit television (except as herein provided)"; and

(2) by adding at the end thereof the following sentence: "The Administrator may approve the enrollment of an eligible person in a course, to be pursued in residence, leading to a standard college degree which includes, as an integral part thereof, subjects offered through the medium of open circuit televised instruction, if the major portion of the course requires conventional classroom or laboratory attendance."

SEC. 5. In the case of any individual who is an "eligible person" within the meaning of section 1701(a)(1) of title 38, United States Code, solely by virtue of the amendments made by this Act, and who is above the age of seventeen years and below the age of twenty-three years on the date of enactment of this Act, the period referred to in section 1712 of title 38, United States Code, shall not end with respect to such individual until the expiration of the five-year period which begins on the date of enactment of this Act.

Mr. JOHNSON of Texas. Mr. President, I wonder whether we could get a unanimous-consent agreement to limit debate on amendments to 30 minutes, to be equally divided, and to 1 hour on the bill, in the usual form. I make that request.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. JOHNSON of Texas. As I understand, we have 30 minutes of debate on amendments, to be equally divided and controlled by the majority leader and the minority leader, and an hour of debate on the bill. I do not anticipate that we will take all the time allowed. However, I want to provide sufficient time for debate, because I do not want to get involved in lengthy discussion on any matters today.

I yield 3 minutes to my colleague from Texas.

Mr. YARBOROUGH. Mr. President, I send to the desk and ask to have printed in the RECORD at this point a statement in explanation of H.R. 4306.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR YARBOROUGH

The bill, H.R. 4306, is a simple bill and should not take very much of the Senate's time.

Briefly, the bill provides educational opportunity for the children of today's servicemen who die as the result of "performance of duty" in the Military Establishment of their country. The children covered by this bill would receive the kind of educational assistance that is now provided to the children of World War I, World War II, or the Korean conflict, who died of a service-connected disability. This assistance was first enacted by the Congress as the War Orphans Educational Assistance Act of 1956.

In general, war orphans educational assistance is limited to children between 18 and 23 years of age. The amount of the assistance is $110 monthly for a full-time course but not to exceed 36 months.

In addition to providing war orphans assistance coverage for orphans of cold war servicemen—that is, for the children of veterans dying of a service-connected disability incurred after January 31, 1955, and before the end of compulsory military service—the bill includes certain prewar compulsory draft periods within the eligibility provisions. Thus, educational assistance is afforded the children of veterans who died in service during the pre-World War II draft and the period between the end of World War II and the beginning of the Korean conflict. The specific dates for these between war periods are: September 16, 1940 through December 6, 1941; and July 26, 1947 through June 26, 1950.

The committee's recommended bill has been developed from a most careful study of the educational needs of the orphans of today's servicemen. Hearings on this subject were held during the first session of Congress by the Subcommittee on Veterans Affairs, with respect to a Senate bill (S. 1050) that provided a broader basis of eligibility than does the bill now under consideration.

Another hearing was held this session during the subcommittee's study of the House bill, H.R. 4306. The House bill raised two major considerations. First, as it came to us the House bill provided eligibility only for those situations involving death resulting from "extrahazardous service." Second, the House bill did not cover the between-war periods, which, in principle cannot be differentiated from the present cold war period as regards the Government's duty to provide war orphans educational assistance.

After considering the various approaches to this problem, it became apparent that—although it would not be wise to extend war orphans assistance to children of servicemen dying in situations clearly unrelated to military service, such as deaths while on extended furlough or in weekend highway accidents—the assistance should be extended to all situations in which the death of a serviceman is clearly connected with the performance of his military duty. By this standard it was found that the "extrahazardous service" concept excluded many deserving veterans. For example, servicemen traveling in military vehicles under ordinary training conditions would not be regarded as engaged in extrahazardous service in the event of death from collision or upset of the vehicle. Similarly, the marines who died in the Paris Island drowning incident would be regarded as engaged in "routine peacetime duty" rather than in extrahazardous duty.

To cover these and other equally deserving situations, the committee amended the bill to add a performance-of-duty concepts to the extrahazardous service concept provided by the House bill. We believe the committee's amendment is sound and wise in every respect, and is essential if we are to do justice to the child of a serviceman who has died as a direct result of performing military service for all. Without the committee

amendment, the bill would fail to cover many types of situations in which the death of a serviceman, in all probability, would not have occurred had he not been performing active service in the Armed Forces.

I might add here, Mr. President, that the performance-of-duty concept is essentially the same, in principle, as the workman's compensation test under State laws.

It has been said that the Congress has fully discharged its obligations to the orphans of our cold war veterans by the enactment of the Servicemen's and Veterans' Survivors' Benefits Act of 1957. Cited as discharge of our obligations are these rates of death compensation payable to the child of a cold war serviceman:

(1) Where there is no widow, the monthly payment for an only child under age 18 is $70 a month. If the child continues in school until age 21, the $70 a month would continue until that time.

(2) If the mother of the child is alive and receiving compensation, the additional compensation for the child attending school is $35 a month.

Frankly, in view of the increasing cost of education and cost of living, these death compensation rates must be regarded as totally inadequate when measured against our obligation regarding the educational needs of these cold war orphans. During the last decade, the increase in college tuition alone has amounted to 71 percent. And, of course, the item of tuition is only the basic charge for a college education. Related expenses, such as dormitory, food, books, and fees, quite frequently equal and sometimes exceed the basic tuition cost.

But even if we just look to the tuition cost itself, we are still talking about big money in relation to what the child of a deceased serviceman can afford to pay. In school year 1949, the average tuition of all colleges in the Nation stood at $249. By 1958, average tuition for all colleges had moved up to $427 an academic year, and, of course, we know that it is going on up and up next year and the year after.

Of the school year just concluded, tuition costs averaged about 9 percent higher than for the previous year. Further increases for this coming fall are already in evidence.

Mr. YARBOROUGH. Mr. President, I ask unanimous consent that a table referred to in the statement be printed in the RECORD at this point. It is taken from pages 330 and 332 of the Senate hearings conducted on war orphans' educational assistance during the first session of this Congress.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

THE LIBRARY OF CONGRESS, LEGISLATIVE REFERENCE SERVICE

Comparison of the average annual tuition and required fees of 196 representative colleges and universities, 1949–50, 1954–55, 1957–58, and 1958–59

EXHIBIT A MAY 4, 1959

Type of institution	Number of institutions	Average tuition and required fees per academic year				Amount of increase of average tuition between—			Percentage increase

[From the Wall Street Journal, May 7, 1959]

COLLEGE TUITION COSTS WILL RISE NEXT FALL FROM COAST TO COAST

Amherst, University of Cincinnati, South Dakota University, California Tech are just a few of the hundreds planning increases. Little Knox College (Old Siwash) will hike tuitions from $874 to $1,100; De Paul, from $576 to $624. Nationally, the average will be 9 percent over this year. Bowdoin and Tulsa already map raises for 1960–61. Tuitions now averaging double those in 1940, will double again by 1970, the Government predicts.

Installment lending for college grows. By the mid-sixties, college time-payment plans will be as common as auto loans today, say educators. Already banks and other lenders move into the field. The Federal Government will provide more loan funds next September.

But coeds shy away from loans, fearing debts will hinder their marriage chances.

Mr. YARBOROUGH. Mr. President, I offer a perfecting amendment, which I send to the desk and ask to have reported. It would change a date that was printed in the bill through error.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 4, line 10, it is proposed to strike out the date "July 26, 1947" and insert in lieu thereof the date "January 1, 1947".

Mr. YARBOROUGH. Mr. President, the purpose of the amendment is to make the date conform with the terminal date of other veterans' laws. By inadvertence the ending date of World War II, as defined in the Vocational Rehabilitation Act and other veterans' readjustment benefit acts was inserted in the bill, instead of the proper date applicable to the war orphans' program.

I ask unanimous consent that an explanation of the amendment be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR YARBOROUGH

The committee's bill, as reported, is intended to cover children of persons dying as a result of a service-connected disability between the end of World War II and the beginning of the Korean conflict. By inadvertence the ending date of World War II as defined for vocational rehabilitation and for other veterans readjustment benefits was inserted in the bill rather than the proper date applicable to the war orphans program. That date is January 1, 1947. Including it in the bill by this amendment merely corrects a physical error and implements the recommendation set forth in paragraph numbered (1) on the first page of the committee's report on this bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and third reading of the bill.

Mr. JOHNSON of Texas. I am very happy that the measure has reached this stage. I compliment my able colleague, the junior Senator from Texas. The Representative from my district is very much interested in the legislation. I yield back the remainder of my time on the bill.

Mr. DIRKSEN. I yield back the remainder of my time on the bill.

Mr. YARBOROUGH. I commend the distinguished majority leader for calling this matter up at this time. There are only a few hundred cases involved each year. It is badly needed legislation for the benefit of orphans. It has the endorsement of every veterans organization in the country. The Representative from my district, Mr. THORNBERRY, of Austin, Tex., is very much interested in it, he is also the Representative from the district of the majority leader.

The PRESIDING OFFICER. The question is on the engrossment of the

amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

The title was amended, so as to read: "An act to provide education and training for the children of veterans dying of a disability incurred after January 31, 1955, and before the end of compulsory military service and directly caused by military, naval, or air service, and for other purposes."

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. DIRKSEN. I move to lay that motion on the table.

The motion to table was agreed to.

AMENDMENT OF HELIUM ACT OF SEPTEMBER 1, 1937

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar 1884, H.R. 10548.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill—H.R. 10548—to amend the Helium Act of September 1, 1937, as amended for the defense, security, and general welfare of the United States.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Interior and Insular Affairs with an amendment to strike out all after the enacting clause and insert:

That this Act may be cited as the "Helium Act Amendments of 1960."

SEC. 2. The Act entitled "An Act authorizing the conservation, production, and exploitation of helium gas, a mineral resource pertaining to the national defense, and to the development of commercial aeronautics, and for other purposes", approved March 3, 1925 (43 Stat. 1110), as amended, is amended to read as follows:

"That this Act may be cited as the 'Helium Act'.

"SEC. 2. As used in this Act:

"(1) The term 'Secretary' means the Secretary of the Interior;

"(2) The term 'person' means any individual, corporation, partnership, firm, association, trust, estate, public or private institution, or State or political subdivision thereof; and

"(3) The terms 'helium-bearing natural gas' and 'helium-gas mixture' means, respectively, natural gas and gas mixtures containing three-tenths of 1 per centum or more of helium by volume.

"SEC. 3. (a) For the purpose of conserving, producing, buying, and selling helium, the Secretary is authorized—

"(1) to acquire by purchase, lease, gift, exchange, or eminent domain, lands or interests therein or options thereon, including but not limited to sites, rights-of-way, and oil or gas leases containing obligations to pay rental in advance or damages arising out of the use and operation of such properties; but any such land or interests in lands may be acquired by eminent domain only when the Secretary determines (A) that he is unable to make a satisfactory agreement to acquire such land or interest in land, and (B) that such acquisition by eminent domain is necessary in the national interest;

"(2) to make just and reasonable contracts and agreements for the acquisition, processing, transportation, or conservation of helium, helium-bearing natural gas, or helium-gas mixtures upon such terms and conditions, and for such periods, not exceeding twenty-five years, as may be necessary to accomplish the purposes of the Act, except that the Secretary shall not make such contracts and agreements which shall require payments by the Government in any one fiscal year aggregating more than the amount which shall be established initially in an appropriation Act and which may be increased from time to time in appropriation Acts, or if the Secretary—

"(A) determines that the national interests require the conservation of certain helium or require certain helium-bearing natural gas or certain helium-gas mixture for the production or conservation of helium, and

"(B) determines that he is unable to acquire such helium, helium-bearing natural gas, or helium-gas mixture upon reasonable terms and at the fair market value,

he is authorized to acquire by eminent domain such helium and so much of such helium-bearing natural gas or helium-gas mixture as is necessarily consumed in the extraction of such helium after removal from its place of deposit in nature and wherever found, or the temporary use of such helium-bearing natural gas or helium-gas mixture for the purpose of extracting helium, together with the appropriate interest in pipelines, equipment, installations, facilities, personal or real property, including reserves, easements or other rights necessary or incident to the acquisition of such helium, natural gas, or mixture, but the condemnation of any such helium, helium-bearing natural gas, or helium-gas mixture, shall be effected in the same manner and following the procedures established in section 8(a) of this Act, the just compensation for such condemnation to be measured by terms and prices determined to be commensurate with the fair market value, and in the temporary use of any helium-bearing natural gas or helium-gas mixture for the purpose of extracting helium the Secretary shall cause no delay in the delivery of natural gas to the owner, purchaser, or purchasers thereof, except that required by the extractive processes;

"(3) to construct or acquire by purchase, lease, exchange, gift or eminent domain, plants, wells, pipelines, compressor stations, camp buildings, and other facilities, for the production, storage, purification, transportation, purchase, and sale of helium, helium-bearing natural gas, and helium-gas mixtures: and to acquire patents or rights therein and reports of experimentation and research used in connection with the properties acquired or useful in the Government's helium operations;

"(4) to dispose of, by lease or sale, property, including wells, lands, or interests therein, not valuable for helium production, and oil, gas, and byproducts, of helium operations not needed for Government use, except that property determined by the Secretary to be 'excess' within the meaning of section 3(e) of the Federal Property and Administrative Services Act of June 30, 1949 (60 Stat. 378; 40 U.S.C. 472(e)), as amended, shall be disposed of in accordance with the provisions of that Act; and to issue leases to the surface of lands or structures thereon for grazing or other purposes when the same may be done without interfering with the production of helium; and

"(5) to accept equipment, money, and other contributions from public and private sources and to prosecute projects in cooperation with other agencies, Federal, State, or private.

"(b) Any known helium-gas-bearing land on the public domain not covered at the time by leases or permits under the Mineral Lands Leasing Act of February 25, 1920, as amended, may be reserved for the purposes of this Act, and any reservation of the ownership of helium may include the right to extract, or have extracted, such helium, under such rules and regulations as may be prescribed by the Secretary, from all gas produced from lands so permitted, leased, or otherwise granted for development, except that in the extraction of helium from gas produced from such lands, it shall be extracted so as to cause no delay, except that required by the extraction process, in the delivery of gas produced from the well to the purchaser or purchasers thereof at the point of delivery specified in contracts for the purchase of such gas. If any reserved rights of ownership and extraction of helium are not exercised before production of any helium-bearing natural gas or any helium-gas mixture, the Secretary is authorized to acquire such helium in accordance with section 3(a)(2) of this Act.

"(c) All contracts and agreements made by the Secretary for the acquisition of helium from a private plant shall contain a provision precluding the plant owner from selling any helium to any purchaser other than the Secretary at a price lower than the lowest price paid by any Government agency for helium acquired from any private plant under any contract entered into pursuant to this section and outstanding at the time of such sale.

"SEC. 4. The Secretary is authorized to maintain and operate helium production and purification plants together with facilities and accessories thereto; to acquire, store, transport, sell, and conserve helium, helium-bearing natural gas, and helium-gas mixtures, to conduct exploration for and production of helium on and from the lands acquired, leased, or reserved; and to conduct or contract with public or private parties for experimentation and research to discover helium supplies and to improve processes and methods of helium production, purification, transportation, liquefaction, storage, and utilization: *Provided, however,* That all research contracted for, sponsored, cosponsored, or authorized under authority of this Act shall be provided for in such a manner that all information, uses, products, processes, patents and other developments resulting from such research developed by Government expenditure will (with such exceptions and limitations, if any, as the Secretary may find to be necessary in the interest of national defense) be available to the general public: *And provided further,* That nothing contained herein shall be construed as to deprive the owner of any background patent relating thereto to such rights as he may have thereunder.

"SEC. 5. (a) Whenever the President determines that the defense, security, and general welfare of the United States requires such action, the Secretary shall issue such regulations as he deems necessary for the licensing of sales and transportation of helium in interstate commerce after extraction from helium-bearing natural gas or helium-gas mixtures. Thereafter it shall be unlawful for any person to sell or transfer helium in interstate commerce except in accordance with such regulations or pursuant to the terms of a license issued by the Secretary, or in accordance with the terms of a contract or agreement with the Secretary entered into pursuant to this Act. For the purpose of this section, the term 'helium' shall mean helium, after extraction from helium-bearing natural gas or helium-gas mixtures, in a refined or semi-refined state for use.

"(b) Each license shall be issued for a specified period to be determined by the Secretary, but not exceeding five years, and

may be renewed by the Secretary upon the expiration of such period. No such license shall be issued to a person if in the opinion of the Secretary the issuance of a license to such person would be inimical to the defense and security of the United States. No such license shall be assigned or otherwise transferred directly or indirectly except with the consent or approval of the Secretary in writing. Any such license may be revoked for any material false statement in the application for license, or for violation or a failure to comply with the terms and provisions of this Act, the regulations issued by the Secretary pursuant thereto, or the terms of the license.

"(c) In issuing licenses under this section, the Secretary shall impose such regulations and terms of licenses as will permit him effectively to promote the common defense and security as well as the general welfare of the United States. The licensing authority herein granted shall be used solely for the purpose of preventing the transportation or sale of helium for end uses determined by the Secretary to be nonessential or wasteful, and any determination that any end use is nonessential or wasteful shall be published in the form of general regulations applicable to all transportation or sales of helium.

"(d) Whenever Congress or the President declares that a war or national emergency exists, the Secretary is authorized to suspend any license granted under this Act if in his judgment such suspension is necessary to the defense and security of the United States, and he is further authorized to take such steps as may be necessary to recapture or reacquire supplies of helium.

"SEC. 6. (a) The Department of Defense, the Atomic Energy Commission, and other agencies of the Federal Government, to the extent that supplies are readily available, shall purchase all major requirements of helium from the Secretary.

"(b) The Secretary is authorized to sell helium for Federal, medical, scientific, and commercial uses in such quantities and under such terms and conditions as he determines.

"((c) Sales of helium by the Secretary shall be at prices established by him which shall be adequate to cover all costs incurred in carrying out the provisions of this Act and to repay to the United States by deposit in the Treasury, together with interest as provided in subsection (d) of this section, the following:

"(1) Within twenty-five years from the date of enactment of the Helium Act Amendments of 1960, the net capital and retained earnings of the helium production fund (established under section 3 of this Act prior to amendment by the Helium Act Amendments of 1960), determined by the Secretary as of such date of enactment, plus any moneys expended thereafter by the Department of the Interior from funds provided in the Supplemental Appropriation Act, 1959, for construction of a helium plant at Keyes, Oklahoma;

"(2) Within twenty-five years from the date of borrowing, all funds borrowed, as provided in section 12 of this Act, to acquire and construct helium plants and facilities; and

"(3) Within twenty-five years from the date of enactment of the Helium Act Amendments of 1960, unless the Secretary determines that said period should be extended for not more than ten years, all funds borrowed, as provided in section 12 of this Act, for all purposes other than those specified in clause (2) above.

"(d) Compound interest on the amounts specified in clauses (1), (2), and (3) of subsection (c) which have not been paid to the Treasury shall be calculated annually at rates determined by the Secretary of the Treasury taking into consideration the current average market yields of outstanding marketable obligations of the United States having maturities comparable to the investments authorized by this Act, except that the interest rate on the amounts specified in clause (1) of subsection (c) shall be determined as of the date of enactment of the Helium Act Amendments of 1960, and the interest rate on the obligations specified in clauses (2) and (3) of subsection (c) as of the time of each borrowing.

"(e) Helium shall be sold for medical purposes at prices which will permit its general use therefor; and all sales of helium to non-Federal purchasers shall be upon condition that the Federal Government shall have a right to repurchase helium so sold that has not been lost or dissipated, when needed for Government use, under terms and at prices established by regulations.

"(f) All moneys received under this Act, including moneys from sale of helium or other products resulting from helium operations and from the sale of excess property shall be credited to the helium production fund, which shall be available without fiscal year limitation, for carrying out the provisions of this Act, including any research relating to helium carried out by the Department of the Interior. Amounts accumulating in said fund in excess of amounts the Secretary deems necessary to carry out this Act and contracts negotiated hereunder shall be paid to the Treasury and credited against the amounts required to be repaid to the Treasury under subsection (c) of this section.

"SEC. 7. The Secretary of Defense and the Chairman of the Atomic Energy Commission may each designate representatives to cooperate with the Secretary in carrying out the purposes of this Act, and shall have complete right of access to plants, data, and accounts.

"SEC. 8. (a) Proceedings for the condemnation of any property under section 3 of this Act shall be instituted and maintained pursuant to the provisions of the Act of August 1, 1888 (25 Stat. 357; 40 U.S.C. 257), as amended, and sections 1358 and 1403 of title 28 of the United States Code, or any other Federal statute applicable to the acquisition of real property by eminent domain. The Acts of February 26, 1931 (46 Stat. 1421; 40 U.S.C. 258a–258e), and October 21, 1942 (56 Stat. 797; 40 U.S.C. 258f), shall be applicable to any such proceedings. Wherever the words 'real property', 'realty', 'land', 'easement', 'right-of-way', or words of similar meaning, are used in such code provisions or Acts relating to procedures, jurisdiction, and venue, they shall be deemed, for the purpose of this Act, to include any personal property authorized to be acquired hereunder.

"(b) In the event of disposal under section 3(a)(4) of this Act of any property acquired by eminent domain pursuant to this Act, the former owner or successor in interest of the rights therein shall have the preferential right to reacquire such property on terms as favorable as those terms whereby disposition may be made under such section.

"SEC. 9. The Secretary is hereby authorized to establish and promulgate such rules and regulations, as are consistent with the directions of this Act and are necessary to carry out the provisions hereof.

"SEC. 10. (a) The provisions of the Administrative Procedure Act of June 11, 1946 (60 Stat. 637; 5 U.S.C. 1001–1011), as amended, shall apply to any agency proceeding and any agency action taken under this Act, including the issuance of rules and regulations, and the terms 'agency proceeding' and 'agency action' shall have the meaning specified in the Administrative Procedure Act.

"(b) In any proceeding under this Act for the granting, suspending, revoking, or amending of any license, or application to transfer control thereof, and in any proceeding for the issuance or modification of rules and regulations dealing with the activities of licensees, the Secretary shall grant a hearing upon the request of any person whose interest may be affected by the proceeding, and shall admit any such person as a party to such proceeding. Any final order entered in any such proceedings shall be subject to judicial review in the manner prescribed in the Act of December 29, 1950 (64 Stat. 1129; 5 U.S.C. 1031–1042), as amended, and to the provisions of section 10 of the Administrative Procedure Act.

"SEC. 11. The provisions of the Natural Gas Act of June 21, 1938 (52 Stat. 821; 15 U.S.C. 717–717w), as amended, shall not be applicable to the sale, extraction, processing, transportation, or storage of helium either prior to or subsequent to the separation of such helium from the natural gas with which it is commingled, whether or not the provisions of such Act apply to such natural gas, and in determining the rates of a natural gas company under sections 4 and 5 of the Natural Gas Act, as amended, whenever helium is extracted from helium-bearing natural gas under contract with the United States, there shall be excluded (1) all income received from the sale of helium; (2) all direct costs incurred in the extraction, processing, compression, transportation or storage of helium; and (3) that portion of joint costs of exploration, production, gathering, extraction, processing, compression, transportation or storage divided and allocated to helium.

"SEC. 12. (a) The Secretary is authorized to borrow annually from the Treasury and credit to the fund established under section 6(f) of this Act such amounts as may be authorized in the initial appropriation Act and which may be increased from time to time in appropriation Acts and as are necessary to carry out the provisions of this Act and contractual obligations hereunder.

"(b) For the purpose of this section the Secretary may issue to the Secretary of the Treasury notes, debentures, bonds, or other obligations to be redeemable at the option of the Secretary before maturity in such manner as may be stipulated in such obligations. The Secretary of the Treasury is authorized and directed to purchase any obligations issued by the Secretary under authority of this section and for such purpose the Secretary of the Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under the Second Liberty Bond Act, as amended, are extended to include any purchases of obligations of the Secretary hereunder.

"SEC. 13. Whoever willfully violates, attempts to violate, or conspires to violate, any provision of this Act or any regulation or order issued or any terms of a license granted thereunder shall, upon conviction thereof, be punished by a fine of not more than $5,000 or by imprisonment for not more than two years, or both, except that whoever commits such an offense with intent to injure the United States or with intent to secure an advantage to any foreign nation, shall upon conviction thereof, be punished by a fine of not more than $20,000 or by imprisonment for not more than twenty years, or both.

"SEC. 14. Whenever in the judgment of the Secretary any person has engaged or is about to engage in any act or practice which constitutes or will constitute a violation of any provision of this Act, or any regulation or order issued or any term of a license granted thereunder, any such act or practice may be enjoined by any district court having jurisdiction of such person, and proper proceedings to this end may be instituted under the direction of the Attorney General of the United States.

"SEC. 15. It is the sense of the Congress that it is in the national interest to foster and encourage individual enterprise in the development and distribution of supplies of helium, and at the same time provide, within economic limits, through the administration of this Act, a sustained supply of helium which, together with supplies available or expected to become available otherwise, will be sufficient to provide for essential Government activities.

"SEC. 16. The Secretary of the Interior is directed to report annually to the Congress on the matters contained in this Act.

"SEC. 17. If any provision of this Act, or the application of such provision to any person or circumstance, is held invalid, the remainder of this Act or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby."

ADDITIONAL FUNDS FOR INVESTIGATION OF ANTITRUST AND MONOPOLY LAWS

Mr. JOHNSON of Texas. Mr. President, I invite the attention of the Senator from Tennessee. I ask unanimous consent that the Senate proceed to the consideration of Order No. 2000, Senate Resolution 368, in which he is interested.

Mr. WILLIAMS of Delaware. What order number is that?

Mr. DIRKSEN. Order No. 2000.

Mr. JOHNSON of Texas. Mr. President, I withdraw that request for the moment. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

CONSTRUCTION OF NUCLEAR POWER REACTORS FOR THE ANTARCTIC

Mr. ANDERSON. Mr. President, the able Senator from Washington [Mr. JACKSON] has been a leader on the Joint Committee on Atomic Energy at all times in his advocacy of the construction of nuclear reactors in the Antarctic. He has been there and has flown over the area. He knows much about the situation. He brought to the attention of the Joint Committee on Atomic Energy the need for the development of such reactors.

The Senator from Washington had prepared a statement which he intended to make on the floor of the Senate this afternoon concerning the failure of the conferees to provide enough money to construct all the reactors, but only one.

I ask unanimous consent that his statement be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR JACKSON

H.R. 12326, as reported out by the conference committee, and adopted by both Houses, has a serious deficiency. The $13 million added by the Senate for the construction of nuclear power reactors for the Antarctic has been cut to a mere $3,500,000. This cut will permit meeting the requirement for only one of the McMurdo Sound reactors and does not even permit the start of work on the reactors required for the two even more remote and inaccessible inland sites, Pole and Byrd stations in the Antarctic.

The great value of the reactor applications covered by the $13 million originally put into this bill by the Senate were covered in detail in the hearings of the Joint Committee on Atomic Energy on the Atomic Energy Commission authorization bill this year. Based on the data contained in this record, the Congress was unanimous in the approval of a $13 million authorization for reactor plants at our McMurdo Sound, Pole, and Byrd stations in the Antarctic. Everyone apparently was for the project. The Department of Defense, the Atomic Energy Commission, and the National Security Council all testified or informed the Congress of their endorsement of the project.

Members of the Congress also made statements endorsing the project during consideration of the AEC authorization bill on the floor of the House on May 6 and the floor of the Senate on May 10. As recently as August 10, during consideration of the AEC appropriation bill, my esteemed colleague, Senator ANDERSON, on the floor of this Chamber summarized for us the interest in this project. Yes, it appears that everyone is for the project except the Bureau of the Budget.

The only testimony we obtained or correspondence we received which indicated a reluctance to proceed with the construction of the Antarctic reactors was from the Bureau of the Budget. As covered in the record of the joint commtitee hearings and most recently as summarized by Senator ANDERSON on the floor of this Chamber on August 10, the Bureau of the Budget has continually resisted efforts to proceed with this project. They have done so by artifices such as continually questioning just which agency should budget for the project. By doing this we have lost the opportunity to save money by investing in these reactors. We have also lost in international prestige and have deprived our people manning remote bases in the Antarctic of the improved living conditions and the decrease in hazards in our Antarctic operations, which would result by building reactors in the Antarctic.

We thought we had shown everyone the irresponsible position taken by the Bureau of the Budget on this item. We thought everyone recognized the financial irresponsibility of the Bureau of the Budget's position; a position which if followed will result in the loss of millions of dollars in savings in operating costs in the future.

In spite of the obvious error in the Bureau of the Budget's position—pennywise today and dollar foolish tomorrow—I am informed that the Budget Bureau's position was the deciding factor in the decision of the Senate and House conference committee to knock out most of the appropriations for this project. Senator ANDERSON objected but to no avail.

The one fortunate thing that has occurred relative to the Antarctic reactor project is the placement of an order by the AEC for the first McMurdo plant using Navy funds while the Congress was acting on the appropriation bill. Although it will be very close timewise, it appears this foresight will permit delivery of the plant in time to meet the first Antarctic requirement for a plant.

It is indeed unfortunate that this appropriation bill does not contain the funds to meet the following requirements for the Pole and Byrd stations. The Pole and Byrd station procurements must be initiated this fiscal year to permit the design, manufacture, transportation, and installation of the reactor plants in time to meet the requirements for additional heat and energy at these sites. It is essential to consider the more difficult transportation and installation problems relative to the Byrd and Pole stations, and therefore sufficient time must be allowed to cope with these problems. These plants must be thoroughly operationally tested before they are taken apart for shipment to the Antarctic. They must be off-loaded at McMurdo Sound and airlifted to Byrd and Pole stations and then they must be installed in the ice tunnels at the sites which are respectively 1 and 2 miles above sea level.

Therefore, the elimination of the funding for the other reactor plants required for the Antarctic causes us at least a year's delay in attaining the great financial and humanitarian benefits which would accrue from their installation. It is indeed unfortunate that such a shortsighted policy can be imposed on us if we are all not vigilant.

It is, of course, possible that the Navy or AEC could find the necessary funds to commit for leadtime procurement for these authorized plants. I hope they can do so and also jump the biggest hurdle to efficiency and economy we have encountered on these projects: the Bureau of the Budget.

RELIGIOUS FREEDOM AND THE BALLOT BOX—ADDRESS BY MRS. CHARLES W. TILLETT

Mr. ERVIN. Mr. President, Mrs. Charles W. Tillett, of Charlotte, N.C., recently delivered a most significant address entitled "Religious Freedom and the Ballot Box." Mrs. Tillett is a stanch Protestant and has been very active in the affairs of the Southern Presbyterian Church.

She is one of the ablest women in the Nation, having served as vice chairman of the Democratic Party of North Carolina, as vice chairman of the Democratic National Committee, and as a member of the board of trustees of the University of North Carolina. She has been honored by the University of North Carolina with an honorary degree of doctor of laws.

I believe her address is of such significance and is so timely that it should be made available to all. Therefore, I ask unanimous consent that it be printed at this point in the body of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

RELIGIOUS FREEDOM AND THE BALLOT BOX

(Address by Mrs. Charles W. Tillett)

I thank you ladies and gentlemen, for your presence here this evening and I thank the women leaders in this community for their invitation to speak to you on one of the issues before us, as voters, in November 1960.

It is important to talk with American women because women can be a power in any election. They number approximately 52 percent of the eligible voters in our country.

Women are informed on world affairs and they know that two nations are contending for world leadership—the Soviet Union and the United States. The Soviet Union is plotting and planning and aiming at world subjugation. It seeks to establish despotism based on fear and force.

Standing against this order of fear and force is America, your country and mine. America is the spearhead of all the democracies that are trying to keep human rights and freedoms alive in the world.

Each one of us knows that we have a part to play. But it is so easy to forget our responsibilities—so easy to argue ourselves into thinking that this battle for freedom can be fought and won in some distant capi-

tal of the Western World—not in the South, not in North Carolina, not in Mecklenburg County, not in the voting booth in our own precinct, not in our own individual hearts. But this is where the battle will be fought and, I believe, will be won.

One of the freedoms under discussion in this election is religious freedom—one of the most basic freedoms.

A recent poll, as reported in the press, gave the religious issue the No. 1 spot for campaign issues in the South. It is useless to debate who injected the religious issue into the campaign. It is evident that Mr. KENNEDY himself presents the religious issue by simply aspiring to be President of the United States. He presents it because although he is a convinced and believing Christian, he is a member of the Catholic faith.

Our country came into being proclaiming the philosophy of religious freedom. For this freedom Protestants, Catholics, and Jews and people of all faiths gave their lives. There is no amendment to the Constitution indicating on what altar a man must offer his heart to God in order to hold public office. Our motto, "In God we trust"; our firm belief, "A public office is a public trust"; our people, a religious people preferring that a candidate have religion but possessing no right to say what religion.

Our Constitution, which Mr. Gladstone has described as the greatest political document ever struck off at one time by the mind and purpose of man, states who shall be eligible for President. He must be a natural born citizen, 35 years of age, and he must have been 14 years a resident of the United States.

It does not say, provided he is not of this faith or of that faith.

It does not say, provided he is a Baptist, or a Methodist, or a Jew, or a Presbyterian, or an Episcopalian, or a Catholic, or a Quaker.

It does not say, provided he is not one of these religious faiths.

The Founding Fathers held fast to their faith in America and they founded this country on the principle of religious freedom; but it is so easy for us to lose our faith in America—so easy to argue that if we compromise our principles on religious freedom, that somehow good will come of it. It is so hard to shed our prejudices when we go into the voting booth; so hard to stand firm on principle, when confronted by our cherished prejudices at the ballot box.

Let us remember that Americans have elected some Presidents who were not a member of any church. Abraham Lincoln was not a church member, and President Eisenhower was not a member of a church when he was elected in 1952. It is a matter of public record that he joined the church by profession of faith after his election.

Today we have running as presidential candidates in 1960, a Catholic and a Quaker, and the Founding Fathers wrote nothing into the Constitution to prevent either one of them from running or being elected.

As an American citizen, do you think that because the Quakers wait for the spirit to move them in the meeting house, Mr. NIXON will be slow to speak up at Cabinet meetings? Of course he will not.

Do you think the fact that some Quakers are pacifists should be examined in this campaign or that voters should begin to fear that the Vice President, a Quaker, might not be willing to go to the mat with the enemies of our country?

Your answer and mine is, of course, a resounding "No." Then why in the name of justice and freedom can't you and I, and all the rest of us, grant the same right to Senator JOHN KENNEDY, namely: the right to render unto Caesar the things that are Caesar's, and to God the things that are God's?

In a democracy we can't ration religious freedom—just parcel it out to you and me. Democracy is not only a government—it is a philosophy, a way of life. We can't have freedom of religion in your house and my house and not have it in the White House.

In a democracy we can't print "freedom of worship" in the Constitution and be done with it. It must come to life in our minds and hearts, just as the written score of Bethoven's Fifth must have the skill of the musicians to play the instruments that lift it from the written page to new heights of beauty and understanding. So must it be with the principle of religious freedom in the hearts of the American people.

It isn't enough to talk about the Founding Fathers in our patriotic organizations, and say what a great heritage they left us, and then be false to that heritage when we cast our vote.

All of us face the real test of bringing alive in our own hearts and minds and in the ballot box the great principles contained in our Constitution. May I tell you that Senator KENNEDY is the son of a Gold Star Mother. Three of her sons fought for their country in World War II. One son went to war and didn't come back. He "fell with his face to the foe."

The Gold Star Mother knows the tense moments of waiting for messages—"wounded" or "missing in action" or "died in the service of his country."

When the Kennedy sons were called to fight for their country in the front lines, they were not asked whether they were Protestant or Catholics or Quakers or Jews.

They were not denied the right to serve their country in a critical hour. They were not denied the right to die for their country. One was killed in action. Another, JOHN KENNEDY, was most desperately wounded in action and recovered for further service of his country with the same valor of spirit that carried him into the front lines of the American naval service.

It would be shocking to friends of freedom all over the world if he would now be denied the highest public service because of his religion.

His religion was not a bar to his most desperate wounds. Should it now be a bar to his highest public service?

This would be a wound indeed—a wound to freedom in America and to freedom in the world.

Women know, and I do not need to tell you, that through long generations the American mother has held her infant in her arms—her heart flooded with warmth, with the thought that in a free country her little boy could be President of the United States. It was his birthright. "This could happen only in America." Shall we say now that this is no longer true.

Must the American woman write a footnote to the Constitution of the United States in the year of our Lord 1960, engulfed in a blast of religious prejudice, marking their ballots against freedom of religion? Shall they say to the future mothers of America: "Only if he is in the right denomination can your son be President"?

God forbid that we say to the Gold Star Mother, "Your son can die for his country but your son cannot be President unless he belongs to the right denomination."

Some years ago I heard Judge John J. Parker of the circuit court of appeals make a speech. It was not a political speech but he pointed out some historical facts that need to be remembered.

None of us—Protestants, Jews, or Catholics—should indulge ourselves in prejudice. We owe to much to each other.

How can a Protestant or a Catholic woman indulge herself in prejudice against the Jews?

She will not, if she reminds herself that the Blessed Saviour and the Apostles were Jews. Furthermore, the Jews gave us our Scriptures, the New as well as the Old Testament. And the Jews were the chosen people of God, and they gave us the Ten Commandments on which our moral code is based.

And if there are Protestants in the heat of this campaign who feel themselves yielding to the temptation to be prejudiced against the Catholics, they should remember that it was the Catholic Church which kept the Christian faith alive during the dark ages, and they preserved it for the future regeneration of the world.

And the Catholic Church stood firm against Nazi persecution.

And the Catholic Church has been like the Rock of Gibraltar in standing against the advance of communism.

Finally, the Jews and the Catholics owe much to the Protestants. Both the Jews and the Catholics have benefited by the magnificent part the Protestant religion has played in establishing free government and in bringing about a greater understanding on the part of government of the inherent rights of the individual.

All of us, Catholics, Jews, and Protestants, have played a vital part in establishing our western civilization. Let's stick together like true Americans. At this late date don't go off in the amen corner and pray for strength to fight each other, in the face of a powerful united foe that denounces all religion. Let's stand toegther against communism and preserve the American way of life.

Of genuine concern to many Americans is the question of the separation of church and state. Let me examine the record of Senator JOHN KENNEDY on this very matter of the separation of the church and state.

He has come out forthrightly and clearly for the separation of church and state. No Member of the Congress of the United States has a better voting record on public issues testing separation of church and state than Senator JOHN KENNEDY of Massachusetts. He has made his declaration to the Nation and the world. I accept his statement as an expression of his honest convictions and his voting record upholds it.

First, let me point out to you that Senator KENNEDY voted against Federal aid to parochial schools, even though there were some Senators who were Protestants who voted for it. Let me read from his own words from the record. He said without equivocation: "I am opposed to it. I clearly believe it is unconstitutional. I voted against it on the Senate floor this year when offered by Senator MORSE."

Second, there is the question of an Ambassador to the Vatican, if this should become a real issue again. Senator KENNEDY took a stand against it. Senator KENNEDY said: "I am opposed to it, and I said so long ago. But even though it was last proposed by a Baptist President, I know of no other candidate who has ever been asked about this matter."

And third, there is the question of signing a bill providing foreign aid funds for birth control. The prospects are remote that it would arise, but Senator KENNEDY has said: "I have made it clear that I would neither veto nor sign such a bill on any basis except what I considered to be the best public interest, without regard to my private religious views. I have said the same about bills dealing with censorship, divorce, our relation to Spain, or any other subject."

Senator KENNEDY has come out with a clarion call for more and better public education. "No problem," he has said, "touches our life more directly." Senator KENNEDY is a strong supporter of the public schools as a basic American institution, basic to our freedom and our democracy.

Our competition with the Soviets depends in part on our science training in our high schools.

Senator KENNEDY has said: "We need programs of student aid, loans, fellowships, and scholarships * * * and not limited to the

fields of science and defense. We must start now building the classrooms and dormitories our colleges already need * * * building programs which the President halted by virtue of his two housing bill vetoes. We need research grants for teachers and others outside the health and science fields. We need to find ways of meeting our colleges' growing shortage of available capital."

"Civilization" he points out, "according to the old saying, is a race between education and catastrophe."

His record is clear on the separation of church and state and one on which in good conscience you can support him. He has spoken out as a true American. He backs up his words with an unblemished record on separation of church and state for 14 years in the U.S. Congress and Senate—a record not surpassed by any American in public life.

In the face of his public statements and his established record what is it that his opponents in addition would require? Would they have him renounce his Christian faith as a member of the Catholic Church?

Supporters of KENNEDY are not voting for or against the Catholic Church. They are voting for KENNEDY as a free American worthy to be President of the United States.

He served in the Navy in World War II with a record of heroic action. He has risked his life for his country and almost lost it. His brother died for his country.

Who is there among us whose patriotism is so great that he can cast the first stone?

I, for one, shall be proud, honored, and happy to cast, not a stone, but my ballot for a true American, in the highest tradition of the separation of church and state, for a nobly great American, Senator JOHN KENNEDY, for President of the United States.

Mr. Harry Golden, well-known writer, said in his Carolina Israelite, recently, something I think we would do well to consider:

"If America elects a President who is of the Roman Catholic faith at this moment in world history, it will be worth the equivalent of 50 cobalt bombs in our ideological war against the Soviet Union. That part of the world which we call 'neutral' or 'uncommitted' may not have been able to decipher our foreign policy in recent years, and they may not have shown adequate appreciation for our military and financial aid, but they will know that our democracy still has a tremendous vitality, because at our most critical hour, a member of a minority religious group was able to win the highest political office in Protestant America."

NORMAN CLAPP, EXPERT AND UNDERSTANDING FRIEND OF THE WISCONSIN FARMER

Mr. PROXMIRE. Mr. President, a distinguished constituent of mine, Mr. Norman Clapp of Lancaster, has recently delivered a hard-hitting speech on the farm problem as seen from a Wisconsin standpoint.

Mr. President, Norman Clapp is a man of remarkable background. He is still a young man. He was on the staff of the late Senator Bob La Follette—young Bob—from 1935 to 1937 and again from 1939 to 1944. Part of this time he was the expert of the minority of the Senate Committee on Finance. He has been a smalltown newspaper edition in Wisconsin for the past decade. He has sensed the seriousness of the farm problems not only for farmers but for everyone in rural America.

In recent years Norman Clapp has been an eminently successful smalltown weekly newspaper editor. He founded his own weekly in Lancaster, Wis., and built it into a thriving publication that has repeatedly won recognition by the Wisconsin Press Association for its excellence.

But Mr. Clapp has a particular and very practical understanding of farm problems in addition to publishing and editing his smashingly successful paper in a farm community. He has been called on repeatedly by farm organizations to participate in their programs.

First. For the last 5 or 6 years at least he has been asked to serve on the drafting committee to draft the action program of the Wisconsin Farmers Union, which is then submitted to the State convention for consideration. Clapp actively served on this committee every year he was asked, including this year.

Second. In 1958 James Patton, the national president of the Farmers Union asked Clapp to serve on a similar committee to draft the National Farmers Union action program and did so.

Third. Clapp has frequently spoken to farmer-businessmen dinners sponsored by farm organizations devoted to building recognition of the common interests of businessmen and farmers.

All this is in recognition of a deep interest and very remarkable understanding of basic farm issues.

Mr. President, this speech, delivered by Mr. Clapp at Argyle, Wis., on August 25, 1960, I think is an unusual speech, and I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

SPEECH OF NORMAN M. CLAPP AT MEETING OF PECATONICA LOCAL OF WISCONSIN FARMERS UNION IN ARGYLE, WIS., AUGUST 25, 1960

I want to talk with you here tonight about agriculture and politics—in the very best sense of the word.

Contrary to what some people say, I believe that farming and politics must go together at least for the present and foreseeable future. Otherwise we are not going to solve the life and death problems facing the family-type farm.

If we are to save the family-type farm from extinction, good farmers had better give some serious thought to their politics—and, I am sure, good politicians had better give some attention to farming and its problems.

The survival of family farming is one of the great burning issues of the 1960 elections in this country.

It has been an issue before. It was an issue in 1952, but the farmers did not realize it. They took General Eisenhower's assurances of 90 and 100 percent of parity at face value and concluded there was no difference between Democrats and Republicans on that issue. They discovered afterward how tragically they had been misled. They learned from bitter experience that the change from a Democratic administration to a Republican administration had really meant a basic change in attitude toward agriculture and particularly toward people in agriculture, the farm families.

Where the problems and needs of independent farmers as an essential part of our social and economic structure had been given top priority under Democratic administrations, there was now a new scale of values in which the sacred cows of efficiency and free market were placed above the welfare of the farmer and his family.

The Federal Government under the management of the Republican Party deliberately has set out to put American agriculture through the wringer of lower and lower farm commodity prices, on the theory that lower prices would result in less production and fewer farmers.

On the first count they were sadly mistaken. Lower commodity prices actually stimulated production as farmers struggled desperately to meet their cash requirements on falling markets.

On the second count, however, they were, even more sadly, correct. In the last 10 years we have liquidated almost one out of every five farm units in the Nation, and the great bulk of this liquidation has come under the pressure of the cost-price squeeze applied by the Eisenhower-Nixon-Benson administration.

By 1956 farmers throughout the Nation realized there was a farm issue, but they still did not fully sense its seriousness. They were distracted by other issues in the election campaign. Some dairy farmers, I suspect, were lulled into a false sense of security when Secretary Benson temporarily raised the price supports on milk from $3.15 to $3.25 to sweeten the reception of President Eisenhower's veto of the Democratic farm bill, H.R. 12, which would have restored 90 percent of parity prices on the basic farm commodities.

But any such hopes that there would be a reversal of Republican policy have long since gone aglimmering. Secretary Benson and his cohorts have driven farm commodity prices down to 80 percent of parity on the average for all commodities. Price supports on the basic commodities are down to 75 percent of parity.

And Mr. Benson, speaking for the administration, has proposed that he be given authority to set them as low as 60 percent of parity. In fact, he has proposed that the whole parity concept be discarded and in its place there would be the 3-year creeping average of market prices as a device to open the door for further drops in support-price levels.

This steady pressure from the present Republican administration has taken an enormous toll from American farmers. Total net farm income has dropped from $16 billion in 1952 to an estimated $11 billion this year. Per capita farm income is less than $1,000 per year. Per capita income off the farm is $2,200 per year, more than double the income on the farm.

Since 1952 the farmers of this country have lost $21 billion in net income as a result of falling farm commodity prices. This is quite a bill for the farmers to pay.

And this affects not only farmers. It affects the entire economy when farm purchasing power falls to the lowest ebb since 1934, as it has. It directly affects the merchant on Main Street in every village and city such as ours in this area where our communities are rooted in the farming surrounding them. And it affects the manufacturers of automobiles, farm implements, petroleum products, farm chemicals, tires, lumber, and steel.

Farmers handle a gross income of $38 billion. The market potential of such an important segment of our economy is of prime significance to the growth and prosperity of the entire economy. Keeping it in step with nonagricultural segments of our economy is essential to the maintenance of full employment of the manpower and resources of the Nation.

Here in Wisconsin alone the failure of farm income to keep up with nonfarm income has been costing us an estimated $372 million per year.

So these are some of the aspects of the issue as it has been shaped by political decisions of the last 8 years. They carry with them a special urgency in this year of 1960, because time and endurance are running out for the small farmer.

It may come as a shock to many people, but University of Wisconsin agricultural economists in a study last year reported to Governor Nelson that at 1958 prices nearly half of Wisconsin dairy farms did not return a nickel to the farm operator and his family after paying for nonlabor costs and deducting a 4-percent return on his investment. Less than 10 percent of Wisconsin dairy farms paid all such costs and returned as much as $3,000 to the operator for his labor and management.

It is a grave question as to how long the typical family type farmer can survive present trends toward higher investments and greater overhead costs in the face of lower prices and falling income.

Lack of adequate price support and the skyrocketing of interest charges are two developments directly traceable to policies of the Federal Government since the Republican administration took office. They point inescapably to the importance of political decisions in the welfare and future prospects of American agriculture.

They point also to the importance of making the right choices in this coming national election. I doubt if the family farm can survive another 4 years and certainly not another 8 years of the present brand of Federal farm policy.

This may be the last chance to save the family farm in America.

As these family units disappear and are swallowed up by larger adjacent farms, as the buildings fall into disrepair and are abandoned, they are not easily replaced. Once the land map is remade into large corporate, integrated operations, it will be too late to reverse the trend. If it is to be done, it must be done now before it is too late.

This is why I regard the survival of the family farm as one of the great issues of the coming national elections. This is why I feel farmers and all those who have a stake in rural America must give more than passing attention to the political choices we face this November.

In the tumult of political debate to come, there will be many attempts to confuse and divert farmers and the people of our rural communities from the changes needed in our national administration, if family farms and farm families are to continue as the backbone of rural America.

There will be those who will pick up the old argument that this is not a political question. They will assert that politicians keep the farm issue stirred up for their own private benefit and that everything would be better if we got agriculture out of Government and the Government out of agriculture.

Those who take such a position either seek to hide their own neglect of agriculture's interests, their ignorance of the basic problem, or—worse still—to mislead the farmer while they prepare his destruction.

The consequences of the Federal Government's withdrawal from all efforts to maintain a fair return for agriculture's contribution to our economy would be catastrophic. A relatively mild indication of what it would mean is to be found in a study undertaken by the Department of Agriculture and economists from the land-grant colleges at the direction of the Senate Committee on Agriculture. The report of this study is now published as Senate Document No. 77 of this present Congress.

The Senate committee demanded to know what would be the consequences in commodity price levels, production, and net farm income if production controls were abandoned on all commodities except tobacco, and price support levels were allowed to fall to a point where the market would absorb all current crops and the reduction of current Government inventories over a 7- to 10-year period.

The economists who made the study reported that such a program, which still is something short of complete withdrawal of the Government from the farm marketing problem, would result in an overall increase of 20 percent in farm production by 1965 and the dropping of hog prices, for instance, to 11 cents, beef cattle to $15 per hundredweight, and manufacturing milk to $2.60.

Net farm income in the Nation would drop to $7 billion, less than half of what it was in 1952 and more than $4 billion less than the present low level of farm net income.

The so-called free market is no answer to agriculture's problem. Other industries go to great lengths to protect themselves from the very free market their spokesmen prescribe so willingly for agriculture. Steel, automobiles, farm machinery, petroleum, cement—to mention only a few of the great industries—are not operating on a free market. They control their market to a great degree. They set their prices and tailor their production accordingly.

Agriculture, made up as it is by 4,500,000 separate producers, is not able to protect itself on the market unless it can organize through the good offices of the Federal Government. If we are to solve the problems of agriculture at this critical time, it will have to be done with the assistance of a Federal farm program of one kind or another. That we must recognize.

The second argument we will hear from those who wish to divert farmers and confuse their friends in the choice ahead attempts to ignore the fact that there is an important difference between the Democratic and Republican Parties in their views of the farm issue.

I have heard it said by Republican candidates this year, and I am sure you have too, that farm distress, while unfortunate, is inevitable. In sharing any blame, they display a real zeal for bipartisanship. They say we must not blame Secretary Benson, the Republican Party, or anyone else in the present administration, because, after all, they say, they are just administering the same law passed by the Democrats 10 years ago. What is more, they say, the Democrats have had control of Congress since 1955 and have failed to pass any significant changes in the law. This is what they say.

What is the record? First of all, the law they speak of authorizes the Secretary of Agriculture to fix support prices anywhere between 75 percent and 90 percent of parity. Certainly it represents a great difference whether you pick the high figure or the low one. What former Secretary of Agriculture Charles Brannan did with that law under a Democratic administration and what Secretary Benson does with it under a Republican administration are as different as night and day. Secretary Brannan aimed to protect agriculture from the extremes of postwar readjustments. Secretary Benson and the policy of the Republican administration have endeavored to force a harsh readjustment upon agriculture and in the process plow under what they have apparently regarded as a surplus of farmers.

And as to changes in the law, the Democratic Congress in 1956 passed H.R. 12, which would have made basic price supports of 90 percent of parity mandatory upon the Secretary of Agriculture. President Eisenhower vetoed that bill.

In 1958 the Democratic Congress passed Senate Joint Resolution 162 to prevent any further reductions in price supports pending an effort to work out a comprehensive farm program that would meet with general approval. President Eisenhower vetoed that.

Last year President Eisenhower vetoed the wheat program passed by Congress. He vetoed the tobacco support program also passed last year.

When Democrats like LESTER JOHNSON tried to get the House Agriculture Committee to incorporate Governor Nelson's dairy program into the 1960 emergency farm income bill, every Republican vote cast in the committee was opposed to it.

Whatever the campaign orators say, the record shows that the Democratic Party and its leadership have consistently tried to bolster up agricultural prices and income. Republican leadership has consistently tried to force farm commodity prices down and leave the individual farmer at the mercy of a market over which he can have no effective control.

So as farmers make their choice of parties and candidates in the coming elections, they will do well to look at the record and remember their experience. It does make a difference to them in this life-and-death struggle.

The party they choose makes a difference. The Democratic Party is dedicated to the preservation and strengthening of the family farm. The Republican Party has proved by its record that it is willing to sacrifice the family farm to the demands of the processors for lower and lower farm commodity prices from which they coin higher and higher profits.

And finally let us hope that those who are interested in the future of family farming are not misled by the "new look" Vice President NIXON is trying to assume in preparation for his bid for the Presidency. For 7½ years Mr. NIXON has been an active part of the administration which has conceived and executed the policies which have brought agriculture to the brink of disaster. He has approved those policies. When he has had the chance, he has voted for them. He has been lavish in his praise of Secretary Benson.

To attempt to disassociate himself from either Secretary Benson or his policies on the eve of an election ought to fool no one.

This is a critical time for American agriculture as we know it and cherish it—not only as a producer of food and fiber, but also as a way of life. The family farm is the wellspring of American character in which the human traits of independence and neighborliness, initiative, and cooperation, the individual and the community have become blended in a distinctive American mold.

What happens to this kind of agriculture and to the people who share its blessings will depend in great measure, whether we like it or not, upon the decision we make as citizens this fall, on what party we choose to assume the responsibility of government, on whom we elect to office. It depends upon our choice of representatives in the Congress and, above all, our choice of a President of the United States.

We cannot afford to make a wrong choice this time.

THEODORE ROOSEVELT MEMORIAL

Mr. CASE of South Dakota. Mr. President, I ask unanimous consent for the immediate consideration of Calendar No. 1905, H.R. 8665, a bill to establish a memorial to Theodore Roosevelt in the National Capital. This is identical with Senate bill 2561.

I have conferred with the distinguished majority leader and the distinguished minority leader and have told them I planned to make this request and to offer an amendment for myself and the Senators from New York [Mr. JAVITS and Mr. KEATING], which has been printed.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 8665) to amend the act entitled "An act to establish a memorial to Theodore Roosevelt in the National Capital" to provide for the construction of such memorial by the Secretary of the Interior.

Mr. KEATING. Mr. President, if the Senator from South Dakota will yield, I wish to express my appreciation to the majority leader, the minority leader, and the distinguished Senator from South Dakota [Mr. CASE] for the very able help they gave in working out this situation. I am sure the amendment takes care of the matter in splendid shape; it provides that the family of Theodore Roosevelt shall have a voice in determining the form of the memorial.

It would have been a great mistake not to have acted upon this bill, for over the past few months all of the parties interested have reached an agreement on the best way to determine a site and a design for a monument to Theodore Roosevelt. On one thing all are agreed; namely, that we very definitely should build a monument to Theodore Roosevelt.

His vigor and enthusiasm, his unyielding love of country, his warmth and deep human understanding have made him a truly great American. Now in the second half of the century in which he served as President, he has come to be recognized as one of our greatest Presidents. To small boys everywhere, the name of Theodore Roosevelt conjures up visions of a rugged, courageous approach to life as reflected in the successes of the famed Rough Riders, whom Theodore Roosevelt led so gallantly.

To those who remember or those to whom the history of his era is of special importance, President Theodore Roosevelt's part in the settlement of the Russo-Japanese War, his work with the New York City Police force, his terms as Governor of my State, his civil service reforms, his trustbusting, all bring to mind his life and accomplishments.

To leave Washington without enacting this bill on which so much work has been done would have been extremely unfortunate.

I am not prepared or fully enough informed on the mechanics of this matter to comment either on the design or the site of the memorial which this bill would permit us to start working on. The wide public interest in this project will, I know, encourage those responsible to frame their plans in accordance with the wishes of the many groups which have expressed an interest. This is as it should be. The amendment adopted today gives to the living children of President Theodore Roosevelt some measure of authority with respect to the design of this memorial. Others are interested, as am I, in this matter and look with great anticipation to the day when all of these matters will be attended to and when construction on the Nation's monument to Theodore Roosevelt will be initiated.

Mr. JAVITS. Mr. President, will the Senator from South Dakota yield?

Mr. CASE of South Dakota. I yield.

Mr. JAVITS. I should like to join my colleague in again thanking the Senator from South Dakota for developing this formula, which has broken the logjam which has continued for more time than really was proper, considering our objective.

I also wish to thank both the majority leader and the minority leader.

I hope final action will now be taken on the bill.

Now that the Senator from South Dakota has discussed the matter, I wonder whether he will have any objection to having the House bill taken up.

Mr. CASE of South Dakota. I have already requested that that be done, and House bill 8665 is now being considered by the Senate.

Mr. JAVITS. I thank the Senator from South Dakota.

Mr. CASE of South Dakota. Mr. President, I offer the amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER (Mr. BURDICK in the chair). The amendment will be stated.

The LEGISLATIVE CLERK. On page 2, in line 1, after the word "by", it is proposed to insert "the living children of Theodore Roosevelt,".

The PRESIDING OFFICER. The question is on agreeing to the amendment submitted by the Senator from South Dakota.

The amendment was agreed to.

Mr. CASE of South Dakota. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a letter I have received from Hermann Hagedorn, director emeritus of the Theodore Roosevelt Memorial Association, together with a statement he has prepared.

In placing Mr. Hagedorn's letter in the RECORD at this point, I wish to direct attention to his emphasis upon the granite panels carrying the words of Theodore Roosevelt and a bronze bas-relief of him speaking to an audience stretching out infinitely. "Such a bas-relief," Mr. Hagedorn writes, "does not require the sphere. You can take it or leave it." Under the amendment which I proposed and which has now been adopted, the approval of the living children of Theodore Roosevelt will be required before any design can be placed on Theodore Roosevelt Island for this memorial.

There being no objection, the letter and the statement were ordered to be printed in the RECORD, as follows:

THEODORE ROOSEVELT
CENTENNIAL COMMISSION,
New York, N.Y., August 27, 1960.

Hon. FRANCIS CASE,
Senate Office Building,
Washington, D.C.

DEAR FRANK: Your letter of the 20th was forwarded to me from my former office in New York. You will note, from the superscription, that my wife and I are now living on the west coast. We moved out here early in May.

I am grateful to you for your letter, enclosing excerpts from the CONGRESSIONAL RECORD, reporting the debate on the TR memorial. I am distressed, of course, that the discussion ended as it did, but I am grateful for the high quality of the debate and for your own constructive attitude. I appreciate, moreover, your request for any suggestion I might care to make "with respect to what should be incorporated in the bill to insure a memorial that would convey" Mr. Roosevelt's great qualities as a man, a leader, and a symbol of the American spirit.

In view of the storm of adverse criticism which the proposed celestial sphere has aroused, I want to point out that, in the plan which the TR Association originally proposed and the Centennial Commission adopted, the sphere was a detail and, by no means, the essential feature. I have asked the present director of the TR Association, Mr. Leslie C. Stratton, to send you an extract from my final report to Congress as Director of the Centennial Commission. (A copy of the report was sent you, of course, and you may, in fact, have it in your office. The passage, referring to the memorial, begins on p. 47.)

You will find that what the TR Commission proposed was a semicircle of granite panels, 12 feet high, bearing quotations from TR (and, if it seemed desirable, from other great American leaders as well) on the moral foundations of freedom, with smaller granite tablets, or boulders, on the paths approaching the semicircle, bearing quotations on the same theme, from great leaders of the other free peoples. The Commission, that is, proposed a Sanctuary of the Free Spirit which should have significance not only for the American people but for the whole world.

In this plan, the celestial sphere, which has caused all the commotion in the press and in Congress, is, as I said above, a secondary issue. You can take it or leave it. The sanctuary is the essential thing. On the base of the sphere, the Commission proposed a bronze bas-relief of TR speaking to an audience stretching out infinitely. Such a bas-relief, however, does not require the sphere.

It could be placed in front of the granite panels on a long panel of its own.

I do not have to tell you how pertinent to TR's character and to his life such a sanctuary of the free spirit would be, or how relevant it would be to our basic need, as a free people, today, as well as to our position as leader of the free world. The activities of the TR centennial year, established, in the public mind, Elihu Root's picture of TR as "the greatest teacher of the principles of popular self-government the world has ever known." Further, in the discussion regarding our national purpose that has been going on, this past year, the wisest of those who have given their thinking to the public have pointed out that our national purpose should be what actually it has been since Thomas Jefferson, in the Declaration, broadened the idea of freedom of Britain's 13 rebellious colonies to freedom for all men. "All men are created free and equal." Our national purpose has been and still is to maintain freedom for ourselves and to encourage its spread throughout the world.

How could that purpose be more appropriately or more effectively symbolized than by the proposed sanctuary of the free spirit in which, through the proposed inscriptions, TR shall speak to the American people, and to all mankind, of the challenge and the moral and ethical foundations of freedom? Such a sanctuary would become, overnight, a magnetic place of pilgrimage for Americans and, in fact, for free peoples everywhere. For it would be not just a TR sanctuary or even an American sanctuary; but a world sanctuary of the free spirit.

All this, let me recall, is no improvisation for the purpose of diverting the attention of the Senate into new channels, in the matter of the TR memorial. It is all in the initial and the final TRCC reports (1956 and 1958).

For all men, here and abroad, the plan, as there stated, would declare anew America's purpose and, through the press, the screen, radio and TV, dramatize to ourselves

and to others, for all time, what America stands for among the nations.

Theodore Roosevelt Island was actually dedicated on July 4, 1958, as such a sanctuary of the free spirit. I enclose a copy of the brief address I delivered on that occasion.

I wish it might be possible, before Congress adjourns, to place before the Senate the plan of the TR Centennial Commission of which the sphere was actually only a detail, by no means essential to the central idea. I am confident that most of the distinguished and honorable gentlemen who have opposed the sphere would catch the significance and appropriateness of the sanctuary as a memorial to Theodore Roosevelt and a symbol of America's determination to defend, and to extend, freedom throughout the world.

Cordially yours,

HERMANN HAGEDORN.

A SANCTUARY OF THE FREE SPIRIT

(Remarks by Hermann Hagedorn, director of the Theodore Roosevelt Centennial Commission, on the occasion of the dedication of Theodore Roosevelt Island in Washington, D.C., on July 4, 1958)

It is appropriate that this island, which is the national memorial to Theodore Roosevelt, should, in this his centennial year, provide the background for the National Capital's Independence Day celebration. With the support of President Eisenhower and under the cosponsorship of some 30 national organizations aggregating millions of members, the Theodore Roosevelt Association and the Theodore Roosevelt Centennial Commission have inaugurated a movement to make our greatest national holiday once more what the President has called a day of heroic memory and challenge, a day of individual rededication to the responsibilities of freedom. It is our hope that in the years to come, this island may become a significant center of such rededication.

Purchased by the Theodore Roosevelt Association almost 30 years ago, through the contributions of men, women, and children throughout this country and in other lands, the island was presented to the Nation and placed, by act of Congress, under the beneficent eye of the National Park Service. When Congress established the Theodore Roosevelt Centennial Commission, 3 years ago, it specifically charged the Commission to make the development of the island a major objective.

The plans which the association and the Commission developed go far beyond the personality or even the achievements of Mr. Roosevelt as political leader and statesman. They deal with that fundamental need of the Republic which was closest to his heart: the need to deepen in the American people the recognition of the moral foundations of a free society and to awaken in the citizen a sense of personal responsibility toward the Government which guards his freedom, the Government which, with others like him, he actually is.

Recognizing that both the national need and Mr. Roosevelt's memory could not be better served, the asosciation and the commission, in proud alliance with the National Park Service, proposes to makes this beautiful, wild island a sanctuary of inspiration and challenge, to which men and women, boys and girls, from every section of the land—and, with them, free men and women from all over the world—may come to face the imperatives of the free spirit and to rekindle the sacred fire in their hearts.

For the spirits of the great dreamers and doers in the long struggle to establish and maintain human freedom will be their companions and their teachers here. On panels of granite the pilgrims will read living words that, in an age of ideological conflict, shall present the ideology of freedom; compelling American words, compelling words from the teachers and prophets of all the five continents.

Great spirits will walk here, great spirits will speak; and they will not leave untouched those whose hearts are open to what they have to say.

Hearing their approaching footsteps, let us, in this critical hour in history, dare to "dream greatly," as Theodore Roosevelt adjured us to do. Then, perhaps, we shall together see this island as a precious area of life-giving and life-enlarging tranquillity in this arena of fiercely contending wills, ambitions and aspirations that is the Capital of the United States, the capital of the free world. Stretch your imaginations and see, with me, on this island, the old and the young, the wise and the ignorant, the somebodies and the nobodies of this world, communing here with the spirits of the past, and finding here again the lost standards, the lost perspectives of generations less man-centered, less absorbed in the tangible, than our own. See, with me, under these overarching boughs, the four-star general, the statesman, the senator, the diplomat, standing hushed, perhaps, in an attitude of wonder, hearing in the cathedral quiet that inner voice, that a noisy, undisciplined age has, for too many, drowned out.

Searching their souls, under the impact of that voice, the man of action, the man of thought, and ordinary people from near and far, may, in this green silence, apprehend the ultimate responsibility of the free citizen, be he statesman or streetcleaner: the relation to the national security, the national greatness, of the kind of person he is and the kind of life he lives; the relation of his moral confusion and inner division to the confusion and division in his Nation; the relation of his inner peace to the unity of his Nation and to peace in the world.

As I close, I ask you to give thought to these trees under which we have gathered in this dedicated twilight. Through the years, the decades, the generations, they will grow to maturity and, at last, to grandeur. So some of us hope, believe, trust, that the pilgrims who come for an hour or a day to breathe the air of this sanctuary may find here the sustance by which men mature and grow toward greatness.

See, with me, these people, finding here, perhaps, a deeper understanding of freedom, a deeper devotion to the free spirit. See, with me, this forest, growing with the passing generations, loftier and more mysterious, until no temple built by human hands shall match it. See, with me, this island of new perceptions and widening horizons, of new faith and assurance, new life, new power, a new day; see it as the one shrine and place of pilgrimage in the world that free men everywhere shall have in common.

Let your imaginations seize upon these people, these woods, this world shrine. For it is to this vision that this sanctuary of the free spirit is dedicated.

Mr. MANSFIELD. Mr. President, is it understood that the bill was called up with the understanding that it was cleared with the two leaders?

Mr. CASE of South Dakota. I spoke to both the leaders, just prior to the quorum call; and I understood the majority leader to say that he understood it was satisfactory to the Senator from Georgia [Mr. RUSSELL] if the amendment were proposed.

Mr. JAVITS. Mr. President, will the Senator from South Dakota yield to me?

Mr. CASE of South Dakota. I yield.

Mr. JAVITS. I think we should also include in our expressions of appreciation the Senator from Georgia [Mr. RUSSELL]. As a matter of fact, the Senator from Georgia has yielded more than any of the rest of us could, because he felt so outraged by the design. His acceptance of this formula certainly indicates his desire to get this done.

Again I should like to thank most sincerely the Senator from South Dakota for devising this arrangement.

Mr. CASE of South Dakota. I thank the Senator from New York.

Mr. President, if I misunderstood in any respect the statement by the majority leader to the effect that the arrangement is satisfactory to the Senator from Georgia, I shall be glad to request, later on, that the action taken on the bill be vacated.

Mr. MANSFIELD. Mr. President, the Senator's word is good enough for me.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 8665) was read the third time and passed.

Mr. JAVITS. Mr. President, I ask unanimous consent that Senate bill 2561 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

DISTRICT OF COLUMBIA SALES TAX

Mr. FREAR. Mr. President, during the past 2 days, bills providing salary increases for the policemen, the firemen, and the schoolteachers of the District of Columbia have been passed by the Senate.

There has also come from the District of Columbia Committee, calendar 1917, House bill 10346, relating to an increase in the District of Columbia sales tax. It is very well recognized what the situation regarding that bill would be.

I simply wish to state again, for the RECORD, that I am in favor of the bill, and I believe it should be passed. I do not think it was necessary at all to couple that bill with either of the two bills which increased the salaries of the firemen and policemen of the District of Columbia and the schoolteachers of the District of Columbia.

But I also recognize the fact that the District of Columbia will, of necessity, have to have an increase in a certain kind of tax, in order to meet its budget. On the other hand, I understand that is not an urgent matter until the Congress returns in January.

But again I state that I think a sales tax is a justifiable tax for the District of Columbia to use in raising revenue.

Mr. MANSFIELD. Mr. President, will the Senator from Delaware yield?

Mr. FREAR. I yield.

Mr. MANSFIELD. I wish to say to the Senator from Delaware that what he has said is accurate; and we had to wear down his opposition in order to get the three District of Columbia bills to which he has referred brought to the floor ahead of the measure, reported by the District of Columbia Committee, having to do with an increase in the District of Columbia sales tax from 2 to

3 percent. That was made very plain during the course of the debate on those bills. Certainly if anyone has any doubt as to the position of the Senator from Delaware in regard to the sales tax for the District of Columbia, such a person either is dense or else does not want to ascertain the situation.

Mr. FREAR. I am grateful to the Senator from Montana.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT OF HELIUM ACT OF SEPTEMBER 1, 1937

The Senate resumed the consideration of the bill (H.R. 10548) to amend the Helium Act of September 1, 1937, as amended, for the defense, security, and general welfare of the United States.

Mr. ALLOTT. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Colorado will state it.

Mr. ALLOTT. Am I correct in understanding that House bill 10548 is the pending business?

The PRESIDING OFFICER. That is correct.

Mr. ALLOTT. I expect to ask for the adoption of several minor, technical amendments; but I shall wait until my colleague is on the floor before I do so; and then I shall discuss at some little length the helium bill.

First of all, Mr. President, in 1925, Congress enacted the first Helium Act; and since that time the Government, through its various agencies, has exercised an almost complete monopoly, through the Helium Act.

Today, the situation in the United States is that the present consumption of helium is about 370 million cubic feet a year. To get some concept of what that amounts to, in terms of the need and the production of helium, let me say that the 370 million cubic feet a year now being used is 80 times the amount of helium that was being used in 1937.

Mr. President, helium is a very vital and essential part of our national defense program, our missile program, and our atomic energy program. Seventy percent of the helium gas now being consumed in the United States is used directly by the Department of Defense, the Atomic Energy Commission, the National Aeronautics and Space Administration, and other Federal agencies. An additional 20 percent is used in industry on Federal defense and atomic energy contracts. In other words, we face a situation today in which 90 percent of the helium now manufactured or extracted in the United States is used either directly in our defense or missile programs or in private defense plants which have contracts with the Federal Government.

Approximately 10 percent of the present production of helium gas is used in the so-called civilian industrial field, that is, by consumers who do not have Government contracts. To illustrate, helium gas is used as a shield in welding processes involving aluminum, titanium, and other lightweight metals. It is necessary in welding, where there is a presence of oxygen, to use helium noncombustible gas as a shield so that the welding process may be accomplished.

In addition to the uses which I have just mentioned, the new field of cryogenics, involving extremely low temperatures, makes helium an absolute necessity, because at the present time there is no method of getting a temperature below 20 degrees above absolute zero without the use of helium. Of course, at absolute zero molecular action ceases and all kinds of queer things happen to every substance that is exposed to such temperatures. This field, which has just opened in the past few years, offers and will offer some fantastic possibilities in overall basic science and basic research.

Mr. President, why a helium bill? A fundamental reason for the helium bill is, as I have said, that as a result of the increase in consumption, we are faced with the possibility of our supplies of helium being exhausted.

Where are the supplies of helium? Unfortunately, or perhaps fortunately, the known great supplies of helium lie mostly in the panhandle areas of Kansas, Oklahoma, Texas—I say to my colleague from New Mexico [Mr. CHAVEZ] I will get around to New Mexico in just a moment; I was just going around the circle—and New Mexico. There are no considerable supplies in Colorado, although on the western slopes there are two small possible supplies.

In the panhandle area the helium is mixed with natural gas. When I refer to the panhandle area, I refer to the great panhandle of southwestern Kansas, Oklahoma, Texas, northeastern New Mexico, and perhaps, although not developed yet, the very southeastern portion of Colorado.

So the great supply of helium which is available in this country has to be developed from this one area. There are other sources of helium available also. In Arizona there are some small supplies of helium which may be developed from noncombustible gases—in other words, not hydrocarbons which can be burned—but these as yet are small and insignificant as compared with the helium which can be developed in the great panhandle area for the future of the United States.

With the great increase in consumption of helium in this country, we are faced with problems. One of the problems is, what are we going to do with this bill? What we hope to do with this bill is one of two things: to expand the Helium Act of 1925 so it is workable in present-day concepts, and present-day needs; or give the Department of the Interior the power of condemnation to take this helium or to take the wells or to take the pipelines, if that becomes a necessity, in order that we can accomplish the preservation and conservation of helium. There is no justification for this bill except upon the basis that it is a vital resource which is being wasted.

Mr. SCHOEPPEL. Mr. President, will the Senator yield?

Mr. ALLOTT. I am very happy to yield to the Senator from Kansas.

Mr. SCHOEPPEL. I am interested in what the distinguished Senator from Colorado has said about the power of condemnation of wells, pipelines, and sources of supply. That power is to be envisioned only in the event the industry would fail to cooperate with a Government program; is it not?

Mr. ALLOTT. That is quite true. Under the proposed bill, if the President declares an emergency, we would go into a second phase where that is possible. Under the present helium law, the Secretary of the Interior already has the power to condemn. What we are trying to do is get away from the straitjacket of condemnation, where the Secretary can contract with private suppliers or individuals or firms to develop and build the plants themselves, rather than condemn and take the land as the sole method of producing helium.

Mr. SCHOEPPEL. With reference to the extraction of helium which the Federal Government, as has been pointed out by the distinguished Senator from Colorado, has shown a need for in the future, the residue gas, after the helium has been extracted, should certainly not remain in the control or ownership of the Government. I assume it would be envisoned that the residues would still be the property of the producer or pipeline and would go into the regular channels of trade or transportation as we know them to exist today. Is that correct?

Mr. ALLOTT. The Senator is correct, and he has raised a question on which I think we ought to develop the legislative history right now. We have no intention by this bill in any way to interfere with the regulation of natural gas by the Federal Power Commission or by any other agency which may have the power to regulate. The only purpose of this bill is to provide the means by which we can set a helium plant literally astride a gasoline to provide for the extraction of helium. It is my hope we can do this by private investment rather than by forcing the Secretary to condemn and build his own plant.

Mr. President, before we proceed, for the sake of the record perhaps we ought to make clear exactly how important this proposal is to the national welfare.

Further increases of helium production are anticipated in fantastic proportions. We are losing the helium which comes out of the great Panhandle area, because it goes through the pipelines to industrial concerns which use gas to heat homes and for many other uses. When the gas is burned, the helium is not burned. The helium simply goes up the chimney or the flue, and is lost to us forever. The helium content of such gas on the average does not exceed one-half of 1 percent by volume, so the amount of helium which would be taken out of the gas by volume would be a very insignificant portion.

If we continue the present rate of consumption our helium supply will be exhausted, it is estimated by the people in the Department of the Interior and

by other experts—I think they are all unanimous—by about 1980 to 1985. We should bear in mind the national emergency nature of the proposed legislation.

I know the question will arise, "How will the program be financed?" At the bottom of page 17 and on page 18 of the bill there is a provision that there must be an initial appropriation by Congress to start the program. I read beginning at line 22 on page 17: "except that the Secretary shall not make such contracts and agreements which shall require payments by the Government in any one fiscal year aggregating more than the amount which shall be established initially in an appropriation act and which may be increased from time to time in appropriation acts"—

That is the first limitation. Frankly, this is the sort of situation in which one cannot ask a private individual to invest a great deal of money in a plant and then ask him to subject himself to the vicissitudes and the uncertainties of appropriations year after year. Therefore, the bill provides for a borrowing authority by the Secretary of the Interior from the Treasury, with interest which is to be compounded annually.

It is estimated that in the first instance the money will be borrowed from the Treasury, but, after the money is borrowed, it will in turn be repaid from sales. Over a 25-year period the sales of helium will not only liquidate the amounts borrowed from the Treasury but will also liquidate the interest on the notes which the Secretary of the Interior will give to the Secretary of the Treasury.

Mr. LAUSCHE. Mr. President, will the Senator yield for a question?

Mr. ALLOTT. I am happy to yield to my friend from Ohio.

Mr. LAUSCHE. To whom will the sales be made?

Mr. ALLOTT. The sales will be made primarily to the Government.

Mr. LAUSCHE. The Government will be the principal user of helium?

Mr. ALLOTT. The Senator from Ohio was probably otherwise engaged when I went over this proposal. Today 90 percent of the helium is used directly in the NASA missile development and space programs, defense programs, in the atomic energy field, or by private industry working under Government contracts in these fields.

Mr. LAUSCHE. The statement which was made, that the executing officer would borrow the money from the Treasury and pay it back at compound interest, really would mean that the money would be borrowed from the Treasury to buy helium, let us say, and then the helium would be sold to Government departments.

Mr. ALLOTT. And to contractors.

Mr. LAUSCHE. And to contractors. What really will happen is that the Government will put up the money but will not truthfully receive the money back, because in the final analysis there will still be an expenditure by the taxpayers, though a necessary one.

Mr. ALLOTT. Perhaps from the Senator's point of view that is true. I would not argue.

Mr. LAUSCHE. It is a bookkeeping operation.

Mr. ALLOTT. No, it is far more than that.

The situation as it is today is that if the Department of Defense wishes to obtain so much helium, it must buy it. If the Atomic Energy Commission wishes so much helium, it must pay for it. We do not have Government control over helium, with the helium parceled out to departments as they wish to have it.

Mr. LAUSCHE. That is correct.

Mr. ALLOTT. Actually, this is a way of financing the purchases of helium by contractors and also by the various departments of Government, so that it is not all thrown into one pocket, where we let Susie, Mary, and Jane dip into it as they wish.

Mr. LAUSCHE. The point I wish to make—and if I am not correct, I am sure the Senator will correct me—is that the Government will not be making a profit, and then out of the profit paying off the debt.

Mr. ALLOTT. No, the Government will not make a profit.

Mr. LAUSCHE. The only profit——

Mr. ALLOTT. May I finish my thought for my friend?

Mr. LAUSCHE. Yes.

Mr. ALLOTT. The Government will have to sell the helium at a price which now has to be estimated, because they do not know what they shall contract for, in the neighborhood of $40 a thousand.

It is estimated that the $40 a thousand will make possible the amortization of the advances for the purchases of helium, which will be stored underground. It will make possible the amortization of that money and also the interest on that money over a 25-year period.

Does that answer the question of my friend?

Mr. LAUSCHE. It will amortize the money with money one branch of the Government will pay to another branch of the Government.

Mr. ALLOTT. To a certain extent that is true, but the departments would have to purchase the helium, anyway.

Mr. LAUSCHE. Therefore, an agency is being created which will have charge of the responsibilities of gathering helium, paying for it, and selling it to other branches of Government—selling a part of it, probably to private industry, amounting to some 10 percent.

Mr. ALLOTT. I do not think that is, in the strict context, an exact statement, I will say to my friend. Actually, the Federal Government is not creating any new agency. The Department of the Interior, under the act of 1925, as amended, presently has the power of condemnation. The situation is that we will simply be permitting the Secretary a flexibility in the acquisition, the storage, and the preservation of helium which he does not now have. We will not be creating any new department or any new commission.

Mr. LAUSCHE. I am not challenging the statements made by the Senator from Colorado that this may be an indispensable progam, having in mind the importance of helium to our Federal Government operations.

Mr. ALLOTT. I am sure the Senator did not have that question in his mind, and my only purpose in answering him is to try to clear up any questions that he may have in his own mind.

Mr. SCHOEPPEL. Mr. President, will the Senator yield?

Mr. ALLOTT. I will be happy to yield.

Mr. SCHOEPPEL. For the legislative history, it can be pointed out that the storage facilities for the helium would be installations already owned completely and totally by the Government of the United States; is that not correct?

Mr. ALLOTT. The Senator is correct, so far as the present situation is concerned. Conceivably 20 or 25 years or some time in the future the Government may have to acquire or make ready additional storage. But as of now the statement of the Senator from Kansas is certainly true with respect to the foreseeable future.

In further explanation of the question of my friend, the distinguished Senator from Kansas, the helium is proposed to be stored in underground storage in gas fields which have been exhausted, and so the space is available for it.

My colleague from Colorado is on the floor, and I understand he has cleared this point. In concluding, I wish to point out that on page 29, line 20 of the bill, there is a typographical error. The word should be "The," and not "Thea," as it is shown. I ask unanimous consent that that correction may be made.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLOTT. Also for the benefit of those who may study this subject later and who might possibly be misled, there are numerous errors in the bill as it is printed in the report, and no one should ever rely upon the bill as it appears there, but rather upon the bill as it is now on the desks of Senators. This is the bill that was reported. There were errors in the copying of the bill, and I note the error at this time for the benefit of anyone who may wish to study the subject later.

Mr. LAUSCHE. Mr. President, will the Senator yield further to enable me to get additional information?

Mr. ALLOTT. I yield.

Mr. LAUSCHE. In the event the Government is required to construct the plant that will extract the helium, what does the Senator from Colorado think will be the estimated expenditure?

Mr. ALLOTT. I have no way of giving the Senator that information except that according to all the information given to the committee, and numerous conversations with the Secretary of the Interior, and particularly with the Assistant Secretary, Mr. Royce A. Hardy, it would be much higher than if the Secretary is able to contract for the facilities with private individuals or firms.

Mr. LAUSCHE. Did the Department not submit an estimate of what it would cost to build the proposed plant?

Mr. ALLOTT. No, not before the Senate committee. I am not sure whether it did before the House committee or not. There is no question but that the cost would be much greater.

I hope the Secretary will never have to exercise the power of condemnation, because to do so would raise a myriad of problems that might actually interfere with the conservation program as such.

Mr. LAUSCHE. The bill contemplates then 1 of 2 courses: One, to buy the helium from private producers and to store it; two, if that arrangement is not made, for the Government to build its own plant and condemn the necessary facilities to carry that plant into operation.

Mr. ALLOTT. The Senator is correct, and it is hoped that the Government will be able to contract with private firms to produce it.

Mr. LAUSCHE. I direct the Senator's attention to page 4 of the report, the last paragraph at the bottom:

> The legislation authorizes borrowing from the Treasury, in amounts authorized in regular appropriation acts, over a period of 25 years. The Department plans to borrow up to $255 million.

I will stop at that point. What would the $255 million be used for?

Mr. ALLOTT. That amount would be used for the purchase of the helium, its transportation, storage, and conservation.

Mr. LAUSCHE. That is the amount of money it is contemplated would be expended in 25 years?

Mr. ALLOTT. That is correct. That is the scope of the program.

Mr. LAUSCHE. The report states further:

> Repayments to the Treasury from the helium production fund as set up in the bill in the succeeding years would amount to $500 million, fully assuring return of the amounts borrowed and interest thereon.

How would the $500 million be accumulated?

Mr. ALLOTT. Let me return to the first fundamental. The Government hopes to be able to contract this helium at somewhere around $10, perhaps a little less, maybe a little more. Then the Government would sell it and, as I stated previously, the anticipated selling price would be somewhere around $40 a thousand, in order that the amount which the Government would advance, together with the interest upon the amount, could be liquidated. That is where the $500 million would come from.

Mr. LAUSCHE. However, the Senator has stated that 90 percent of the helium would be used by some Government agency.

Mr. ALLOTT. Seventy percent would be used by a governmental agency; 20 percent by firms who are contracting with the Government in one of these fields.

Mr. LAUSCHE. Then the profit would be made on the 20 percent; or does the Senator feel that the 70 percent, for which the Government would pay 100 percent more than it originally paid to buy it, would be a profit?

Mr. ALLOTT. It would be sold to private individuals and the Government at the same price. No profit is involved.

Mr. LAUSCHE. There would be no profit, then, so far as the Government's use of it is concerned?

Mr. ALLOTT. There would be no profit, period.

Mr. LAUSCHE. I still do not understand how $500 million would be obtained from the $255 million. Where would the $245 million come from?

Mr. ALLOTT. The $245 million would come from the interest which must be paid upon this amount, and the other costs incident to the administration, including the storage of the helium.

Mr. LAUSCHE. One final question. Except for the helium that would be sold to private industry, as far as the Government is concerned, it would be a bookkeeping operation because as buyer, we would be using taxpayers' money to buy the helium, and then in selling, we would be selling to a Government agency, which would be using the taxpayers' money to pay the price.

Mr. ALLOTT. If the Senator should take that view, the answer would have to be yes; but it is no more of a changing of pockets or a bookkeeping transaction than it is at the present time.

Mr. LAUSCHE. That still does not negate what I have said.

Mr. ALLOTT. The Senator simply cannot say that this is the whole Government, and then permit everyone to dip into it. The Defense Department, for example, has to pay for and buy its share of the helium it uses. NASA has to pay for and buy its share of the helium it uses.

The Atomic Energy Commission must do this. The various organizations throughout the country which have defense contracts of one kind or other with the Government would have to buy their share of helium. I really cannot see any other way, to be honest with my friend, that this operation could be handled.

Mr. LAUSCHE. I am not disputing that. When the Defense Department buys it, it uses taxpayers' money.

Mr. ALLOTT. That is right.

Mr. LAUSCHE. NASA also.

Mr. ALLOTT. Yes. Everything that is purchased by the Government ultimately is paid for by the Government with taxpayers' money. In that respect the Senator is right.

Mr. LAUSCHE. I thank the Senator.

Mr. SMATHERS obtained the floor.

Mr. SMATHERS. Mr. President, I am glad to yield to the Senator from New Mexico, chairman of the Military Appropriations Subcommittee, with the proviso that I do not lose the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAVEZ. I thank the Senator from Florida for his graciousness. I would not impose upon his good nature and his patience, or his time, if it were not that I felt that a report should be made to the Senators who are so patient as to be here and, better still, to the American people, on our national security posture.

OUR NATIONAL SECURITY

Mr. CHAVEZ. Mr. President, I have listened to and read with great interest the various speeches on defense that have been made in this Chamber since the Congress reconvened on the 8th of August. Certainly, there is no subject more worthy of the attention of this body or more important to the welfare and security of the American people than the defense of our country.

It is the solemn duty of each of us to provide our people with a full understanding of the measures taken by their Government to assure the defense of this Nation. It is particularly incumbent upon me, as chairman of the Defense Department Subcommittee of the Senate Appropriations Committee for the past 6 years, to speak out frankly to the American people, to reassure them where reassurance is in order, to warn them where danger is evident, and to offer constructive criticism wherever needed.

First, it is essential that the American people have a proper appreciation of the nature of the threat to our national security. I believe most Americans understand that the ultimate objective of the Communists is to communize the entire world. To accomplish this objective, they rely not only on military power but also on political, economic, propaganda, and subversive means. Nor do they have any particular timetable in achieving their objective. They believe history is working for them. They are not in a hurry, because they believe in the inevitability of communism. Their scientific politics, they believe, will win in the end.

Therefore, our total national security policy must provide not only for meeting the military but also the economic, political, propaganda and subversive aspects of the Communist threat. And above all the American people should clearly understand that the threat we face is not one which is likely to recede at any time soon. Already we have lived with it for more than four decades and we may well have to live with it for another four decades.

LONG-RANGE DEFENSE OBJECTIVE

Defense, therefore, is not a matter for a particular year. Each annual defense budget is simply another increment of a continuous long-range defense program. Although each individual year's budget is important, the longer range objectives must always be borne carefully in mind.

This has been the approach of the Defense Subcommittee of the Senate Committee on Appropriations. We realize that an adequate overall defense can be provided in many different ways by many different combinations of specific programs. We have listened to the defense experts long enough to realize that there is a wide range of opinion even within the Defense Department as to what constitutes the optimum combination of programs for our defense. We have debated the defense problem with our colleagues in the Senate and in the House for long enough to know that even within the Congress there is a wide range of opinion as to what constitutes a properly balanced defense effort.

We have learned to respect these differences in viewpoint. We honor the spirit and dedication of the men who directly bear the responsibility for the Nation's defenses—Secretary of Defense Gates and his Deputy, Mr. Douglas, Secretary of the Army Brucker, Secretary of the Navy Franke, and Secretary

of the Air Force Sharp, General Lemnitzer, Admiral Burke, General White, and General Shoup. These are men who spend every working hour on the problem of the Nation's defense. The Nation is fortunate indeed to have at the head of the Defense Establishment men of their experience and knowledge of military affairs.

We honor no less the vision, understanding, and knowledge of our colleagues in the House even though each year we differ with them on some of the details of the defense program. Chairman Mahon of the Defense Subcommittee of the House Appropriations Committee and his colleagues are men of the highest integrity, patriotism, and competence. They draw on many years of firsthand experience with the defense program, and their views are entitled to and receive the most careful consideration, not only in the Congress but also in the executive branch of the Government and the Nation at large.

Yet we do have differences with our colleagues in the House and with the executive branch and, for that matter, among the members of our subcommittee. But both in the House and in the Senate partisanship stops at the door of the Defense Appropriations Subcommittees. Our foremost concern is an adequate defense for the Nation. Although we do not agree in every detail, we respect each other's viewpoint and strive together to provide such a defense in the best way we know how.

Through the years we have tried to determine exactly what is needed and have been careful to provide those who bear the direct responsibility for the execution of the defense program with all the funds that are necessary.

Much has been said in the past year or two about the adequacy of our defense budget. That differences of opinion are brought to light and debated is sound policy, good for America. Only in that way may we be assured that consideration has been given to the best thinking that the country can provide.

Personally, I am of the opinion that the 1961 appropriation as passed by Congress is generally adequate to meet the defense needs of this hour. There are areas in which each of us, I am sure, would make changes. But viewed from the broad interests of all three services, from the statements of military experts, from the conclusions of our own members, I have confidence that the law which you so recently passed upon fulfills the needs of our military plans at the present time.

CHANGES IN REQUEST

At this point I should like to mention how I personally feel about changes in the budget which the Defense Department requests subsequent to submission to Congress.

We want Defense officials to feel free to come to us anytime the situation changes, anytime there are new requirements, anytime additional funds are needed for national defense. We are aware that the situation is changing rapidly and that the entire defense program must be kept under continuous review. We do not wish to discourage changes in the program where they are warranted and where our defense posture can be improved thereby. We do not want the Defense officials to feel that every time they make such a change they are admitting to error. It is in the interest of the Nation's defense to make such changes promptly wherever they are required. We are always ready to assist the Department in making such changes wherever the help of the Congress or the committee is needed and we hope that we can continue this arrangement in the future.

The President has already indicated that a modest amount of additional funds for military personnel and operation and maintenance may be required for the new readiness measures recently undertaken by the Department of Defense. When a final determination is made by the executive branch as to how much is needed and for what purposes, I am sure that the Senate Appropriations Committee will give the additional request a most sympathetic hearing.

ADEQUACY OF DEFENSE PROGRAM

With respect to our retaliatory forces, I feel our present position is good. My concern is with our position in the future. We have, in the last year or so, entered a new era in military technology—the era of the intercontinental ballistic missile. This terrible weapon, armed with a nuclear warhead of tremendous destructiveness, can travel at speeds of 16,000 to 18,000 miles an hour. Because of its speed and destructiveness, it is a weapon which lends itself particularly well to surprise attack. The question that confronts the Nation is how best to insure our continued retaliatory capability at a time when the Soviet Union may well have a large number of such weapons.

It is an entirely new problem to us and, for that matter, to the rest of the world. Nobody can say with certainty what is the best way to deal with this threat. One thing is clear: Mere numbers of retaliatory weapons will not solve this problem. The tremendous speed and destructiveness of the ICBM and the fact that as yet we have no system of defense against it places a very high premium on the invulnerability of our retaliatory forces.

ICBM CAPABILITIES

That is why the Senate Appropriations Committee strongly supported the increase of about $382 million in the Polaris program. Here is a retaliatory system uniquely fitted to the ballistic missile age. The Polaris incorporates into a single weapon most of the great scientific developments which have so revolutionized warfare—the nuclear warhead, the ballistic missile, nuclear propulsion, inertial guidance for navigation, as well as the latest development in hull design and ship control. With their unique ability to operate deep below the surface of the oceans for long periods of time, they are virtually immune to surprise attack.

Less than 2 weeks ago, at Groton, Conn., in company of Admiral Raborn, of Polaris fame and history, I visited the *Ethan Allan*, one of our Polaris submarines. It is a remarkable ship, about whose capabilities we are entitled to brag.

Because they can operate in the oceans of the world comprising seven-tenths of the earth's surface, these submarines can make the maximum use of the principle of dispersion.

In other words, they are not sitting ducks.

But the Nation cannot rely on just one retaliatory weapon system. The committee has fully supported the mixed force concept. Each weapon system has its own strengths and weaknesses, both with respect to its vulnerability and its effectiveness. Therefore, a variety of different systems complicates the enemy's problem both in attacking our forces and defending against them. Here is a classic case where the whole is stronger than the sum of its parts.

Recognizing this, Congress has approved in the past session increased funds above the budget requests not only for Polaris, but also for Atlas and Minuteman. Release of these funds by the Department indicates the wisdom of supplying these increases.

The committee has also fully supported the efforts of the Department of Defense to improve the survivability of our strategic missile forces. We have provided all the funds requested for hardening the Atlas and Titan teams. We have provided the funds required to develop a storable fuel for the later Titan missiles. This would permit them to be launched very quickly from their underground resting places without the necessity of raising them to the surface before they are fired.

With regard to the Minuteman, the committee has fully supported both the hardening concept and the mobility concept. Some of the Minuteman missiles will be emplaced in hardened underground sites and others will be embarked on trains which will be constantly on the move. Because the Minuteman is solid fueled, it inherently has a very quick reaction time.

MANNED BOMBER SYSTEM

In this session of Congress, the manned bomber force was not neglected either. While the 1961 appropriations provide almost $4 billion for the four ballistic missile systems, over $2 billion is provided for the manned bomber systems. Funds have been appropriated for the procurement of additional B–52's and B–58's and their accompanying tankers; for the procurement of the Hound Dog air-to-ground missile and the Quail decoy missile; for the development of the B–70, a new supersonic long-range jet bomber, and the Skybolt, a new air-to-ground ballistic-type missile with a range and speed considerably greater than the Hound Dog.

The committee felt so strongly in favor of the mixed-force concept that it added $285 million for the B–70 program. This sum was reduced to $190 million in conference with the House. But language was added to the conference report to make it clear that the $100 million provided for additional fighter aircraft, if not required for that purpose,

"shall be made available only for the B–70 aircraft program." These sums are in addition to the $75 million requested by the President for the B–70 program.

The Secretary of Defense has decided that $100 million of these additional funds would, in fact, be applied to the B–70 program during the current fiscal year. By so doing we indicated that we cannot afford to place complete reliance on even such promising ballistic missiles as the Atlas, Titan, Polaris, and Minuteman. What the future may bring as to the proper mix of ICBM and manned bomber forces is still unknown. This is a problem which both Congress and the Department of Defense must follow closely from year to year. At the present time it certainly would not be wise to place complete dependence on either system to the exclusion of the other.

AIRBORNE ALERT CAPABILITY

The Defense Subcommittee of the Senate Appropriations Committee also fully supports the Department's efforts to enhance the survivability of the retaliatory forces. The dispersal of the heavy bomber force has already been substantially accomplished, and we are glad to learn that action is now being taken to increase the dispersal of the medium bomber force. One-third of all the manned bombers and their accompanying tankers are being maintained on a 15-minute ground alert.

This is necessary and desirable, but it may not be enough in the light of the growing ballistic missile threat. Accordingly, the committee strongly supported the concept of an airborne alert capability for the heavy bomber forces. Last year we introduced into the bill, what is now section 512b. This section authorizes the Secretary of Defense, upon determination by the President that such action is necessary, "to provide for the cost of an airborne alert as an excepted expense." In other words, the Defense Department is authorized to spend whatever moneys are necessary for an airborne alert, regardless of the amount appropriated. This is the broadest kind of authority the Congress could provide.

However, as a further inducement for the Defense Department to move forward with this program, the Senate conferees supported the House action to add another $85 million for this program.

Obviously, the speed and destructiveness of the ICBM places a high premium on warning. Funds have already been provided for the construction of a ballistic missile early warning system. Construction of this system is well along. The first station is expected to become operational this year, and the other two stations will follow soon after.

Recognizing the value of the early warning system, the Congress in the present session added substantial amounts to those requested in the budget for the rapid completion of the system.

WARNING SYSTEMS INCREASED

The ballistic missile early warning system will provide about 15 minutes of warning. This is a bare minimum, and obviously any device which would increase the warning time would be of tremendous value to our retaliatory capability. The committee has therefore strongly supported the Air Force Midas and Samos satellite programs, both of which are designed to provide early warning. We supported the Defense Department's request for an increase in the Midas program and at the same time added $83.8 million to the original budget request for the Samos program. The Midas is specifically designed to provide warning of ballistic missile attack by detecting the launching of the missile at an early state in its trajectory. The Samos is designed to provide a more general type of warning of preparations for an attack.

Additional funds were also added by the Congress for the Discoverer program.

NIKE-ZEUS SYSTEM

The committee has followed with great interest the development of the Nike-Zeus program, which is designed to provide an active defense against ballistic missile attack. It is clear, from everything we have heard from the experts in this field, that the Nike-Zeus involves technical problems of the highest order of difficulty. We have provided all the funds the Defense Department feels it can properly utilize to develop this system and test its feasibility. We shall watch very closely the progress of these tests, so that we may be in a position, next year, to determine for ourselves the desirability of advancing this system into production and deployment.

PREPAREDNESS FOR LIMITED WAR

While the new ICBM threat is rightfully accorded an important place in our defense preparations, we dare not neglect the older forms of the threat to our security. Limited wars are still a very real possibility. We shall continue to need a modernly equipped and mobile Army and Marine Corps, suitably deployed so that they can move promptly to meet the threat of local aggression. We shall continue to need a global Navy and a readily deployable tactical air force capable of promptly supporting our ground forces anywhere in the world.

We recognize that the United States cannot carry this burden alone, and that our safety rests in a system of collective security for the entire free world. But we do think that the U.S. contribution to these collective security forces must be modern, mobile, and properly equipped. The committee has, therefore, strongly supported, not only this year, but in years past, as well, the modernization of our limited war forces. We added to the President's January budget a total of about $250 million for modernization. This was later reduced in conference with the House to about $160 million. It is our hope that all of these additional funds for the modernization of Army weapons and equipment will be used during the current fiscal year.

We have also supported an increase in airlift of approximately $200 million, which was added for this purpose to the President's January budget. These funds, we are informed by the Secretary of Defense, will be fully utilized.

Perhaps one of the important actions we have taken on the fiscal year 1961 Defense budget is the approval of the conventionally powered carrier—the 8th of the *Forrestal* class. We feel the carrier task forces are a most important element of our limited-war capability, as well as general war capability. They permit the United States to bring to bear a military presence in areas of the world where no other military forces can be deployed without involving very difficult international problems. With many parts of the world in a state of political upheaval, this type of military capability may grow to be extremely important to the security position of the United States.

Recognizing the threat implied by large-scale construction of enemy submarines, the Congress added over $100 million to the substantial amounts contained in the budget for antisubmarine warfare. It is hoped the Department will be given the authority to commence construction immediately of the full program as approved by the Congress.

After all, all we can do is make the funds available. If the funds are used, the Department of Defense must use them for the purpose we intend. However, we cannot force the Department to do so.

MAINTENANCE OF STRENGTH OF RESERVE FORCES

It is often overlooked that a very important part of our defense capability rests with our Reserve Forces. The Congress has always strongly supported the maintenance of properly trained, properly equipped, and combat-ready Reserve Forces. We are greatly encouraged by the very real progress that has been achieved by our Federal Reserve components in the last few years. Now that they have been relieved of the task of basic training, these forces are able to concentrate on unit training, and have reached the highest level of readiness and combat capability in our history. This evaluation has been attested to by all the officials concerned with Reserve Force matters who have appeared before our committee.

Past wars, of which the Korean conflict is the most recent example, have demonstrated the need for a powerful, ready to act, Reserve Force. I have indicated repeatedly in the past by sponsoring and supporting amendments, that I do not believe that our Regular Army should be reduced to its present size. These efforts have not been successful. Accordingly, I believe that it would be a great mistake to make marked reductions in both the size of the Regular Forces and the Reserve Forces. Therefore, as in the past several years, the committee has strongly supported the maintenance of the Army Reserve and National Guard at their present strengths—300,000 and 400,000 men respectively. We were pleased to learn that the Department of Defense has agreed to support these forces at the levels desired by the Congress.

SUMMARY OF CONGRESSIONAL INCREASES AND PLANNED UTILIZATION

In all, the Congress appropriated during this present session a total of $39,996,608,000 in the Defense Department Appropriation Act, which excludes military construction.

Do Senators realize how much money that is? For that department, for 1

year, it is more than $11 billion more than the cost of the rest of the Government. That is what it costs the American people for security.

This is about $661 million over the budget, after increases and decreases are balanced out. It is about $518 million under what the Senate would have provided, but it is $658 million over the House figure. Disregarding certain reductions made by the Congress, including those recommended by the Department of Defense, the Congress added about $1,815 million to the original request. In the Secretary of Defense's letter to me of August 9 he has indicated that about $1,371 million of this increase will be utilized this year, leaving a little over $440 million unprogramed.

Major unprogramed items include, in round numbers, $93 million for Army modernization; $70 million for Polaris; $63 million for antisubmarine warfare; $97 million for additional fighter aircraft for air defense; $84 million for B–70 procurement; and $34 million for Samos. As I have already indicated, despite his decision, I hope that these funds will be utilized this year unless there are military reasons for deciding otherwise.

We are open to reason; but we want to make this money available for the purposes for which it was intended.

FLEXIBILITY NEEDED

Mr. President, the people of this country want to be sure that our Military Establishment is provided with all the resources it needs to assure the Nation's defense. I believe the Congress in this session has to the greatest practical degree met this responsibility. But the American people should realize that many of the problems we face in the world today cannot be solved by military means and cannot be solved by simply increasing military expenditures. On the other hand, as I stated at the outset, the threat we face is many sided. It is political, subversive, economic, and psychological, as well as military. The Nation must marshal its resources and meet the threat on all fronts. Patience and diplomacy and faith and confidence in our way of life must be called forth in even greater measure and degree than heretofore if we are to deal successfully with the vexing international problems which so sorely try the patience of our people.

Therefore, it would be wise in the months ahead for the Department of Defense to scrutinize with the utmost care a variety of areas for possible increased emphasis. Some of these areas I wish to mention at this time.

I believe that consideration should be given to a more rapid Army modernization program, with particular emphasis on an up-to-date tank program and a modern communications system. In other words we should, "Step on it." We should not use a .22 if we can use a .45.

I believe that the size of our current Army and Marine Corps should be reviewed, and in doing this careful weight should be given as to their adequacy to accomplish all possible missions and objectives in both limited and general warfare.

We know we can always depend on the Marines and the Army when we have a need for them.

For possible budgetary consideration in the next year, I believe that the possibility should be explored of increasing the Polaris system to the fullest degree practical and with efficient shipbuilding. We should consider accelerating it. It is a fine weapon. It is one of the best deterrents we shall have against war, and we ought to accelerate the program as much as we can. The Navy's fleet modernization and rehabilitation program should be reexamined for possible augmentation so as to avoid the dangerous obsolescence even now threatening our fleet.

It would be surprising to many Senators if they knew how many of our so-called warships are obsolete and in mothballs.

I believe that continued emphasis, as indicated by congressional add-ons, should be applied to the anti-submarine-warfare program and that possible increases in the Navy fighter program should be considered.

Recently I had the opportunity to witness in Puerto Rico the remarkable achievement of Air Force and Army cooperation in airlifting fighting troops and equipment great distances.

In these days we cannot delay troop transportation. Decisions are effected overnight.

I believe careful consideration should be given to the possible future importance of massive airlift operations and their role in maintaining the stability and peace of the world of tomorrow. Certainly the situation in Africa has demonstrated that our airlift capability must not be limited and must be at a high state of readiness to function within an hour's notice.

I believe that we should consider not only the importance of our ICBM program, but that of the manned bomber fleet—the latter with the latest and most advanced concepts our technical geniuses can supply. The additional funds provided by the Congress will provide an answer as to the feasibility of the B–70 bomber concept and its role in future warfare. Certainly it should not be retarded by financial considerations.

Nor must the space vehicle and satellite programs already in being be allowed to wither on the vine for lack of financial nourishment. The seemingly fantastic space dreams of yesterday have already become the realities of today.

In the hands of international aggressors they might well become the nightmares of the future. We must not allow this to take place.

In summary, I believe that rapid technical changes and political and military adjustments abroad, among other considerations, all necessitate a flexible position, a willingness to change our thinking should it be deemed advisable.

Should such a careful reevaluation of these and other areas of possible strengthening reveal just one important need for implementation, then the entire review will have been more than worthwhile.

Certainly, America today is militarily able—and I say this in all sincerity—to defend itself and protect the free world in nuclear combat. We must keep it so in the future. In so doing we shall not be swayed, I trust, by financial or partisan considerations. In my opinion, there has never been one bit of partisanship when it comes to the question of appropriating money for the national defense.

The chairman of the subcommittee gets as much help from one side of the aisle as he gets from the other.

Nor shall we be misguided by aggressor nations which use pretenses of friendship or loud boasts of superiority. Instead, we must continue to build our military machine into such a power that brooks no doubt in the minds of our friends or foes alike that our might, should it ever be released, will be overwhelming. Only in this way may we continue to maintain a free world. Only in this way may we be able at some day in the future to sit down and hammer out a just peace for the future of mankind.

Mr. LAUSCHE. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. TALMADGE in the chair). Does the Senator from New Mexico yield to the Senator from Ohio?

Mr. CHAVEZ. I yield.

Mr. LAUSCHE. I commend the Senator from New Mexico for his very excellent presentation. The Senator has had much experience in regard to this subject. His advice is well worth listening to. I was especially pleased to understand he had decided to make the presentation today.

I think the Senator has made a statement in this regard, but what is the Senator's appraisal of our position militarily, as to our ability to defend our country and to defend the free world at this moment?

Mr. CHAVEZ. I answer that in the best of faith and conscience. I believe we are ready for anything. The reason I said we should have flexibility is that, although we do not have to worry about today, we do not know what we may face tomorrow.

Mr. LAUSCHE. Yes. I am quite certain many other Senators, as I do, constantly receive mail complaining about waste, malfeasance and misfeasance in the handling of supplies, the acquisition and disposal of supplies. May I ask whether the committee in its hearings has gone into that subject at all?

Mr. CHAVEZ. We have gone into that in the committee. We have studied waste and malpractices in the purchasing of materials. I ask the Senator to imagine the tremendous extent of procurement in the Department of Defense alone.

Mr. LAUSCHE. Yes.

Mr. CHAVEZ. The Department is trying to eliminate waste and malfeasance.

The Senator knows that I am a Member on this side of the aisle. I have been assured—and I am positive—that Secretary Gates, the other Secretaries, and even those in the high military echelons are most anxious to stop waste. Some waste is bound to occur in an operation of this size. When one is spending $40 billion, some mistakes are bound to happen.

Mr. LAUSCHE. I thank the Senator.

Mr. MONRONEY. Mr. President, will the Senator from New Mexico yield?

Mr. CHAVEZ. I yield.

Mr. MONRONEY. I congratulate the senior Senator from New Mexico, the chairman of the subcommittee of the Appropriations Committee which deals with the armed services, for the depth and the wisdom of the statement he has made. I particularly praise the Senator and the committee for the announcement that they will continue in an even more vigorous way the modernization of our conventional forces. This will include, of course, the modernization of our airlift.

There is a need for mobility, to answer the threat of attack around the world. We must have the most modern equipment obtainable for the Army and our ground forces, I think, to give us security for the smaller wars, which most military authorities say constitute about 80 percent of the likelihood of the threat of military action.

I congratulate the Senator for his foresight, his wisdom, and the strong leadership he has taken to give us the best possible defense.

Mr. CHAVEZ. I thought it was only fitting and proper, I will say to my friend from Oklahoma, that the American people should be assured the Congress is alert as to our needs for an adequate national security.

These remarks are not made because I like to stand on the floor and talk. I think this is a necessary report to the American people, which will assure them we are ready for any contingency. We cannot relax because, though we are ready now, we do not know what we will face tomorrow. That is why I ask for flexibility. If the military leaders in the Pentagon wish to change their minds, we will go along with them, if we can.

Mr. MONRONEY. I congratulate the senior Senator from New Mexico.

Mr. STENNIS. Mr. President, will the Senator yield?

Mr. CHAVEZ. I yield.

Mr. STENNIS. Mr. President, I commend the Senator from New Mexico not only for the fine presentation of his subject matter but also for about 3 years' work in 1 year, which he has done this year, on the appropriation bill and the military program as a whole.

Mr. CHAVEZ. I thank my friend. I felt the American people should be advised that we are ready at the moment. I do not know what the situation will be tomorrow.

Mr. SMATHERS. The Senator is absolutely correct. I am delighted to have the Senator express his views. I join in congratulating the Senator from New Mexico for his labors in behalf of this Nation's defense and particularly for the very splendid statement he has made this afternoon.

THREATENED PENNSYLVANIA RAILROAD STRIKE

Mr. SMATHERS. Mr. President, I think we are agreed that the forced shutting down of the Pennsylvania Railroad, the largest railroad in the country, must not be allowed to happen.

The resources of the Railway Labor Act to protect the public and the Nation generally have been exhausted.

It seems to me that, in the public interest, both sides should be required to appear again before a neutral tribunal and be required to accept its decisions as final and binding. Too much of the public's interest is at stake to allow anything else.

I add that although the railroad comes only as far south as Washington, D.C., it is very important to Florida and to the southeast as a pathway to and from us on to New York and New England. It is important to us both for travel and freight. A lot of Florida's citrus fruits and other perishables, for instance, fan out into northern markets over the railroad involved.

Vital as these immediate public interests are, I suggest that the whole future of railroad service in this country may be at stake here. The purpose of the Transportation Act of 1958, for which most Senators voted, was to get the railroad industry a fighting chance to regain its strength as a servant of the people, the economy, and of the national defense.

The public and the national interest and safety must come first. An emergency of this serious nature would undoubtedly cause many Members of Congress to urge consideration and adoption of compulsory arbitration binding on both labor and management for situations like this, where the country simply must come first.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. SMATHERS. I am happy to yield briefly to my good friend from New York.

Mr. JAVITS. I wish to join the Senator in what he has said. Looking at the problem from the point of view of organized labor, to which I have always been very favorable in this body and in the other body, I would say this is a time when self-discipline and statesmanship are needed equally by labor and management. I endorse what the Senator says. Although he and I might conceivably vote in a different manner on a labor reform bill, I certainly join the Senator in saying that this is the kind of thing which invites drastic legislation. If it can possibly be avoided, this should be an additional reason for avoiding it, as well as the overriding national interest.

I thank my friend.

Mr. SMATHERS. I greatly thank the able Senator from New York for those most statesmanlike assertions.

TRUE DEMOCRACY

Mr. MONRONEY. Mr. President, in the Outlook section of the Washington Post and Times Herald of Sunday, August 14, 1960, there appeared an item about the autobiography of the Honorable D. S. SAUND, entitled "Congressman from India." In the item appeared a quotation from the book concerning my esteemed colleague, the Honorable CARL ALBERT, of Oklahoma, and his guidance as Democratic whip of the House to Judge SAUND as a new Congressman.

Inasmuch as this quotation is revealing as to both the character of my good friend CARL ALBERT and as to the spirit of our legislative body, I request unanimous consent to have it printed in the RECORD at this point.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

TRUE DEMOCRACY

Sixty-year-old D. S. SAUND, first Democrat ever elected to the House from his 29th California District, and the first person of Asian extraction ever elected to Congress, has just scored another first.

He's written an autobiography, "Congressman From India," published by Dutton, which provides more helpful information on what every enterprising freshman Congressman should know than about the fascinating story of his life.

Born in the small Indian village of Amritsar, SAUND graduated from the University of Panjab and came to the United States in 1920. How he subsequently was elected judge of the justice court of California's Westmoreland County, won his fight for citizenship and first was elected to Congress 4 years ago, sounds in the telling far easier than it was.

But a must for all new Congressmen are two chapters in this book—"Freshman Congressman" and "Battles on Capitol Hill." Whether from good advice or better judgment, SAUND learned quickly to do all of the right things.

In the process, his eyes were opened even wider on the democratic process.

Seems those herd-riding House leaders, of fact and fiction, never once told Saund how to vote on a bill, not even when the lines were close.

Said SAUND: "I recall many times asking the Democratic whip of the House (Representative CARL ALBERT, of Oklahoma, his opinion of how I should vote. Invariably his answer would be: 'Judge, vote your district.' What he meant was to vote the way the people in my district would want me to. He has told me several times: 'What we are most interested in is getting you reelected. Use your own judgment and follow your own convictions.' "

OCDM WASTES FUNDS ON PARTISAN PROPAGANDA

Mr. YOUNG of Ohio. Mr. President, an incident has just been reported to me which offers shocking and disgusting proof of the complete irresponsibility in the Office of Civil and Defense Mobilization.

This wasteful and boondoggling agency has not been content with silly schemes that have wasted billions of taxpayers' dollars, and with outmoded concepts which have failed to provide American people with real security in event of enemy attack. Now this bureaucratic monstrosity has extended its tentacles into the political life of the Nation.

An information bulletin dated July 29, 1960, issued by the Office of Civil and Defense Mobilization at Battle Creek, Mich., featured a reprint of an article which appeared on the front page of the Chicago Tribune of July 19. This bulletin was published at Government expense and distributed by civil defense organizations. It is not only a shocking waste of taxpayers' money, but a revolting example of the misuse of governmental responsibility.

The article from the Chicago Tribune entitled, "Inquiring Camera Girl," was one of those feature stories which newspapers commonly carry asking questions of the average American on the street.

The question in this instance was "If it were your choice to make, would you rather acquire a swimming pool for your family or a bomb shelter?" One of the answers which was reproduced in the Civil Defense Information Bulletin was from an 18-year-old boy, a student, who said:

I'd rather have a bomb shelter. There's a probability that the Democrats are going to get in in November. With their appeasement policies I think we are going to need bomb shelters. Their record has been war. Chicago would be a prime target.

I have no argument with the Chicago Tribune. What it wishes to print is its own business. However, it is inexcusable that any Government agency would reprint, at taxpayers' expense, political propaganda of this sort. Of course, it is not surprising that the boondoggling officials of the Office of Civil and Defense Mobilization would cite the opinion of an 18-year-old boy as authority for their ridiculous activities.

I again pay tribute to the thousands of civil defense voluntary workers who have given their services in time of natural disasters and other emergencies. They did not do so as Democrats, Republicans, or independents. It is unfortunate that the Office of Civil and Defense Mobilization, which, after all, is directly assigned to the Executive Office of the President, had to exploit the efforts of these patriotic men and women with such cheap political propaganda.

I will not take the time to comment on the validity of this evidently misguided 18-year-old's statement.

That is not the point.

The point is that once again our boondoggling civil defense agency has proved its ineptness and incapability of handling civil defense needs of the American people.

The Administrator of the Office of Civil and Defense Mobilization, Leo Hoegh, ex-Governor of Iowa, would do better to devote his time and that of his staff to the real needs of the American people than to meddling in the political affairs of the Nation.

The voters of Iowa gave him his chance once and defeated him on his second try for the governorship of that great State. One would think that he has learned to keep out of politics and be satisfied with his $22,500 a year sinecure at taxpayers expense.

This is just one more in a long series of hapless errors by the outmoded agency. It is my belief that it is worthy of immediate investigation by the proper committee of the Senate.

CONFERENCE OF THE ORGANIZATION OF AMERICAN STATES

Mr. SMATHERS. Mr. President, the past 2 years have brought the culmination in futility of this administration's foreign policy with respect to Latin America. As an American, I am afraid that I can take no pleasure nor satisfaction in the so-called diplomatic victory scored at the recent Conference of the Organization of American States at San José, Costa Rica.

I fear we have drifted into collaborating in the creation of a very dangerous political vacuum in the Caribbean for the sake of an inadequate and weak-kneed reproof to the Soviet-backed dictatorship of Fidel Castro in Cuba.

I fear that we have fallen into the trap of accepting words as the equivalent of substantive action when, as a matter of fact, the actions taken against the Dominican Republic may be enough to bring that Government down without consideration as to what will follow, whereas the empty words directed against Cuba will do the government of Fidel Castro no harm whatsoever.

Even as a verbal expression of anticommunism, the so-called declaration of San José is not very much of a forward step. Senators will recall the resolution passed by the OAS at its 10th meeting in Caracas in 1954. I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

CARACAS RESOLUTION

The 10th inter-American conference: Condemns the activities of the international Communist movement as constituting intervention in American affairs;

Expresses the determination of the American States to take the necessary measures to protect their political independence against the intervention of international communism, acting in the interests of an alien despotism;

Reiterates the faith of the peoples of America in the effective exercise of representative democracy as the best means to promote their social and political progress; and

Declares that the domination or control of the political institutions of any American state by the international Communist movement, extending to this hemisphere the political system of on extracontinental power, would constitute a threat to the sovereignty and political independence of the American States, endangering the peace of America, and would call for a meeting of consultation to consider the adoption of appropriate action in accordance with existing treaties.

Mr. SMATHERS. This resolution, passed in 1954, in brief, condemned the activities of the international Communist movement and expressed the determination of the American States to take "the necessary measures to protect their political independence against the intervention of international communism."

On August 28 at San José, the OAS adopted a declaration with respect to Communist intervention. I ask unanimous consent that it be printed in the RECORD at this point.

There being no objection, the declaration was ordered to be printed in the RECORD, as follows:

OAS DECLARATION OF SAN JOSÉ

The seventh meeting of consultation of Ministers of Foreign Affairs—

1. Condemns emphatically intervention or the threat of intervention, even when conditional, from an extracontinental power in the affairs of the American Republics and declares that the acceptance of a threat of extracontinental intervention by any American state jeopardizes American solidarity and security, wherefore the OAS is under obligation to disapprove it and reject it with equal vigor.

2. Rejects, also, the attempt of the sino-Soviet powers to make use of the political, economic, or social situation of any American state, inasmuch as that attempt is capable of destroying hemispheric unity and jeopardizing the peace and the security of the hemisphere.

3. Reaffirms the principles of nonintervention by any American state in the internal or external affairs of the other American states, and it reiterates that each state has the right to develop its culture, political, and economic life freely and naturally, respecting the rights of the individual and the principles of universal morality, and, as a consequence, no American state may intervene for the purpose of imposing upon another American state its ideology or political, economic, or social principles.

4. Reaffirms that the inter-American system is incompatible with any form of totalitarianism and that democracy will achieve the full scope of its objectives in the hemisphere only when all the American Republics conduct themselves in accordance with the principles stated in the Declaration of Santiago, Chile, which was approved at the fifth meeting of consultation of Ministers of Foreign Affairs, the observance of which it recommends as soon as possible.

5. Proclaims that all member states of the regional organization are under obligation to submit to the discipline of the inter-American system, voluntarily and freely agreed upon, and that the soundest guarantee of their sovereignty and their political independence stems from compliance with the provisions of the Charter of the Organization of American States.

6. Declares that all controversies between member States should be resolved by the measures for peaceful solution that are contemplated in the inter-American system.

7. Reaffirms its faith in the regional system and its confidence in the OAS, created to achieve an order of peace and justice that excludes any possible aggression, to promote solidarity among its members, to strengthen their collaboration, and to defend sovereignty, their territorial integrity, and their political independence, since it is in this organization that the members find the best guarantee for their evolution and development.

8. *Resolves*, That this declaration shall be known as the Declaration of San José, Costa Rica.

Mr. SMATHERS. Mr. President, this declaration "condemns emphatically intervention or the threat of intervention from any extracontinental power in the affairs of American Republics" and rejects the efforts of the Sino-Soviet bloc to make use of the political, economic, or social situation of any American Republic to create a wedge in the inter-American system. No mention is made of Cuba.

So far as I am able to determine the only significant difference between the Declaration of San José and the 6-year-old Caracas resolution is that the declaration "condemns emphatically" what the earlier resolution merely condemned.

Despite the 1954 promise of action, the San José Declaration proposed no concrete steps whatever to combat the menace of Sino-Soviet interference or the threat of intervention by Cuban-backed revolutionaries in the affairs of other American Republics. They completely

overlooked the attempted invasions of Nicaragua, Panama, the Dominican Republic, and Guatemala directed by the Fidelistas.

I do not know how anyone can say we have won a great victory when the San José Declaration of 1960 is in some respects weaker in its opposition to communism than was the Caracas resolution of 1954.

It appears to me that what is being held out to be a diplomatic victory is in fact clear-cut evidence that this State Department and this administration have failed, during the past 6 years, to exert significant leadership in the drive to alert other governments of this hemisphere to the danger of Communist intrusion.

ACTION AGAINST DOMINICAN REPUBLIC

Prior to the adoption of the declaration, the San José conference also produced a decision on the part of the OAS to interrupt normal diplomatic relations with the Dominican Republic and to apply partial economic sanctions.

I want to make it perfectly clear that I hold no brief for the 30-year dictatorship that has existed and still exists in the Dominican Republic. I am no defender of dictatorships, whether of the left or of the right.

But I would remind the Senate that the Dominican Republic was our ally in the fight against Nazi Germany and Fascist Italy and for his help Generalissimo Trujillo was warmly thanked by the then President of the United States, Franklin D. Roosevelt, who wrote in 1942:

> The magnificent help given by the Government and the people of the Dominican Republic to the present war effort was profoundly appreciated and will never be forgotten by the people of the United States.

Apparently some people in the State Department have forgotten.

The Dominican Government is at the present time making available to the United States a part of its territory for a U.S. missile tracking station. If the Dominican Government should decide to eliminate that missile tracking station, I do not know whether our missile launching activities at Cape Canaveral, Fla., would continue to be as effective.

The Dominican Government has never abused the United States, nor threatened it. Nor has its chief condemned the U.S. television and radio; nor has the Government vilified our President, nor has it bragged of its close association with the Communists of Russia and Red China.

I would remind the Senate of John Foster Dulles' statement that, while he did not like dictators in this world of reality, he preferred friendly dictators to enemy dictators.

In this connection, it is well also to recall the French proverb that "the enemy of my enemy is my friend" and then Winston Churchill's immortal remark concerning Britain's new ally against the Nazis, the Soviet Union:

> I have only one purpose, the destruction of Hitler, and my life is much simplified thereby. If Hitler invaded Hell, I would make at least a favorable reference to the Devil in the House of Commons.

Mr. President, should we not ask ourselves—who is the major threat to this world's freedoms?

What do we conceive to be the real danger to our own Western Hemisphere and the principles enunciated in the Monroe Doctrine?

Is it the 30-year-old Government of the Dominican Republic which neither Secretary of State Cordell Hull nor any other Secretary of State from his day to this sought, in the words of Under Secretary Dillon, "to bring toppling down"? I remind Senators that we have had some outstanding Secretaries of State, including George Marshall, Stettinius, John Foster Dulles, and Dean Acheson.

Is it the Dominican Republic Government which has existed for 30 years in the Caribbean, which is the major threat to our freedoms today?

Does it threaten to set all Latin America afire? Does its leader threaten to bomb the United States of America? The answer is obviously "No."

Its Government we do not approve of, surely; its leadership is undemocratic, dictatorial. But, nonetheless, the Dominican Republic is not the major and prime threat to freedom in the Western Hemisphere today.

The principal threat and the principal enemy is international communism. And where is the fountainhead of communism today in the Western Hemisphere? It is not the Dominican Republic, but the Communist government of Fidel Castro. Every informed person knows this and most will, of course, admit it.

Yet what happened at Costa Rica? We proscribed the Government of the Dominican Republic and invoked sanctions against it and the United States and Mexico have now broken off relations with the Dominican Republic.

But what did we do insofar as Cuba and its Communist government were concerned?

We ignore the promises of action against communism contained in the Caracas Resolution of 1954 and we directed a watered-down, milk-toast, slap-on-the-wrist resolution of condemnation against the international Communists and we did not even have the forthrightness to mention the name of Fidel Castro or his Communist Government of Cuba.

Mr. President, can any reasonable person call this a great victory for freedom?

It reminds me of some brothers who before they fight, talk big—but once it starts they size up the opposition group, pick out the littlest and smallest of the opposition, beat him up then shout some belligerent words of warning at the real opponent, and then run into the house and talk about what a big victory they won.

Mr. President, who is it in the State Department or in this administration who believes that the 30-year-old Government of the Dominican Republic is a greater threat to the freedoms of the people in the Western Hemisphere than the Communist Government of Cuba?

Who really believes that the Government of the Dominican Republic needed to be ostracized whereas the Government of Cuba could go along threatening freedom without even so much as a real verbal spanking?

Oh, surely, I know some will say, well, we tried to get a strong action against Cuba, but some of the other countries would not go along.

Mr. President, I am sure that is true. But that is exactly where the State Department—and I do not like to say this—and the administration have failed in their leadership.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator yield?

Mr. SMATHERS. I am glad to yield to the Senator from South Carolina.

Mr. JOHNSTON of South Carolina. I commend the Senator for his remarks. I agree with him 100 percent. I, too, believe that the action that was taken toward the Dominican Republic will force that country to join with our Communist foes. Those people will have nowhere else to go, when we push them out. Where else can they go, and what else can they do, but what was done in Cuba? I agree with the Senator's statement.

Mr. SMATHERS. I thank the Senator.

If we cannot cause our friends in this hemisphere to see the difference between an ancient, static, expiring, nonexportable dictatorship which has lived 30 years adjacent to our shores and those of its other neighbors, on the one hand, and a new, inflammatory, virulent, belligerent, expanding, military dictatorship of the Communist variety which is working hand in glove with Khrushchev and Red China, on the other, then we do not know how to lead or present a case.

It is now no secret, Mr. President, that it was the intention of the State Department before the San José Conference to swap or bargain our support of a severe action against the Dominican Republic in the hopes that we could get an equally severe action by the OAS against Cuba.

In this attempt we miserably failed.

We quickly gave away our support on the first part of the proposition, but we stumbled and fumbled on the second and collapsed.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD an article entitled "U.S. Rebuffed as OAS Meet Flops," written by Francis L. McCarthy, UPI Latin American news editor.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

U.S. REBUFFED AS OAS MEET FLOPS

(By Francis L. McCarthy)

NEW YORK.—Latin America is the big loser in the conference of Western Hemisphere foreign ministers, most experienced observers believe.

The San José recommendation—an oral rebuke to the Russians and a political slap on the wrist to the Cubans—show the Latin nations failed to grasp the grave threat to the Americas posed by the Red foothold in Cuba.

Most competent analysts describe the San José emergency conference outcome as weak and ineffectual.

The end result of the fortnight-long meeting was to debilitate rather than strengthen the parent Organization of American States. The conferees sacrificed principle for unanimity.

CUBA WINS

If any winner emerged from the conference it was Cuba. The regime of Premier Fidel Castro went to San José prepared to bolt the conference, and did so when the foreign ministers rebuffed Cuba's demand that the United States be condemned as an aggressor.

The United States did not fare well in the San José talks.

Its bill of particulars against the Reds and Cuba was generally well prepared and even better presented. However, it lacked Latin support. The U.S. compromise on final conference findings stemmed directly from the apathy of its supporters.

The San José findings against the Dominican Republic were known before the conference. No emergency consultation was required to convict the Dominicans of butting into other people's business.

Real import of the conference centered on the Peruvian challenge to Soviet interference in American affairs and the Cuban role therein.

It was this problem, probably the most serious that has faced the American hemisphere since the Spanish-American War, the conference failed properly to resolve.

The end result has been to leave the United States to seek alone a solution that will insure peace.

Mr. SMATHERS. I call the attention of the Senate particularly to this part of Mr. McCarthy's article:

Latin America is the big loser in the conference of Western Hemisphere foreign ministers, most experienced observers believe.

The San José recommendation—an oral rebuke to the Russians and a political slap on the wrists of the Cubans—show the Latin nations failed to grasp the grave threat to the Americans posed by the Red foothold in Cuba.

Most competent analysts describe the San José "emergency" conference outcome as weak and ineffectual.

The end result of the fortnight-long meeting was to debilitate rather than strengthen the parent Organization of American States. The conferees sacrificed principle for unanimity.

Mr. President, that is the point I desire to emphasize. The conference reached out and picked on the Government of the Dominican Republic. It jumped all over Trujillo, but would not pick on the man who is the real menace. They ducked Castro and avoided him. I continue to read:

If any "winner" emerged from the conference it was Cuba. The regime of Premier Fidel Castro went to San José prepared to bolt the conference, and did so when the foreign ministers rebuffed Cuba's demand that the United States be condemned as an aggressor.

Another point I wish to make is that many people say we won our point because the Cubans walked out and left the conference. The Cubans actually walked out and left because the conference would not indict the United States. They did not walk out because of the expression against them, which amounted to nothing. Cuba said it believed the United States was the belligerent and wanted the conference to indict the United States. When that was not done, Cuba walked out. As Mr. McCarthy says in his article:

The United States did not fare well in the San José talks.

Its "bill of particulars" against the Reds and Cuba was generally well prepared and even better presented. However, it lacked Latin support. The U.S. compromise on final conference findings stemmed directly from the apathy of its supporters.

The San José findings against the Dominican Republic were known before the conference.

Everybody knew what would be done. The plan was to take real action against the Dominican Republic, in the hope that something would be done about Cuba. The first point was achieved, but not the second.

Mr. McCarthy continues:

The real import of the conference centered on the Peruvian challenge to Soviet interference in American affairs and the Cuban role therein.

It was this problem, probably the most serious that has faced the American hemisphere since the Spanish-American War, that the conference failed properly to resolve.

The end result has been to leave the United States to seek alone a solution that will insure peace.

Mr. President, I fear our action last week is an error compounded, for what will be the next step? If the present Government of the Dominican Republic is toppled without provision having been made for an adequate succession, does anyone suppose that Raul Castro and the Communists will not try to move into the vacuum?

Does anyone really believe that the disorganized though democratic foes of the Trujillo regime could successfully resist the well organized and already planned Communist drive for power in this area?

Is the experience of Cuba already so distant from memory that we cannot foresee its repetition in a country less than 157 miles distant from the hemispheric headquarters of international communism?

If the Dominican Republic falls, is it not certain that the Government of Haiti will also topple, since Haiti is already beset by extreme economic and political troubles?

And if Haiti should fall, as it would without U.S. military intervention, will not the whole of the Caribbean be turned into a Communist sea and will not the countries of Central America and Venezuela soon find themselves under heavy and cumulative pressure?

The creation of a vacuum in the Dominican Republic could very well accelerate the unraveling of the inter-American system.

In this connection, Mr. President, I ask unanimous consent to have printed at this point in the RECORD an article written by Constantine Brown and published in the Washington Evening Star of August 25; and an editorial entitled "Break With Trujillo," published in the Washington Sunday Star of August 28.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Sunday Star, Aug. 28, 1960]

BREAK WITH TRUJILLO

It has been reported that there is "deep worry" in Washington following our severance of diplomatic relations with the Dominican Republic, and there certainly is abundant reason for concern.

This is no time to belabor the State Department. Its action was taken pursuant to the recommendation by the Organization of American States calling for a break in diplomatic relations and the application of limited economic sanctions in an effort to bring down the rightist Trujillo dictatorship. Our Government would have preferred to take a different course, but it has to be remembered that we cannot expect to operate within the OAS framework and also pursue an independent policy.

Nevertheless, there is grave doubt that the interests of the United States will be served by the step we have taken. And when all is said and done, it is the interests of our own country which should basically concern us.

The wisdom or unwisdom of the action taken will turn primarily on two tests. One has to do with the eventual OAS action with respect to Fidel Castro's Red-tinged Cuban regime. The outlook is considerably less than promising. There is no prospect of any coercive action even remotely comparable to that taken against Trujillo. It is virtually certain that there will be no specific condemnation of Castro, even of the slap-on-the-wrist variety. In all probability we will have to settle for a weak-kneed resolution protesting against Communist or extra-hemispheric intrusion, and even this may not name Russia or Communist China.

If this is the end result, the United States will find itself in anything but an admirable position. We will have been a party to lowering the boom on the dictatorship in the Dominican Republic, which, whatever its sins, has given no direct offense to us. But the leftwing dictatorship in Havana, which is furiously trying to undermine the United States, which has openly affronted the OAS, and which poses an incomparably greater threat to Latin American security, may very well emerge unscathed, or even stronger.

The other test, assuming that the OAS is able to pull down the Trujillo regime, which is at least doubtful, is concerned with that which may follow. After 30 years of one-man rule, there is no organized political opposition in the Dominican Republic. Thus, if Trujillo falls, who will take over? May we expect utter chaos, or will the Communists move in? These grave risks are inherent in any attempt to intervene in the domestic affairs of any country with a view to ousting one ruler without having a successor in sight or in mind. Yet these are the risks that we and the OAS are inviting in this Dominican Republic venture, and this is why there is, and should be, deep worry in Washington.

[From the Evening Star, Aug. 25, 1960]

NEW RED OPENING IN CARIBBEAN? OAS BLAST AT DOMINICAN REPUBLIC HIT AS KREMLIN MAKES OVERTURES

(By Constantine Brown)

The creation of a Caribbean pro-Soviet unit composed of Cuba, the Dominican Republic, and inevitably Haiti would have been called a ridiculous phantasy a few days ago. Now it could gradually become a reality as a result of the decisions taken at the OAS Conference at San José, Costa Rica.

There, by unanimous vote, the Government of the Dominican Republic not only has been reprimanded for the alleged attempts to instigate the assassination of President Romulo Betancourt of Venezuela. Drastic measures short of war, such as the withdrawal of the OAS ambassadors and an economic boycott, have been ordered.

But while President Eisenhower demanded legal authority from Congress to hit the people of the Dominican Republic where it hurt—mostly by withholding the Dominican share of the U.S. sugar quota—Moscow,

which seems to anticipate everything, was ready for action. Soviet official agents—the Dominican Republic does not have diplomatic relations with Communist countries—offered to barter whatever the Republic needed for Dominican sugar. Simultaneously, it was announced from Ciudad Trujillo that the Dominican radio station was negotiating for the service of the Soviet news agency Tass.

These first steps may seem inconsequential at first sight. They do not indicate in the slightest that there could be a reconciliation between Cuba's Communist puppet, Fidel Castro, and the tough dictator Generalissimo Trujillo. But Moscow and Peiping are not interested in harmony between such men. They are interested in establishing as many anti-American areas as possible in this hemisphere.

The Dominican Republic would be a highly important prize, since it paradoxically had been adamantly hostile to alien dictatorships. Before and during World War II Trujillo was bitterly opposed to the Nazis and opened the gates of his country wide to the victims of Nazism, particularly the Jews. Since the beginning of the cold war he has been equally bitterly opposed to the Soviet Union and international communism. It took a miracle—such as that performed at San José by Secretary Herter and his Latin American colleagues—to induce Trujillo to look toward Moscow for help. Trujillo and even the moderate members of the Dominican Government, as well as the rank and file of the people, were reported indignant not only at the harsh treatment they received at San José, but also because at the same time the OAS mildly rapped the knuckles of Castro, who has been guilty of far greater misdeeds, including the confiscation of legitimate properties valued at close to $1 billion.

It seems that the high priests of our diplomacy refuse to learn from the mistakes of the past. In 1946 the United Nations, at the bidding of Joseph Stalin, decided to make Spain a democracy by overthrowing Generalissimo Franco. Since it was inconvenient to send troops into Spain—as Stalin had demanded originally—the U.N. ordered the withdrawal of the ambassadors of its member nations and the establishment of an unofficial boycott. This, it was believed, would bring about another revolution and the demise of Franco's dictatorial regime.

The contrary happened. The Spanish people rallied in support of their strongly anti-Communist leader, buckled their belts and withstood the hardships of the economic blockade for several years. The cold war followed the short honeymoon between the U.S.S.R. and its former wartime allies. We needed reliable air and naval bases; Washington came to the conclusion that Spain could offer valuable real estate for the defense of the free world.

Not only were diplomatic relations with Madrid renewed and a firm friendship established, but because of the economic ravages brought about by the economic blockade we had to provide Spain with upwards of $1 billion in economic aid. The security of our bases demanded an improvement of the standard of living of the Spanish people. Spain, while still not a member of NATO, has all the same become one of the most important adjuncts in our planned defense system.

There is much talk, though little is done from the practical point of view, about the tremendous importance of Latin America and especially the Caribbean to our security. For the first time in our history, we have an enemy dedicated to our destruction right on our doorstep. The Iron Curtain has descended upon Cuba. Now there is strong possibility, judging by the most recent developments, that it will descend upon the Dominican Republic as well.

And all this is the result of a misguided philosophy of some of our leaders that while we should tolerate and try to befriend Communist dictators, we must do our best to stamp out the other kind.

Mr. SMATHERS. Mr. President, both of these articles express the same grave concern. What is to follow? Are we to get rid of one dictatorship, a static one, and get in its place one or the other of the Castro brothers, and cause an expansion of communism?

I also direct the attention of Senators to the last three paragraphs of Mr. Tad Sculz' report from San José, printed in the New York Times of August 23, in which he writes:

Fighting for survival, General Trujillo now has turned against the United States and has begun a strange flirtation with communism. If this is designed to show the United States that a mistake was made by disregarding his warnings that his regime was the only alternative to communism, this maneuver could also boomerang, both against the dictator and against the inter-American system.

In allowing the Communists to return to the Dominican Republic and to organize themselves, General Trujillo is creating the possibility that when he falls—which is regarded here now as just a question of time—the Communist Party will be the only effectively functioning political group in his country. The Dominican Republic has not seen genuine democratic political activity in the 30 years of General Trujillo's rule.

This is similar to what happened in Cuba when General Fulgencio Batista, the dictator, was ousted. The reported Communist infiltration of the Castro regime can be said to be a result of the absence of other organized political groups.

In his speech to the OAS meeting on August 18, Secretary of State Herter said:

My delegation feels that there is another approach which would constitute a practical means of preventing a recurrence of these acts that led to the calling of this consultative meeting. It might be called a preliminary approach, which might well offer a better opportunity.

This is to recommend, with the full force of this meeting of foreign ministers, that the Dominican Republic agree to receive the special committee of this body in the Dominican Republic to assure that, within a specific and reasonable period of time, free elections by the people, who in fact shall have had the right of free expression and free assembly, be held under the supervision of the committee itself, subject to appropriate safeguards to assure observance of principles in conformity with the Declaration of Santiago. There are numerous precedents for the holding of elections under international supervision. * * *

For the success of this proposal, it is essential that the powers of the committee—and they must be real—be clearly set forth and accepted. This is necessary to forestall any attempt to obstruct or water down the creation of the necessary conditions for genuinely free elections. Accordingly, if the proposal I am making commends itself to my colleagues, I would suggest that the resolution to be adopted at this meeting include a clear statement of the necessary powers, immunities and rights essential to the proper functioning of the OAS Supervisory Committee. This statement would be included in the proposal to be given to the Dominican Republic.

Should this offer be accepted by the Dominican Republic, this meeting of consultation will have the satisfaction of knowing that it has taken the best possible steps to achieve its objective by orderly and peaceful change.

If, however, this offer should be refused, we should then consider what measures under article 8 of the Rio Treaty might be most effectively applied in order to bring about acceptance of this proposal by the Dominican Government. Sanctions in these circumstances would pass beyond the purely punitive stage and would have a specific and constructive aim.

Piercing through the diplomatic verbiage, what Secretary Herter recommended was the forcing of free elections in the Dominican Republic. Considering that General Trujillo had already offered publicly, in an article written for the Miami Herald on April 6, 1960, to hold such free elections, Mr. Herter's recommendation is not, I think, up to the standard for straightforwardness which ought to be observed by this country's diplomatic representatives.

During my visit to the Dominican Republic earlier this year, as I duly reported to the Senate on my return, General Trujillo agreed to provide for a transition from dictatorship to democracy within a period of 2 years.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD the article published in the Miami Herald of April 6, 1960.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TRUJILLO INVITES OBSERVERS

(By Generalissimo Rafael L. Trujillo)

A very good friend of our country and of all Latin America recently discussed with me the political future of my country. He was Senator GEORGE SMATHERS, of Florida, a distinguished and even great American in the true Americanista sense of that term.

Senator SMATHERS suggested that our 1962 elections be disputed by two or more parties and that foreign observers be invited.

I reminded the Senator that our Dominican Party is an amalgam of many parties, groups, and factions, and that its function and operations are not unlike those of his own Democratic Party in the South of the United States. I agreed, however, to the desirability of having other parties enter the elections. I also agreed to the presence of foreign observers.

Regarding this last point, however, I want to make very clear—and let my words be interpreted in their exact meaning and in the spirit in which they are written—that the presence of foreign observers is acceptable only insofar as our national sovereignty is not impinged upon. Neither this nation nor any other free nation is going to permit foreigners to run their elections for them.

However, I have promised free elections, and free elections there will be. And there will be parties of opposition.

There is more to this matter of elections than appears on the surface. Oddly enough, for instance, it is the very groups who are most hostile to me who are equally hostile to implementation of the two-party electoral system.

I tell you this—and I invite you to carefully weigh my claim; the very last thing that my enemies desire is that there be held free multiparty elections in the Dominican Republic in 1962. These enemies will do all in their power to block or corrupt such an election.

This should surprise no one. If I ran for the presidency I would be elected—overwhelmingly. If any of the exile leaders were to run for the presidency, they would be de-

feated—overwhelmingly. Even many biased observers admit this.

I believe I can safely predict that the Caribbean comintern will do everything in its power to prevent the 1962 election. It is not interested in the free play of democracy. These revolutionary organizations—a tiny minority in actual numbers—have never sought power by democratic electoral processes. They will not suddenly become believers in the ballot in 1962. They will seek to degrade and corrupt these elections. They will seek to vote by bombs and bullets.

This I cannot permit and they know I cannot. Legally, as a sworn defender of our constitution, and emotionally, as a patriot, I could not permit the gains of 30 years to be destroyed by terrorism cloaked as electoral agitation.

But this situation need not arise. Peaceful elections can be held in the Dominican Republic in 1962 and they will—if they are not deliberately disrupted by calculated aggression, from Cuba, Venezuela and Puerto Rico.

I do not believe that the Dominican Republic can or should seek to become a carbon copy of the United States. Still, the example of and contact with our great northern neighbor could do much to influence our people and inform them in the ways of Anglo-Saxon democracy. Tragically, this contact has often been of a nature completely alien to democratic norms.

Normal relationship between my country and yours—as friends, neighbors, allies—has been deliberately perverted by those who would destroy our country's status as your friend, ally, and neighbor in an inter-American community of nations.

A consortium of international organizations—in which Dominican representation is the veriest minority—have long waged a calculated, lavishly financed campaign to poison every point of contact between our two countries.

Dominican visitors to the United States are frequently harassed, threatened, coerced. Dominican residents in the United States are victimized by extortion and terrorized by midnight phone calls. Money thus extracted is, however, only a drop in the huge financial budget of these mongers of hate.

Powerful radio stations in Puerto Rico—not even operated by Dominicans—beam invective at our country, calling ceaselessly for bloodshed and strife. Recruitment of dupes or coercion of victims is equally unceasing as these organizations seek to swell the ranks of armed "liberators." There are constant attempts to infiltrate communication and transportation facilities linking us with you. Mission of the infiltrators is to make a contact quite remote from the pursuit of democracy.

The instructions they transmit are not advice on the formation of peaceful political parties; they are formulas for the manufacture of bombs and Molotov cocktails. The money they seek to transmit is for no democratic political campaign; it is to finance the manufacture of those bombs and other instruments of death and destruction. The propaganda they seek to smuggle in does not call for elections nor advise on the development of the democratic process; it is an exaltation of hate, violence, bloodshed.

Similarly, any attempt to remove that relationship from the realm of violent, unthinking emotion is instantly attacked. There must never be any objective, thoughtful, unbiased—in other words, democratic—appraisal of my government and of the relationship between our two countries. Just as Senator SMATHERS has been violently attacked for suggesting a return to realism in that relationship, so will the Miami Herald be feverishly assailed for opening its pages to the other side of the story.

Democracy cannot be born through the midwifery of hate. It cannot survive in an atmosphere charged by hate. A terrorist screaming for blood is not and can never be a patriot calling for free exercise of the democratic ballot. When man is ruled by destructive emotion—thus abdicating his duty to exercise the peaceful rationality of democracy—that democracy is either stillborn or its chances of survival are almost nil.

Therefore I say: "Give us a chance to attempt our democracy in an atmosphere free of hate and fear. Let your relationship with us be a positive one. Let there at least be manifested as much zeal as that shown in official sanctions against anti-Castro Cuban refugees in curbing U.S.-based violence against our country in the United States.

The responsibility that your Senator has posed for me must also be, at least partially, assumed by you. Neither I nor my country ask for any favors. The years ahead are crucial ones and ones in which your survival is no less at stake than is ours.

As Senator SMATHERS remarked: "If the Dominican Republic falls to a Communist-dominated government like Cuba's, Haiti will go too. Then the whole Caribbean will be lost."

Mr. SMATHERS. Mr. President, it has already been reported in the American press that, at my request, a team of professional political scientists visited the Dominican Republic for the express purpose of consulting on election procedures and on the requirements for a truly free election.

Their recommendations were transmitted to the Dominican Republic, and a copy was made available to the press. A timetable for the implementation of the recommendations, commencing with local elections in December 1960, had already been announced by the Dominican Republic.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator from Florida yield?

Mr. SMATHERS. I yield.

Mr. JOHNSTON of South Carolina. I should like to ask several questions. I believe the Senator from Florida went to the Dominican Republic and talked over this matter with Trujillo. Is that correct?

Mr. SMATHERS. That is correct.

Mr. JOHNSTON of South Carolina. When the Senator from Florida did that, is it not true that at that time Trujillo said it would take about 2 years to make the change from dictatorship to a republic and to the holding of free elections, and so forth?

Mr. SMATHERS. Yes, he said he thought he could bring it about completely within 2 years—that he would have city elections in 6 months, State elections in 18 months, and national elections in 2 years. That was reported to the press at a press conference which 25 newspaper reporters attended.

Mr. JOHNSTON of South Carolina. If an attempt were made to make the change more quickly, could that not easily cause trouble, and thus make it possible for the Communists to move in?

Mr. SMATHERS. Certainly; it would leave a vacuum, and then the Communists could easily move in. The Communist groups are already organized, and are down there, and are ready. I have talked to leaders in Mexico and in various other countries in that part of the world; and it is generally agreed that if such a vacuum were created, the Communists would move right in. And then the entire area would be under Communist control.

But, in addition, I believe it was ungracious for our Government to act as if it were going to force the change on Trujillo, after he had agreed to make the change. Previously he had asked our Government to cooperate with him; but our Government simply ignored him. I do not think that is quite up to the diplomatic standard our representatives should follow.

Mr. JOHNSTON of South Carolina. Of course, if one tries to force something on a country or on a state, there is bound to be a certain amount of reaction and resistance, which would not exist if the people of the area concerned were allowed to make the change themselves.

Mr. SMATHERS. Yes.

I should like to show how completely hypocritical the attitude of our Government's representatives was in that connection. At the end of the meeting at which they were supposed to pledge opposition to international communism, they said, "It is pledged that under no conditions will any country try to force its type of government on another." But only 2 days before that, they had done exactly the opposite.

Mr. RANDOLPH. Mr. President, will the Senator from Florida yield?

Mr. SMATHERS. I am glad to yield.

Mr. RANDOLPH. Is it not true that too often when we funnel funds, under a program of one type or another, to a country or countries, we forget that the customs, the cultures, and even the peculiarities of the peoples in those areas must be considered, and cannot be turned or changed overnight?

Mr. SMATHERS. That is entirely correct. We are always a little naive, in thinking that because we have democracy in our country and because of our love for humanity—and certainly it is a great virtue and a great credit to us—people in other lands should have exactly the same type of government we have. But often that is impossible—at least, for the immediate future. For instance, in the Congo, 57 percent of the people can neither read nor write. Obviously, when so large a proportion of the people are uneducated it is impossible to have there, at this moment, the same type of democratic government that we have in our country. And if the people of that country are suddenly turned loose and are told to proceed on their own, the result will be chaos. It will be found that one type of dictatorship will merely be supplanted by another. People have to be educated to the point where they can establish and can maintain a democratic government.

Mr. JOHNSTON of South Carolina. Incidentally, do not the people of the Dominican Republic have the benefit of fine hospitals?

Mr. SMATHERS. That is correct; there are about 100 hospitals there. The hospital situation in the Dominican Republic is the best to be found in the Caribbean area.

Mr. JOHNSTON of South Carolina. Do not the people of the Dominican Republic also have good schools?

Mr. SMATHERS. Yes; they have more school classrooms than are to be found in any other country in Central America.

Mr. JOHNSTON of South Carolina. Do not the people of the Dominican Republic also have good roads?

Mr. SMATHERS. Indeed so; they have more paved roads than does any other country in Central America.

Mr. JOHNSTON of South Carolina. Does not that situation make the people of the Dominican Republic feel that they have received blessings under their present leadership?

Mr. SMATHERS. Of course I do not know exactly what they think.

However, one can go to Argentina and find that many of the people there still like Perón. This is not necessarily a recommendation.

I do not think there is any doubt that the average farmer or workman in the Dominican Republic is very strongly in favor of the Generalissimo. The people who do not like him are those who are educated, who know what freedom is, who want freedom of speech and democracy, but cannot get them.

Mr. JOHNSTON of South Carolina. But would it not be found, if the United States were to force Trujillo out, that many people there would be ready to join with the other group and go over to the Communists, or something else?

Mr. SMATHERS. The Senator from South Carolina is entirely correct. If we exercise force in the situation, there will be grave danger.

From the beginning, the administration was kept fully informed of the negotiations to encourage a transition through free elections in the Dominican Republic. It had adequate reason, therefore, to know that what it was demanding of the Dominican Republic had, in fact, already been offered.

Moreover—and this seems to me the crux of the entire affair—my effort to assist in a transition from dictatorship to democracy, by way of free elections, was roundly condemned by the Department of State, and there were "leaked" to the press articles suggesting that in pursuing the idea of such a transition, I was acting, somehow, as "Trujillo's pal." Those stories were "leaked" because I was suggesting that a transition from dictatorship to a democracy be attempted. But now our State Department says, "We will make them do it."

I do not solicit any thanks for having attempted to arrange free elections in the Dominican Republic. When I did so, I expected a certain number of brickbats from public opinion and from the press.

But I regard it as extraordinary that the Department of State should, on the late date of August 18, 1960, embrace this concept, which earlier it had cold-shouldered at a time when it might still have been possible to arrange such a transition and to forestall the deterioration which has now occurred, and which will go on at an ever-accelerating pace.

Mr. President, I hope certainly that the Caribbean situation will not fly completely apart at the seams and that a smooth transition between dictatorship and democracy is still possible in the Dominican Republic. I would appeal to all including the Generalissimo to use their good offices to bring about this transition.

But I must admit candidly that the chances for such a transition are substantially smaller than they were as little as 6 months ago and that responsibility for this deterioration in the political situation must in large measure be laid at the door of the administration.

Had work along this line been done earlier, we would not now be faced with a political vacuum, lacking, so far as I am able to determine, any means or policy to prevent the replacement of the Trujillo regime with a government which is dictatorial and which, in addition, would deliberately and systematically sabotage the interests of the United States.

Once again, I am compelled to say that I regard the failure of U.S. leadership as virtually absolute.

It will be objected that the mood of the OAS representatives at San Jose was such that no more positive action could have been put forward without rupturing the unity of the organization.

This objection, however, ignores the fact that leadership is a continuing obligation. The work of isolating Cuba should not have been left to the corridors at San Jose. We should have been alerting the other nations of this hemisphere to the danger of Cuba ever since Fidel Castro came to power and gave clear evidence that he had no intention of following the path of democracy.

Indeed, the failure at San Jose—and I do regard it as a failure—has its roots in events which preceded the Castro revolution. For it is certainly a matter of record that, having failed to encourage a peaceful transition from the dictatorship of Fulgencio Batista to a genuine democracy, our State Department precipitated Batista's overthrow and the installation of Fidel Castro.

Thus it was precisely the same sort of political bungle which we now are pursuing pellmell in the Dominican Republic that helped to create the current crisis in the Carribbean.

We have not learned the lesson, apparently, nor have we done what should have been done to bring the Cuban experience forcefully to the attention of other Latin Republics.

Now to another point. I am distressed that a few of our Latin American allies could now suggest to us that we ought to accept the good offices of a special OAS committee to help resolve our differences with the Cuban Government.

I would have thought that the attitude of the Cuban Government and its determined efforts to wreck the inter-American system and, further, to destroy through propaganda, subversion, and revolution, all the existing governments of the hemisphere, would have by this time convinced every responsible official in Latin America that compromise with communism is out of the question.

On Thursday, August 25, following this suggestion of a conciliation committee, Fidel Castro replied with perhaps the most virulent attack he has yet made on the principles of hemispheric solidarity.

"We are friends," he said, "of the Soviet Union and of the Chinese People's Republic because they have shown they are our friends."

He accused the United States of "bloody and voracious" imperialism and called this country "the enemy of progressive humanity."

He said:

> We no longer believe in your false democracy, murderer of Negroes * * * in your false liberty, sower of tyranny in our continent, your hypocritical philosophy that protects a Franco as well as a Trujillo.

He called the Pan American Union a "cloak" for "oppression and abuse, the system of domination that you have introduced among our divided peoples of America."

These remarks could only be considered a direct defiance of, and an expression of contempt for the OAS. Yet when on Thursday, August 25, Foreign Minister Raul Roa indicated that the Cuban Government might be willing to negotiate with the United States, a good many members of the Conference seemed perfectly willing to forgive and forget and accept this much too easy path.

As Tad Szulc reported from San Jose in the New York Times of August 28:

> So receptive were many Latin American delegates to [Roa's words] that they immediately interpreted it as a conciliatory attitude of Cuba. They proceeded to try to persuade the United States that Dr. Roa's delegation, in fact, constituted his regime's repudiation of communism and, therefore, obviated any further need for the Conference to address itself to the Havana regime on this subject. * * *
>
> This attitude * * * expressed the belief that Washington and Havana have gone so far apart that they should now be made to agree on concessions to each other.
>
> [When] the Castro group here indicated on Wednesday it would walk out of the Conference, this was enough to set in motion within hours a major conciliation maneuver by Latin American delegates.
>
> Their view was that the vital problem was to prevent Cuba from severing its ties with the American community and to seek to restore her faith in the system. Playing somewhat coy, Dr. Roa agreed to stay and even toned down his forthcoming speech after a group of delegations headed by Mexico produced an immensely conciliatory resolution.
>
> When Dr. Roa finally spoke on Thursday, his splendidly constructed 68 page address was hopefully searched for positive elements among his denunciations of the United States and his refusal to alter Cuba's stand on the Soviet rocket aid.

In other words, they threatened, so to speak, to walk out and break it up, and yet some had the temerity to ask the people of the United States to demean themselves, in my opinion, and say that we should ignore the remarks of Fidel Castro and the attacks made upon us.

However, despite all efforts at conciliation, Cuba would not be appeased. For what it seeks is to enlist the other members of the OAS in its campaign of vilification against the United States and, failing that, to destroy, by the process of subversion, the governments which stand in its way.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD, an article from the New York

Times of August 25, entitled "Castro Challenges OAS; Stresses Amity With Reds."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CASTRO CHALLENGES OAS; STRESSES AMITY WITH REDS

(By R. Hart Phillips)

HAVANA, August 24.—Premier Fidel Castro defied the Organization of American States today and declared that "we are friends of the Soviet Union and of the Chinese People's Republic."

The revolutionary leader spoke as the foreign ministers of the American nations began consideration of the threat of Soviet intervention in the Western Hemisphere through increasingly close relations with the Castro regime.

Meanwhile the Cuban revolutionary Government seized the $7 million plant just outside Havana of the American-owned Owens Illinois Glass Co., of Toledo, Ohio. Armed militia composed of the company's employees took possession of the plant and its offices today and ordered American officers to leave.

The plant, which employs about 600 Cuban workers, supplies the greater part of the beer and soft-drink bottles utilized by Cuban industries.

The occasion for Premier Castro's speech was a meeting of several thousand women who have just consolidated all women's revolutionary organizations into the Federation of Cuban Women. The speech was broadcast by television and radio.

AUDIENCE ENTHUSIASTIC

Premier Castro's enthusiastic audience shouted and sang "Cuba, yes; Yankee, no." It shouted "down with the Organization of American States." "We will win." "Fidel, give it to the Americans hard," and other slogans of the revolution.

The Premier was interrupted by the chanting, cheering throng time after time during his 2-hour speech. It was necessary to play the national anthem twice to stop the demonstration.

Dr. Castro declared that his government "is the most solid and firm government of the American Continent because it is the only government of America that has armed its workers and peasants." "The Cuban revolution is not defended by units of tanks in the hands of a Prussian-type military caste; the security of our revolution does not depend, as in other places of America, on the number of thanks and favors that governing officials extend to the military caste, or on the flattery of the generals by the governing officials; nor does it depend on the favors of the proconsul Ambassador [U.S. Ambassador].

"No ruler who has to live from flattery to generals or servility to ambassadors can ever feel safe."

LAND SEIZURES ACCLAIMED

Another point of strength of the Cuban revolution is that "it took away the lands of the big property owners and the American companies," Premier Castro told the crowd.

"The revolutionary government is strong because it delivered these lands to workers and because along with tractors and financing it delivered rifles," he said. "The revolution is also strong because its laws, its revolutionary institutions, its justice defend those benefited by that justice."

The Cuban revolution is supported not only by the great majority of the Cuban people but by the peoples of America and the peoples of the world, Dr. Castro declared.

The Premier charged that many of the governments whose foreign ministers are meeting in San José, Costa Rica, were serving the interests of the "imperialistic" United States.

Cuba is today facing U.S. imperialism—"the rapacious and exploiting imperialism, the bloody and voracious imperialism, which here has lost some of its rapacious claws—as the vanguard of liberation of Latin America," Dr. Castro said.

Addressing the United States, he said that no longer did the Cuban people believe "in your philosophy of exploitation and privilege, or in the philosophy of gold, the gold that you rob from the work of other peoples; no longer are we disposed to follow the orders of your Ambassador; no longer are we willing to follow in tow your reactionary policy, which is the enemy of the progress of humanity."

Nor "do we believe in your false Pan Americanism with which you wish to cloak the system of oppression and abuse, the system of domination that you have introduced among our divided peoples of America," he added.

For these reasons, Premier Castro declared, Cuba is friends with "those who are our friends; we proclaim the aspiration of humanity to justice and peace, and we interchange our products with those who are willing to interchange their products with us."

The Premier told the United States that Cuba was no longer "an appendage of your economy, nor will Cuba ever again vote in the United Nations as you indicate but will vote as our dignity and conscience indicate."

He went on to say "that we will be friends of the Soviet Union and of the Chinese Peoples' Republic because they have shown they are our friends, while you have attacked and wish to destroy us; and so that you will not come to speak with us in the insolent language your proconsuls are accustomed to use in giving orders."

The women of Cuba must fight and work alongside the men for the revolution, according to Dr. Castro. He urged all the women of the island to join the Federation of Cuban Women, which will also give military training.

"The women can be useful to the revolution in everything, the women can handle arms and the women can fight," he asserted. "Thus instead of a certain number of fighters, by considering the women as fighters, we will have doubled the number."

The Premier said that feminine youth brigades were already being organized.

Mr. SMATHERS. I hope our many friends in Latin America will learn from this experience that the time has come to deal firmly and thoroughly with the Communist arrogance.

Mr. President, despite Raul Castro's intemperate statement last June that he hoped to live long enough to drop atomic bombs on New York, I do not think we, the United States, is now in any great military danger. But I do believe the other countries of Latin America are in some danger.

At this point I should like to read a telegram addressed to me by the President of Guatemala dated April 15, 1960:

GUATEMALA CITY, *April 15, 1960.*

The Honorable GEORGE A. SMATHERS,
U.S. Senate, Washington, D.C.:

From information received from Caracas on April 4 I observed that Adlai Stevenson poposes Latin American disarmament—the same plan you proposed few months ago. Guatemala is ready to reduce army and institute a constabulary guard sufficient only to conserve order and peace within the country but by reason of constant menaces from the present Cuban Government we are unable to do this and on the contrary are forced to increase our tiny army to defend, in the words of our national anthem, "our country and home."

Sincerely,

MIGUEL YDIGORAS FUENTES,
President of Guatemala.

Mr. President, we should not forget that some of this crowd have already run an invasion of the Dominican Republic, of Panama, of Guatemala, and of Nicaragua. Now that they are stronger and have more arms, I think the worst is yet to come.

Plans are now being drawn up in Communist headquarters in Cuba to infiltrate and destroy all the existing governments of Latin America. Mr. Herter clearly presented this evidence to the OAS.

On this point, Mr. President, I thought Mr. Herter did a particularly good job when he presented to the OAS the information which had been gathered with respect to the Communist activities. I ask unanimous consent to have an article from the New York Times, which is a reprint of the U.S. report, printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TEXT OF U.S. SUPPLEMENTAL PAPER AT SAN JOSE CONFERENCE OF FOREIGN MINISTERS

This supplement provides information on the action of the Cuban Government additional to that provided in the document presented to the Inter-American Peace Committee on August 2, 1960. This supplementary information gives added confirmation to the facts stated in the basic document of August 3, 1960; it brings out three significant additional facts, however.

1. Cuba is establishing a training program for Communist agents and guerrillas to spread the Communist revolution throughout Latin America. This is being done through an international work brigade recently established in Cuba with the support of the Soviet-sponsored World Federation of Democratic Youth.

2. The Cuban Government has opened the assault on the remaining vestige of individual liberty in Cuba—religious freedom.

3. Contradicting previous statements that the U.S. reduction of the Cuban sugar quota constituted "economic aggression," its Minister of Commerce announced it would be "more advantageous to Cuba" if the United States ceased all sugar purchases from Cuba.

SUPPRESSION OF LABOR

Labor delegations to the Latin American Youth Congress joined with the Workers Federation of Cuba (CTC) in a joint declaration of August 3, 1960, which:

A. Pledged solidarity by the Cuban and Latin American labor delegates in support for the Cuban revolution and the signing of a mutual assistance pact between the CTC and Central Unico de Trabajadoras de Chile (CUTC).

B. Hailed the Cuban revolution as opening the way to the national liberation of all Latin America, welcomed the support and friendship of the Soviet Union and Communist China, emphasized the threat of aggression by Yankee imperialism and its tool, the Organization of American States, and pledged the workers of Latin America to give their lives if necessary to repel such aggression.

C. Endorsed a movement to create a Latin American labor group to support the struggle against internal reactionaries and the forces of imperialist monopolies.

D. Alerted labor organizations to combat any effort by imperialists to use the OAS at San José, Costa Rica, as a means for attacking Cuba.

ATTACKS ON RELIGIOUS FREEDOM

The Castro dictatorship has moved to eliminate the last remaining vestige of individual liberties in Cuba—the right to freedom of worship. The Communist orientation of

the Cuban Government and its relations with the Sino-Soviet bloc concerned the church so deeply that a pastoral letter on the subject from the archbishops and bishops of Cuba was read in Catholic churches throughout Cuba on August 7, 1960. After expressing strong approval of the original social welfare objectives of the Cuban revolution, the letter said:

"In recent months, the Government of Cuba has established close commercial, cultural, and diplomatic relations with the governments of the principal Communist countries, especially with the Soviet Union. We are deeply concerned over the fact that, in connection with these events, journalists, members of the Government, labor union leaders, and even certain high Government officials have repeatedly praised warmly the way of life prevailing in those nations, and have suggested in speeches delivered both within and outside of Cuba coincidences and similarities of aims and procedures, between the social revolutions of those countries and the Cuban revolution."

This point concerns us deeply, because catholicism and communism are based on two diametrically opposed concepts of man and of the world, which can never be reconciled.

We condemn communism because it is essentially a materialistic and atheistic doctrine, and because the governments guided by it are among the worst enemies the church and mankind have known throughout their history.

COMMUNISM CONDEMNED

We also condemn communism because it is a system that brutally denies the fundamental rights of man; because, to obtain total state control of the means of production, they establish everywhere a dictatorial regime in which a small group is installed in power by using police terroristic methods on the rest of the population; because it converts all citizens into virtual slaves of the state; because it subordinates family life to the state, training children in the manner desired by the Government.

Quite naturally, the reading of this pastoral letter has produced strong reactions from the new governing group of Cuba. Some churchgoers were attacked on leaving church, and in one case a priest had to be given police protection from revolutionaries. In another case, pro-Castro elements started fighting within the church. Revolución, the semiofficial organ of the Government, in its edition of August 8, 1960, defied and threatened the church.

After a special mass at the ancient Columbus Cathedral in Havana August 9, revolutionary thugs attacked emerging communicants and insulted, threatened, assaulted and stoned them.

The following day, August 10, President Osvaldo Dorticós alluding to clashes between churchgoers and hecklers and to the arrest of two priests, said that the provocations and counter-revolutionary activities of Cuban Roman Catholics would be taken care of by "the reactions of revolutionary Catholics." (It is significant to point out that, under the law of the revolutionary government, "counter-revolutionary activity" is a crime which may be punishable by death.)

According to the statement of Dr. Castro on August 11, 1960, the "provocations of the church" were the work of "scribes and pharisees which are serving Yankee imperialism and its partner, Franco." He added:

"There is no doubt that the American Embassy has thrown into combat its last peon. There is no doubt that imperialism, the partner of Franco and his fascism, has utilized the influence of Franco so that he will mobilize as many Fascist priests as can be found to fight against the revolution."

Dr. Castro was threatening when, stating that the "responsibility of their provocation" rested on them, he said that the Government would give them "time to realize that they are in error, time to reflect and time to change their actions."

Dr. Castro, in condemning the Catholic Church in Cuba, drew a parallel between his Cuban revolution and the earthly career of Jesus Christ when he said:

"Those who condemn [the Cuban revolution] condemn Christ, and they would be capable of crucifying Christ because He did what we are doing."

RESTRICTION ON TRAVEL

The Cuban Government has recently announced that outstanding exit permits will be canceled as of August 22, 1960. This will result in a tightened official control of foreign travel by Cubans and other residents of Cuba, and is suggestive of the practice of Communist governments in this respect. This amounts to a partial raising of what may be called a "cane curtain" serving to isolate the Cuban people from normal and customary contacts with the outside world.

EFFECTIVE JUDICIAL PROCEDURE

Illustrative of the persecution of the professional classes, in this case the respected Havana Bar Association, which was disposed of its offices by a usurping group of Communist-inclined dissident lawyers, is the declaration issued by the association and published in Información on August 6, whereby the governing board:

A. Declared the professorships in the school of law at the University of Havana in dispute, warning that any lawyer performing functions inherent in the professorships would be guilty of breach of professional ethics.

B. Made public its decision to resist the action taken by a small group of lawyers who illegally occupied the association's premises.

C. Suspended the payment of bills to the association.

D. Urged lawyers to remain away from the offices of the association and not to attend meetings called by persons who did not legitimately represent the association.

A Government-inspired proposal to call a general assembly of the Havana Bar Association to elect a new slate of officers suggests that the technique used to oust legitimate officers of the Workers Confederation of Cuba may be repeated against the bar association.

CUBAN RELATIONS WITH THE SINO-SOVIET BLOC

An international work brigade, a common Communist device, has brought to Cuba about 200 persons from numerous countries, including Belgium, Sweden, Denmark, Thailand, Poland, Czechoslovakia, East Germany, the Sogaria, Rumania, North Korea, North Vietnam, Communist China, India, Indonesia, Iraq, Algeria, Spain, Cyprus, France, Great Britain, Italy, Yugoslavia, Switzerland, and all of the Latin American countries. The members of this work brigade arrived in Havanna in the first days of August 1960, and all are said to be members of the World Federation of Democratic Youth, a Communist-dominated organization.

The purposes for which the "brigadiers" have visited Cuba are to assist in the construction of an educational center in the Sierra Maestra, and to do manual work. The last stated purpose is incongruous in the light of the unemployment in Cuba at the present time.

That the work brigade may have other purposes is indicated by the statement of one of the members, who is quoted in Revolucion as saying, "We are * * * disposed to defend Cuba with arms if she is attacked."

The international work brigade device further stamps the government of Dr. Castro as being of a Communist character, and revealed the closeness of its practices to those of the Sino-Soviet pattern.

SCHOLARSHIPS TO COMMUNIST COUNTRIES

Ernesto Guevara has recently stated that a large number of scholarships would soon be given to Cubans to study technological skills in the U.S.S.R., Czechoslovakia, and Communist China, and that preparatory language courses would be offered in the University of Havana.

Speaking at the opening session of the Latin American Youth Congress on July 28, 1960, Guevara virtually stated that the Cuban revolution is Marxist. According to his statement, if the Cuban movement is Marxist, "it is because the revolution discovered by its methods the road that Marx laid out, and if we do that which is called Marxism, it is because we discovered it."

SUPPORT OF REVOLUTIONARY MOVEMENTS

On the occasion of the opening of the Latin American Youth Congress on July 28, 1960, in Havana, Ernesto Guevara eulogized a Puerto Rican rebellion movement, by saying: "And we wish to greet also one of the delegations that has suffered most perhaps in all America, that of Puerto Rico, which still today * * * keeps fighting to take the first step, perhaps the most difficult one, that of attaining at least formally a free government. And we wish the delegates from Puerto Rico to convey my greeting and that of all Cuba to Pedro Albizu Campos; we wish them to carry to Pedro Albizu Campos all our heartfelt cordiality, all our recognition for the road that he has laid out with his valor, and all our fraternal sentiments as free men toward a free man, in spite of his being in a dungeon of the self-styled North American democracy."

On August 2, at a luncheon given by the Government-controlled news agency, Prensa Latina, for the delegates to the youth congress, the director of the agency, Jorge Masetti, said: "We will continue to announce our presence to our brothers in Puerto Rico and Panama, and we will continue to tell them, 'plant bombs, throw out the gringos.' "

ATTACKS BY CUBAN LEADERS ON OAS

Recent statements of Cuban leaders have again revealed the contempt with which the OAS is regarded by the Cuban Government, and the official Cuban view that Latin American nations which support it are slaves and lackeys of the United States.

Raul Castro, Minister of the Revolutionary Armed Forces, speaking before the Workers Confederation of Cuba and the Latin American Youth Congress at Havana on August 4, 1960, stated that the United States:

"Admirals and generals advocated direct aggression against Cuba. The other trend was for multilateral action * * * an instrument was needed in order to maneuver thorough multilateral action. This was the OAS, which has lost all its prestige * * * This organization only serves to legalize the aggressions against Latin America."

He disparaged the OAS further in a television speech the following day: "We convened an OAS meeting ourselves the other day in the CTC. Representatives from all Latin America were there. We convened the revolutionary OAS at the headquarters of the revolutionary CTS. Latin-American youth leaders expressed support of 200 million Latin-American men and women for the Cuban revolution."

On August 6, 1960, Antonio Nuñez Jimenez, executive director of the National Agrarian Reform Institute (INRA), in a speech before the Latin American Youth Congress at Havana, said:

"Among the American states there is a vandal, an assassin like Trujillo. There is seated a representative of the Somoza dynasty. There is seated a little old man who dances through the fracas to show his people that he is strong, Ydigoras. Then there are seated others, and then they think that they (the United States) are going to achieve there (at San José) what they have not

achieved by bribery, bombardments, the sugar quota, the petroleum, armed aggression, etc., but I am sure that the next time I speak to you in public I shall bring to view the failure of aggressive intentions by means of the OAS also."

CASTRO REMARKS RECALLED

Dr. Castro, the Prime Minister, has more things to say about the OAS in a speech before the closing session of the Latin American Youth Congress on August 7, 1960:

"The accomplices of the Guatemalan affair were the lackeys who used the OAS to support U.S. aggression against a peaceful people, who wanted to wage a revolution in order to free themselves. You must know that the protective doctrine of the Yankees is called the Monroe Doctrine and that they have used this doctrine to make Latin America a protectorate * * * Now the same gentlemen are trying to maneuver the OAS against us. Why was no OAS meeting called when a ship laden with ammunition mysteriously blew up, after the U.S. Government had failed in its negotiations to prevent a certain country from selling us arms and munitions? Why was no OAS meeting called when the Pentagon met to formulate plans to attack Cuba?

"Yet when the U.S.S.R. declares that it will support Cuba if attacked, they do not like it. Obviously, there will not be any need of their support, if we are not attacked. The Yankees have been busy distributing our sugar quota to their servants before the OAS meets. They have been giving up our loans and offering help to their lackeys before the OAS meets. How can these slaves judge our case honestly, if they have already sold their souls to the U.S. imperialists?

"They are not going to the OAS to give us a fair trial; they are going there to watch Herter's finger and do what he bids them to do."

The meeting of Foreign Ministers, according to Dr. Castro, was no more than "a Yankee maneuver against Cuba. What does it matter if the OAS condemns us?"

OAS RIDICULED BY ROA

Foreign Minister Raul Roa, also speaking on August 7, described the OAS as a "ministry of colonies" of the U.S. Government, and said that the coming San José meeting was a new North American maneuver against Cuba. Regarding the Rio Treaty, he said it was an instrument of U.S. military policy. "This treaty like the Monroe Doctrine, was not made to help Latin America, but to aid the predominance of the United States in Latin America."

With respect to the OAS, Roa had the following to say: "We cannot contaminate ourselves with predetermined decisions of the OAS; we cannot contaminate ourselves with this atmosphere without carrying an oxygen container in our pocket, the pure and clean oxygen of the Cuban revolution. We neither surrender nor sell ourselves."

A vote against Cuba at San José would not matter, according to Roa. "We would laugh at this, because we would already have denounced all its machinations."

President Osvaldo Dorticós, on August 10, spoke of the meeting of foreign ministers as having been "called to attack our country and our revolution." He went on to say that "many of the Latin-American governments, who serve the interests of U.S. imperialism, will serve on their knees the order of their imperialistic boss." He further stated that the Government of Cuba did not feel itself obligated by the 1954 resolution of the OAS at Caracas, which called communism a threat to the Americas.

President Osvaldo Dorticós on August 13, saluted the meeting of foreign ministers at San José by stating before a mass meeting in Havana that it was invoked by imperialists. He arrogantly added that it would be the Cuban delegation, not the foreign ministers, that would speak for the Latin-American peoples.

CUBAN ECONOMIC DISCRIMINATION AND AGGRESSION

The duplicity of Cuban economic policy was made unmistakably clear on August 13, 1960, by the Minister of Commerce, Dr. Raul Cepero Bonilla, who informed a television audience:

1. That Cuba's sugar sales had increased under the Castro regime. He did not explain that these sales would result in less income for Cuba or that the cost of production of Cuban sugar exceeds the world market price for which most of the sales to countries other than the United States were made.

2. That "for the next year it would be much more advantageous to Cuba if the United States did not buy a single grain (of Cuban) sugar." He did not explain that this was a contradiction of previous statements that the reduction of the Cuban sugar quota in the U.S. market meant "economic aggression" against Cuba which, in turn, was announced as "justification" for arbitrary seizure of more than $1 billion invested by private U.S. citizens in Cuba.

3. That Cuba would not sell sugar to countries that might benefit from the reduction in Cuba's sugar quota. This warning was addressed to all countries, but the Minister of Commerce, Dr. Raul Cepero Bonilla specifically mentioned Brazil.

Mr. SMATHERS. No, Mr. President; the sights of the Castro regime are not directed north to the United States, but west to Mexico, Honduras, El Salvador, Nicaragua, Panama, Guatemala, and Costa Rica; east to Haiti and the Dominican Republic; and south to Venezuela, Peru, Bolivia, Brazil, Argentina, Chile, Uruguay, Paraguay, Ecuador, Columbia, and the Guianas.

Last month at the Congress of Youth in Havana, Fidel Castro said:

It is our duty to turn the Andes into the Sierra Maestra of the Americas.

And Raul Castro echoed malignantly:

Latin America is a field of dry grass. No matter where it starts to burn it will all burn, and we have the fire.

The U.S. Government has already shown to the OAS evidence that Cuba is establishing a training program for Communist agents and guerrillas to spread the Communist revolution throughout the hemisphere. Cuba itself has announced that it is receiving shipments of Czechoslovakian arms, that its people are armed to the teeth and with better equipment than can be found in the United States.

I have been responsibly informed that armed uprisings are already being planned in half a dozen Latin American countries.

The man who organized and executed the Canadian spy episode has now been sent by the Soviet Union to Havana; it is not difficult to imagine for what. The former Chief of Propaganda in Hungary during the Budapest butchery is now available for technical consultation in Cuba.

I warn my friends in Latin America, for whom I have the deepest admiration and affection, that Castro's communism aims to destroy them.

If Castro's communism is allowed a free hand, if we hide our heads in the sand because we face a difficult situation, the work which has gone into the building of democracy in the countries of this hemisphere will vanish in a flash.

This is precisely what the Communists want, for a securely entrenched democratic tradition is the one thing they most fear in their drive to conquer the earth.

I say to the people of the United States that the so-called victory at San José is, in fact, a diplomatic defeat of the first magnitude.

Not only did the OAS fail to set up an effective mechanism for combating communism in Cuba from whence it will spread like an infection through all of Latin America but it also permitted Cuba to get clean away with defiance of the inter-American system, and in addition created an opening for the Communists to extend their gains in the Caribbean, through an attack on a nation which, whatever the faults of its government, has constantly and consistently opposed imperialistic encroachment, both Nazi and Communist.

The net result is that Castro can proceed with his plan of appealing, through subversion, over the heads of Latin American governments to those who would destroy rather than build. Already he has labeled the OAS action at San José an act of treason.

The free peoples of the world look to the United States to lead them in their fight for survival. Those already enslaved by Communism but who cherish the memory of lost liberty look to the United States as their only source of hope.

This is a towering task which has devolved upon us.

If we are to succeed we must stand firmly by the friends who have stood by us.

Failure to do this has already resulted in a steady erosion of our influence throughout the world and a constant dwindling of the number of nations which offer us unqualified support in this struggle.

Fidel Castro has taken a firm position on the side of communism. He does not come forth with platitudes and veer with the wind from day to day, which is the course that the United States has followed.

The San José Declaration is a hollow gesture, more damaging because it gives the appearance of action when there has been no action.

We must stop deluding our friends in Latin America and stop deceiving ourselves into a sense of false security by adopting pious declarations, which dismay the Communists not at all.

We stand on the thin edge of disaster. This is no place for the timorous. This is no time for listening to those who do not realize or who refuse to admit that we are now in the throes of a tremendous struggle between the Free World and the Communist camp.

We, and our friends, must take our stand for individual liberty, or face enslavement.

Platitudes will only win us the scorn of the world. Even brave words will no longer suffice. The time has come for brave—and bold—and decisive—action.

We must stop penalizing those nations which have befriended us. We

must take our position as firmly and defiantly as the Communists have taken theirs.

We must oppose communism and its symptoms. We must stand up for the things in which we believe. We must encourage every nation and all peoples everywhere to take their stand with us and make their choice for freedom now—or the world will shortly have no choice at all.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. SMATHERS. I yield to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I take this opportunity to congratulate the able and distinguished Senator from Florida for one of the finest addresses I have heard in the U.S. Senate on this subject. I feel the information the Senator has brought to the Senate today should go out to the American people all over the country, because it is my feeling that a great many of them do not understand the fundamental issue at stake. It is my sincere thought that if the people could obtain the information supplied by the Senator from Florida there would be a different feeling in the United States today toward Cuba and toward the Dominican Republic.

I ask the distinguished Senator the question: Has not the Dominican Republic been a true and loyal friend of the United States, in return for which friendship we are now willing to condemn and castigate the Dominican Republic?

Mr. SMATHERS. The Senator is correct. I said earlier that Franklin Roosevelt wrote the Dominican Republic Government a letter thanking it for its support during World War II.

No Secretary of State since Cordell Hull—we have had many liberals and some conservatives; Dean Acheson, George Marshall, and all the rest—has ever gone so far as to recommend, as Secretary Dillon did the other day, that we participate in the toppling of a government.

Mr. THURMOND. Is it not true that communism is the greatest threat in the world today, and that the Dominican Republic has been stanchly against communism, certainly until recently, when we appeared to turn our backs on her, which may have caused her to turn in the other direction?

Mr. SMATHERS. The Senator is absolutely correct. Certainly our major enemy is communism. That, I think, is the real point I have tried to make. It is important that our friends understand who is the real enemy.

I admit this fellow has a dictatorship in the Dominican Republic, which has existed for some 30 years. At times he has been a troublemaker. His has been a tyrannical government. Of that there is no question. However, Puerto Rico has lived side by side, Haiti has lived side by side, Cuba has lived side by side, all the countries of Central America have lived side by side with this fellow—without approval, but without fear of him.

After the Communists got into Cuba, immediately attacks are made against all of these countries. Then people come back from the conference and say, "Look what we did. We slapped down this old fellow, who is about to go out anyway." They ran away from communism in Cuba. To call that a victory is nothing more than a mockery.

Mr. THURMOND. Is it not true that Yugoslavia is a dictatorship, and that we have granted money and aid to the country, not knowing which way Yugoslavia will turn in the end? We knew the Dominican Republic was with us, yet we have practically forsaken her and turned our backs on her.

Mr. SMATHERS. The Senator is absolutely correct.

Mr. THURMOND. Is it not true that under Fidel Castro Cuba has become Communist dominated, and that we might as well accept the fact for what it is? We should be on guard with respect to Cuba rather than to suspect our friend, the Dominican Republic, which has been our friend for a long time?

Mr. SMATHERS. I agree with the Senator. The real enemy is the government of Fidel Castro, because it is a Communist government whose purpose it is—some day—to rule the world and to destroy all existing governments.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. SMATHERS. I am happy to yield to the Senator from Montana.

Mr. MANSFIELD. I have listened with great interest to the speech by the distinguished Senator from Florida, who is without question, the foremost expert on Latin American affairs in this body. I make this statement on the basis of his longstanding, personal, and real interest over a good many years. He has, I believe, traveled in all the countries of Latin America, not once, but many times over. In other words, he is a Senator of experience, knowledge, and interest.

I must say, however, and I say this most respectfully, that I do not agree with him relative to the final outcome of the conference in San Jose in this respect. Certainly it was not a victory for us, as he stated emphatically; at the same time, I do not look upon it as a defeat because of 1 occasion 20 of the states of the Americas got together to pass a resolution against a sister republic. On another occasions 19 states got together to pass a resolution which, while not naming the sister republic, left no doubt in anyone's mind as to who is meant.

The Senator has said that at the present time Castro is moving into the direction of Central America and other areas of the Caribbean and South America. The Senator is correct. I wish to call to the attention of both the Senate and the administration the fact that this trend, and ways to forestall it, have been brought to our consideration and notice for years by the Senator from Florida [Mr. SMATHERS] and only now, at long last, are we coming forward with the kind of program which will stop this penetration of the Castro columns, so to speak, and give some hope and sustenance to the peoples of Latin America, and thereby at long last possibly bring into operation on a cooperative and a collective basis the very things which the Senator from Florida has been emphasizing should be done for a good many years past.

So I agree with him in that respect, but I do not agree with him that the conference of San José has been along the lines of a failure, because I think something was achieved there.

Mr. SMATHERS. I thank the able Senator from Montana. I want him to know there is no Senator in this body for whom I have greater affection or a higher respect. I regret that the able Senator was not present when I started my little talk, because I thought I submitted evidence, which he was unable to hear, documenting why I consider the San Jose conference a failure.

I referred to the Caracas resolution of 1954, in which all of the countries of Latin America, including Cuba, went on record to say:

> We are opposed to international communism. We will resist it.

They pledged unified action against it. That was in 1954. Now, 6 years later, what sort of resolution is adopted? A resolution that says:

> We emphatically stand against communism.

They did not have the courage to name Cuba or Fidel Castro.

I do not see how we can claim the result in Costa Rica as a victory.

As I said earlier in my statement, it is like a couple of brothers, one of whom says to the other, "We are going to beat the dickens out of those fellows over there."

They pick out the smallest boy, and they both beat him up. They look at the big fellow and one brother says to the other, "I don't know whether we can beat him up."

And so they leave him alone and return home and brag about the big victory they won.

As the head of the UPI said, as Ted Szulc of the New York Times intimated, the conference was a failure. They failed to meet the issue. Their administration gambled. It put up the Dominican Republic and said, "We will ostracize the Dominican Republic if you will help us to ostracize the Communists in Cuba."

The conference ostracized the Dominican Republic, but we were such poor negotiators that we could not get the conference to set against the Cubans. So Cuba walked out the winner.

Why did the Cubans leave? Not because they were indicted. They were angry, as Raul Roa, the Secretary of State of Cuba said, because the conference did not condemn the United States.

I say to my good friend, whom I highly respect, and who is keenly interested in this problem, I do not quarrel with him about his viewpoint. But, so far as I am concerned, the conference was a failure of U.S. leadership.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. SMATHERS. I am happy to yield.

Mr. MANSFIELD. One of the pleasant things about being a Democrat is

that we can differ and still remain friends and still remain true to the ideals that we profess.

I did hear the speech of the Senator from Florida because I was present most of the time. I followed him with a great deal of interest. But he had eyes only for the President pro tempore, and I can understand why that magnet attracted him at all times.

I know that the Cuban foreign minister, Raul Roa, walked out. I know that the Cubans have concocted a cock-and-bull story to the effect that there was some sort of American plot which was to the effect that the plane in which the Cuban foreign minister was to return home was to be shot down, and therefore, he had to return early. That, of course, was an utter and complete falsehood.

But the point I think we ought to keep in mind is that even though the result of the conference was not anywhere near what the Senator from Florida and I had hoped for, even though some of the foreign ministers had to have their senior delegates sign in their places, nevertheless we must recognize the fact that the influence of Castro in Cuba is being felt in many of the other Latin American countries. This is a factor to be contended with. Some of the delegates representing these governments would like to have gone along with what we desired at the conference at San José, but because of the situation at home, they felt that they could not go all the way because they were well aware of the difficulties which might arise and confront them.

I bring that point out only to straighten the record and not to disagree too much with the distinguished Senator from Florida.

Mr. JOHNSTON of South Carolina. Mr. President, let us clear the record further. I do not wish any reader of the RECORD subsequently to believe that the Senator from Florida was looking at the Presiding Officer and being magnetized by the Vice President. The Vice President is not in the chair. [Laughter.]

Mr. SMATHERS. Mr. President, I yield the floor.

Mr. HARTKE. Mr. President, I desire to compliment the Senator from Florida upon his outstanding work with respect to Latin American affairs, and upon the constant vigilance and the constant thought he has given to this subject. He is forthright in expressing his views concerning Latin American policy.

If his words of warning had been listened to earlier by those in authority in the administration, perhaps we would not find ourselves in the situation which confronts the Nation today at its very doorstep, and particularly at the doorstep of the State of the distinguished Senator from Florida, as it affects the very serious situation in South American and Latin American affairs.

The voice of the junior Senator from Florida has been consistent and logical on this question. I join with him in his remarks and hope that they will at least be listened to now, if they were not listened to before.

Mr. SMATHERS. I thank the able Senator from Indiana for his generous comments.

SUGAR QUOTAS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when H.R. 13062 is reported, it will be in order to proceed to its consideration. That, I inform the Senate, is the so-called sugar bill.

The PRESIDING OFFICER. Is there objection?

Mr. DIRKSEN. Mr. President, I have no objection.

Mr. JAVITS. Mr. President, reserving the right to object, and I do so only hoping that the Senator will let me do something by unanimous consent, I have no objection.

Mr. DIRKSEN. Mr. President, only for the RECORD, and for the information of the Senate, the Senate Finance Committee is meeting at the present time on the sugar bill, which has passed the House. I presume the committee expects to report, and if the measure is to be considered today, authority must be obtained for doing so. Therefore I do not have any objection.

The PRESIDING OFFICER (Mr. LAUSCHE in the chair). Without objection, it is so ordered.

JANE ADDAMS

Mr. DIRKSEN. Mr. President, the Congress of the United States has recently passed a joint resolution honoring Jane Addams, who is the well-known founder of Hull House and a worker for world peace. The joint resolution is now before the President for his signature.

The timeliness of this resolution brings to mind the fact that Mrs. Alice K. Leopold, assistant to the Secretary of Labor, received the Jane Addams Medal for distinguished service. This award was inaugurated by Rockford College, Rockford, Ill. I ask unanimous consent that a press release from the Department of Labor pertaining to Mrs. Leopold's receiving the Jane Addams Medal be placed at this point in the RECORD.

The press release was ordered to be printed in the RECORD, as follows:

ALICE K. LEOPOLD TO RECEIVE JANE ADDAMS MEDAL

Mrs. Alice K. Leopold, assistant to the Secretary of Labor, will receive the Jane Addams Medal for distinguished sevice, at a dinner to be held at Rockford College, Rockford, Ill., April 29.

The medal honoring Miss Addams, who is well known as the founder of Hull House and as a worker for world peace, is given periodically to a woman in this or a foreign country who has made an outstanding contribution to society in her lifetime. Among the recipients of the medal, which was established by Rockford College in 1947, have been Katharine Cornell, Ada Comstock Notestein, president emeritus of Radcliffe College, and Vera Micheles Dean, editor of the Foreign Policy Association.

Mrs. Leopold, who has been in Washington since her appointment by President Eisenhower in 1953, has had an outstanding career at a local, State, and national level, and her record of achievement has led her into extensive work in the broader scope of international activities. For example, in 1954, she was appointed as adviser to the U.S. delegation to the conference of the International Labor Organization in Geneva, Switzerland. She again served in this capacity in June 1956 and 1957. In 1956, she was chairman of the first ILO Committee to consider problems of particular importance to women—the Committee of Experts on Women's Employment, and she was influential in the governing body's decision to organize a permanent tripartite committee on women's employment which met for the first time last year. She was chosen as chairman for the meeting held in Geneva, Switzerland.

A foreign exchange program which was initiated by Mrs. Leopold in 1954 not only brought 67 Italian and French women to the United States to see how women here live and work, but the impact of this idea was such that it has continued since then with many countries and with many different groups such as the six Russian women doctors who visited here in 1957.

Mrs. Leopold's continuous work with the United Nations Commission on the Status of Women brought about a number of worthwhile conferences, and close cooperation between the U.S. delegates and Mrs. Leopold and the legislative division of her staff.

A graduate of Goucher College, Mrs. Leopold was in personnel work originally until she and her husband, Joseph Leopold, settled in Weston, Conn. Here their two sons were born. The older, Lt. Robert Leopold, USN, a Dartmouth graduate, is married and has a small son. He is stationed in Norfolk, Va. John, who was graduated from Dartmouth last June, is a lieutenant in the U.S. Army, studying Turkish at the Army Presidio in Monterey, Calif.

THE HONORABLE ALICE K. LEOPOLD, ASSISTANT TO THE SECRETARY OF LABOR AND DIRECTOR OF THE WOMEN'S BUREAU—U.S. DEPARTMENT OF LABOR

(Appointed by President Eisenhower in 1953 to post in the Labor Department.)

Married to Joseph Leopold, vice president of a New York advertising agency. They have two sons, Robert, a Dartmouth College graduate, now serving as a lieutenant in the U.S. Navy, and John, 1959, Dartmouth graduate, now a lieutenant in the Army.

Graduated from Goucher College, 1927.

APPOINTMENTS, BOARDS, AND COMMITTEES

President's Committee on Government Employment Policy, 1959.

Chairman, International Labor Organization Panel of Consultants on the Problems of Women Workers, 1959.

Chairman, International Labor Organization Committee of Experts on Women's Employment, 1956.

Adviser to U.S. delegation at annual meetings of International Labor Organization, Geneva, Switzerland, 1954, 1956, 1957, and 1959.

Committee on Economic Problems of the Aged.

National Committee on the Aging.

National Advisory Committee, National League for Nursing.

Advisory Board American Council on Women in Science.

Adviser to the Women's Africa Committee.

Executive Board, Women's Medical College of Pennsylvania.

National Girl Scout Advisory Council.

Women's Board, Norwalk Hospital, Norwalk, Conn.

Membership Committee, Women's Activities Conference, National Safety Council.

Trustee, Educational Foundation, American Women in Radio and Television.

BACKGROUND

Elected Connecticut assemblywoman, 1949–50; author of bills which were enacted on equal pay and minimum wage.

Elected secretary of state in Connecticut, 1950–53; author of first general revision since 1860 of Connecticut election laws.

Commissioner of elections in Connecticut, 1953.

Presidential appointee to Commisssion on Intergovernmental Relations, 1953–55.
Member State of Connecticut Boards and Commissions of Education, Labor-Management Relations and Public Housing.
Executive Committee, National Association of Secretaries of State.
Trustee, Goucher College.
Originator Blood Donor Program of Fairfield County, Conn.
Officer in Westport-Weston Chapter, Red Cross.
President, Parent-Teachers Association, Weston, Conn.
Connecticut State Chairman, Committee on Economic Welfare, League of Women Voters.
Vestryman Lyons Plains Episcopal Church.
Trustee, Connecticut Association for Blind.
Personnel Director, Hutzler's, Baltimore, Md., 1927–31.
Personnel Director, B. Altman, New York City, 1931–33.
Designer and manufacturer, My Town Toys.

HONORS

Connecticut's Woman of the Year, 1951.
Connecticut's Republican Woman of the Year, 1955.
Woman of Achievement, American Federation of Soroptimists.
Doctor of humane letters degree, Hood College, Frederick, Md., 1956.
Distinguished Service Citation, National Association and Council Business Schools, 1959.
Doctor of social science degree, Woman's Medical College of Pennsylvania, 1957.
Doctor of laws degree, Rutgers University, 1958.
Togetherness Award by McCall's magazine, 1958.
Charm Magazine Award, 1958.
Distinguished Citizen Award, Alpha Gamma Delta International Fraternity, 1959.
Jane Addams Medal for Distinguished Service, April 1960.

MINIMUM WAGE LEGISLATION

Mr. KENNEDY obtained the floor.

Mr. GORE. Mr. President, will the Senator from Massachusetts yield so that I may make a point of no quorum?

Mr. KENNEDY. I yield for that purpose.

Mr. GORE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. GORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, as the Senate knows now, the conference between the House and the Senate on the minimum wage bill has ended, and there is now little or no prospect that the conference can be successfully resumed.

As that conference is important, because it involves an important piece of legislation, and also because it throws a good deal of light on the difficulties which we have faced in this session, I think it important that we report to the Senate what happened in the conference.

As Senators will recall, the House of Representatives passed a minimum wage bill which provided new coverage for 1,400,000 people, of whom approximately 300,000 were receiving less than the amount they would receive in the House bill. The remaining number were already receiving more than the House figure. The House bill provided for a $1.15 minimum wage for the presently covered, raising the wage from $1 to $1.15. It provided a dollar minimum wage for those who were not now covered, with no step-up. There was no limitation on overtime. That was the House bill.

The Senate bill provided a minimum wage of $1.25 for the presently covered, with a 3-year step-up. It provided coverage for 4,100,000 persons. It provided for $1.25 for the newly covered, with a 4-year step-up. In addition, it contained a definition of the words "affecting commerce," and it also had a discussion, which was in controversy in the Senate, of the word "enterprise."

Those were the differences between the House and Senate bills.

We sat down in a conference composed of five Members from the majority party—of whom only four attended—and three Republicans. We were anxious to get a bill. I shall relate briefly our experience in the committee, because I think it is an illuminating experience for Members of Congress.

After the committee had met informally the first day, the New York Times published an article containing a statement by one of the conferees from the minority on the House side. The Representative said:

> The House will not yield. It boils down to the House version or no bill.

In other words, from the beginning, there was never any doubt, and the chairman of the House conferees was completely frank and honest. The personal relations in the conference were extremely cordial, but he made his opposition clear and was supported by the minority of three Members on the House side that the bill would be the House bill, or there would be no bill.

The problem confronting the Senate conferees was that our bill was quite different from the House bill. Whereas the House bill provided $1.15 an hour for persons presently covered, the Senate bill provided $1.25. Whereas the House bill provided coverage for 1,400,000, the Senate provided coverage for 4,100,000.

Whereas the Senate bill provided for overtime, for the newly covered, after 44 hours the second year, 42 hours the third year and 40 hours thereafter, the House bill had no overtime provision.

So the differences between the bills were substantial, and we were not in a position, representing the Senate, to say that it was the House bill or nothing.

To the best of my knowledge, I do not recall any conference which I have attended, in the 14 years I have been in Congress, when the conferees on the part of either the House or the Senate indicated that the bill would be either the House bill or the Senate bill, or nothing. Therefore, the Senate conferees indicated their willingness to accept some compromise.

First, we were willing to drop our request for $1.25 and to take $1.15.

The Senator from Illinois [Mr. DIRKSEN] informed us that he felt the President could not accept, probably, a bill providing for $1.25, so we dropped that figure and said we would take the $1.15. I believe I have quoted the Senator correctly.

So we took the $1.15.

We then decided we would support the amendment offered by the Senator from Vermont [Mr. PROUTY]. In my opinion, the Senator from Vermont, who has raised some question about the conference, made a constant effort to bring the conference into agreement. So far as I am concerned, I think he did everything that any single person could do to try to achieve a compromise between the House and Senate positions. He offered five different amendments. The majority of the Democrats supported three of the five amendments. We dropped the words "affecting commerce"; and we dropped the word "enterprise"; both phrases having been in controversy in the Senate. We agreed to accept the $1.15 an hour. We agreed to step up the minimum wage, for those covered, to $1.15 over a 3-year period.

We started out on the hourly coverage for those now covered at 46 hours, instead of 44. We agreed to a coverage of around 3,100,000 people instead of 4,100,000. We lowered the coverage. We accepted the House figure on minimum wage. We asked for a higher figure for the newly covered, from $1 to $1.15, and asked for a small overtime limitation. In my opinion, that was a compromise which should have been accepted.

The Senator from Vermont offered that amendment in five different forms. The record shows that the majority of the Democrats voted for that compromise on three different occasions.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. MORSE. I think it also should be pointed out that the Senator from Vermont [Mr. PROUTY] agreed to certain modifications in his original amendments, which in the opinion of some of us on the Senate side were very important. In particular, I would mention his acceptance of an amendment which I offered referring to goods coming across State lines, directly or indirectly, which took care of the jobber problem. He was also willing to substitute two establishments in two or more States, instead of three, four, or five establishments, in two or more States.

That, I think, demonstrated the further willingness on the part of the Senator from Vermont to extend his point of view in order to reach agreement on a bill. As the Senator knows, in my opinion that was an exceedingly impor-

tant modification. The Senator from Vermont was also willing to accept a modification when we discussed the amendment dealing with sales, rather than purchases, of $1,500,000 rather than $1 million, which the Senator from Oregon proposed.

Mr. KENNEDY. In addition to the dollar compromise figures, we dropped two sections which were in great controversy in the Senate. We dropped the words "affecting commerce" and the word "enterprise."

The amendments offered by the Senator from Vermont are listed in the CONGRESSIONAL RECORD of yesterday, beginning on page 18350. Senators can form their own judgment as to the acceptability of those amendments.

The majority of the conferees on the Senate side voted for the Prouty amendments.

Some of the amendments we did not accept, but of the amendments we voted for, none of the minority Members of the Senate, except the Senator from Vermont [Mr. PROUTY] voted for them. The majority of the House Members on the conference voted against every one of them, and indicated very clearly and frankly, from the beginning, that the bill would be the House bill or nothing. The effort to achieve a compromise, therefore, was in vain.

The Prouty amendment in at least one of its forms—and I believe in two of its forms—was almost identical with the final recommendations of Secretary of Labor Mitchell. They were in effect the Eisenhower administration recommendations on minimum wage; but they were overwhelmingly rejected by the conference, even though the Senate conferees accepted them, and even though they represented a sharp departure from what we thought was at least an adequate minimum wage and adequate coverage.

The Senator from Oregon [Mr. MORSE] and I, who introduced the bill, at one time provided a figure for adequate coverage of 7 million. At one time it went as high as 11 million. When we brought the bill to the floor, the bill provided for 5 million. On the floor, the number was reduced to 4 million. We would have taken 3 million in conference.

Senators may ask, "Why not take the House bill? It represents progress."

The fact is that the experience in minimum wage legislation is that this matter does not come to the floor of Congress except every 4 or 5 years. The last time was in 1955. Before that, it was 1949. Before that it was back in the 1930's. If we accepted the House bill, we could not come back in January and begin what is the long course of laborious, controversial work. Members of Congress would feel that they had disposed of the matter.

We have not disposed of the matter. The Members of the other body have not disposed of it. The Senate has an interest in the matter. We could not go to conference and say, "We will take the work of the House." The House bill represented the views of a very slim majority of the House. We would undo everything we sought to do as to definitions, which would face us in this field in the future in the courts.

Therefore, the correct position for us to take, when it was not possible to compromise the bills, was to say, "We will not take the House bill." If it is to be the House bill or nothing, then for us it will be nothing.

Mr. President, in my judgment this problem must be attacked again in January. If we cannot get a bill this year, we will get one next year. I can assure Senators that this matter, even though it is extremely difficult to consider in committee and on the floor, will be brought to the floor again. It is a matter which should be discussed in the coming months, so that the American people may make their judgment as to what they want in the field of minimum wages.

In this conference we see in microcosm the experience of Congress. The majority of the members of the House conference oppose any work but their work. That is their privilege. But it is also the privilege of the Senate conferees not to walk all the way over to the House and accept a bill which does not provide adequate protection; to accept a bill in the name of getting the form of a bill, but without substance.

Not one member of the minority conferees in the other body voted for any compromise. They did not even vote for the Eisenhower program.

There are some Democrats who do not agree with our program. They are entitled to their views.

However, to permit 100 percent opposition, with the exception of the Senator from Vermont [Mr. PROUTY], to defeat a proposal for a compromise drafted along the lines of the Eisenhower administration's program in the field of minimum wages, indicates, I believe, in great measure the difficulties we have had at this session.

I assure the Senate that it is a matter which will be discussed this fall; and if the members of the Democratic Party are successful, they will come back, with the support of a President and a Vice President in the field of minimum wages, not a position of opposition.

Mr. DIRKSEN. Mr. President, will the Senator from Massachusetts yield?

The PRESIDING OFFICER (Mr. WILLIAMS of New Jersey in the chair). Does the Senator from Massachusetts yield to the Senator from Illinois?

Mr. KENNEDY. I yield.

Mr. DIRKSEN. First, Mr. President, I salute my distinguished friend and associate on the committee, the Senator from Vermont [Mr. PROUTY]. He was by all odds, I believe, the most aggressive member of the conference. He offered five different proposals.

I think the distinguished Senator from Massachusetts has, generally speaking, stated the case reasonably well.

However, there are some things to be added. The one and only amendment to the bill that was adopted was offered by the House chairman himself, Representative BARDEN. It dealt with the so-called production area. I struck that out, when we considered the bill on the floor of the Senate, and offered it as a substitute. So, actually, under the House bill there was a coverage of 1,400,000 persons. That was agreed to. But beyond that, we agreed to exactly nothing.

Mr. KENNEDY. That was agreed to because a House error struck out 4 million from the coverage. That is why there was general agreement that that would not be wise action.

Mr. DIRKSEN. That cured that; and then they also cured the so-called production-area proposal, because under the original act, without the blooper in it, there would have been coverage of 700,000. But when that was corrected there was coverage of 1,400,000.

So, as the Senator from Massachusetts has said, the problem then went to the question of the wage.

I stated that not only did I believe the President would not accept the $1.25, but that the House conferees would not accept the $1.25, nor would they consider escalation, as such, for those not now covered.

It is no secret that I would not accept escalation. For the life of me, I cannot understand why there would be a desire to project a minimum wage 4 years into the future, not knowing what the state of the economy then would be. If it were done by legislative fiat, without a shred of evidence, I would regard it as irresponsible action on the part of the Congress. So then the difficulty over escalation was laid aside, knowing that we could not agree.

Then we came to grips with the five proposals offered by the distinguished Senator from Vermont [Mr. PROUTY]. He did strike out the so-called activities affecting commerce, and substituted, in the first amendment, the words "enterprise doing business in commerce to a substantial extent." Of course he kept the idea of interstate commerce, by providing for two or more establishments in two or more States.

But then there was an alternative proposal of "or a single establishment doing business within a single State where supplies move directly across State lines," or purchases to the extent of $1 million move across State lines. I thought I made my case out very clearly. I would not hang a dollar sign on the interstate commerce clause; and I am not prepared to do so now, under any circumstances. Unless this commerce is identified without the dollar sign, I believe the commerce clause would certainly go out of the window.

Then we had an alternative proposal—substantially the same, except in that case it referred to purchases of merchandise, materials, and so forth moving across State lines, on a $1 million basis. There, they used the words " 'employer engaged in commerce' means any employer with five or more establishments in two or more States or a single employer," under the criterion of the dollar sign, to determine whether he was in commerce.

The third proposal also used the words "employer engaged in commerce," and substituted them for "activities affecting commerce," on the basis of purchases that would amount to $1 million "that have moved across a State line."

So I made inquiry. Suppose I were doing business in the State of my distinguished compatriot, the Senator from Tennessee [Mr. GORE], and suppose I had an emporium in Knoxville. Suppose I bought all my merchandise from a jobber in Knoxville; and suppose the jobber got his merchandise from distributors in Nashville, Chattanooga, and Memphis. None of it actually went across State lines, as such; but it was manufactured beyond the State of Tennessee. Then the question would be, was that single employer in commerce? And the answer was, "Yes." Obviously I did not feel that I could accept that.

The distinguished Senator from Oregon offered an amendment to the Prouty amendment, and even made it more expansive, and included the words "that move directly or indirectly."

So, when we got through, the conferees rejected it.

Then we came to the next proposal; and there, instead of predicating it on the basis of purchases——

Mr. MORSE. Mr. President, will the Senator from Illinois yield briefly to me?

The PRESIDING OFFICER (Mr. MUSKIE in the chair). Does the Senator from Illinois yield to the Senator from Oregon?

Mr. DIRKSEN. I yield.

Mr. MORSE. Let the RECORD show that my amendment did not go to a vote, because the Senator from Vermont accepted it.

Mr. DIRKSEN. That is correct. It was a perfecting amendment; and that was also true of the change in the figure, in the one instance, from $2 million to $1,500,000.

So the committee did not have to vote upon that; but it was rejected.

Then came the next proposal; and there, instead of using purchases as a criterion, we used "annual gross sales of $1,500,000." I read the language to show the difficulty that a conferee will have:

> Any employer who derives $1,500,000 or more in annual gross sales—

Now listen, Mr. President:

> from activities depending on, or furthering, the movement or travel in commerce of persons or goods, or of communications, or otherwise requiring or enabling persons to engage in commerce, or in the production of goods for commerce.

I am frank to say that I do not know what that means, and I do not know how far it goes. I do not know what the enforcement and the administrative problems are; and under the circumstances I simply felt that I could not go along at all with that idea.

So there we were, with a House bill which was specific, definite, called for a minimum of $1.15 an hour, and did not have any escalation clause, but preserved the interstate feature. And if I must make candid confession, I would say that it could have been done on the basis of two establishments in two or more States, as well as five establishments. But in any event, the House bill preserved the interstate character of that act. So I can understand the attitude of the House conferees. After all, they have 437 Members with whom to deal, and they must go back and make their report. They voted on their bill. They had any number of bills over there. That was as much as they could get; and they did precisely what a conferee was expected to do under those circumstances, when representing the majority opinion of his body.

So, on that basis, it became quite obvious that yesterday afternoon the conference was making no progress, and probably would make no progress. And on that basis it was agreed by all present that we should take a recess, subject to the call of the two chairmen. And that ended the conference.

Mr. KENNEDY. I should like to make two points: First, in the House, the bill comparable to the bill the Senator offered, which was really the Senate bill, was defeated by only 11 votes. So there was not a large mandate by the House of Representatives in that connection.

Second, I would point out to the Members of the Senate that the conference committee was composed of four Democrats and three Republicans on the House side and four Democrats and three Republicans on the Senate side. On the Prouty amendments—on at least two out of the five—six out of the seven members of the Democratic Party voted for that compromise, which was the Eisenhower program. Six out of seven Members on the other side in both Houses voted against it.

Can anybody who has been in conference with the House and Senate say it has been possible to reach an agreement when one side or the other says, "It is our bill or nothing," and give not a single inch?

Mr. DIRKSEN. If my notes are correct—and I will have to depend on the distinguished counsel to the committee to advise me whether they are correct or not—when we considered the next to the last compromise, which I think was No. 4, in reference to the million and a half dollars in gross sales in activities moving or traveling in interstate commerce, my notes show the Senate conferees voted yeas 4, nays 3, and the House conferees voted yeas 2, nays 4.

Mr. KENNEDY. Can the Senator identify the amendment? Was that the Prouty amendment?

Mr. DIRKSEN. That was the Prouty amendment, No. 4.

Mr. KENNEDY. That carried in the Senate side.

Mr. DIRKSEN. I shall not mention the names of Senators.

Mr. KENNEDY. No, but the Senate side voted for the amendment.

Mr. DIRKSEN. One Senator on the majority side voted with the minority on it. So that adding them together, the yeas were six and the nays were seven.

Mr. KENNEDY. It is true that on one of the amendments three out of four on the majority side supported the amendment. On one of them they did not support it, but it still passed as the Senate position. But the Members on the other side voted against every amendment.

Mr. DIRKSEN. Yes, but when we get to considering a proposal which involves $1½ million or more in annual gross sales, the votes were yeas four, nays three, on the Senate side, and on the House side the yeas two, and the nays four. Representative LANDRUM was absent and did not vote. Had he been there, he certainly would have voted "nay" on the House side. Then we would have had a vote of eight against the amendment and six for the amendment.

Mr. KENNEDY. Would the Senator care to comment on another amendment which did not come out in quite that fashion?

Mr. DIRKSEN. I quite agree with the Senator's statement. I have no quarrel with it. So there we were in a state of disagreement. I had not capitulated or retreated from the position I fought for on the floor time and time again with respect to the interstate commerce concept, and I do not depart from it now. I asserted it at length, as my distinguished friend knows, with a great deal of vigor in the committee.

Mr. KENNEDY. And with effectiveness.

Mr. DIRKSEN. I hoped it would be effective, but it was not effective enough to persuade my Democratic colleagues to vote with me.

Mr. KENNEDY. But it goes beyond this bill, and it indicates the difficulty in conference of attempting to reach an agreement satisfactory to two parties, both committed to a minimum wage bill. Both parties are committed to the title of "minimum wage," and this matter is under that cloak. Both parties say they are for a minimum wage bill, but the differences are vast, and I think it is important that those differences are brought out. When the members of the public read that members of both parties and in both the House and Senate are committed to a minimum wage bill, and are committed to a health bill, and are committed to an education bill, I think they should know that when we get right down to what kind of bill should be passed, we go in two different directions. I think our experience indicates the differences we have and the difficulties we have in trying to get legislation of this type in this session.

Mr. DIRKSEN. When we consider the broad interests involved in the bill, the number of people who came before the committee to ventilate their views on the subject, the number of people who came, in season and out, to testify to individual Members of the House and the Senate of the impact of the bill, those facts simply mean it was an important piece of legislation; and the country can take hope and find rare assurance in the fact that Members of the Senate and the House, in the best of good grace, with forebearing spirit, but with steel-like conviction, can sit there, never lose their tempers, air their views, and still produce nothing.

Mr. KENNEDY. I have never heard a happier explanation of the philosophy of those who are opposed to the bill. I grant that the discussion was good natured, as it is today, but the differ-

ences are very important, and I think they go to the issue of what I consider to be a proper one as between the parties in the coming months. I think we should make this point, because otherwise the vocabulary is identical. The Senator from Illinois and I are both for minimum wage legislation.

Mr. DIRKSEN. That is correct.

Mr. KENNEDY. But the difference between the Senator from Illinois and the Senator from Massachusetts is as to what kind of a minimum wage bill it is essential to have.

Therefore, it does no good for us to pledge ourselves to the general principle and then have the American people ask, "When they are both for it, and the House and Senate are for it, why don't we get a minimum wage bill?" I think the experience in this conference will demonstrate to them why.

Mr. DIRKSEN. To me it is a tribute to the truth of the conclusion that when 10 or 12 or 15 around the conference table cannot agree, we should ask ourselves, are we going to impose some kind of disagreement upon millions of people and millions of enterprise operators in the country who would be subject to interpretation, to court rule, to determine what we had written, when we did not even know ourselves what we were trying to fabricate?

Mr. KENNEDY. No, but I say to the Senator that the reason why I am discussing this matter on the floor of the Senate today is that what is at stake is a most important principle, that when we talk about great pieces of social legislation, we have to talk about what we mean. In my judgment, the House bill did not represent progress and would have insured next year that there would have been no progress. Now it remains unfinished business for the Congress and for the country; and I just feel that the American people should reach a judgment. Do they want a minimum wage of $1.25? Do they want 5 or 6 or 7 million people in interstate commerce covered? The words "affecting commerce," which have been blown up so much, are in the Landrum-Griffin bill and in the Taft-Hartley Act. We did not invent that phrase. Those words are already in previous legislation supported by a good many Members of the House and the Senate who do not support the recently passed bill. We did not invent it. It is not new. This language appeared in the Taft-Hartley Act. We did not suddenly put the words "affecting commerce" in our bill. The people covered in that bill are already in interstate commerce under the Taft-Hartley Act and the Landrum-Griffin Act. The question is, should those people in interstate commerce be paid $1.25 an hour? That is what the American people should decide.

Mr. DIRKSEN. The answer to that is that we are considering a measure dealing with labor, and when Mr. Justice Hughes was still on the Supreme Court, in the Jones & Laughlin case he carefully circumscribed how far we could go in that language.

Mr. KENNEDY. That was in the 1930's.

Mr. DIRKSEN. I read that language into the RECORD, and I uttered it on the floor.

Mr. KENNEDY. What year was that?

Mr. DIRKSEN. I do not have the year.

Mr. KENNEDY. It was in 1937 or 1938. The Taft-Hartley Act used the words "affecting commerce." The Jones-Laughlin case was decided in 1937. The Taft-Hartley Act and the Landrum-Griffin Act overrode the words "affecting commerce."

The National Labor Relations Board has jurisdiction over all of these firms, in retail down to $500,000. Actually, the Board could cover firms at a figure lower than that, by its own admission. To use the argument as an argument against picking up a firm with $1½ million worth of business a year, which, it is said, should not pay $1.25 or even $1.15 an hour, I think is the issue, and that is what we ought to discuss.

Mr. DIRKSEN. Of course, the Senator brought in a bill with all of these complexities and strange definitions. I always refer back to the Scripture, to words uttered long ago in one of the letters of the Apostle Paul:

> So likewise ye, except ye utter by the tongue words easy to be understood, how shall it be known what is spoken?

We came along with the language. I wrestled with it. I did not know what it meant, after weeks in the committee. I did not know what its impact was going to be.

What about the little fellow on Main Street? What about the little business establishments all over the country?

Mr. KENNEDY. What about the persons working in those little business establishments which, under the Prouty amendment, had to make $1.5 million before those persons would be covered?

Mr. DIRKSEN. We had no understanding as to how far the second part of the amendment would really go. I said, "All right. I have to see this written out in the English language, integrated into the bill."

It never was integrated into the committee print. How could one tell, unless one referred back and wrote it in? We never got around to that. These were all mimeographed suggestions, not in legislative language. They were suggestions for a possible approach. We never got beyond that point.

Mr. KENNEDY. We never did.

Mr. DIRKSEN. So it is a testimony to the fact. I say it is an assurance to the country that when we cannot agree upon what language means, we trust the day will never come when we are going to inflict those prolixities upon the American people, and particularly upon the little people who my distinguished friend knows very well cannot go out and retain expensive counsel. They are not like the United States Steel Corp. They are not like the packers. They are not like the big corporations in Pittsburgh, or in Boston, or in New York, or elsewhere.

We are dealing with the little people. They come running to their Senators and their Representatives in Congress and say, "What does this mean? What does it do to me?" Perhaps they will come after the hot breath of the sheriff is rolling down their backbones. [Laughter.]

I am not willing to inflict those uncertainties upon the people of this country. If anybody is to blame for failure here, I think it is a collective failure, with particular emphasis upon those who sponsored the bill in the first place, with these prolix definitions, which not even a Philadelphia lawyer can piece out. [Laughter.]

My friend, the Senator from Philadelphia [Mr. CLARK], has such versatility that I make an exception for him. He can piece out anything. [Laughter.]

That is where we stand. I am not unhappy about the fact that we did not put something on the statute books which would fall with great weight on and be an onerous burden on a great many people before we get through. I am not unhappy, when I can go back home to have somebody ask me, "What did you write into the act? How am I affected?" and not have to stand on the main street of my town and say, "I do not know what we did to you." [Laughter.]

Mr. PROUTY. Mr. President, will the Senator yield?

Mr. MORSE. Mr. President, will the Senator yield?

Mr. DIRKSEN. I thank my distinguished friend from Massachusetts for yielding to me.

Mr. PROUTY. Mr. President, will the Senator yield to me?

Mr. KENNEDY. Yes. I had finished my statement. I think I said I would yield to the Senator from Vermont, and then I shall be prepared to yield to the Senator from Oregon. Then I shall yield the floor, because I have finished my statement, unless Senators wish to address questions to me.

Mr. PROUTY. I should like to ask the distinguished Senator a question.

Mr. KENNEDY. Very well.

Mr. PROUTY. First, I wish to express my appreciation to the Senator and to the distinguished Senator from Oregon and to the distinguished minority leader for the very kind references made to me a few minutes ago. I appreciate those statements.

I wish to point out, Mr. President—and I think the distinguished Senator from Massachusetts will agree—that I made a very sincere effort to come up with a compromise approach at one time or another which would be acceptable to both groups.

The amendments which I offered and the statement which I made on the floor last night appear in yesterday's RECORD, starting at page 18350, so I shall not take time to discuss that in any detail.

I wish to point out to the distinguished junior Senator from Massachusetts that the real nub of the problem as between the two groups, I think, was in regard to the "activity affecting commerce" concept. The House conferees, I think, were adamant on that question. Certainly many Members of the Senate and many Members of the House were very much in doubt as to what the language meant.

In order to clarify the situation somewhat, in my first amendment, I substituted for the words "affecting commerce" the term "enterprise doing business in commerce to a substantial extent."

The basis for the amendment, or the primary objective of the amendment, was to develop an inflow test of a million dollars. In other words, goods flowing into a State from another State to a jobber or a wholesaler would be considered to be in interstate commerce, but if the goods were sold to other retailers in the State the goods would not be considered to be in interstate commerce.

I point out, first, that under the amendment 3.1 million newly covered employees would have been brought into the picture at a wage of $1.05 for the newly covered for the first year, $1.10 for the second year, and $1.15 for the third year. Of course, the presently covered workers would have received $1.15 immediately.

That seemed to me to represent progress. It seemed to me that was one way of bringing the House conferees closer to the point of view held by the majority of the Senate conferees.

Mr. President, I am sure the Senator from Massachusetts will agree that the amendment was voted down by the Senate conferees. The House conferees never had an opportunity to vote on that amendment. I think if the Senate conferees had agreed—had the Senator and the other Senate conferees approved the amendment—perhaps we would have been able to work out a compromise from that origin. I think that would have been a start.

The same was true with respect to the second amendment, which would have brought coverage to 3.1 million new employees. It seemed to me that was worth fighting for a little bit harder than some of us did.

I conclude by saying that the last amendment——

Mr. KENNEDY. We did accept that amendment, did we not?

Mr. PROUTY. Not the second one.

Mr. KENNEDY. The second one.

Mr. PROUTY. I think not. No. The second amendment contained the words "directly across State lines."

Mr. KENNEDY. After that was changed, we accepted the third amendment.

Mr. PROUTY. The third amendment was accepted.

The fifth amendment——

Mr. KENNEDY. We accepted the fourth amendment, did we not? Is that not correct?

Mr. PROUTY. That is correct; but the House conferees turned it down.

I wish to point out that in the fifth amendment we proposed to cover only employees actually engaged in interstate commerce, and I regret to say that was turned down by the Senate conferees. That would have brought under coverage about 2,840,000 people who are not now covered, at a definite increased wage.

I felt, Mr. President, that it would have been better if someone on the Senate side had proposed amendments to the House bill, in order that we might start amending that bill. I think, if we had done so, that we might very well have come up with a compromise bill which would have brought 2 million or perhaps 2½ million newly covered workers into the field, with consequent increases in their wage scales.

Mr. KENNEDY. As the Senator pointed out, we did accept at least two of his amendments, and there was no evidence that the House was prepared to accept either one of those, or the other, was there?

Mr. PROUTY. As to the first two amendments, the House conferees had no opportunity.

Mr. KENNEDY. When the House conferees did have an opportunity, did they accept the amendment? Can the Senator say to the Senate there was an indication that the House was prepared to accept different language from that in the House bill? Did the House conferees offer any amendment on this subject?

Mr. PROUTY. They offered no amendment, but in the case of the first two amendments, they had no opportunity to do so. I feel that we could have come up with a bill that perhaps would not have been what the Senator from Massachusetts wanted. It perhaps would not have been what the junior Senator from Vermont wanted. But we would have had a bill, and we should have had a bill, if there were a little more give and take on both sides.

Mr. KENNEDY. Let us get the record accurate. Did the House conferees ever suggest an amendment to the House bill?

Mr. PROUTY. I think they were waiting. If we had been able to resolve this concept, I think it is highly possible—I do not say this categorically, of course—I think it is entirely possible that we might have made some effort to reach eventually some agreement with the House. But inasmuch as the Senate conferees refused to consider any basic change in that concept, the House I think remained adamant. There was no need of trying to make any suggestions as long as that concept remained in the minds of the majority of the Senate conferees.

Mr. KENNEDY. I do not wish to get into an argument with the Senator from Vermont. We did accept two of his amendments. The House conferees rejected both of them. I believe the Senator has stated that the House did not favor any amendment to their bill on any occasion. The members of the conferees from the House on several occasions had said that it was the House bill or no bill. That was their view. They are entitled to that position, but I would be reluctant to see a suggestion made that the House conferees were prepared to compromise the two bills.

Mr. PROUTY. I said if either of my first two amendments had been accepted by the Senate conferees, I thought there was a possibility. I do not pretend to say that the House conferees would have accepted them. I think, however, that would have been a point from which we perhaps could have made progress.

Mr. KENNEDY. Did the House conferees every say that? Did any member of the majority of the House Members say that he would accept the amendments?

Mr. PROUTY. The amendments certainly were in line with their concept.

Mr. KENNEDY. Did they ever say that they would accept them? Did they indicate any favorable support for the amendments of the Senator from Vermont?

Mr. PROUTY. They had no opportunity to vote.

Mr. KENNEDY. Did they indicate favorably their view in any view that was held on those two amendments? I assure the Senator they did not.

Mr. PROUTY. I do not know what their reaction was. They were waiting to see what we did on our side. I think agreement on either of those amendments, or the fifth amendment, which brought employees working in interstate commerce under the act, might have resulted in real progress. I feel it would have been much better to have had a law which would have helped millions of American workers than to put this bill off for heaven knows how long and give the workers absolutely nothing. I am very sad about that particular aspect. I am sorry we did not stay at the job a little longer and see if we could not work out a reasonable compromise. I tried hard. I think the Senator from Massachusetts tried very hard to bring about a compromise. But I think we could have stayed at the job a little bit longer and perhaps achieved a worthwhile result.

Mr. MORSE. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield to the Senator from Oregon, and then I shall yield the floor.

Mr. MORSE. I wish to speak very briefly on the subject of the conference on the minimum wage bill. It was my privilege and honor to be associated with the Senator from Massachusetts [Mr. KENNEDY] as a coauthor of the bill when it was introduced in the Senate. I rise now to commend highly the leadership of the Senator from Massachusetts [Mr. KENNEDY] in his handling of this very important issue from the very beginning of the consideration of it by the Senate Labor Committee, through the last moment of the conference yesterday.

I do not know how a chairman of a subcommittee—that had jurisdiction over this bill, of which Mr. KENNEDY was on the Senate side—could have worked harder or done a better job than he did in processing that bill through the subcommittee hearings in the Senate and then through consideration of the bill by the full committee of the Senate, and then on the floor of the Senate as we debated it here.

He did another magnificent job of handling the bill in conference in recent days where it has been under consideration.

He can close his ears for a moment while I make this personal reference, because I know him to be a modest man, and I am going to speak briefly about his modesty. He has been exceedingly modest in the report that he has made to the Senate this afternoon, and in making that report I think he has omitted, because of his modesty, one

very important event that occurred in that conference, which, in my judgment is a complete answer to my good friend the Senator from Vermont [Mr. PROUTY] when he indicates that maybe something more could have been done than was done.

The Senator from Vermont has talked about our defeat of his first two amendments. Of course, we defeated them because on their merits they were unsound amendments. He did not get a single Republican on either side to support him in those amendments, and we on the Democratic side also recognized their inherent defect.

But when the Senator from Vermont came along with a couple of amendments that we thought were sound in principle, and with the modifications that he agreed to in regard to those amendments, we supported them. Again the Senator from Vermont failed to produce a Republican vote on either side of that conference table in support of his position.

Even the Senator from Massachusetts had pointed out that the basic principle of those amendments was the same principle that the Secretary of Labor, Mr. Mitchell, representing the President of the United States, testified in support of when he appeared before the Senate Labor Committee.

But the event that I wish to refer to that has not been mentioned in this discussion so far is that on two occasions the Senator from Massachusetts literally polled the House conferees and asked them whether or not they were prepared to make any proposal over and above the House bill. He went down the line, and each time he got the reply that they had no proposal to make.

I do not know what more the chairman could have done to try to elicit from the House conferees their cooperation, their proposals for compromise, than he did. We were up against a stone wall, so to speak. Except for two Democrats on the House side, we were up against a group of men who made it perfectly clear they were not going to favor any compromise. There were two Democrats on the House side who were willing to go along with a compromise of the House bill, but that was not true of any other House conferee.

I do not want the RECORD this afternoon to close with the innuendo or the impression that I fear might be left by the statement made by the Senator from Vermont [Mr. PROUTY] that the Senator from Massachusetts could have done anything in addition to what he did. We did the best we could to try to reconcile our differences and support those Prouty amendments that we thought were deserving of support.

In our behalf, the chairman pleaded with the House conferees to offer proposals for modification of the House bill, and they adamantly refused, save and accept the two of the Democrats on the House side who supported the Democrats on the Senate side in regard to the Prouty amendments, for which we did vote, and our other suggestions for modifications of the House bill.

The Senator from Massachusetts pointed out that the House bill adopted by a majority over in the House of about 11 votes. We were advised in conference that on that particular day there was a large absenteeism in the House, and it was the view of some of our House conferees that had it not been for that large absenteeism, the House bill might not have passed in the form in which it passed. That is speculation, of course, but the important point is that the vote in the House was very close, even on the House bill. The vote in the Senate represented a large majority support of the Senate bill.

The Senator from Massachusetts has pointed out that at the conference, when there was talk about what would happen if we took something back to the House, the House conferees who were opposed to us in conference tried to convince us that the House had spoken its final word. Some of the Democrats pointed out that they would like to see the House have another chance to vote on it, and would like to take some of the proposals of the Senator from Massachusetts back to the House. Furthermore, let us keep in mind that the parliamentary situation in the House which produced the House bill was quite different from the free and open debate, with the power of amendment, that exists on the floor of the Senate. As the House conferees pointed out to us, if they had not been handicapped by the rules of the House, it is quite possible that the House would have had an opportunity to vote on an entirely different bill than the bill that they were limited to vote on, because of the restrictive nature of the House rules.

So we were in conference with a group of men who were supporting a bill which we had good reason to doubt represented the majority will of the House, and different from the bill they would have voted if they had had a free and open opportunity to vote, or at least the kind of bill that some of the House conferees would have liked to have had an opportunity to vote on.

Some House conferees told us they were satisfied that if we could get some of the suggestions of the Senator from Massachusetts back to the House, the chances were that the action of the House, with a full attendance, would have been very much different than the action of the House when the House bill was adopted in the first place.

I am sure my friend from Vermont knows how appreciative I am of his friendship and of our association together on labor legislation, on this bill and on others also, when we have tried to work out a conscionable compromise. However, I completely disagree with the impression that his recent remarks on the floor of the Senate may have left, namely, that there was something more that could have been done.

In my judgment, the only additional thing that could have been done by staying in conference, would have been to waste more time, and we do not have any time to waste in these closing hours of the session. It was perfectly clear from the position that those across the table from us took in conference, and from the position that they took in personal conversations, that there was no intention on the part of the majority of the House conferees to change one whit the House bill: it was a take-it-or-leave-it attitude on the part of the majority of the House conferees.

Mr. KENNEDY. Mr. President, will the Senator yield at that point?

Mr. MORSE. I yield.

Mr. KENNEDY. I merely wish to point out that the Kitchin-Ayers bill, as opposed to the Roosevelt bill, passed the House by a vote of 211 to 203.

Mr. MORSE. Senators know how one of these conferences is conducted, but the public does not, and the present debate, if it is read in cold print might fail to tell the full story of the leadership of the Senator from Massachusetts.

In personal conferences with conferees on both sides of the table, the Senator from Massachusetts went about buttonholing conferees, in this corner of the room, in that corner of the room, in the middle of the room, in the rear of the rostrum, and all over the room. He was trying to find out from each of the conferees what his position was on various proposals which had been offered or were about to be offered.

There were individual conferences between the Senator from Massachusetts and other members of the conference, and there were group conferences. Time and time again the Senator from Massachusetts was seen by all of us conferring, one after another, with individual conferees and then with groups of conferees. That was true also of each of the other conferees. We did our best. I give the Senate my word that as their conferee, individually and collectively we did our best to try to work out a conscionable compromise on this matter.

The Senator from Massachusetts [Mr. KENNEDY], the Senator from Michigan [Mr. MCNAMARA], and the Senator from West Virginia [Mr. RANDOLPH] are my witnesses to the discussions they had with me trying to get me to change my position in regard to the concept of "affecting commerce." As the Senator from Massachusetts knows, I think it is a vital concept in this field of legislation. The Senator from Massachusetts has ponted out it is contained in the Taft-Hartley Act of 1947. It is in the 1959 Labor Relations Act. It is included also in court decisions. The clause "affecting commerce" is vital, legal interpretation of legislation in this field.

The Senator from Massachusetts and my colleagues know that I yielded reluctantly to any modification of the definition of "affecting commerce." I yielded only because I was satisfied that the language "employer in commerce" would be subject to the same interpretation. I reached the conclusion that the so-called "or" section, which provided for a million or a million and a half or 2 million—we had those three versions—either of goods and supplies purchased and brought across State lines or goods sold within a State, as an alternative, would come under the definition; and I acceded, as the Senator from Massachusetts can testify, to going along with the Prouty amendment, for which I did vote.

I am glad that the Senator from Massachusetts has pointed out the discussions we had in committee on the "affecting commerce" clause. When we

come to grips with the problem again in the next session of Congress I shall once more do what I can to have included in the legislation the "affecting commerce" clause. After a discussion of this subject matter in the months ahead, we will find more and more support for that point of view, both in the Senate and in the House.

With all credit to the Senator from Massachusetts, I wish to say to the interested groups of workers and employers that the language which the Senator from Massachusetts suggested we go along with and that we did go along with would have had the same effect, in my judgment, when it got into court as the language in the Senate bill using the phrase "affecting commerce." The precedents are pretty well settled in the U.S. Supreme Court, and the language of the Prouty amendment would have been subject to the same interpretation.

I close by saying that the Senator from Massachusetts has my pledge, come next session of Congress, no matter in what capacity he sits, that I will do everything I can as a member of the Committee on Labor and Public Welfare to have legislation passed which will give to the workers in interstate commerce the protection to which they are entitled.

The Senator from Illinois [Mr. DIRKSEN] knew very well there was no confusion as to the meaning of the legal terms we sought to write into law. It was because he was opposed to the meaning that he fought us in committee, fought us on the floor of the Senate, and fought us in conference. The Senator from Illinois knows that the Senator from Massachusetts and his colleagues on the Democratic side were seeking to guarantee the full application of the commerce clause of the Constitution to all workers in America as rapidly as we could protect them, and that they ought to be covered.

Certainly there was the issue of coverage, but there was far more than the issue of coverage; there was the issue of giving support to the interstate commerce clause of the Constitution as interpreted and applied by the U.S. Supreme Court.

Furthermore, there was the issue, as referred to by the Senator from Massachusetts, of trying to make certain that workers in interstate commerce receive a decent minimum wage. The opposition, headed by the Senator from Illinois [Mr. DIRKSEN], was opposed to assuring that the many thousands of workers in the so-called small establishments doing a business of $1 million or more got that coverage and received that wage.

So the issue before the American people in the months ahead is clear: Whether they want to follow the reactionary economic philosophy of the Republicans who have fought the minimum wage coverage and fought a decent wage, or whether they want to follow the forward-looking, progressive, economic philosophy of the Senator from Massachusetts, whereby he seeks to make certain that all workers in interstate commerce, falling under the definition of the bill passed by the Senate, will receive a decent, fair minimum wage.

That is the issue. I am ready to join with the Senator from Massachusetts in taking it to the people of the country, from platform to platform, from coast to coast.

Mr. KENNEDY. Mr. President, I express my thanks to the Senator from Oregon for his statement. I agree wholeheartedly with his views.

I now yield to the Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I shall not be repetitious in presenting either the facts or the figures which have been discussed by the Senator from Massachusetts [Mr. KENNEDY]. I shall confine my references to three or four points which I believe are pertinent to the discussion.

In the first instance, I embrace wholeheartedly the eloquent tribute expressed by the diligent and devoted Senator from Oregon [Mr. MORSE] concerning the work of the Senator from Massachusetts and his effort within the conference. Negotiating with good conscience and determination, he sought to bring forth, if possible, a measure intended to be of assistance to those men and women of the country who, in large degree, need the benefit of better wage and hour conditions.

I believe it is important for me, as a conferee and as a member of the Subcommittee on Labor of the Committee on Labor and Public Welfare, to add to the admirably expressed tribute by the senior Senator from Oregon.

The well informed and effective Senator from Massachusetts was calm in our deliberations. He acted in good faith in the discussions. But, more important, the Senator was correct, in my opinion, in the positions which he stated again and again, as we advocated possible areas of solution and of compromise.

Mr. President, approximately 24 million workers in the United States are now covered by the provisions of the Fair Labor Standards Act, the original act of 1938, and amended from time to time. But approximately 20 million workers in this country are not now covered by the provisions of the wage and hour law.

Perhaps it is appropriate that we think again in terms of what a $1.25 per hour minimum would mean. It has been charged by some Members of this body that to raise the present minimum wage from $1 to $1.25 by steps over a period of 3 years would be inflationary.

I stand alongside those who believe there are real reasons why the present economy, the current gross national productivity, and the development which have taken place in our system of commerce and industry make the $1.25 per hour minimum a realistic figure.

In the measure reported to the Senate by the Committee on Labor and Public Welfare, before exemption amendments offered in this Chamber were adopted, its provisions were estimated to increase wage costs less than 1 percent of every payroll dollar in the United States, or an amount that would be only slightly more than one-half of 1 percent of the gross national product of this country. Certainly this should not cause dislocation of our economy or create any dangerous degree of inflation. I believe these to be valid and important viewpoints.

At times the genius of this body, whether on the floor or in conference, is at work when men of good intention and of good will confer in desire to adjust and compromise their varying viewpoints. As a Senator who will be in the battle for reelection in the coming weeks, I shall count it a privilege to stand by the position which was taken within the conference by the majority representatives of the Senate, a position, in most instances, of complete unanimity among the Democratic Senate conferees.

What did the Senator from Massachusetts and other Senators of the majority party attempt to do? We sought to bring out a reasonable bill—in fact, a moderate bill—because already we had, in the Senate, written in the exemptions which were to take care of the problems of Main Streets, of which the minority leader speaks. Frankly, we were aware of the hardship cases. We were cognizant of the emergency problems. We recognized the plight of many of the segments of small business; and that recognition was spelled out in the exemptions in the legislation as it was passed by the Senate.

I hope I am not misunderstood. I again make reference to the Main Streets of the Nation. I believe that in our considerations, as we expressed them in conference, we were conscious of the problems of Main Street. But we did not forget that there is an approach by some people in this country which is influenced by a Wall Street. I draw no inference beyond pointing out that there are honest differences of opinion in the Senate. They were debated. A bill was passed, and then we attempted to compromise and draft a conference report which, hopefully, could receive the endorsement of both the Senate and House conferees.

I am impressed by the quotations from Scripture on the part of my cherished friend, the minority leader. Now, I should like to recall an old poem. I shall not recite all of it. The sense of its theme calls on the individual to dedicate himself to the cause that lacks assistance, to the wrong that needs resistance, to the future in the distance, and the good that he can do.

So a job remains to be done. An issue has been joined. I shall stand, during this campaign, alongside our party's gallant and gifted fighter as he moves toward a new frontier in 1961, a frontier which recognizes not only our opportunity—we have had that—but our responsibility as well. We must fulfill that responsibility in the months ahead.

Mr. KENNEDY. Mr. President, I express my appreciation to the distinguished Senator from West Virginia, who was a member of the committee which wrote the first minimum wage act in 1938.

Mr. President, I now yield to the Senator from Tennessee.

Mr. GORE. Mr. President, I have not voted on every question exactly as has the junior Senator from Massachusetts [Mr. KENNEDY] during this 4-week session. And while I have an opportunity to do so, I wish to advise my distinguished colleague that it just might not

be possible for me always to cast my vote in accordance with his wishes during the ensuing 8 years.

But that aside, let me say that I have watched the junior Senator from Massachusetts wage a gallant battle. Success has not always crowned his efforts—as is the case with the minimum wage bill, which now lies prostrate on the Senate floor. But, I repeat, he has waged a gallant battle in the right direction. I have watched him and listened to him wage a determined fight for progress, and against reaction. For instance, I watched him engage in extended debate with the able and forceful junior Senator from Arizona [Mr. GOLDWATER], who frankly said that he would vote to repeal the present minimum wage law. I do not say that in criticism of the distinguished junior Senator from Arizona; that is his position, and he is, undoubtedly, proud of it.

I watched the Senator from Massachusetts wage an extended fight with the able and powerful Republican leader, the senior Senator from Illinois [Mr. DIRKSEN], who only a few moments ago said that he was not unhappy that we had not passed a bill to raise the minimum wage. I dare say the junior Senator from Massachusetts, conversely, is unhappy that we have not succeeded.

He has told us of his battle with the distinguished Representative BARDEN, who upon this issue as well as upon other issues has demonstrated an unyielding determination.

For whom has the junior Senator from Massachusetts been fighting? He has been fighting to raise the wages of the millions of workers, many of whom have families, who are earning less than $50 a week. He has been fighting for the passage of an adequate medical-care bill, to give aid to the elderly who are in pain and want, and who need the strong and comforting hand of the Government to aid them with medical care and hospitalization.

Mr. KENNEDY. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. KENNEDY. I think the point the Senator from Tennessee is making is a most important one, in attempting to give an answer to those who say the Democrats control the House and control the Senate, and that inasmuch as they control both Houses of Congress, why do they not pass all the bills to which they are committed? That challenge has been put to us.

The point the Senator from Tennessee is making is a point I wish to emphasize. If a President of the United States says, through his deputy, through those who speak for him in this body, "If you pass a medical care bill tied to social security, I will veto the whole bill, including the social security part and all the rest of it," and if the Senate conferees and the Senate are told, "If you pass a bill, in line with the platform to which you are committed, calling for a minimum wage of $1.25, I will veto the bill," then obviously the Congress has no alternative but either to enact no bill at all or to pass a bill in line with the Republican platform or with what the President calls for. That is the point.

Under those circumstances, it makes but little practical difference whether one's party has a majority in the House and in the Senate day after day and year after year. Many persons underrate the importance of the President of the United States, who has said, "Give me one-third plus one in either body." That is all he needs; then he can prevent the enactment of any piece of legislation, regardless of how much we fight for it. That is the point.

This Congress has been most illuminating to me; and I believe that what I am saying is correct: that regardless of our majority, so great is the constitutional power of the President of the United States to prevent the taking of action by the Congress, that even though we pass every bill to which we are committed in our platform, the President of the United States can veto it, and it will not become law, because one-third of the Members of the House and one-third of the Members of the Senate, plus several, are opposed to those bills.

Therefore, I say to the Senate that there are some Members of the House and there are some Members of the Senate on my own side who want to make some progress, and who supported the Kerr bill, and who, in my judgment, would have supported our proposal, offered by the Senator from New Mexico [Mr. ANDERSON], the Senator from Tennessee [Mr. GORE], myself, and others, but who said to me, "How can we vote for the amendment, if the President will veto the bill if the amendment is added to it?" Therefore, they voted against it. In my judgment, they did so because of the extraordinary power the Constitution gives the President. If the President is in favor of such a program, it will be enacted by the Democratic majorities. But if the President of the United States in January 1961, is opposed to a $1.25 minimum wage and is opposed to the provision of medical care tied to the social security program, then I do not care what may be the Democratic majority in the House or the Democratic majority in the Senate; in any event, they will not be enacted into law.

Mr. GORE. Mr. President, with that statement I agree, and I call upon my Democratic colleagues in the House and in the Senate to go with JACK KENNEDY to the people and obtain from them a verdict and a mandate. We will return here, and when we have the assistance—not the resistance—of the President and the Vice President, this country will move in the paths of progress.

Mr. DIRKSEN. Mr. President, will my friend yield to me?

Mr. GORE. I gladly yield.

Mr. DIRKSEN. I think that my distinguished friend, the Senator from Massachusetts, is giving us a new slant on arithmetic. If we are to resolve this issue on the basis of an equation such as the one he has stated, one-third plus one does not leave 66⅔ percent; and the other side has 66⅔ percent of this body, and nearly that percentage in the other body.

He does not give us credit for two things: First, a sound Republican program; second, the cohesive, energizing force that we put behind our sound program.

So we march under a common banner and with a common purpose. And if in that respect we succeed, we are very happy, even though we have only one soldier on the line for every two that the other side has.

Mr. KENNEDY. The Senator from Illinois knows that, even given the numbers that we have, the other side has sufficient Members in the two Houses to prevent the taking of action. But it is quite obvious that we do not have total unanimity on our side for every program. That statement does not come as a shock or surprise to the Senator from Illinois, I am sure.

A majority of the Republican Members of the Senate voted not only for a minimum wage of $1.15 but also for a minimum wage of $1.25, even though the President said he would veto it.

So there is no doubt that there is some split in both parties.

But when at least two-thirds to three-fourths on our side favor the program of a $1.25 minimum wage and the program for social security, and the other programs, and when two-thirds of the members on the minority side are opposed to them, the President, with his great constitutional power, and in view of the division existing in the House and the Senate, is able to make mincemeat of us, and can do it every time. We can prevent him from getting the programs he wants, but he can prevent the Congress from getting the programs it wants. So if the American people do not want action, they should continue the present division in the Government.

Mr. DIRKSEN. Mr. President, I wish to say to my friend that I do not want to make mincemeat out of him. I want to keep him right here, 16 blocks removed from the White House. [Laughter.]

Mr. KENNEDY. The Senator from Illinois is very generous.

Mr. MORSE. Mr. President, if the Senator will yield to me, I think this is a very appropriate time for me to comment on an article to which I wish to call attention. It appeared in the July 26 issue of the Wall Street Journal, which, of course, is the journal of the financial interests of the country, insofar as the expression of a viewpoint is concerned.

This particular article was written by one of the most highly respected journalists in our country, Mr. Alan L. Otten. The headline reads:

GOP Strategy—Party Aims To Show Up KENNEDY on Key Issues in Congress Session—Leaders To Split Democrats With Civil Rights Measure, Press Foreign Program—Traps Laid for Other Bills.

That is the headline of the article.

Then it goes on to show that the strategy of the GOP was to prevent successful conferences on bills—and we have had a pretty good example of that, in my judgment, in regard to the minimum wage bill.

I read a paragraph or two from the article:

Their scheme is risky but potentially rewarding. It calls for unobtrusive obstructionism against the barrage of measures the Kennedy-Johnson team is expected to throw at them.

Later the article says:

The GOP strategy could founder on either side of a narrow channel. Obstructionism could become too obvious, and present the Democrats with a new campaign issue. Or it could fail to halt "liberal" legislation, and lead to a series of politically risky vetoes.

Mr. President, I ask unanimous consent to have the entire article printed at this point in the RECORD, because it makes no reference to any individual Member of Congress, which would be in violation of the rule.

Mr. DIRKSEN. Mr. President, reserving the right to object, and only for the purpose of intruding an observation——

Mr. MORSE. I am always delighted to have the observation of the Senator from Illinois.

Mr. DIRKSEN. One of the faithful brethren on this side must have uttered something to that effect in talking about destruction without letting it appear to be destruction. It runs in my mind that a former Secretary of State said perhaps we ought to let Korea fall, but not let it appear that way. We are supposed to take the result of the "push." I am always glad to do it, because, as my friend from Oregon knows, I have never, in the whole course of debate, on the Senate floor or in conference, ever departed from what I thought was the rock of principle. For 4 solid hours the Senator and I discussed this matter up and down the Chamber, and I did not persuade him, and he did not persuade me. But I must say for him that he has been the most persistent and illogically logical person I ever saw. [Laughter.] He persists consistently in error and makes no bones about the fact that he would like to obliterate the commerce clause of the Constitution, even for the little home industries, by bringing them within the purview of the wage and hour law.

Mr. KENNEDY. Mr. President, if the Senator will yield, I must say the reaction of the Senator is to take us back to Korea, and he takes us back 8 years. His instantaneous response and reaction indicate to me how effective he is going to be on the stump this fall. No matter what question or issue is brought up, there is going to be an allusion to some mysterious person in the past who wanted to give Korea away—as if that had any point to what the Senator from Oregon said. [Laughter.]

Mr. DIRKSEN. Somewhere it is written that we shall be judged not so much by our sins of commission but of omission. So we will read the Good Book with all charity, with not a taint of malice, and with all forbearance, and we will say, "Ye did it not."

Mr. MORSE. Let me say to the Senator from Illinois that I have never associated with a more delightful and enjoyable obstructionist—and I say it good naturedly—than the Senator from Illinois. He does it so sweetly, but the end result is the same—nothing in the public interest in regard to legislation such as the minimum wage bill.

It is true that for 4 hours—and more—the Senator from Illinois and others on the committee have been engaged in minimum wage discussion, but the end result is clear. One can call it what he wants to, but I think it meets pretty well the analysis of the article by Mr. Otten, because "by their fruits ye shall know them," and by the result of the parliamentary strategy we have had no legislation in this field, and in other fields.

The Senator from Illinois mentioned Korea. I am surprised he did not say anything about the loss in China. But we do not hear any Republican talk about what happened in Cuba, or Laos, or Africa, or any other part of the world in which the foreign policy of the Eisenhower administration has completely failed, and as a result of which we have reached in many, many parts of the world the lowest ebb of American prestige.

Mr. EASTLAND. Mr. President, will the Senator yield for a question?

Mr. MORSE. I yield for a question.

Mr. EASTLAND. I should like to ask the distinguished Senator if he knew that an American Ambassador, a very distinguished gentleman and a great Republican, who was in Havana when Castro came to power, on yesterday went into detail, step by step, how the Republican State Department overthrew Batista and installed Castro as the dictator of Cuba, doing it when they knew he was a Marxist, and that he was a Marxist in the mildest manner of terms, and that they had information he carried a gun when he was a student in college, that he was a killer, that at Bogotá he assassinated a priest and two nuns? This plan, relating to an island adjacent to the shores of our country, was hatched on the fourth floor, and on the fifth floor the Secretary of State did not know what was happening on the fourth floor. That information is going to be made available to all the people of this country.

Mr. MORSE. I am not familiar with that information. I shall read it with great interest.

Mr. President, has my unanimous-consent request been ruled upon?

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oregon to have an article printed?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, July 26, 1960]

GOP STRATEGY—PARTY AIMS TO SHOW UP KENNEDY ON KEY ISSUES IN CONGRESS SESSION—LEADERS TO SPLIT DEMOCRATS WITH CIVIL RIGHTS MEASURE, PRESS FOREIGN PROGRAM—TRAPS LAID FOR OTHER BILLS

(By Alan L. Otten)

CHICAGO.—The activist appearance of Nixon-Rockefeller platform policy will get its first real workout in the superpolitical August session of Congress—with GOP tacticians launching legislative assaults calculated to show that supposed Democratic vigor on civil rights is actual impotence, and to demonstrate that supposed Republican weakness on foreign policy is actual strength.

This will make headlines, but the Republican leaders intend to keep invisible an equally important part of the strategy—subtle sabotage of some crucial Kennedy-Johnson drives for liberal legislation.

And they are counting on President Eisenhower, who makes his official farewell at the convention today, to be a good party soldier and contribute all his firepower to next month's campaign on Capitol Hill.

Their scheme is risky but potentially rewarding. It calls for unobtrusive obstructionism against the barrage of measures the Kennedy-Johnson team is expected to throw at them.

CAMPAIGN AMMUNITION

The idea is to keep the Democrats from assembling a record thay can shout about to the voters—and yet to avoid a string of Presidential vetoes that might give the Democrats campaign ammunition. Typical tactics: dragging out hearings, bottling up bills in committee, blocking Senate-House conferences that often must precede final action.

It might seem embarrassment could come to the GOP from conflict between this foot-dragging portion of their doubledeck congressional plan and the let's-get-going tone trumpeted by the Dick-Rocky preconvention proclamation. And that could happen. But the danger is minimized because some of the activist ideas expressed in New York, such as creation of a batch of international confederations around the globe, are just not the sort of thing this session is supposed to get around to.

And the document, contrariwise, didn't get around to endorsing some of the things liberal Democrats want to put through this Congress, such as subsidies for schoolteachers. And some of the bugle calls were noise which will mean nothing to this Congress. The fanfare for passing out medical subsidies to old folks, for instance, leaves Mr. Rockefeller still favoring the Democratic technique for doing so—but Mr. NIXON and his congressional crew still are equally free to sabotage this and shout instead for quick action on their alternative scheme which the Democrats have blocked.

WHAT CAN ROCKEFELLER DO?

While Governor Rockefeller might not care for the idea of obstructionism, there's little he can say or do about it. The strategy is essentially an Eisenhower-Nixon product, concocted before the dramatic New York confrontation between the Governor and the Vice President. And it's little changed by the agreement.

But on some other legislative items, Candidate NIXON and the administration will move to seize the initiative from the Democrats in the special session. At a press conference here yesterday, Mr. NIXON made it clear that the administration will demand August action on past civil rights proposals not yet enacted; one added possibility, he indicated, would be a new version of an old plan to give the Attorney General power to sue to protect civil rights in all fields, including housing, jobs, and schools—rather than just voting rights. Thus the GOP will try to call the Democrats' bluff on civil rights promises which they can't deliver.

In some foreign policy fields, too, the administration may try to move first with proposals to help cope with crises in Africa and Latin America. The GOP may thus respond in part to prodding from the Nixon-Rockefeller accord, though hardly as boldly as the New York Governor would like.

This preview of next month's session emerges from talks with top administration officials, aids of Vice President NIXON, and key Republican lawmakers here for the Republican Convention that opened yesterday.

In shaping GOP strategy, Mr. NIXON has kept in close telephone touch with President Eisenhower at the summer White House in Newport, R.I. The two are expected to confer afresh when Mr. Eisenhower comes here today for "Ike Day" at the convention.

GOP DRIVE'S STRATEGY

Here are the major points of Republican strategy, part offensive and part defensive, for handling the Democratic drive:

President Eisenhower will make a strong new demand for his own school, medical care, minimum wage and other unenacted programs, and will attack Democratic counterproposals as irresponsible. Not only may

Ike deliver Congress a special message along these lines, but there's an excellent chance he'll follow up with a radio-TV talk to the Nation.

The GOP will trumpet its willingness to help enact any bill that meets administration specifications—and then will claim credit for such action, if it comes.

The Republicans will also attempt to do a far better job in telling their side of legislative controversies. Through speeches and press conferences, Messrs. Eisenhower and NIXON will take over more of the load from GOP congressional leaders DIRKSEN and HALLECK.

Most important, Republicans will delay, sidetrack and block any bill that goes much beyond administration recommendations. Despite the presence of Texas' Senator JOHNSON on the Democratic ticket, the GOP is counting on aid from some Southern Democrats, including Chairman SMITH of the powerful House Rules Committee, which can often keep bills from reaching a floor vote. This delaying action could test Democrats' willingness to stay in session past Labor Day when they will be eager to get away for campaigning. But Republicans will try to keep the operation under cover, to avoid seeming glaringly obstructive.

PREVIEW OF SPECIAL SESSION

Here at the convention, Republicans will offer a preview of their special-session approach. Nominee NIXON and other party orators are expected to harp this week on the theme that Democratic politicians will have a field day at the August session.

"They're going to be out to show the Nation how much they can do," declares a top Republican Senator, "and we're going to have to keep them from doing it."

Says a NIXON lieutenant: "We can't get much out of this session to campaign on. We'll have to campaign on our past record and future plans. What we have to do in Congress is keep our little band in line and keep the Democrats from getting anything to campaign on."

The GOP strategy could founder on either side of a narrow channel. Obstructionism could become too obvious, and present the Democrats with a new campaign issue. Or it could fail to halt liberal legislation, and lead to a series of politically risky vetoes.

"It's a fine line we must follow," one GOP House leader confesses. "We must obstruct without seeming to. We can't appear completely 'agin' everything, yet we can't let the Democrats deliver on too many of their promises or put Ike on the spot too often."

MR. NIXON'S DILEMMA

This prospect poses a special problem for Candidate NIXON. If he seems to push for too conservative legislation, he may estrange some of the independent voters he plans to woo in the campaign. If he moves too much to the left, he risks alienating his party's conservatives.

"If he strays too far into left field," warns one midwestern lawmaker, "he'll end up chasing the ball alone. We're a pretty conservative bunch in Congress."

To help blunt Democratic "do little" charges, the administration will offer the special session some fresh proposals, notably in the foreign field. One sure thing: A Castro-sped request for a $500 million fund for easy-term loans to Latin American nations for housing, land reform, schools and other projects. U.S. diplomats want Congress to act in time to permit presentation of the program to a meeting of Latin American economic ministers in September.

The administration may also ask for extension through 1961 of the lately enacted power to cut or wipe out Cuba's share of the U.S. sugar market; the present law runs only through the first quarter of next year, and waiting until then for extension might risk late or hasty action, officials fear.

Though it will scarcely be new, Mr. Eisenhower, backed by candidate NIXON, will also urge the Senate to appropriate the full $4.2 billion he originally requested for foreign aid; the House has trimmed $600 million from this sum. Dwelling on the Congo crisis, Ike may stress the need for the full $20 million he wants for a special fund to aid Africa, mainly through education. He'll demand removal of House-attached strings on use of technical assistance funds to aid African well drilling, farm operations and the like.

EMBARRASSING DEMOCRATS

Even before Mr. NIXON disclosed the administration's civil rights plans, some "liberal" Republicans hoped to embarrass the Democrats on civil rights. On the first day of the session, they plan to introduce a bill to carry out Democrats' platform promises of new aid to school desegregation, establishment of a Fair Employment Practices Commission to guarantee equal job opportunities, and the like.

On this issue, Democrats are split far worse than Republicans. Having struggled painfully to put through one civil rights bill this year, they won't even try to pass another in the extra session, and Republicans could reap a promising campaign issue.

What worries Republicans most is the expectation Messrs. KENNEDY and JOHNSON will push more boldly than ever for school aid, medical care subsidies for old folks, minimum wage increases, and farm price-support boosts outdoing administration wants. Republicans recognize the surprise inclusion of Senate Leader JOHNSON on the ticket makes this threat tougher. But they refuse to be stampeded.

By present signs, it won't be hard to keep Congress Republicans behind obstructionism. Feeling of GOP lawmakers toward the special session is pure anger. They maintain the plan was manufactured in June by Senate Leader JOHNSON for two blatantly political purposes: To use his power over legislation to force delegates to back his now-defeated presidential ambitions; and to put Mr. NIXON on the spot. Republicans believe both Mr. KENNEDY and Mr. JOHNSON will exploit the session with undisguised partisanship to advance the Democratic cause.

"WHY SHOULDN'T WE PLAN?"

"I'm going to fight hard every chance I get," declares a usually mild-mannered western Senator. "This is a politically inspired session, and I don't see why we shouldn't play a little politics, too. They're going to be out to rush everything through, and I think our course is clear; we'll just do what the southern Democrats call 'educating the people,' and talk a little while, and see how long they're prepared to stay. I'm up for election this year, and should be home campaigning, but I don't care if we stay through election day—I'm that mad."

Because of the session's special risks for Candidate NIXON, his aids hope President Eisenhower will spearhead the GOP approach. "The best thing would be for the President to carry the ball," reasons a NIXON strategist. "That leaves DICK free to maneuver for the campaign."

The Nixon men do think the GOP candidate should come out from behind the scenes whenever he can gain credit thereby. If, for instance, he can muster Republican votes to pass a moderate school aid bill close to administration wants, they would like to see him get full political mileage out of the maneuver. But the strategists frankly hope he will avoid personal entanglement in issues where the outcome is unclear and the political risks are high, such as medical care for old folks.

To help parcel out the top Republican roles, the President and the nominee will meet either in Newport or in Washington just before the Senate goes back to work August 8. Mr. NIXON wants Mr. Eisenhower to seize the offensive by sending Congress a message demanding action on major items of pending business and blasting Democratic legislative schemes. White House Press Secretary Hagerty has said Ike intends to remind Congress of the portions of his program not yet acted on, but has declined to specify the form this reminder will take.

"I hope the President can be persuaded to take a tough line," says a Nixon lieutenant. "It would solve a lot of our problems if he would get in the front lines."

NEEDED: ARTICULATION

The Nixonites want Mr. Eisenhower, with the Vice President's help, to keep up a drumfire offensive throughout the session. "I must admit," one Nixon aid says, "our side has not been articulated very well this year. The President can do more, and the Vice President too—explaining to the voters exactly what the GOP proposals are and why they're right and the Democrats are wrong. They have to handle in advance the Democratic charge that the Republicans are blocking legislation."

The GOP program does not call for complete obstructionism. Party policy will be determined on a case-by-case basis. Consider what could happen on an education bill. The House Rules Committee has refused to let a House-passed school bill go to a Senate-House conference. The Republican-southern Democrat coalition that controls the committee feared the compromise product would go far beyond administration desires.

Before Congress quit in early July, however, there were signs that the Democratic majority might accept a bill closer to administration specifications. If the Democrats act that way in August, Republicans probably will help push the bill through. The key is whether Democrats agree to make States match Federal contributions every year during the life of the program.

"Any time they come to our matching formula on the first year," one House GOP leader says, "the four Republican votes in the Rules Committee will be delivered. Then we can take the credit."

But when Democrats try to go too far, in the eyes of GOP leaders, obstructionism will come into play. Republicans will try to prevent or drag out committee hearings, committee action on bills, floor votes and Senate-House conferences. If they succeed, they'll blame the Democrats for failing to produce.

"It's easier for us to sell the idea that they were in control and couldn't deliver," contends an eastern Republican Senator, "than it is for them to claim our minority votes kept them from producing."

Says a leading House Republican: "A firm stand by our side will show how divided the Democrats are despite their platform. They can't possibly get northern and southern Democrats together on minimum wage and some of these other things."

If obstruction fails, the veto will be used almost regardless of its political risks; a social security type medical care bill, despite the political dynamite it packs, still faces probable veto by Ike.

"If the President gets bills that go beyond his recommendations, he'll veto them," one GOP Senate leader predicts. "He's prepared to veto what's necessary, but politically it's better if he doesn't have to."

Mr. MORSE. Mr. President, there has been a great deal of discussion about this short session and those responsible for it and what has been accomplished by it; and I think it is time for me to give a little chronology with respect to this session.

The foreign aid authorization bill, H.R. 11510, was passed by the Senate on May 2. It had passed the House on April 21. When it was in conference on July 5, we

still had a problem confronting us. Could we go home? Of course, we could not go home. We had the responsibility of coming back here and doing something about a foreign aid authorization bill.

Let us take the public works appropriations bill, H.R. 12326. It passed the House on May 25. It was reported to the Senate on June 29. It passed the Senate on August 10.

Could we have gone home prior to the Democratic and Republican Party Conventions with that unfinished work?

I see sitting next to the majority leader the distinguished Senator from Pennsylvania [Mr. CLARK]. I see in the back of the room the Senator from Tennessee [Mr. GORE].

I recall very well the speeches by Senators on the floor of the Senate, urging that we come back—and they were correct—to finish the legislative job started in the last session of Congress. Mr. President, we had to come back.

Let us consider the minimum wage bill. That was passed June 30 in the House of Representatives. It was reported August 11. It passed the Senate on August 18. We knew in July that the minimum wage bill was still waiting for action on the part of the Congress. Could we go home, or did we owe it to the Senate to make every effort—which we have made in the past few days—to iron out in conference our differences with the House? It was our clear legislative duty to come back. Before I finish, I hope to show how wise was the decision to come back.

Let us consider the medical care bill for the aged, H.R. 12580. That bill passed the House on June 23. It was reported on August 19.

It passed the Senate on August 23. I know of no issue on the domestic front which is of greater concern to the American people than the issue of medical care for the aged. Could we have justified going home prior to the conventions of the two parties, or did we have a clear duty to come back for this short session of Congress and to do our best to pass that proposed legislation?

We passed a bill on this subject. It was not as good as some of us desired, but at least we took some step forward in the field of legislation to provide medical protection for the aged. It stands out as one of the great accomplishments of the short session of Congress, and I give my high commendation to the Senator from Massachusetts [Mr. KENNEDY] and the Senator from Texas [Mr. JOHNSON], for the passage of this legislation.

We ratified the Antarctic Treaty. The treaty was reported on June 23. It was ratified on August 10. Action on the treaty was waiting prior to our short recess before the Republican and Democratic Conventions.

We must also consider the mutual security bill. The bill passed the House of Representatives on June 17. It was reported on August 19. It was passed by the Senate on August 24. We still have to take final action on a conference report on that bill.

I was delighted to hear from my good friend from Florida [Mr. HOLLAND] only a few moments ago, in private conversation on the floor of the Senate, that it looks as though the conference report which will come to us will show an additional $65 million is to be added by the House of Representatives. If the report shows that—and I am sure the Senator from Florida is correct—it will be further justification for the time we have taken in this short session of Congress to transact the people's business on these vital issues.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from Pennsylvania, without losing my right to the floor.

Mr. CLARK. Mr. President, I should like to express my gratification to the senior Senator from Oregon for his reference to me and to the Senator from Tennessee as having urged the majority leader to bring us back to do the people's business after the political conventions.

I know from my own personal knowledge that the majority leader was reluctant to do so. I am confident from my own personal knowledge that his own ambitions for the presidency had nothing whatever to do with the Senate coming back after the conventions—and anybody who says they did, in my judgment, is not telling the truth.

I think we should be disappointed in the fact that we did not do more in this bobtailed session. We did not do more because we had a divided Government. So long as we continue to have a divided Government, with a President who wishes nothing done and a Congress which would like to do something, we are not going to get things done in a 4-week session.

I commend my friend from Massachusetts and my friend from Oregon for taking the time and the trouble to point out to all Senators, for once, in a reasonably crowded Senate, the fact that it was our duty to come back. We have done our duty insofar as we could do it in the face of opposition from divided Government.

I, for one, am proud we came back. I am proud of what the majority leader has done. I am proud of the position taken by the Senator from Massachusetts. I do not have a shadow of a doubt of what is going to happen in the election in November.

Mr. MORSE. I thank the Senator from Pennsylvania.

Mr. President, I am nearly finished. The thesis of my remarks happens to be that we have made a remarkably fine record in spite of the dilatory, obstructionist tactics thrown in the way of the majority party.

Between January 6 and August 29, as the record shows, the Senate passed 937 bills and acted on 39,937 nominations. It has also ratified 13 treaties, including 4 ratifications during this so-called short session of the Congress.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point in my remarks a list of the treaties which the Senate has ratified.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

TREATIES

Antarctic Treaty, approved 66 to 21, assures that the Antarctic Continent and surrounding areas will be used exclusively for peaceful purposes, that freedom of scientific investigation will be maintained, and freezes existing territorial claims and rights in the Antarctic.

Convention of Paris for the Protection of Industrial Property, approved unanimously, 95 to 0, provides for international protection of patents, utility models, industrial designs, trademarks, service marks, and trade names.

Treaty of Friendship and Commerce Between United States and Pakistan, approved 94 to 1, provides broadened opportunity for American individuals and businesses abroad to conduct their affairs in a more effective manner.

Convention of Establishment Between United States and France, approved 94 to 1, provides broadened opportunity for American individuals and businesses abroad to conduct their affairs in a more effective manner.

Mr. MORSE. I also ask unanimous consent to have printed in the RECORD a listing of some of the major bills we have passed during this short session of Congress.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

BILLS

Public works appropriations, approved unanimously, 86 to 0, provides $4,030 million for public works projects, flood control and resources conservation and development.

Amendment to the Fair Labor Standards Act (minimum wage bill), approved 62 to 34, provides for increasing minimum wage from $1 to $1.25 over a 3-year period, and extends minimum wage coverage to over 4 million additional employees.

Stabilization of mining of lead and zinc on public, Indian, and other lands, approved 59 to 28, provides for stabilizing the mining of lead and zinc by small producers in the United States.

Milk price supports, approved unanimously without a record vote, establishes price-support levels for milk and butterfat through March 31, 1961, in order to prevent dairy prices from going lower than the market.

Aid to Latin America, approved 54 to 19, authorizes $500 million for assistance in the development of Latin America and $100 million for aid in the reconstruction of Chile.

Mutual security contingency fund, approved 59 to 14, provides an increased authorization of $100 million for the President's mutual security contingency fund for fiscal year 1961 to meet emergency needs in Africa and other areas of the world.

Mr. MORSE. I close by saying to the Senate that I think the majority leader once again has demonstrated he was willing to place his responsibilities to the Senate above any selfish political interests of his own. I think a case could have been made for urging the Senator from Texas not to have the Senate come back, from the standpoint of his own narrow, personal, selfish political interests. But he is too big a man for that, Mr. President. The Senator from Texas demonstrated, along with his great teammate and colleague, the Senator from Massachusetts [Mr. KENNEDY] that they are dedicated to putting the public interest first. Their first job, as Sena-

tors, was to see to it that we came back to Washington, D.C., and did our best to finish the unfinished work which we left behind us when we went to the Democratic Convention, and when the Republicans went to the Republican Convention.

We were confronted at that time with the fact that the hearings on the Democratic platform ran from 2 p.m. on July 5 through Friday, July 8, and there were many of our leaders in the Senate whose services were needed at Los Angeles to help draft the platform which was drafted. It turned out to be a magnificent and great platform. That is another reason why the Senator from Texas was working under a handicap in those closing days of the session before the preconvention recess.

The platform committee of the Democratic Party met on July 11 to consider the drafting committee's report. The platform committee's report was submitted to the convention on July 12.

I remember the Senator from Texas saying at one time in the debate during the last days of the session prior to the recess, "What am I supposed to do? Am I to say to some of the leaders in the Senate, 'You should not go to Los Angeles'?"

The Senator from Texas went on to analyze the platform committee situation which confronted the Senators, and made the only sensible choice he should have been expected to make. He joined with the rest of us who advised that we should take a recess until the conventions were over and then come back and try to finish the job.

I close by saying the Democrats in the Senate have tried to do exactly that.

I believe Mr. Otten in the Wall Street Journal article described very accurately the strategy of our opposition, and I am perfectly willing, between now and November, to let the voters evaluate the fine record I think we have made, against very heavy odds and dilatory tactics, under the leadership of the Senator from Texas [Mr. JOHNSON].

Mr. HOLLAND. Mr. President——

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from Arizona.

Mr. KENNEDY. Mr. President, I had promised to yield to the Senator from Arizona.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. GOLDWATER. Mr. President, I have only a few words to say in summation in regard to the failure of the minimum wage bill to pass the Congress and to become law.

I have read very carefully the full debate in the Senate. I recall all the arguments we had during the subcommittee discussions on this measure, and the full committee discussions.

It was perfectly obvious during the early days of consideration of the bill in the subcommittee and in the full committee that the point on which we would "hang up" would be the "commerce" definition. I think any hindsight used by the proponents of the measure in the Senate would now cause us to recognize that had we accepted the Monroney amendment we undoubtedly would have had a bill from the conference.

I say with all due respect that the Senator from Massachusetts, who, I recognize, has done a hard job, has worked diligently. He was gentlemanly at all times in yielding to the minority so that we might make our points. He was faced with an impossible task. The difference was too great. It would be impossible to pull together both sides of the Grand Canyon. That is, in effect, what he was trying to do.

I feel that had the subcommittee or the full committee or the Senate accepted an amendment which would have provided a very clear definition of interstate commerce, which I felt the Monroney amendment would have done by saying "doing business in two or more States," this trouble would not have been encountered, and today we would be discussing a report from a successful conference.

Mr. President, so that this record may be complete, I wish to repeat once again, as has been said time and again on the floor of the Senate, our objection to the new definition of "commerce." I wish to read it. It is taken from the Senate bill, section 3(s):

> Activity affecting commerce includes any activity, business, or industry in commerce or necessary to commerce or to the production of goods for or the distribution of goods in commerce.

While the words "activity affecting commerce" are contained in the Taft-Hartley Act, I suggest that the definitions of those terms in the Taft-Hartley Act are in no way comparable to the terms contained in the Senate bill on the minimum wage which was read from the Taft-Hartley Act itself.

> The term "affecting commerce" means in commerce or pertaining to or obstructing commerce or the free flow of commerce, or having led or tending to lead to labor disputes pertaining to or tending to obstruct commerce.

It is in this area that the whole trouble has developed. I suggest that next year, when a bill is drafted to cover the minimum wage, as it undoubtedly will be, the framers of the measure pay particular respect to the obvious wishes of the Senate and the House to retain the language that has always been in the Fair Labor Standards Act of 1938, as amended. While the commerce clause has a wide definition or interpretation, it by no means goes as far as the Senate bill on the question of minimum wage. I feel certain that had we accepted the Monroney amendment or something like that provision, with a very clear definition, we would now have a minimum wage bill. I thank the Senator.

Mr. KENNEDY. Mr. President, I yield to the Senator from Florida.

Mr. HOLLAND. Mr. President, the senior Senator from Michigan, who wishes to be recognized, was a member of the conference committee. I gladly defer my remarks.

Mr. KENNEDY. I wish to express my appreciation to the Senator from Arizona. He states, as always, his honestly held views accurately on one of our differences with respect to the proposed legislation.

Mr. MCNAMARA. Mr. President, I shall be very brief. I believe the colloquy that we have had in the past several hours has brought out the highlights of the conference and the problems that we have encountered with the House. I wish to add my voice to the praise that has been heaped upon the chairman of the conference committee, the Senator from Massachusetts [Mr. KENNEDY] from both sides of the aisle, for his patience, his diligence, and his great effort to get a bill which is vital to continued social progress.

There has been constant reference to the language of the Senate version of the bill which reads "affecting interstate commerce." The courts over and over again in labor litigation have accepted this language as proper. It is stated in varying form in labor cases. The courts have ruled on the question repeatedly and have said that the interpretation inserted in the bill is proper.

Basically, what are we talking about? We are talking about raising the wages of American workers in the last half of this century to $50 a week. The difference in the wage rate between $1.15 an hour and $1.25 an hour is $4 a week. Is that too much money in this day and age to pay an American workingman to support his family and to provide the necessities of life?

I say it is not. I say that members of the conference committee from the Senate did a good job. There was no possibility of getting any agreement in this area. The Senator from Massachusetts attempted to expand coverage to approximately 4 million workers, who look to Government, in this case, to improve their lot. They are largely unorganized workers. They have nowhere else to look but to the Congress of the United States at this time. I think it is unfortunate that we could not get a bill. So far as I am concerned, I was always for $1.25 an hour. I reluctantly went along with the $1.15 in an attempt to get a bill. I think perhaps it was a mistake for me to go along on the $1.15. A difference of $4 a week should not be weighted so heavily. I wish to compliment again the chairman of the conference committee, the Senator from Massachusetts [Mr. KENNEDY]. This is another example of the mark of a good political leader. He will fight for a losing cause, as he has done again and again. That is the mark of a statesman.

Mr. HOLLAND. Mr. President, has the Senator yielded the floor?

Mr. KENNEDY. Yes.

Mr. HOLLAND. Mr. President, I think there is nothing quite so futile as a post mortem, and I think that has been proven in the discussion here already. I think that when we try to determine the answer to the question, Who killed Cock Robin? which has been a good question for a long time, we are apt to waste a great deal of time.

There are some assumptions and some statements that have been made in this

debate which I think require at least a brief statement by someone on this side of the aisle, 20 or more of whom are Democrats who have been consistently, and I hope will remain consistently, against the philosophy which was embraced in the so-called Kennedy bill which came here to the floor of the Senate, and I think unwisely came here.

Let us not permit the record to indicate that this is a partisan question, because it is not and has never been. There have always been Senators on this side of the aisle, and I hope there always will be, who still believe in the philosophy which has been dominant in our party from the time it was first announced by Thomas Jefferson, that that government is best which governs least, and that that government is best which is closest to the people.

The Senator from Florida has been one who has believed steadfastly in that philosophy all of his public life and has asserted it from time to time on the floor of the Senate. That philosophy and position was well known to the distinguished Senator from Massachusetts before the bill was brought to the floor of the Senate. It was well known to the Senator from Massachusetts that something like 20 Members on this side of the aisle were strongly of that opinion and conviction, and I believe it would be a mistake to have the record indicate that here was a partisan issue, because the voting and the debate on the issue show the contrary. I hope that always the contrary will be shown, because I feel so strongly that it is unsound philosophy for this particular act to reach over into the traditional limits of State and local government.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. HOLLAND. I will yield when I finish this point.

Mr. KENNEDY. Mr. President, will the Senator yield?

Mr. HOLLAND. I will be glad to yield.

Mr. KENNEDY. I think this is a party question. The Senator from Florida does not have to agree with the majority of his colleagues in the party. Such lack of agreement does not make the issue less of a party issue. The majority of the Democrats supported the increase of 25 cents an hour, and will continue to do so.

The Senator from Florida is entitled not to agree. A majority of the Republicans did not agree. A minority of the Republicans agreed. That is not sudden news that there are divisions within our two parties. We have known that for some time. But the mainstream of our party is in favor of a minimum wage of $1.25. If the Senator from Florida is not—and he speaks for Florida and he speaks consistently and eloquently, and I do not make any judgment on that—he is entitled to express his opinion. I did not wish his statement that the majority of Democrats do not support this bill to go unanswered.

Mr. HOLLAND. The Senator from Massachusetts is talking about a phase of this bill——

Mr. KENNEDY. The Senator from Florida has not addressed one word to the phases that have taken place heretofore.

Mr. HOLLAND. The Senator from Florida——

Mr. KENNEDY. Did not the Senator from Florida say it was not a partisan matter?

Mr. HOLLAND. Mr. President, I do not yield further. The Senator from Florida has not said a word about the $1.25 limit. He has addressed his remarks throughout the consideration of the bill to the question of the increased coverage under concepts which the Senator from Florida believes are completely unsound and which now at long last the Senator from Massachusetts has discovered, because he has reported to the Senate that in conference he was agreeable to two changes which, if they had been announced in the beginning, would have largely met the objections of the Senator from Florida to the bill, and which he has regarded as so unsound all the time. What are those two changes? The Senator from Massachusetts has reported that he and the other conferees agreed to drop the concept that the bill should apply under a definition that uses the words "affecting commerce" and should hold on to the time-honored, traditional, and sound definition under which interstate commerce, to be covered by the bill, must exist in two or more States.

The Senator from Massachusetts has also announced that he and the other conferees agreed to drop the other concept in the bill to which the Senator from Florida objected most vigorously—and the debate will show that to be the case—and that was the use of the word "enterprise" in such a way as to cover and include various kinds of trade associations and various kinds of organizations under which small grocery stores and other small stores of every character and description, which had come together in various joint operations to try to protect themselves against large dealers in their field, would have been brought within the coverage of the act.

The Senator from Florida is glad that the Senator from Massachusetts and the other conferees agreed in their wisdom and in their judgment, which the Senator from Florida respects in this matter, to drop these two vital objectionable elements in the philosophy of the bill. The Senator from Florida states—and there is no way to successfully contradict his statement—that those were the two concepts to which he repeatedly, over and over again, objected, not only in the debate, but also in 1949, when the same fight and the same effort was made, and when the then committee, I regret to say, came in, at that time as now, with the effort to change the concept of the law and to change its coverage, and decided, notwithstanding the customs and traditions and methods of doing business within State lines and in communities within a State, that the long arm of the Federal Government was so much more efficient than anything that could be done locally by States or by people, we should stretch out the long arm of Government and take within its jurisdiction and within its control the business of the people and the business of private enterprisers in every section of the Nation who should never be brought within the coverage of such a bill as this.

Mr. President, I have not the slightest doubt in the world that the Senator from Massachusetts, able, skillful, distinguished, and dedicated as he is, used every one of these qualities in the conference. I have not the slightest doubt in the world that the other conferees on this side of the aisle, as also on the other side of the aisle, used their skill, their dedication, their convictions, and their loyalty to what had been determined by the Senate. Knowing them as well as I do, I am sure that that was the case. I do not question it for a moment. What I question is the wisdom of the bill as originally presented and the wisdom of presenting it, when it was well known that this side of the aisle was badly split upon the philosophy embraced in the bill, and when the other side of the aisle was also badly split.

Regrettable as it is that no progress was made in conference, it is no new thing that that is the case. The Senator from Florida has had considerable experience in these matters. He has served as a conferee many times. He has found in recent weeks that there are all kinds of disappointments and all kinds of frustrations which come sometimes from our conferences with the able and dedicated Members of the other body. That is not a new thing. The thing that is distinctive in this matter is twofold; first, that it has become so clear that it was unwise to bring up the bill, when all of us knew that this side of the aisle and the other side of the aisle were badly divided. Secondly, that unwisdom has finally been recognized by the statements of the sponsors on the floor with respect to the two vitally objectionable points, which were the main points opposed by those who, like myself, were opposed to the philosophy of the bill and who stated these two objections from time to time.

Mr. KENNEDY rose.

Mr. HOLLAND. I should like to make one more statement, and then I will be glad to yield to the Senator from Massachusetts. Just because under the philosophy of Congress, that has been approved by the Court, it has been found wise to use the words "affecting commerce" in another field—a field where anything which restrains or restricts or interferes with the interstate commerce flow of goods confers Federal jurisdiction—does not mean at all that the same philosophy should apply in this field. I think that the decision which has been made by the conferees is a wise decision, because I still think that States and individuals and groups served and affected know better about what will suit their habit of life, their customs, their traditions, their way of rendering service far better than can be known in Washington or can be dished out in Washington by an administrator who is administering a Federal law. I am glad that the bill has failed.

Mr. President, I do not believe I will have much more to say about this matter. The Senator from Massachusetts

and the other advocates of the bill have been fair, though unwise. I believe the record will show rather conclusively that by no means are the House conferees alone speaking for a closely divided body, because the same thing was true here. On the issue presented by the Monroney amendment, which would have preserved the old interstate commerce philosophy, that to be in interstate commerce in this field there had to be business which crossed State lines, a change of one vote in the Senate would have changed the result.

On the broader, more important issue there were large numbers of Senators who did not follow the new, revolutionary, and strained philosophy which was proposed to be applied to this field. I wish to call particular attention to the fact that on the defeat of the Monroney amendment there were 23 Democratic Senators who voted for that amendment and the concept involved in it, that to be properly within the interpretation of interstate commerce in this field, the business had to be carried on in two or more States. The Senator from Florida simply expresses the hope that if this struggle is to be renewed in the next Congress, we may learn from experience that there is still a great division in both parties on the wisdom of taking this revolutionary step which is suggested; that there is still some belief in both parties that the States have the right to look into this field and control it; that there is still some conviction in this body to the effect that industries know how best to serve their people and what customs, as to the times that their business shall be kept open, and so forth, should prevail in their communities; that there is still some validity to the belief that the people and the States preserve to themselves some jurisdiction which should not be interfered with simply because another rule, not clearly applicable here, has been adopted in another field.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. HOLLAND. I yield to the distinguished Senator from Ohio.

Mr. LAUSCHE. The Senator from Florida stated that if one vote on the Monroney amendment had been changed, the Monroney amendment would have been agreed to.

Mr. HOLLAND. The vote was 50 to 48 to lay on the table.

Mr. LAUSCHE. Is it not true that a count of noses before the vote was cast on the Monroney amendment indicated that a majority of the Senate did not want all businesses in the United States placed subject to this bill, and that the only way the Monroney amendment was defeated was through an agreement reached which exempted hotels, restaurants, automobile agencies, implement dealers, and motel operators?

Mr. HOLLAND. The Senator is, of course, correct. Sometimes we have to guess what is behind the curtain when such a situation develops. We did not have to do so in this matter, because in the very debate itself, it was openly promised that if enough votes could be secured to defeat the Monroney amendment—the very step which has been described by the Senator from Ohio would follow immediately—and during the course of the debate on that following amendment, as well as afterward, it was frequently mentioned that the promise had been made by the leadership, and the commitment made, that hotels, no matter how big, and no matter in how many States they did business; motels; agricultural equipment dealers; restaurants; and automobile dealers, regardless of size, regardless of whether they were in interstate commerce, by any concept, should be entirely excluded from the package of coverage of the bill.

The Senator from Ohio may remember—I hope he does—that the Senator from Florida, in commenting upon the matter then, remarked that that very step had made a hodgepodge of the bill; and the bill left this Chamber as a hodgepodge. I am glad that someone in the other body had the strength to stand up and call it what it was, and refused to adopt it because it was so clearly an illogical mess as it was sent to the other body from the floor of the Senate.

Mr. LAUSCHE. Mr. President, will the Senator yield for a further question?

Mr. HOLLAND. I yield.

Mr. LAUSCHE. Is it not a fact that to get the votes necessary to defeat the Monroney amendment, the Sheraton Hotels, the Statler Hotels, the Hilton Hotels, and the Pick Hotels, doing business in practically every large city in the country, were exempted?

Mr. HOLLAND. The Senator is, of course, correct. I hope the Senator, by his question, and by my answer, will not have me thrown out of my apartment at the Sheraton Park. [Laughter.]

Mr. LAUSCHE. In other words, if the arrangement had not been made to exempt those businesses, the Monroney amendment would have carried, would it not?

Mr. HOLLAND. Yes; and if the Monroney philosophy had been engrafted on the bill in the beginning, that plus the dropping of the word "enterprise," I think our conferees would have gone to conference with a tremendous Senate majority behind them and would have been able to speak with greater authority and would have got something worthwhile out of the conference.

But the path which was so unwise when it was entered upon was continuously followed. No one of the sponsors seemed to realize that substantially half of the Senate, in spite of all the pressure of this political year which was put upon us, did not believe in the philosophy which was then engrafted upon the bill, and could not be forced to support it because we did not believe in it. I hope our conviction will be just as strong next year as it is now.

Mr. CASE of South Dakota. Mr. President, will the Senator from Florida yield?

Mr. HOLLAND. I yield to the Senator from South Dakota.

Mr. CASE of South Dakota. The Senator from Florida will recall that on the night when he made his admirable summary of the features of the bill which was coming before the Senate for a vote on passage, the junior Senator from South Dakota took occasion to commend the Senator from Florida for the position he had taken and also for his analysis of the bill.

Mr. HOLLAND. Yes. I appreciated it then, I still appreciate it, and I shall always treasure that memory.

Mr. CASE of South Dakota. I wanted to say that prefatory to this observation: It was my impression that basically Senators were as much offended by the proposal of the bill to define interstate commerce or commerce as being anything which affected interstate commerce as they were by the precise provisions of the bill concerning dollars and cents.

Mr. HOLLAND. I thought the provisions of the bill relating to dollars and cents never became a matter of serious discussion on the floor of the Senate. So far as the Senator from Florida is concerned, no reference to those provisions will be found in the various debates on the measure in which he participated.

Mr. CASE of South Dakota. The greatest offense to the convictions of many Members of the Senate was the attempt to establish the precedent of defining interstate commerce as that which affected interstate commerce. That was why the Monroney amendment had such appeal to so many of us that we thought it sought to preserve some distinction between intrastate commerce and interstate commerce.

Mr. HOLLAND. The Senator is, of course, completely correct.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. HOLLAND. I yield.

Mr. McCARTHY. Is the Senator from Florida saying that it was the Senate which attempted to redefine interstate commerce through language in the bill drawn directly from Supreme Court decisions?

Mr. HOLLAND. I am saying that the attempts of the sponsors of the bill to apply to this field—the Main Street business field of the Nation—a philosophy which was embraced in other legislation, completely different and which had been upheld by the Supreme Court as to that other field was unwise, illogical, and flouted the opinion of most of the people, I believe, in this country who think that local business should be controlled locally.

Mr. McCARTHY. The language of the bill and the interpretation of the bill were clearly consistent with the Supreme Court decisions, were they not?

Mr. HOLLAND. The Senator is partly in the right and partly in the wrong. The Senator will have to admit that those decisions relate to acts such as the national labor relations law, in which the issue was to regulate and control what may interfere with the flow of goods across State lines.

If one has a store which has 40 percent of its goods which come across State lines, and there is a strike or a threatened strike in that store, of course there is some reason or some logic in applying that definition to that kind of situation.

But when it comes to applying that definition to a store which has 40 percent of its goods coming across State

lines, that would make it comply with Federal regulations and with Federal law as to its employment practices, as to its wage practices, as to its time practices, I say the bill is almost as objectionable to me as the FEPC, because it is in the same general field. It attempts to regulate purely local business by the long arm of the Federal law.

The thing in which I say the distinguished Senator from Minnesota is mistaken—he and his able and conscientious allies who were the sponsors of the bill—is in their belief that simply because the definition applied by our law is upheld by the court in one field, it must therefore be equally applicable to every other field. I say it is not equally applicable to this field, and that it is extremely unwise to apply it to this field.

Mr. McCARTHY. I suggest that the next time the same issue is before the Senate, the Senator from Florida let us write it into the law and then let the Supreme Court decide. Then we shall know whose judgment is correct, the judgment of the Senator from Florida or the judgment of Senators who support such a bill.

Mr. HOLLAND. The Senator from Minnesota did his best to write this language into law this time and found out, I think, that there is a tremendous body of opinion on the floor of the Senate, and a prevailing body of opinion on the floor of the House, and I believe a prevailing body of opinion in this country, who believe that that philosophy should not apply, is not wise, and will not work well in the field to which the Senator from Minnesota seeks to apply it.

Mr. McCARTHY. The Senator has pronounced judgment on me. I suggest that the Senate sustained my position. If he wants the judgment of the highest Court in the land, why not let it go to the highest Court? Do not say that the Senator from Minnesota and everyone who stood with him is flouting the laws of the United States.

Mr. HOLLAND. If that be the conviction of the Senator from Florida—and it certainly is—the Senator from Florida not only has the right to so state, but it is duty, representing a great people numbering almost 5 million, which he thinks he truly represents, the sentiment of the vast majority of them, to say to the distinguished Senator from Minnesota that he believes a mistake has been made here, and that mistake has finally proved its own existence as such by the complete frustration which now confronts those who have spent so much time, needlessly, on trying to impose on the people a philosophy which does not properly apply in this field.

Mr. McCARTHY. The Senator from Florida is not arguing, is he, that because the House of Representatives took a stand different from that taken by the Senate, the House of Representatives is absolutely right?

Mr. HOLLAND. No. I am glad that the House of Representatives agreed with the 48 Senators and the others who changed their minds at the last minute, under political pressure, that the newly proposed standard was not sound; and I am very glad that decision has come out of this futile, frustrating conference.

Mr. McCARTHY. I do not mind having the Senator from Florida express his happiness and his gladness. My only question was about the soundness of his judgment and the hesitation to let the matter go to the Supreme Court.

Mr. HOLLAND. As I understand our duty, it is, first—regardless of what the Supreme Court may do later—to vote for what we believe in. I have always tried to do that. I have done that many times when I have believed that the Supreme Court would hold otherwise if the measure went to the Court. I have done that many times knowing that the Supreme Court has already held otherwise, but I thought its decision was wrong, and I thought I had a responsibility to help correct it; and I have not hesitated to do so.

But if the Senator from Minnesota wants me simply to say on each issue, "Well, it does not make much difference what we say. Let us pass the bill that is asked for, and then let us let the Supreme Court, in its infinite wisdom, decide whether it is good for the people or not," all I say is that I do not agree in the slightest with that philosophy.

Mr. McCARTHY. The Senator from Florida knows that I made no such suggestion.

Mr. HOLLAND. Perhaps I misunderstood the suggestion made by my amiable friend. But it seemed to me that he suggested that we pass this measure, regardless of what we thought of it, and then let the Supreme Court pass on it. I do not agree, and I have voiced my conviction on that score freely, as I want any Senator to voice his conviction just as freely and just as long as he cares to voice it.

Mr. President, if there are no other questions to be asked by my colleagues, I yield the floor.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had agreed to the amendments of the Senate to the following bill and joint resolution of the House:

H.R. 13053. An act to increase the salaries of officers and members of the Metropolitan Police force and the Fire Department of the District of Columbia, the U.S. Park Police, the White House Police, and for other purposes; and

H.J. Res. 784. Joint resolution amending the act of July 14, 1960, to extend the time within which the U.S. Constitution 175th Anniversary Commission shall report to Congress.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13161) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes; that the House receded from its disagreement to the amendments of the Senate numbered 5, 6, 35, 58, 61, 69, 70, 71, 72, 73, and 85 to the bill, and concurred therein; that the House receded from its disagreement to the amendments of the Senate numbered 3, 16, 23, 30, 34, 37, 56, 63, and 84 to the bill, and concurred therein severally with an amendment, in which it requested the concurrence of the Senate, and that the House insisted upon its disagreement to the amendments of the Senate numbered 7, 8, 9, 10, 11, 12, 13, 14, 15, and 62 to the bill.

THE NARCOTICS CONTROL ACT AND PRESENT NEEDS

Mr. BUTLER. Mr. President, in 1956 while a member of the Judiciary Committee, I supported strongly and worked diligently for the Narcotics Control Act of 1956, passed unanimously by the 84th Congress. Passage of the act followed nationwide investigations establishing that illegal sellers of narcotics felt that profits from these illegal sales as a rule would offset the minor penalties imposed in case of arrest and conviction.

The Narcotics Control Act of 1956 changed all this. For the first time in our history minimum mandatory sentences brought the penalties close to being commensurate with the gravity of the crime. Now an illegal seller of narcotics upon conviction must be confined for no less than 5 years nor more than 20 years for first offense and no less than 10 years nor more than 40 years for subsequent offenses.

Suspended sentences, probation, and parole are not provided. Naturally our courts still use discretion—somewhere between 5 and 20 years for first offenders and somewhere between 10 and 40 years for subsequent offenders. As a result in those jurisdictions where the courts tend to impose the maximum penalties, there has been the greatest improvement in the narcotic situation since the enactment of this legislation.

In my own State of Maryland, resolutions have been passed by the General Federation of Women's Clubs, the American Legion of Maryland, the Civic League of Maryland and the Maryland Law Enforcement Association favoring strict enforcement of the Narcotics Control Act of 1956 as well as compulsory institutional treatment of drug addicts.

Their stand is based in large part upon the excellent and unrelenting work of the Bureau of Narcotics in Baltimore, which is headed by Dr. Harry J. Anslinger, a Commissioner with not only wide knowledge but with impressive administrative ability.

In all of our 50 States, minimum mandatory penalties against illegal narcotic sellers enacted by the 84th Congress have made it the responsibility of our Federal courts to place the welfare of society above concern for the narcotics trafficker.

In the 4 short years since enactment of this mandatory penalty law, there has been a steady trend showing a decrease in the incidence of narcotic addiction. The Federal Bureau of Narcotics gives us the encouraging report that incidence of addiction has dropped to only 1 addict in every 4,000 of our population. There has been a sharp decrease in the number of new addicts reported—indicating we may expect a continuing decrease in the incidence of narcotic addiction.

There is absolutely no doubt that the minimum mandatory penalties of the 1956 act have provided an effective deterrent against the illegal sale of narcotics. This criminal activity is no longer palatable or profitable. The risk is too great. Those who persist in this heinous crime face confinement that removes them from society almost permanently.

It is my opinion that to bolster our 1956 act which has already accomplished so much, our several States should provide compulsory commitment for narcotic addicts. The commitment should be for such periods as are necessary to effect rehabilitation, and should be followed by long periods of probation with mandatory physical examinations to detect relapse to the use of narcotics. Through the effective enforcement work of the Federal Bureau of Narcotics and of local and State officers, minimum security institutions have been found suitable and able to provide work therapy which is recommended by most knowledgeable authorities.

There is another potent and effective weapon which should be authorized to bring to an end organized narcotic trafficking in this country. Distribution of heroin is highly dangerous at the present time and cannot be effected without communication—communication by telephone. Authorized wiretapping, with certain safeguards, and by court order would strangle the nefarious narcotic traffic. We owe it to the citizens of this country to legislate this authority.

The attempt in some quarters to weaken an unwavering approach to the elimination of the unlawful traffic in narcotics in this country is highly disturbing to the citizens of this country who rightfully believe the elimination of illegal narcotic traffic should be a major concern. Mr. President, we must not relax in our battle to eliminate the parasites of our society who subsist on illegal traffic in narcotics.

IMPORTANCE OF THE CONNALLY RESERVATION

Mr. BUTLER. Mr. President, seldom has the cause of truth been so illy served, no American honor more subtly maligned than by the Washington Post in its lead editorial day before yesterday, August 29, "Issue Before the Bar."

The issue the Washington Post refers to is the Connally reservation to our declaration of consent to the compulsory jurisdiction of the International Court of Justice.

Mr. President, the Post—surely with the best intentions in the world—is permitting its desire for "peace through law" to blind it to the facts. I do not question the motives of the Post for a moment. But I do propose to answer the Post on this subject point by point, in part in the words of Mr. Frank E. Holman, a past president of the American Bar Association, and one of the leading proponents of the Connally reservation.

First. The Post begins by asserting:

> The hottest issue to be debated before the American Bar Association meeting in Washington this week will be repeal of the Connally amendment, which is admittedly crippling the International Court of Justice.

I submit, Mr. President, the truth is: It is not our Connally reservation but the fact that neither the U.S.S.R. nor any of her satellites has ever agreed to yield to the compulsory jurisdiction of the World Court with or without reservation—it is this that is "crippling the International Court of Justice."

Second. The Post states:

> Supporters of the amendment will ask the organized bar to reverse its 1947 call for repeal. Friends of the World Court hope to crush that backward-looking movement.

The truth is: The ABA 1947 call for repeal was made at a time after World War II when we were hopefully contemplating an enduring peace. That was before Korea, before the cold war, before the U–2 incident, before the Soviet torpedoing of the summit, before the Soviet shooting down of an American plane in the Arctic and before Khrushchev established a Communist beachhead in Castro's Cuba.

It is those who want to repeal the Connally reservation who are backward-looking, wishfully thinking the world today is as it was in 1947. It is we who are forward-looking, who intend to preserve the Connally reservation until we have a world of civilized nations, a body of international law and a court we can fully respect.

Third. The Post says:

> Fortunately, the history of the controversy and the issues at stake are set forth in two excellent reports—one prepared by the Committee on World Peace Through Law and the other by the ABA's section of international and comparative law.

The truth is: the Post fails to mention the several excellent papers, prepared by ABA past presidents and others, which come to opposite conclusions.

Mr. Holman points out in a preface to his paper "The Problem of the World Court and the Connally Reservation, Postscript on World Peace Through World Law":

> The expense of publishing and distributing this pamphlet has been paid by the author personally. The cost is not tax deductible. Neither the great Ford Foundation nor any other foundation, corporation nor individual has contributed to the expense.
>
> One of the American anomalies today is that the cost of efforts to advance international programs and objectives is tax deductible and readily financed by the great foundations—the American Bar Association has received large grants from foundations to sponsor various international objectives—whereas the cost of efforts designed to protect and maintain the integrity of the Republic as an independent Nation is not tax deductible and the great foundations are not interested in contributing to such efforts.

Fourth. The Post says:

> The United States has always given enthusiastic support to the idea of world law in place of force, but has tended to shrink from acceptance of international rulings applied to itself.

The truth is: The United States has exactly once claimed domestic jurisdiction and has never shrunk from a ruling handed down by the International Court of Justice.

Fifth. The Post says:

> This device, intended to give the United States a preferred status, has actually operated as a veto in the machinery of justice.

The truth is: The Connally reservation is not intended to give the United States preferred status but to protect U.S. sovereignty. Other parties to the statute who may be parties to a dispute with the United States can claim the same reciprocal right to domestic jurisdiction.

Sixth. The Post says:

> It has worked to the national disadvantage in practice and is not necessary to safeguard legitimate American interests.

The truth is: The Post cannot name one incident when it has worked to our national disadvantage in practice and it cannot prove that it "is not necessary to safeguard legitimate American interests" because there is no way to prove what the Court, with its two Communist judges, once it had the United States legally disarmed, would seek to do.

Seventh. The Post says:

> With its numerous bases and extensive foreign trade, the United States has a greater interest in international justice than any other power. Yet it has crippled the only instrument of such justice.

The truth is: Other nations, of course, have as great an interest in international justice as we have. Certainly we have not "crippled the only instrument of such justice" because (a) the U.N. International Court of Justice, so-called, is not the only instrument of international justice—any arbitration board set up for any dispute may be an instrument of such justice and (b) it is the nonadherence of the Soviet bloc, not the Connally reservation, that is "crippling" the U.N. Court.

Mr. Holman points out:

> Another fallacious charge is that the Connally reservation handicaps the United States in litigating in the World Court matters respecting its foreign investments, its military bases, etc., and that it is to our self-interest to repeal the reservation. These matters have all come into existence through diplomatic negotiations and conferences and the nations seem to prefer that their settlement be handled at the diplomatic level rather than at the judicial level; both because they can be settled more expeditiously and because, after a long-drawn-out judicial hearing the judgment of the World Court could only be enforced by action of the Security Council, which could not function as against a veto by any member thereof.
>
> Of course, since only a State can be a party litigant, foreign interests of a nongovernment character, where only private businesses are involved, cannot resort to the World Court for settlement of disputes concerning their rights in foreign countries. In some instances a State may sue in behalf of one of its nationals, but only if the national has exhausted its remedies in the courts of the country where the national's interests are situated. This leads to the extraordinary situation of the World Court being asked to sit in review on a matter theretofore finally determined by the courts of legal processes of another country. Through this procedure the World Court in such cases—without the Connally reservation—would become a court of review or of appeal not only over American court decisions but over American executive and legislative determinations.

Eighth. The Post says:

Since all countries sued by the United States have all the rights this country claims, they can easily evade any adjudication by asserting that the dispute is within their domestic jurisdiction.

The truth is: Other nations who have accepted compulsory jurisdiction of the International Court of Justice have never cited U.S. domestic jurisdiction against us. However the U.S.S.R. has repeatedly refused to be sued before the U.N. Court.

Ninth. The Post goes on:

More serious is the fact that the United States has "impaired its leadership of the free world" by its insistence on this unjudicial practice of judging its own cases.

The truth is: U.S. leadership in the free world would be impaired if we did repeal the Connally reservation. To lead we must be sovereign and free. Certainly we would be neither sovereign nor free should we surrender our right to determine our domestic jurisdiction to the World Court which is, in Mr. Holman's words, "only a commission composed of 15 members, of which one each is a national of the United States, Great Britain, and Australia. The others are nationals of the United Arab Republic, Nationalist China, Greece, Poland, France, Mexico, Panama, Argentina, Uruguay, Norway, Pakistan, and Soviet Russia. Thus, only three judges are from common law countries, four are Latin Americans, two are from Moslem countries, two are Communist, one Chinese and one each from Greece, France, and Norway."

How can we possibly expect the free world to trust our leadership if we defer to a court in a matter of domestic jurisdiction, which has two Communist judges, the Russian and the Pole, whose concept of law is at variance with ours and whose leaders have sworn to further world revolution and the economic destruction of the United States? How can we ask the uncommitted countries to choose American democracy as against Soviet slavery and in the matter of domestic jurisdiction defer to a court upon which is represented two states which engage in such slavery—Russia and Poland?

Mr. Holman points out:

The suggestion that the existence of the Connally reservation adversely affects the achievement of world peace, in that by its restriction of the jurisdiction of the World Court it prevents nations from using the Court as a tribunal for the settlement of international disputes, is fallacious. No proof has been or can be offered of this contention. The fact of the matter is that the paucity of international litigation in the World Court has not been occasioned by the Connally reservation but by a widespread current belief by statesmen that international questions of consequence should be settled at the diplomatic level by way of negotiations and conferences and not at the judicial level. So long as the Communist countries refuse outright to use the Court, the settlement of great international issues at the judicial level is not capable of realization.

Tenth. The Post says:

Indeed three of the countries which followed the American lead in imposing this foolish restriction on the World Court—England, India and France—have recognized their blunder and given it up.

The truth is: The United Kingdom gave up her Connally-type reservation only to substitute even stronger reservations. The United Kingdom has what we might call a "drop of the hat" reservation. She can get out of the Court altogether upon notice whether the question at issue is one of a domestic or an international character. In addition, the United Kingdom's acceptance of compulsory jurisdiction excludes "disputes having reference to any hostilities, state of war, or belligerent or military occupation in which the United Kingdom is or has been involved; and disputes where the other party has accepted jurisdiction only in relattion to or for the purpose of the dispute; and disputes where the other party has accepted compulsory jurisdiction less than 12 months prior to filing the application with the Court." It also reserves the right at any time, effective upon notification to the Secretary General of the U.N., to add to, amend or withdraw any of the reservations.

France's adherence to the Court excludes "disputes arising out of any war or international hostilities or a crisis affecting the national security, and disputes with any State which had not accepted compulsory jurisdiction at the time of occurrence of the facts giving rise to the dispute."

Besides the United Kingdom, the following countries have a "drop of the hat" acceptance terminable upon notice given: Australia, Canada, Colombia, Israel, Liberia, New Zealand, Pakistan, the Philippines, Portugal, the Sudan, and South Africa.

The United States can terminate its adherence to the Court only upon 6 months' notice.

I refer Senators to the International Court of Justice Yearbook, 1958–59, page 205 through page 227, for the text of all these reservations.

Eleven. The Post asks:

Why should the United States jeopardize its standing in the free world by continuing to manifest a basic distrust of the rule of law?

The truth is: The American people, by retaining the Connally reservation, manifest a deep traditional trust in the rule of law: The rule of the Constitution of the United States over all U.S. domestic jurisdiction as determined by the United States of America. The "rule of law" by itself, undefined, is an empty phrase. We must ask the rule of what law? The law of the jungle? The law of Hitler's people's court? The law of the U.S.S.R.'s Red justice?

Mr. Holman points out some domestic questions which the World Court could treat as international except for the Connally reservation:

1. Immigration: Traditionally, a nation's right to determine the nature and scope of its immigration laws has been treated as a domestic question. But in the Declaration of Human Rights promulgated by the United Nations, there was incorporated a so-called right whereby a national of one country was to be entitled to seek refuge or migrate to another country. There has been much talk that overpopulation is a matter of international concern, to be relieved by allowing freer migration to countries of less population and greater resources. Except for the Connally reservation, the World Court could hold that nationals of overpopulated areas like China, India and elsewhere, should be absorbed by the United States.

2. Tariffs: The imposition of tariffs has also heretofore been considered a domestic matter; but such impositions may adversely affect foreign trade and the prosperity of other countries. Under the declarations and provisions of GATT, an international agency above referred to, tariff rates are made an international matter. Except for the Connally reservation, the World Court could treat such a problem as international in character and require the United States to share its prosperity with other countries.

3. Embargoes: Except for the Connally reservation, Cuba could now resort to the World Court and question our right to impose an embargo on Cuban sugar.

4. Offshore rights: These rights have become very valuable, involving fisheries, oil, gas, and other natural resources. These offshore rights are covered by the Geneva Convention whose interpretation could be brought before the World Court. Except for the Connally reservation, the World Court could alter these offshore rights and determine to what extent they should be shared with other nations.

5. The Panama Canal: The control of this waterway is essential to the safety and prosperity of the United States. We paid for it. But the 1903 Treaty with Panama, conferring all rights upon the United States, is not necessarily more effective than was the treaty of concession by which the Suez Maritime Canal Co., controlled by England and France, was to have held control of the Suez Canal until 1968. For a number of years, there have been recurring contentions by other nations that the Panama Canal should be internationalized. Except for the Connally reservation, the World Court might undertake to reconsider our rights as to the canal as now fixed by the Panama Treaty of 1903.

6. Interference with our courts: On March 4, 1949, a complaint was received and filed by the United Nations, lodged by one of its consultative organizations, condemning the United States for Judge Medina's conduct of the trial of the 11 Communists in the Federal court as a violation of the United Nations Declaration on Human Rights. This complaint was filed by the International Association of Democratic Lawyers (35 A.B.A.J. 290). Although it is true that only a member state may file a complaint in the World Court, it is easy to envision a state like Uruguay, or some Communist state, succumbing to leftwing pressures and filing complaints criticizing our courts. It will be remembered that, due to so-called leftwing pressures in Uruguay, our own State Department interfered in the execution by the State of California of Caryl Chessman. Except for the Connally reservation, Communist and semi-Communist nations could have a field day, filing complaints against the United States for its conduct of trials by its own courts where Communists and other leftwing culprits were involved.

7. Foreign aid: The World Court is accorded specific jurisdiction over the breach of an international obligation and the nature and extent of the reparation to be made for the breach of an international obligation.

Twelfth. The Post says:

One of the strongest points made by the Committee on World Peace Through Law, of which Charles F. Rhyne is chairman, is that "we and Russia as a practical matter have almost the same position on the International Court. We can both accept or reject its jurisdiction on a case-by-case basis." The U.S.S.R. can easily defend its

contempt for international justice by hiding behind the American judicial veto.

The truth is: The alleged "American judicial veto" has been used exactly once—in the Interhandel case—and this alleged "judicial veto" is, as has been shown above, no stronger than the drop of the hat veto power reserved by 12 other nations.

Thirteenth. The Post says:

The legal scholars see no danger in accepting the compulsory jurisdiction of the World Court without qualification. History shows that the Court "has acted in a highly responsible manner." With its 15 judges serving 9-year staggered terms, the Court has continuity and stability.

The truth is: Many distinguished legal scholars see grave danger in accepting the compulsory jurisdiction of the World Court without reservation. Does anyone really believe that one of the Communist judges, the Russian or the Pole, would vote against the wishes of the Kremlin in any important case?

Mr. Holman points out certain of the events connected with the United Nations justifying the Connally reservation:

Not long after the United Nations began to function it developed programs to circumvent the protective provisions of the charter and the assurances given by the State Department with respect to our domestic affairs.

In late 1948, announcement was made of a so-called Declaration on Human Rights to be followed by a Covenant on Human Rights, both of which were designed to change and distort our concept of individual rights as fixed by our own Constitution and Bill of Rights, dealing, among other things, with such domestic matters as immigration, emigration, nationality, marriage, miscegenation, and other domestic matters.

Of the significant events connected with the United Nations, which occurred during and subsequent to 1948, justifying the protection of the Connally reservation as against internationalist thinking and programs tending more and more to accord the United Nations and its various agencies control and supervision over our domestic affairs, the following may also be mentioned:

1. Mr. John P. Humphrey, the first Director of the Commission on Human Rights, bluntly stated (January 1948 issue the Annals of the American Academy of Political and Social Science) that what the Commission on Human Rights was proposing in its various bill of rights programs constituted intervention in matters within the domestic jurisdiction of the member states. Exposing the whole revolutionary nature of these programs, he said:

"What the United Nations is trying to do is revolutionary in character. Human rights are largely a matter of relationships between the state and individuals, and therefore a matter which has been traditionally regarded as being within the domestic jurisdiction of states. What is now being proposed is, in effect, the creation of some kind of supernational supervision of this relationship between the state and its citizens."

It is obvious that the Connally reservation is necessary to protect the United States against such a program of supernational supervision of its citizens in relation to their own country.

2. In April 1949, Mr. Moses Moskowitz, an official of one of the consultative organizations of the United Nations, publicly stated (35 A.B.A.J. 285) that under the official view of the United Nations, any matter once becoming the subject of a U.N. convention or even of a resolution, ceased to be "a matter essentially within the domestic jurisdiction of a member state." In other words, the U.N. by its own ipse dixit, could internationalize a purely domestic matter so that it lost its character as a domestic matter and lost the benefit of the protection and immunities set up in the charter with respect to such matters. Upon this theory, the U.N. could lift itself, by its own bootstraps, into a world government. Mr. Moskowitz put the matter as follows:

"Once a matter has become, in one way or another, the subject of regulation by the United Nations, be it by resolution of the General Assembly or by convention between member states at the instance of the United Nations, that subject ceases to be a matter being "essentially within the domestic jurisdiction of the member states." As a matter of fact, such a position represents the official view of the United Nations, as well as of the member states that have voted in favor of the Universal Declaration on Human Rights. Hence, neither the declaration, nor the projected covenant, nor any agreement that may be reached in the future on the machinery of implementation of human rights, can in any way be considered as violative of the letter or spirit of article 2 of this charter."

It is obvious that the Connally reservation is necessary to protect the domestic affairs of the United States against this broad theory that the U.N. by its own dictum, can transform and internationalize our domestic affairs to bring them under its jurisdiction.

3. In September, 1950, the internationalists succeeded in getting the famous (or infamous) official pronouncement from the State Department (State Department Publication 3972) that "there is now no longer any real difference between domestic and foreign affairs." On the basis of such a pronouncement by our own State Department, if we did not have the Connally reservation to negative it, the World Court would have no restraint in holding that the United States no longer considers itself as having any domestic affairs over which to preserve its own jurisdiction.

Many other instances could be cited where the internationalists, in and out of the United Nations, have attempted to establish a supernational supervision over matters "essentially within the domestic jurisdiction" of the United States. The Commission on Human Rights is not the only U.N. agency that, in the years following 1948, engaged in spawning treaties designed to control and supervise many of our essentially domestic concerns. Among these agencies are the ILO, UNESCO, GATT, ITU, WHO, FAO, and many others.

For purposes of illustration, these United Nations treaties or agencies undertake to deal with the kind of teaching and textbooks to be adopted in our public school system; matters of social legislation; of economic legislation; of labor legislation; of health and socialized medicine; and numerous others, including a treaty to establish an international criminal court to try Americans in a court made up, to a large extent, if not entirely, of foreigners—a plan under which, as in the case of the Genocide Convention, American citizens could be transported overseas for trial and would be deprived of the constitutional safeguards accorded them under the laws of this country.

Without the Connally reservation, the World Court would have the power to determine which of the foregoing matters, or what part of them, are subject to the compulsory jurisdiction of that Court. It will not do to say that this vast program of "treaty law" has somewhat bogged down and that few of these treaties have proceeded to the point of ratification by the U.S. Senate. This is true for the time being. * * * But it must be kept in mind that with the coming of a new administration, whether Republican or Democrat, the internationalists may be free to revive the U.N. treaty program and, by and through this process, give the World Court compulsory jurisdiction over many matters otherwise essentially within the domestic jurisdiction of the United States. The only deterrent to this is the Connally reservation.

Fourteenth. The Post says:

In case of emergency, moreover, the United States could withdraw from the Court in 6 months.

The truth is: In 6 months it could be too late.

Fifteenth. The Post adds:

Or in case of gross injustice it could use its veto in the Security Council against enforcement of the Court's ruling. In any event, the World Court is confined by its own statute to international cases arising under treaties, international law, and so forth—a very limited jurisdiction.

The truth is: The United States really believes in "the rule of law" and once having submitted unconditionally to compulsory jurisdiction, would not want to use the veto power.

As to the Court's alleged "limited jurisdiction," Mr. Holman declares:

Apart from all other considerations, our knowledge of and experience with the United Nations Commission on Human Rights can leave little doubt in any reasonable mind but that the World Court, if free to do so, would have no hesitation in viewing as international many matters essentially within our domestic jurisdiction.

The United Nations Commission on Human Rights also had one member each from the United States, Great Britain, and Australia; and like the World Court, the other members were from countries each having a different historical and legal background which in no way fitted them to understand and appreciate what, by the United States and its citizens, has been traditionally considered a domestic matter instead of a matter of international concern.

What reason is there to suppose that a majority of the World Court will approach or view our domestic matters any differently than the U.N. Commission on Human Rights? The members of that Commission have, for the most part, been able and distinguished citizens of mostly the same countries from which the members of the World Court were selected; quite a number were able lawyers. But, in their deliberations as members of the Commission on Human Rights, they reflected their own views, based upon their own historical and legal backgrounds. In spite of the prohibitions in the charter (like those in art. 2, subpar. 7) against intervening "in matters which are essentially within the domestic jurisdiction" of any member state, they formulated convention after convention containing proposals that affected or interfered in matters which Americans have always treated as "essentially within the domestic jurisdiction" of the United States. The World Court, man for man and in the aggregate, represents no greater ability or personal integrity than did the U.N. Commission on Human Rights. Why expect it to act differently as to our domestic affairs?

Among the many strange and unbelievable results of the deliberations of the Commission on Human Rights, was that, after 400 meetings, a majority refused to include in the Covenant on Human Rights any provision recognizing the basic American right to own private property and be secure in its enjoyment as against its arbitrary seizure by government. The reason, of course, is that in most of the countries from which the members of the Commission came, the government is free to expropriate private property when and as it deems desirable

and to provide such compensation, or none, as it sees fit. Under our concept of freedom, no man can truly be free who lacks the right to own property and be secure in its enjoyment. In the United States it can be taken or damaged, even for public use, only by what we call due process and only by providing and paying just compensation.

In connection with many other American concepts like freedom of speech and freedom of press, a majority of the members of the Commission on Human Rights, in formulating the provisions of the Covenant and of the Convention on Freedom of Information and provisions of other conventions, so little understood our concepts that these precious American rights were changed (and to us distorted) in order to conform them to a kind of common denominator agreeable to the concepts in the systems of law of other countries.

Ah, but, the Connally repealers say, the World Court can be trusted, for it has made a wonderful record for itself. What record? It has not dealt with enough cases to have any adequate record upon which to judge it. This lack of cases is, in fact, one of the "arguments" used by the internationalists as showing the need for repeal of the reservation. But in the same breath they say that the World Court has made an outstanding record for itself. The repealers cannot have it both ways. Either the World Court has handled an adequate number of cases with which to establish a record, good or bad; or it has had an insufficient number of cases to make any sufficient record upon which it may be judged. Since 1946, 21 cases have been considered by the Court. Of these, 10 were disposed of on procedural grounds. Eleven were decided on their merits. But one of these involved a reconsideration of an earlier case. The record covering the 13 years of the Court's existence, therefore, is a net of 10 cases in which the Court has rendered a decision on the merits—less than 1 case per year. Hence, all the fulsome talk about the fine record of the World Court is without basis in fact. Its record is largely that of sitting on its collective woolsack and drawing salary checks—but doing little of importance.

As already pointed out, the World Court, personally and otherwise, has been modeled almost exactly upon the pattern of the United Nations Commission on Human Rights. Nobody charged the members of this Commission personally with evil intent or lack of fairmindedness from their own point of view; but their minds simply did not and could not comprehend what matters, under American concepts, were domestic as distinguished from international. Hence, in dealing with matters like the right to own property and be secure in its enjoyment as against arbitrary seizure by government, and dealing with our other constitutional rights like freedom of speech and press, and due process, the members of the Commission failed to appreciate that, from the American point of view, they were directly violating the very terms of the United Nations Charter, particularly article 2, subparagraph 7, forbidding the United Nations or any of its agencies to deal with matters essentially within the domestic jurisdiction of a member state. The minds of the members of the Court, like the minds of the members of the Commission, are not geared to our way of thought as to what matters are essentially within the domestic jurisdiction of the United States.

The simple answer to the Connally repealers is: If they are sincere in saying that they, too, want to be sure of protecting our domestic rights, why do they wish to speculate on any basis of uncertainty as to what the World Court will do? They, themselves, admit that risks will be incurred; but they suggest that wrong decisions can be corrected by exercising our veto in the Security Council or by withdrawing from the Court on 6 months' notice. Why run any risks with our domestic rights by vesting their protection in an alien tribunal? Why not make sure of preserving those rights by retaining the Connally reservation? In other words, why buy a pig in a poke in such important matters?

"Oh, well, we cannot be hurt very much," say the Connally repealers, "even if the World Court should decide contrary to American concepts, since, because of our right of veto in the Security Council, the decision cannot be enforced against us. This is not only an unworthy argument, but essentially immoral—to say that in submitting a case to the Court, we have in the back of our heads the intention, if we lose, of repudiating the Court's decision. How can men who point the finger at the Connally reservation and say it should be repealed because it is in the nature of a self-judging reservation (which it really is not, as has been established) advocate such underhand reliance upon a doctrine of unitary and outright repudiation? This is known, in gambling parlance, as having an ace up your sleeve."

The Connally repealers also say they have another ace up their sleeves in the event the Court does not act to our satisfaction: Having formally turned over to it the decision as to what constitutes a domestic matter and finding we made a wrong gamble on the Court, we can then get ourselves out of any further gamble on 6 months' notice. The immorality of this lies in having this "out" in mind at time of repealing the reservation.

Are we going to use both these hidden "aces" as a kind of threat upon the Court that if it does not act in accord with our wishes we will just not play any longer? Under such an attitude on our part, what becomes of the high position of the repealers—who maintain that the basic reason for withdrawing the Connally reservation is to contribute to the stature and dignity of the Court and bring about better international relations generally, and eventually world peace through law—when the repealers have already tainted and destroyed any good will that might come from repeal of the Connally reservation by announcing to the world that repeal is just a gesture of good will because we have "a couple of aces up our sleeves" and if we do not like what the Court does, we will pull one or both of them out and play them, rather than submit to Court decisions we do not like?

That we are facing nothing but a sales program has been publicly confessed by our most ardent advocate of repeal of the Connally reservation, Mr. Charles S. Rhyne, who, at the July 2, 1958, meeting of the American Association of Law Libraries, stated:

"There is no reason why peace through law cannot be sold with the same verve and enthusiasm that we sell soap and other products and programs."

The following day, no less an internationalist than Mr. Dean Acheson observed:

"While it may be that peace through law may be offered for sale with the same verve and enthusiasm as soap, the chances of a consummated sale seem to me infinitely less. If you think of yourself as ringing Mr. Khrushchev's doorbell with two packages in your hand, you can, I firmly believe, have no doubt as to which is salable and which is not."

Mr. Acheson then indicated why Mr. Khrushchev would not buy the Rhyne rule of law:

"Whose rule of law? he [Khrushchev] would ask. You answer with verve and enthusiasm. Rhyne's Grade A Fancy, approved by the American Bar Association. You have a nerve, he shouts back as he slams the door. I'm the proprietor of Khrushchev's rule of Khrushchev, grade triple A, supercolossal. Guaranteed to bury you. Use it either as a tonic or embalming fluid, or both. Ask the Poles."

In every instance, our internationalists, in selling peace, resort to the cure-all promises of modern sales techniques for soap, cosmetics and hair tonics; and, as in the case of cigarettes, will soon tell you that the product is friendly to your throat. Furthermore, in all their programs they call upon America to sacrifice something of its sovereignty or control over its own affairs in exchange for some vague and distant promise that our sacrifices will so influence other nations, even Russia, that the cause of world peace will be advanced. Meanwhile, Russia and the other Communist nations pay no attention to such gestures, or they are puzzled at the spectacle of a great nation sacrificing its sovereignty on the basis of the vague and distant hopes of a sales campaign.

Of course, we all want peace. We favor settling matters by law instead of force where possible. But whose law? Under the present state of the world, all right-thinking Americans recognize that we are compelled (through no fault of our own) to deal at arms length with Russia and other nations of the Communist bloc. We all agree that we are not ready for military disarmament. No more are we ready to disarm ourselves legally and lose the right to protect our own domestic affairs, by giving up the Connally reservation.

Why should we accept merely the vague opinions of our internationalists in exchange for legal disarmament, when we refuse to accept vague and general opinions in exchange for military disarmament? Most of the internationalists who now say the Connally reservation is a deterrent to world peace, said world peace would be deterred if the Senate failed to ratify the genocide convention or if we did not go along with the covenant on human rights or with the various conventions, pacts, and treaties concocted by the Commission on Human Rights and adversely affecting our own constitutional rights and liberties. But refusing to give up control of our domestic affairs in those particulars disclosed that world peace was in nowise affected. No more will it be affected by standing firm for the Connally reservation.

In the last analysis, the issue with respect to the Connally reservation can be summed up by saying that, in view of the present state of the world and in the absence of anything but the mouthing of noble phrases by our internationalists, we should not legally disarm any more than we should disarm militarily. It will be time enough to talk about giving up the Connally reservation when Russia and the nations of the Communist bloc have filed unlimited declarations of adherence to the World Court and have furnished convincing proof that they will abide by the decisions of the Court. Russia and others of these nations have judges on the Court, but have in no way accepted its jurisdiction. * * * The Court may even conceivably become a tribunal with a majority of its members elected by the General Assembly from Communist, pro-Communist and backward countries. Our only protection against all these contingencies is to preserve the Connally reservation.

Mr. President, I have just been informed that today the House of Delegates of the American Bar Association defeated a resolution to reverse its original stand in favor of repeal of the Connally reservation. That is, Mr. President, the ABA today voted in favor of unqualified acceptance of the jurisdiction of the International Court of Justice. The vote—and this is most significant, Mr. President—was 114 to 107 against repeal of the 13-year stand of the ABA for repeal of the Connally reservation. How many of those votes, I ask Senators, were influenced by the

editorial in the Washington Post and Times Herald? This is an editorial which I believe I have proven to be grossly unfair, inaccurate, and not in keeping with traditional journalistic impartiality.

TRIBUTE TO REPRESENTATIVES MADDEN, DENTON, BRADEMAS, ROUSH, WAMPLER, HOGAN, HARMON, BARR

Mr. HARTKE. Mr. President, two congressional districts in my home State of Indiana have been for many years ably represented in the House of Representatives by the Honorable RAY J. MADDEN and WINFIELD K. DENTON. Their districts are the first and the eighth, respectively.

Mr. MADDEN is an honored member of the Rules Committee and one of the most effective Members of the House. Mr. DENTON is the Representatives from my own district. His service on the Appropriations Committee has been outstanding.

However, Mr. President, I should like to take a few moments to call the attention of this body to six new Representatives who came to Washington when I did in January of 1959. Only one other State sent six new House Members to Washington last year for this Congress.

The unusual ability of the distinguished Representatives from Indiana has been a source of great pride to me personally and, I am sure, to the people of our State and their congressional districts.

The Third Congressional District is ably represented by a learned former Rhodes scholar who has established himself in a matter of months as an outstanding member of the House Committee on Labor and Education. This Representative, JOHN BRADEMAS, has earned an enviable reputation as a hard-working, effective Member of Congress, who has a keen and broad insight into the affairs of the Nation without losing sight of the necessity of representing his own constituents well.

The Fifth District is represented equally ably by my longtime friend, J. EDWARD ROUSH. Mr. ROUSH has devoted himself to his duties on the Science and Astronautics Committee and to working with me and others in our delegation to obtain the greatest possible flood control for his district. He has become an expert in space problems as well as in those which more directly concern the Hoosier district which he represents so well.

The Honorable FRED WAMPLER has made an enviable record as the Representative of the Sixth District. He is a valuable member of the Armed Service Committee, working especially hard on the problem of proper use of manpower. Mr. WAMPLER also has joined me in trying to solve our gigantic flood problem and in trying to attract industry to the Wabash Valley.

The Ninth District is predominately a farming area. Its Representative here is a knowledgeable dirt farmer, the Honorable EARL HOGAN. The Committee on Agriculture is fortunate to have such an outstanding man among its members. He has worked diligently to develop answers to the problems which today are robbing American farmers of the fruits of their hard work. At the same time he has been a great friend of industry and small business.

The 10th District is represented by the colorful RANDALL S. HARMON. I have found him extremely cooperative in attempting to solve Hoosier problems by joint action. I have found also that he, too, represents the people of his district ably and well.

The Indianapolis metropolitan area is represented most capably by the Honorable JOSEPH BARR. Mr. BARR's grasp of the complicated problems of banking and currency are almost legendary. He has become an important and almost indispensible member of this vital committee. In addition, no member of the House has worked longer and more diligently to represent the varied best interests of the people of such a populous congressional district.

On this final day of the 86th Congress, I wish to pay my personal tribute to all the members of our Hoosier delegation and especially to the colleagues I have just mentioned. No Senator could ask for more cooperation than I have had from his colleagues on both sides of the Capitol. The six new Members of the House, in particular, have helped restore Hoosier pride in their congressional representation. I hope the voters of our State will return them and their two senior colleagues, Mr. MADDEN and Mr. DENTON, to the Halls of Congress.

SECOND SUPPLEMENTAL APPROPRIATION BILL, 1961—CONFERENCE REPORT

Mr. HAYDEN. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13161) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER (Mr. MCGEE in the chair). The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of today, p. 18691, CONGRESSIONAL RECORD.)

Mr. MANSFIELD. Mr. President, will the Senator yield to me so that I may suggest the absence of a quorum?

Mr. HAYDEN. I yield to the Senator.

Mr. MANSFIELD. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there objection to the present consideration of the conference report?

There being no objection, the Senate proceeded to consider the report.

Mr. HAYDEN obtained the floor.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. MANSFIELD. It is my understanding that the additional funds which had been allowed by the Senate for the Office of Inspector General have once again been reduced from $1,700,000 to $1,200,000, as previously agreed to. As the Senator knows—and I am delighted that the senior Senator from Massachusetts [Mr. SALTONSTALL] is present—the purpose of the Inspector General is to bring about economy, better efficiency, and more efficient administration. The purpose is to do away with duplication, waste, and inefficiency. Money is required to do this, and it would be money well spent.

Would it be safe to assume that in view of the circumstances surrounding this particular supplemental appropriation, as it affects this particular office, it would be possible for the Inspector General's Office to spend a little bit ahead of its prorated monthly needs, if the occasion arises, and return in January with reasonable assurance that the Office of Inspection General would be given consideration for additional funds?

Mr. HAYDEN. So far as the Senate Committee on Appropriations is concerned, I believe they are still satisfied with the work of the Inspector General, which has been salutary and beneficial service. I should like to see him receive what he needs. So far as I am concerned, I would be glad to urge that that be done in January.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. SALTONSTALL. I agree heartily with what the Senator from Montana has said. This office was established to try to make the entire administration of the mutual security program more efficient and economical, and to make sure that our dollars were well spent. For example, even under the present operation, which is without limitation, when one inspector is assigned to cover nine countries, his service cannot be as efficient as desired. So I hope that the statement of the Senator from Arizona can be substantially carried out next January. I think it is a much wiser way to do it than possibly go into the technicalities in the law, which we could go into, but which might upset the membership of the House.

Mr. HAYDEN. There is no question at all that it is prudent for the Treasury of the United States to have these inspections made. Money can be saved by doing so. That has been demonstrated.

Mr. MANSFIELD. The fact is that this is a congressional office set up under congressional authority.

Mr. CHAVEZ. Mr. Murphy, the present Inspector General, is doing a very fine job according to the instructions given to him by Congress. He is a representative of Congress, and he is doing a fine job in his line of endeavor.

Mr. MANSFIELD. The Senator is absolutely correct. He is honest, efficient, and is getting things accomplished.

Mr. CHAVEZ. He is honest and efficient.

Mr. MANSFIELD. We all have great respect for him.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. SALTONSTALL. I agree with what the Senator from New Mexico has said. May I make a brief remark? I am personally very disappointed that the House has been so adamant on these nine different disagreements that it had with the Senate. It acceded on only one amendment in amount. It left the language amendments unchanged. One of them we have just been discussing. But of the other two, one concerns the deobligating and reobligating authority, which means that if the appropriation is left the way it is now, either funds will be inefficiently spent for purposes for which they may not be needed, or if they are deobligated, then those funds cannot be spent for any other purpose, though it may be a very worthy purpose.

The other language change which the Senate inserted and the House would not accept instead of its own language is that notice must be submitted to the Appropriations Committees of the House and the Senate for every technical cooperation project for which money is spent.

I think that the suggestion of the majority leader with respect to reports on this program to committees of the House and the Senate, in the same way that the Appropriations Committees are now receiving reports from the Armed Forces when projects are changed, is an eminently satisfactory one, because it would give Congress notice of such change. Congress could through its committees see that such projects could not be changed if it wanted to. Now, under the House language, all projects must be submitted to the House and the Senate for approval before funds are appropriated and cannot thereafter be changed.

We know that in dealing with countries all around the world that it is almost impossible to say today what may be wise to do a year from now or 9 months from now. However, I do not intend to contest the concurrence with the House in these amendments. I believe we have done the best we can. But as one member of the Appropriations Committee who is interested in mutual security, I believe in the purposes of mutual security, and I am very much disappointed that we feel that we have gone as far as we can, and that we must concur with the House or else get no bill.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. HOLLAND. I agree with the Senator from Massachusetts [Mr. SALTONSTALL] and also with the Senator from Arizona [Mr. HAYDEN], our distinguished committee chairman, that we should concur. I thought Under Secretary Dillon made a fine presentation before our committee with respect to the total of $190 million, which he asked to have restored, and which the Senate moved to restore. However, he stated that $75 million of that sum, which was the sum we would have added back to the Development Loan Fund, could be dispensed with until after the first of the year. We left in serious dispute $115 million, out of which the House by its action today has granted $65 million. I think that is as good a settlement as we could hope for under the strained situation existing, and I hope we will accept it.

I should like to say one thing more about the fund for the Inspector General and Comptroller. We brought out from Mr. Dillon that he was willing to modify the practice which has heretofore existed under which the reports of investigations have come to the State Department, and under which practice there were some, at least, who felt that the Senate and the House were not sure we were getting the full picture. He agreed to change that practice, so that duplicate reports could come, at the same time that they went to Under Secretary Dillon, to the two Committees on Appropriations, and we presented that fact very strongly and aggressively to the House conferees.

Mr. HAYDEN. The Senator must not forget that the Department also volunteered to send the same information to the Foreign Relations Committee.

Mr. HOLLAND. The Senator is correct, and that was a fine addition to what they agreed to. I think they showed a cooperative attitude. My feeling is that if they will put that cooperative attitude into immediate practice for the rest of the year, they will be in a strong position when Congress returns and when the first supplemental or deficiency bill for funds is considered. As mentioned by the distinguished minority whip, it may then be possible to secure full funds for the functioning of the Inspector General and Comptroller. I hope that that will be the result early next year.

Mr. JAVITS. Mr. President, will the Senator from Arizona yield?

Mr. HAYDEN. I yield.

Mr. JAVITS. Will we have reason to expect that this very onerous condition as explained by the Senator from Massachusetts [Mr. SALTONSTALL] will again be the subject of consideration of the majority leader, who has made a fine contribution in the effort to resolve it? Do we have a right to expect that this matter will again be subject to consideration by the Appropriations Committee, with a view, when we have a better opportunity, and with the aid of the majority leader and the minority leader, and our senior representative on the Appropriations Committee, of undoing what everyone recognizes as an onerous and impossible situation?

Mr. HAYDEN. That is a question to be considered. There will be a supplemental appropriation bill next year. It will be appropriate to take up the subject at that time.

Mr. DIRKSEN. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. DIRKSEN. I concur in some of the sentiments uttered by the distinguished Senator from Massachusetts as to both frustrations and disappointments about what finally happened to the bill on the floor of the House. What amazes me, of course, over the years—and I have served many times on conference committees on this bill, and the focal point of attack by the House conferees has always been on defense support—is that by a vote of 203 to 193 the $65 million for defense support was finally restored.

Then technical cooperation was passed over, and the addition to special assistance was defeated by a vote of 176 to 216.

There was no vote on the ICA administrative expenses, and no vote on the Development Loan Fund.

I believe it was made very clear that the Development Loan Corporation could operate effectively until we got back in January, God willing—and I always add that, of course.

There was a voice vote on the administrative expenses for the Development Loan Fund. There was no vote on the so-called deobligation and reobligation authority, and no vote on the technical cooperation proviso. I believe there was a voice vote on the addition in the case of the Inspector General and Comptroller.

Mr. Murphy, who has been at my elbow so many times, in all hours of the day and night, is one of the really dedicated public servants who has sweated through many of these agonies with us, and always undertakes to do a good job.

Mr. SALTONSTALL. And objectively.

Mr. DIRKSEN. Very much so. I would not contest the report which our distinguished friend from Arizona files. I only call attention to two facts with respect to deobligation and reobligation. It appears to me that it was shortsighted on the part of any branch of Congress to insist that when an agency has approved a project and then discovers that perhaps it is not justified, or it might be wasteful, and throws it overboard, it shall lose the funds and may not, instead, bring in another project which has been carefully explored and which is believed to be economically justified. That is as shortsighted on the part of Congress as anything I can think of.

I hope the distinguished chairman of the Appropriations Committee, if the appropriate agencies come before us, will give very respectful attention to curing that difficulty.

I believe the same thing can be said about the proposal with respect to technical cooperation. The idea of trying to get a country-to-country agreement, particularly with the new countries coming into being in Africa, and then having to come back to the committees of Congress, not to follow the Senate idea of making a report, but to justify the project, hamstrings the agencies and hamstrings the executive branch.

Finally, we have put a great deal of emphasis upon shifting from grants to loans, and the subject has been ventilated freely and eloquently on the floor of the Senate for a long time. The loan program for undeveloped countries is in being and is beginning to grow. Yet the bill carries less in administrative funds and more restrictions with which the people can administer the program than before. That is not realistic in anyone's book.

I can understand, having talked with the House leadership, that there is nothing further that we can do, and that we

might as well concur in the report that is before us.

I wish to say of the majority leader, who made a determined attempt when the first conference report was before us, to see that these items were restored, that he kept his word. He became a part of the machinery on the appropriations, and undertook as best he could, along with his associates on the committee, to secure restorations of these important items.

I could charge him with failure to follow through, but I realize what the obstacles, impediments, and difficulties are. He has done a noble job in this respect and I salute him and I commend him for it.

At the same time, I share also his disappointment and his sense of frustration that there are portions of the great legislative branch that will persist in the course of error, no matter what we do in order to show them the light and try to bring them into paths of rectitude and righteousness. We have failed in that endeavor.

I do not propose to stand in the way of having the report approved. I salute the distinguished chairman of the committee. He has done a noble job. I have served as a disciple at his feet, and I know how often he has reasserted and reaffirmed his interest in this program, and how generously and how vigorously he has supported it.

So, in the hope that we can take a look at these very restrictive legislative provisos early in January, I am willing now to commend this bill to the gentle keeping of the Senate and whatever a majority of it wishes to do, with the hope that the errors can be eliminated at some future time.

Mr. JOHNSON of Texas. Mr. President, I concur in what the distinguished minority leader has said. The Senate has been quite patient and faithful and diligent in connection with the consideration it has given to the views of the President and the executive department. We heard the testimony and brought the original bill to the Senate. It was a bill that was generally satisfactory to the President.

Subsequently we went to conference, and the conference report was disturbing to the President, and we gave further consideration to the subject. We brought back a bill that I thought was satisfactory. The House accepted only one of the several provisions. If I thought there was anything else that we could do about it, I would ask the Senate to be patient and give further consideration to it. However, the distinguished minority leader has explored the matter in the House, as I have also explored it, and I am unable to give any encouragement to any Senator to the effect that if we should reject the conference report and send it back and ask for another conference, we would make any further progress. I think that under the circumstances the best thing to do is to accept the fact that we have been successful in the Senate but unsuccessful in the House. I am not in the position of saying whether our judgment is better than that of the House. I am in the position of saying that this is our judgment, and we have said it three times. If the House is unwilling to accept it, the best we can do is reconcile our differences as quickly and as courteously as we can. We have done that.

I pay tribute to the great leader of the Appropriations Committee. He is a constant inspiration to all who serve with him. He is one of the finest, sweetest, most gentle, effective legislators I have ever known.

Mr. SALTONSTALL. Mr. President, the minority leader, the Senator from Arizona, the Senator from Florida, and I, perhaps when the majority leader was not listening, said that we would do our best to try to see that some of these funds, particularly at the administrative end, were considered again thoughtfully next January.

I hope that with that statement the majority leader will agree.

Mr. JOHNSON of Texas. I certainly do.

Mr. DIRKSEN. Would the Senator add to his statement not only "thoughtfully" but also "prayerfully"?

Mr. JOHNSON of Texas. I do not know what contribution, if any, I shall be able to make next January, but I will do whatever I can to assist.

Mr. ALLOTT. Mr. President, I join with both the majority leader and the minority leader in their statements. I sat in this particular conference, and I know that some of us who were on the conference committee felt that, perhaps, there were critical statements. Personally, I feel just the reverse. I compliment the chairman of the committee and also the members of the committee of conference this time, and also last week, because unless one has been in contact with this situation I do not believe he can appreciate exactly what the Members of the Senate have been up against. I am not happy, of course, with the outcome of this effort, as are few members of the committee. At the same time, I must say that the conference committee has done excellent work. We will consider these other matters next year when Congress reconvenes.

Mr. BRIDGES. Mr. President, I say to the distinguished chairman of the Committee on Appropriations, who was also the chairman of the conference, that, in view of the position taken by the House today, and in view of the fact that defense support is one of the most essential items in the foreign aid or mutual security program, I think what we must do is to accept the report and action of the House and approve the report.

As the distinguished Senator from Arizona remembers, there was no controversy over military assistance. The contingent fund, which was considered to be the most important single item, was left intact. I think the item with respect to defense support certainly warrants our going ahead with acceptance.

Mr. HOLLAND. Mr. President, in my opinion, the distinguished chairman of the Committee on Appropriations, who was also chairman of the conference, did everything anybody could do, as did other Senators in conference. Particularly, I commend the majority leader, who asked for the difficult position of membership on the conference and then asserted himself as vigorously as was possible in the conference.

Mr. President, amendments Nos. 62 and 63 relate to the Panama Canal. As to amendment No. 62, I think the Senate should recede from its amendment to the House bill. As to amendment No. 63, I think we should recede and adopt the amendment which the House has already adopted. While I do not think it gives us a perfect answer to the problem involved, which has to do with the limitation on costs for building new quarters for non-American employees at the canal, I think it makes progress, and that if we learn of something which will require additional handling, that can be taken care of next January.

Mr. HAYDEN. There is enough to take care of the situation between now and January.

Mr. HOLLAND. Mr. President, I therefore ask that the Senate recede on its amendments Nos. 62 and 63 and adopt the House amendment to No. 63.

Mr. HAYDEN. That will be done.

Mr. FULBRIGHT. Mr. President, I join with the minority leader and other Senators in paying tribute to the work of the chairman of the Committee on Appropriations and of the majority leader. I know that this is an old refrain now, but House conferees are very difficult.

I also express not only my appreciation but also my sympathy to those who have to serve on committees of conference. I can think of no more distasteful job that I have ever encountered in Congress.

The majority leader said he is not in a position to say his judgment is better than that of the other conferees. Not having been on this conference, I am in a position to say that I think his judgment is better and that I think the judgment of the committee of the Senate is better. I only regret that the Senate conferees have faced an impossible situation. It seems to me that if this practice continues, it will put an end to our foreign relations altogether. Then we can come home and forget about the rest of the world.

Mr. HART. Mr. President, I ask that a brief paragraph in the report of the House Committee on Appropriations on the second supplemental appropriation bill, H.R. 13161, be printed at this point in the RECORD.

There being no objection, the paragraph was ordered to be printed in the RECORD, as follows:

OFFICE OF CIVIL AND DEFENSE MOBILIZATION

It has been suggested to the Committee that there may be some inequities existing in the matching grant program for the purchase of civil defense equipment by States and their political subdivisions, and that non-legal payments have been made by OCDM in some instances. If there are inequities the legislative committee should look into the matter and take whatever action is necessary to correct such condition.

Mr. HART. Mr. President, this item deals with Federal-State matching funds for civil defense equipment used by State and local governments. What is referred to in the paragraph is the fact that field audits by the General Accounting Office show that in every State

of the Union there are cases in which the procurement of civil defense equipment was made prior to the effective date of the appropriation under which the payments were made. There was no overexpenditure of appropriation authorization, and sufficient appropriations were available.

I sought to have language incorporated in H.R. 13161 which would ratify and confirm such expenditures if they were otherwise proper.

In the judgment of the able chairman of the House Subcommittee on Appropriations which handled the bill, action by the legislative committee should be taken before the item is brought to the Committee on Appropriations. I am guided by his suggestion, and hope legislative action can be taken early in the next session. Otherwise, costly and time consuming accounting and collection activities must follow on the part of Federal, State, and local governmental units.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its action on certain amendments of the Senate to House bill 13161, which was read as follows:

IN THE HOUSE OF REPRESENTATIVES, U.S.,
August 31, 1960.

Resolved, That the House recede from its disagreement to the amendments of the Senate numbered 5, 6, 35, 58, 61, 69, 70, 71, 72, 73, and 85 to the bill (H.R. 13161) entitled "An Act making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes", and concur therein.

That the House recede from its disagreement to the amendment of the Senate numbered 3, and concur therein with an amendment, as follows: In lieu of the sums of "$1,300,000" and "$2,500" named therein insert "$650,000" and "$1,250", respectively.

Amendment numbered 16: That the House recede from its disagreement to the amendment of the Senate numbered 16 and concur therein with an amendment, as follows: In lieu of the sums of "$275,000" and "$170,000" named in said amendment insert "$137,500" and "$100,000", respectively.

Amendment numbered 23: That the House recede from its disagreement to the amendment of the Senate numbered 23 and concur therein with an amendment, as follows: Delete the last sentence thereof.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30 and concur therein with an amendment, as follows: In lieu of the matter proposed, insert the following:

"PUBLIC BUILDING CONSTRUCTION AND DEPARTMENT OF SANITARY ENGINEERING

"For an additional amount for "Capital outlay, Public Building Construction" and "Capital outlay, Department of Sanitary Engineering", for construction projects as authorized by the Act of April 22, 1904 (33 Stat. 244), the Act of May 18, 1954 (68 Stat. 105), and the Act of Jun 6, 1958 (72 Stat. 183) and as submitted to the Congress in House Document Numbered 403 of June 1, 1960, such sums as may be necessary, but no obligation shall be incurred for any item or project proposed in said document which will (1) result in a deficit in the general fund of the District of Columbia, or (2) exceed the estimated cost as submitted therein to the Congress."

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34 and concur therein with an amendment, as follows: In lieu of the sum named therein, insert "$2,500,000".

Amendment numbered 37: That the House recede from its disagreement to the amendment of the Senate numbered 37 and concur therein with an amendment, as follows: In lieu of the sum of $290,000 named therein, insert "$145,000".

Amendment numbered 56: That the House recede from its disagreement to the amendment of the Senate numbered 56 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert "$37,500, of which not to exceed 15 per centum shall be available for salaries and administrative expenses:".

Amendment numbered 63: That the House recede from its disagreement to the amendment of the Senate numbered 63 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert ": *Provided*, That no part of the foregoing amount shall be available for any expenses related to the construction of any quarters at an average cost in excess of $9,000 per unit".

Amendment numbered 84: That the House recede from its disagreement to the amendment of the Senate numbered 84 and concur therein with an amendment, as follows: In lieu of the sums of "$300,000" and "$3,000" named therein, insert "$150,000" and "$1,500", respectively; and delete the proviso.

That the House insist upon its disagreement to the amendments of the Senate numbered 7, 8, 9, 10, 11, 12, 13, 14, 15, and 62 to said bill.

Mr. HAYDEN. Mr. President, I move that the Senate concur in the amendments of the House to the amendments of the Senate numbered 3, 16, 23, 30, 34, 37, 56, 63, and 84.

The motion was agreed to.

Mr. HAYDEN. Mr. President, I move that the Senate recede from its amendments numbered 7, 8, 9, 10, 11, 12, 13, 14, 15, and 62.

The motion was agreed to.

Mr. HAYDEN. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a summary tabulation covering the second supplemental appropriation bill, 1961, showing the budget estimates, the House and Senate versions of the bill, and the amounts finally agreed upon.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Second supplemental appropriation bill, 1961 (H.R. 13161)

Document No.	Department or activity	Budget estimates	House bill	Senate bill	Conference action
	FUNDS APPROPRIATED TO THE PRESIDENT				
400	President's special international program	[1] *($986, 800)*		$986, 800	
	Special foreign currency programs:

NOTE.—Indefinite appropriations are included in this table.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed a bill (H.R. 13021) to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes, in which it requested the concurrence of the Senate.

NINETEEN HUNDRED SIXTY-TWO WORLD SPORT PARACHUTING CHAMPIONSHIPS, ORANGE, MASS.

Mr. JOHNSON of Texas. Mr. President, I send to the desk a House joint resolution and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The LEGISLATIVE CLERK. The joint resolution (H.J. Res. 723) extending an invitation to the Federation Aeronautique Internationale to hold the 1962 World Sport Parachuting Championships at Orange, Mass., was read twice by its title.

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

Mr. LAUSCHE. I object.

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of the joint resolution.

Mr. LAUSCHE. I have no objection to the extending of an invitation to hold that meeting in Massachusetts. However, I am told that this measure is a precursor for a subsequent request that Congress appropriate $150,000 to finance the event.

Mr. JOHNSON of Texas. I have no such information as that. The joint resolution certainly does not provide for it.

Mr. President, I move that the Senate proceed to the consideration of the joint resolution.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the joint resolution.

Mr. LAUSCHE. Mr. President, I have no objection to the invitation to hold the meeting. I do, however, want the Senate to know that I have been informed that a request will come to the Senate for a grant of $150,000 to help finance the meeting. I shall oppose it. That is all I have to say.

The PRESIDING OFFICER. The joint resolution is open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 723) was ordered to a third reading, read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I move that the Senate reconsider the vote by which the joint resolution was passed.

Mr. DIRKSEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL ARMED FORCES MUSEUM ADVISORY BOARD

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar 2010, S. 3846.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 3846) to establish a National Armed Forces Museum Advisory Board of the Smithsonian Institution to authorize expansion of the Smithsonian Institution's facilities for portraying the contributions of the Armed Forces of the United States, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a statement of the purpose of the bill.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

S. 3846 would establish in the Smithsonian Institution a National Armed Forces Museum Advisory Board, which would provide advice and assistance to the Regents of the Smithsonian Institution on portrayal of exhibits depicting the contributions which the Armed Forces of the United States have made to American society and culture.

The Board would be composed of 11 members, including the Secretary of Defense (ex officio), the Secretary of the Smithsonian Institution (ex officio), and 9 members appointed by the President of the United

States. The members would serve without compensation but would be reimbursed for necessary expenses.

The Smithsonian Institution—

shall commemorate and display the contributions made by the military forces of the Nation toward creating, developing, and maintaining a free, peaceful, and independent society and culture in the United States of America.

In fulfilling its obligations under the act, the Smithsonian Institution would collect, preserve, and exhibit military objects of historical interest and significance.

The Board of Regents of the Smithsonian Institution would be authorized and directed, with the assistance of the Board, to seek land and buildings in and near the District of Columbia suitable for the display of the military collections.

The heads of executive departments and independent agencies of the Government would be authorized to transfer or loan to the Smithsonian Institution for its use without charge any suitable objects, equipment, or records for exhibition, historical, or other appropriate purposes.

There would be authorized to be appropriated to the Smithsonian Institution such sums as would be necessary for the purposes of the act.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 3846) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) there is hereby established in the Smithsonian Institution a National Armed Forces Museum Advisory Board (hereinafter referred to as the Board), which shall provide advice and assistance to the Regents of the Smithsonian Institution on matters concerned with the portrayal of the contributions which the Armed Forces of the United States have made to American society and culture.

(b) The Board shall be composed of eleven members as follows:

(1) The Secretary of Defense, who shall serve as an ex officio member;

(2) The Secretary of the Smithsonian Institution, who shall serve as an ex officio member;

(3) Nine members appointed by the President, (A) three of whom shall be appointed from persons recommended by the Secretary of Defense to represent the Armed Forces, and (B) two of whom shall be appointed from among persons recommended by the Regents of the Smithsonian Institution. Not less than two members appointed by the President shall be from civilian life.

(c) Members of the Board appointed by the President shall be appointed to serve for a period of six years; except that any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term, and the terms of office of the members first appointed shall expire, as designated by the President at the time of appointment, three at the end of two years, three at the end of four years, and three at the end of six years.

(d) Five members of the Board shall constitute a quorum and any vacancy in the Board shall not affect its power to function.

(e) The members of the Board shall serve without compensation but shall be reimbursed for travel, subsistence, and other necessary expenses incurred by them in the performance of their duties as members of the Board.

(f) The Board shall select officers from among its members biennially and shall make such bylaws, rules, and regulations as it deems necessary for the furtherance of its business.

SEC. 2. (a) The Smithsonian Institution shall commemorate and display the contributions made by the military forces of the Nation toward creating, developing, and maintaining a free, peaceful, and independent society and culture in the United States of America. The valor and sacrificial service of the men and women of the Armed Forces shall be portrayed as an inspiration to the present and future generations of America. The demands placed upon the full energies of our people, the hardships endured, and the sacrifice demanded in our constant search for world peace shall be clearly demonstrated. The extensively peacetime contributions the Armed Forces have made to the advance of human knowledge in science, nuclear energy, polar and space exploration, electronics, engineering, aeronautics, and medicine shall be graphically described. The Smithsonian Institution shall interpret through dramatic display significant current problems affecting the Nation's security. It shall be equipped with a study center for scholarly research into the meaning of war, its effect on civilization, and the role of the Armed Forces in maintaining a just and lasting peace by providing a powerful deterrent to war. In fulfilling its purposes, the Smithsonian Institution shall collect, preserve, and exhibit military objects of historical interest and significance.

(b) The provisions of this Act in no way rescind Public Law 722, Seventy-ninth Congress, approved August 12, 1946, which established the National Air Museum of the Smithsonian Institution, or any other authority of the Smithsonian Institution.

SEC. 3. (a) The Board of Regents of the Smithsonian Institution is authorized and directed, with the advice and assistance of the Board, to investigate and survey lands and buildings in and near the District of Columbia suitable for the display of military collections. The Board of Regents of the Smithsonian Institution shall, after consulting with and seeking the advice of the Commission on Fine Arts, the National Capital Planning Commission, and the General Services Administration, submit recommendations to the Congress with respect to the acquisition of lands and buildings for such purpose.

(b) Buildings acquired pursuant to recommendations made under subsection (a) of this section shall be used to house public exhibits and study collections that are not appropriate for the military exhibits of the Smithsonian Institution on the Mall in the District of Columbia. Facilities shall be provided for the display of large military objects and for the reconstruction, in an appropriate way, on lands acquired pursuant to recommendations made under subsection (a) of this section, of exhibits showing the nature of fortifications, trenches, and other military and naval facilities characteristic of the American colonial period, the War of the Revolution, and subsequent American military and naval operations.

SEC. 4. The heads of executive departments and independent agencies of the Government are authorized to transfer or loan to the Smithsonian Institution for its use without charge therefor military, naval, aeronautical, and space objects, equipment and records for exhibition, historical, or other appropriate purposes.

SEC. 5. There are hereby authorized to be appropriated to the Smithsonian Institution such sums as may be necessary for the purposes of this Act.

Mr. DIRKSEN. Mr. President, I move that the Senate reconsider the vote by which the bill was passed.

Mr. JOHNSON of Texas. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ACTIVE DUTY AGREEMENTS FOR RESERVE OFFICERS

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 2014, H.R. 5132.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 5132) to amend title 10, United States Code, with respect to active duty agreements for Reserve officers, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill which had been reported from the Committee on Armed Services with amendments to strike out all after the enacting clause and insert:

That section 265 of the Armed Forces Reserve Act of 1952 (50 U.S.C. 1016) is amended—

(1) by striking out the words "of one-half" in the first sentence of subsection (a) thereof;

(2) by amending subsection (b)(6) to read as follows:

"(6) Except as provided in this paragraph, a person who upon release from active duty is eligible for disability compensation under laws administered by the Veterans' Administration. However, such a person may be awarded readjustment pay under this section in addition to disability compensation, subject to deduction from the disability compensation of the amount of the readjustment payment which has not otherwise been recovered. Receipt of readjustment pay shall not deprive a person of any part of any disability compensation to which he may become entitled, on the basis of subsequent service, under laws administered by the Veterans' Administration.";

(3) by redesignating subsection (h) as subsection (j) and by inserting immediately following subsection (g) the following new subsections:

"(h) Under regulations to be prescribed by the Secretary concerned there shall be deducted from the monthly retired pay of a member of a reserve component who has received readjustment payments under subsection (a) and who qualifies for retired pay under any provision of title 10, United States Code, except chapter 67 thereof, an amount sufficient to recover during the life expectancy of the member one-half of the readjustment payment that the member has received.

"(i) Subsection (h) does not apply to any person to whom readjustment pay has been paid before the effective date of that subsection."

SEC. 2. Notwithstanding an election under section 265 (b)(6) of the Armed Forces Reserve Act of 1952, before the date of enactment of this Act, to receive readjustment pay under that section, any person who has made such an election may be awarded disability compensation to which he is otherwise entitled, subject to deduction as provided in that section, as amended by this Act, of the amount of such readjustment payment. However, no such award shall be effective for any period before the enactment of this Act.

Mr. JOHNSON of Texas. Mr. President, the measure is approved by the Department of Defense and has been reported unanimously by the Committee on Armed Services.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a statement prepared by the chairman of the Committee on Armed Services, the Senator from Georgia [Mr. RUSSELL].

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR RUSSELL

LUMP SUM READJUSTMENT PAYMENTS FOR RESERVE OFFICERS INVOLUNTARILY RELEASED FROM ACTIVE DUTY

This bill would amend the authorization for paying a lump sum readjustment payment to members of the Reserve components who are involuntarily released from active duty after having served on active duty for at least 5 years. The basic law was enacted in 1956. This law provides readjustment payments in the amount of one-half of 1 month's basic pay for each year of active service that a member of a Reserve component has performed prior to his involuntary release from active duty. The purposes of such payments are to ease the transition to civilian life for reservists who have been involuntarily released after long periods of active duty, and to induce young Reserve officers to remain on active duty after their obligated periods of service have expired.

The committee amendments to H.R. 5132 propose to increase the basis for computing these payments from one-half of 1 month's pay for each year served to 1 month's pay for each year served. The committee decided to make this recommendation after carefully considering the somewhat different approach contemplated in H.R. 5132 as it was referred to the committee. In that form, the bill imposed a mandatory requirement that except for physicians, dentists, and veterinarians, every Reserve officer who remained on active duty for longer than 2 years had to be offered a written agreement to serve on active duty for not to exceed 6 years. Upon successful completion of service under such an agreement, the member concerned would have been entitled to a lump sum payment in the amount of 2 month's pay for each year served under the agreement. Moreover, if the agreement were terminated through no fault of the member concerned, the member would have been entitled to 1 month's pay and allowances for each year not served under the agreement. The original bill also provided that at the 14-year point in service, a Reserve officer had to be (1) released from active duty, (2) extended a Regular commission, or (3) offered a written agreement for a period long enough to qualify him for the immediate receipt of retired pay. Since there was apprehension that these provisions might result in heavy attrition against members of the Reserve now serving on active duty, the bill provided that those reservists now on active duty with 14 or more years of service would be considered to have a contract for a period long enough to qualify them for the immediate receipt of retired pay. This latter provision was vigorously opposed by the executive branch.

So far as the Department of Defense is concerned, the problem that exists in this area is that substantial numbers of young Reserve officers are needed for active duty for periods longer than they are required by law to serve, but for periods that are not long enough to qualify the officers concerned for retirement. The Navy in particular needs young officers for 10 or 12 years of service but not for a 20-year career. From the point of view of the reservists affected, the problem is that many of them have rendered valuable service for relatively long periods but reductions in force and promotion attrition frequently result in their being released from active duty before qualifying for the immediate receipt of retired pay.

The committee recognizes both of these problems. Instead of instituting a new system requiring written agreements for almost every reservist on active duty, and of permitting payments for service under these agreements even if the reservist left active duty voluntarily, the committee considered it preferable to increase the readjustment payments authorized under existing law. In following this course, the committee's amendment avoids the administrative burden and expense of executing written agreements with Reserve officers on active duty (and there are some 142,000 of these with more than 2 years of service), and it follows the precedent of conditioning readjustment payments on an involuntary release from active duty. The increased payments that would be authorized under this bill should serve both to make a short-term military career more attractive for the young reservist and to provide more equitable treatment for the longer term reservists who are released before qualifying for retirement pay.

The bill also has two relatively minor features that I shall discuss briefly. If a person received the increased readjustment payments and subsequently qualified for retired pay other than that received by reservists at age 60, for a combination of 20 years of active and inactive service, the amount of the additional readjustment payment this bill authorizes would be deducted from the retired pay the reservist received in the future. Let me stress that this recoupment does not apply to the one-half of 1 month's pay for each year of active service that is paid under existing law. The amount to be recouped is only the additional payments this bill would provide.

Under existing law, a reservist leaving active duty must choose between readjustment pay and disability compensation from the Veterans' Administration. Some of these persons have elected readjustment pay because they had a very small degree of disability, or because they were unaware of a latent disability that subsequently might entitle them to compensation from the Veterans' Administration that is more attractive than the amount of readjustment pay they have received. An election once made has been held to be irrevocable. The Veterans' Administration urged an amendment, and the committee agreed to it, which provides that a person who has elected readjustment pay may nonetheless receive Veterans' Administration compensation, but the amount of readjustment pay is deducted from such compensation. Receipt of the VA compensation is prospective only.

It is difficult to get meaningful cost estimates for a bill of this type because the cost depends on the number of reservists who will be involuntarily released in the future, and this is difficult to predict. For fiscal year 1961, the Department estimates that under existing law readjustment payments in the amount of $4,859,000 would be made. Since this bill doubles these payments, it is fair to assume that the additional cost for 1961 is the same figure—$4,859,000. This could prove to be a good investment for the Government if it attracts greater numbers of young reservists for continued active duty, and it should mitigate the hardships and disappointments experienced by reservists released to inactive duty after relatively long periods of service.

The PRESIDING OFFICER (Mr. MCGEE in the chair). The question is on agreeing to the committee amendment.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 5132) was read the third time and passed.

The title was amended, so as to read: "An act to increase the lump-sum readjustment payments for members of the Reserve components who are involuntarily released from active duty, and for other purposes."

EXPANSION OF FEDERAL COMMUNICATIONS COMMISSION'S REGULATORY AUTHORITY

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 1740) to amend section 202(b) of the Communications Act of 1934 in order to expand the Federal Communications Commission's regulatory authority under such section, which was to strike out lines 6 through 10, inclusive, and insert:

(b) Charges or services, whenever referred to in this act, include charges for, or services in connection with, the use of common carrier lines of communication, whether derived from wire or radio facilities, in chain broadcasting or incidental to radio communication of any kind.

Mr. PASTORE. Mr. President, I understand there has been agreement by both the majority and the minority on this measure.

Mr. DIRKSEN. That is correct.

Mr. PASTORE. I move that the Senate concur in the House amendment, which is a technical, clarifying amendment.

The motion was agreed to.

REPORTS ON ACCIDENTS BY CERTAIN COMMON CARRIERS BY RAILROAD

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 1964) to amend the act requiring certain common carriers by railroad to make reports to the Interstate Commerce Commission with respect to certain accidents in order to clarify the requirements of such act, which were, on page 1, line 9, strike out "It" and insert "That it"; on page 2, line 6, strike out all after "person" down through and including "more," in line 8; on page 2, line 15, after "1910" insert "(45 U.S.C. sec. 42)"; on page 2, line 21, strike out all after "Act" over through and including "Act" in line 2, page 3; and on page 3, line 3, after "1910" insert "45 U.S.C., sec. 43)".

Mr. BARTLETT. I move that the Senate concur in the amendments of the House, which are technical in nature.

The motion was agreed to.

ANNEXATION OF CERTAIN REAL PROPERTY OF THE UNITED STATES BY THE CITY OF WYANDOTTE, MICH.

Mr. JOHNSON of Texas. Mr. President, I send to the desk Calendar No. 2018, House bill 383, to authorize the annexation of certain real property of

the United States by the city of Wyandotte, Mich., and I ask for the immediate consideration of the bill.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Interior and Insular Affairs, with an amendment: At the end of the bill, add the following new section:

SEC. 3. Nothing in this Act shall prevent the Secretary of the Interior from establishing a national migratory bird refuge on the Federal lands referred to in this Act and the closing of these lands and water areas adjacent thereto to the taking, pursuit, or capture of migratory birds, if the Secretary of the Interior considers such action necessary in carrying out responsibilities of the United States pursuant to international treaties and implementing statutes. The Secretary is further authorized to cooperate and enter into agreements with the city of Wyandotte for the recreational use of these lands where not inconsistent with the purpose for which the refuge is established.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. JOHNSON of Texas. I move that the vote by which the bill was passed be reconsidered.

Mr. DIRKSEN. I move to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

CONVEYANCE OF TITLE TO CERTAIN LANDS BY OREGON SHORT LINE RAILROAD

Mr. JOHNSON of Texas. Mr. President, House bill 10586 is at the desk. I ask that it be laid before the Senate.

The Presiding Officer laid before the Senate the bill (H.R. 10586) to enable the Oregon Short Line Railroad Co. to convey title to certain lands in Idaho to the Pocatello First Corp. of the Church of Jesus Christ of Latter-day Saints, which was read twice by its title.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. CHURCH. Mr. President, this bill enables the Oregon Short Line Railroad Co. to convey title to certain lands in Idaho to the Pocatello First Corp. of the Church of Jesus Christ of Latter-day Saints. An amendment in the House provides that the act shall become effective only if the church pays to the United States within 1 year the present fair market value of the land, less the value of improvements not placed thereon by the United States.

When the companion bill was considered in my Subcommittee on Indian Affairs, it was developed that the United States has only a reversionary interest, to take effect if the land ceases to be used by the railroad for its purposes. Consideration was given to a formula for compensation to the United States based on the value of the reversion, rather than the full market value.

I am now informed that the church is willing to pay the United States the full present value of the land, and thus I think the bill as passed by the House should be passed by the Senate.

The PRESIDING OFFICER. If there is no amendment to be offered, the question is on the third reading of the bill.

The bill was ordered to a third reading, was read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I move that the vote by which the bill was passed be reconsidered.

Mr. DIRKSEN. Mr. President, I move to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

PLANNING, DEVELOPMENT, MAINTENANCE, AND COORDINATION OF WILDLIFE, FISH, AND GAME CONSERVATION — CONFERENCE REPORT

Mr. ENGLE. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2565) to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2565) to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 3, and 4.

That the House recede from its disagreement to the amendments of the Senate numbered 5 and 6, and agree to the same.

CLAIR ENGLE,
E. L. BARTLETT,
NORRIS COTTON,
Managers on the Part of the Senate.

HERBERT C. BONNER,
FRANK W. BOYKIN,
GEORGE P. MILLER,
THOR C. TOLLEFSON,
WILLIAM K. VAN PELT,
Managers on the Part of the House.

Mr. ENGLE. Mr. President, the conference report is a unanimous one, and adjusts certain technical difficulties regarding the management of fish and game permits on Federal military reservations.

The PRESIDING OFFICER. The question is on agreeing to the report.

The report was agreed to.

Mr. ENGLE subsequently said: Mr. President, I ask unanimous consent that there be printed in the RECORD at this point in my remarks a letter from the International Association of Game, Fish, and Conservation Commissioners of August 2, 1960, addressed to the two particular amendments which are under consideration in the conference report, in order to explain the action taken by this body.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

INTERNATIONAL ASSOCIATION
OF GAME, FISH, AND
CONSERVATION COMMISSIONERS,
Raleigh, N.C., August 2, 1960.

The Honorable HERBERT C. BONNER,
Chairman, Committee on Merchant Marine and Fisheries, House Office Building, Washington, D.C.

DEAR MR. BONNER: It is our understanding that H.R. 2565, as passed by your committee and the House of Representatives and as amended in the Senate, may now be rereferred to your committee for concurrence with Senate amendments, or in the absence of such concurrence, for consideration by a conference committee.

It would appear to many of us in the States that the Senate in striking out the word "State" in line 1, page 2, of the bill and in making similar amendments in lines 8, 9, and 10 of the same page and in line 1, page 3, has turned over to the Department of Defense the authority to issue Federal permits to hunt and fish on military lands in the respective States. This, of course, has been undertaken by Federal agencies of the executive branch in the past; and while this bill, as amended by the Senate, would still provide for cooperative arrangements between the Department of Defense and State officials, it is a step in the direction of Federal domination of hunting and fishing license issuing powers.

I wonder if it would be possible for you to help us to retain the word "State" in line 1 of page 2 and also other words that would strengthen the States' position. The International Association of Game, Fish, and Conservation Commissioners worded this bill very carefully, and you and your committee were most helpful to us in getting it passed in a form that protected the States' interest. I hope that it will be possible for you to again assist us when this bill is rereferred to your committee for concurrence with Senate amendments.

I am of the opinion that it would be better to permit the bill to "lay on the table" insofar as this Congress is concerned rather than pass it as amended by the Senate.

With assurances of our highest esteem and very best wishes.

Cordially and sincerely,
CLYDE P. PATTON.

AMENDMENT OF FEDERAL AVIATION ACT OF 1958, RELATING TO ELIMINATION OF HEARINGS IN CERTAIN CASES

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 1545) to amend the Federal Aviation Act of 1958 so as to authorize elimination of a hearing in certain cases under section 408, which was, to strike out all after the enacting clause and insert:

That section 408(b) of the Federal Aviation Act of 1958 (49 U.S.C. 1378(b)) is amended by inserting immediately before the period at the end thereof a colon and the following: *"Provided further*, That, in any case in which the Board determines that the transaction which is the subject of the application does not affect the control of

an air carrier directly engaged in the operation of aircraft in air transportation, does not result in creating a monopoly, and does not tend to restrain competition, and determines that no person disclosing a substantial interest then currently is requesting a hearing, the Board, after publication in the Federal Register of notice of the Board's intention to dispose of such application without a hearing (a copy of which notice shall be furnished by the Board to the Attorney General not later than the day following the date of such publication), may determine that the public interest does not require a hearing and by order approve or disapprove such transaction".

SEC. 2. The amendment made by the first section of this Act shall apply only with respect to applications submitted to the Civil Aeronautics Board on or after the date of enactment of this Act.

Mr. MONRONEY. Mr. President, this merely involves rearranging the language of the amendment, and leads to the same end as the bill as passed by the Senate.

I move that the Senate concur in the amendment of the House.

The motion was agreed to.

AUTHORIZATION FOR PAYMENT OF CERTAIN CLAIMS AGAINST THE NATIONAL GUARD

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 1764) to amend title 32, United States Code, to authorize the payment of certain claims against the National Guard, which were, to strike out all after the enacting clause and insert:

That chapter 7 of title 32, United States Code, is amended—

(1) by adding the following new section at the end thereof:

"§ 715. Property loss; personal injury or death: activities under certain sections of this title

"(a) Under such regulations as the Secretary of the Army or Secretary of the Air Force may prescribe, he or, subject to appeal to him, the Judge Advocate General of the armed force under his jurisdiction, if designed by him, may settle, and pay in an amount not more than $5,000 a claim against the United States for—

"(1) damage to, or loss of, real property, including damage or loss incident to use and occupancy;

"(2) damage to, or loss of, personal property, including property bailed to the United States or the National Guard and including registered or insured mail damaged, lost, or destroyed by a criminal act while in the possession of the National Guard; or

"(3) personal injury or death;

either caused by a member of the Army National Guard or the Air National Guard, as the case may be, while engaged in training or duty under section 316, 502, 503, 504, or 505 of this title or any other provision of law for which he is entitled to pay under section 301 of title 37, or for which he has waived that pay, and acting within the scope of his employment; caused by a person employed under section 709 of this title acting within the scope of his employment; or otherwise incident to noncombat activities of the Army National Guard or the Air National Guard, as the case may be, under one of those sections.

"(b) A claim may be allowed under subsection (a) only if—

"(1) it is presented in writing within two years after it accrues, except that if the claim accrues in time of war or armed conflict or if such a war or armed conflict intervenes within two years after it accrues, and if good cause is shown, the claim may be presented not later than two years after the war or armed conflict is terminated;

"(2) it is not covered by section 2734 of title 10 or section 2672 of title 28;

"(3) it is not for personal injury or death of such a member or a person employed under section 709 of this title, whose injury or death is incident to his service;

"(4) the damage to, or loss of, property, or the personal injury or death, was not caused wholly or partly by a negligent or wrongful act of the claimant, his agent, or his employee; and

"(5) it is substantiated as prescribed in regulations of the Secretary concerned.

For the purposes of clause (1), the dates of the beginning and end of an armed conflict are the dates established by concurrent resolution of Congress or by a determination of the President.

"(c) Payment may not be made under this section for reimbursement for medical, hospital, or burial services furnished at the expense of the United States or of any State or the District of Columbia or Puerto Rico.

"(d) If the Secretary of the military department concerned considers that a claim in excess of $5,000 is meritorious and would otherwise be covered by this section, he may pay the claimant $5,000 and report the excess to Congress for its consideration.

"(e) Except as provided in subsection (d), no claim may be paid under this section unless the amount tendered is accepted by the claimant in full satisfaction.

"(f) In any case where the amount to be paid is not more than $1,000, the authority contained in subsection (a) may be delegated to any officer of the Army or the Air Force, as the case may be, who has been delegated authority under section 2733(g) of title 10 to settle similar claims.

"(g) Notwithstanding any other provision of law, the settlement of a claim under this section is final and conclusive.

"(h) In this section, 'settle' means consider, ascertain, adjust, determine, and dispose of a claim, whether by full or partial allowance or disallowance."; and

(2) by adding the following new item at the end of the analysis:

"715. Property loss; personal injury or death: activities under certain sections of this title."

And to amend the title so as to read: "An act to amend title 32, United States Code, to authorize the payment of certain claims against the National Guard."

Mr. JOHNSON of Texas. Mr. President, the House of Representatives made certain technical changes in the text of the bill. The amendments are satisfactory; and I move that the Senate concur in the amendments of the House.

The motion was agreed to.

PROTECTION AGAINST LOSS OF ACREAGE ALLOTMENTS BY CERTAIN FARM AND RANCH OPERATORS

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 3533) to protect farm and ranch operators making certain land use changes under the Great Plains conservation program against loss of acreage allotments, which was, to strike out all after the enacting clause and insert:

That section 16 of the Soil Conservation and Domestic Allotment Act of 1938, as amended, is amended as follows:

(1) Paragraph (3) of subsection (b) is amended to read as follows:

"(3) insofar as the acreage of cropland on any farm enters into the determination of acreage allotments and marketing quotas under the Agricultural Adjustment Act of 1938, as amended, the cropland acreage on the farm shall not be decreased during the period of any contract heretofore or hereafter entered into under this subsection by reason of any action taken for the purpose of carrying out such contract and, under regulations of the Secretary, shall not be decreased, for such period after the expiration of the contract as is equal to the period of the contract, by reason of the maintenance of any change in land use from cultivated cropland to permanent vegetation carried out under the contract;"

(2) Paragraph (4) of subsection (b) is amended to read as follows:

"(4) the acreage on any farm which is determined under regulations of the Secretary to have been diverted from the production of any commodity subject to acreage allotments or marketing quotas in order to carry out any contract heretofore or hereafter entered into under the program or in order to maintain, for such period after the expiration of the contract as is equal to the period of the contract, any change in land use from cultivated cropland to permanent vegetation carried out under the contract shall be considered acreage devoted to the commodity for the purposes of establishing future State, county, and farm acreage allotments under the Agricultural Adjustment Act of 1938, as amended."

SEC. 2. Section 112 of the Soil Bank Act, as amended, is amended as follows:

(1) Paragraph (1) is amended to read as follows:

"(1) insofar as the acreage of cropland on any farm enters into the determination of acreage allotments and marketing quotas under the Agricultural Adjustment Act of 1938, as amended, the cropland acreage on the farm shall not be decreased during the period of any contract heretofore or hereafter entered into under this subtitle by reason of any action taken for the purpose of carrying out such contract and, under regulations of the Secretary, shall not be decreased, for such period after the expiration of the contract as is equal to the period of the contract, by reason of the maintenance of any change in land use from cultivated cropland to permanent vegetation carried out under the contract;"

(2) Paragraph (2) is amended to read as follows:

"(2) the acreage on any farm which is determined under regulations of the Secretary to have been diverted from the production of any commodity subject to acreage allotments or marketing quotas in order to carry out any contract heretofore or hereafter entered into under this subtitle or in order to maintain, for such period after the expiration of the contract as is equal to the period of the contract, any change in land use from cultivated cropland to permanent vegetation carried out under the contract shall be considered acreage devoted to the commodity for the purposes of establishing future State, county, and farm acreage allotments under the Agricultural Adjustment Act of 1938, as amended."

Mr. ELLENDER. Mr. President, on July 2, the Senate passed Senate bill 3533 to preserve the acreage and cropland history of land diverted to permanent vegetation under the Great Plains program. Preservation of such history is

provided for by existing law for the duration of the contract. The bill extends such preservation for a period after termination of the contract equal to the period covered by the contract.

The House added a section which makes the same provision for conservation reserve contracts that the first section made for Great Plains program contracts.

I have consulted the ranking Republican member of the Committee on Agriculture and Forestry, and there is no objection to the amendment.

Mr. CASE of South Dakota. Mr. President, will the Senator from Louisiana yield to me?

Mr. ELLENDER. I yield.

Mr. CASE of South Dakota. Mr. President, I understand that the bill is similar to one which was called on the calendar a few days ago, to which I proposed to offer an amendment dealing with the wheat problem.

Under the parliamentary situation now existing, I recognize that to propose any additional amendments to this bill at this time would mean to delay and probably to defeat the passage of the bill which now is at the desk. I would not wish to do that.

I regard the bill which has been passed by the House, which carries out the proposal of the Senator from North Dakota to protect wheat acreage allotments to those who put more of their land into the Great Plains program, as wholly desirable legislation, and I would not want it to be defeated. Consequently, I shall not propose any amendment to the bill at this time.

But I intend to offer the text of my bill at the beginning of the next session of the Congress.

I thank the Senator from Louisiana for his courtesy.

Mr. ELLENDER. Mr. President, I move that the Senate concur in the amendment of the House of Representatives.

The motion was agreed to.

ADDITIONAL FUNDS FOR INVESTIGATION OF ANTITRUST AND MONOPOLY LAWS

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 2000, Senate Resolution 368, providing additional funds for the investigation of antitrust and monopoly laws and their administration. I request, in particular, the attention of the Senator from Tennessee [Mr. KEFAUVER].

The motion was agreed to; and the Senate proceeded to consider the resolution.

Mr. DIRKSEN. Mr. President, I may state, for the RECORD, that I believe the purpose of the resolution is to take care of the 7½-percent pay increase, plus one additional minority staff member.

Mr. KEFAUVER. That is correct.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was agreed to, as follows:

Resolved, That S. Res. 238, Eighty-sixth Congress, second session, agreed to February 8, 1960 (authorizing an investigation of antitrust and antimonopoly laws and their administration), is hereby amended by striking out "$425,000" and inserting in lieu thereof "$450,000."

STUDY OF TRANSPORTATION POLICIES

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent for the immediate consideration of Calendar No. 1998, Senate Resolution 355, amending Senate Resolution 244 authorizing the Committee on Interstate and Foreign Commerce to undertake a study of transportation policies in the United States.

There being no objection, the Senate proceeded to consider the resolution, which was considered and agreed to, as follows:

Resolved, That S. Res. 244, agreed to March 24, 1960, as amended by S. Res. 328, agreed to June 28, 1960, authorizing the Committee on Interstate and Foreign Commerce to undertake a study of transportation policies in the United States, is amended on page 4, line 5, by striking out "$269,100" and inserting in lieu thereof "$282,400".

DISSEMINATION OF POLITICAL OPINIONS

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Order No. 1999, Senate Resolution 374.

The PRESIDING OFFICER. The resolution will be stated by title.

The LEGISLATIVE CLERK. A resolution (S. Res. 374) amending Senate Resolution 305, authorizing the Committee on Interstate and Foreign Commerce to undertake a study of the uses of Government-licensed media for the dissemination of political opinions, news, and so forth.

Mr. DIRKSEN. Mr. President, is this a consent request?

The PRESIDING OFFICER. Yes.

Mr. DIRKSEN. Lamentably enough, I must object.

Mr. JOHNSON of Texas. I give the Senator notice that it will probably be called up by motion later in the evening.

INVESTIGATION OF CERTAIN MATTER BY THE COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of order No. 2011, Senate Resolution 354.

The PRESIDING OFFICER. The resolution will be stated by title.

The LEGISLATIVE CLERK. A resolution (S. Res. 354) amending Senate Resolution 243 authorizing the Committee on Interstate and Foreign Commerce to investigate certain matter within its jurisdiction.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the resolution was considered and agreed to, as follows:

Resolved, That S. Res. 243, agreed to March 24, 1960, authorizing the Committee on Interstate and Foreign Commerce to investigate certain matters within its jurisdiction, is amended on page 3, line 5, by striking out "$291,595" and inserting in lieu thereof "$303,120".

ORDER OF BUSINESS—AMENDMENT OF HELIUM ACT

Mr. JOHNSON of Texas. Mr. President, I wonder if we could get an agreement on time with respect to the helium bill. Does the Senator from Colorado have any suggestion?

Mr. ALLOTT. I have no particular suggestion, Mr. President. The junior Senator from Colorado [Mr. CARROLL] has not spoken yet, and wants to.

Mr. LAUSCHE. Mr. President, I would object to any agreement on the time. I have two amendments I desire to offer.

ANNOUNCEMENT OF HEARINGS BY COMMITTEE ON ARMED SERVICES TOMORROW MORNING BEGINNING AT 10:30 A.M., ON STOPPAGE OF WORK ON CERTAIN CAPEHART HOUSING PROJECTS

Mr. JAVITS obtained the floor.

The PRESIDING OFFICER. The Senator from New York.

Mr. CASE of South Dakota. Mr. President, will the Senator yield?

Mr. JAVITS. I yield to the Senator from South Dakota.

Mr. CASE of South Dakota. Mr. President, the Senator from South Dakota would like to announce that tomorrow morning at 10:30, in the Committee on Armed Services, there will be a hearing on the stoppage of work on some Capehart housing projects. We shall be looking particularly into the contracts which are supposed to have been processed by Mr. Hal Hayes. In view of the fact that Congress probably will adjourn tonight, there will be no opportunity for an announcement otherwise. So I make this announcement in order that those who are interested may know about it.

Mr. YOUNG of North Dakota. Mr. President, will the Senator yield?

Mr. JAVITS. Mr. President, I have the floor. I yield to the Senator from North Dakota.

Mr. YOUNG of North Dakota. I am very happy that these hearings will be held. There has been difficulty in my State in regard to these contracts.

Mr. CASE of South Dakota. That is correct. There has been difficulty at Grand Forks, N. Dak.; Beale Air Force Base, Calif.; Lejeune Marine Corps Base, N.C.; and Ellsworth Air Force Base, S. Dak. The Defense Department is not getting the housing which it has under contract. The subcontractors are not

being paid. The Subcommittee on Military Construction proposes to go into the matter to see what can be done.

PRESIDENT'S COMMITTEE ON EMPLOYMENT OF THE PHYSICALLY HANDICAPPED

Mr. JAVITS. Mr. President, I ask unanimous consent that I may yield to the majority leader in order that certain bills may be passed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Committee on Education and Labor, to which was referred H.R. 12458, be discharged from the further consideration of the bill, and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 12458) to increase the amount authorized to be appropriated for the work of the President's Committee on Employment of the Physically Handicapped.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas?

There being no objection, the Senate proceeded to consider the bill.

Mr. HILL. Mr. President, this bill would increase from $225,000 annually to $300,000 annually the authorization for appropriations of the President's Committee on Employment of the Physically Handicapped.

Since 1954, when the authorization was fixed at $225,000, the costs of operation, including salaries, goods, and services, has increased. In addition, methods with respect to fiscal budgeting has been changed in such a way as to increase the expenses of the President's Committee for its post office mailing costs, the Government's share of the retirement costs of its employees, and its printing costs. These factors have pressed the Committee into a financial situation whereby it is necessary at times to solicit private organizations to bear the cost of publishing some of its printed material. In addition to this, the operating expenses have increased because the program has been set up and widely accepted with active State committees in every State.

The Committee works with employers to promote the hiring of physically handicapped, conducts a program to increase public knowledge and understanding of the problems connected with hiring the handicapped, determines the capabilities of handicapped workers, studies special employment problems of disabled veterans, and encourages the organization of State committees to work in behalf of employment of the handicapped.

H.R. 12458 has the complete approval of the Department of Health, Education, and Welfare, the Department of Labor, and the Bureau of the Budget. Letters from each of these agencies appear in the report of the House.

Mr. DIRKSEN. Mr. President, the Secretary of Health, Education, and Welfare has expressed quite an interest in this bill. Is that correct?

Mr. HILL. That is correct.

Mr. DIRKSEN. These bills have the full concurrence of the minority.

Mr. HILL. And they have the full support of the Department of Health, Education, and Welfare.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 12458) was ordered to a third reading, was read the third time, and passed.

AMENDMENT OF THE PUBLIC HEALTH SERVICE ACT TO AUTHORIZE INSTITUTIONAL RESEARCH GRANTS

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Committee on Education and Labor, to which was referred H.R. 10341, be discharged from the further consideration of the bill, and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 10341) to amend the Public Health Service Act to authorize grants-in-aid to universities, hospitals, laboratories, and other public or nonprofit institutions to strengthen their programs of research and research training in sciences related to health.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the bill.

Mr. HILL. Mr. President, this bill does not increase any authorization for appropriation, and it does not increase any appropriation.

The purpose of the legislation is to give the Surgeon General authority to make grants for the general support of the research programs of institutions (referred to in brief as "institutional research grants"), as well as the grants now authorized by the Public Health Service Act to support specific projects proposed by individual applicants.

The funds for the general grants would be obtained by setting aside a uniform percentage, not to exceed 15 percent, of the appropriations to the National Institutes of Health for research grants authorized in existing legislation. Applications for the general grants would be made by schools of medicine, dentistry, and public health and reviewed by the National Advisory Health Council.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 10341) was ordered to a third reading, read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the votes by which H.R. 12458 and H.R. 10341 were passed be reconsidered.

Mr. HILL. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CLEARING TITLE TO PROPERTY BELONGING TO GALLAUDET COLLEGE

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Committee on Education and Labor, to which was referred H.R. 12699, be discharged from the further consideration of the bill, and that the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 12699) to cancel a deed of trust to the United States from the predecessor in name of Gallaudet College and any evidences of indebtedness related to the same transaction, to quiet the college's title to property belonging to it, and for other purposes.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the bill.

Mr. HILL. Mr. President, the purpose of H.R. 12699 is to clear the title to the real property owned by Gallaudet College and reconvey to the corporation free and clear of indebtedness or encumbrances all real property which was conveyed to the United States, as trustee, by the institution under its former name of Columbia Institution for the Instruction of the Deaf and Dumb, in 1872. Since 1954 the official name of the institution is Gallaudet College. The bill does not, however, change the existing provision of law which requires the approval by the Secretary of Health, Education, and Welfare of any action which Gallaudet College may make with respect to any of its real property.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 12699) was ordered to a third reading, was read the third time, and passed.

AMENDMENT OF THE HELIUM ACT

Mr. JOHNSON of Texas. Mr. President, I move that the Senate resume the consideration of Calendar No. 1884, H.R. 10548, amendment of the Helium Act.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate resumed the consideration of the bill (H.R. 10548) to amend the Helium Act of September 1, 1937, as amended, for the defense, security, and general welfare of the United States.

ORDER OF BUSINESS

Mr. ROBERTSON. Mr. President, is it the intention of the majority leader to

bring up tonight Calendar No. 1975, House Joint Resolution 402, relating to an interstate compact to handle the traffic situation in metropolitan Washington, D.C.?

Mr. JOHNSON of Texas. Yes, particularly if I can get a unanimous-consent agreement when two or three of these bills are passed.

Mr. ROBERTSON. The Senator from Virginia wished to notify three or four Senators who would like to be present. He has been assured there will be no extended debate on the subject.

Mr. JOHNSON of Texas. That is fine.

Mr. ROBERTSON. No unanimous-consent request will be necessary.

Mr. JOHNSON of Texas. The bill will be taken up for consideration this evening. I should like to get unanimous consent, because it might be necessary. I would not wish to have the bill before the Senate and find it necessary to keep it there.

Mr. ROBERTSON. Will that follow consideration of the helium bill?

Mr. JOHNSON of Texas. I cannot say.

Mr. ROBERTSON. So we must remain in the Chamber?

Mr. JOHNSON of Texas. As is true with all the other bills, we cannot tell. I do not know whether the helium bill is going to take 30 minutes or 3 hours.

Mr. ROBERTSON. We had expected the bill would be considered prior to the helium bill.

Mr. JAVITS. Mr. President, I am perfectly willing to yield to the Senator.

Mr. JOHNSON of Texas. The Senator from New York has been very courteous. The Senator has a right to the floor, and we will wait until he finishes.

ROY W. HOWARD, COFOUNDER OF SCRIPPS-HOWARD NEWSPAPER CHAIN, RETIRES TODAY

Mr. JAVITS. Mr. President, one of the giants of American journalism today announced his retirement. Roy Wilson Howard, cofounder of the Scripps-Howard newspaper chain, and for the past 33 years the editor of the New York World-Telegram and Sun, is stepping down from the editorship, which will be taken by another outstanding newspaperman, Lee B. Wood.

In announcing his decision, Roy Howard said: "While I am taking this step voluntarily after a hard look at the calendar, to say that I am doing so without regret would be absurd."

Mr. President, I can think of few men of Roy Howard's generation or my own, for that matter, who have shown less respect for the calendar or for the inroads that advancing years are supposed to make, and more hard-driving, loving day-by-day dedication to the demands of the profession he has been associated with since he got his first job as a small boy—two delivery routes for Indianapolis newspapers before the turn of the century.

Roy Howard's first reporting job was during his days at Manual Training High School when he was school correspondent and after graduation in 1902, Roy Howard went to work for the Indianapolis News full-time for $8 a week. It was the beginning of a brilliant newspaper career. Later, he worked in Chicago, St. Louis, and Cincinnati, coming to his adopted home town of New York City in 1906 as correspondent for the Scripps-McRae League of newspapers where Edward Wyllis Scripps later told associates he received this formidable first impression of the fast-rising 23-year-old: "Roy," he said, "will never get indigestion from licking my boots."

After serving as New York manager of the Scripps Publishers Press Association, the forerunner of United Press, he became the New York manager of UP in 1907 and by the age of 29 was its president and general manager guiding its expansion from 21 bureaus serving 267 clients to more than 100 bureaus serving some 1,350 clients. During World War I, he was a frontline war correspondent and his own best legman and news gatherer whether it meant sprawling in a trench or tapping news sources inside London and Paris foreign offices.

In 1925, the Scripps-Howard chain of newspapers was established with Roy Howard as editorial director. Two years later, the chain penetrated east of the Alleghenies for the first time when the New York Telegram joined it. The rest is journalism history, often at its exciting best. When it was still the World Telegram, one of Roy Howard's reporters was assigned to work under cover gathering material for a crime exposé while a young New York district attorney named Thomas E. Dewey was on the same track. When the proper time came, the paper's series on crime and corruption in high places jarred the public out of any complacency and helped rouse New Yorkers to the decisive exercise of their responsibilities as citizens. Under Roy Howard's leadership, the Telegram has never forsaken that crusade.

Well remembered are the Pulitzer Prizes won by several members of Roy Howard's staff, including Reporter Fred Woltman, awarded a Pulitzer Prize for his hard hitting series on Communist efforts at infiltration and subversion in the United States after World War II. Equally memorable is the firm editorial stand Roy Howard took during the McCarthy era when he refused to support extremist elements who in their zeal to root out leftists sometimes rode roughshod over individual rights and flaunted civil liberties. That was abhorrent to Roy Howard and he had the courage to say so in public print at a time when a sane, stable viewpoint on the issue was all-important.

Today, August 31, is the last day Roy Howard will serve as editor and, looking backward, his words written in 1931 at the time of the merger of the New York World and Telegram were a most fitting forecast of the journalistic tradition the paper has represented ever since.

Roy Howard said:

> The need for independent editorial utterance and effort was never greater * * * than it is today. Injustice, corruption, and greed challenge the efficiency of our social structure as boldly today as at any time in our history.
>
> We realize that no newspaper of character and force can be pleasing to all people and all factions. Frequently, a newspaper can be criticized quite as effectively by its enemies as its friends. We will see to it that the World Telegram is neither a pollyanna nor a common scold.
>
> We will essay the difficult role of being tolerant with the intolerant. We will remember that there is no such thing as journalistic infallibility. Above all, we will cherish, as a pearl of great price, a thing which we believe to be ours—a sense of humor.

Roy Howard and his newspaper have indeed lived up to those words. As a public official since 1946, I have enjoyed the support of the World-Telegram and Sun—I have also been the target of some pretty blunt editorial opinions from time to time when our views differed, and I trust that my sense of humor, too, was equal to those occasions. I know that Roy Howard and I will maintain our mutual respect and affection for many years to come. Though he resigns as editor, he will continue as president and director of the Scripps Howard Corp., and I express the hopes of all the faithful readers of the chain's 19 newspapers that his periodic byline under stories filed from almost anywhere on earth will still be with us.

I close by stating, Mr. President, that at 77 he is much too young a man to write "30"—the word which ends the stories of newspapermen generally—to his reportorial career.

Mr. KEATING. Mr. President, will my colleague yield?

Mr. JAVITS. I yield to my colleague.

Mr. KEATING. I wish to join in the tribute to Roy Howard. He is a man of great conviction and great courage, who is in every way a great newspaperman. He is also a great gentleman, who states his views with vigor and persuasion, and who maintains the happy facility of disagreeing from time to time without being disagreeable.

As I know from my personal contacts with him and from my reading of his fine writings, Roy Howard is one who forcefully states his views, whether in private conversation or through the columns of his outstanding newspapers.

Mr. Howard has always adhered firmly to the finest traditions and the highest standards of his profession. Based on those principles, he has built an illustrious career and has become one of the Nation's most respected newspapermen. He has indeed had an illustrious career, and has made the Scripps-Howard papers powerful voices for good in our Nation.

All of us who are his friends hope that there will be many more years of fruitful effort and that happiness will attend his semiretirement, although Roy Howard, in my judgment, will never fully retire.

Mr. JAVITS. I thank my colleague. It is quite fitting that we two Senators should join in praise of Mr. Howard. I think my colleague knows what great pride he takes in the fact that New York has two Republican Senators.

Mr. KEATING. I am sure he does.

LABOR-MANAGEMENT PRODUCTIVITY COUNCILS

Mr. JAVITS. Mr. President, there is a growing awareness among the leaders of labor and industry, and among economists and experts in the field of automation, that a nationally coordinated effort to deal with the human and technical problems of automation is becoming necessary. Both of our major political parties are committed to the pursuit of policies which will stimulate increased productivity on the part of U.S. industry, but this rise in productivity can only be achieved in a climate of labor-management cooperation.

I should like to invite to the attention of the Senate, in these closing hours of the 86th Congress, my proposed legislation, S. 3121, to create a Bureau of Productivity Councils, which points to a method by which voluntary labor-management cooperation could be fostered. During the coming session, I shall reintroduce this proposed legislation because the Congress will be called upon to devise means by which U.S. productivity can successfully meet the challenges of international trade competition in the domestic market place and in the markets of our friends and allies, as well as the challenges of the philosophic competition in the minds of the citizens of the developing nations of the free world, who are judging our system of democratic free enterprise by its ability to produce the rising standards of living which they are so desperately anxious to attain.

Mr. President, I ask unanimous consent to have printed in the RECORD an editorial from the July 1960 issue of Machinery, referring to my proposed legislation, and a paper presented by Dr. Francis J. Lee at the June 2 and 3, 1960, Governor's Conference on Automation at Harvard University, published by the State of Massachusetts. This paper proposes a program similar to the one envisaged in S. 3121.

There being no objection, the editorial and paper were ordered to be printed in the RECORD, as follows:

IF

(By Charles O. Herb)

If it is true that we as a nation cannot have more things to use and enjoy unless we produce more, and that productive efficiency is an essential factor;

If it is true that lower prices will benefit everyone, and that the only way to bring about lower prices, other than by the depression route, is through lower manufacturing costs made possible by higher productive efficiency;

If it is true that to maintain high-level employment we must have high-volume sales which can best be assured by lower sales prices;

If it is true that earning power depends on productive power and therefore increased productive efficiency provides the basis for maintenance of a rising wage scale;

If it is true that the recorded results achieved by a considerable number of manufacturing concerns show that productive efficiency can be greatly increased;

If it is true that there are serious obstacles which must be removed or substantially reduced before the rising trend in production efficiency can be substantially increased;

If it is true that some manufacturers, a few labor unions, and some associations are doing what they can to reduce these obstacles but that no concerted nationwide effort is being made; and

If so much obviously depends upon productive efficiency and the maintenance of its upward trend,

Why then, should not productive efficiency be given top rating, next to national defense, and be accorded utmost attention by the Nation's leaders in industry, labor, and Government?

Senator JACOB K. JAVITS of New York recently introduced in the Senate a bill intended to promote increased productivity in the national interest and foster peaceful labor-management relations through the establishment, in the executive branch, of a Bureau of Productivity Councils. This bill deserves the unqualified support of everyone concerned with the economic welfare of our country.

RESPONSIBILITIES OF INDUSTRY, LABOR, THE GOVERNMENT AND THE PUBLIC IN SUPPLYING SKILLS FOR AUTOMATION

(By Dr. Francis J. Lee, Manager of Training Services, Raytheon Co.)

There are two major reasons why industry automates its production—foreign competition and technological innovation. Competition is a driving force in our economy, and we have all profited from it. Up until recently, foreign encroachment has not been a serious threat. In the last few years, however, the picture has undergone rapid and radical change. European nations and the Far East are aggressively competing in world markets—with a highly modernized industrial complex to back them up. Ignoring the threat of the U.S.S.R. or the sleeping giant that is South America, the domestic competition gives us no room for complacency.

Technological innovation is like a chain reaction. Processes and products proliferate at an accelerating rate. For example, the interval between rayon and nylon was a relatively long one. After a brief period, however, Dacron appeared. And look at the multitude of synthetic fibers today. Throughout industry, it is not at all unusual for companies to announce that 30, or 40, or 50 percent of their products were unheard of 10 years ago. They accept the condition that to survive, they must innovate.

But it takes money to innovate. And as more money goes into the front end—the R&D phase—every effort must be made to control the costs in the back end—the production phase.

If you start an atomic reaction in a designed environment, with adequate control mechanisms, you have a very useful source of energy for productive work. Without the control mechanisms, you stand a good chance of obliterating yourself and a large portion of the surrounding landscape. The same is true of automation. If we don't build in the control mechanisms and the escape valves, we may very well cripple our productive capacity by trying to increase it too rapidly.

And the time is now. We are not on the threshold of the age of automation—we have entered it. In a 1955 survey by the Institute of Industrial Relations at Berkeley, 16 percent of American industry relied extensively on automated equipment and 39 percent in all expected to by 1964. Only 34 percent saw no likelihood of automating, and that percentage may lessen as new opportunities develop. That the automation equipment industry has grown from infancy in 1945 to a $7 billion business today indicates one fact—like it or not, we're on the road.

Where does the road go? To utopia or to disaster? There is today, and probably will continue to be for some time, a good deal of debate about the long-term effects of automation. On the other hand, how to make it effective is fairly clear. The characteristics and skills of the work force must change.

Automation produces a very different kind of demand on human resources. And it is going to take the combined efforts of industry, of labor, of government, and of the community to meet it. The work force must have a variety and complexity of skills and abilities. Our human resources must be expanded as never before. This means training and retraining, on the job and in the classroom, on a scale approached only by our efforts in World War II.

What are these skills? Who has to have them? How can we assure delivery at the right time, in the right place, in the right amount?

Conceptual skills will be most in demand. True automation, replacing discrete unit operations with an integrated process, requires an awareness of the problems of a total process. In the past, the major contribution of the work force was one involving manual and bodily activity. Today it is mainly perceptual, because we are extensively mechanized but not fully automated. Tomorrow, conceptual skills will be the requisite to service fully automated operations including full feedback and transfer. Indirect labor and maintenance functions will assume more significance.

A very different breed from today's lathe, milling machine, or even Keller machine operator will tend an automated line. As downtime in automated production operations is prohibitive, operators probably will have to diagnose malfunctions, select an appropriate course of action, and apply it. In essence, he becomes a supervisor.

But the number of technicians today actually is shrinking. Figures quoted on the present annual shortage range upward to 75,000. The ratio of technicans to engineers is close to 1 to 1; manpower planning authorities feel it should be 5 to 1. In the machine trades, there are not enough apprentices to make up for attrition and expansion needs.

Equally alarming, within these groups too, more general skills will be needed. Maintenance electricians will need electronics; electronic technicians will need a solid mechanical background; pipefitters will need hydraulics training. All will have to assume more supervisory responsibilities.

For some time, the office and clerical work force have been exposed to electronic data processing or office automation. Yet, between 1947 and 1957, 300,000 white-collar workers annually were added to the work force. The trend is expected to continue. But again, more complex skills are in demand. Electronic data processing requires programers, key punch operators and verifiers.

Firstline supervisors will relinquish a large share of the paperwork they have now. This blessing, however, will be hampered by the heavier demand on their conceptual skills. The supervisor of an automated system must diagnose and correct malfunctions in the work group. Authoritarian behavior will be inadequate; human relations skills of a high order must be exercised.

These go beyond a set of formulas or a series of manipulative techniques devised to get people to do the job. A sound understanding of human behavior, an appreciation of the dignity of the individual, and a willingness to apply these to mutual benefit must be evolved.

Although data processing will reduce unknowns and ease decisionmaking, the middle management echelon will have more decisions to make, and these will be centralized rather than delegated. Each manager will supervise fewer subordinates, but the remainder will be much more important. Technical competence in planning and realizing

the opportunities of automation will be imperative.

Top-level management must represent true executive skills, more leadership and less chairmanship. The concept of the "task force" should gain ground simply because its members are qualified to tackle a specific problem. New problems require new solutions. Professional managers and staff specialists can provide them.

How can such a work force be created? Who must take responsibility? In the area of responsibility, three things are immediate.

1. Step up the formation, on a local level, of industry-labor-community task forces to assess needs. Cooperation between industrial plants, labor organizations, and local and State agencies should be implemented to study present and future personnel needs.

2. Organize, on a national level, a committee on human resources. This group would promote the formation of local level task forces, counsel them on organizing their activities, systematize and integrate their findings, and provide guidance in activating their programs. Its membership could ensue from industry, labor, the Government, and the academic community.

3. Step up the pace and number of programs in vocational and technical education and training now offered. Government already contributes in this field through the National Defense Education Act. Its activities should be exploited.

Creation of a capable work force could stem from intensified apprentice training. Present programs offer a base, and there are encouraging signs that both labor and industry recognize the needs. San Francisco plumbers assess themselves a penny an hour to finance apprentice training programs. The West Coast United Steel Workers gave $6,000 to the University of California for a pilot program for upgrading workers' skills. In Cleveland, the machine toolmakers incessantly recruit high school graduating classes for their training programs.

These are but a few examples. In St. Louis, the IBEW and the Federal Bureau of Apprentice Training have cooperated in setting up an apprentice training center. Here in Massachusetts, Raytheon, in collaboration with the IAM and the IBEW, several years ago, set up full-scale apprenticeship programs for draftsmen, electronics technicians, and machine trades craftsmen.

Nationally, however, apprentice training efforts approach inadequacy. It is estimated that U.S. industry trains just 1 apprentice for every 50 skilled workers, far less than even the replacement rate.

Industry can share with no one the task of evaluating the skills of its supervisory force, its managers and professional personnel, and its top executives. A concept described as "organizational systems engineering" might be employed for this purpose. Systems engineering, just coming of age, is probably best understood when related to weapon systems.

If five engineers are designing an assembly, the lead engineer can keep abreast of progress and make sure the 9 or 11 parts will function properly. But if 5,000 engineers are designing dozens of subsystems with hundreds of thousands of parts, coordination becomes impossible.

Systems-engineering groups were developed to meet this problem, to insure that in the completed interceptor or bomber or missile everything meshes, including the capabilities and skills of the human beings who operate and maintain it.

Similarly, the industrial organization is a system of working relationships between and among individuals and groups. Individuals differ in their capacities to withstand stress, to accept shock, to endure anxiety, to absorb knowledge, and to translate that knowledge into performance. And people are the most valuable components in the industrial organization system. A reappraisal, no matter how difficult, must be made under these criteria.

ANNUAL REPORT BY SENATOR JAVITS TO THE PEOPLE OF NEW YORK—86TH CONGRESS, 2D SESSION

Mr. JAVITS. Mr. President, this is my annual report on the 2d session of the 86th Congress; it is intended to inform the citizens of New York of the activities of the Senate and my part in them.

PEACE AND FREE WORLD LEADERSHIP

In spite of a strong Communist offensive, the United States strengthened its position of peace leadership by its policies respecting the newly emerging nations of Africa in the explosive Congo situation, by our partnership with the South and Central American countries in the Organization of American States with reference to the Dominican Republic and Cuba; and by our calm handling of the Far East crises in Korea and Laos.

Communist pressure on Japan is clear evidence of the strength of the forces with which the United States and the free world have had to contend.

The series of Soviet "cold war" thrusts over the U–2 incident, the collapse of the Paris summit conference, cancellation of the President's trip to Japan after his triumphant visit to Taiwan, the Philippines and Korea, and the Cuban crisis have been climaxed by the Moscow spy trial of U–2 pilot, Francis Powers and the Kremlin's attempt through it to indict U.S. foreign policy. But these moves appear to have failed to realize their objective.

Ratification of the United States–Japan Mutual Security Pact, for which I voted, strengthens Japan in preserving freedom and democracy. The Communists know that Japan is the most industrialized nation in the Far East, and their designs on it form part of their whole effort to divide the free world by weakening it economically. Let any businessman think for a moment what competition would be like if Japan were in the hands of the Communists who could direct its economy to the disadvantage of the free world.

I have been trying to set up a visit to the United States of up to 100 non-Communist Japanese students who participated in the "student riots" so that they could take back with them a true picture of the objectives of our people and our Government. We would thus be in a position to augment the reservoir of good will that exists between our two countries.

There has been great concern over the deterioration of relations between the United States and Cuba. The President has made it clear that the United States will adhere to a policy of nonintervention in the domestic affairs of other countries and will scrupulously observe our treaty commitments as a member of the Organization of American States. We will insist that Cuba has to respect its obligations under international law, and human rights and liberties under the OAS and United Nations charters. I am deeply concerned over this situation, and will continue my efforts to help all those who have been affected by it. Our country has shown great forbearance and skill in handling a very trying situation in a new historic partnership policy succeeding the good neighbor policy with the other American Republics; also our sugar legislation sharply reduced Cuban and Dominican sugar imports into the United States.

I believe that the decisive struggle with communism in the 1960's will be economic, but survival is primary to winning such a struggle. Therefore we must always be able to lead in the quest for world peace from a position of adequate military posture to carry out our worldwide responsibilities considering modern rocket and missile and conventional weapons and defenses against them.

As a member of the Senate Subcommittee on National Policy Machinery in the cold war I have advocated greater coordination of the objectives and policies of the United States in foreign policy and national security. Toward this end I have introduced legislation to establish the post of First Secretary of Government, as suggested by Governor Nelson A. Rockefeller, to work directly under the President and at his discretion as the equivalent of a prime minister. The Presidency has grown to be such a monumental job that we must equip our Chief Executive with a governmental organization able to assist him in carrying out his constitutional duties.

On the economic front of competitive coexistence, the United States and the industrialized countries of the free world are seeking to coordinate their aid efforts to underdeveloped countries and to work out solutions of trade and other economic problems.

I introduced legislation for a new program called expositions for peace, providing for an increase in U.S. participation in the number of trade fairs overseas and for doubling the number of foreign countries exhibiting in four major U.S. fairs.

The national economic growth of the United States and the free world can be stimulated to a remarkable degree by an upsurge in the export-import trade of all the non-Communist nations. During 1958 and 1959 the United States experienced a $7 billion balance of payments deficit in large part attributable to lack of exports. This trend was reversed during the first quarter of 1960 when U.S. exports exceeded imports at the annual rate of $3 billion; this year our balance of payments position will be substantially improved.

In order to assure continued increase and adequate economic expansion to meet our world peace responsibilities and the Soviet challenge, the following measures have been taken:

First. On March 17 the President proclaimed a program of export promotion including the extension of short-term

credit guarantees by the Export-Import Bank along with vastly increased informational and other activities by the Department of Commerce.

Second. I have introduced legislation establishing a national trade policy which would give domestic producers in danger of serious injury from imports the kind of assistance needed in an expanding U.S. economy; also legislation which would make possible the increased use of U.S. private enterprise techniques in the underdeveloped areas of Africa, Asia, and Latin America. Such legislation would also assure a steady income of foreign exchange from foreign private investments which during 1958 alone prevented our balance of payment deficit from increasing by an additional $1.1 billion a year. This bill would also encourage through a system of tax deferrals the establishment of foreign business corporations in underdeveloped free world areas. The net foreign private investment of the United States, now $3¾ billion a year, should be materially increased.

I have introduced legislation establishing a Bureau of Productivity Councils within the Federal Government which would stimulate the formation of labor-management-community councils at the grassroots level where the intimate cooperation of all the producing elements of our society are vital to spur noninflationary economic growth.

The spirit of cooperation is necessary to launch a joint effort among the nations of the free world, particularly those in Western Europe, to aid underdeveloped regions. As Chairman of the Economic Committee of the NATO Parliamentarians, I addressed the Assembly of the Council of Europe at Strasbourg, France, in May on this and other major economic problems. I believe there are excellent prospects that Western Europe will join a partnership program to raise aid and investment to the less developed nations now estimated at about $4 billion annually to 50 percent above the present effort. A new treaty nation organization, the Organization for Economic Cooperation and Development (OECD), is now in formation of which the United States, Canada, and 18 Western European nations will be members to effectuate this objective. The removal of trade barriers in Western Europe without discrimination against the United States would not only encourage U.S. sales abroad but would also stimulate third countries to produce what they can most economically.

Another problem is that of reconciling the interests of two present European trade blocs: The six nations in the European Economic Community—France, Germany, Italy, Belgium, Holland, and Luxembourg; and the seven nations in the European Free Trade Area—United Kingdom, Norway, Sweden, Denmark, Switzerland, Austria, and Portugal.

I supported legislation which was enacted authorizing the appointment of a U.S. Citizens Commission on NATO to participate with similar commissions from other NATO countries in exploring means of cooperation and unity of purpose among the NATO nations to develop democratic freedom by economic and political means.

I strongly supported the ratification of the Antarctic Treaty which seeks to keep the Antarctic region open to international cooperation, scientific exploration, and peaceful nonmilitary uses; while inaugurating a system of inspection by observers which may prove most useful in disarmament negotiation with the Soviets.

As part of the effort to further improve the U.S. balance in foreign trade payments, I joined with Senator MAGNUSON of Washington in introducing legislation to set up an international travel office to stimulate and encourage tourism to and from the United States. The bill passed the Senate and I will do my utmost to get it enacted.

Our aim to establish a lasting peace among the nations requires development of a firm basis of enforcible international law. The Connally reservation limits the usefulness and importance of the International Court of Justice (World Court) because other nations will not accept its jurisdiction in international legal disputes while we continue to reject it. I do not believe, as some claim, that removal of this reservation would represent any yielding of U.S. sovereignty—our Nation would retain jurisdiction over all domestic issues. President Eisenhower has urged that this Connally reservation be repealed as a demonstration to the world that the United States prefers the rule of law to the rule of force in international affairs. I, therefore, joined in sponsoring S. Res. 94 to repeal the Connally reservation.

Strengthening the economies of free world nations and affording a satisfactory rate of development to less developed nations constitute a prime objective of the mutual security program. I have supported the President's requests for the mutual security program as the minimum requirement for the new emphasis in U.S. foreign policy on economic integration of the free world.

Congress appropriated $3,787,350,000 for mutual security as against the mutual security authorization of $4,086,-300,000 and $4,175,000,000 requested by the President. Of the amount appropriated, $1.8 billion was voted for military aid funds, $675 million for defense support, $230 million for economic aid, $150 million for technical assistance, $550 million for the Development Loan Fund and $250 million for use in the President's contingency fund in the Congo and other emergencies. Also included in the new Mutual Security Act is a provision establishing an East-West cultural center in Hawaii and a plan for a North-South cultural center in Puerto Rico.

I cosponsored the freedom of the seas amendment to the Mutual Security Authorizations Act, directed against the Arab boycott and blockade of Israel, which gave the President discretionary power to cut off foreign aid funds to those nations who persist in interfering with the trade of other nations receiving our aid and support.

I opposed the so-called Haifa clause in U.S. Navy contracts with American owned oil tankers because it had the effect of aiding the Arab boycott, and commended the Navy for eliminating it. A similar contract clause by the Department of Agriculture for ships carrying surplus agricultural products under Public Law 480 which I have protested continues to be used, and I am working to see Federal Government departments be coordinated with the policy decision taken by the Navy.

The Arab boycott issue was also raised in connection with Senate approval of the International Development Association, but I opposed the effort to retard the joining of the United States in the IDA on this ground. The IDA makes it possible to expand use of soft nonconvertible local currencies available for loans for development purposes. It will be an arm of the World Bank with membership of 68 countries and a total initial subscription of $1 billion of which the Senate authorized a $320,290,000 5-year subscription.

NATIONAL DEFENSE AND SPACE

This is a presidential election year, and it is natural that there should be debate over our defense policy and the amounts that should be spent for defense and how these funds should be allocated. I shall continue to do everything I possibly can to assure that a complete and effective defense policy emerges from these discussions. I do not believe a case showing inadequacy has yet been made, but if it should be shown, I will work for such appropriations for defense items as are needed to assure our security.

Congress has approved a national defense budget for fiscal 1961 of $39,996,-608,000, approximately half of the Nation's total budget, and $661,608,000 more than the President's request. Of this amount $4,177,773,000 is for research and development.

The defense appropriations which I supported contain sizable increases in funds for construction of Polaris and nuclear attack submarines; continue the Army modernization program; and expand our airborne alert capability. Congress also voted $293,000,000 for construction of an aircraft carrier. I have urged the Navy to construct this carrier in the superior facilities available at the Brooklyn Navy Yard and have worked with other colleagues from New York against awarding the contract for this carrier to an out-of-State private shipyard.

At the President's request, Congress voted substantial increases in funds for nonmilitary space projects under the National Aeronautics and Space Administration. These funds will further our plans to keep moving ahead vigorously with an intensive program of scientific exploration and with the development of the large rockets essential to the conquest of outer space. The launching of Echo I and the successful recovery of

the Discoverer capsule are exciting portents of what is to come in this exploration of space and shows that we are making material progress closing the gap between ourselves and the U.S.S.R.

BUDGET AND TAXES

In his budget message, the President estimated spending at $79,800,000,000 and revenues at $84,000,000,000 leaving a surplus of $4,200,000,000. The total of the appropriations for 1961 is $82,816,000,000.

It is always essential to eliminate wasteful and unnecessary items from the Federal budget, but at a time when the cold war with the Communist world is phasing into a decisive struggle in economic competition, we have to be cautious about any relaxation of our defense and security needs and the requirements of our developing economy. In this connection the President recommended closing certain tax loopholes and the elimination of special tax privileges so that the anticipated surplus may be applied to the reduction of the national debt now about $290,000,000,000.

I also believe that a review must be undertaken of items favored under the tax law like the 27.5 percent oil depletion allowance.

I opposed repeal of the 4 percent income tax credit on dividends and while it was adopted by the Senate, it was eliminated in the Senate-House conference on the bill. I believe that the continuation of this exemption is necessary to encourage peoples' capitalism—stockholding by the general public and to provide for just taxation. I have therefore favored its retention in the law.

While the Senate Finance Committee proposed that the wartime excise tax on telephone service be eliminated, the Congress voted to continue this tax in effect at its present rate. I joined in proposing an amendment which would have given a credit against this tax for local telephone taxes, such as the standby telephone tax which the New York State Legislature adopted, in order to make at least part of this burden available for local needs such as education. However, this amendment was not adopted.

Another wartime excise tax was that on transportation. This was originally imposed as a revenue measure and to discourage civilian travel on the then crowded air, rail, and buslines. That emergency is over, and we should certainly try to eliminate the 10 percent levy, especially in view of the needs of the carriers for passenger traffic. The Senate Finance Committee recommended its elimination and I supported the committee. However, this proposal was defeated.

To study rail transportation problems, I sponsored S. J. Res. 158, which calls for a national advisory committee on rail transportation. I also sponsored the following measures dealing with the commuters problem: A bill to require affirmative approval by the Interstate Commerce Commission before discontinuance of a commuter train; a bill to give railroads the full Federal income tax benefit of tax relief granted by States and municipalities; and a bill to consent to the New York-New Jersey interstate compact to establish a bistate transportation agency which would attack the commuter crisis on the State level. This latter bill became law after the 1959 session ended.

The Congress passed a bill to assist chronically depressed areas in our Nation by creating new employment opportunities through grants, loans, and technical assistance, but failed to override the President's veto, which was based upon the high cost of this program. I supported this bill after provisions in it were eliminated which might have permitted use of these funds for inducing industry from one section of the country to move to another being helped under the legislation. I also joined in cosponsoring the bill proposed by the President to deal with this important national problem on a basis which he felt was more commensurate with our national needs.

LABOR

The Senate passed the Fair Labor Standards Act of 1960, which I supported, increasing the Federal minimum wage to $1.15 per hour in 1961, $1.20 in 1962, and $1.25 in 1963, and extending wage and hour protection under the act to approximately 4 million workers not previously covered, principally employees in larger retail and retail-service industries. The House bill called for $1.15 per hour and, as compromise proved impossible, the legislation will have to be acted on again next year. New York State benefits from a higher minimum wage uniformly applicable to all States competing in the labor market. At the same time it is important that certain retail, service, and other enterprises, by reason of size, volume, geographical, or seasonal considerations, should not suffer under the new act, and in such cases exemptions must be obtained to prevent competitive disadvantage or injustice to particular groups.

The Migratory Labor Subcommittee, of which I am a member, approved legislation relating to registration and Federal control of crew leaders of migrant agricultural workers. This follows a bill I introduced, and is an important first step to safeguard our migrant labor force from substandard working conditions. Farmers and growers too should benefit from a uniform system of a crew leader regulation. Also, the Education Subcommittee of the Senate Committee on Labor and Public Welfare, of which I am a member, favorably reported two bills providing Federal aid for children of migrant workers to attend school full time and adult migrant workers a chance to continue their higher education.

I introduced legislation which would deal with national emergency strikes, such as last year's regrettable steel strike, by making available to the parties and to the public for its judgment facts and recommendations prepared by an impartial board of inquiry. In cases where all other means of settlement fail, my bill permits the protection of the national interest by providing for operation of the struck plants by the Government only to the extent necessary to the national health and safety, until a settlement is reached through free collective bargaining between labor and management.

I have also introduced three bills to eliminate discrimination in employment because of age.

HOUSING

The Senate passed a housing bill vital to New York's urban areas, which extended the FHA home improvement program 1 year, increased urban renewal—slum clearance—funds by $350 million, provided $500 million for loans for college housing, and extended and improved the FHA mortgage insurance program. The bill contained a number of provisions which I had sponsored, including permission to FHA to lower premium rates from one half to one quarter percent, removal of the ceiling on relocation payments for individuals, families, and businesses whose housing is being demolished in the urban renewal program, and increases in the limit which New York colleges could borrow under the college housing program.

The House failed to act on this measure, and there was enacted during the closing hours of the session legislation to extend for 1 year the title I home improvement program, provide $500 million in college housing loan funds, and $50 million in loans for public facilities in small communities.

To help meet the needs of low income families who are displaced from these areas, I joined in sponsoring an amendment providing for 25,000 units of public housing, which was adopted by the Senate. This, too, fell in the House of Representatives—it is the very minimum anyone could suggest to try to balance out a national housing program.

EDUCATION AND HEALTH

The Federal Government needs to aid the State and local governments in meeting their education needs. This is essential in our national interest under present conditions at home and abroad. The bill which I sponsored with Senator COOPER to provide Federal matching grants for school construction and to help the State to raise teachers' salaries was defeated in the Senate which then passed a bill totaling $1.8 billion over a 2-year period. A similar measure providing $1.3 billion for construction only over a 4-year period was passed by the House of Representatives. There was no opportunity for a House-Senate conference and the bill will have to be acted on again next year.

The objective of Federal aid for adequate health care insurance for our older citizens 65 years of age and over must and will be attained. Enactment of the social security bill, H.R. 12580, assures adequate medical health care for citizens over 65 who are indigent due to medical bills or are receiving old-age assistance. These number over 3 million persons. It is most regrettable that in addition, a plan could not be evolved now for the many people of moderate income estimated at 10 to 11 million who are in need of such health care insurance.

There was just no chance to work it out as is normally done here under the conditions of the brief congressional session.

The Anderson amendment could not be justified by its social security basis. It was medically inadequate in giving hospitalization rather than the preventive health care needed by 90 percent of the aged, set eligibility at 68 instead of 65 years of age, required the first $75 of expense to be paid by the individual every year, and cut benefits in an effort to trim costs; it failed to meet the basic needs of health care for our older citizens which I have advocated for over 12 years and would have overtaxed our hospital facilities and led to the frustration of even longer waiting lists.

My health care plan provided emphasis on preventive care with 12 physicians' visits and full first dollar cost coverage; eligibility for all of moderate income over 65; voluntary participation and State plans with Federal matching out of general revenues so that we could build on existing State and local health programs and insurance now covering 72 percent of the population—120 million Americans. I realize and feel very keenly that many of our older citizens wanted very much to have a bill passed at this session with a social security approach. I respect and honor them and believe that the whole matter of health care insurance for all over 65 has now been brought to a point where it has majority support and where a truly responsive and satisfactory bill will become law at the next congressional session.

The growing problem of juvenile delinquency has been causing increasing concern. I supported legislation providing for Federal financial aid to States and communities at the rate of $5 million a year for a 5-year program which would provide for training personnel as well as some demonstration projects. This is a relatively modest start to cope with this enormous problem.

As a member of the Subcommittee on Juvenile Delinquency of the Senate Committee on Labor and Public Welfare, I shall continue to push for early enactment of effective legislation on the Federal level to help with this grave national problem.

I sponsored the Health Facilities Training Act of 1960 to improve the public health through revising, consolidating, and improving the hospital and other medical facilities provisions of the Public Health Service Act. It authorizes grants for the construction of medical, dental, osteopathic, and public health teaching facilities as well as providing special project grants for postgraduate public health training and for Federal guarantee of loans for construction of group practice medical and dental care facilities. The proposed grants under this bill will permit the training of an increased number of public health personnel; improve medical care and provide other health benefits.

I have also introduced and supported legislation providing additional loans for the Federal college housing program, for classrooms and to make possible greater help for science students and teachers.

I sponsored a resolution calling for the establishment of national teachers recognition day to do honor to our public school teachers.

I have been actively interested in research and other programs designed to help with the problem of deafness and I supported S.J. Res. 127 which made Federal funds available for the training of teachers of the deaf, speech pathologists, and audiologists.

I also supported the Practical Nurse Training Extension Act of 1960 which authorized $5,000,000 a year for State grants for practical nurse training.

I introduced a bill which would make Federal aid available to help States meet the cost of caring for drug addicts based on compulsory commitment to a hospital. This legislation calls for a $2 million appropriation in the first year to be used as grants in aid for the payment of half of the cost per bed patient in the case of drug addicts in closed institutions.

I introduced legislation to eliminate the non-Communist affidavit requirement of the National Defense Education Act while retaining the oath of allegiance. The bill as it finally passed the Senate retained the loyalty oath and included language making it a criminal offense for any student to accept Federal funds who is a member of the Communist Party or other subversive organization, and provided further if he were such a member within the preceding 5 years, that he disclose and explain this fact.

SMALL BUSINESS AND CONSUMERS

I supported the Small Business Investment Act amendment which helped to make private investment in small business investment companies more attractive. It also made it easier for investment companies and small business concerns borrowing from them to operate under the Small Business Investment Act of 1958.

I encouraged further study in the problem of exports and imports as they affect small business and shall continue to give the problems and needs of small business my close attention. There is concern about competition from foreign imports. I am for broad international trade but this must be consistent with safeguarding our workers and businessmen from being hurt. I believe both can be done effectively by insisting on fair labor standards by nations exporting to us; phasing of tariff protection to give domestic business a chance to adjust to imports which are necessitated by our national trade policy; Government assistance to industries, workers, and communities adversely affected.

I sponsored legislation calling for the establishment of a Select Committee on Consumers which would deal exclusively with consumer problems. Another bill which I introduced calls for setting up a Consumer Fraud Bureau which would act as a national clearinghouse of information about "fast-buck" operators who move from State to State perpetrating consumer frauds. I also supported legislation which tightened Federal control over the use of coal tar colors in food, drugs, and cosmetics.

CIVIL RIGHTS AND CIVIL LIBERTIES

After 8 weeks of debate, the Senate passed the Civil Rights Act of 1960, and it was signed into law by the President. The bill helps further to protect the rights of all Americans to vote by including power for the Attorney General to inspect registration records and for the Federal courts to appoint voting referees where there is a pattern of local voting discrimination, who could register persons who have been denied the right to vote. It also includes provisions to put the FBI on finding and bringing to justice those guilty of hate bombings like those of schools, homes, churches, and synagogues; made unlawful interference with court orders, such as those requiring desegregation of public schools; and provided for the education of armed services personnel's children when local schools are closed to avoid desegregation.

However, the bill omitted a number of important provisions, among them, technical and financial assistance by the Federal Government to school districts wishing to desegregate; statutory for the Committee headed by Vice President Nixon which has been working to eliminate discrimination in employment by Government contractors; power in the Attorney General to bring civil injunction suits for the protection of civil rights including the right to attend a desegregated school, elimination of the poll tax in the 5 States still clinging to it and making lynching a Federal crime. I shall, of course, continue the fight for meaningful civil rights legislation which will fulfill our solemn obligation to make the constitutional guarantees of equal protection of the laws a reality to every individual, regardless of race, color, religion, or national origin.

The Senate rule on debate, rule XXII allowing of filibusters, which has caused civil rights legislation to die or be eviscerated in the Senate at the will of a small minority, must be changed, and I will join in this fight at the opening of the next congressional session when it can be made effectively.

A situation came to my attention during the session which was particularly shocking to me: Airports constructed with Federal funds in several southern cities were allowed to contain segregated dining facilities, restrooms, and waiting rooms. I proposed an amendment to forbid Federal funds for such airports, which was not adopted, and shall introduce legislation to permanently forbid this practice.

The outbreak of anti-Semitic incidents and painting of swastikas on synagogues, which began in Germany early in the year, quickly spread, shocking a world which had every right to hope that any vestiges of nazism or fascism were dead. I spoke out on the Senate floor in denunciation of these outrages and urged that they be met by quick justice, severe penalties, and with indignation in the highest circles. I also urged continued

support for the idea of a United Europe and of the work of Chancellor Adenauer in that direction.

I continued to oppose legislation restricting the power of the Supreme Court to protect the civil liberties of the individual, and no bills of this type were passed by the Senate this year. Legislation which would have permitted the denial of passports to Americans on alleged national security grounds without court review did not secure favorable action.

A major problem in law enforcement is the provision of Federal law which forbids wiretapping. While in New York and some other States it is permitted under strictly controlled court orders to aid in catching serious criminals, a pending bill would permit law enforcement officials in such States to wiretap under the control and regulation of State laws; I proposed an amendment permitting the Congress to review the effect of this bill periodically for possible abuses.

The Senate passed a clean elections bill requiring additional reporting of campaign expenditures, but it was not acted on by the House. I also supported a constitutional amendment, now submitted to the States, which will permit citizens of the District of Columbia to vote in presidential elections.

IMMIGRATION

Action in the Congress on immigration this year was limited to passage of H. J. Res. 397 which would admit approximately 5,000 refugees from Europe, and to legislation continuing the alien orphan program, which I have long supported, for another year. Because of the gag rule on immigration legislation, neither my bill, S. 1919, nor the administration bill which I also sponsored and which would have revised and brought up to date the whole immigration quota system was reported out.

Under the legislation recommended by President Eisenhower, the present quota system would have been revised to make the 1960 census the quota basis, eliminate racial and ethnic classification including those from the Carribbean and the Pacific triangle, increase quota numbers of countries in proportion to their actual immigration to the United States between 1924 and 1960, pool all unfilled quota numbers and make them available to oversubscribed countries in given areas without regard to nationality, and allow the admission on parole of refugees from persecution and oppression.

In the Senate debate I served notice that next year I would not allow my efforts to be curtailed by the threat of gag rule legislation.

POST OFFICE AND SOCIAL SECURITY

I supported the 7½ percent pay raise bill to provide adequate salaries for postal workers and other Federal employees. I have consistently joined in seeking to correct inequities in the wage level of Federal employees as compared to that for equivalent job skills of those working in private employment. I feel that the Federal Government has a clear responsibility to be a fair employer itself and to give enlightened leadership to private enterprise throughout the Nation in the treatment of its own personnel.

The Social Security Amendment of 1960 bill liberalized somewhat the provisions which allowed beneficiaries to increase their earnings above $1,200 a year. I supported an amendment to allow retired persons to earn up to $1,800 a year but under the new formula an individual who earned up to $1,500 a year would lose $1 of benefit for each $2 of earnings over the limit of $1,200. For earnings over $1,500 the formula calls for a $1 reduction in benefits for each $1 earned. The bill reduces the length of time a person must pay into the social security fund to be eligible for benefits; extends coverage to more domestic employees and additional widows and widowers. Legislation which I sponsored to extend the unemployment insurance system to Puerto Rico became law.

Other major changes in the law would drop the requirement that a person must be 50 or older to receive disability payments; extends coverage to about 25,000 survivors of workers who died before 1940, and increases payments to about 400,000 children of deceased workers. Self-employed physicians—150,000—are not yet included under social security coverage.

I have long been in favor of the basic principle of encouraging pension plans for self-employed individuals, many of whom have had no opportunities for retirement funds and pension plans such as other workers and officials often obtain. The Senate Finance Committee has proposed a number of amendments to the self-employed retirement act which passed the House of Representatives during the last session. I want to see action on a meaningful and effective self-employed retirement bill and will do my utmost to see that one is enacted.

It is most important in this election year to get out the vote irrespective of party affiliation. I have therefore proposed that posters be placed on all postal trucks urging citizens to vote this November. These posters will be appearing shortly on post office trucks everywhere.

NEW YORK STATE AFFAIRS

This session of Congress has been particularly gratifying in the close cooperation between me and my colleague, Senator KENNETH B. KEATING of New York, in matters affecting our State. With the whole New York congressional delegation we have pressed in the Congress for measures essential to New York's economy. As members of the steering committee of the delegation, on which Senator KEATING is alternate, we have been particularly alert to the necessity of securing more defense business for New York industries.

The labor situation in New York State is discouraging in a number of areas. Buffalo and the Niagara frontier, Schenectady, Rome, Utica, and Troy still remain areas of substantial labor surplus. Until these unacceptable conditions are eliminated, New York Congressmen and Senators cannot cease in their efforts that New York receive proper consideration.

I do not think New York is getting its fair share of Government contracts; awards to other areas of the country are disproportionate to what the Northeast and New York in particular are receiving. I have protested in debate in the Senate and I have been in constant touch with the Department of Defense, the Atomic Energy Commission, and the National Aeronautics and Space Administration about this problem. At the same time, of course, it is essential that New York industry maintain and improve the caliber of its scientific, technical, and industrial capability and competence in order that it receive proper consideration for vital Government work. I am working closely with the New York State Department of Commerce and Governor Rockefeller's office to assure that our New York industries stay in the industrial forefront and that we do all we can to encourage and attract scientific and technical talent to our State.

The Congress voted funds for several important public works projects in New York State, including major channel and navigation work in the Rochester, Buffalo, and New York harbors. Funds were also authorized for extensive beach erosion control and hurricane protection from Fire Island Inlet to Montauk, L.I.

VETERANS

I supported veterans' legislation which would permit the conversion or exchange of policies of national service life insurance. I also supported legislation to provide veterans who served from January 1, 1955, until the end of the draft with the same benefits substantially as those granted to Korean war veterans. These include grants to veterans for education and vocational training assistance, vocational rehabilitation training, and also guarantees for direct loan assistance for the purchase of homes and farms.

Following a fight to get added Federal help for the Northport Veterans Hospital based on the overcrowding in Northport, one of the largest neuropsychiatric hospitals in the Veterans' Administration system, the Veterans' Administration has set up a 12-year program for veterans hospitals which deal in mental cases such as the one at Northport, and I have been assured that Northport Hospital would be included in the next fiscal year program.

I supported measures to aid in the education and training of veterans, those extending benefits to veterans' children, the extension of guaranteed home loan provisions, and legislation providing for the services of optometrists to veterans having service-connected eye conditions.

MISCELLANEOUS

I believe that some help from the Federal Government is necessary to encourage the spirited and historic development of the arts in our country, and to spur their enjoyment and dissemination more widely than is presently feasible. I have sponsored legislation for this purpose calling for the establishment of a U.S. Arts Foundation and

supported a bill for a Federal Advisory Council of the Arts.

I sponsored resolutions calling for the establishment of memorials in Washington, D.C., to President Theodore Roosevelt, which became law, and to the memory of Albert Einstein, the great scientist; a resolution authorizing the President to declare the fourth Friday in September of each year to be American Indian Day and to invite the public to observe the day with appropriate ceremonies; and legislation providing for payment from the war claims funds to certain organizations in settlement of war claims where such payment is to be used to rehabilitate needy victims of Nazi persecution.

I have also supported the amendment by my colleague, Senator KEATING, to H.R. 2485, dealing with the War Claims Act, which would extend reparation rights to all who are now American citizens whether or not they were citizens when their claims accrued.

AGRICULTURE

Our farm problem is not one of shortages, but rather one of surplus and plenty. The present surplus of wheat has become a major national problem in terms of public investment immobilized and high storage costs as well as in its serious effects upon the future welfare of our farmers. I voted for amendments to reduce high fixed farm price supports and to extend the conservation reserve program and to increase the acreage exemption for small farmers, which is of particular importance to New York agriculture.

I have favored more help to the farmer in research in the industrial use of farm products, in better marketing and in teaching new skills and business development in rural areas. I shall continue to work for such legislation and also for more use of surplus agricultural products in our foreign aid programs—a most important and effective way to use agricultural surpluses.

CONCLUSION

The citizens of the State of New York have responded in ever increasing numbers to express their views on matters of the national interest, as well as on problems in which they have a personal interest. It is always heartening to know that my constituents feel free to write to me about their problems or about any issues on which they have decided opinions. I assure you that your letters are welcome and receive full attention and consideration and have a constructive effect.

DISPOSITION OF SECURITIES LEGISLATION

Mr. WILLIAMS of New Jersey. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. WILLIAMS of New Jersey. I wish to take this opportunity to advise the Senate of the disposition of the securities legislation that the Senate passed this year. I was honored to serve with the senior Senator from New York [Mr. JAVITS] on the Securities Subcommittee. First, there were two acts that the Senate amendment amended that were accepted by the House of Representatives, the Trust Indenture Act and the Investment Advisors Act. We also agreed to amendments to the Securities Act of 1933 and the Securities and Exchange Act of 1934. In the House these amendments were not accepted.

The fifth act, the Investment Company Act, received attention by the House of Representatives and certain amendments were added thereto. The bill was returned to the Senate too late in the session for fruitful conference. One of the amendments expressed an idea of the gentleman from Pennsylvania, Representative WALTER, which presented a new, but in our judgment meritorious approach that I hope the committee will consider thoughtfully in the months ahead.

Mr. JAVITS. I should like to state, Mr. President, that I concur with my colleague in the decision to stand where we are in respect of legislation in the securities field. I should like all my colleagues to study this important proposed legislation, which concerns the whole business of securities, stocks and bonds in private corporations in the United States, a subject in which our people have a great interest.

Reportedly 14 million people are now direct holders of such securities. I feel also, with my colleague, that the amendment offered by the gentleman from Pennsylvania, Representative WALTER, to that bill, which affected investment companies, is an idea we certainly will wish to consider very carefully. It relates to conflicts of interest by corporate directors and officers of such investment companies, but it is hardly a subject which we can consider on the last day of the session. I believe my colleague and chairman of the subcommittee, the Senator from New Jersey [Mr. WILLIAMS] has therefore made the right decision in suggesting that we study the subject during the recess. I regret very much that the House did not act in respect of the Securities Acts of 1933 and 1934, but I hope that we can do the work during the recess and repair the situation in the next session.

CREDIT FOR PERIODS OF INTERNMENT DURING WORLD WAR II OF CERTAIN FEDERAL EMPLOYEES

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 7810.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. H.R. 7810, an act to credit periods of internment during World War II to certain Federal employees of Japanese ancestry for purposes of the Civil Service Retirement Act and the Annual and Sick Leave Act of 1951.

Mr. JOHNSTON of South Carolina. Mr. President, the purpose of this legislation is to correct certain omissions in Public Law 545, 82d Congress, which granted Federal employees of Japanese ancestry certain seniority and compensation benefits where their grade, time in grade, or rate of compensation were adversely affected because of the security policies of the Federal Government during the World War II period of evacuating people of Japanese ancestry to relocation centers. However, consideration was not given at that time to crediting such periods as periods of service for annual leave accrual and retirement purposes. Such annual leave accrual and retirement service credit benefits generally are associated with the benefits granted by Public Law 545, 82d Congress.

H.R. 7810 would make the annual leave and retirement benefits of these employees of Japanese ancestry conform with the other benefits granted by Public Law 545.

Enactment of this measure is approved by the Civil Service Commission and the Bureau of the Budget.

The measure has been approved unanimously by Members on both sides of the aisle in the Post Office and Civil Service Committee.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 7810) was ordered to a third reading, read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. CLARK. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PLACING OF BAMBOO PIPESTEMS ON THE FREE LIST

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 1981, H.R. 10841.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 10841) to amend the Tariff Act of 1930 to place bamboo pipestems on the free lists.

Mr. JOHNSON of Texas. I ask unanimous consent that there be printed in the RECORD at this point a brief statement on the bill.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of H.R. 10841 is to make free of duty bamboo pipestems in whatever condition of manufacture and whether bored or unbored, when imported from other than Communist-dominated countries.

GENERAL STATEMENT

Bamboo pipestems are currently classified for duty purposes under paragraph 1552 of the Tariff Act of 1930, as amended. That paragraph states:

"Mouthpieces for pipes, or for cigar and cigarette holders of whatever material composed, and in whatever condition of manufacture, whether wholly or partly finished, or whether bored or unbored."

These items were originally dutiable at the rate of 5 cents each plus 60 percent ad valorem. As a result of trade-agreement concessions, this rate has been reduced to 1 cent each and 15 percent ad valorem.

H.R. 10841 would provide for the free importation of bamboo pipestems only, and it provides further that the free importation would apply only to pipestems produced in other than Communist-controlled countries. Those originating in Communist-controlled areas would continue to be dutiable at the original rate of duty provided for in the tariff act.

Bamboo pipestems are used principally on corncob pipes. Present tariffs on bamboo stems prohibit their use in the manufacture of corncob pipes because of the low average unit retail selling price for corncob pipes.

No objection to the passage of the bill has been made known, including the Government departments.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. JOHNSON of Texas. If there are any amendments offered to this bill, I will either move that they be tabled, or move to take up another bill.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill was ordered to a third reading, read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. KERR. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT OF THE HELIUM ACT OF SEPTEMBER 1, 1937, AS AMENDED

Mr. JOHNSON of Texas. Mr. President, I should like to see if I can get an agreement following the usual form on the helium bill, debate not to exceed 30 minutes to a side on the bill and all amendments, the time to be controlled by the majority and the minority leaders.

Mr. GORE. Mr. President, a point of order.

The PRESIDING OFFICER. The Senator will state it.

Mr. GORE. We could not hear the Senator.

Mr. JOHNSON of Texas. I asked unanimous consent that we follow the usual form and have an agreement that debate on the helium bill shall not exceed 30 minutes on the bill and all amendments, the time to be controlled by the proponents and opponents, to be yielded by the majority and the minority leaders.

The PRESIDING OFFICER. Is there objection?

Mr. LAUSCHE. Mr. President, I object. If this unanimous-consent agreement is entered into, will amendments that are not germane to the substance of the bill as it is now written be received?

Mr. JOHNSON of Texas. They will not. I told the Senator they would not. That is why I have asked for the agreement, so we would not have as many amendments coming into the bill as we might otherwise have, with much irrelevant and extraneous debate, and amendments that have no relevancy to the bill.

Mr. LAUSCHE. An amendment that is not germane will not be accepted?

Mr. JOHNSON of Texas. Such an amendment will not be accepted if a consent agreement is reached in accord with the proposal of the majority leader.

Mr. LAUSCHE. I withdraw my objection.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The agreement, subsequently reduced to writing, is as follows:

UNANIMOUS-CONSENT AGREEMENT

Ordered, That, during the further consideration of the bill (H.R. 10548), to amend the Helium Act of September 1, 1937, as amended, for the defense, security, and the general welfare of the United States, debate on all amendments, motions, or appeals, and the bill shall be limited to 1 hour, to be equally divided and controlled by the proponents and the majority leader: *Provided further*, That no amendment that is not germane to the provisions of the said bill shall be received.

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1884, H.R. 10548.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 10548) amending the Helium Act of September 1, 1937, as amended, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. CARROLL. Mr. President, this is one of the most important bills to come before the 86th Congress, either in this so-called bobtail session or in the main session which ended in July. This is the helium conservation bill.

I favor the conservation of helium. I know of no one opposed to conservation of helium.

The able chairman of the House Interior and Insular Affairs Committee, Congressman WAYNE ASPINALL, and the very able and distinguished Congressman WALTER ROGERS of Texas, were largely instrumental in bringing this bill before the legislative branch of the Government.

I salute both of them for doing yeoman work. Especially do I commend them for calling before their committee and questioning the General Counsel of the Federal Power Commission. This questioning alerted me to the danger of this bill exempting all helium-bearing gas from regulation under the Natural Gas Act.

I ask unanimous consent that certain printed matter related to my remarks may be printed in the RECORD at appropriate points in my remarks.

Mr. President, I had originally planned to talk on this subject for some hours. However I do not intend to be arbitrary about this bill. The authors of the original bill in the other body and members of our own Senate Interior Committee, have worked out what are believed to be reasonable amendments which will protect the public interest. One of these is an amendment which I have drafted and without which this bill is complete unacceptable. I will call up this amendment in a few moments.

The bill, as drafted in the House, I am sure was not in any sinister manner drafted deliberately to exempt from regulation by the Federal Power Commission, which has jurisdiction under the Natural Gas Act, all natural gas bearing helium. However, this was the suspected effect of section 9 of the House bill. This matter was called to my attention as the House bill came to the Senate Interior Committee. I pay particular tribute to Representative ASPINALL and the other members of the House committee who raised that question. Evidently they were not sufficiently impressed by the testimony given by the Federal Power Commission, because the issue was not debated on the floor of the House. It was not seriously considered except in the House report.

When the bill came before the Senate Committee on Interior and Insular Affairs, I raised the question about exemption under the Gas Act with the able Senator from New Mexico [Mr. ANDERSON]. At that time we were almost in the process of marking up the bill. I called his attention to that defect in the bill, and I said, "I am not satisfied that the record is clear enough or that the bill is clear enough. Therefore I believe we ought to call before our committee Mr. Willard Gatchell, the General Counsel of the Federal Power Commission."

During Mr. Gatchell's testimony, and under very vigorous cross-examination, Mr. Gatchell testified that it was very clear that the provisions of the bill exempted all helium-bearing gas from the Natural Gas Act, and took away all jurisdiction over helium-bearing gas from the Federal Power Commission.

Mr. President, I am amazed at the lack of knowledge in this body on this very important helium bill. I say frankly I consider this issue so touched with the public interest that if there had not been some give and take today by both House and Senate committees, I would have stood on the floor of the Senate and spoken until the end of the session. However, I think we will now have a safeguard in the bill which will permit me not to stand in its way.

Helium-bearing gas is produced exclusively in the Panhandle area of Texas and in adjacent fields in Oklahoma and Kansas. It feeds through pipelines into

major cities of the Nation—Denver, Chicago, Detroit, and many others. I have before me and will place in the RECORD at this point, a list of States which receive natural gas from central U.S. gasfields. I also place in the RECORD a list of cities served with helium-bearing gas. For example, Ohio receives approximately 465,288,000 cubic feet of gas from central U.S. fields. Illinois receives 400 million. Pennsylvania receives 400 million. New York receives 285 million. I have a list of States which shows how important this issue is, and why Senators from these States should be alert to legislation that might affect consumers in their areas. I am amazed at the lack of knowledge on this important bill on the part of Senators. I know my friends in the Senate, who would normally be alert to this type of issue, are anxious to go home. Yet this bill could affect millions of consumers, and some of the most important manufacturing and most populous States of the country.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

States receiving shipments of natural gas, 1958 [1] [2]

[In thousands of cubic feet]

States	From west north-central gasfields	From west south-central gasfields	Total
Ohio	29,407	435,881	465,288
Illinois	33,730	411,069	444,799
Pennsylvania		400,030	400,030
New York		285,461	285,461
Michigan	51,419	231,635	283,054
Missouri	75,842	171,924	247,766
Kansas	1,315	233,960	235,275
California	1,221	183,682	184,903
Iowa	46,862	132,307	179,169
Indiana	27,108	131,240	158,348
Tennessee		146,970	146,970
Minnesota	51,659	95,005	146,664
West Virginia		138,157	138,157
New Jersey		118,479	118,479
Colorado	50,085	42,561	92,646

[1] Among States producing gas in the west north-central fields: Kansas.

[2] Among States producing gas in the west south-central fields: Oklahoma and Texas.

Principal cities served with helium-bearing gas

	Gas taps
Chicago	1,017,043
Kansas City	583,159
Detroit	879,361
Milwaukee	205,453
Minneapolis	142,546
Denver	142,732
St. Paul	91,285
Omaha	87,034
Grand Rapids	88,819
Wichita	91,536
Des Moines	71,536

Mr. CARROLL. What have we done to correct the weaknesses in this bill? First of all, we took extensive testimony from the General Counsel of the Federal Power Commission in our Senate Interior Committee. I wish the RECORD to be crystal clear, so that any court which reads this RECORD will know what is the specific legislative intent, namely, that we are not exempting helium-bearing gas from jurisdiction by the Federal Power Commission under the Natural Gas Act. There can now be no question about that. For anyone who reads the hearings of the Senate committee, the report of our committee, my own individual views, which are a part of the Interior Committee report, and, I hope, the debate this evening. This is the first weakness we cured.

There was a second weakness which we cured by committee amendment. It is a most important issue. Not only did the House bill exempt helium-bearing gas from jurisdiction of the Federal Power Commission; the House bill also prohibited the Federal Power Commission from allocating certain costs to helium, which would have resulted, in my opinion, in a $28.6 million loss to gas consumers in the Middle West and Rocky Mountains. It was the avowed intention of the House—and though I do not criticize the Members of the House for it, I recognize that they did it deliberately—to prevent the Federal Power Commission from allocating certain production costs to helium at the time it is computing the cost-of-service of a natural gas company in determining a fair gas rate to be paid by consumers.

The House, in effect, said to the Federal Power Commission, "You have no right to look at the gas company books and see what income and costs are attributable to helium."

Before I get to the issue of how this program should be financed, I wish to say that we have now restored in the bill, clearly and conclusively for the RECORD, the provision that the Federal Power Commission has jurisdiction over helium-bearing gas, and authority to allocate costs.

My arguments supporting such authority are very technical and, my individual views, printed as part 2 of the Senate Interior Committee report is a very technical exposition. I ask unanimous consent that rather than take the time of the Senate tonight, I be permitted to place in the RECORD a portion of these views, for the purpose of making a legislative history, and I shall be very glad to explain my arguments privately if any Senator wishes me to do so. It is a very complex discussion in the field of cost accounting and the allocation of costs to the benefit of the consumer.

There being no objection, the views were ordered to be printed in the RECORD, as follows:

POSITION OF FEDERAL POWER COMMISSION

In reports of February 18 and March 2, 1960, to the House Interior Committee and May 19, 1960, to the Senate Interior Committee, the Federal Power Commission made its position clear on the sections of the various bills relating to the Natural Gas Act.

In the House:

The Federal Power Commission, in its February 18 report, made two powerful arguments against the Natural Gas Act section of the bills:

"1. * * * the bill would remove the Commission's present jurisdiction over the transportation and sale of natural gas containing helium, since the bill appears to give the Secretary of Interior exclusive jurisdiction over the sale and transportation of the helium in natural gas even before the helium is extracted.

"2. * * * authority to make cost allocations and to consider revenues from the sale of helium extracted from natural gas would be taken away by the * * * bill."

The Federal Power Commission accordingly offered four amendments to the helium bill, submitting as their purpose this strong language:

"To safeguard the jurisdiction of the Commission over the transmission or sale of helium-bearing natural gas under certificates of public convenience and necessity for ultimate consumption as fuel, and in order to preserve the vitally important jurisdiction of the Commission to make joint cost allocations in rate proceedings and to consider revenues from helium extracted from natural gas."

These arguments were essentially repeated in the March 2 report of the Federal Power Commission to the House Interior Committee, recommending two amendments.

In the House hearings, Mr. Willard Gatchell reaffirmed the position taken by the Federal Power Commission in its written reports.

Mr. Gatchell further said in the House hearings in regard to the effect on consumers' gas bills:

"There is the matter of fixing rates that is a very important phase of our operation * * * what is important is to see that the people who want natural gas service get it at just and reasonable rates as Congress has prescribed * * *. But you left out a big block of our jurisdiction, and I don't know just how we are going to be able to do that."

Mr. Carl Kallina testified in the House on the Federal Power Commission cost allocation method in ratemaking and reaffirmed that helium should bear its share of the natural-gas costs.

In the Senate:

In the May 19 letter to the Senate Interior Committee the Federal Power Commission made this alarming observation:

"The requirement that the Commission make cost allocations * * * is firmly established as a method to be followed in order to determine just and reasonable rates * * *.

"The proposed bill would prohibit such cost allocations * * * and would further prohibit the Commission from considering revenues from the sale of helium so extracted in determining the rates which should be charged for natural-gas sales.

"Thus, section 11 of this bill * * * would raise serious legal questions as to the legality of any rates fixed by the Commission for the sale of natural gas after the helium had been extracted. In such a situation the gas consumers would be expected to bear costs which under existing law and procedures would be properly chargeable to helium extraction."

After studying the Federal Power Commission reports to the House and Senate committees and reading Mr. Gatchell's warning in the House hearings, I asked that the Federal Power Commission witnesses be heard by the Senate Interior Committee.

Mr. Gatchell appearing before the committee again testified that the Federal Power Commission would lose jurisdiction under the Natural Gas Act unless the bill was amended.

He said:

"As we read section 9 of the [House] bill, if the gas contains helium, we are out. * * * We recommend eliminating section 9."

Following is the full Federal Power Commission report to the Senate Interior Committee on S. 3376:

FEDERAL POWER COMMISSION,
May 19, 1960.

REPORT ON A BILL (S. 3376, 86 CONG.) TO AMEND THE HELIUM ACT OF MARCH 3, 1925, AS AMENDED, FOR THE DEFENSE, SECURITY, AND THE GENERAL WELFARE OF THE UNITED STATES

This bill, to be known as the Helium Act of 1960, would, among other things, authorize the Secretary of the Interior to regulate the sale and transportation of extracted helium in interstate commerce.

Section 11 of the proposed bill provides that the Natural Gas Act shall not apply to the "sale, extraction, processing, transportation, or storage of helium either prior to or subsequent to its separation from the natural gas with which it is commingled." This section further provides that any income received by companies from helium operations shall not be considered by the Commission in making natural gas rate determinations under sections 4 and 5 of the Gas Act, and it expressly enjoins for the purpose of such ratemaking that "no exploration, production, gathering, extraction, processing, compression, transportation, storage, or other costs which would have been incurred in the absence of the extraction of the helium shall be allocated or assigned to the helium."

The above provisions would, in our judgment, materially impair the effectiveness of this Commission's regulatory responsibilities with respect to natural gas matters. Under the Natural Gas Act the Commission is charged with seeing that rates for natural gas transported or sold in interstate commerce for resale for ultimate public consumption for domestic, commercial, industrial, or other uses are reasonable and fair to all segments of the public interest. Accordingly, the Commission under the existing certificate provisions of the Gas Act regulates the interstate operations of the natural gas companies engaged in the production, transportation, and sale of natural gas (including helium-bearing gas and helium-gas mixtures) and under the rate provisions of the act determines whether the rates and charges for these interstate sales of natural gas by such companies are just and reasonable.

The requirement that the Commission make cost allocations between the jurisdictional and nonjurisdictional phases of the operations of natural gas companies is firmly established as a method to be followed in order to determine just and reasonable rates for those natural gas sales which are subject to the Commission's jurisdiction. The proposed bill would prohibit such cost allocations between jurisdictional natural gas operations and nonjurisdictional helium operations, and would further prohibit the Commission from considering revenues from the sale of helium so extracted in determining the rates which should be charged for natural gas sales subject to the Commission's rate control. Thus, section 11 of this bill, by eliminating these essential factors from consideration by the Commission, would raise serious legal questions as to the legality of any rates fixed by the Commission for the sale of natural gas after the helium had been extracted. In such a situation the gas consumers would be expected to bear costs which under existing law and procedures would be properly chargeable to helium extraction.

In view of the adverse effect of the proposed bill upon the Commission's functions under the Natural Gas Act, and to assure that the public does not bear unreasonable costs as part of the rates for natural gas, we recommend the following amendment:

Strike out section 11 and add the following as a new section:

"Nothing in this act shall be construed as repealing or modifying the provisions of the Natural Gas Act of June 21, 1938 (52 Stat. 821; 15 U.S.C. 717–717w), as amended."

In any event, it appears to us that the language in section 11 of the bill making the Natural Gas Act inapplicable to the sale, extraction, processing, transportation, or storage of helium "either prior to or subsequent" to its separation from natural gas is unnecessary for the purpose of the proposed bill, since prior to extraction the helium unquestionably is part of the interstate stream of natural gas which properly should be regulated under the Gas Act, whereas after extraction the helium would not, even in the absence of this language, be subject to regulation under the Natural Gas Act because extracted helium does not come within the definition of natural gas contained in the Gas Act.

The Commission is in agreement with the basic objectives of this bill to facilitate the production, conservation, and utilization of helium, and we would have no objection to its enactment if amended in the manner described above.

FEDERAL POWER COMMISSION,
By JEROME K. KUYKENDALL,
Chairman.

AMENDMENTS CONSIDERED IN SENATE COMMITTEE

1. Jurisdiction of Federal Power Commission under Natural Gas Act: Following the testimony of the Federal Power Commission witnesses against section 9 of the House bill (sec. 11 of the Senate bill) the Interior Committee adopted an amendment designed to cure the Federal Power Commission objections.

On page 15 of S. 3376, line 13, the word "its" was changed to "the" and after the word "separation" the following words were added: "of such helium". The sentence then read:

"SEC. 11. The provisions of the Natural Gas Act of June 21, 1938 (52 Stat. 821; 15 U.S.C. 717–717w), as amended, shall not be applicable to the sale, extraction, processing, transportation, or storage of helium either prior to or subsequent to the separation of such helium from the natural gas with which it is commingled."

In regard to the amendment I stated:

"If this matter should come up in court at a later time, a producer of gas, or an integrated company that also has a pipeline, could not successfully contend, with this amendment in the bill, that it was the intent of the Congress to exempt natural gas from regulation because we have excluded helium."

Mr. Gatchell responded:

"That is correct, Senator, as I look at it. Our concern is that the Commission shall still continue its control over the transportation of gas in interstate commerce and offer the interstate sale of natural gas in interstate commerce, and that where there are joint products the Commission may consider the joint products only to the extent of determining that the gas that is consumed, natural gas that is consumed, under our Natural Gas Act bears only its fair share of those joint costs, and that it is not burdened with the cost of producing helium.

"Senator CARROLL. I want to say for the record, because the courts may some day read this record, one of the reasons that I have tried to raise this point is because I did not see it discussed on the floor of the House at the time that this bill was passed, and this bill was passed by a voice vote. This issue was not debated.

"Mr. GATCHELL. No, sir.

"Senator CARROLL. It was contained in a departmental report by, I think, the Federal Power Commission and I think it was also contained in the legislative report by the House, showing another indication of legislative intent.

"Now that we have specifically nailed this down there should be no question in anybody's mind that this is not a device or a subterfuge to take out from under the Natural Gas Act the jurisdiction of the Federal Power Commission.

"Mr. GATCHELL. I think you are stating what is the fact, and I had the impression that the House committee was not trying to take out our jurisdiction.

"Senator ANDERSON. It certainly was not. It said so as clearly as could be.

"Senator ALLOTT. We discussed it here, I might say, and it was our opinion that it did not.

"Senator ANDERSON. I am satisfied with this language. I think that when you say helium and refer to its separation, when you make it read the "separation of helium," I don't think you have changed it one particle. But if that satisfies you, God be with you.

"Mr. GATCHELL. Senator, I have been in so many court cases where they twist language against us, and I just did not want to go to the Commission and say to them, 'You can forget this. Everybody thinks that they are protecting you.'

"I couldn't do that. I have to have these matters considered carefully and I think this is the way to do it."

The legislative intent is now perfectly clear in light of the above comments on the effect of the Senate committee amendment.

The intent is that no jurisdiction conferred upon the Federal Power Commission under the Natural Gas Act to regulate the transportation and sale of natural gas be withdrawn or in any way impaired by any section of the helium bill.

Mr. LAUSCHE. Mr. President, will the Senator yield for a question?

Mr. CARROLL. I am happy to yield to the Senator from Ohio.

Mr. LAUSCHE. Let us assume that a gas producer makes a profit through the sale of helium. Will that profit inure to the benefit of the consumer who buys the gas from which the helium has been removed?

Mr. CARROLL. In the sense that the Senator from Ohio puts the question, the profit itself would not go to the benefit of the gas consumer. This is specifically set out in the House bill. I have tried to make clear, in my work on this bill, that we are not trying to interfere with the gas company's income from helium. However, I have been insisting that the costs of exploring for the gas well, extraction, production, gathering, transportation and certain other costs must be allocated between helium and the gas delivered to consumers, just as such allocation is made to any other byproduct of the gas. Under such allocation system the consumer is charged a rate which pays only for the costs, plus 6 percent on plant investment, that are incurred in producing the combustible gas he uses in his stove.

I shall place in the RECORD at this point a letter I received from the Federal Power Commission, which shows that the allocation of costs to helium, based upon hypothetical annual withdrawals of 11 million M.c.f. of helium, would save the consumers of the Nation over a period of 20 years, $28,600,000, if the volumetric system were used, as it is now used.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FEDERAL POWER COMMISSION,
Washington, D.C., June 20, 1960.

Hon. CLINTON P. ANDERSON,
U.S. Senate, Washington, D.C.

DEAR SENATOR ANDERSON: At the request of Senator CARROLL during the hearings before the Committee on Interior and Insular Affairs, June 15, 1960 (transcript p. 160), the Commission's staff has reexamined data concerning the volumes of helium available from the Hugoton, West Panhandle, and Keyes gas fields. The results of the study are summarized on the attached schedule which shows that the remaining helium is estimated at 218.66 billion cubic feet. Assuming approximately equal annual withdrawals over a 20-year period, the annual volume of helium from the fields mentioned would be

about 11,000,000 M c.f. per year. If the volume of gas extracted for helium were valued at 13 cents per thousand cubic feet, the annual value of the helium included in the natural gas would be $1,430,000, based on a volumetric allocation. At the end of 20 years, the sum would be approximately $28,600,000.

The foregoing volumes represent only the helium content of the gas from the fields mentioned and do not include gas consumed as plant fuel in the extraction process. The plant-use volume, however, would be several times the volume of helium extracted.

It will be noted on the accompanying schedule that the estimated recoverable gas in the fields mentioned is in excess of 37 trillion cubic feet. This volume would be the total input into the helium plants over a 20-year period if the entire helium content is extracted. The total value of such input at 13 cents per thousand cubic feet would be $4,810 million. The valuation of 13 cents per thousand cubic feet represents approximately the average cost to Colorado Interstate Gas Co. of natural gas in the fields and may be considered representative for the purpose of this submission.

Sincerely yours,

KENNETH L. SMITH,
Assistant Chief,
Bureau of Rates and Gas Certificates.

Mr. CARROLL. We are not really trying to put the Federal Government into the business of controlling the profits of helium. We are saying that helium has a new, added value as a byproduct of gas and therefore certain production costs should be attributed to it and not loaded onto the gas going to consumers. Every time there is a favorable cost allocation, the consumer is helped. That is why the consumer will get the benefit of some $28,600,000.

This authority to allocate costs was not contained in the House bill. I do not offer any criticism. The House had a certain concept. We disagreed with that concept. It is my opinion that the House will now accept the Senate version, because of the legislative record we have made and because of the soundness of our position in protecting the consumer through the regulatory power of the Federal Power Commission.

The Senator from Ohio knows that for many years, under the Natural Gas Act, the Federal Government has exercised this regulatory power.

The Bureau of Mines, under the Department of the Interior, is now operating four helium extraction plants, at Keyes, Okla., and Excell, Tex., and two smaller plants. They are Government-owned and Government-built. Natural gas comes in at one end, the helium is extracted from it, and the residual gas goes out at the other end. At present, the Bureau of Mines is the only producer of helium. The Bureau supplies helium to other Government agencies at $15.50 per thousand cubic feet and to commercial users at $19 per thousand cubic feet, f.o.b. the plants.

Helium is a very special commodity. It has now become an extremely valuable gas for use in the missile program and in space exploration. About 90 percent of the present helium supply is used in the defense effort and in space exploration.

Why do we plan to go into such an expansive program? The proposed program calls for the Secretary of the Interior to negotiate partnership contracts with the private gas industry whereby the industry will build 12 new helium extraction plants. This will mean the awarding of $225 million in helium-purchase contracts. That is what is involved in the bill we are considering in the closing hours of the session. It is estimated that including interest charges there will be more than $500 million involved before the end of the helium program, which is to continue for 25 years.

I do not intend to cast any personal reflection upon the Secretary of the Interior of the present administration. The present administration will soon be going out of power, regardless of who is elected in November. For this administration, in its closing months, to be able to negotiate $255 million worth of contracts with private industry is not, I think, in the public interest, because under the terms of the bill, as it is now, no congressional committee has any review of the contracts which the administration will negotiate.

The question of the manner in which this program is financed under the bill has been under serious attack by the General Accounting Office. The GAO charges that Congress does not have control of the program, because direct appropriations by the Congress are not needed.

I ask unanimous consent to place in the RECORD another document, a letter which I have written to the General Accounting Office, asking for a report on the whole helium program. I have asked for the opinion of the Comptroller General, concerning the manner in which the helium program is being financed and how he believes it ought to be financed in the future. The Comptroller General has indicated that he will submit a report by January 1 or January 15, 1961.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AUGUST 27, 1960.

The Honorable JOSEPH CAMPBELL,
Comptroller General of the United States,
Washington, D.C.

DEAR MR. CAMPBELL: This is a request for a full-scale study and report on the functioning of the U.S. Government helium program.

You are, I know, familiar with the bills now before the Congress affecting this program.

On May 12, 1960, you sent the Senate Interior Committee your suggestions for amendment of S. 3376, the Senate helium bill.

On August 20, 1959, and again on March 7, 1960, you submitted to the House Interior Committee your comments on the several House helium bills, H.R. 10548, H.R. 8440 and H.R. 8451.

No representative of the General Accounting Office testified at the Senate helium bill hearings.

Your representatives, however, did render helpful testimony at House hearings on March 11, 1960. At that time Messrs. John R. Kurelich, E. W. Muhonen and W. J. Schuler appeared as GAO witnesses and testified on: (1) the need to recover helium research costs, (2) your proposal to reduce the helium production fund, (3) the undesirability of financing a helium conservation program through public-debt borrowings.

In your letter of May 12, 1960, to the Senate Interior Committee you raised what seemed to me to be some very disturbing issues. You said:

"While we have not reviewed this program, we have been advised that the charges to Government agencies per 1,000 cubic feet of helium, f.o.b. Bureau of Mines plants in Texas and Oklahoma, is about one-half the cost of procurement from commercial suppliers who obtain their supplies from the same plants. We were also informed that commercial distributors procured about 83 million cubic feet of helium from the Bureau of Mines during fiscal year 1959 and that defense contractors purchased approximately 75 percent thereof for their contract requirements. We were advised that the program of the military services of furnishing helium directly to defense contractors largely has been abandoned because of various problems involving matters such as distribution, transportation, and accounting. A Government-furnished materials policy is applicable in several missile activities such as the Atlas and Titan, which require large quantities of helium; however, helium used by defense contractors in the actual production of missile components is not Government furnished. In view of the foregoing the Congress may wish to explore the long-range effect that section 6(a) may have on the cost of Government contracts involving the use of helium."

You will note that you said, "we have not reviewed this program" and farther on you suggested "the Congress may wish to explore the long-range effect that section 6 (a) may have on the cost of Government contracts."

I think that, in the light of your cursory studies, a full review of the helium program on behalf of the Congress is necessary and in order. I request that you initiate such a review as promptly as your schedule will permit, including an exploration of the effect of section 6 (a) of S. 3376 on the cost of Government contracts.

I am especially interested in a study of the following areas:

1. The total U.S. investment in helium research, development, production and stockpiling.

2. The income the United States has received from sale of helium (to Government agencies and private industry) and the sums covered into the Federal Treasury.

3. The history of the helium production fund.

4. The helium markets and customers with whom the Government trades and the purchase and resale prices.

5. Earnings and capital investment history of the Government-owned helium production plants. (Is this Government-owned program self-sustaining?)

6. Prices and sums paid private gas producers for the helium product extracted from their natural gas lines.

7. The amounts of helium furnished by the Defense Department directly to defense contractors and the amounts defense contractors procure from commercial suppliers, with prices paid.

The foregoing are suggestions for the basis of your study and are in no way intended to be the limits of the study. I am sure that a full historical analysis of the production, marketing and end use of helium by the U.S. Government will be most valuable to the Congress in its attempts to evaluate proposals made by the executive department for the conservation of this precious natural resource.

Sincerely,

JOHN A. CARROLL.

Mr. McCLELLAN. Mr. President, will the Senator yield?

Mr. CARROLL. I yield.

Mr. McCLELLAN. It seems to me that the Senate is confronted with a rather complicated program. Is there such

urgency for this legislation that we ought to undertake to consider it and enact it in the very limited time which we have to consider it tonight? I wonder if it could not go over until the next session. I should like to know Senators views with respect to that. What is the urgency?

Mr. CARROLL. I thank the Senator for his question. It is a very pertinent question. I have had this course of action under consideration, not for two days, but for many weeks. The bill is one to which few people have given any study. The issue is difficult and complicated. As a matter of fact, in my minority views I recommended that the bill go over.

But in view of the urgent need for helium in our defense effort and in view of the fact that it is escaping into the atmosphere and is being wasted, I will not stand in the way of the bill.

I have consulted with Members of the House about it, and as I have previously said, had we not received what I think are remedial, curative amendments, I would stand on the floor all through the night and talk about the dangers in this bill, because I think the bill is that important. As I have said repeatedly, I am in complete favor with the basic purpose of this bill—to conserve helium—but I am fighting for language in the bill which will protect the interests of the gas consumers of this Nation and grant them benefits in terms of a reduction in their gas bills in proportion to the costs which can be allocated against the production of helium.

I am now convinced, because I have an amendment which I think is a curative amendment, that the bill should be passed. This amendment will make the effective date of the bill March 1, 1961. If the amendment is adopted, it will give the Department of the Interior and the big gas producing companies an opportunity to do their planning this fall and winter. They can draft plans and consider where they will locate their plants. Everything can be done except to enter into executed contracts, because the law will not become effective until March 1, 1961. It will then be reexamined, following the installation of a new administration, a new President, and a new Secretary of the Interior. The whole program can be restudied and, if necessary, strengthened. That is what I believe is the safety valve on the measure.

I have received wonderful cooperation from the Members of the House. While we cannot actually or officially call ourselves conferees, we have discussed the bill pro and con.

Therefore, I say to the Senator from Arkansas that if the amendments are adopted and if they are accepted by the House, I think they provide sufficient safeguards to carry us into next year, when a new look can be taken, if necessary, and the new administration will be able to reexamine the entire program.

Mr. McCLELLAN. It seems to me that the Senator from Colorado has very well answered, in his remarks just now, that there is not such urgency for the proposed legislation that it could not go over until the next session of Congress. I am confident that the Senator's amendments will, in his judgment, safeguard the public interest. At least, I am confident that they are so intended. However, it strikes me that in the public interest the whole matter might go over until the Members of this body and the Members of the other body can become more familiar with it and understand it better. This is a rather far-reaching program, as I see it.

Mr. CARROLL. It is a far-reaching program.

Mr. McCLELLAN. I am persuaded that many Senators, possibly, like myself, may not be sufficiently familiar with the subject to vote intelligently on the bill based on their own judgments. I should have to follow the counsel and recommendations of the distinguished Senator from Colorado and other Senators. Nevertheless, I think that a program which offers, or could offer, an opportunity for some manipulations which would not be in the public interest, ought to have safeguards provided, especially when we are dealing with something so vital to our national defense as helium.

Mr. CARROLL. The Senator's argument is unanswerable except for one thing. The President of the United States has written a letter stating that helium is urgently needed for defense purposes. The Secretary of the Interior has been saying that a year's supply of helium is escaping every 45 days.

I do not know whether I have sufficiently explained the difficulty. Helium-bearing gas is escaping from the gas jets of millions of Americans.

Mr. McCLELLAN. In other words, helium must be extracted from commercial gas.

Mr. CARROLL. Exactly. The helium going into the gas burners of the people of the Nation, not being inflammable, goes up the flue. The junior Senator from Colorado has had difficulty in trying to solve the technical problems of protecting the consumer, of protecting the jurisdiction of the Federal Government, and of providing for the national interest. Much pressure is being exerted for the passage of the bill because of the large amount of helium which is going to waste. Helium has been escaping for 34 years. However, the need for helium has become more urgent now because of its use in Titan and Atlas missiles and in other phases of the missile program. I am frank to say that pressure has been put on me. Letters are being sent to members of Senate committees by the Secretary of the Interior. The pressure is on. However, I can stand the heat, and I think regardless of pressure we must write a good bill. We must protect both the national and the consumer interest. I think passage of the bill in this Congress will put the Government a year ahead in the program.

I am afraid that if we let the bill go over and start considering it all over again in January, February, or March, that will be too long.

So I thought the best I could do was hold out for an amendment providing for an effective date of March 1. These contracts, then, will not come into force until March. The new President and the new Secretary of Interior will be able to restudy the program, and we shall be moving forward in the helium conservation program.

Mr. McCLELLAN. Did the Senator say March 1?

Mr. CARROLL. Yes.

Mr. McCLELLAN. That would hardly allow time for Congress to consider the matter in the next session, if in the meantime it is determined that this legislation is not sufficient to protect the national interest.

But without laboring the matter further or delaying action, I wish to commend the Senator from Colorado for his diligence and his labor on this subject. I am persuaded, at least at the moment, from my understanding of it, that he has performed a fine service for the country in preparing and developing safeguards in the nature of the amendments he has proposed. I believe he has performed a valuable service, and I wish to commend him for it.

I regret that the matter cannot go over until the next session; I think further amendments might be made.

But, again, I commend the Senator from Colorado.

Mr. CARROLL. I thank the Senator from Arkansas for his very gracious and generous remarks. I shall explain why we call for March 1. I was almost alone in holding out for some changes in this bill, even in my own committee, because the bill is difficult to understand. I was able to understand it because I brought in cost accountants to advise me on the technical aspects of these problems. Of course, I am not personally an expert in this field.

The reason I proposed March 1 is that the new President comes in January 20; and we know that following the election, the new President will have his representatives studying the operations and activities in the various departments. If the new President is a Democrat, his Cabinet appointees and their staffs will start working on this issue. That is why I wish to allow plenty of time after January 20 for the new President to look at this program.

I assure the Senator that I will have a report in January from the Comptroller General, and will have time to study the matter further, and I will report to the Senate, if necessary.

I thank the able Senator for his observations.

Mr. LAUSCHE. Mr. President——

The PRESIDING OFFICER (Mr. BURDICK in the chair). Does the Senator from Colorado yield to the Senator from Ohio?

Mr. CARROLL. I yield.

Mr. LAUSCHE. Under the provisions of the bill, as they will read in the event the agreement which has been worked out is put into effect, will the Federal Power Commission definitely have control, under existing law, over the natural gas operations?

Mr. CARROLL. Yes; the helium-bearing natural gas. This is the real question. I think the exemption was inadvertently written into the House bill language. I do not ascribe any evil motive, because many of the Members of that body felt that Mr. Gatchell, the

counsel of the Federal Power Commission, was seeing phantoms when he called attention to the exemption language. They thought this was a fight between the Department of the Interior and the Federal Power Commission, and that the Federal Power Commission wanted to get its foot in a new door. The House committee took the position that it did not want the Federal Power Commission to have jurisdiction over helium. Actually the language went much further as the FPC interpreted it, and exempted control under the Gas Act.

I am trying to make the record here in the Senate chamber as I did in my individual views. The Federal Power Commission now has jurisdiction—as we have drawn this measure—of all helium-bearing gas, under the Natural Gas Act.

Mr. LAUSCHE. Second, under the proposal made, will the allocation of costs be made in a manner that will protect the consuming public?

Mr. CARROLL. That is a very good question. I am not in complete approval of an amendment which I understand will be offered. I think the Federal Power Commission itself made a basic mistake—it was not made by either the House committee or the Senate committee—when it decided to allocate costs in the Keyes plant in Oklahoma on what is called a volumetric basis, instead of a relative market value basis. It is my understanding that of all the byproducts from gas, the only one whose costs are allocated on a volumetric basis is helium. I think the costs should be divided on the basis of the relative value of the products coming out of the well. But I cannot stand against the Power Commission and everyone else. I think they are wrong; but the issue is not of sufficient importance when viewed in the larger perspective of the program for me to stop the passage of this bill.

But as I have said to the Senator from Ohio, we have some protection—$28,600,000 worth of protection—that the Senate committee picked up for the gas consumers, besides restoring the jurisdictional right in regard to the Natural Gas Act.

Mr. LAUSCHE. Was a third item in dispute?

Mr. CARROLL. Well, I felt very strongly about this matter, as a matter of national policy. I do not like to see a lame duck administration, whether Democrat or Republican, go out of office and have the power to write $255 million worth of partnership contracts in the last days of its term. There is a presumption in law that all officials have a good intent. So I do not ascribe any evil intent to anyone. But suppose the administration now in office loses the election in November, and suppose it is going to negotiate contracts which will be binding upon this Government. I do not think that is in the best public interest. That is why I provide for the March 1 date.

Mr. LAUSCHE. That will protect against any such abuse, will it?

Mr. CARROLL. Yes.

There is another aspect that bothers me, and that is one of the questions I want the General Accounting Office to check on. There is a kind of back-door financing in the bill, which I do not like. The Comptroller General has raised questions about the wisdom of this method of financing. Last year the Republican administration was blaming the Democrats for engaging in back-door financing. But this bill is, in part, of that type.

This matter was debated in the House, and I think the debate was an intelligent one.

At this point, I am going to put my amendment on this issue into the RECORD, but I am not going to press for its adoption. However, I want the RECORD to show that this is the amendment I have in mind. My amendment is similar to the amendment proposed by the Comptroller General.

But now that I have been promised a report from the General Accounting Office on January 15, I want to take another look at the bill, when we return.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

On page 25, beginning on line 10, strike out all through line 13, and insert in lieu thereof the following:

"(2) Within twenty-five years from the date of completion of construction, any funds expended for the construction of any helium plant or facility, or within twenty-five years from the date of acquisition of title by the United States, any funds expended for the acquisition of any helium plant or facility by means other than construction; and

On page 25, line 17, beginning with "bor-" strike out all through line 19, and insert in lieu thereof "appropriated for the purposes of this Act, except as provided in clauses (1) and (2) of this subsection."

On page 26, line 5, beginning with "the obligations" in line 5, strike out all through line 6 and insert in lieu thereof "amounts specified in clauses (2) and (3) shall be determined from the date of expenditure of each such amount by the Secretary."

On page 29, beginning with line 20, strike out all through line 16 on page 30, and insert in lieu thereof the following:

"SEC. 12. There are authorized to be appropriated and credited to the helium production fund such amounts as may be necessary to carry out the provisions of this Act, including contractual obligations incurred thereunder."

Mr. LAUSCHE. I understand that a limitation has been placed on what may be spent under the requirement that appropriations be made.

Mr. CARROLL. This is a serious question. There is a difference of opinion about it. In other words, the Secretary of the Interior can negotiate helium-purchase contracts with the gas and oil companies, for about $225 million. What is the consideration of the contractors? It is that they will build 12 helium plants. But they will sell the helium to the Government of the United States, which has control of the market for helium. There is now $7 million in the helium fund administered by the Bureau of Mines. I think that $7 million can be used, first to fulfill contracts, without any control by the Congress. If they exhaust that fund, then they could ask Congress to authorize them to borrow from the Treasury more money with which to meet the contracts.

In my opinion the Congress now has no control over the manner in which the contracts are executed and, in my opinion, has only indirect control over the borrowing. That will be thoroughly explored in the report on January 15 from the GAO.

We know that the General Accounting Office has gone on record against back-door financing procedures for years.

The PRESIDING OFFICER. The time yielded to the Senator from Colorado has expired.

Mr. CARROLL. Will my colleague yield to me an additional 5 minutes?

Mr. ALLOTT. I yield an additional 5 minutes to my colleague.

The PRESIDING OFFICER. The Senator from Colorado is recognized for an additional 5 minutes.

Mr. CARROLL. Mr. President, at this point I wish to call up my amendment, which I think is one of the key amendments. If it is not accepted, then, as I have said to the Senator from Arkansas, I will stay here all night, if necessary.

My amendment is at the desk. May I ask that the amendment be read? It is amendment No. 1.

The PRESIDING OFFICER. The amendment of the Senator from Colorado will be stated.

The LEGISLATIVE CLERK. It is proposed, on page 32, after line 2, to insert the following:

SEC. 3. The amendment made by this Act shall become effective on March 1, 1961.

Mr. CARROLL. Mr. President, my amendment merely delays the effective date of the legislation until March 1, 1961.

Mr. ALLOTT. Mr. President, will the Senator yield?

Mr. CARROLL. I am happy to yield.

Mr. ALLOTT. Mr. President, I have personally felt that the act should go into effect immediately. However, there is on page 17, starting with line 16, going over to lines 4 and 5, on page 18, a proviso that the "Secretary shall not make such contracts and agreements which shall require payments by the Government in any one fiscal year aggregating more than the amount which shall be established initially in an appropriation act and which may be increased from time to time in appropriation acts."

Therefore, since we find ourselves in this position at this particular point in the session, since it is very obvious that there is going to be no appropriation for this act at this session, and since it is just as obvious that there cannot be any appropriation until the first supplemental appropriation bill, I am personally willing to take it to conference and to assure my colleague that I will support it in conference.

Mr. ALLOTT. I thank the Senator from Colorado.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the committee amendment.

The amendment to the amendment was agreed to.

Mr. CARROLL. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. CARROLL. Is it correct that my amendment has been accepted?

The PRESIDING OFFICER. That is correct. The question is on the committee amendment in the nature of a substitute. If the substitute is agreed to, it becomes a part of the bill.

Mr. CARROLL. I thank the Chair.

In response to the remarks of the senior Senator from Colorado, as to whether or not I agree with his point about appropriations, unless my amendment establishing an effective date were in the bill, I think contracts which were approved and executed would be binding and $7 million could be drawn from the helium fund to fulfill them without special congressional approval. Now contracts can be drafted but a binding contract cannot be made effective until March 1, 1961.

I think this provision will meet the objection raised by the Senator from Arkansas and the Senator from Ohio. We will take a look at it next year.

I want to make the record very clear. Certainly a new President and certainly a new Secretary of the Interior will not be bound by this bill with my amendment in it. In other words, they do not have to negotiate a single contract. There is no compulsion on the Secretary of the Interior to negotiate a contract. On the other hand, if a contract is negotiated, it would become effective, under the law, on March 1, 1961.

I thank the senior Senator from Colorado for yielding me 5 minutes of his time. I think we have stated rather clearly the purpose of the bill. I want to commend the members of the committee, who have been so cooperative in this matter.

The Senate proposal restores, finally and clearly, the jurisdiction of the Federal Power Commission on all helium bearing gas; secondly, we tell the FPC to make cost allocations on helium.

I understand an amendment will be offered containing the words "on a volumetric basis," but I am not going to hold up passage of the bill because it does not happen to meet with my full approval.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. ALLOTT. Mr. President, earlier in the day I had sufficient time to discuss the bill upon its merits and to answer questions of various Senators about it. I do not wish either to encumber the RECORD or to take much further time on the bill.

However, I ask unanimous consent to have printed in the RECORD a letter on this general subject from Mr. Kuykendall, Chairman of the Federal Power Commission, dated June 17, 1960, addressed to Hon. CLINTON P. ANDERSON, which letter was a part of the hearings.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FEDERAL POWER COMMISSION,
Washington, D.C., June 17, 1960.

Re H.R. 10548, 86th Congress, to amend the Helium Act.

Hon. CLINTON P. ANDERSON,
U.S. Senate, Washington, D.C.

DEAR SENATOR ANDERSON: We have been advised that at the hearing before your subcommittee on June 15 on the helium bill, H.R. 10548, consideration was given to the language of section 9 which relates to the authority of the Federal Power Commission under the Natural Gas Act. We understand that the first clause of this section is to be amended so that the Natural Gas Act "shall not be applicable to the sale, extraction, processing, transportation, or storage of helium either prior to or subsequent to 'the' separation 'of such helium' from the natural gas with which it is commingled, whether or not the provisions of such act applies to such natural gas," and so forth. The new language which we understand is acceptable to your subcommittee is single quoted.

This amendment would make it clear that the Commission's jurisdiction over natural gas which contains helium is not to be set aside by the bill, but that the Commission would have no jurisdiction over helium while it is commingled with natural gas or after it has been extracted.

It is understood that there was agreement by the subcommittee that all joint costs of exploring for, producing, gathering, and transporting natural gas containing helium should be allocated so that helium will bear its fair share. In other words, helium is to bear some part of the cost of exploration, production, gathering, and transporting to the extraction plant, as well as all proper extraction costs and costs after extraction. This is the principle for which the Commission has been urging consideration by the Congress, and since your subcommittee is in agreement with this principle there would seem to be no difficulty.

The last clause of section 9, however, forbids the allocation to helium of any exploration, production, gathering, processing, compression, transportation, or other costs which were or would have been incurred in the absence of the extraction of the helium. Obviously, if the helium content is 1 percent in volume and the costs are divided on a volume basis, as under the present practice of the Commission, 1 percent of the exploration, production, gathering, compression, and transportation costs up to the helium extraction plant should be allocated to helium. Otherwise, the consumers of the residue (99 percent) would be carrying these helium costs.

In order to carry out the above purposes, it is recommended that the last clause of section 9 (starting in line 9 of the May 3, 1960, print) be amended to read: "and if a cost of service method is used in determining the rates of a natural gas company under sections 4 and 5 of the Natural Gas Act, as amended, there shall be excluded (1) all income received from the sale of helium, (2) all direct costs incurred in the extraction, processing, compression, transportation, or storage of helium, and (3) that portion of joint costs of exploration, production, gathering, extraction, processing, compression, transportation, or storage properly allocable to helium."

With this amendment, the bill would not cast any additional burden on consumers and it is recommended that it be adopted.

Sincerely,

JEROME K. KUYKENDALL,
Chairman.

Mr. ALLOTT. Mr. President, the situation in which we find ourselves, as the junior Senator from Colorado has previously suggested, is that we have been in conference all afternoon in an attempt to find a way in which we could stop the wastage of this very valuable asset. It is my understanding, as I am sure it is that of other Senators, that by amending this bill slightly, there will be no question—I do not think there is any question now; in my opinion there never has been—of the Federal Power Commission's losing any rights in this matter.

I call up for reading the amendments which I have at the desk.

ASSISTANCE IN DEVELOPMENT OF LATIN AMERICA AND RECONSTRUCTION OF CHILE

Mr. MANSFIELD. Mr. President, will the Senator yield so that the Senator from Arkansas [Mr. FULBRIGHT] may be recognized?

Mr. ALLOTT. I yield for that purpose.

Mr. FULBRIGHT. Mr. President, the House has passed H.R. 13021, which is substantially the same as the bill passed by the Senate. It provides for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes. The changes which the House has made are very minor. They strike out the $100 million, which was already carried in our appropriation bill.

I hope the Senate will agree to the House bill.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 13021) to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the bill was read twice by its title, considered, ordered to a third reading, read the third time, and passed.

Mr. FULBRIGHT. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ALLOTT. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT OF THE HELIUM ACT OF SEPTEMBER 1, 1937, AS AMENDED

The Senate resumed the consideration of the bill (H.R. 10548) to amend the Helium Act of September 1, 1937, as amended, for the defense, security, and the general welfare of the United States.

Mr. ALLOTT. Mr. President, I ask that my amendments be stated.

The PRESIDING OFFICER. The amendments of the Senator from Colorado to the committee amendment will be stated.

The LEGISLATIVE CLERK. It is proposed:

On page 29, line 13, to strike the words: "under contract with the United States".

On page 29, line 19, to strike the period and insert at the end of the sentence, the words: "on a volumetric basis".

Mr. ALLOTT. Mr. President, I think the two amendments make very clear what I discussed this morning and what has been further discussed. These are amendments which those in the House feel are necessary. I believe, or hope, the House will accept the bill without a conference if the two amendments are agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amend-

ments to the committee amendment offered by the Senator from Colorado.

The amendments to the committee amendment were agreed to.

Mr. PROXMIRE. Mr. President, will the Senator yield to me so that I may make a comment on the bill before it is passed?

Mr. ALLOTT. I am happy to yield to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I wish to pay tribute to the great fight made by the Senator from Colorado [Mr. CARROLL] on this bill. I know natural gas users, all over America, if they knew what the Senator from Colorado has done in winning this fight, would be deeply grateful to him.

I have listened to the remarks, and I have studied the committee report and the individual views of the Senator from Colorado. I know if it had not been for the fight made by the Senator from Colorado the bill would have removed the Commission's present jurisdiction over the transportation and sale of natural gas containing helium. Secondly the authority to make proper cost allocation in considering revenues from the sale of helium extracted from natural gas would have been forbidden by the bill.

I think the Senator from Colorado has made an absolutely convincing case showing that the cost of the bill, if it had been passed in original form, would have been very great for the natural gas users.

Mr. President, I ask unanimous consent that an article published in the national weekly newspaper Labor, about the gallant fight made by the junior Senator from Colorado [Mr. CARROLL], be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CARROLL HALTS PLOT BY NATURAL GAS CROWD TO KILL REGULATION AND SOCK CONSUMERS

One of the untold stories of the recent session of Congress concerns how one Senator appears to have stopped a major segment of the powerful natural gas industry from skipping out from under Federal regulation of its prices.

The Senator whose alertness upset this "sneak play" by the gas interests is JOHN CARROLL, a progressive Democrat from Colorado. Actually, the story is not over yet. Congress still has to complete action, at its August session, on the bill involved.

But CARROLL's sounding of the alarm seems to have knocked out the worst of the "sneak play," thereby probably saving consumers of natural gas many millions of dollars a year. Here's what happened:

Back in 1958, the Interior Department asked Congress to pass a bill to conserve America's supply of helium. Helium is a rare gas that's increasingly needed in defense projects. It is found combined with natural gas in the big gas fields of the Texas Panhandle, Oklahoma, Kansas, and Colorado. These fields supply gas to millions of consumers in the Midwest and West.

TRICKY SECTION IN BILL

At present, most of the helium from these fields is not separated from the natural gas and is just wasted. The Interior Department proposed to have the gas companies separate out this helium and then to have the Government store it underground for the Nation's future needs. This idea has won general approval. However, Congress did not act in 1958.

In mid-1959, after consulting with the gas industry, the Interior Department sent to Congress a modified bill. This bill contained a trickily worded new section, concerning exemptions from price regulation under the Natural Gas Act. The new section affected all gas containing helium.

At present the Federal Power Commission has authority to regulate natural gas prices to protect the consumer, but it has not seemed very active in using that authority. In the present case, however, the FPC did spot the danger in the "sneak play" section of the new helium bill.

The FPC last winter wrote the House Interior Committee, which was considering the helium bill. The sneak play section, said the FPC, might "remove the Commission's present jurisdiction over the transportation and sale of natural gas containing helium." It would in any event, the FPC said, penalize consumers of this gas by forbidding proper "cost allocation" to the helium in the gas.

Altogether, the FPC report warned, the sneak play section would "materially impair the effectiveness of this Commission's regulatory responsibilities with respect to natural gas matters."

The House committee, however, brushed aside these protests, relying on denials from the Interior Department. The bill containing the dubious section was reported out and passed by the House in early May on a voice vote, without this issue even being raised.

HALTS STEAMROLLER

The bill then went to the Senate and to its Interior Committee. That is when Senator CARROLL, who's a member of that committee, entered the picture. The Senate committee first held only a quickie 1-day hearing on the bill. But CARROLL put a stop to the "greased skids." As he recalls it:

"I insisted that the FPC witnesses be brought before the committee. They gave unequivocal and unqualified testimony that if we left in the language of the House bill, we would exempt from regulation under the Natural Gas Act all the gas which contained helium.

"This is an issue of immense importance to the consumers of the Nation," Carroll noted. Recalling the gas industry's many previous attempts to get out from regulation, he said: "This has been one of the great national political issues in recent years."

Working with Willard Gatchell, general counsel of the FPC, Carroll then persuaded the other members of the Senate committee to rewrite the section. This rewriting, according to CARROLL, removed the worst dangers to consumers in the bill.

At present the modified bill still has to pass the Senate and then be adjusted in conference with the House bill, which contains the original sneak play section. However, thanks to CARROLL's fight, it's expected the Senate version will prevail. Thus, due to the alertness of one progressive Senator, a major dodge by the gas industry has apparently been stopped.

Mr. PROXMIRE. I thank the Senator from Colorado [Mr. ALLOTT] for his courtesy.

Mr. ALLOTT. Mr. President, I think, with the addition of the amendments offered by the senior Senator from Colorado to section 11, there is no question whatsoever about jurisdiction.

Mr. President, I yield back my remaining time.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute for the bill, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 10548) was read the third time, and passed.

The title was amended, so as to read: "An act to amend the Helium Act of March 3, 1925, as amended, for the defense, security, and the general welfare of the United States."

Mr. ALLOTT. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD of Virginia. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

AVAILABILITY OF EXCESS PROPERTY TO STATE AND COUNTY AGRICULTURAL EXTENSION SERVICES

Mr. STENNIS. Mr. President, it is most encouraging that the Budget Bureau has given approval to a proposal making excess property available to State and county agricultural extension services. I am especially glad that Senator ELLENDER, chairman of our Senate Agriculture Committee, has introduced, by request, S. 3671, to carry out the program recommended by the Budget Bureau. This bill would place extension service on an equal status with other Government agencies receiving excess property. It would authorize the State extension services to utilize the facilities and services available to Federal agencies for the purpose of acquiring personal property, supplies and services, including the making of purchases from Federal supply service stores and Federal supply schedules required to carry out the extension program.

Last year a special subcommittee of the Government Operations Committee held extensive hearings on my bill, S. 1018, designed to make surplus property available to State extension services. As a result of these hearings and conferences with the administration, the Department of Health, Education, and Welfare and General Services in an administrative ruling determined that State and county extension services are by law components of State agricultural colleges, and as such are eligible to receive donations for Federal surplus personal property. The committee report on S. 1018 had the following to say:

The committee has noted the suggestion which has been made that excess Federal property could be made available to these agricultural extension agencies, were the act of May 8, 1914, further amended in such a way as to establish such agencies as an integral part of the Department of Agriculture for administrative purposes, but took the view that this should be done by the

appropriate jurisdictional committees. The committee believes that this suggestion would not only make possible the transfer of excess property from other Federal agencies to the Department of Agriculture for use by such State and county extension service agencies but would, in addition, further clarify their status with respect to their eligibility in Federal procurement and general supply support.

S. 3671 would carry out the recommendations made by the Senate Government Operations Committee.

Mr. President, the Cooperative Extension Service has an active program in over 3,000 counties. The State extension service directors have the responsibility for carrying out the educational program for the Department of Agriculture and are subject to various laws applicable to Federal employees. They are an important part of the land grant college system and as such should have the full use of Federal supply stores and GSA stores.

If this bill is adopted, procedures would be established whereby requisitions could be handled by the State extension office at a central point and the supply needs of county extension offices would be included in the requisitions issued by the State office. This procedure is now being followed in the present authority for State extension services in purchasing GSA stores supplies. S. 3671 will expand this authority to include more complete use of GSA facilities including the right to purchase under Federal supply schedules. These schedules are, in effect, contracts entered into by the Federal Government with private industry under which items are purchased by Government agencies direct from private industry. Items obtainable under Federal supply schedules would include photographic equipment—projectors, cameras, screens, and so forth—reproduction and mailing equipment, office machines—adding machines, calculators, and various types of office equipment—and equipment not stocked by regional GSA stores depots.

Mr. President, this bill would provide a means whereby the State extension services could meet a part of their needs in an orderly and sound way. It would provide a system whereby benefits of excess property would be passed on to this important agricultural agency and would set up other procedures which would result in a great saving to the State extension service and the Federal Government.

I hope that this is one of the first bills which the Senate Agriculture Committee will consider and approve during the next session of Congress.

THE SONG OF THE BANDER-LOG

Mr. KEATING. Mr. President, we are told that we are at the tail end of this "bobtail" session of the 86th Congress. The "Jack-in-the-box" is ready to spring. We have only a few days, perhaps only hours, left before we pick up our marbles and go home.

What has the Senate of the United States accomplished?

We are still shooting at the majority leader's five major legislative targets, and we have not had a bull's-eye yet.

When this special session was called to order, there were many optimistic predictions of the great work which we were to do on these five issues; namely, minimum wage legislation, health insurance for the aged, Federal aid for education, housing, and common situs picketing. In one form or another, all of these issues were on the lists of the legislative "musts" named by the majority leader and his leader, the junior Senator from Massachusetts [Mr. KENNEDY].

The American people were expecting to be led across the "new frontier." What has happened? We have hardly gotten out of the garage.

The failure of the Congress to get more work done is going to take a great deal of explaining.

We heard a lot of efforts at that this afternoon by the distinguished junior Senator from Massachusetts and by other Senators who were seeking to explain away the lack of accomplishments at this session. The Democrats in the Congress have two-thirds of the votes. In addition, there are a number of Republicans who favor and support the five legislative "must" items laid down by the majority leadership.

Mr. President, I opposed the calling of this special session in July when we voted to do so. At that time I made my position very clear. I said, among other things:

> The Congress is now in recess until August. It will return to Washington to continue its work after the presidential nominating conventions and prior to the election.
>
> Actually, its work could have been completed before the Los Angeles convention and should have been completed. Any activity by the Congress in August will be far more political than productive.
>
> From the first day of this session, everyone knew that the Democratic National Convention was to open on July 11. Only inept leadership or determined political strategy could have brought about a post-convention session of Congress. The first is inexcusable and the latter indefensible.
>
> Proper planning and scheduling of legislation in each House could have brought all essential bills to the floor for final action before July 9. Determination to have and to use a post-convention session of the Congress as a political sounding board for partisan political advantage is inconsistent with the constitutional responsibilities of the Congress.
>
> It is evident that any congressional action in August will be influenced more by its specific potentialities for November 8 than by its general benefits for the Nation in the years ahead.
>
> Better planning—and more work—would have eliminated the need for an August session. For example, Democrats in the Senate spent 2 solid months in a filibuster against civil rights legislation designed to protect the voting rights of all those qualified to vote under State law.
>
> In the House of Representatives, there were many weeks when the Democratic leadership scheduled for consideration no significant legislation. Now Congress is to return next month, after the national conventions in a presidential election year, supposedly to make serious and sound evaluations on a number of highly controversial and politically explosive issues.
>
> It can't be done. Intelligent and constructive legislative results will not materialize in a politically explosive atmosphere.
>
> An atmosphere of frenzied partisanship, which is bound to exist after the two political parties have had their conventions, is no atmosphere in which to pass on legislation of far-reaching importance.
>
> In 1948, when I was a Representative, Congress returned to Washington after the national conventions and before the election. There was virtually nothing accomplished. It was a purely political spectacle. There was politics in practically every speech and every vote. Moreover, many Members were absent campaigning.
>
> In spite of the important legislation that remains to be enacted, I am not at all optimistic about the atmosphere that will exist when this Congress reconvenes next month.

It was on the basis of that, Mr. President, that I voted against the motion to adjourn the session until this month. I felt there was a very great danger that Congress would be tempted to play politics with destiny. The work which at that time remained to be done in July could have been done in the regular session if we had not marked time for months earlier in the year. It should have been done before we recessed for the political conventions. Nevertheless, given the fact that some of the people's business remained undone, we should have waited until after the election to attend to it.

Perhaps it was poetic justice that this special session—charged with the spirit of a national campaign—should fail. The whole idea of a special session was a mistake from first to last. It was politically designed to gain partisan advantage. The attempt has failed.

The majority leadership returned to the Halls of the Congress of the United States with hammer in hand to construct their Los Angeles platform in these already crowded Chambers—nail by nail and plank by plank. It is not surprising that they failed.

Let us examine the record:

The minimum wage bill is dead. It passed the Senate, where I voted for it, as did many of my Republican colleagues.

A more limited minimum wage bill also passed the House. The House conferees were stubbornly adamant in their determination to hold to the House bill.

We heard a great deal this afternoon from the distinguished junior Senator from Massachusetts about the minimum wage conference and about the action of the House conferees. I call attention to the fact that, of the five Democratic House conferees, three of the five consistently voted against the Senator's position throughout this conference. The Senate conferees were stubborn, too. Rather than accept some measure of progress, they chose to go to the people. The people will be a little poorer for it, but that does not seem to matter.

What about health insurance for the aged? The Anderson amendment to establish a program along the lines of the Forand bill failed in the Senate. It failed by a 2-to-1 vote in the House Ways and Means Committee, and it never even got to the House Rules Committee.

The real reason the Anderson amendment failed, we are told, is because Republicans would not vote for it. The Senate is divided 2 to 1 in favor of the Democrats, and yet on important must

legislation, it is claimed that Republican votes are needed to convert two-thirds into one-half. That is not even good first-grade arithmetic.

Federal aid-for-education legislation and housing legislation, are still in the House Rules Committee. They should not be, but they are. As far as I can see, little really intensive energy on the part of the majority has been devoted to "blasting" these bills out of Rules Committee and bringing them up for action. All the activity I have witnessed in this important regard has been criticism of the committee and its members.

On common situs picketing, the Senate Labor and Public Welfare Committee has yet to report a bill to the Senate. The Senate has not acted and obviously will not act on this issue. We have not even sent a bill to the House, and yet from reading the news, one would think it was the House Rules Committee again which had prevented the Senate from acting.

There are a number of other issues not on the must list which nevertheless are of great importance.

What about the farm bill which has been passed by the Senate, or better yet, the one promised by the Democratic candidate? What about the several bills which would give to the Secretary of State some measure of authority with regard to passports? War-claims legislation is ready for action. We desperately need more judges, and a judgeship bill is presently on the Senate calendar. Immigration legislation is urgently needed. A depressed-area bill, which I think should be agreeable to many of us, has been introduced and is in committee.

All of these matters are of vital importance. All have been the subject of committee hearings and are ready for further action. This is a part of the Congress' unfinished business. It is the people's unfinished business. It should be attended to before we abandon our posts in Washington and head for the "hustings."

I do not for a moment deny that the Congress has done some things. The majority defeated an effort to enact a very modest civil rights measure. The Congress drastically cut the President's request for mutual security funds. We passed a resolution to tell the President how to appoint Justices to the Supreme Court. We passed some routine appropriations bills and some social security amendments.

It would seem a far cry from Kipling to the Congress—from poetry to politics—but in the first Jungle Book there is the famous Road-Song of the Bander-Log, and some of the lines I find most germane to the spirit of the present session.

As a prefatory remark, let me say that those who are familiar with the Jungle Book know that the Bander-Log was the name given to certain jungle creatures equipped with prehensile tails and accustomed to foregather in branches—not legislative branches, I hasten to add.

The Kipling lines I want to recite must not be taken as a direct parallel. Such a parallel might lose me some good friends in this body. But, as Senators hear the lines, I am certain that their poetic justice will wash away any trace of malice that might otherwise be read into them.

And so I quote from Kipling's Road Song of the Bander-Log:

Here we sit in a branchy row,
Thinking of beautiful things we know.
Dreaming of deeds that we mean to do,
All complete, in a minute or two—
Something noble and wise and good,
Done by merely wishing we could.

I cannot conclude, however, without citing one positive and affirmative accomplishment of this session. It has given Members the chance to get better acquainted—not with the great issues of our day—but with each other.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. KEATING. I yield to the Senator from Pennsylvania.

Mr. SCOTT. I was interested in the obsequies by which the distinguished Senator from New York commemorates the demise of a session which should never have been born. As it was said as an epitaph on the tombstone of a very young child:

If I were to be so soon done for,
What on earth was I begun for?

I should like to ask the distinguished Senator from New York if he is aware of an article published in the Washington Star of August 31 which quotes a dispatch from Ocean City, Md., of August 30, and which in turn quotes a very distinguished Member of the majority party, the Speaker of the House, whom we all love, as saying—

The President knows little about the legislative process. Otherwise, he would not have called the special session of Congress.

I am confused. I did not know that President Eisenhower had called this August session of Congress. Since the Senator from New York has an encyclopedic memory and a knowledge which is always ready, would the Senator from New York inform me whether or not President Eisenhower called this special session of Congress?

Mr. KEATING. No; the President did not call this session. The Senator will remember that back in 1948, when he and I were Members of the House of Representatives, President Truman called a special session of Congress. It was generally conceded that he made a good deal of political hay out of it. I have assumed—I believe correctly—that the purpose of calling this session was the same as in 1948. I do not believe that the same results will eventuate. Of course, only time will tell.

Mr. SCOTT. The Senator has quoted from Rudyard Kipling. In the few minutes in which the Senator was engaged in doing so, I was reminded of one of the lesser known works of Rudyard Kipling, The Imperial Rescript, which he wrote in 1890. If the Senator will indulge me, I should like to ask him if he would indicate whether he believes that the parody I have written epitomizes the August session of Congress. With apologies to Rudyard Kipling's Imperial Rescript, my "unfinished parody" goes like this:

This is the tale of the session
The Texas two decreed
To ease the folks of their taxes,
To gain them votes in their need.
The lords of their party assembled;
East and the West they came—
LYNDON and SCOOP and HUBERT,
JACK and Mister SAM.

Some were faithful to farmers,
Some were devoted to toil,
Yes, some were loyal to labor,
And some were loyal to oil.

I must confess that I wrote this rather hurriedly, in the last 3 minutes. However, does the Senator believe that it describes the August session of Congress?

Mr. KEATING. I must say that your verse is very descriptive. If Kipling were alive today he would have real competition in my friend from Pennsylvania.

Mr. SCOTT. I do not wish to compete with Mr. Kipling. Those of us who have spent most of the month of August here have been doing nothing more than kippling and piddling anyway.

I think the session has been unfortunately long because of the tragic failure of leadership. We came here hoping that the majority leader's leader would guide us into paths of enlightenment, that we would see great gains accomplished for the people of the country, that we would see at least a part of the promises made so gaily at Los Angeles realized at least to a minor degree of fulfillment, that we would see some respect for the requests of the President of the United States, who for 5 years or more has requested Congress to act in matters of the public interest, and then asked us to act on approximately 22 measures. I had hoped that we would act on more than one. Therefore, the batting average of the majority is .045, which is not even a good bush league showing.

I commiserate with the Senator from New York because he and I and others have absented ourselves from our families and loved ones and from our opportunity, perhaps, to be of some service to our constituents, in order to sit here during a fruitless, useless, bootless, footless session of Congress, for no better purpose than to enable the majority to seek vainly to achieve some political advantage from a session which unfortunately, as I said, should never have been called. The Senator from New York and I voted against holding the session, of course. I believe that time—and perhaps Newsweek—will prove us right.

I commend the Senator from New York for raising the question. We had hoped that the majority leader's leader, the junior Senator from Massachusetts, who was absent on official business in Hyannis Port last Saturday, while we were debating the medical care for the aged bill, would give us some leadership and some enlightenment and some guidance. We had hoped that as we gathered here, he would lead and unite his party. Having failed in August to lead and unite his party, one wonders whether, in view of the fact that he will have no more to lead in the Senate and in the other body than he has now, and perhaps, by the will of the people, considerably less, he will be able to do any better in January toward leading and uniting his party than he has been able to do in August. I wonder if the Senator from New York agrees with me.

Mr. KEATING. I hope that the distinguished Senator from Massachusetts will still be joining forces with the distinguished majority leader in the next Congress in trying to enact legislation, and that they will consider properly and with due deliberation the recommendations made to them by the incoming President in his State of the Union Message and other messages, and that they will give due deliberation to them. I am sure that if the next President, President NIXON, should recommend legislation along the lines of the five programs that have been mentioned, and others, the distinguished majority leader and the distinguished Senator from Massachusetts [Mr. KENNEDY] will give every consideration to that legislation.

I hope that they will agree with the new President's views on these important subjects. The distinguished Senator from Pennsylvania and I will stand shoulder to shoulder with them, when we feel they are right. Oftentimes they are right, and I have often found myself in complete agreement with the distinguished majority leader and with the Senator from Massachusetts.

I do not wish to yield the floor without saying that I bear for both of them a very real affection. I hope to serve in this body with them for many years to come.

Mr. SCOTT. I agree with the Senator from New York that both of us look forward with pleasure to serving in this distinguished body for a long time to come with the majority leader and the distinguished junior Senator from Massachusetts; for whom we have great respect.

However, does not the Senator from New York agree with me that it is indeed deplorable that 1,400,000 citizens will be deprived of coverage under the minimum wage bill and millions more deprived of an increase in minimum wage payments because of what some of us may be so bold as to designate partisan or petulant reactions which caused the collapse of the conference on the minimum wage bill, and caused us to substitute a demagogic issue in a political campaign rather than sincere and effective legislative action? Would it not have been better to have a bill to benefit many plain, average people, than to have an issue for two political candidates?

Mr. KEATING. I quite agree with the views expressed by the distinguished Senator from Pennsylvania. As the Senator from Vermont [Mr. PROUTY] has pointed out, more than 3 million would be covered—not one and a half million, but 3 million—if there had been a disposition to take the first amendment which he offered in the conference.

I think that if the conferees went back tonight, they could still meet and could still reach an agreement. I think the distinguished junior Senator from Massachusetts could exert his leadership upon the House Members, on the Democratic side. There are five of them, three of them constantly voting against him, and two of them with him. If he were to exert his leadership upon them to bring about an agreement, and if the views of the distinguished Senator from Vermont [Mr. PROUTY] were accepted, it might well be possible to have constructive legislation now rather than just a political issue. We would have legislation which would benefit over 3 million Americans.

Mr. SCOTT. Does the distinguished Senator from New York know why the distinguished junior Senator from Massachusetts has been unable, so far, to exert his leadership over the Members of his own party in the other body? To me, this is a puzzlement, a matter which I cannot understand. I followed with great interest the proceedings at Los Angeles and was under the impression that the junior Senator from Massachusetts, whom we all respect, was greeted as the leader of a united party; that the Members of his party in both Chambers of Congress would hasten to follow his merest nod, indeed, his slightest beckoning, his mildest wish. But all of a sudden we find that the entire picture in the other body is a repudiation, of the leadership of the junior Senator from Massachusetts, to say nothing of this body—of which, perhaps, the less said the better—with regard to the leadership of the Senator from Massachusetts.

Mr. KEATING. It is inexplicable to me why the distinguished junior Senator from Massachusetts, as the leader of his party, has not been able, at least, to convince his own party in the House of Representatives that they should produce action on at least one of the five major matters which we were called back into session to consider. I have no answer for it. The distinguished junior Senator from Massachuestts will have to answer that question himself. I am not able to answer for him.

Mr. SCOTT. I thank the Senator from New York. As the Senator knows, I come from Philadelphia, where I am a strong supporter of the Phillies baseball team, which is now at the bottom of the National League. However, although the batting average of the Phillies is unfortunately low, as the Senator from New York knows, it is considerably in excess of the batting average of the junior Senator from Massachusetts. [Laughter.]

Mr. KEATING. It is not only in excess of his batting average, but also in excess of the batting average of Congress in this special session.

Mr. SCOTT. Indeed, it is; and it makes me feel better about the future of the Phillies.

Mr. KEATING. I am sure it should.

Mr. SCOTT. Meanwhile, I rejoice in the prowess of the Pittsburgh Pirates, "than whom there is no whicher." [Laughter.]

Mr. KEATING. I agree with the Senator from Pennsylvania.

NEW NATIONS

Mr. STENNIS. Mr. President, a matter of great concern to us in America, and throughout the world, is the large number of new nations gaining independence and admission to the United Nations.

Of course, the mere number is of least importance in considering the whole problem.

The crux of this problem lies in the low degree of readiness, in some instances, of these various territories and colonies to attain and develop stable governments and stable economies, and to assure some degree of protection to the millions of people they undertake to represent.

This subject has long been a matter of concern to me. In April of this year, I asked the Library of Congress to compile a list of these nations, and to furnish me with selected data, of a statistical nature, reflecting the degree of progress made in these new nations. The tables they prepared are revealing, yet objective. I ask unanimous consent that they be printed at this point in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

NATIONS GAINING INDEPENDENCE SINCE 1941 [1]

	Lebanon	Syria	Jordan	Israel	India	Ceylon
Population	1,525,000	3,722,000	1,329,174	1,789,075	357,440,025	8,098,637.
Percent of annual growth	3.0 percent [2]	3.6 percent [2]	2.9 percent [2]	4.1 percent [2]	1.3 percent [2]	2.5 percent. [2]
Arable acres of land	691.9	8,737.5	1,186.1	981.0	324,528.8	3,498.9.
Arable land per capita (acres)	0.6	2.7	0.9	0.8	0.9	0.5.
Literacy rate				94 percent	20 percent	58 percent.
Life expectancy:						
Male				66.3	32.4	
Female				69.5	31.7	
Inhabitants per physician	1,200	5,000	6,100	450	6,000	6,000.
Road miles per 1,000 square miles:						
Improved	523.8	79.0	69.4	191.5	153.4	257.6.
Unimproved	172.8	7.1		46.0	58.4	434.2.
Electric power per capita (kilowatt-hour per year)				149 [3]	10 [3]	5. [3]
Chief source of national revenue	Fruits, tobacco, cotton.	Cotton, grains, soap.	Phosphate, wool, olive oil.	Citrus fruits, minerals, wheat, autos.	Grains, spices, textiles, minerals.	Tea, rubber, agriculture.
GNP per capita	358 [4]	142 [4]	111 [4]	982 [4]	76 [4]	130. [4]
Armed forces					357,000 [5]	
U.N. admission date	Charter member	Charter member	1955	1949	Charter member	1955.

See footnotes at end of table.

NATIONS GAINING INDEPENDENCE SINCE 1941 [1]—Continued

	Burma	Indonesia	Libya	Sudan	Morocco	Tunisia	Ghana
Population	19,677,000	84,982,000	1,091,830	10,231,507	9,823,000	3,782,480	4,118,450.
Percent of annual growth	1.0 percent [2]	1.7 percent [2]	1.3 percent [2]		1.8 percent [2]	1.3 percent [2]	1.6 percent.[2]
Arable acres of land	21,112.2	27,181.0		5,888.4	19,609.9	9,587.5	13,121.0.
Arable land per capita (acres)	1.1	0.4		0.7	2.3	2.8	3.1.
Literacy rate	40 percent	8 percent			50 percent		
Inhabitants per physician		65,000		50,000	8,800	6,700	29,000.
Road miles per 1,000 square miles:							
Improved	47.6	75.9	3.0	0.3	89.0	97.1	59.5.
Unimproved	49.8			47.0	205.3	51.6	39.2.
Electric power per capita (kilowatt-hours per year).		4 [3]	25 [3]	3 [3]	38 [3]	30 [3]	21.[3]
Chief source of national revenue.	Teakwood agriculture.	Oil, tin, rubber, rice.	Leather articles, carpets.	Cotton, gum arabic, hides.	Eggs and poultry, hides, wool.	Wheat, agriculture, minerals.	Cacao, rubber, manganese, gold.
GNP per capita	53 [4]	59 [4]	107 [4]	70 [4]	169 [4]	190 [4]	210.[4]
Armed forces		120,000 [5]					
Un admission date	1948	1950	1955	1956	1956	1956	1957.

	Guinea	Laos	Cambodia	South Vietnam	Malaya	Mauritania, 1961
Population	2,256,900	1,260,000	5,073,000	11,000,000	6,276,915	546,400.
Percent of annual growth	2.8 percent [2]	3.5 percent [2]			2.4 percent [2]	3.9 percent.[2]
Arable acres of land		2,520.4	6,177.5		5,191.6	
Arable land per capita (acres)		2.1	1.7		1.0	
Literacy rate					38 percent	
Inhabitants per physician					10,000	
Road miles per 1,000 square miles:						
Improved					99.9	
Unimproved					13.7	
Electric power per capita (kilowatt-hours per year)		1 [3]			36 [3]	
Chief source of national revenue	Bauxite, bananas, coffee.	Rice, tobacco, cotton.	Rubber, fish, minerals.	Rubber, coffee	Tin, rubber, copra.	Cattle, gum, salt.
GNP per capita	115 [4]	50 [4]	94 [4]	152 [6]	250 [4]	150 [4].
Armed forces				150,000 [5]		
U.N. admission date	1958	1955	1955		1957	

NATIONS [7] SCHEDULED TO RECEIVE INDEPENDENCE IN 1960

	Nigeria, Oct. 1, 1960	Somalia	Cameroun, Jan. 1, 1960	Togoland, Apr. 27, 1960	Western Samoa	Belgian Congo, June 30, 1960 [8]	Cyprus, 1960
Population	29,730,879	1,280,000	3,077,080	1,000,000	97,327	12,956,950	450,114.
Percent of annual growth	1.9 percent [2]	0.8 percent [2]	0.8 percent [2]	1.0 percent [2]	2.6 percent [2]	1.9 percent [2]	1.5 percent.[2]
Arable acres of land		19,711.2	17,297.0	2,391.9	81.5	121,079.0	1,072.4.
Arable land per capita (acres)		15.8	5.8	2.4	1.0	10.8	2.2.
Literacy rate						37 percent	56 percent.
Life expectancy:							
Male							63.6.
Female							68.8.
Inhabitants per physician	51,000	25,000	25,000	35,000	2,500	22,000	1,300.
Road miles per 1,000 square miles:							
Improved	82.0	41.8	24.6	35.1		69.9	746.6.
Unimproved			14.9	58.5	79.4		
Electric power per capita (kilowatt-hours per year).	4 [3]	5 [3]	23 [3]	1 [3]	21 [3]	54 [3]	139.[3]
Chief source of national revenue.	Tin, cocoa, vegetable oils.	Bananas, hides	Cocoa, coffee	Coffee, cocoa, palm oil.	Copra, cocoa	Copper, cotton	Copper, agriculture.
GNP per capita	81 [4]	39 [4]	150 [4]	150 [4]		85 [4]	415.[4]

[5] Washington Star, Sept. 27, 1959: C3.

[6] Only figures for entire Vietnam available.

[7] Every other nation has fewer than 100,000 men in its combined forces—which makes them little more than domestic police forces for local emergencies and natural disasters.

[8] Figures for Belgium and Luxembourg based on combined figures for both countries.

Mr. STENNIS. Mr. President, I do not, of course, insert these tables in the RECORD to embarrass anyone, or to disparage the progress these territories and countries have made so far. I think, however, that they demonstrate the need for a careful look at the realities of life. These are vital statistics. Many are missing, for they are not available.

We should not rush in to grant them full U.N membership nor to otherwise accept them in the family of nations. Surely history will record the folly of precipitate independence and premature recognition of these former colonies as nations.

I think that the United Nations should, as a practical matter, require proof of years of experience in each of these nations under a stable government. I believe this should be a prerequisite for full membership in the United Nations.

Independence is a hard-won right. It is a priceless privilege. But mere independence does not entitle a people or a government to other hard-won privileges. They must be worked for, too. An economy must be developed and stabilized. An educational system must be created and developed. A representative government, the crowning achievement of human endeavor, must be built on these foundations. Such developments do not happen overnight. They are the result of years of unselfish and dedicated effort, of struggle and of sacrifice, of self-discipline and self-denial. Certainly we in the United States, ourselves the product of a war for independence, are sympathetic and stand ready to offer moral support and encouragement to these new nations' effort to improve their lot. But we cannot do the job for them.

We cannot, as a practical matter, undertake to support them for an indefinite period, financially. They have a long period, extending at least for decades and perhaps for a century or more, to experience the responsibility of independence, and to grow and take their place on economic and other bases among the leaders of the world. It seems foolish to prematurely admit these nations, in large numbers, and permit them to assume membership in the U.N. along with the United States, and along with other countries whose civilizations have shaped world culture and have proved their worth by their endurance for centuries.

Further, we are, by permitting the admission of a large number of former colonies, greatly weakening and diluting the vote of the United States and other major powers in the United Nations.

An excellent article on this subject was published in the New York Times of August 28, 1960. I ask unanimous consent that it be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit I.)

Mr. STENNIS. Mr. President, France alone, has subdivided its African holdings into a large number of smaller nations, and eight of them have been approved for admission in the United Nations this week by the Security Council. These eight countries will be in a position of voting strength to outweigh the United States, Great Britain, Italy, Norway, and Sweden, with two votes to spare. Yet none of them have had any appreciable experience in self-government, no experience in the discipline of independence. They have no industrial complex to guarantee their position in the competition in the peaceful pursuits of commerce and trade.

Mr. President, it seems to me to be nothing less than tragic that membership in the United Nations is being diluted to the extent that it is bound to cause its deterioration rather than its growth as a strong power and influence in world affairs. The U.N. had a membership of 51 in 1945, a membership of 76 in 1955, and will have 97 members at the end of 1960.

At the same time, while the United Nations is trying to absorb these new nations, to digest this upswing in its membership, to adjust and accommodate them, it itself is going dangerously close to internal intervention in the Congo. Of course, I realize that the United Nations, in the case of Korea, sent troops in to fight. I think, in the Congo, that United Nations activities should be limited to evacuation of refugees and other strictly emergency activities.

Further, I think the State Department and our foreign policy planners have been remiss in not coming up with workable plans to meet these emergencies, or to head them off, wherever possible. We have, for too long, been relying on the stagnant policy of rushing in with money and other aid when emergencies strike. I think at least half of the art of diplomacy is anticipation of crises—preparation for emergencies and preventive action. For too long we have been caught by surprise by a series of emergencies which should have been predictable. The emergence of all these new nations, with their varying degrees of industrial, economic, social, governmental, and cultural development, is sure to precipitate crises. There should be a strong and positive part of our foreign policy directed toward foreseeable crises. They will surely come. In some instances the peace-loving nations of the world now have the initiative, but that will surely be lost if we do not root out the cause of discontent and strife and use every peaceful means to prevent violence and bloodshed. In too many instances lately, the State Department has stood helplessly by, ineffectually guarding the rights and property of our people. I think a firmed-up, more assertive foreign policy is critically needed, and that steps in that direction should not await the outcome of the elections in November.

In summary, I think we in the United States are making foolhardy mistakes in our attitude toward the United Nations and in our own foreign policy. Instead of providing leadership, we have reduced ourselves to such a spineless, passive role that America can be slandered with impunity, outmaneuvered in the Organization of American States, American property can be confiscated, and American servicemen can be brutally attacked without the opportunity to defend their very lives. There will be, there can be, no adequate redress for this unprovoked attack. There will be no true respect for the United States until we reestablish, by a firm and positive foreign policy, our rightful place in the affairs of the world.

Our soldiers, too, Mr. President, as the Senate knows, are stationed in more than 39 nations around the globe, and our men in uniform are in even a larger number of nations. But some of them are being beaten over the head with rifles and bludgeoned. However, so far as I am able to ascertain, no plans are being made for their protection or to hold someone accountable for such conduct. Such things have happened, not only recently, but many times over the past few years. I think that fact alone is evidence of a weakness on our part and of a retrogression and of a degeneration of our position and our prestige in world affairs. But certainly we should let others know that we are going to protect our own men in uniform just as we would protect against an invasion of our own territory.

But in addition to the drift I have outlined, it is also seriously proposed that the Connally amendment be repealed at a time when the United Nations, instead of growing strong and becoming more powerful, under the present system is being diluted and hence is growing weaker.

So even though I favor the idea of a strong world court, someday, I think it is highly impractical to make the change now; and I use that as an illustration of the trend of the time. I wish the country would be told something more about plans to deal with and to meet the conditions I have briefly outlined with reference to new territories becoming nations, instead of merely raising a hope that things will get better in the future; instead we go even farther toward taking away some of the safeguards we now have.

Mr. President, I ask unanimous consent that the exhibit to which I have previously referred be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EXHIBIT I

[From the New York Times, Aug. 28, 1960]

NEW AFRICAN STATES SHIFT U.N. SCALES—NEWLY INDEPENDENT STATES WILL ALTER THE POWER BLOCS THAT HAVE EXISTED IN THE WORLD AGENCY

(By Lindesay Parrott)

African states are playing a bigger part than ever before in the United Nations. The story of the U.N. and the Congo has made clearer than ever the emergence of a new group of states that must be considered and that other nations might do well to court.

For instance, Secretary General Hammarskjold's newly created Advisory Committee on the Congo has an African majority. African states having contributed a majority of troops in the United Nations force in the Congo.

The Advisory Committee was not precisely what some of the more nationalistic African states—"Africa for the Africans"—had wanted. Nor was it what the Soviet Union wanted. Nevertheless, it was strongly African, and the Secretary General for the first time was dealing with representatives, en bloc, of the new nations he more than any other single man has helped to create from former colonies, protectorates, and United Nations trusteeship territories.

SOVIET PROPOSAL

In the long Security Council debate last Sunday night and Monday morning, the Soviet delegate had proposad an Asian and African group that would meet in Leopoldville—not at United Nations headquarters—and report "daily" to the Council.

That proposal was withdrawn when it seemed to have no outside support and Mr. Hammarskjold won the right to name his own committee and have it talk with him in New York.

Nine of the fifteen participating nations are African—Ethiopia, Ghana, Guinea, Liberia, the Mali Federation, Morocco, the Sudan, Tunisia, and the United Arab Republic.

Meanwhile, the most recent figures on the composition of the United Nations forces in the Congo showed how much the crisis there had become "an African show." Of 14,491 troops actually in the Congo August 20, a total of 12,545 were from African states.

They are, of course, under the general direction of Mr. Hammarskjold, operating in turn under decisions of the Security Council, where Africa is much more slightly represented—the contingent currently has one member, Mongi Slim of Tunisia. The United Nations troops have a Swedish commander, Maj. Gen. Carl Carlson von Horn, and there are Irish, Swedish and Asian soldiers alongside the Africans.

The Africans, however, hold the military as well as the advisory balance, something that could not have been predicted in the United Nations a few years ago. The emergence is sharply underlined.

The situation marks a progressive development in the United Nations as the old empires have broken down since the organization began just after World War II.

In the early days, when the United Nations consisted of 51 members, with 20 Latin American states as the biggest bloc, the Western countries often could sweep the field. That is the explanation of some early Communist walkouts.

PACKAGE DEALS

Package deals, in which Western-oriented and Communist-oriented nations were admitted equally, scarcely can be said to have upset the scale. The historic factors behind the change in the balance of power include the decomposition of first the British, then the Dutch, and now the French colonial territories into the many newly independent nations.

Two upshots have become rather evident in the United Nations recently. One is that the Communist countries, originally a small group, have been given a new field in which to fish—the recently independent nations. Another is that the old colonial powers now must speak softly if they want the support of the countries they have created, or allowed to depart.

The situation of the newly emerging states here frankly has alarmed some delegates. Under the current rules, the arrangement is

"one nation, one vote"—much as New Mexico in the U.S. Senate casts a vote equal to that of New York.

Possibly, when the United Nations was set up in 1945, a system of weighted voting might have been established. It has been suggested since then by Sir Winston Churchill and others. The idea was that votes should be counted according to the amount of money and efforts various states put into the world organization.

Nobody expects any "weighted voting" proposal to get anywhere now, however. In fact, it will never be introduced. The smaller nations are too accustomed to making their speeches in the world organization, casting their votes and then looking around for technical assistance to want to change the system.

Certainly, African representatives in the United Nations are listened to with far more attention and with far more respect than would have been the case some years ago.

With special regard to the Congo situation, United Nations observers have noted that within the last fortnight some African states, such as the Congo, Guinea, and Ghana, have "talked tough," to Mr. Hammarskjold in a way that probably would have been inconceivable some years ago. Mr. Hammarskjold, the consummate diplomat, has talked back, too. His language has been more measured, but probably the firmest he has ever employed.

NO GREAT CHANGE

There is little belief among experienced diplomats, however, that the shift in voting strength means that new states will now rule the United Nations. For many years to come the great powers still must provide the financing of the world organization. The United States, for instance, still pays about a third of the total costs. And most of the new nations, although responsible for dues and assessments, are more likely to be seeking technical assistance than providing funds. Also, some of the blocs are less actual "bloc" units than informal discussion groups within the great discussion group that is the United Nations. Among the Latin Americans, for instance, Fidel Castro of Cuba and Generalissimo Trujillo of the Dominican Republic are controversial subjects.

Most of the new African states coming in this year will arrive as independent nations. But some will arrive also as members of the French community of nations. Doubtless, they will vote together with the other Africans on issues of colonialism and of African interest. How they may hold together on other questions is a matter that French diplomats admit is still a puzzle.

With 97 nations sitting in the General Assembly—more if Nigeria and Mauritania should be admitted late in the coming session—the battle of the blocs, however it goes, is certain to be long drawn out this year.

NEW MEMBERS

In the great Asian-African grouping, the Asians previously have had 20 nations and the Africans 9. This year, with the new admissions, the African states will number at least 23.

Precisely what effect the new African votes may have on the United Nations is still not clear. In the Congo crisis, some of the older African members certainly restrained some of the younger states from going overboard in demands on the United Nations.

Mr. Hammarskjold certainly took advantage of the situation. When he asked the Security Council to endorse his policy in the Congo, he probably had most of the African nations on his side.

Nevertheless, the question bears heavily on the structure of the United Nations and its utility to the world community in future years. What the African situation and the admission of the new, small nations may eventually demand are answers to the questions: Is the United Nations to be a mere voting forum, in which each nation may blow off steam and cast an equal vote with larger neighbors? Or is it to be an organization that can reach decisions, implement them, and pay for them, too?

Mr. STENNIS. Mr. President, I yield the floor.

AMENDMENT OF SECTIONS 22, 23, AND 24, TITLE 13, UNITED STATES CODE, AND CLASSIFICATION ACT STATUS OF BUREAU OF CENSUS EMPLOYEES

Mr. JOHNSTON of South Carolina. Mr. President, I ask unanimous consent for the immediate consideration of House bill 12043, which is at the desk.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the bill (H.R. 12043) to amend sections 22, 23, and 24, title 13, United States Code, and for other purposes.

Mr. JOHNSTON of South Carolina. Mr. President, it has been customary during certain periods of expansion in the Census Bureau to promote career employees in the Bureau of the Census for temporary periods, after which they would revert to their former positions.

Under legislation enacted 2 years ago, referred to as the "downgrading bill," these promotions cannot now be made in a manner equitable both to the administration and to the employees concerned.

This bill is designed to correct an inequitable situation that was not intended. The bill does this by permitting these career employees to be promoted; and during the temporary period they fill more responsible positions, they will receive the salary which goes with the position. When they revert to their old positions, they will receive the salary attached to that position.

Enactment of the measure was requested by the administration, and the bill has been approved all along the line.

Mr. President, I ask for the passage of the bill.

The PRESIDING OFFICER. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 12043) was ordered to a third reading, read the third time, and passed.

AMENDMENT OF CLASSIFICATION ACT OF 1949, WITH RESPECT TO POSITIONS IN LIBRARY OF CONGRESS

Mr. JOHNSTON of South Carolina. Mr. President, I ask unanimous consent for the immediate consideration of House bill 8424.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the bill (H.R. 8424) to amend section 505 of the Classification Act of 1949 with respect to positions in the Library of Congress.

Mr. JOHNSTON of South Carolina. Mr. President, this bill amends section 505(i) of the Classification Act of 1949, by adding appointments made by the Librarian of Congress to the list of positions presently excluded from Civil Service Commission approval.

The present requirement for approval by the Civil Service Commission of supergrades in the Library of Congress was first imposed by Public Law 85–462, the Federal Employees Salary Increase Act of 1958. Prior to that time the Library had developed and used its own classification standards in making appointments to positions at all grade levels, and the Librarian's authority to appoint was not abridged in any way. The result brought about by Public Law 462 was not intended, and this measure is designed to correct the situation.

Enactment of this measure has been recommended by the Civil Service Commission, the Bureau of the Budget, and the Librarian of Congress.

The bill has the unanimous approval of the committee.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 8424) was ordered to a third reading, read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I move that the vote by which the bill was passed be reconsidered.

Mr. JOHNSTON of South Carolina. Mr. President, I move to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

COL. JOSEPH A. NICHOLS

Mr. JOHNSON of Texas. Mr. President, there are at the desk several House bills of a private nature, and I should like to have them called up at this time.

Mr. EASTLAND. Mr. President, from the Committee on the Judiciary, I report House bill 11322, for the relief of Col. Joseph A. Nichols, and ask unanimous consent for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate proceeded to consider the bill (H.R. 11322), for the relief of Col. Joseph A. Nichols.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent to have a brief statement on the bill printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the proposed legislation is to relieve Col. Joseph A. Nichols, retired, of liability to repay to the United States the sum of $13,590.65, erroneously paid to him as civilian salary during the period in which he was employed by the officers' open mess, Fort Benning, Ga.

STATEMENT

The claimant, born March 16, 1894, graduated with honors from The Citadel, Charleston, S.C., in June 1917, and was commissioned a second lieutenant of Cavalry, Regular Army, on October 25, 1917. He was transferred to Infantry on February 20, 1918, and

served continuously in that branch until his retirement in the grade of colonel, Regular Army, on June 30, 1950, with over 32 years' honorable service.

Following retirement he was employed by the main officers' open mess at Fort Benning, Ga., for the period January 1, 1951, through November 30, 1953, and earned a total of $13,590.65.

By a letter dated December 3, 1959, from the Retired Pay Division of the Army Finance Center, Colonel Nichols, for the first time, learned that his earnings at the officers' open mess was prohibited because his retired pay exceeded the then limitation of $3,000 (increased in 1954 to $10,000) and that he must elect to receive either the civilian pay or the retired pay. He elected to retain the retired pay.

From the evidence adduced the committee is convinced that Colonel Nichols had at all times acted in good faith and was completely unaware that his civilian salary was in derogation of the so-called Dual Compensation Act. Furthermore, to require from him collection of the civilian salary payments he received from a nonappropriated fund activity would create great hardship and extreme burden.

Since on or about December 13, 1959, he has not been employed in any manner and his sole income is his retired pay of $543 per month. His wife, Mary B. Nichols, has no income of her own and she is entirely dependent upon him for support. His fixed monthly expenditures amount to between $450 and $480. His only assets consist of an automobile worth about $800, a checking account of about $600, stocks and bonds of about $800, and a home which is subject to condemnation proceedings for which damages have not been determined.

The PRESIDING OFFICER. If there be no amendment to be proposed, the question is on the third reading of the bill.

The bill (H.R. 11322) was ordered to a third reading, read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I move that the vote by which the bill was passed be reconsidered.

Mr. MANSFIELD. Mr. President, I move to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

JOE J. FARMER

Mr. JOHNSON of Texas. Mr. President, the next bill is House bill 11380.

Mr. McCLELLAN. Mr. President, from the Committee on the Judiciary, I report House bill 11380, for the relief of Joe J. Farmer, and request its immediate consideration.

The PRESIDING OFFICER. Is there objection?

There being no objection, the bill (H.R. 11380) for the relief of Joe J. Farmer was considered, ordered to a third reading, read the third time, and passed.

OTIS DRINKARD

Mr. JOHNSON of Texas. Mr. President, the next bill is House bill 9715.

Mr. EASTLAND. Mr. President, from the Committee on the Judiciary, I report House bill 9715, for the relief of Otis Drinkard, and request its immediate consideration.

The PRESIDING OFFICER. Is there objection?

There being no objection, the bill (H.R. 9715) for the relief of Otis Drinkard was considered, ordered to a third reading, read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I ask that a statement on the bill be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the proposed legislation, as modified by the recommendation of the committee, is to pay $10,000 to a trustee for the benefit of Otis Drinkard in full settlement of the claim of Otis Drinkard for the loss of his right arm approximately 3 inches below the shoulder joint as the result of injuries he sustained on April 8, 1959, while operating an extractor in a laundry at the Federal Prison Camp, Tucson, Ariz., and such payment would be made to a trustee appointed by a court of competent jurisdiction to supervise the disbursement of that amount in the best interest of the said Otis Drinkard.

STATEMENT

As is evidenced in the report of the Department of Justice on this bill, Mr. Otis Drinkard was injured while he was employed at the Federal Prison Camp at Tucson, Ariz. He was working in the institutional laundry when an accident occurred while he was operating an extractor. His injuries necessitated the amputation of his right arm 3 inches below the shoulder joint.

Mr. Drinkard, because of his status as a prisoner, has no standing to sue the U.S. Government for his injuries under the Federal Tort Claims Act. Although inmates of Federal prison and correctional institutions employed in Federal Prison Industries are compensated for injuries sustained by them in their employment, there is no authority for the payment of compensation to inmates injured while performing other tasks throughout the institution, such as the one in which the claimant was engaged at the time of his injury. There is no authority in the law, therefore, for granting compensation to the claimant for his injuries except through private relief legislation.

The Department of Justice has not taken a position on the bill, preferring to leave the question of relief up to Congress. As is obvious from the foregoing analysis, Mr. Drinkard's only hope for relief lies in legislative relief by private bill. This committee has previously taken favorable action on bills providing similar relief. In the light of the circumstances of this injury the committee further feels that under the circumstances of this case the money provided for in this bill should be paid to a court-appointed trustee in order to insure that the money will be expended in the best interest of Mr. Drinkard, and to insure that he will gain the maximum benefit from the amount provided. The committee recommends that the bill, amended to provide for such arrangements, be considered favorably.

GUADALUPE VILLARREAL, SR.

Mr. JOHNSON of Texas. Mr. President, the next bill is House bill 3536.

Mr. EASTLAND. Mr. President, from the Committee of the Judiciary, I report House bill 3536, for the relief of Guadalupe Villarreal, Sr., and request its immediate consideration.

The PRESIDING OFFICER. Is there objection?

There being no objection, the bill (H.R. 3536) for the relief of Guadalupe Villarreal, Sr. (in behalf of his minor son, Guadalupe Villarreal, Jr.) was considered, ordered to a third reading, read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I ask that a statement on the bill be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the proposed legislation, as modified by the recommendations of the committee, is to pay to the legal guardian of Guadalupe Villarreal, Jr., a minor, the sum of $10,000 in full settlement of all claims of the said Guadalupe Villarreal, Jr., against the United States arising out of the personal injuries he sustained on July 20, 1955, at the Elgin Butler Brickyard, Elgin, Tex., as the result of the explosion of a 37-millimeter high explosive shell.

STATEMENT

On July 21, 1955, Guadalupe Villarreal, then 8 years of age, was playing with some other children on the property of the Elgin Butler Brick Co. in Elgin, Tex. His father was employed by that firm and the Villarreal family lived in a house owned by the company contiguous to the plant and rented to the family. The children found two or three shells in a corral and pasture area on the company property. The Villarreal boy began playing with one of these objects behind the family residence. The Army report on the bill quotes the boy as describing the shell as being "about 10 or 12 inches in length and not very heavy." The Villarreal child placed the shell between his legs and began striking it with a hammer causing it to explode. The explosion caused extensive mangling of both lower legs and ankles, and shrapnel wounds to the thighs, buttocks, chest, and lip. It was necessary to amputate both legs about 5 inches below each knee in order to save the boy's life.

An examination of the fragments found at the scene and those removed from the child at the hospital, established that the shell had been a 37-millimeter shell more completely described as a "37-millimeter M–63 high-explosive shell with base detonating fuse M–58." At the hearing on this bill conducted on May 18, 1960, considerable testimony was given concerning the nature of this particular type of shell. The Army witnesses at that hearing stated that the available evidence, in the opinion of the Army, established that the item was a complete unexpended 37-millimeter shell. It was pointed out that the boy's description tallied with the specifications of such a round of ordnance in that the complete round would have been 14–09 inches in length and would have weighed 3.08 pounds. It was further explained at the hearing that Army ordnance experts feel that it was the projectile that exploded when the shell was struck with the hammer rather than the propellant powder charge in the shell casing. This particular projectile had a safety device which was designed to be released as a shell is fired and the projectile is propelled through a gun barrel so that the explosive charge can be set off upon impact. The committee is advised that the safety device could have been deactivated by the hammer blows of the child. At that point the detonating mechanism would be so sensitive that it was entirely possible that a child's tapping with a hammer could set it off.

The committee feels that the evidence establishes that the child's injuries came from a 37-millimeter high-explosive shell of the type used by the Army during World

War II. It has further concluded that the circumstances of the child's injury are such as to require provision for compassionate relief in this instance. First of all it was established at the subcommittee hearing that during World War II shells such as that described above were used in training at Camp Swift, an Army camp located within a mile and a half of the spot where the Villarreal child was injured. This committee has concluded that the emphasis that the Army has placed upon the fact that an unfired or complete round was the one which exploded and maimed the child serves to further indicate a degree of Government responsibility in this instance. Magazines for the storage of such rounds would be subject to controls to prevent unauthorized removal of ammunition yet it is obvious that this round did find its way onto the property of the Elgin Butler brickyard where it was found by the children in a pond on that property.

This committee feels that the identification of the shell involved, the fact that nearby World War II Camp Swift had a training area for weapons firing that type of shell, and that investigations subsequent to the accident turned up other military explosives in the area, 38 pieces of which were on the Elgin Butler property, all point to a Government connection to this incident. It should also be observed that the precautions regarding ordnance magazines on the Camp Swift Military Reservation were such that it is reasonable to assume that the round here involved had to be removed by military or Government personnel who would have had access to such ammunition. This committee is well aware that its conclusions in this connection conflict with those of the Army in its report on the bill which puts considerable emphasis that in a Federal tort claims case the court did not find that the plaintiff could not prove that "his injury was caused by the negligent or wrongful act or omission of any employee of the Government while acting within the scope of his office or employment." As has been observed above, this committee feels that this round was removed from Camp Swift by the unauthorized action of Government personnel and because of the fact that it was removed, a child ultimately was maimed as a result. This child's only recourse is to appeal to the Congress for legislative relief based not upon strict rules of evidence but upon general considerations of equity and justice. In the light of these circumstances, the committee has concluded that this child should be extended compassionate relief as provided for in the committee amendment with provision that the money be paid to a legal guardian to safeguard the minor's interest.

F. P. TOWER AND OTHERS

Mr. JOHNSON of Texas. Mr. President, the next bill is House bill 1526, for the relief of F. P. Tower and others.

Mr. EASTLAND. Mr. President, from the Committee on the Judiciary, I report House bill 1526, for the relief of F. P. Tower, and others, and request its immediate consideration.

The PRESIDING OFFICER. Is there objection?

There being no objection, the bill (H.R. 1526) for the relief of F. P. Tower, Lillie B. Lewis, Manuel Branco, John Santos Carinhas, Joaquin Gomez Carinhas, and Manual Jesus Carinhas, was considered, ordered to a third reading, read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that a statement in regard to the bill be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of the proposed legislation, is modified by the amendments recommended by the committee, is to pay $578.35 in each instance to the persons and the estate named in the bill in full settlement of their claims against the United States for reimbursement of fines imposed by the Mexican Government in connection with the seizure of five American shrimp trawlers by the Mexican authorities outside the territorial waters of the United Mexican States.

STATEMENT

On April 23, 1950, five American shrimp trawlers were seized by the Mexican Coast Guard vessel *Cadete Virgilio Uribe* while fishing on the high seas off the coast of Mexico about 150 miles south of Brownsville, Tex. The American boats were intercepted by the Mexican vessel between 6 and 6:30 in the morning, and were required by the captain of that vessel to accompany it to the port of Tampico where they arrived early in the morning of the following day, April 24, 1950. The shrimp on board the five American trawlers were confiscated by Mexican customs authorities who required, as a condition of the release of the trawlers, the payment of a fine of 5,000 pesos in the case of each vessel. These fines were paid under protest on May 3, 1950, and are the fines with which this bill is concerned.

At the hearing before the Mexican harbor authorities in Tampico on April 25, 1950, the captain of each one of the five American boats estimated the distance of his boat from the coast and the depth of the water in which he was fishing at the time of the seizure. These estimates ranged from 10 to 15 miles from the coast and from 20 to 23 fathoms of water. At the same hearing the captain of the Mexican vessel, the *Cadete Virgilio Uribe*, stated that the fishing vessels were 5¼ miles from the Mexican coast where the depth of the water was 15 fathoms. However, this committee has been advised that the chart exhibited by the captain of the Mexican vessel at the hearing on April 24, 1950, bore the notation that its position was fixed at 8 a.m., on the morning of April 23, 1950. When it is realized that the fishing boats were intercepted at about 6:30 a.m., and it was not until 8 or an hour and a half later, that the position of the patrol craft was fixed, and there was a 25-mile-an-hour wind blowing from the southeast, it is clear that the vessels drifted closer to shore during that time. This committee has concluded on the basis of the evidence supplied to it that the Mexican vessel drifted 4 miles or more nearer the shore before its position was fixed as being 5¼ miles from the shore. The existence of the locally strong southeasterly wind in that area at the time in question has been confirmed by the U.S. Weather Bureau. The evidence before this committee therefore establishes that the seizures of the fishing boats occurred more than 9 miles from the Mexican coast.

This committee is impressed by the fact that there is absolutely no question but that the American vessels were more than the traditionally recognized distance of 3 miles from the Mexican coast. As has been noted, the evidence further establishes that the boats drifted with the wind about 4 miles closer to shore before the Mexican captain fixed the position of his vessel on his chart as 5¼ miles from shore. On the basis of the facts of this case this committee has concluded that relief should be extended in this instance in the form suggested by the Department of State, limiting the relief to the amounts of the fines paid by the owners of the American vessels. That Department in its report to the committee on the bill referred to Public Law 680 of the 83d Congress which provided for the payment of fines in order to secure the release of vessels seized by a foreign country on the basis of rights or claims to territorial waters or the high seas which are not recognized by the United States. In the case of these five vessels the Mexican Government claimed that its territorial waters extended 9 miles, and this was a claim which the U.S. Government could not concede. Therefore, it is clear that the situation faced by the owners of these five vessels was that now covered by the provisions of Public Law 680 enacted in 1954. In view of this fact and in view of the evidence indicating that the American vessels were actually more than 9 miles distant from the Mexican coast, this committee has concluded that relief should be granted in this case to the extent of reimbursing the owners for the fines paid by them in order to obtain the release of their vessels. The State Department has indicated that it would have no objection to the bill if the payment was so limited as to provide for reimbursement for the amounts of fines paid to the Government of Mexico. Therefore, the committee recommends that the bill be amended to provide for such a payment in each case and also to provide for the payment to the estate of one of the owners who has since died, and that the amended bill be considered favorably.

CRUM-McKINNON BUILDING CO.

Mr. JOHNSON of Texas. Mr. President, the next bill is House bill 8166.

Mr. EASTLAND. Mr. President, from the Committee on the Judiciary, I report House bill 8166, and request its immediate consideration.

The PRESIDING OFFICER. Is there objection?

There being no objection, the bill (H.R. 8166) for the relief of Crum-McKinnon Building Co., Billings, Mont., was considered, ordered to a third reading, read the third time, and passed.

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent that a statement on the bill be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of this legislation is to afford relief to the claimant for services rendered the Government for the period July 1, 1954, to June 30, 1959, inclusive, consisting of janitorial services in a building occupied by the Bureau of Land Management, Department of the Interior, in Billings, Mont.

A bill to render relief sought by the claimant was introduced in the Senate (85th Cong., 2d sess., S. 2519) and was reported favorably (S. Rept. 2043, July 30, 1958) but not in time to be acted upon by the House in that Congress.

This bill does not rewrite the lease upon which the claim is based, as did the Senate bill, because the term of the lease, including the rerental period shown therein had expired when this bill was introduced. However, the purpose of this bill and the prior Senate bill, is the same, namely, to provide equitable relief to the claimant.

STATEMENT

The claim asserted in this bill arises out of a disputed term of a lease of premises owned by the claimant and leased to the Government. The lease was for a term of 5 years at an annual rental of $31,500 which included janitor services specifically described in the lease. There was a further provision in the lease constituting an agreement to

rerent the same premises for 5 years at an annual rental of 10 percent less than the prior rental. The lease is silent as to the rendering of janitorial services in the event of such rerental.

There is conflicting evidence as to the intention of the parties as to the rendering of janitorial services for the second 5-year rental. The claimant states the second 5-year period was at a rental 10 percent less than the prior rental period without janitorial service and that understanding was conveyed orally to the Government at the time of the signing of the lease and acquiesced in by the Government and was a partial reason for the reduction in rent and so interprets the lease. The Government contends said rental price includes janitorial service based on its interpretation of a letter from claimant's predecessors under date of October 28, 1948, an excerpt of which is set forth in its report annexed hereto.

On the premise that an ambiguity existed in the lease, both parties introduced evidence extraneous to the lease to support their contentions as above described. The claimant continued to furnish the services during said rental period while still maintaining its position as to reimbursement.

The General Services Administration states that the janitorial services undoubtedly increased during the period for which the claimant seeks reimbursement (July 1, 1954, to June 30, 1959) and it is not unsympathetic to the position of the claimant.

The Comptroller General states that the furnishing of special services as part of the rental consideration has created a hardship on the lessor and, if the Congress should conclude that the lessor is entitled to relief on an equitable basis, has no objection to the enactment of this bill.

Testimony was presented setting forth that the premises were initially leased to the Government at about 25 percent lower rental than any other comparable facility in the same general area. The claimants received $1.15 per square foot while other governmental agencies were paying $2.58, $2.76, and $2.18 per square foot for comparable office space.

It was adduced that the said premises rented for $31,500 per annum with janitor service for the first 5-year rental period; $28,350 per annum (without janitorial service as the claimant contends or with such service as the Government contends) for the second 5-year period; and, $47,487 per annum for a 3-year period with general improvements and air conditioning of the premises at the expense of the lessor.

The committee is of the opinion that to distinguish the request of the claimant for its costs for janitorial services for the second rental period from the decision of the Comptroller General in the Fraser case (cited and explained herein) where the lessor, under identical lease terms, was not required to furnish such services for a second rental period, although based on a strained but probably legal foundation, is certainly inconsistent with the underlying intent of the parties; namely, a fair and reasonable return for the services rendered and received. The fine legal arguments introduced to support the Department's views although probably persuasive as to the law are not compatible with equity and good conscience.

It is therefore, on the basis of relief in equity and good conscience that the committee recommends favorable consideration of this bill as amended. The amendment constitutes a reduction of the claimant's statement of its costs for janitorial services rendered from $9,150 per year or $45,750 for the 5-year term to $5,000 per year or a total of $25,000 for said term.

Mr. JOHNSON of Texas. Mr. President, I move that the Senate reconsider the votes by which it has passed House bill 11380, House bill 9715, House bill 3536, House bill 1526, and House bill 8166—the bills on which the Senate has just now completed action.

Mr. MANSFIELD. Mr. President, I move to lay on the table the motion to reconsider.

The motion to lay on the table was agreed to.

TABLE OF APPROPRIATION BILLS, 86TH CONGRESS, 2D SESSION

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a summary table showing the budget estimates, the final amount approved by the Congress, and the increase or decrease for each appropriation bill, compared with the budget estimates.

The 86th Congress considered that the budget estimates were inadequate in two important areas. Consequently, the amount appropriated for the Department of Labor and the Department of Health, Education, and Welfare was $334 million over the budget estimate, while the Defense Department Appropriation Act was $661 million over the budget estimate.

Despite these budget increases of $1 billion for Defense and Health, Education, and Welfare, the Congress was able to cut enough fat from other budget requests, so that the total of all appropriations made by the 86th Congress was $211,638,498 below the budget requests.

In the preceding 6 years, the Congress managed to cut approximately $12.5 billion from the President's budget requests. Because of the necessity to increase appropriations for Defense and Health, Education, and Welfare, the net reduction made by this Congress was less than the average of preceding years. Nevertheless, the Congress can be proud of its record of prudently protecting the public purse, by reducing the executive branch budget requests for the seventh successive year.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Table of appropriation bills, 86th Cong., 2d sess.

Bill No.	Title	Budget estimates	Final action, amount as approved	Increase or decrease compared to budget estimates
	1960 APPROPRIATIONS			
H.J. Res. 621	NASA supplemental	$23,079,000	$23,079,000	
H.R. 10743	2d supplemental	1,018,504,888	955,370,003	−$63,134,885
H.J. Res. 765	Labor supplemental	8,000,000	6,000,000	−2,000,000
	1961 APPROPRIATIONS			
H.R. 10233	District of Columbia	(242,403,000)	(239,470,433)	(−2,932,567)
	Loan authorization	(18,700,000)	(20,100,000)	(+1,400,000)
	Federal payment	34,533,000	27,533,000	−7,000,000
H.R. 10234	Commerce	799,615,000	729,624,375	−69,990,625
H.R. 10401	Interior	550,330,300	557,667,600	+7,337,300
H.R. 10569	Treasury-Post Office	4,897,853,000	4,841,914,000	−55,939,000
H.R. 11389	General Government	14,627,500	14,207,500	−420,000
H.R. 11390	Labor-HEW	4,020,221,981	4,354,170,331	+333,948,350
H.R. 11666	State-Justice-Judiciary	733,030,395	705,032,567	−27,997,828
H.R. 11776	Independent offices	8,417,397,000	8,311,893,400	−105,503,600
H.R. 11998	Defense	39,335,000,000	39,996,608,000	+661,608,000
H.R. 12117	Agriculture	4,135,263,190	3,994,097,600	−141,165,590
	Loan authorizations	(367,000,000)	(577,000,000)	(+210,000,000)
H.R. 12231	Military construction	1,188,000,000	994,855,000	−193,145,000
H.R. 12232	Legislative	133,413,485	129,470,410	−3,943,075
H.R. 12326	Public works	4,013,793,180	3,969,982,485	−43,810,695
H.R. 12619	Mutual security	4,281,704,000	3,722,350,000	−559,354,000
H.R. 12740	Supplemental	169,327,840	138,293,740	−31,034,100
H.R. 13161	2d supplemental	72,280,731	162,186,981	+89,906,250
	Total, 1961	72,796,390,602	72,649,886,989	−146,503,613
	Total, all bills	73,845,974,490	73,634,335,992	−211,638,498

NOTE.—Indefinite appropriations are included in this table, but the above figures do not include appropriations made automatically under permanent authorizations for interest on the debt, agricultural import duties, etc. These permanent appropriations are estimated at $10,166,000,000 for fiscal year 1961.

REDUCTIONS MADE BY THE CONGRESS IN BUDGET REQUESTS OF THE EISENHOWER ADMINISTRATION

Mr. JOHNSON of Texas. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a summary table showing congressional action on budget requests during the past 7 years.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Reductions made by the Congress in budget requests of the Eisenhower administration

	Budget estimates	Appropriations	Congressional reduction
83d Cong., 2d sess., fiscal year 1955 and prior	$57,422,327,386	$54,812,457,263	−$2,609,870,123
84th Cong., 1st sess., fiscal year 1956 and prior	62,030,092,195	59,954,284,321	−2,075,807,874
84th Cong., 2d sess., fiscal year 1957 and prior	68,587,724,820	68,330,229,608	−257,495,212
85th Cong., 1st sess., fiscal year 1958 and prior	73,113,555,340	68,070,096,556	−5,043,458,784
85th Cong., 2d sess., fiscal year 1959 and prior	81,737,060,999	81,119,818,276	−617,242,723
86th Cong., 1st sess., fiscal year 1960 and prior	83,452,687,259	81,572,357,732	−1,880,329,527
86th Cong., 2d sess., fiscal year 1961 and prior	84,011,974,490	83,800,335,992	−211,638,498
Total reductions, 7 years			−12,695,842,741

NOTE.—Includes indefinite and permanent appropriations.

PLEA OF SENATOR GOLDWATER FOR SUPPORT OF REPUBLICAN TICKET IN VIRGINIA

Mr. CLARK. Mr. President, will the Senator yield?

Mr. JOHNSON of Texas. Mr. President, I yield to the Senator from Pennsylvania.

Mr. CLARK. Mr. President, on August 30 the junior Senator from Arizona [Mr. GOLDWATER] went to Richmond, Va., to attempt to get support for the Republican ticket. His speech and press conference are reported in this morning's Washington Post. I ask unanimous consent that an excerpt from that speech as carried in the article may appear in the CONGRESSIONAL RECORD at this point in my remarks.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

GOLDWATER PLEADS WITH VIRGINIANS TO FORGET GRUDGE AGAINST GOP

(By Elsie Carper)

RICHMOND, August 30.—Senator BARRY GOLDWATER, Republican, of Arizona, made a flying trip into Virginia today and appealed to southerners to forget their 100-year-old grudge against the Republican Party.

* * * * *

Before he spoke at Richmond he told reporters he thought the Federal courts should stay out of the school integration question. "The Federal Government can't move into that area," GOLDWATER said. "We've never given the Federal Government that power."

REPUBLICAN PLATFORM

Mr. CLARK. Mr. President, in this connection, Virginians and others will be interested in the plank in the Republican platform dealing with civil rights, with particular reference to school integration; and I ask unanimous consent that short excerpts from that platform may be printed in the RECORD at this point. It will be interesting to see whether the candidates for President and Vice President in the Republican Party will repudiate their party's platform.

There being no objection, the extracts were ordered to be printed in the RECORD, as follows:

Equality under law promises more than the equal right to vote and transcends mere relief from discrimination by government. It becomes a reality only when all persons have equal opportunity, without distinction or race, religion, color, or national origin, to acquire the essentials of life—housing, education, and employment. The Republican Party—the party of Abraham Lincoln—from its very beginning has striven to make this promise a reality. It is today, as it was then, unequivocally dedicated to making the greatest amount of progress toward that objective.

* * * * *

We supported the position of the Negro schoolchildren before the Supreme Court. We believe the Supreme Court school decision should be carried out in accordance with the mandate of the Court.

* * * * *

2. PUBLIC SCHOOLS

We pledge:

The Department of Justice will continue its vigorous support of court orders for school desegregation. Desegregation suits now pending involve at least 39 school districts. Those suits and others already concluded will affect most major cities in which school segregation is being practiced.

It will use the new authority provided by the Civil Rights Act of 1960 to prevent obstruction of court orders.

We will propose legislation to authorize the Attorney General to bring actions for school desegregation in the name of the United States in appropriate cases, as when economic coercion or threat of physical harm is used to deter persons from going to court to establish their rights.

Our continuing support of the President's proposal, to extend Federal aid and technical assistance to schools which in good faith attempted to desegregate.

We oppose the pretense of fixing a target date 3 years from now for the mere submission of plans for school desegregation. Slow-moving school districts would construe it as a 3-year moratorium during which progress would cease, postponing until 1963 the legal process to enforce compliance. We believe that each of the pending court actions should proceed as the Supreme Court has directed and that in no district should there be any such delay.

REGULATION OF MASS TRANSIT IN THE WASHINGTON, D.C. METROPOLITAN AREA

Mr. JOHNSON of Texas. Mr. President, I am about to move that the Senate proceed to the consideration of order No. 1975, House Joint Resolution 402. There are two other measures that I may have to call up by motion later in the evening, and if there is any controversy, I may have to temporarily lay this measure aside; but I now move that the Senate proceed to the consideration of order No. 1975, House Joint Resolution 402. I ask the attention of the Senator from Virginia and any other Senators who are interested in the measure.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The LEGISLATIVE CLERK. A joint resolution (H.J. Res. 402) granting the consent of Congress for the States of Virginia and Maryland and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, D.C., metropolitan area, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the joint resolution.

Mr. ROBERTSON. Mr. President, I appreciate very much that the distinguished majority leader has brought this measure up for consideration. I shall be very brief in my position on it, because the distinguished chairman of the subcommittee which heard the testimony is on the floor, and, with due deference to him, he is more familiar than I with the provisions of this joint resolution.

This is a measure which has the endorsement of everyone who has considered it except the Capital Transit Co. in the District of Columbia. It has the endorsement of the Legislatures of Virginia and Maryland. It has the endorsement of the Commissioners of the District of Columbia. It has the endorsement of all the planning agencies of government that have jurisdiction over the District of Columbia or metropolitan Washington.

The joint resolution was passed unanimously by the House. It was reported unanimously by the Senate Judiciary Committee. It provides for the appointment of three commissioners, who shall study the transportation problems of metropolitan Washington.

We already know that three new bridges are being planned, and a fourth bridge has recently been proposed. Yet those four bridges will be inadequate to handle the traffic jams in the rush hours in the morning and afternoon, involving 2 million residents of Metropolitan Washington.

So it is proposed to create a commission with authority to try to work out some new rapid transit plan, either overhead or underground, and, of course, to try to work out better coordination with respect to the buses that operate from Virginia, let us say, to the District line, and the District buses, with respect to schedules, and perhaps transfers.

The joint resolution adequately takes care of the interests of the transit company. It provides that nothing in this bill shall change the charter. It provides that the commission shall not have power, over the veto of the Commissioners of the District, to act on any matter that lies exclusively within the District of Columbia. It provides that if any agency or utility company is dissatisfied with the action of the Commissioners, it will have an appeal to the Federal court.

As I said, I do not wish to discuss this matter at any great length; but I ask unanimous consent to have printed in the RECORD at this point a statement that I have prepared relating to what is involved.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

The metropolitan area of Washington has a most complex and difficult structure, consisting of the Federal Government, the District of Columbia, the States of Virginia and Maryland, and various counties and independent cities and municipalities. This situation presents a delicate and difficult problem in the field of intergovernmental relations in reaching areawide solutions. The Washington Metropolitan Regional Conference, consisting of officials of the metropolitan area of Washington, has established an enviable record in cooperation and in seeking a solution to the grave metropolitan problems which confront similar cities throughout the United States.

The pending compact resolution accomplishes a very simple and basic objective, but a most important one. In effect, the compact centralizes to a great degree in a single agency, the Transportation Interstate Commission, the regulatory powers of private transit now shared by four regulatory agencies. It will make possible the regulations of such transit within the metropolitan area without regard to the boundaries of political jurisdiction. It would thus enable regulation of transit to meet the needs and requirements of the growing and mutually interdependent metropolitan area. It will be able to establish fair rates and produce more transit facilities for the outlying suburban areas. The commission would be able to utilize the total facilities of private transit to set rates and initiate new and additional services.

It will also be able to control and regulate the discrepancies now existing in relation to interstate taxicab fares. This problem from time to time has created adverse comment by taxicab users.

The compact is strongly endorsed by the county and local governments and by the Washington Metropolitan Regional Conference. It has been incorporated as an integral part of the mass transportation plan and is the recommended first step in connection with mass transportation. As stated, it is the first step relating to mass transportation, and is not to be confused with other steps necessary to complete and round out the entire problem.

The compact would authorize the negotiation of an interstate proprietary compact creating an interstate operating agency. By circumstance, the National Capital community is located in the States of Maryland, Virginia, and the District of Columbia. Each jurisdiction regulates transit service within its borders. Service across jurisdictional lines is subject to regulation by the Interstate Commerce Commission. The principal objective of the compact is to centralize the regulatory function in a single agency, with jurisdiction coextensive with the metropolitan area. Such centralized relocation would result in a pattern of transit service oriented to the needs of the 2 million people of the entire metropolitan area.

The compact is directed to the improvement of privately owned transit, not only through centralization of regulation, but also also by creating machinery for the consideration on a regional basis of traffic problems related to transit service. The compact represents cooperative efforts by the States of Maryland and Virginia and the District of Columbia to place the regulation of privately owned transit on the basis of the area covered rather than on the theory of Interstate Commerce Commission jurisdiction.

House Joint Resolution 402 reflects the dual status of Congress as both the National Legislature and the local legislature for the District of Columbia. With respect to this latter capacity, the resolution provides for the approval by the Congress of the compact, and directs the Board of Commissioners of the District of Columbia to enter into and execute the compact. In its capacity as the National Legislature, Congress grants its consent to the compact pursuant to the requirements of the Federal Constitution; removes Federal jurisdiction over the subject matter of the compact, and confers appellate and enforcement jurisdiction under the compact upon the Federal judiciary.

House Joint Resolution 402 is not presented as a complete solution for the transportation problems of the Washington metropolitan area, but it is an important step in that direction. The transportation plan prepared by the National Capital Planning Commission and the National Capital Regional Planning Council states that this compact for the centralization of the regulatory function is the first step in a broader program. Other aspects of that program dealing with the construction, financing, and operation of expanded highway and rail facilities is pending before the Congress in separate legislation. Regardless of the disposition to be made of the broader program, House Joint Resolution 402 is important legislation which the committee believes should now be enacted.

The compact has been enacted by Virginia and Maryland and now reflects the public policy of those States. The objections of the Interstate Commerce Commission to the compact have been met and no other Federal agency has raised substantial objections to the compact. Labor favors the objectives of the compact and, on the basis of the amendments passed by the House of Representatives, is now satisfied with the specific provisions of House Joint Resolution 402. The compact is strongly endorsed by county and local governments and by the Metropolitan Washington Conference, which is an areawide organization composed of elected public officials.

The Department of Commerce, the National Capital Planning Commission, and the National Capital Regional Planning Council have endorsed this legislation. The Nation Labor Relations Board reported that, in view of the fact that its functions under the Labor-Management Relations Act of 1947, as amended, are not affected by the legislation, it had no comment to offer with respect to the desirability of passing the proposed legislation. The Administrative Office of the U.S. Courts reported that it was unable to express any opinion with regard to the legislation because the bill appeared to be one of legislative policy. The Department of Justice, the Civil Aeronautics Board, the Interstate Commerce Commission, and the Securities and Exchange Commission all reported in favor of the legislation, subject to the suggestions and comments noted below.

The Department of Justice recommended that article IX, section 1, of the compact be amended to require that affirmative consent of the Congress be obtained with respect to any amendment of the compact. A similar view was expressed by the Bureau of the Budget. The Department of Justice suggested that the necessary modification could be accomplished without necessitating further legislative action at this time by the signatories by inserting a proviso at the end of section 2 of the bill which would prohibit the Commissioners of the District of Columbia from adopting any amendment to the compact without the prior consent or approval of the Congress. Articles VIII and IX of the compact leave to each signatory the procedures to be followed in adopting and amending the compact. This suggestion simply deals with the procedure to be followed by the Board of Commissioners of the District of Columbia in adopting amendments to the compact and, therefore, does not involve a change in the compact necessitating its resubmission to the States.

The protection written into the compact to assure the integrity of the franchise has been buttressed by the third proviso of section 3 of the bill, which provides as follows: "*Provided further*, That nothing in this act or in the compact consented to and approved hereby shall impair or affect the rights, duties, and obligations created by the act of July 24, 1956 (ch. 669, 70 Stat. 598), granting a franchise to D.C. Transit System, Inc.:" Veto power. Court review.

The committee took under consideration the various objections to the compact raised at the hearings, which set forth that the membership of the Commission should be five instead of three, at least three of whom should represent the District of Columbia; that the compact would create confusion and that it would not result in unified regulation and other criticism thereof. The committee duly considered the matters raised in connection with the compact, but concluded that the compact is a needed step in the regulation of the mass transportation for the metropolitan area of Washington, and was of the opinion that, under all of the circumstances, the compact is meritorious and should be given the consent and approval of the Congress.

The compact legislation has been enacted into law by the States of Virginia and Maryland and is supported by the Board of Commissioners of the District of Columbia, who have requested authority to enter into and execute the compact. In addition, the compact is endorsed by political subdivisions of the States and local civic and business groups. The Washington Metropolitan Regional Conference, a voluntary association of the elected officials of the various governments within the metropolitan district favor the enactment of the compact and have presented the committee with a resolution to this effect. The compact also has the support of the major segments of the local transit industry and is opposed, so far as the committee can determine, only by the D.C. Transit System, Inc.

The compact has been negotiated by representatives of the States of Maryland, Virginia, and the District of Columbia and representatives of the utility commissions of those jurisdictions have participated in the negotiation of the compact. The compact has also been considered by the National Capital Planning Commission and National Capital Regional Planning Council as part of their study of mass transit in the National Capital region and those agencies have incorporated the compact as a step in the development of a transportation plan for the National Capital region.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. ROBERTSON. I yield.

Mr. BUTLER. The Senator from Virginia has stated he is wholeheartedly for this joint resolution, and I wish to state that I am also.

Mr. ROBERTSON. As I have said, I hope my distinguished colleague from Michigan [Mr. HART] will tell the Senate something about the joint resolution, because he was chairman of the committee that heard the testimony on it, and, with due deference to him, he is more familiar with the measure than I am.

Mr. HART. Mr. President, the Senator from Virginia has very effectively summarized the provisions of the compact. I shall undertake to respond to any questions, as I am sure the Senator from Virginia will, but the committee has unanimously recommended favorable action on the joint resolution.

Mr. MORSE. Mr. President, I have amendments pending at the desk, identified as E, and I ask that they be stated.

The PRESIDING OFFICER. The amendments offered by the Senator from Oregon will be stated.

The LEGISLATIVE CLERK. It is proposed:

On page 4, line 12, to delete "three" and insert "four" in lieu thereof.

On page 4, line 14, after "Maryland and" to insert "two members".

On page 4, line 17, to delete "The" and insert "Each" in lieu thereof.

Mr. MORSE. Mr. President, the purpose of the amendments is to provide greater representation upon the proposed Interstate Compact Commission to the District of Columbia. The measure as reported from committee provides for but three members, one each from the States of Maryland and Virginia and one from the District of Columbia. If my amendment is accepted, then four members would serve upon the Commission, one each from the States of Maryland and Virginia, and two from the District of Columbia.

Much concern has been evidenced to me from the District urging that the modification to the compact which I am proposing be adopted. It is the feeling of these District people that the modification is warranted upon the following grounds:

First. Eighty percent of the traffic subjects to regulation under the Compact Commission is represented by the District riding public as opposed to the 20

percent of the traffic which represents the riding public of Virginia and Maryland affected.

Second. Fear has been expressed that the Compact Commission, being unrepresentative, might in its decisions adversely affect mass transit in the District.

While I do not prejudge the matter, I believe that quasijudicial agencies should be considered impartial until, and unless, they prove themselves otherwise by their acts, yet, I have often pointed out that substantive rights are dependent upon the procedures through which such rights can be obtained. We are dealing here with a basic procedure. The position I advance to the Senate is that in creating a body exercising regulatory functions in the Washington Metropolitan area we should likewise safeguard, through the composition of the body we create, the interests of the dominant population group which will be affected by the actions of the body we establish.

Senators will note that I do not propose that the District shall have a majority on the commission. The District cannot dominate it. I do propose, however, that the District be represented so that it, in turn, cannot be dominated. I believe that the interests of 80 percent of the riding public deserve this protection.

Mr. President, it has been represented to me by those in the District who feel the balance of power, so to speak, in the agency to be created by this bill, would carry with it great danger for the District. They feel that there is a possibility that representatives from the State of Virginia and the State of Maryland might join together as a majority on the Commission to the detriment of the District of Columbia.

Mr. President, I repeat, it has been represented to me by those in the District who urge the adoption of the amendment that there is a possibility under the present organization of the Commission that the members from Maryland and Virginia could join together on some matter to the detriment of the District of Columbia.

I would not have offered the amendment if it had been proposed that the District of Columbia be given a majority of the Commission, but I think there is merit in the fear of those who have asked that the amendment be offered. There is always the lurking danger that representatives from the States of Maryland and Virginia might, for their own interests, coalesce, so to speak, against one member of the District of Columbia on the Commission. Because it is represented that 80 percent of the riding public comes from the District of Columbia it seems to be a bit inequitable that Maryland should have a Commissioner and Virginia should have a Commissioner and the District of Columbia should have only one Commissioner.

I think under such circumstances, Mr. President, it is rather a fair request that the number of Commissioners from the District of Columbia be increased to two, so at least the District could not be outvoted by a combination of the Commissioners from the States of Maryland and Virginia.

I wish to read to the Senate certain telegrams I have received in support of the amendment which I offered by request, which I was glad to offer, by request, in order to see to it that a fair hearing is given to the representations which have been made.

I received a telegram from Mr. Chalk, whom we all know is president of the D.C. Transit Co. This is the third and last telegram which I received from him. It states:

Supplementing my two recent telegrams regarding House Joint Resolution 402 primary beneficiary of bill is sovereign State of Virginia and primary loser is District of Columbia. As example of manner in which Virginia interests are trying to destroy District transit companies I refer you to Virginia statute section 56–338.61 enacted March 31, 1960, which prohibits transit companies of the District of Columbia from engaging in transportation within Virginia. Also call your attention to fact that alleged veto power of District Commissioner is limited to matters which are solely intrastate and all matters of conflict between Virginia and the District would be interstate not solely intrastate. District interests will be at mercy of Virginia discrimination as illustrated above.

Respectfully yours,

O. ROY CHALK.

Because the D.C. Transit Co. has such a vital economic interest in this matter, I think it is only fair to Mr. Chalk that I read another wire which I received from him. It states as follows:

Before irreparable damage is done to the D.C. Transit System and the riding public of the District of Columbia, I urge you to join in sponsoring an amendment to the Compact Commission bill House Joint Resolution 402 in order to safeguard the District of Columbia citizens who represent 80 percent of the riding public as against the Virginia and Maryland citizens who represent 20 percent of the riding public. Regulation without proper, adequate, and proportionate representation is manifestly unfair and discriminatory against the interests of the District of Columbia. The bill as presently proposed will surely cause fares to be proportionately higher for the District riding public than for the Virginia and Maryland riding public. I urge an amendment to House Joint Resolution 402 which will at least give proportionately equal representation on the Commission of the District of Columbia. Instead of one member for the District of Columbia, which represents 80 percent of the transit traffic, we urge an amendment which will permit three Commissioners from the District of Columbia, one from Virginia, and one from Maryland.

Respectfully submitted.

O. ROY CHALK.

It will be noted that I did not follow the recommendation of Mr. Chalk, who asked for a majority of District of Columbia Commissioners. I felt that would be unfair. I thought, however, in view of the interest of the riding public of the District of Columbia, it would be proper to recommend an amendment—which I did—to give to the District of Columbia two Commissioners and to Virginia and Maryland one each.

I received another wire from Mr. Chalk which I should like to put in the RECORD, in which he said:

Supplementing my first telegram regarding House Joint Resolution 402 in which I urged an amendment expanding the Commission to five members, three of which should be from the District of Columbia, please be advised that the supporters of the bill argue that no change should be made in the bill lest any change require resubmission of the compact to the Legislatures of Virginia and Maryland. The simple answer to their argument is that those two legislatures passed the compact by narrow margin without any kind of public hearings repeat without any kind of public hearings, and without public notice and without any opportunity for the D.C. Transit System or the riding public of the District of Columbia to be heard. I respectfully urge you to support the amendment providing five commissioners.

Respectfully yours,

O. ROY CHALK.

At great length Mr. Chalk testified before the Senate committee. Before I close I shall ask to have all of his testimony printed in the RECORD, if I do not read it.

Mr. President, at this time I wish to read from a portion of his testimony. Mr. Chalk said:

I would like to call the attention of this subcommittee to two of the comments made in the report of the Institute of Public Administration on the proposed Compact Commission of House Joint Resolution 402. On page 17 of the report of the Institute of Public Administration, the following conclusion is stated:

"In short, the arrangement [i.e., Compact Commission] is one of limited powers, with no assurance of effectiveness. It rates high on only one test—feasibility. It rates low on the requirements of flexibility, comprehensiveness, responsiveness to public needs and desires, and financial adequacy."

In addition to the above critical analysis, the institute has made one other observation about the proposed Compact Commission of House Joint Resolution 402. Summarizing its views as to the alternatives presented for solving the transportation problems of the National Capital region, the Institute of Public Administration made the following observations on page 24 of its report:

"The first alternative is to follow through with the proposed interstate compact regulatory agency, in full recognition of the fact that it will be of limited effectiveness in mass transportation improvement, and of little or no effectiveness in the improvement of traffic and parking controls."

From the above quoted excerpts from the report of the Institute of Public Administration, it is clear that others besides D.C. Transit find the provisions of the proposed Compact Commission to be objectionable. The only reason that no other witnesses have appeared in opposition to the proposed compact is that we of D.C. Transit are the only transit company which represents the transportation interests of the persons traveling within the District of Columbia.

The House committee report on House Joint Resolution 402 states that all the other transit companies support the bill. This conclusion is misleading, because it implies that the other transit companies represent the interests of the riders within the District of Columbia. Such fact is just the opposite from the truth. The reason the other transit companies do not oppose House Joint Resolution 402 is that they are all suburban or local in character. None of them are incorporated within the District of Columbia nor do any of them represent the interests of those persons who ride transit services within the District of Columbia. To the extent the interests of the riders of the District of Columbia differ from the interests of the riders of the suburban communities, the other local transit companies have interests adverse to those of D.C. Transit.

The principal reason the suburban companies are not opposed to House Joint Resolution 402 is that two Commissioners out of the three proposed Commissioners will have

more than ample power and authority to outvote the single representative of the District of Columbia on matters where the interests of the District differ from those of the suburban communities.

The House committee report on House Joint Resolution 402 also tends to minimize the opposition of D.C. Transit to the Compact Commission. In terms of the number of witnesses who appeared before the House committee, the House committee report implies that the opposition to the bill was slight in comparison to the support for the bill. In this connection, the report emphasized that the Virginia and Maryland transit companies did not strongly oppose the bill. An examination of the facts indicates that although D.C. Transit may only have been one of many witnesses, it accounts for 80 percent of transportation of passengers within the National Capital region. We of D.C. Transit represent 80 percent of all of the transit business done by all of the transit companies in the National Capital region. Accordingly, our testimony should be accorded four times as much weight as was accorded to the testimony of all of the suburban transit companies together.

My testimony so far has been on the general background atmosphere which has surrounded the advancement of House Joint Resolution 402. We, at D.C. Transit, do have specific objections to certain provisions which must be made before the bill is enacted into law. Our objections are primarily of two general types. In the first place, we have very serious constitutional and legal objections to House Joint Resolution 402. Our legal objections were presented to the House Judiciary Committee, are part of its printed hearings and need not be repeated here. Suffice it to say that the House report did not answer all our legal objections. Second, we have substantive objections to the provisions of House Joint Resolution 402 which we feel must be corrected before the bill can be acceptable to the Congress and to the people of the District of Columbia.

One of our major legal objections made before the House Judiciary Committee is one which also involves serious policy considerations. This objection is so serious that in 1955 President Eisenhower vetoed a similar Compact Commission for this same reason. The objection is that House Joint Resolution 402 discriminates against the District and in favor of Virginia because House Joint Resolution 402 gives the Compact Commission jurisdiction over intrastate transportation within the District while in the same bill Virginia refuses to yield to the Commission similar jurisdiction over its intrastate transportation. In passing, I would like to note that the House report on House Joint Resolution 402 makes no reply to this legal objection. On a related issue, President Eisenhower in 1954 vetoed a previous Compact Commission bill saying:

"Its failure to include the Virginia segment of the metropolitan area within the jurisdiction of the proposed Commission is a fundamental deficiency. Through this omission of an integral and important part of the greater economic community, a system of fragmented and divided regulatory authority is continued. What is worse, the Federal Government is placed in the position of treating the carriers and persons within one segment of the area on a different and discriminatory basis from those in the remainder of the area. In the absence of any substantial grounds for this differentiation, the measure is unacceptable even as a temporary expedient." (CONGRESSIONAL RECORD, vol. 100, pt. 12, p. 15567.)

Let me say in passing that I have heard no statement from the proponents of the resolution tonight in answer to the legal objections which were raised before the House Judiciary Committee, and I have heard no statement from the proponents of the resolution tonight in answer to the veto message of President Eisenhower with regard to a similar measure back in 1954.

To return to the Chalk testimony:

Notwithstanding the views of President Eisenhower in 1954, House Joint Resolution 402 once again fails to give the Compact Commission complete jurisdiction over Virginia instrastate transportation. Not only do we regard this omission as discriminatory and unfair, but we also regard it as illegal and unconstitutional. In the hearings before the House Judiciary Committee, we filed a memo on the illegality and unconstitutionality of this fatal error. The House report did not even comment on nor discuss this subject. It must be assumed that the House committee could find no valid legal reply.

Mr. President, I am inclined to believe the fact that the proponents of the resolution have not commented upon this legal problem in this debate on the floor of the Senate raises at least a presumption that they prefer not to discuss it.

I now return to the testimony offered to the committee by Mr. Chalk:

As I have mentioned briefly in my earlier testimony today, the proposed resolution, House Joint Resolution 402, is discriminatory against the interests of the District of Columbia and it favors the suburban communities of Virginia and Maryland.

The transit interests which the resolution discriminates against are both those of the riding public and of the transit company. The source of the discrimination is in the regulatory framework of the proposed Commission. Under House Joint Resolution 402, the new Commission would consist of three Commissioners, each a political appointment from each of the three jurisdictions participating in the compact. It is widely conceded that the Commissioner from Virginia, appointed by the Governor of Virginia, would owe his allegiance and interests to the suburban companies of Virginia origin and to the transit interests of the suburban communities of Virginia. Similarly, the Commissioner from Maryland would owe his allegiance and interests to the suburban companies of Maryland origin and to the transit interests of the suburban communities of Maryland. Only one of the three Commissioners would have a primary interest in the welfare of the riding public and the transit companies of the District of Columbia. Notwithstanding the fact that the transit operations within the District of Columbia constitute the greatest proportion, i.e., over 80 percent of all of the metropolitan area transportation in the three States, the District of Columbia would only be represented by one Commissioner out of the three Commissioners under the compact. Experience has taught regulated companies that, under similar circumstances, the downtown interests would be outvoted and would suffer to the advantage of the suburban interests.

As a suggestion to solve the discriminatory feature, we and others have urged that there be five Commissioners, of which at least three be representatives of the District of Columbia. Even this proportion is favorable to the suburbs since transit operations in the District of Columbia account for approximately 80 percent of the transit operations in the entire Washington metropolitan area. The response of the supporters of the resolution to our suggestion has been that such a change would require that the bill go back to each of the other two States for resubmission to their respective legislatures. This answer is the same response which the proponents give to all constructive suggestions for the bill notwithstanding the fact that both Virginia and Maryland passed the bill without public hearings in either case and without notice to any of the parties or interests concerned.

In response to our proposal that the interests of the District can be outvoted by the suburban communities, the proponents of the bill have argued that the interests of the District are adequately protected by the so-called veto power in article VI. There is no protection to the District in the veto power is limited to matters which are solely "intrastate". I have been advised by our attorney that, under current judicial decisions, it is quite probable that, wherever the District's interests clash with the suburban interests, few, if any, matters will be "solely intrastate." Accordingly, the veto power cannot be counted upon to resolve the problems of conflicts of interests between the District and the suburban communities.

In response to our concern about the attitudes of the various Commissioners, the House Judiciary Committee in its report on House Joint Resolution 402 makes the following observations (at p. 28):

"It has been urged that the District of Columbia, having only one representative on the proposed commission and hence only one vote, could possible suffer because of unfair, unreasonable, or collusive action by a combination of the other Commissioners from the two compacting States. Of course, such a circumstance can work to the detriment of any compacting party. The committee, however, is not apprehensive about this circumstance since under article X of the compact each of the signatories is pledged to faithful cooperation with the other signatories."

The above-quoted excerpt from the House Judiciary Committee report shows the fallacy and error in the basic premise of the Compact Commission. This basic premise is that all jurisdictions will treat the transit interests of each other on an equal footing and with equal fairness. We have positive evidence here today in black and white to prove that the Commonwealth of Virginia has no intention of the kind of "faithful cooperation" contemplated in the House report.

An example of the lack of good faith shown on the part of the Commonwealth of Virginia on the subject of faithful cooperation and fairness is a new statute which was enacted into law in Virginia on March 31, 1960. This bill represents a hostile attitude and flagrant challenge to the transit interests of the District of Columbia, Maryland and all States surrounding Virginia.

I would like to hand to the chairman and members of the subcommittee at this point the act of the General Assembly of Virginia of March 31, 1960, which is an act to provide for the regulation of special or charter party transportation. This act prohibits the carrying on of business as a common carrier for charter or special party service without first obtaining a certificate of public convenience and necessity. The new law, as most new laws of similar nature, provides the usual grandfather clause, granting companies and persons who were lawfully engaged in such business on January 1, 1960, the automatic right to obtain a certificate of public convenience and necessity by virtue of their grandfather rights. This grandfather clause is quite customary and is similar to provisions in the Interstate Commerce Act and other similar regulatory statutes.

The hostility and discrimination against the District companies is contained in the fact that the grandfather rights are limited to Virginia corporations even though non-Virginia corporations were on January 1, 1960, entitled the same grandfather status.

Section 56-338.61 of the Virginia statute of March 31, 1960, provides that the grandfather rights will not be accorded a nonresident or a foreign corporation. This means then that although we of D.C. Transit have

grandfather rights, we will be discriminated against because we are a District of Columbia corporation.

At this time I would like to hand up to the chairman and members of the subcommittee permit No. CP-468 which we obtained from the Virginia State Corporation Commission on June 17, 1957, for transportation of passengers within the Commonwealth of Virginia for special or charter party purposes.

Mr. Chairman, I would like to request that a copy of the act of the General Assembly of Virginia of March 31, 1960, and the copy of our permit No. CP-468 of June 17, 1957, from the Virginia State Corporation Commission be included at the end of my testimony as part of the printed hearings of today's proceedings.

I digress at this point to say that it is only fair to Mr. Chalk that this very pertinent testimony of his be read to the Senate, so that anyone who wishes to reply to it in the debate, when I finish, may reply to it. It is interesting to note that it has not been touched upon by the proponents of the compact. It has not been answered by the committee. In my judgment, Mr. Chalk is entitled to the courtesy at least of having the record made here and giving an opportunity to the proponents of the resolution to put on record their reply to the legal points he raises, as well as to the procedural points he raises.

I continue the reading:

When the new Virginia statute I have just referred to was first publicized, we at D.C. Transit made every effort possible to discourage the Virginia authorities from enacting it into law. All of the persons concerned admitted that the law was directed against D.C. Transit. The enactment into law of such a discriminatory bill directed at D.C. Transit is a far cry from the protests of fairness, good faith, and faithful cooperation discussed in the House Judiciary Committee report.

The reality of the regulatory pattern of the proposed three-man Compact Commission is that we of D.C. Transit have much to fear from a commission where Virginia and Maryland have two out of three votes, in circumstances where 80 percent of the transportation is within the District of Columbia.

We have urged before and we urge again that the regulatory framework of the proposed Commission be expanded from three to five members, of which at least three should represent the District of Columbia.

I again disgress from Mr. Chalk's testimony to say that I have not followed the recommendation he made to the committee that three District Commissioners be appointed to the Commission. In my judgment that would not be fair either. It would give to the District of Columbia a majority vote over Virginia and Maryland interests. What my amendment does is increase the number of District Commissioners to two, which gives the District of Columbia protection from any possible alinement of Maryland and Virginia Commissioners against the interests of what, the evidence seems to show very clearly, is a total of 80 percent of the riders. These are the District of Columbia riders, in contrast to the combined 20 percent of the riders from Maryland and Virginia. My amendment, at least, would give to the District of Columbia, so far as the number of Commissioners is concerned, an equal break with Maryland and Virginia as far as the number of Commissioners on the Commission is concerned.

Mr. Chalk's statement continues:

All of the persons with whom we have spoken about our problem in the District of Columbia have agreed that this change is a minimum change necessary to make the bill fair and equitable to the interests of the District of Columbia. The fact that the bill must go back to the Virginia and Maryland Legislatures does not militate against perfecting the bill for the minimum protection necessary for the interests of the District of Columbia.

Our objection to the three-man composition of the Compact Commission is our first substantive objection to House Joint Resolution 402. We have one other substantive objection to House Joint Resolution 402. We sincerely believe that House Joint Resolution 402 will compound, confuse and complicate the regulatory pattern in the District of Columbia, particularly in view of the imminent enact of S. 3193.

House Joint Resolution 402 has been billed as a simplification of the existing regulatory machinery. It has been argued by its proponents that it substitutes one regulatory agency for the four present regulatory agencies. It is argued by the proponents that the proposed Compact Commission would replace the regulatory functions of the PUC, the Maryland PSC, the Virginia State Corporation Commission and the ICC. This claim simply is not true.

It might well be possible to propose a Compact Commission which might replace the existing four agencies. House Joint Resolution 402 simply does not accomplish the job.

On this issue, D.C. Transit is supported by the testimony of the Public Utilities Commission at the House Judiciary Committee hearings on House Joint Resolution 402. Commissioner Kertz testified in the House hearings that one very important oversight in House Joint Resolution 402 is its failure to give to the proposed Compact Commission the PUC's responsibility for making the so-called gasoline tax determination required by section 9 of our franchise. As Commissioner Kertz testified, this gas tax determination requires as much regulatory agency effort as a full scale rate case would require. As Commissioner Kertz testified, House Joint Resolution 402 produces the curious result that the Compact Commission would regulate our rates with full-fledged rate hearings while, at the same time, the PUC would have to make a separate and independent determination of our gas tax liability under section 9 of our franchise with a full-fledged hearing on that issue. In its report on House Joint Resolution 402, the House Judiciary Committee admitted reluctantly on page 23 as follows:

"Since the compact does not give an affirmative grant of power to the Washington Metropolitan Area Transit Commission to levy, assess, or collect taxes, it is clear that the duties of the Public Utilities Commission of the District of Columbia with respect to the determination of the liability of D.C. Transit System, Inc., for the motor fuel tax, as specified in that company's franchise, is not transferred to the Washington Metropolitan Area Transit Commission."

Mr. HARTKE. Mr. President, will the Senator yield?

Mr. MORSE. I yield for a question.

Mr. HARTKE. Is it not true that the majority of the transit riders are within the District of Columbia?

Mr. MORSE. According to the testimony, 80 percent of them are within the District of Columbia.

Mr. HARTKE. Is it not true also that because the District of Columbia is the seat of the Federal Government, Washington is not an ordinary city?

Mr. MORSE. That is also my position.

Mr. HARTKE. Although I live in Virginia, I am still faced with the problem of transportation into the District of Columbia. Is it not true that so far as the surrounding areas of Virginia and Maryland are concerned, their population primarily serves the Federal Government and the Federal institutions in the Federal city?

Mr. MORSE. That is true.

Mr. HARTKE. The Senator's amendment makes sense. I compliment him for bringing it to our attention. In all sincerity, the amendment will in some way, at least, make it possible for the District of Columbia, the seat of the Federal Government, to be certain that it will not in any way be discriminated against in its primary purpose of serving the Government. That is why the National Capital was established.

In my judgment, the amendment is a good one. I intend to support it.

Mr. MORSE. I thank the Senator from Indiana for his statement.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. JAVITS. My being apprised of this situation is attributable to two factors. First, I was a member of the Committee on the District of Columbia before this session of the Senate. Second, Roy Chalk, who is a New Yorker, has gone to some pains to present to me, because he comes from my State, his side of the case.

I, too, like the Senator from Indiana, can see some justice to the situation. I am well aware of the ardent desire of Senators from the States of Virginia and Maryland to have the compact approved. As the Senator from Oregon knows, we in New York have had experience with compacts. In fact, we are now having a legal problem concerning the extent to which Congress may or may not, through the House of Representatives investigate the Port of New York Authority.

All that that shows, whatever may be the merits or demerits of that particular situation, is that at least compacts are very difficult to handle properly.

All of us are deeply interested in metropolitan transportation. We believe that the establishment of a metropolitan authority is a highly desirable step in terms of the whole metropolitan area. Many problems and difficulties arise and it is necessary to accommodate to the strains and stresses of the situation before such compacts are entered into.

I am glad to see that the Senator's amendment is not so strong and stiff as was proposed in the first instance. I think it is much more equitable to have, at least, a standoff, if the parties cannot agree, on the part of the District of Columbia and of the States of Maryland and Virginia. I think the amendment commends itself.

According to the statement, the State legislatures moved in this matter with considerable celerity. There were not

overly extended hearings. Therefore, the proponents of the compact might find that the Senator's solution, which is a reduced solution, proposed by the operator of the D.C. Transit System, would create a climate, when they enter into it, which would be most propitious for the success of the Commission.

I believe the Senator from Indiana has put his finger on the point. Ordinarily speaking, the District of Columbia is a city; Maryland and Virginia are States. As the Senator from Indiana has pointed out quite properly, the District of Columbia is the seat of the Federal Government. It is the hard core of the whole metropolitan system. Therefore, it is entitled to unique consideration. There is only one seat of the Federal Government in the United States.

My purpose in interrupting the Senator from Oregon is to state to the Senate the reason for my interest, and to express the hope that in the interest of comity, in the interest of starting the Commission under the most auspicious possible circumstances, Senators from the States concerned might themselves think it were appropriate to start the Commission most auspiciously and to accept the Senator's amendment notwithstanding that the formal steps of ratification by the respective State legislatures might be delayed.

Mr. MORSE. I thank the Senator from New York.

Before I return to a reading of Mr. Chalk's testimony, which is really an argument against the resolution—and I am certain the Senator from New York [Mr. JAVITS] and the Senator from Indiana [Mr. HARTKE] agree that Mr. Chalk——

Mr. MANSFIELD. Mr. President, will the Senator from Oregon yield to me, for the purpose of setting aside the present measure and bringing up a new measure?

Mr. MORSE. With the understanding that I may continue with my discussion of Mr. Chalk's testimony later.

Mr. MANSFIELD. With that understanding.

Mr. MORSE. I yield.

EXTENSION OF MIGRANT AGRICULTURAL LABOR ACT

Mr. MANSFIELD. Mr. President, I ask that the Senate turn to the consideration of Calendar No. 1971, H.R. 12759.

The PRESIDING OFFICER. The bill will be stated by title.

The CHIEF CLERK. A bill (H.R. 12759) to amend title V of the Agricultural Act of 1949, as amended, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Agriculture and Forestry, with an amendment, to strike out all after the enacting clause and insert:

That section 509 of the Agricultural Act of 1949, as amended, is amended by striking "June 30, 1961" and inserting "December 31, 1961."

Mr. HAYDEN. Mr. President, the bill as passed by the House provided for a 2-year extension of the Migrant Agricultural Labor Act. The Committee on Agriculture amended the bill to provide for a 6-month extension, until June 30, 1961. Some objection was raised, but I understand it was the general understanding that this shorter time would be allowed.

If it is not passed, the farmers in California, Arizona, New Mexico, Texas, and similar areas cannot finance their crops for the next year; whereas if it is passed, then we shall have the next session of Congress in which to discuss this whole problem. So I think it proper that the bill be passed.

Mr. JAVITS. Mr. President, I suggest the absence of a quorum.

Mr. MANSFIELD. Mr. President, will the Senator from New York withhold that suggestion for a moment?

Mr. JAVITS. Yes.

Mr. MANSFIELD. Will the Senator from New York explain why he has suggested the absence of a quorum?

Mr. JAVITS. Yes; because I have an amendment, and I wish to finish my preparations in that connection and discuss the matter with several of my colleagues. I think the same probably may be said of several other Senators.

Mr. MANSFIELD. Very well.

The PRESIDING OFFICER (Mr. MCGEE in the chair). The absence of a quorum has been suggested, and the clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. JAVITS. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from Arizona has the floor.

Is there objection to the request of the Senator from Arizona to proceed to the consideration of H.R. 12759?

Mr. DIRKSEN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DIRKSEN. Will the Chair state for the information of the Senate what is the nature of the bill that is presently before us?

The PRESIDING OFFICER. The clerk will read the bill.

The Chief Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 509 of the Agricultural Act of 1949, as amended, is amended by striking "June 30, 1961" and inserting "December 31, 1961."

Mr. DIRKSEN. Mr. President, a further parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DIRKSEN. Is this the bill that relates to Mexican migrant labor?

Mr. HAYDEN. Yes; it provides for a 6 months extension of existing law.

Mr. KEATING. Mr. President, will the Senator yield to me? Yesterday I sent to the desk an amendment to H.R. 12759. I had in mind offering this amendment and pressing it as hard as I could should the Senate consider a long-term, for example a 2-year, extension of Public Law 78. I do not intend to press the amendment at this time on this bill, which is for a 6-month extension, but ask unanimous consent to insert a statement at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR KENNETH B. KEATING ON H.R. 12759

Although I favor making certain changes in Public Law 78, I join with many of my colleagues who are at this time willing to permit this act to be extended for 6 months with no changes. However, I want to make it clear that I favor some changes along the lines of the amendment which I sent to the desk yesterday. I intend to join with those who have expressed reservations about this bill to see to it that it is significantly revised when this 6-month extension expires and it is again before us for action.

Section 503 of Public Law 78 relating to Mexican farm labor states that no Mexican worker shall be available for employment in any area unless the Secretary of Labor has determined and certified that (1) sufficient domestic workers are not available, (2) the employment of Mexican workers will not adversely affect the wages and conditions of domestic workers and (3) "reasonable efforts have been made to attract domestic workers for such employment at wages and standard hours of work comparable to those offered to foreign workers."

This amendment strikes the words "wages and standards hours of work comparable to those offered to foreign workers" which appears in the third proviso above. It inserts in lieu thereof the words "terms and conditions of employment at least equal to those offered to foreign workers." The net effect of this amendment would be to strengthen the intent and tone of this statute with respect to avoiding having the employment of Mexican farm workers undermine employment conditions for domestic farm workers. The Secretary already has been given such power. My amendment would simply say that instead of saying that conditions are comparable, he should see to it that conditions of domestic workers in areas where they compete with Mexican workers are "at least equal" to those for Mexicans. It seems to me that this is only fair, that Americans should receive the same protection under the law as do aliens.

Mr. CHAVEZ. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. CHAVEZ. Mr. President, while there is quite a group of Senators present, I want to say something about Mexican labor. The average farmer, whether he is in the Southwest or New York or Michigan, could not harvest his crop without Mexican labor. There is an understanding between the Mexican Government and the American Government on the matter. Our boys do not do such work any more. In my State, and the Senator from Arizona knows it is true in his, local boys will not pull those large sacks of cotton any more. In order to harvest cotton, we must have Mexican labor. This bill would extend the act for 6 months.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The committee amendment was agreed to.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. McCARTHY. Mr. President, I regret that the proposed legislation has come before the Senate at this late hour. The question of Mexican migrant labor has been of concern to the Congress ever since it was initiated in World War II. Year after year it is presented as temporary and emergency legislation.

Congress has given a great deal of attention to it, but has never succeeded very much in working out a satisfactory solution. Last year the President set up a special commission. The Mexican farm labor consultants' report was filed in February 1959. Congress had enough time to give adequate consideration to its recommendations, and, according to the Secretary of Labor, no such adequate attention has been given or been paid to the recommendations of these consultants.

I have in my hand a letter dated July 20, 1960, from the Secretary of Labor. Let me note again the date, July 20, 1960. The letter is over the signature of the Secretary of Labor, and these words are contained in that letter:

> On the basis of the evidence available to the Department of Labor, we subscribe to the recommendations of the consultants against any extension of the program without a strengthening of the protections for domestic employment.

Let me repeat that sentence:

> On the basis of the evidence available to the Department of Labor, we subscribe to the recommendations of the consultants against any extension of the program without a strengthening of the protections for domestic employment.

This bill is a simple extension; it provides no protection for domestic workers.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. McCARTHY. I yield.

Mr. HOLLAND. This matter was discussed at a rather fully attended meeting of the Committee on Agriculture and Forestry. There is a grave difference of opinion between the membership as to the wisdom of a general or lengthy extention of this legislation; but all of us, in consideration of the lateness of the hour—and this just came up at our last meeting—and in consideration of the fact that farmers in the area affected who cannot harvest their crops in the months from January to June, but, instead, have to plant them in the early part of the year and harvest and market them later are entitled to some consideration, and in further consideration of the fact that the matter will have to be reexamined and restudied and some law enacted on the subject matter next year, or else there will be no law remaining, we felt that the really decent thing to do for the people involved would be to adopt a simple 6 months' extension.

It was simply impossible, in the short time remaining, to work out the details.

I think I am stating the matter fairly when I say that even those who agree most fully with the distinguished Senator from Minnesota that some changes are required in the act—and there are some on our committee—felt the fair thing to do was to have a 6-month extension. I am sure the able chairman of the committee will bear out my statement in this regard.

Mr. ELLENDER. Mr. President——

Mr. McCARTHY. I yield to the Senator from Louisiana.

Mr. ELLENDER. As passed by the House, this bill would extend the Mexican farm labor program for 2 years, until June 30, 1963. The Senate Committee on Agriculture and Forestry, in reporting on this bill, recommended an amendment limiting the extension to 6 months, that is, until December 31, 1961.

The House Committee on Agriculture held hearings on a number of bills to extend this program in March of this year. There is a considerable demand for extension of this program among agricultural producers. They say they need this labor in order to produce their crops and that there is not an adequate supply of domestic agricultural workers at the right time and place that is willing to do the type of stoop labor and other work that the Mexicans are anxious to obtain.

On the other hand, some of the witnesses felt that some changes should be made in the program when it is extended. Last year, the Secretary of Labor appointed a committee of consultants to study the program. They reported that:

> The committee has concluded that, on balance, the case in favor of renewing Public Law 78 on a temporary basis is more conclusive than the arguments against its renewal.

The committee of consultants further reported:

> The committee's support of a temporary renewal of Public Law 78 is conditioned on its being substantially amended.

The substance of the consultants' recommendations was incorporated in the McGovern bill, H.R. 11211, which was rejected by the House Committee on Agriculture, and in the Fogarty amendment to H.R. 12759, which was rejected by the House on a division vote of 51 to 138. Both of the Senators from Minnesota, together with a number of other Senators, introduced in the Senate a bill, S. 3666, which is identical in substance to the Fogarty amendment. The Department of Labor recommended that no action be taken on S. 3666 this year or H.R. 12759, because of the need for examining carefully the questions raised. The Department of Agriculture also recommended against consideration of either bill this year, indicating that it believes no changes in the program are necessary.

The authority for the program was enacted in 1951. It has been extended from time to time and expires June 30, 1961. After that date, no workers may be made available under it. June 30 falls in the midst of the period when these workers are most needed. In order to make their production plans and obtain financing, the producers must know now whether workers will be available to harvest the crop next year. The Department of Labor states that its consultants' recommendations require further consideration. The Department of Agriculture indicates that it may be opposed to them after considering them further. It is obvious that the bill needs extension immediately, at least to cover the entire producing period in 1961, and that such extension cannot wait until the executive departments have determined what proposals for changes they wish to make. Extension through 1961 will provide full opportunity for careful consideration next year of any proposed changes.

When the proposal came before the committee there was much objection to the extension of the act for 2 years. One of the chief opponents of the extension for 2 years was my good friend from Minnesota [Mr. HUMPHREY] who does not happen to be present tonight.

With the understanding that the extension would be for 6 months only, the opposition which was in the committee was withdrawn. As I understood the proposal, there would be no serious objection to the extension of the act for 6 months if the committee next year were to take up the proposal to extend it for a longer period of time, taking into consideration the suggestions made by members of the committee, or the studies made and recently referred to by my good friend from Minnesota.

It is my hope, as pointed out by the distinguished Senator from Florida and by other Senators, that the law as it now exists will be extended 6 months until December 31, 1961. It would not be proper for the law to expire in the midst of a harvest. That is what prompted the committee to agree to extend the act for 6 additional months, in the hope that next year those who now propose amendments will have an ample opportunity to present the amendments before the committee.

I give assurance that if I am elected, and if I remain the chairman of the Committee on Agriculture and Forestry, we shall take up the proposal next year and give full hearings to all the amendments which I understand may be proposed tonight.

I express the hope that the amendments will not be offered, Mr. President, but that we can extend the act for 6 months without further amendment.

Mr. McCARTHY. I say to the Senator that the effect of extending the act for 6 months is to extend it for another year. I should like to ask the distinguished chairman of the Committee on Agriculture and Forestry whether any hearings were held this year before the Committee on Agriculture and Forestry of the Senate on this question.

Mr. ELLENDER. No; not to my knowledge. We have a subcommittee in charge of the bill, but it did not hold hearings on this bill. The House held hearings.

Mr. McCARTHY. The Senate did not give any consideration to this problem, even though the committee knew the act was to expire in June and knew that if the act were not extended the farmers would be embarrassed because they could not plan for the full year?

Mr. ELLENDER. I will say to my good friend that we have divided our

committee into four separate subcommittees. The colleague of the distinguished Senator, the Senator from Minnesota [Mr. HUMPHREY], is chairman of the subcommittee which deals with the farm labor situation. We were depending on the hearings held by the House. For that reason, hearings were not held by the Senate committee. It was felt the hearings held before the House were sufficient.

Mr. McCARTHY. If the hearings were sufficient, then why did the Senate Committee wait to act? When did the Senate Committee on Agriculture and Forestry act on the bill? Was it last week?

Mr. ELLENDER. Last Tuesday, August 23.

Mr. McCARTHY. Last Tuesday. That did not give the members of the Senate much time to work on the bill, in case Senators desired to offer amendments. Obviously, the bill came to us only in the press of the closing days of this session of Congress.

Mr. ELLENDER. The House passed the bill on June 29, and it came to us on June 30 and was immediately referred to the subcommittee headed by my good friend from Minnesota [Mr. HUMPHREY].

The PRESIDING OFFICER. The Senator from Arizona has the floor.

Mr. HAYDEN. Mr. President, I yield to the Senator from Vermont.

Mr. AIKEN. Mr. President, I have heard from both sides of the controversy. I have heard from the farmers in California and in the Southwest States who are worrying about planting their crops between now and next July. I sympathize with their plight. I believe I understand it. I have also heard from the Department of Labor. We have had communications from the Department of Agriculture.

We have heard from others who think we ought not to renew this program at this time, until there is a better device for protecting domestic labor.

I happen to come from a part of the country which, through the harvest season, gets additional labor not from Canada as we used to, but from the State of my good friend from Florida [Mr. HOLLAND]. These laborers come north for the fall, and they combine good work, which they like to do, with a sort of a vacation.

I think that a good solution to the problem would be to pass this proposed legislation, which will extend the program for 6 months, to take care of the coming work on next year's crops, and not ask for a conference.

There is grave fear that if we go into a conference with the House, the Senate, as is sometimes the case, will get the short end of it, and if we seek to extend the act for 2 years or 1½ years, there is a probability there will be no legislation at all.

We need this proposed legislation to complete harvesting of next year's crops. It seems to me such a course would represent the best solution to the problem.

Mr. JAVITS. Mr. President, will the Senator yield to me?

Mr. HAYDEN. I yield.

Mr. JAVITS. I am on the committee on Labor and Public Welfare. I am very interested in the subject of labor. I should like to support the Senator from Vermont.

Mr. President, I have an amendment which is designed to quiet a lot of litigation, in situations in which the Secretary of Labor has been engaged in litigation because there are no criteria in the act which is being extended. The effort of my amendment would be to establish necessary criteria.

I understand this is a difficult and trying problem, upon which people would wish to be heard on both sides, as to the complications in the amendment, although I think its adoption is justified.

I agree with the Senator from Vermont. I think, with the kind of attention which is fixed upon the proposal now, if the bill should be allowed to pass without amendment we can get action. Would the Senator accept instructions to conferees? We do not need that. The Senator from Arizona can tell us. We all love him dearly. Would the conferees bring us back a 6-month extension, or nothing at all? I should like to agree with the Senator from Vermont.

Mr. HAYDEN. I guarantee either the House will accept this extension or there will be no law.

Mr. JAVITS. I hope my colleagues, who are as interested as I, have heard this statement.

Mr. McCARTHY. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. McCARTHY. Is it agreeable to the Senator from New York to accept this?

Mr. JAVITS. It is acceptable to me on the basis outlined by the Senator from Vermont, with the assurance that seasonably, in the next session, we shall really have a go-round on these very grave difficulties which have arisen with respect to the act, that the Secretary of Labor shall have a full opportunity to be heard, and so shall we. On those understandings, knowing as we do that the Senator from Arizona would never reply this way if it were not so, I would say we ought to go along at this point.

Mr. WILLIAMS of New Jersey. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. WILLIAMS of New Jersey. I certainly share the views of my friend from New York. We have a deep interest in seeing that, while we have a program of bringing workers from Mexico, our own domestic workers are properly treated.

Mr. HAYDEN. I have no disagreement in principle with the Senator, at all.

Mr. WILLIAMS of New Jersey. I realize that. We have several amendments we are prepared to offer. With the understanding that certainly this will be simply an extender of 6 months, I shall not offer the amendments I had intended to offer. I join the Senator from New York, and I believe the Senator from Minnesota, in expressing the hope that at an early time these proposals will be considered by the committee.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield to the Senator from Montana.

Mr. MANSFIELD. On the basis of the discussion held and the assurances given by the chairman of the Committee on Agriculture and Forestry, the Senator from Louisiana [Mr. ELLENDER]; the senior ranking member of the minority party on the Committee on Agriculture and Forestry, the Senator from Vermont [Mr. AIKEN]; and the sponsor of the resolution, the Senator from Arizona [Mr. HAYDEN]; we have about as absolute a guarantee as could be given to anyone. I urge the passage of the measure.

Mr. McCARTHY. Mr. President, I ask unanimous consent that some remarks of mine may be printed in the RECORD at this point.

There being no objection, the statement and letters were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MCCARTHY

Those of us who have been interested in improving the conditions of migratory workers have agreed to the 6-month extension of Public Law 78, in order that the next Congress can have an opportunity to make a thorough study and revision of the Mexican farm labor program.

The program has always been presented to the Congress as a temporary measure to relieve a shortage of seasonal agricultural workers. In fact, however, the program has expanded greatly, with the number of Mexican nationals increasing until now almost a half-million are brought in yearly under contract.

The program has also been based upon the principle that the use of this service shall not have an adverse effect upon the employment opportunities, the wages and the working conditions of domestic migratory laborers.

The most serious charge against the operation of Public Law 78 is that it has resulted in lower wages and worse working conditions for domestic workers. A large number of social and religious groups have been concerned. So has the Department of Labor, which has the responsibility for the administration of the program. A special group of consultants appointed by the administration to study the Mexican farm labor program came to a unanimous agreement that it had several adverse effects upon domestic workers and they opposed extension of the program without a number of changes which would safeguard the rights of domestic agricultural workers.

The position of the Department of Labor is expressed in the letter from the Secretary of Labor, Mr. Mitchell:

U.S. DEPARTMENT OF LABOR,
OFFICE OF THE SECRETARY,
Washington, D.C., July 20, 1960.

The Honorable ALLEN J. ELLENDER,
Chairman, Committee on Agriculture and Forestry, U.S. Senate, Washington, D.C.

DEAR SENATOR ELLENDER: This is in further response to your request for our comments on S. 3666, a bill "To amend title V of the Agricultural Act of 1949, as amended, to provide protection for the employment opportunities of domestic agricultural workers in the United States, and for other purposes."

In extending for 2 years the program for recruitment of Mexican nationals for agricultural employment in the United States the bill would tighten in several respects the conditions under which such workers could be used. Mexican nationals could be used only in seasonal or unskilled employment. In addition, S. 3666 would require independ-

ent and direct employer efforts to recruit domestic workers, not only at the same wages and hours of work as those offered the Mexican workers but also at the other terms and conditions of employment as those offered the foreign workers. The measure would also require employers to pay domestic workers already in their employ at wage rates no less favorable than those required to be paid the Mexican workers. The Secretary of Labor would be given specific authority to regulate the number of Mexican workers available for any employer, to establish criteria for determining whether the employment of such workers is adversely affecting the working conditions or employment opportunities of domestic farmworkers, and to issue necessary rules and regulations.

The Department of Labor is concerned that the continued wide-scale use of Mexican nationals, approximately 450,000 annually, in agricultural employment in this country may not be in the best interests of U.S. agricultural workers and employers. For this reason the Secretary of Labor in 1959 had an independent study made of the Mexican labor program. The unanimous conclusion of the consultants, representing varying points of view, conducting the study was that there are indications that in some cases the use of Mexican workers is having an adverse effect upon the wages, working conditions, and employment opportunities of our own agricultural workers. They recommend that there be no extension of the program unless adequate remedial amendments are adopted.

On the basis of evidence available to the Department of Labor, we subscribe to the recommendation of the consultants against any extension of the program without a strengthening of protections for domestic employment. However, because of the need for examining carefully questions raised with respect to the wisdom of specific proposals to strengthen the program in the best interests of United States farmworkers and employers, we recommend that no action be taken this year either to extend or amend the Mexican labor program. The program does not expire until June 30, 1961, so that full consideration can be given to the matter in the next session of Congress.

The Bureau of the budget advises that it has no objection to the submission of this report.

Sincerely yours,

JAMES T. MITCHELL,
Secretary of Labor.

I should also like to include several statements and letters which indicate the opposition and reservations which individuals and groups have about Public Law 78.

The first is a statement presented by Rev. Shirley E. Greene at the hearings held by the Committee on Agriculture of the House of Representatives. Reverend Greene appeared in behalf of the National Council of Churches of Christ in the U.S.A. He stated:

"As a result of this long and intimate contact with migratory workers and their families and this continuing study of what is needed to accord them a measure of justice commensurate with the vital service they render to every food-consuming person in the Nation, the council's general board adopted on February 25, 1960, a resolution bearing upon the Mexican worker importation program. This I will quote in full since it sums up the position of the council on the primary subject of the session here today.

"The statement is titled 'The Future of the Mexican Agricultural Worker Importation Program (Public Law 78, 82d Cong.).' It reads as follows:

" 'Whereas Public Law 78 (82d Cong.) providing for the importation of Mexican nationals for agricultural labor in the United States involves human and ethical issues of grave concern to the conscience of Christian people; namely,

" '(a) The importation program has injurious effects on the family and community life both of the Mexican nationals who are imported and on the domestic workers who, because of the presence of Mexican nationals, are deprived of employment or find it necessary to migrate in search of employment;

" '(b) Importation tends to produce a labor surplus thereby depressing wages and labor standards for domestic agricultural workers; and even if the United States has failed to make the necessary adjustments to enable all farmers to secure an equitable share of the national income there is no moral justification for perpetuation of substandard wages for agricultural labor;

" 'Whereas the general board of the National Council of Churches has, from time to time, adopted policy positions which are relevant to this situation: Therefore be it

" '*Resolved*, That the General Board of the National Council of the Churches of Christ in the U.S.A. is opposed to the extension of Public Law 78 (82d Cong.) in its present form; but, to avoid hardships on employers and workers who have come to rely on this program, we approve the extension of the farm labor importation program (Public Law 78) in amended form for a temporary period with a specific date of final termination and with definite provisions for annual reductions in volume written into the act; and furthermore

" 'Even for this period of transition, we recommend that amendments be adopted designed to bring about the following improvements in the legislation:

" '(a) Limitation of the program to temporary labor shortage situations and to unskilled, nonmachine jobs;

" '(b) Assurance that diligent efforts have been made by both employers and the Bureau of Employment Security of the Department of Labor to recruit domestic labor at a wage adequate for health and welfare before any certification of need for Mexican nationals is made by the Department;

" '(c) Removal of the "certification of need" procedures as fully as possible from undue local pressure by growers;

" '(d) Determination of prevailing wage rates for Mexican nationals by the Department of Labor at a level that will not depress wages which might be offered domestic workers or prevent their seeking such employment;

" '(e) Inclusion in the law of specific provisions with respect to promulgations of rules and regulations by the Secretary of Labor which will insure observance of the intent of the law; and adequate provision for enforcement including authorization of sufficient inspection and enforcement personnel, and appropriate penalties for violation;

" '(f) Establishment of an appeal procedure available to growers or workers where findings of violation are made; and, be it further

" '*Resolved*, That in taking this position we recognize that certain other aspects of our national policy are intertwined with the operations of the Mexican importation program and that we recognize that a responsible policy which provides for early termination of that program must also come to grips with the following related issues:

" '(a) The necessity of providing adequate enforcement of the immigration laws on the Mexican border to prevent resurgence of the vast influx of so-called wetbacks of a few years ago and strict interpretation of the provisions of the immigration laws so as to prevent circumvention of the termination of the Mexican importation program;

" '(b) The readiness of the U.S. Government to develop, with the Mexican Government, such programs of economic and technical aid as may be required at least to offset any injury the Mexican economy may suffer from the termination of the Mexican importation program; and be it further

" '*Resolved*, That the general board authorize representatives of the National Council of Churches to testify at hearings in respect to Public Law 78 (82d Cong.) along lines indicated above.' "

Another critic of Public Law 78 is Archbishop Robert E. Lucey, of San Antonio, who was one of the five members of President Truman's Commission on Migratory Labor in 1951.

A recent address of his is reported in the press as follows:

"CALLS FARM LABOR IMPORT A 'RACKET'

"ST. LOUIS.—A leading church authority on farm problems has condemned the 'powerful growers who perpetuate the ghastly international racket (of Mexican farm labor import) against the demands of public opinion and against the conscience of our people.'

"Archbishop Robert E. Lucey, of San Antonio, told a gathering here that his remarks were not intended as a universal indictment of all farmers. He noted that 'this bracero (Mexican farmworker) program has struck a deadly blow at small farmers and farmworkers.'

"Archbishop Lucey, executive chairman of the Bishops Committee for the Spanish Speaking, addressed his remarks to the 10th annual meeting of the committee. The archbishop has been an outspoken critic of Public Law 78, which authorizes the importing of bracero labor for agricultural work in the United States and is based on treaties with Mexico.

"The archbishop also lashed out at 'those Members of Congress who stand in fear and trembling before the organized might of the farm bloc ready always to vote for the strong against the weak.'

"Also taking to task certain State legislators, the San Antonio churchman said that 'in a democracy we must expect to find some legislators who are little men in large assignments; who will not risk their tenure of office for justice' sake; who see in special privileges for the strong and misery for the weak a mandate from their constituents.'

"Coming back to the large growers, he said that the large corporation farm gets its labor cheap whether the workers are Mexican nationals or domestic migrants. 'This means,' he stated, 'that the toil of the small farmer has no greater value in the market than the work of the underpaid and exploited migratory worker.'

"The archbishop cited the willingness of some growers and organized farmers to seek justice, but he said that despite their good will, the system needs revamping.

"The archbishop suggested that his listeners put themselves in the place of the large growers so that 'we can see how logical it is [for them] to demand the indefinite continuation of the bracero program.' He added:

" 'Think how helpful it is to growers to flood the labor market with half a million aliens. This causes unemployment among citizen workers, depresses farm wages, makes labor unions impossible, puts the family-size farm in a bad way, and gives employers an abundance of cheap, docile laborers,' he said."

I include also some of the letters which I have received concerning the proposed extension of Public Law 78 and which indicate, I believe, the concern of members of many groups about this program. This testimony reinforces the need for the next Congress to take sufficient time to reevaluate and revise the Mexican farm labor program.

WASHINGTON, D.C.,
August 25, 1960.

DEAR SENATOR: We urge you to recommit H.R. 12759 to the Senate Agriculture Committee and instruct the committee to hold hearings on this matter in 1961. The bill, as reported, would extend the Mexican farm

labor importation program for an extra 6 months, or until December 31, 1961.

We recommend postponement because many questions have been raised as to the social costs of the present program; these questions have not yet been considered by the committee in public hearings. Such hearings could easily be held next spring, since the present program is not scheduled to expire until June 1961.

H.R. 12759 as reported, is particularly inadequate in that it does not authorize the Secretary of Labor to determine the need and set standards for the employment of Mexican workers. This authorization was recommended last year by a distinguished group of impartial consultants to the Secretary of Labor.

We believe that such authorization is absolutely essential since the mass importation of Mexican farm labor without adequate regulation of wage rates and working conditions has far-reaching adverse effects on American farmworkers and family farms—segments of our economy already in serious distress.

Sincerely yours,

E. RAYMOND WILSON.

AUGUST 25, 1960.

DEAR SENATOR MCCARTHY: We understand that a bill to extend Public Law 78, which governs the importation of Mexican farmworkers, may come to the floor of the Senate during this special session. A bill to extend the program was passed by the House in June after prolonged debate. This bill, H.R. 12759, was recently voted out by the Senate Agriculture Committee.

We urge you to vote against this bill for two reasons. The program seriously undermines the wages and employment opportunities of domestic farmworkers. It is well known that they are the lowest paid, least protected and most underemployed section of our labor force. To continue the importation of low-cost foreign labor can only further depress the conditions of these workers.

Furthermore, Public Law 78 does not expire until June 30, 1961, so there is no need for hasty action at this time. A number of important measures are still pending Senate action and these should certainly have priority over a program which continues in effect until months after the convening of the 87th Congress.

As you know, Public Law 78 has been the object of widespread and thorough-going criticism. The Secretary of Labor, who administers the program, recommends against action at this time, and a committee of distinguished consultants whom he appointed to study the program has urged that it not be continued unless certain safeguards were added to protect the wages and job opportunities of American farmworkers. These safeguards have not been added. Nor has any Senate committee held hearings on this bill. We feel sure you agree that such a controversial measure should not be acted upon until such hearings can be conducted.

The enclosed New York Times editorial, which was written about an earlier bill to extend Public Law 78, declares: "The Gathings bill [now the Sisk bill, H.R. 12759] should be decisively defeated and public support given unstintingly to measures designed to protect and improve the recruitment, wages and working conditions of domestic agricultural workers."

Sincerely yours,

ELIOT D. PRATT,
Secretary Treasurer.

IMPORTED MEXICAN LABOR

The time has come for the Nation to consider the termination of the iniquitous Mexican farm labor importation program authorized by Public Law 78. Under it some half million "braceros" are brought into this country every year to harvest crops, with shockingly low wages and poor working conditions, and in competition with domestic farm labor.

Public Law 78 is due to expire next year, but the Gathings bill (H.R. 12176), approved by a reactionary Republican and Southern Democratic majority of the House Agriculture Committee, would extend its life for 2 years more. It would also take away certain powers which the Secretary of Labor now has to protect domestic farmworkers recruited through the U.S. Employment Service.

A countermeasure, however—the McGovern bill (H.R. 11211)—will be introduced when the Gathings bill reaches the floor of the House. It provides for the termination by stages of the Mexican labor program over a 5-year period, and during that time it would amplify and make more specific certain ambiguous and ineffectual provisions of Public Law 78 designed to give protection to American farm labor from unfair Mexican competition.

The Gathings bill should be decisively defeated and public support given unstintingly to measures designed to protect and improve the recruitment, wages, and working conditions of domestic agricultural workers.

AUGUST 24, 1960.

HON. EUGENE J. MCCARTHY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MCCARTHY: We would like to ask your opposition to a bill which was just reported by the Senate Agriculture Committee and will soon be before the Senate. The bill is, H.R. 12759, which was reported without the committee holding any hearings. It provides for the extension of the Mexican farm labor importation program, Public Law 78, for 6 months after its current expiration date of June 30, 1961.

This proposal would continue without reform the mass farm labor importation program which has caused depressed wages, unemployment, and underemployment among American farmworkers. The 6-month extension may be a maneuver to gain a much longer extension in the Senate-House conference since the House of Representatives has already passed a bill providing for a 2-year extension.

As a consumer organization we are particularly indignant at the defense often made for this shocking program that the consumer gains from it because it provides low prices for food. We cannot and do not subscribe to this theory. No consumer wishes cheap food at the price of the exploitation of fellow human beings. As consumers and taxpayers we resent the fact that some 60 percent of the imported Mexicans are employed to plant and harvest crops which are in surplus, such as cotton. Our tax funds are then used to support the falling prices of the overproduced commodity. This is sheer economic waste and havoc.

We urge you to oppose H.R. 12759. This bill has been subjected to no public hearings in the Senate although it deals with a law which does not expire for another year. We feel that the operation of this law is so objectionable that it should be thoroughly studied by the appropriate Senate committee before any action is taken.

Sincerely yours,

VERA MAYER,
General Secretary,
National Consumers League.

NATIONAL CATHOLIC RURAL LIFE CONFERENCE,
Des Moines, Iowa, August 24, 1960.

The Honorable EUGENE J. MCCARTHY,
The U.S. Senate,
Washington, D.C.

DEAR SENATOR MCCARTHY: Our organization reiterates its opposition to the extending of Public Law 78 as provided by the Sisk bill (H.R. 12759). We urge that the Senate postpone legislative action in this matter until 1961 at which time it can be considered with fewer political overtones.

Sincerely,

EDWARD W. O'ROURKE,
Executive Director.

AMALGAMATED MEAT CUTTERS AND BUTCHER WORKMEN OF NORTH AMERICA,
Chicago, Ill., August 24, 1960.

The Honorable EUGENE J. MCCARTHY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MCCARTHY: The Agriculture Committee has reported a bill extending the Mexican farm labor importation program for 6 months beyond its expiration date on June 30, 1961. It approved H.R. 12759 without providing any opportunity for witnesses to be heard—even though this legislation is highly controversial and even though a rival bill, S. 3666, was pending before the committee.

The 6 months extension may sound moderate. But it can actually be the vehicle for a 2-year extension by the Senate-House conference since the House of Representatives passed a 2-year extension.

The Mexican farm labor importation seriously hurts the American farmworker and the American family farmer. The nearly half-million Mexican braceros imported each year provide a surplus of farm labor, so that the already abysmal wages of farmworkers can be kept at their present low level, or even depressed further. The cheap labor importation also provides the means for large corporation farms, mainly in five States, to have still another unfair competitive advantage over family farms.

Last year, a group of distinguished consultants—including former U.S. Senator Edward Thye, a clergyman, a university chancellor, and a Texas migrant labor official—studied this program for a half year. They unanimously concluded that it should not be renewed without major reform to provide more protection to American farmworkers against the low-wage foreign competition. The reforms they suggested are contained in S. 3666. Yet the Agriculture Committee did not even hold hearings on this legislation or H.R. 12759.

Since the labor importation program does not expire until the middle of next year, we urge that hearings be held next year. We therefore appeal to you to oppose H.R. 12759.

Sincerely yours,

THOMAS J. LLOYD.
PATRICK E. GORMAN.

NATIONAL FARMERS UNION,
August 24, 1960.

DEAR SENATOR: Considering the need for a farm income stabilization and supply management program for farmers and relating such need to the hours, wages and working conditions of hired farm labor, Farmers Union supports the view that farm workers ought to be afforded the same rights under Federal law as other workers and that these rights should be enforced by the same agency of Government.

Under present farm labor programs and existing law concerning hired farmworkers, the above policy will not be realized. Farmers Union, therefore, respectfully requests your opposition to H.R. 12759 to extend the Mexican farm labor program. Its enactment will continue to subject American family-farm operators and their wives and children to subsidized unfair competition from industrialized factory-type agricultural enterprises employing and exploiting workers with grossly inadequate wage rates, working and living conditions.

Sincerely,

JAMES G. PATTON,
President.

INDUSTRIAL UNION DEPARTMENT,
Washington, D.C., August 24, 1960.

Hon. EUGENE J. MCCARTHY,
U.S. Senate, Washington, D.C.

DEAR SENATOR MCCARTHY: We are strongly opposed to the passage of H.R. 12759, the bill extending the Mexican farm labor importation program. This bill was approved yesterday by the Senate Committee on Agriculture without hearings on it or on Senator MCCARTHY's pending bill S. 3666, which is concerned with the same program.

H.R. 12759 would continue the Mexican labor importation program without reforms of any kind, despite ample evidence that the importation of almost half a million Mexican workers each year has been a major factor in depressing the wages and preventing improvements in the working conditions of farm workers.

In 1958, the average American farm worker earned only $761 at farm work. He was able to get farm work only 128 days in the entire year. Such conditions are indefensible in the face of clear evidence that the mass importation of cheap foreign workers is a major contributing factor.

Moreover, this program continues to place the American family farmer in jeopardy. The big farm operators who use most of this cheap labor gain an unfair competitive advantage over the family farmer who hires little or no labor. (Only 50,000 farmers in the Nation use Mexican labor—a tiny fraction of all our farmers.) The availability of this cheap labor has driven many small farmers out of tomato growing, and has contributed to the accumulation of farm surpluses and the reduction in farm income.

There is a great need for reform of the Mexican farm labor program, reforms recommended by many individuals and groups including Secretary of Labor Mitchell, who administers the program, and his distinguished advisory committee.

Specific suggestions for reforms have been spelled out in S. 3666. Before this program is extended for any period, we urge that full hearings be held and that these suggested reforms, which we support, be given due consideration.

The present law does not expire until June 30, 1961. We urge you to oppose H.R. 12759, and that no action be taken on this program until next year.

Sincerely,

JACOB CLAYMAN,
Administrative Director.

AMERICAN FEDERATION
OF LABOR AND CONGRESS
OF INDUSTRIAL ORGANIZATIONS,
Stockton, Calif., August 26, 1960.

Senator EUGENE J. MCCARTHY,
Senate Office Building,
Washington, D.C.

DEAR SENATOR: The Senate Agriculture Committee has reported favorably a bill, H.R. 12759, which would reextend without change the program under which contract workers are imported from Mexico into U.S. agriculture. This bill may reach the floor of the Senate within a matter of a very few days.

H.R. 12759 has not received hearings in the Senate. Hearings in the House revealed vigorous and reasoned opposition from scores of religious, civic, labor, veterans, consumer, and governmental agencies and organizations. The only support for the bill springs from the employers of foreign contract labor. It is understandable that they should wish the extension of this uniquely preferential legislation. But it must be remembered that the Mexican national program, functioning under Public Law 78, profoundly affects the lives of millions of Americans aside from the 50,000 growers who employ this peculiar class of labor. H.R. 12759, which proposes to extend the bracero program in its present form, therefore becomes a matter of grave public importance. We do not have space here to develop the many reasons we feel action on H.R. 12759 is fateful to millions of our citizens. We hope you will have the opportunity to examine the record of the House hearings (March 22–31, 1960). The record reveals that Public Law 78 adversely affects American farmworkers and their families; Americans of Mexican ancestry; America's working farmers and their families; and others.

It is difficult to conceive that the Senate of the United States should consider the retention of legislation which harms so many Americans and helps so few. It is even less conceivable the Senate should act on so serious a matter without adequate discussion and reflection. We therefore specifically urge that you vote to refer H.R. 12759 back to committee when it comes to the floor. We trust that when the 87th Congress convenes in January 1961, the entire question of foreign contract labor—tied in as it is with larger questions of the farm labor market, which in turn are tied in with the question of general farm policy—will receive the careful attention it, and the Nation, deserve.

Sincerely yours,

NORMAN SMITH,
Director, Agricultural Workers
Organizing Committee, AFL–CIO.

AMERICAN FEDERATION OF
LABOR AND CONGRESS OF
INDUSTRIAL ORGANIZATIONS,
Washington, D.C., August 26, 1960.

DEAR SENATOR: A bill which would greatly harm the American farmworker and family farmer has been reported by the Agriculture Committee without hearings. The measure is H.R. 12759, which would extend the Mexican farm labor importation program.

The AFL–CIO is unalterably opposed to this bill. We believe that thorough hearings should be held on this highly controversial subject before the Senate is asked to take action. Since Public Law 78, which governs the Mexican farm labor importation program, does not expire until June 30, 1961, there will be ample time for hearings early next year and for the Senate to act. We therefore urge that you oppose H.R. 12759 and that no action be taken this session on this bill.

The Mexican farm labor program has been a major factor in depressing agricultural wages. The 2,300,000 American farmworkers averaged $761 for their farmwork in all of 1958. They were able to obtain work for only 128 days in the entire year. Yet under Public Law 78, nearly a half-million Mexican farmworkers are imported into the United States each year to worsen terrible conditions of poverty and underemployment among American workers.

The family farmer, the overwhelming majority of whom use little or no hired labor, cannot compete against the cheap labor imported under Public Law 78. The Mexican labor importation program, by depressing wages on corporation farms, provides another means for driving small farmers out of existence.

For these reasons, we urge your opposition to H.R. 12759.

Sincerely yours,

ANDREW J. BIEMILLER,
Director, Department of Legislation.

AMERICAN VETERANS COMMITTEE,
Washington, D.C., August 25, 1960.

DEAR SENATOR: H.R. 12759, an extension of the Mexican Labor Import Act, Public Law 78, has cleared the Senate Agricultural Committee.

This bill has had no Senate hearings and the present law does not expire until next year. This bill is not as bad as the House bill, but it provides for no protection for American farmworkers. If this bill passes the Senate and goes to a conference committee, the chances of worsening the legislation are great.

Congress came back this session to act on several "must" pieces of legislation. Apparently, much of this "must" legislation will not receive favorable action. It would be extremely disappointing if the Senate should spend its time adopting a bad piece of legislation which extends an act that is not scheduled to expire for another year, when for one reason or another it could not act on more important legislation.

We hope that H.R. 12759 does not get scheduled for full Senate consideration. If it does, we respectfully urge that you oppose its passage.

Thank you for your attention.

Sincerely,

J. ARNOLD FELDMAN,
Executive Direcor.

Mr. MCCARTHY. Mr. President, I accept the statements and the commitments made here in the Chamber with the understanding that we will remember this, and not have the same kind of situation a year from now as we have had all too often in the past. There was always the question of time running out and sympathy for the farmers who had to plant their vegetables. I think the time has come to show some sympathy for the workers, both the Mexicans who are imported into this country, and the Americans who are displaced and forced to move north to seek additional work, with all the concomitant results of displacement of families and economic disorganization that follows.

Mr. JAVITS. Mr. President, will the Senator from Arizona [Mr. HAYDEN] yield for one further suggestion? May I have the attention of the Senator from Minnesota [Mr. MCCARTHY]? I suggest to my colleagues that we have printed in the RECORD the amendments that we have proposed to offer as part of the remarks on this subject. Does the Senator feel that such procedure would be satisfactory?

Mr. HAYDEN. I have no objection. I suggest that the Senator proceed to have them printed in the RECORD together with the statement.

There being no objection, the amendments were ordered to be printed in the RECORD, as follows:

Mr. MCCARTHY's amendment:

At the end of the bill add a new section as follows:

"SEC. 2. The first sentence of section 503 of such Act is amended by striking out the word 'and' immediately preceding '(3)'; and by striking out the period at the end of such sentence and inserting in lieu thereof a comma and the following: 'and (4) no worker shall be supplied pursuant to the provisions of this title except for seasonal employment requiring no specialized skills.'"

Amendment of Mr. WILLIAMS of New Jersey:

At the end of the bill add a new section as follows:

"SEC. 2. Clause (3) of the first sentence of section 503 of such Act is amended to read as follows:

"'(3) reasonable efforts have been made to attract domestic workers for such employment, including independent and direct recruitment by the employer requesting foreign workers, at terms and conditions of employment comparable to those offered to foreign workers'."

Mr. MANSFIELD. Mr. President, I offer the amendment which I send to the desk and for which I ask immediate consideration.

The PRESIDING OFFICER. The Chair is advised of this parliamentary situation. By the action of the voice vote of the Senate in accepting the committee amendments, the amendments being in the form of a substitute for the bill would automatically rule out any additional amendments. Therefore the request will require unanimous consent.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the amendment be considered.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

Mr. JAVITS. Mr. President, may we hear the amendment?

The PRESIDING OFFICER. The amendment offered by the Senator from Montana will be stated.

The CHIEF CLERK. At the end of the bill it is proposed to add the following new section:

SEC. 6. Section 8e of the Agricultural Adjustment Act of 1933, as amended, and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended, is amended by inserting in the first sentence thereof after "grapefruit," the following: "shelled walnuts, dates with pits, dates with pits removed, and products made principally of dates,".

Mr. DIRKSEN. Mr. President, reserving the right to object—and the request is open to objection—I ask whether the proposed amendment relates to the Tariff Act and to the importation of dates, shelled walnuts, and other commodities that were recited therein?

Mr. MANSFIELD. Mr. President, in response to what the distinguished minority leader has asked, I wish to say that due to the fact that the Senator from California [Mr. ENGLE] was out of the Chamber temporarily, at his request I introduced this bill. He is now present and can explain it.

Mr. DIRKSEN. I still reserve objection. I will be glad to yield to the Senator from Vermont.

Mr. AIKEN. Mr. President, I might add that the opposition to the amendment from agencies of the Government might be classified as rather violent. My sympathies are with the producers. I am willing to say that now, but I would not wish to lose the bill by attaching the proposed amendment to it at this time.

Mr. ENGLE. I proposed only to offer the amendment on the assumption that it would be taken to conference. I understood that the chairman of the House Agriculture Committee would take this over.

Mr. MANSFIELD. Mr. President, I withdraw the amendment.

THE MEXICAN FARM LABOR PROGRAM

Mr. GOLDWATER. Mr. President, I ask unanimous consent to have printed at the proper point in the RECORD, prior to the passage of House bill 12759, a statement I have prepared on that measure.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR GOLDWATER

H.R. 12759—BRACERO PROGRAM

As the law now stands, Public Law 78, the Mexican farm labor program, is scheduled to be terminated June 30, 1961. If legislation to extend this act is not enacted this session of Congress, large segments of the agricultural industry which have relied on these workers in the past will not be able to plan their operations to harvest the 1961 crop. This means that many growers in my State, particularly cotton people, will face a serious problem in planning for next year's crop; serious for several reasons, but particularly because lending institutions require that growers, as is the case with all other busierations and anticipated needs. A cotton farmer, for example, must be able to go to nessmen, be able to outline their future ophis banker this winter and outline for him next year's operations, or the loan needed to carry him through summer operations is going to be hard to get. The farmer, in other words, if he does not know what is going to happen to his labor supply in June, is going to be left in the lurch.

Supplementary factors to consider if this program is not extended beyond the June 30, 1961, date are:

1. The Department of Labor is going to have to plan ahead early in the year 1961 as to what to do with its employees in the field. This, of course, gets into the matter of termination of service and relocation.

2. The Department of Labor will be planning far ahead of June 30, 1961, as to where its field service people will be relocated. This means that reception centers for Mexican farmworkers will most likely be scheduled for closing June 30. It also means that recruitment programs in this area must be curtailed by June 30, 1961. Both the above considerations can be applied to State services working with the Department of Agriculture in this area.

3. Thirdly, there are budgetary provisions. The Department of Labor must plan in advance its budget requirements for administering the Bracero program. This planning, of course, must be done far in advance of June 30, 1961.

The House-passed version of H.R. 12759 would extend the Mexican farmworker program for 2 years. The Senate Agriculture Committee has reported out a bill to extend this program for only 6 months which will carry the program to December 31, 1961. The Department of Agriculture has reported that it feels it desirable that this program be extended beyond the termination date but wants action delayed until the next Congress. The Department of Labor has said flatly that it does not want this program extended until the Department is prepared to offer certain amendments to the program which the Secretary of Labor feels necessary to broaden his authority in this area.

The point is this; to my knowledge the Secretary of Labor has at this time presented no definite language or specific propositions as to how he would change this program. If the Secretary is prepared to make such recommendations by the next Congress, it is still doubtful that legislation in this area could clear through committees of both Houses and be passed by both Houses in time to continue this program without a substantial lag. This means that at the same time the Department would be taking steps to terminate the program, the Congress would be working with legislation to extend it. To the farmer who must have a reliable labor supply, this means that on June 30, he will probably lose his access to Mexican farm labor and with cotton crops to be harvested in my State during August and September, he is going to be just out of luck. It is for this reason that I ask that this program, if not extended for 2 years as the House has approved, certainly be extended until the end of 1961. This will keep the program from being broken off abruptly when the farmer most needs to count on this labor force. It will enable the Congress and the Departments of Labor and Agriculture to work out legislative changes, if any, felt to be necessary and which could then be smoothly implemented at the beginning of the year 1962. This will allow the farmer to continue planning his crops on a yearly basis with no midyear interruption.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill (H.R. 12759) was read the third time, and passed.

Mr. MOSS. Mr. President, I move that the Senate reconsider the vote by which the bill was passed.

Mr. DIRKSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

STATE ACQUISITION OF CERTAIN PUBLIC LANDS FOR RECREATIONAL USE

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 2757) to supplement the act of June 14, 1926, as amended, to permit any State to acquire certain public lands for recreational use, which was, on page 1, line 8, strike out all after "words" over through and including "thereafter;" in line 10, and insert "words 'or the State agency or any other agency having jurisdiction over the State park system of said State designated by the Governor of that State as its sole representative for acceptance of lands under this provision,'."

Mr. MOSS. Mr. President, I move that the Senate concur in the amendment of the House.

The PRESIDING OFFICER. The question is on the motion of the Senator from Utah.

Mr. ANDERSON. Mr. President, may we have an explanation of the amendment?

The CHIEF CLERK. On page 1, line 8, it is proposed to strike out all after "words" over through and including "thereafter;" in line 10, and insert "words 'or the State agency or any other agency having jurisdiction over the State park system of said State designated by the Governor of that State as its sole representative for acceptance of lands under this provision,'."

Mr. LAUSCHE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LAUSCHE. Has the amendment gone through the processes provided by the rules of the Senate?

The PRESIDING OFFICER. The amendment being a House amendment to a Senate bill, all the Senate is required to do is to act on the acceptance of the change.

Mr. LAUSCHE. The amendment is then properly before the Senate now?

The PRESIDING OFFICER. It is a privileged matter and is laid before the Senate.

Mr. DIRKSEN. Mr. President, I can get no detail as to whether the amendment was cleared with any minority member.

We would like to know who was consulted with respect to the bill and what appropriate committee would have had jurisdiction. This is a House bill, as I understand.

Mr. MOSS. No, it is a Senate bill reported from the Committee on Interior and Insular Affairs. I introduced the bill, which was passed with an amendment in the House this afternoon.

Mr. DIRKSEN. Who on this side of the aisle on the Interior and Insular Affairs Committee of the Senate has any knowledge of the bill?

Mr. BENNETT. Mr. President, may I respond to that question? I am not on the committee, but I am a coauthor of the bill. The bill is very important to those States that have a State park system. It is one of a series of bills through which over the last 2 or 3 years we have been working out the problems involved in setting up such systems. I hope the Senate will adopt the amendment. The amendment that came from the House is entirely satisfactory.

Mr. ANDERSON. Mr. President, will the Senator from Illinois yield?

Mr. DIRKSEN. I yield to the distinguished Senator from New Mexico.

Mr. ANDERSON. I think it is fine that the coauthors of the bill agree between themselves that the amendment is satisfactory. However, I do think it should be referred to a member of the Interior and Insular Affairs Committee.

I suggest that the Senator from Idaho [Mr. DWORSHAK] the ranking Republican member of that committee, has seen the amendment. I assure the Senator I have never seen it. I have no objection to the amendment, but I do not think this is quite the way to proceed.

Mr. DIRKSEN. Mr. President, it was represented to us a moment ago that the bill pass the Senate, and that all we are dealing with at the present time is a House amendment to a Senate bill. I wanted to be assured only that it had gone through the proper procedure, and that the amendment in which we are asked to concur is appropriate. We have the word of the distinguished Senator from Utah. I thought perhaps the distinguished Senator from Idaho might have some knowledge on this subject.

Mr. JOHNSON of Texas. Mr. President, I understand from the distinguished author of the bill that the House amendment is merely a restrictive amendment limited only to park lands, and I think we are making much to do about it. The Senators from Utah have no objection to it.

Mr. DIRKSEN. I am glad to accept the statement of the Senator from Utah, who is a coauthor and has some interest in the bill.

Mr. MOSS. Mr. President, I move that the Senate concur in the amendment of the House.

Mr. ANDERSON. Mr. President, will the Senator from Utah assure us that the bill and amendment would not in any way affect the situation at Dinosaur National Monument, Echo Park, or any of those installations?

Mr. MOSS. It has no connection at all or no bearing on that case.

Mr. ANDERSON. The Senator from Utah did a fine job in preparing the park bill. I only wanted to be sure that it did not get that measure confused.

Mr. LAUSCHE. I share the view of the Senator from New Mexico. Two sponsors of the bill tell us that the amendment is proper and acceptable. Has any member of the committee which has jurisdiction over the bill expressed an opinion about the propriety of the amendment?

Mr. JOHNSON of Texas. The author of the bill which has been passed by the Senate has expressed an opinion. The House merely added a restrictive amendment. The bill has already passed the Senate. The amendment is acceptable to the author of the bill, who is a member of the committee. The amendment is acceptable to the ranking minority member of the committee and to the ranking majority member of the committee, who was examined. It is acceptable to them. The Senate has already passed it without objection. The Senator from Utah is merely moving that the Senate concur in the simple amendment added by the House. It is a restrictive amendment, restricting the bill originally passed by the Senate.

The only mistake that was made was that the Senator from Utah did not check with the staff members at the desk. He understood it had been checked. The minority leader was within his rights to raise the question he raised because it should have been cleared with the staff. The ranking minority member has no objection. I hope the Senate will concur in the House amendment.

Mr. LAUSCHE. Mr. President, this is the first time in my life, in carrying the responsibility of casting my votes, that I have been called upon to sit by watching bills go through the mill. They have been bills about which I knew nothing. I do not contemplate tonight sitting here without knowing what is being passed by the Senate. I will raise objection to the consideration of any bill which under the rules of the Senate must go over. I feel embarrassed in this experience. I am sure there are other Senators also who have no familiarity with the many bills which have been rushed through the Senate. I do not propose any longer tonight to sit by watching the machine move and grind out bills, with some of them not going through the regular process, and my not knowing anything about them. I have no objection to the bill that has been discussed.

The PRESIDING OFFICER. The Chair advises the Senator from Ohio that this being an amendment of the House to a Senate bill, the bill need not go over.

Mr. LAUSCHE. Bills have gone through which have not been processed in conformity with the rules. I serve notice that I will raise objection to any bill being considered which must be held over for 1 day, or if the rules of the Senate have not been complied with in the processing.

Mr. JOHNSON of Texas. Obviously the Senator does not realize that this is a privileged matter. The only mistake the Senator from Utah made is that he did not check the bill with the minority leader. It is a privileged matter. There is no reason why the amendment should not be agreed to without discussion. The House amendment has been gone into by the committee. It has been accepted by the committee. I hope we can get action on the motion.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Utah [Mr. Moss].

Mr. LAUSCHE. I have just one more word to add. It is not more than a half hour since a Member of the House said to me, "You are getting a lot of cats and dogs." I am not going to stand by without learning what is going on.

Mr. DIRKSEN. Mr. President, there are no cats and dogs in the House of Representatives; at least I never saw any over there.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Utah.

The motion was agreed to.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed, without amendment, the bill (S. 2917) to establish a price support level for milk and butterfat.

The message also announced that the House had passed the bill (S. 2757) to supplement the act of June 14, 1926, as amended, to permit any State to acquire certain public lands for recreational use, with an amendment, in which it requested the concurrence of the Senate.

The message further announced that the House had passed the bill (S. 3688) to amend the District of Columbia Redevelopment Act of 1945, as amended, and the act approved December 20, 1944, as amended, and for other purposes, with amendments, in which it requested the concurrence of the Senate.

The message further announced that the House had agreed to the amendments of the Senate to the bill (H.R. 816) to set aside certain lands in Oklahoma for the Cheyenne and Arapaho Indians.

The message further announced that the House had agreed to the amendments of the Senate to the bill (H.R. 4306) to provide education and training for the children of veterans dying of a service-connected disability incurred after January 31, 1955, and before the end of compulsory military service.

The message also announced that the House had agreed to the amendment of the Senate to the bill (H.R. 8665) to amend the Act entitled "An Act to establish a memorial to Theodore Roosevelt in the National Capital" to provide for the construction of such memorial by the Secretary of the Interior.

The message further announced that the House had agreed to the report of

the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10960) to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12536) relating to the treatment of charges for local advertising for purposes of determining the manufacturers sale price.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12659) to suspend for a temporary period the import duty on heptanoic acid.

The message also announced that the House had passed a bill (H.R. 10311) providing that certain provisions of Public Law 335 dated October 7, 1949 (63 Stat. 724) shall apply to the Mercedes division of the lower Rio Grande rehabilitation project, Texas, in which it requested the concurrence of the Senate.

IMPORTATION OF CERTAIN ARTICLES FOR RELIGIOUS PURPOSES

Mr. JOHNSON of Texas. I should like to have the attention of the Senator from Oklahoma [Mr. KERR]. I move that the Senate proceed to the consideration of Calendar 1980, H.R. 4384.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 4384) to amend paragraph 1774 of the Tariff Act of 1930 with respect to the importation of certain articles for religious purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. JOHNSON of Texas. Mr. President, I understand that several Senators wish to offer amendments to the bill. The Senator from Oklahoma [Mr. KERR] is in charge of the bill, which has been reported by the Committee on Finance. I yield the floor, so that he may explain the bill.

Mr. KERR obtained the floor.

Mr. KERR. Mr. President, I yield to the Senator from Pennsylvania, so that he may present his amendment.

Mr. CLARK. Mr. President, I call up my amendment, which is at the desk.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. On page 2, after line 11, it is proposed to insert the following new section:

SEC. 3. The first section of the Act entitled "An Act relating to withholding, for State income tax purposes, on the compensation of Federal employees", approved July 17, 1952 (Public Law 587, Eighty-second Congress; 5 U.S.C. 84b), is hereby amended—

(1) by striking out "State or Territory" each place it appears and inserting in lieu thereof "State, Territory, or city"; and

(2) by adding at the end thereof the following new sentence: "For the purposes of this section, the term 'city' means only a city which is incorporated under the law of a State or Territory and which had a population (according to the last decennial census) of seventy-five thousand or more individuals."

Mr. CLARK. Mr. President, the purpose of the amendment is to authorize the Federal Government to withhold amounts due for city wage taxes from wage and salary payments to Federal employees working at Federal installations in cities with more than 75,000 inhabitants in which such taxes are imposed. Fifteen cities in the States of Pennsylvania, Ohio, Missouri, and Kentucky would be assisted materially in their tax enforcement problems by passage of the amendment. The 1952 act now authorizes Federal withholding for amounts due for State income taxes.

The amendment is identical with Senate bill 2551, which was introduced by me in behalf of myself and Senators SYMINGTON, LAUSCHE, SCOTT, HENNINGS, and YOUNG of Ohio. The administration has expressed support for S. 2551, and the Treasury Department in a letter to the chairman of the Senate Finance Committee, dated October 30, 1959, stated that it "favors enactment of S. 2551," and the Bureau of the Budget in a letter to the chairman, dated September 8, 1959, stated that "the Bureau of the Budget favors the basic principles of this measure to permit withholding of Federal employees' income by cities of over 75,000 population as recorded in the last decennial census."

Mr. President, I ask unanimous consent that a somewhat fuller statement explaining in detail the amendment I have offered may be printed in the RECORD at this point.

The PRESIDING OFFICER. Is there objection?

Mr. GORE. Mr. President, reserving the right to object, I do not rise to object, but to reserve an objection until the visitors in the Senate observe decorum. There is talking all along the walls in the Chamber. I ask the Chair to admonish our visitors to be respectful of the legislative process in the Chamber.

The PRESIDING OFFICER (Mr. MCGEE in the chair). The Chair has been requested to readmonish the visitors around the walls of the Chamber to obey the rules of decorum in this body.

Mr. GORE. Mr. President, I withdraw my objection.

There being no objection, the explanation was ordered to be printed in the RECORD, as follows:

EXPLANATION OF CLARK CITY WAGE TAX WITHHOLDING AMENDMENT TO PENDING BILL

The Clark amendment to the pending bill would amend the act of July 17, 1952, by authorizing the Federal Government to withhold amounts due for city wage taxes from wage and salary payments to Federal employees working at Federal installations in cities with more than 75,000 inhabitants in which such taxes are imposed. Fifteen cities in the States of Pennsylvania, Ohio, Missouri, and Kentucky would be assisted materially in their tax enforcement problems by passage of the amendment. The 1952 act now authorizes Federal withholding for amounts due for State income taxes.

The Clark amendment is identical to the bill (S. 2551) which was sponsored by Senators CLARK, SYMINGTON, LAUSCHE, SCOTT, HENNINGS, and YOUNG of Ohio. The administration has expressed support for S. 2551. The Treasury Department in a letter to the chairman of the Senate Finance Committee, dated Ocotber 30, 1959, stated that it "favors enactment of S. 2551," and the Budget Bureau in a letter to the chairman, dated September 8, 1959, stated that "the Bureau of the Budget favors the basic principle of this measure (S. 2551) to permit withholding of Federal employees' income by cities of over 75,000 population as recorded in the last decennial census." Senator CLARK stated the following reasons in support of the amendment:

1. The bill imposes no new taxes. Only those taxes which are already legally due to the cities imposing the wage taxes would be withheld.

2. The courts have held many times that nonresidents must pay wage taxes to communities in which they work, where they receive certain municipal benefits on an equal basis with residents.

3. Cities withhold Federal income taxes from the payrolls of city employees. Federal withholding of city wage taxes should be authorized as a matter of reciprocity. Withholding would cost the Federal Government, which already makes several payroll deductions by machine, virtually nothing.

4. The cities would save large sums now spent in enforcement efforts by passage of the amendment and Federal employees would be saved the inconvenience, distress, and cost of having such enforcement measures taken against them.

A bill (H.R. 3151), identical to the Clark amendment, was reported (H. Rept. 872) unanimously by the House Ways and Means Committee on August 11, 1959, and the bill was passed on by the House of Representatives on February 17, 1960, after the adoption of two amendments during floor debate to bring within the coverage of the act (1) cities with more than 50,000 population in which wage taxes are levied; and (2) Federal installations within 5 miles of the city limits of qualifying cities. In a letter to the chairman of the Committee on Finance dated April 19, 1960, the Treasury Department stated that it was opposed to the floor amendments added to the House bill. To avoid the possibility of a veto the latter provisions were not included in the pending amendment.

The Finance Committee held public hearings on H.R. 3151 on June 17, 1960, and support for the bill was expressed by the American Municipal Association, the League of Virginia Municipalities, and representatives of cities and States where municipal wage taxes exist. The only opposition to the measure came from representatives of out-of-State or nonresident Federal employees who are required to pay city wage taxes under existing law because they work in municipalities levying such taxes.

Mr. FREAR. Mr. President, exactly what would the amendment of the Senator from Pennsylvania do?

Mr. CLARK. The amendment would permit Federal agencies to deduct from the salaries of Federal employees living within a city which levies a wage tax, the wage tax which is due the city, just as the city withholds from its employees the Federal income tax which is due the Federal Government.

Present law permits such a withholding in the case of State income taxes, but not in the case of a city income or wage tax. The obvious inequity with respect to the many cities in the Nation which levy such taxes and have great difficulty

in collecting them from employees of the Federal Government should be clear.

I had this experience as Mayor of Philadelphia. In almost every instance the employees are desirous to have the tax withheld from their salaries, because if it is not withheld, and it is legally due, what happens is that the city tax enforcement officials are required to file a lien on a man's car or on his house to collect not only the tax but also the interest and penalty, as well. Thus many of the employee associations have been anxious to have the withholding done, so as to prevent such action from being taken.

Mr. FREAR. The Senator said "to permit." Does that mean that the Federal agencies must deduct the tax?

Mr. CLARK. Yes.

Mr. FREAR. Then it is not permission.

Mr. CLARK. The State income tax must now be deducted. If the amendment is adopted, the city income tax will be deducted.

The bill has the approval of the administration, the Bureau of the Budget, and the Treasury Department.

Mr. FREAR. The junior Senator from Delaware has not yet approved it. Did I understand the Senator from Pennsylvania to say that it would apply to employees living within a city where employment is given?

Mr. CLARK. No; living within or working within the city.

Mr. FREAR. Or working within the city. Does that mean that employees in Wilmington, Del., who work in the Navy shipyard in Philadelphia would be subject to a Philadelphia city withholding tax?

Mr. CLARK. They already are; and if they are working in Philadelphia establishments, where thousands of citizens of Delaware now work, that tax is now deducted by the employers.

Mr. FREAR. I certainly object to the amendment. I hope the Senate will reject it. People who live outside Philadelphia, who live outside Pennsylvania, who live in another State, but are working for an agency of the Federal Government, would be forced to pay a Philadelphia tax. They do not use the streets of Philadelphia, the lights of Philadelphia, or the other facilities. Yet they would be subject to a Philadelphia city tax.

Mr. CLARK. The Senator is not exactly correct, because if a person works in the city of Philadelphia, he uses its streets and its lights. He gets the benefit of police protection and fire protection. Generally speaking, he gets the benefit of all municipal services which are necessary to maintain law and order and to give him a proper place in which to work.

Mr. FREAR. I cannot agree with the Senator, because some Delawareans go up to Philadelphia in boats.

Mr. CLARK. Those who go up in boats, when they get there, nonetheless use the streets, the lights, the water, and the police protection in Philadelphia.

Mr. FREAR. But the Federal Government is charged for those services, and the Federal Government pays the city of Philadelphia. For all the facilities the Federal Government uses, the Federal Government pays the city of Philadelphia. I want the Senator from Pennsylvania to have Philadelphia collect all the taxes which are due it, but I do not want Philadelphia taking taxes away from Delawareans who live outside Pennsylvania, simply for the use of the facilities of Philadelphia.

Mr. WILLIAMS of New Jersey. Mr. President, will the Senator from Pennsylvania yield?

Mr. CLARK. I yield.

Mr. WILLIAMS of New Jersey. I associate myself with the penetrating remarks of the Senator from Delaware, with whom I heartily and totally agree. I wonder if the Senator from Pennsylvania would not agree that the nonresident does not receive all the benefits of a resident of the city of Philadelphia and at least should not have to pay the full income tax that the resident pays.

Mr. CLARK. I regret being unable to agree with the Senator from New Jersey, because it occurs to me that the resident of Camden receives just as many benefits as the resident of Montgomery County when they both come into 15th and Chestnut Streets and go to work at the Philadelphia National Bank.

Mr. WILLIAMS of New Jersey. Does not the Senator agree, though, that the nonresident of the city does not receive all the benefits which the resident of the city receives?

Mr. CLARK. It occurs to me that since Philadephia is the place where the nonresident makes his money, perhaps he receives more benefits than does the individual who works inside the city and has to pay the Philadelphia tax.

Mr. WILLIAMS of New Jersey. I am certain the Senator from Pennsylvania knows that the biggest expenditure in any municipality these days is for schools for resident children. Certainly a worker from Camden or from Delaware does not get the benefit of a very fine Philadelphia education.

Mr. CLARK. The Philadelphia wage tax does not go for school benefit purposes.

Mr. WILLIAMS of New Jersey. What is the purpose of the Philadelphia wage tax?

Mr. CLARK. It is to support the municipality, but not the school district.

Mr. WILLIAMS of New Jersey. Would not the Senator from Pennsylvania see the simple justice of excluding nonresidents from the Federal collection of a city tax?

Mr. CLARK. All the major labor organizations representing Federal employees, including the American Federation of Government Employees, the National Association of Letter Carriers, the National Postal Clerks Union, and the National Association of Mail Handlers have approved the bill. It occurs to me that Federal employees themselves want it.

Mr. WILLIAMS of New Jersey. I see my colleague from New Jersey [Mr. CASE] on the floor. He has talked to me about just such an amendment. I think he is ready to discuss it with the Senator.

Mr. FREAR. Mr. President, certainly I would have no objection to the Federal Government collecting the city tax from a resident of Philadelphia, but I must object to the Federal Government collecting such a tax from a resident of Delaware. I do not believe that there is no other recourse to the city of Philadelphia to collect such taxes. I know the Senator has said emphatically and rather persuasively that it is necessary to attach a lien, which costs people some money. But if he were to eliminate residents of New Jersey and Delaware, I believe he might get a little assistance from those two States, instead of resistance.

Mr. CLARK. Would the Senator from Delaware have any objection to the bill if it were amended to exclude the residents of other States?

Mr. FREAR. I would have no objection.

Mr. CLARK. Mr. President, I had indicated that I would yield to the Senator from Connecticut.

Mr. BUSH. Mr. President, I was just about to develop the point which the Senator has just developed. Does he have any estimate of the number of people who would be affected who are inhabitants of the State of Pennsylvania or the city of Philadelphia?

Mr. CLARK. I have been arguing the case as though it were a Philadelphia case, but actually it is not. Fifteen cities are involved, including cities in the States of Missouri, Ohio, and Kentucky. As I pointed out before, the Senators from Missouri [Mr. HENNINGS and Mr. SYMINGTON] and the Senators from Ohio [Mr. LAUSCHE and Mr. YOUNG] are cosponsors of the bill. So I cannot give countrywide figures.

However, with respect to Philadelphia and other municipalities in Pennsylvania which I know about, the overwhelming majority of the employees affected would be working in Federal installations outside the city but inside the State, but who live in the city. Therefore, I would be prepared, to accord with the position of some of my friends, in dealing with the State problem, to propose an amendment which would eliminate the interstate impact of the bill.

Mr. BUSH. I believe there is a distinction between those who are residents and those who are nonresidents working in a given community. The State of New York has an income tax for residents and one for nonresidents who work in New York. I think that is appropriate.

Mr. CLARK. Mr. President, if I may have the attention of the Senators from Delaware, the Senator from New Jersey, and the Senator from Connecticut, I now move that my amendment be modified by adding at the end thereof the following:

Provided, however, That this section shall not authorize the Federal Government or any of its departments, agencies, or officials to withhold city wage taxes or city income taxes from the compensation paid to any Federal employee who does not reside in the State in which the city is located which levies such tax.

Mr. CASE of New Jersey. Mr. President, will the Senator from Pennsylvania yield?

Mr. CLARK. I am happy to yield.

Mr. CASE of New Jersey. The Senator from Pennsylvania and I discussed this matter at some length, before it came up on the floor. If the amendment is amended so as to eliminate its application insofar as nonresidents of a city are concerned, I believe that would be satisfactory to my colleague from New Jersey and to me and to our constituents.

In addition to the language the Senator from Pennsylvania has proposed, I think there should be added a very clear section providing for the administrative handling of this matter and for reliance on the Federal Government or on the State, as the case may be, to handle the matter, rather than to have any question raised about its administration.

Mr. CLARK. The Senator has discussed this matter with me. If the Senator from New Jersey will submit his amendment, I will accept it, if the Senator from Oklahoma will go along with me on that, as I believe he will.

Mr. CASE of New Jersey. I have an amendment which has been drawn by the Legislative Drafting Service; the amendment will take the place of the amendment the Senator from Pennsylvania has proposed, and will add the language for the administrative handling of the matter—if that will be satisfactory, as I believe it will.

Mr. CLARK. I am happy to accept it.

The PRESIDING OFFICER. Without objection, the proposed modification of the amendment will be read.

Mr. COTTON. Mr. President, reserving the right to object, I desire to propound a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from New Hampshire will state it.

Mr. COTTON. Is it by unanimous consent that the amendment of the Senator from New Jersey may be added to the amendment of the Senator from Pennsylvania?

The PRESIDING OFFICER. That amendment is proposed to be added to the Clark amendment; and the clerk has been directed to read the proposed modification of the amendment.

Mr. COTTON. The Chair said "without objection."

The PRESIDING OFFICER. However, it is the right of the author of an amendment to accept a modification of it.

Mr. COTTON. Mr. President, I reserve the right to object, because it is my intention to submit an amendment which would be of more far-reaching effect than the rather mild proposal offered by the Senator from New Jersey.

Mr. President, will it be in order for me to offer my amendment in place of the pending amendment? I assume that I cannot, once the pending amendment is agreed to. Will it be in order for me to offer my amendment as a substitute?

The PRESIDING OFFICER. The Chair is advised that the Senator from New Jersey has offered his amendment as a substitute for the Clark amendment.

Mr. CLARK. No, Mr. President.

Mr. CASE of New Jersey. My amendment adds another section to the Clark amendment, and therefore becomes a part of it, upon its acceptance by the author of the Clark amendment.

Mr. CLARK. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Pennsylvania will state it.

Mr. CLARK. Am I not entitled to modify my own amendment?

The PRESIDING OFFICER. That is correct.

Mr. CLARK. Next, is it not in order for me to accept the amendment which has been offered by the Senator from New Jersey to my amendment?

The PRESIDING OFFICER. That is correct.

Mr. CLARK. Is not that the present parliamentary situation?

The PRESIDING OFFICER. It is.

Mr. COTTON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from New Hampshire will state it.

Mr. COTTON. I understand that the Senator from Pennsylvania has a perfect right to modify his own amendment. But has he the right to accept an amendment which another Senator offers to his amendment, if, as a parliamentary matter, that will preclude other Senators from offering amendments?

The PRESIDING OFFICER. The Clark amendment is still subject to amendment by an amendment submitted by any other Senator. The acceptance by the Senator from Pennsylvania of the modification offered by the Senator from New Jersey does not change the status of the Clark amendment.

Mr. COTTON. I thought that only one principal amendment was permitted.

The PRESIDING OFFICER. There cannot be tertiary amendments; there can only be amendments in the second degree.

Mr. CLARK. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Pennsylvania will state it.

Mr. CLARK. Is it not in order for the Senate to pass on my amendment, as modified by the amendment of the Senator from New Jersey [Mr. CASE], and then to have other amendments offered to it?

The PRESIDING OFFICER. Not after the Clark amendment is agreed to.

Mr. BUSH. Mr. President, I understood the Senator from Pennsylvania to accept the suggestion of the Senator from New Jersey [Mr. CASE] as a modification of his amendment.

Mr. CLARK. That is correct.

Mr. BUSH. So a further amendment would be in the first degree, would it not?

The PRESIDING OFFICER. No; for the Clark amendment is in itself an amendment to the bill. Therefore, another amendment would be in the second degree.

Mr. COTTON. Will it be in order for another amendment to be offered to the Clark amendment?

The PRESIDING OFFICER. That is correct.

The question is on agreeing to the amendment of the Senator from Pennsylvania.

Mr. FREAR. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Delaware will state it.

Mr. FREAR. Do I correctly understand that the Senator from Pennsylvania will, by means of the modification, take care of the people of Delaware?

Mr. CLARK. That is correct.

Mr. FREAR. I thank the Senator from Pennsylvania.

Mr. COTTON. Mr. President, I send to the desk an amendment which I offer to the Clark amendment.

The PRESIDING OFFICER. The amendment to the amendment of the Senator from Pennsylvania will be stated.

The CHIEF CLERK. At the end of the Clark amendment it is proposed to insert the following:

SEC. 2. (a) The first section of such Act is further amended—

(1) by inserting before the period at the end of the second sentence the following: "; except that such agreement shall not provide for the collection of tax through withholding under such law from the compensation of any individual who is not domiciled in the State or Territory with which the agreement was entered into or in a State or Territory within which is located the city with which the agreement was entered into"; and

(2) by adding at the end thereof (after the sentence added by paragraph (3) of the first section of this Act) the following new sentence: "For the purposes of this section, the domicile of any individual shall be in the State or Territory in which he declares himself to be domiciled if (1) he acquired such domicile, under the laws of the State or Territory before the beginning of the period for which the tax in question is imposed, and (2) within the 60-day period which begins on the date he receives a written demand for payment of the tax he makes a declaration with respect to his domicile, in writing and under oath, to the official whose duty it is to collect such tax."

(b) The amendments made by subsection (a) shall apply only with respect to State and local income taxes with respect to which the date for payment established under State, Territorial, or local law occurs on or after the date of the enactment of this Act.

Mr. COTTON. Mr. President, I wish the Senate to understand clearly the import of this amendment. It goes to the extent of modifying the act which was passed during the last Congress.

Let us understand the situation clearly: In the last Congress, a bill introduced by the distinguished senior Senator from Massachusetts [Mr. SALTONSTALL] directed the Federal Government to withhold from the salaries or wages of Federal employees the State tax of any State or territory levying a tax on its inhabitants—to withhold that tax, for the State or Territory, from the Federal employees.

Some of us very vigorously and strongly objected to the passage of that measure. We did not object to having the Federal Government, like any other employer, act in cooperation with States and Territories to withhold State taxes for the States, from Federal employees.

But in this country there has arisen, as all of us know, a growing dispute between States and a situation which, in the opinion of many of us, eventually

will need to be ironed out, perhaps by means of a constitutional amendment, in connection with the status of a State which levies a tax on the income of citizens of other States who are domiciled in other States, who vote in other States, who sleep in other States, but who work all or a portion of their time—and, many times, only a portion of their time—within the State levying the tax.

Many of us resist the idea of the Federal Government's persisting in injecting itself into the position of an arbiter of such a claim and prejudicing the rights of some of our States, like my own, whose citizens are having income taxes levied on them by other States by the Federal Government's making itself an agent to collect the taxes from nonresidents.

Frankly, we failed in that struggle. The bill passed, and became law. Those people, having had their pound of flesh, are back after their second pound.

The senior Senator from Pennsylvania, perfectly properly, and in behalf of his own people and for the interest of his own State, wants to extend this practice to city taxes, so that the Federal Government will withhold city taxes that are levied on its employees. In this case, of course, his original proposal would enable the Government to levy the taxes on those who do not live within the city or State.

The distinguished Senator from New Jersey has offered an amendment which takes care of that particular added pound of flesh. The proposal of the Senator from Pennsylvania provides that in this case, in the extension to cities, we will not, as we did before, inject the Federal Government into the task of collecting taxes from nonresidents.

My own amendment meets this question head on. Let there be no misunderstanding. If my amendment is adopted, it not only would alter the amendment of the Senator from Pennsylvania so that the Federal Government would not withhold city taxes on its employees who do not live within the State in which the city is located, but it also provides that the Federal Government will not withhold State taxes from its employees domiciled in another State.

In other words, if my amendment is adopted—and I do not want to deceive anybody—it not only puts this restriction on the amendment of the Senator from Pennsylvania, but it repeals the action taken by the Congress last year. It restores the restriction with relation to both city and State taxes, namely, that the Federal Government will be an agent to withhold taxes for States and cities, but only against those who are domiciled within the State. and will not inject itself into this other question.

Mr. CASE of New Jersey. Mr. President, will the Senator yield?

Mr. COTTON. I yield to the Senator from New Jersey, who has offered the amendment.

Mr. CASE of New Jersey. I thank the Senator from New Hampshire. The Senator from New Hampshire is eminently correct, if I may echo the words of our colleague who usually occupies the seat I now occupy. He is correct in his statement of the effect the amendment would have, and he is correct in wanting it to have that effect.

I ask the Senator from New Hampshire whether the residents of his State do not pay entirely for the cost of their State and local government expenditures?

Mr. COTTON. Indeed we do. We do not have a State income tax. We do not tax people from other States who work within our State.

I will say to my friend from New Jersey that the thing which has incensed the Senator from New Hampshire—and this is the third time he has taken the time of the Senate, and he does not hesitate to take it at this late hour, to dislodge this action by the Federal Government—is that we have gone so far that a man who has been employed on railroad trains for 40 years, who lives in New Hampshire, who votes there, sleeps there, and is domiciled there, but works on a train that goes from Concord to Boston, Mass., is taxed by the State of Massachusetts on a portion of his wages in proportion to the number of miles he travels in that State.

That question is not something we can settle here tonight; but what the Senator from New Hampshire resents is having the Congress of the United States put the seal and the hallmark of its approval on that practice. It was done last year to some extent. Now the Senator from Pennsylvania wants to make the deed more gross and add to it.

Mr. CASE of New Jersey. Will the Senator advise me whether the State of New Hampshire collects any taxes from residents of Massachusetts for the expenses of operating municipalities and other local bodies in New Hampshire?

Mr. COTTON. No.

Mr. CASE of New Jersey. I wonder if the Senator realizes that New Jersey does not collect any taxes from the people of New York, for example, for operating their municipalities or local bodies.

Mr. COTTON. Indeed, the Senator does realize it, and the Senator recognizes that the Senator from New Jersey and the Senator from Connecticut are facing exactly the same situation and have vigorously opposed the practice.

The Senator from New Hampshire would like to add that the suggestion that a person who is a citizen of a State, who lives there, who pays his taxes there, who goes into another State in the morning and remains there through a portion, at least, or all of the working hours, and then returns home at night, should be taxed on income because he uses the sewers or has a drink of water or walks the streets, as any resident of a foreign nation walks the streets and has police protection, is as rank poppycock as I have heard on the floor of the Senate.

Mr. CASE of New Jersey. The Senator from New Jersey feels the Senator from New Hampshire has stated the matter succinctly, correctly, and exactly. The Senator from New Jersey fully supports the move now made by the Senator from New Hampshire. He feels it is desirable to have a little insurance. He offered the amendment to make sure the situation was not made worse by the amendment offered by the Senator from Pennsylvania, but the Senator from New Jersey supports the further and far-reaching amendment of the Senator from New Hampshire.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. COTTON. I yield to the Senator from Vermont.

Mr. AIKEN. I understand New Hampshire would like to prohibit neighboring States from deducting income taxes which may be due in those States from workmen from the State of New Hampshire.

Mr. COTTON. Not at all. The Senator from New Hampshire would like to if he could, but his amendment does not do that.

Mr. AIKEN. I was about to ask the Senator if he would not like to go a bit further and extend the amendment so as to deny any State the right to exact a percentage of parimutuel bets which are placed in a State by residents of an adjoining State.

Mr. COTTON. It is quite plain that my distinguished friend from Vermont in this particular instance has not entirely digested the amendment offered by the Senator from New Hampshire. There is nothing in the law, there is nothing in the amendment offered by the Senator from Pennsylvania, there is nothing in the amendment offered by the Senator from New Jersey, and there is nothing in the amendment offered by the Senator from New Hampshire that undertakes to say a State cannot collect from a nonresident working in that State who is domiciled in another State, because that can be done only by an agreement between the States, or probably—and I am not going into that—a constitutional amendment.

All that the Senator from New Hampshire is attempting to do is to say the Federal Government shall not make itself an agent to collect this money.

If there is a nonresident working in the State of the Senator from Vermont, that State can levy a tax on him; the State can catch him and make him pay it, undoubtedly.

What the Senator from New Hampshire is resisting and has been resisting is the Federal Government, on its own, undertaking to be a tax collector for one State against the residents of another State. That, Mr. President, is fundamentally unsound and wrong. It is one of the many inroads being made into the rights and privileges of the sovereign States of this Union day after day and month and month in this body.

That is the reason the Senator from New Hampshire asks that his amendment be agreed to. It would not preclude the State of Vermont from taking action. The State could tax the residents of New Hampshire who perhaps work in the fine factories in Vermont—we will settle that sometime—but we do not like to have the Federal Government stepping in to say, "You shall pay the State of Vermont, and we will withhold the tax from your wages if you happen to be on a mail train going through Vermont."

Mr. AIKEN. Unfortunately, the State of Vermont does not collect taxes on the

basis of "sometime." We want them now.

Mr. COTTON. The State of Vermont is getting them now.

Mr. AIKEN. I still think it would be a good idea to prohibit any State from collecting a percentage of the parimutuel bets placed by citizens of other States.

Mr. COTTON. Very well. The Senator can introduce a bill to that effect.

Mr. AIKEN. I think perhaps I shall offer an amendment.

Mr. COTTON. I am not worried about the State of Vermont getting every cent of tax which is due the State of Vermont. God bless it, nobody ever deprived the State of Vermont of one cent of tax, in the history of this Nation.

I would also undertake to venture the guess that very few Vermont bettors have lost much money at the racetracks in another State. They are such shrewd judges of horses and so tightfisted that nobody could get a nickel out of them.

Mr. AIKEN. Mr. President, I do not see either Senator from Massachusetts in the Chamber, and I think they ought to be defended.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. COTTON. I yield to the Senator from New York.

Mr. KEATING. Mr. President, I admire the vigor with which my friend from New Hampshire pleads his case. I should like to ask him a question.

Is it not a fact that if his amendment were adopted it would undo completely what we did last year, after extended debate, with regard to the permission of a State to withhold taxes on nonresidents working in that State?

Mr. COTTON. It would not undo completely the act which we passed. The act which we passed provided two things. First it provided a very legitimate and proper thing. The act we passed provided that the Federal Government could withhold the State taxes of its employees who were working within a State.

Also, however, it did another thing. It not only permitted but it compelled and required the Federal Government to collect taxes levied by a State against residents of another State. All the amendments would do is to undo the bad part of that law, not the good part.

Mr. KEATING. In other words——

Mr. COTTON. The Senator asked me a question. Let me answer it. The Senator has one of the best legal minds in this body, and I should like to make very sure I explain my amendment to him.

The State of New York, for instance, had been for a number of years before the act was passed last year collecting taxes from people domiciled in Connecticut or domiciled in New Jersey and working in New York. That practice continues.

The Senator from New Hampshire does not object to this practice being continued and being dignified and clothed with the power of the Federal Government, if the Federal Government, acting as a tax collector and withholding from its own employees, confines such withholding to those who are domiciled in New York.

The act last year provided—and the proposal of the Senator from Pennsylvania this year would extend it to the cities, as a further step, because once we started down the road it was bound to go further—that the Federal Government was going to make itself a tax collector as between residents of different States. All the amendment of the Senator from New Hampshire would do would be to undo the evil part of that law. It would leave absolutely untouched the legitimate part of the law.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. COTTON. I yield.

Mr. KEATING. Does the Senator have any suggestion as to how the State of New York, for instance, would collect its State income taxes from nonresidents who work in and earn their living in the city of New York and, let us say, live in Connecticut or live in New Jersey? How would the State of New York go about that?

Mr. COTTON. How did the State of New York go about it before we passed the act last year?

Mr. KEATING. The act was passed last year, and the State of New York was benefited by the passage of the act. I would be very loath to see anything happen which would take away the benefit of this act from the State of New York.

This really relates more to New Jersey and to Connecticut than to the State of the distinguished Senator who offered the amendment——

Mr. COTTON. Why?

Mr. KEATING. His quarrel, I believe, is with the distinguished Senator from Massachusetts——

Mr. COTTON. Why does it relate more to those States?

Mr. KEATING. Because there are very few residents of New Hampshire who work in New York City. There are a great many from the State of my friend from New Jersey and a great many from Connecticut. If they wish to bring with them all of the facilities which are provided for them by the State of New York, while they are in New York, and if they wish to bring in private police to protect them when they come——

Mr. COTTON. I think that would be a good idea, judging what happens in New York. [Laughter.]

Mr. KEATING. If they wish to relieve the city and the State of New York from providing any of these facilities or protections, I am quite sure arrangements could be worked out whereby there would be no State income tax imposed upon them if they could possibly provide for themselves in such a way as to not need any of the public facilities provided by the city and State of New York.

Mr. WILLIAMS of New Jersey. Mr. President, will the Senator yield?

Mr. COTTON. I will yield to the Senator in a moment.

Mr. President, the Senator from New Hampshire does not wish to filibuster this measure on the last night of the session. The Senator from New Hampshire is not going to keep the floor. He yielded to the Senator from New York, and the Senator from New York made a suggestion which reveals the real struggle on the floor of the Senate tonight.

The Senator from New York said that the Senator from New Hampshire should not be greatly interested in this proposal because very few people from New Hampshire work in the city of New York.

He implies that very few work in Massachusetts.

This is exactly the mental attitude of very able, very fine and very sincere Senators like the Senator from New York and the Senator from Pennsylvania. They come from huge States. They have the idea ingrained in their minds somewhere that unless thousands of people are affected it is all right to invade the rights of a few people.

The Senate itself was based upon the fact that the small States should have rights as well as the large States.

Mr. CASE of New Jersey. Mr. President, will the Senator yield?

Mr. COTTON. No State in this country should be deprived of its rights. Every State has two Senators. That is why the small States have two Senators each.

I do not care if only 10 people from New Hampshire are overtaken by the Federal Government and told that the Federal Government is going to withhold taxes from their pay, to be given to Massachusetts, when these people have lived all of their lives in our State. I do not care if thousands go from New Jersey to New York. It is not a matter of numbers.

Someday I think the distinguished Senator from New York will understand and fully appreciate—when dealing with human rights; when cutting into the walls of the Constitution; when considering the situation faced when the Constitution was adopted at a time of a loose Federation of States when States had tariffs against each other and had taxes against each other's citizens, when the infant Republic was falling asunder because there was no central government and because the rights of citizens of smaller States were being overridden by other States which were larger—the importance of these protections which have been provided.

Mr. President, I am not going to retain the floor. I have offered my amendment. I shall stand or fall on it. To conclude my remarks, I simply wish to read one letter which illustrates what I have said. Then I shall surrender the floor so that my friends can take over and go ahead with their "rat killing."

This letter is written to me, and it says:

DEAR SENATOR: I have been a resident and voter in the State of New Hampshire for 40 years, excepting the years 1943 to 1946, during which time I was a resident of Boston, Mass.

I am employed by the Boston & Maine Railroad as an engineerman, and at present have a passenger run from Portsmouth to Boston and return.

As you doubtless know, Massachusetts has within the past few years enacted a nonresident income tax that I and my fellow workers consider most unfair to us as citizens of New Hampshire. February 15, this tax is to be withheld from our pay each week and is retroactive to January 1.

We live, vote, and pay taxes in New Hampshire. Our runs start in New Hampshire,

and we are paid in New Hampshire, yet Massachusetts taxes us for the miles run in that State.

Inasmuch as I have no legal representation in that State—probably nothing would be gained if I had—I am writing to you. Can anything be done about it?

Do not misunderstand me. My amendment does not do anything about that person's situation, because his taxes are withheld by the Boston & Maine Railroad. That question is something that must be adjusted in another area. But in closing, as I said in the beginning, what the Senator from New Hampshire objects to is having the Congress of the United States proceed to put the hallmark of its approval on this practice by passing a law which would compel the Federal Government to step into this dispute, to judge it, and to remove from the pockets of the residents of States who are working in another State a portion of their wages and withholding it, when we are vigorously striving and contesting to establish their rights.

Before I yield the floor, I yield to my senior colleague.

Mr. BRIDGES. Mr. President, first I wish to pay a distinct compliment to the distinguished junior Senator from New Hampshire for his defense of the rights of sovereign States, and particularly his able representation, in part, of the people of our State, whom the junior Senator from New Hampshire and the senior Senator from New Hampshire have the honor and the privilege to represent. He has presented a very forceful argument. It is sound, logical, and I hope the amendment is agreed to.

Mr. COTTON. I thank my colleague, who has been fighting for this measure all the way for more than 2 years. I yield briefly to the Senator from South Dakota [Mr. CASE].

Mr. CASE of South Dakota. Mr. President, I wish to commend the Senator from New Hampshire for his fine illumination of this point tonight. I wonder if he would consider that, without the protection he seeks to get, a precedent could be established for the Federal Government to assist the District of Columbia in collecting an income tax for the District of Columbia on the salaries of Members of Congress?

Mr. COTTON. The Senator states a very interesting point.

I promised I would yield to the Senator from New Jersey.

Mr. WILLIAMS of New Jersey. Mr. President, I wish first to commend the junior Senator from New Hampshire, the State that gave this country Daniel Webster. The Senator from New Hampshire has fought with the same vigor and force of a Daniel Webster.

I did not hear all of the Senator's speech, but I heard most of it. I do not know whether he used an early American phrase that would describe this action. Perhaps he did. I wonder if he would not agree that in large part, we have the elements of taxation without representation.

Mr. COTTON. That is precisely the case, and I thank the distinguished Senator for his very timely and apt remark.

Mr. WILLIAMS of New Jersey. I should like to make one further comment. I know the inequity that the citizens of New Hampshire face in paying the taxes of the State of Massachusetts. In my own State, citizens residing in New Jersey and who work in New York not only pay the New York income tax, but our residents pay more to the State of New York than do New York residents. I certainly do not want to see this body be a part of making or continuing the Federal Government as the agent for the collection of that kind of unjust tax.

Mr. COTTON. Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were ordered.

Mr. HICKENLOOPER. Mr. President, will the Senator yield? I would like to ask the Senator some questions.

Mr. COTTON. I will yield first to the Senator from Iowa.

Mr. HICKENLOOPER. I wish to propound a question or two. I congratulate the Senator from New Hampshire on his clear statement of the issue, which is the further invasion of the Federal Government into the local rights of the people of the State. I believe he has made clear that he is not objecting to the States themselves levying taxes. That question should be fought out in a different forum and in a different way. But he objects to using the power of the Federal Government to do the work that the States themselves ought to be doing or that the local municipalities ought to be doing.

I should like to know if the Senator would yield to me for the purpose of propounding a parliamentary inquiry which would serve to clear up the subject somewhat.

Mr. COTTON. I am glad to yield.

The PRESIDING OFFICER. The Senator will state his parliamentary inquiry.

Mr. HICKENLOOPER. What is the basic bill upon which we are now working? Will the Chair inform me?

The PRESIDING OFFICER. The Chair informs the Senator that the Senate is presently working on H.R. 4384.

Mr. HICKENLOOPER. Mr. President, another parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HICKENLOOPER. As I understand, that bill provides for relief of import duties on religious objects, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. HICKENLOOPER. The Senator from Pennsylvania has offered an amendment to this bill, which refers to the relief of import duties on religious objects, and I understand that the Chair has ruled that the amendment is eligible to be received, is that correct?

The PRESIDING OFFICER. The rule of germaneness does not apply.

Mr. HICKENLOOPER. I understand. Mr. President, a further parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HICKENLOOPER. I have a couple of amendments with regard to farm legislation which I think are very important to the farmers of this country in connection with the surplus problem which we have, and therefore I ask if it would be possible for me to offer legislation with respect to the surplus problem and its solution to this bill that has to do with the relief of import duties on religious objects?

The PRESIDING OFFICER. Such amendments are in order when in proper relationship to other amendments pending in terms of secondary and tertiary amendments.

Mr. HICKENLOOPER. I thank the Chair. I just wanted to know how far we are going with this subject. I would not use the words "cat and dog" amendment, but we are getting pretty far from the subject matter of the basic bill.

Mr. LAUSCHE. Mr. President, will the Senator yield?

Mr. COTTON. I yield.

Mr. LAUSCHE. If the Senator from Iowa can find a more appropriate term than was used by the Senator from Ohio, I would suggest that he do so.

Mr. HICKENLOOPER. I am willing to adopt the words of the Senator from Ohio, but I wanted to make the point.

Mr. COTTON. The Senator from New Hampshire wishes to yield to one more Senator, the Senator from Oklahoma [Mr. KERR], after which he promises to relinquish the floor.

Mr. KERR. Mr. President, I should like to ask the Senator from New Hampshire if it is a fact that the Senator from Pennsylvania, with the amendment now before the Senate which the Senator from New Hampshire seeks to amend, gives the city of Philadelphia, if the amendment is accepted and becomes law, any privilege which is not now given under existing law to any State that levies taxes in the manner described in the amendment of the Senator from Pennsylvania.

Mr. COTTON. If I understand the question of the distinguished Senator correctly—and perhaps I do not—all that the Senator from Pennsylvania, as I understand, set out to do was exactly the thing that always happens once we have trespassed upon rights, which was to extend the trespass, so that what we did to the States last year we now do to the cities as well. The amendment of the Senator from New Jersey simply took the sting out of the matter of collecting from nonresidents of the cities. The amendment offered by the Senator from New Hampshire would take out of both the amendment and the existing law the provision which would make the Federal Government a tax collector as against nonresidents of both State and cities.

Mr. KERR. Under existing law, then, any State can make an agreement with the Federal Government whereby the Federal Government withholds the tax levied by the State with reference to employees eligible to have the tax withheld under existing law.

Mr. COTTON. As I understand the existing law, the Federal Government is compelled to withhold taxes for any State which officially informs the Federal Government that it has a State tax and requests that it be withheld.

Mr. KERR. That is the existing law.

Mr. COTTON. That is the existing law as it applies to employees of States and territories, but not cities.

Mr. KERR. The amendment of the Senator from Pennsylvania would extend that privilege with reference to employees of the Federal Government in municipalities.

Mr. COTTON. That is correct as to the collection of municipal taxes.

Mr. KERR. Under existing law, the State of Pennsylvania, the State of New Hampshire, or any other State must withhold taxes from its employees to comply with the requirements of withholding Federal income taxes.

Mr. COTTON. That is so.

Mr. KERR. So is the city of Philadelphia.

Mr. COTTON. That is so.

Mr. KERR. As I understand the amendment of the Senator from Pennsylvania, it would give to the city of Philadelphia or any other city similarly located, the right to have its tax money withheld from the employees within the municipality of the tax that it is entitled to levy on those resident within the city.

Mr. COTTON. Is the Senator referring to my amendment?

Mr. KERR. No; to the amendment of the Senator from Pennsylvania.

Mr. COTTON. Under his amendment, the Federal Government would be compelled to withhold from the employees——

Mr. KERR. From the employees in Philadelphia of municipal taxes.

Mr. COTTON. Yes.

Mr. KERR. Just as Philadelphia must withhold from its employees income taxes due the Federal Government.

Mr. COTTON. That is right.

Mr. KERR. So that the Senator's amendment would not only defeat the right of Philadelphia, which seeks the same privilege now available to the States, but the Senator's amendment would also take from the States the right they now have under existing law. Is that correct?

Mr. COTTON. My amendment would take from the existing law the arbitrary power that was given to the Federal Government. But the very able Senator from Oklahoma is giving the impression to the Senate—I am sure intentionally and sincerely—that there is an exact analogy between having States and municipalities withhold Federal taxes and having the Federal Government withhold State and municipal taxes.

There is one great difference. There is no problem of residence involved in Federal taxes. It does not make any difference whether a person is a resident of the great State of Oklahoma or the great State of New York or the great State of Maine, or any other great State. The Federal tax reaches every American citizen. However, when we turn the equation around and provide that the Federal Government shall start withholding taxes for States and for cities it is a horse of a different color, in my opinion, because into that situation comes the question of whether the person from whom the tax is being withheld is actually, in justice, compelled to pay that tax.

So there is a big difference, and I wish to express emphatically my dissent from the suggestion of the Senator from Oklahoma that all we are doing is giving to the States and municipalities the same justified right that they give to the Federal Government.

Mr. KERR. I did not make that implication. The question I asked was if the amendment did not have as its sole purpose conferring upon Philadelphia the privilege which a State now has with reference to the Federal Government withholding taxes of its employees in cities.

Mr. COTTON. That is right.

Mr. KERR. That is the law now with reference to the State income tax.

Mr. COTTON. That is right.

Mr. KERR. What the Senator seeks to do—and I do not criticize him; I am only trying to get the matter clear in my mind and in the mind of the Senate—is not only to deny the privilege to the city of Philadelphia or any other municipality, but also to take from the States rights which have been conferred upon them.

Mr. COTTON. The Senator from New Hampshire made it clear that that is exactly what he seeks to do. He wants to do that only, of course, as it affects nonresidents of States.

Mr. KERR. The distinguished Senator from New Hampshire was a member of the Committee on Finance when the present law was enacted, I believe.

Mr. COTTON. He was.

Mr. KERR. Is it a fact that the Treasury Department favored the enactment of the existing law?

Mr. COTTON. That is correct.

Mr. KERR. Is it not the opinion of the Senator from New Hampshire that if Congress now repeals that law, the net result will be that the act in which that repeal is contained will be vetoed?

Mr. COTTON. No; that is not the opinion of the Senator from New Hampshire. He feels that if the amendment is adopted and that portion of the law is repealed, the Federal Government will still be withholding taxes for those who are resident and domiciled in the States, which is the vast majority, and will not be intruding itself into a situation of making decisions which it ought not to make.

The distinguished Senator from Oklahoma is a member of the Committee on Finance, and I have always listened to his opinions with great deference and respect, because he is eminently qualified as a member of that committee, and I have always listened carefully to the opinions of the representative of the Treasury Department. However, the Treasury Department has never dictated to the Senator from New Hampshire, any more than it has to the Senator from Oklahoma. The Senator from New Hampshire does not care what the Treasury Department thinks about his amendment.

Mr. KERR. I thank the Senator. I know he is sincere. I was only attempting to get the picture to the Senate of what the facts are with reference to the amendment.

Mr. COTTON. I thank the Senator. As usual, he is giving a very accurate picture.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Hampshire.

Mr. KEATING. Mr. President, we started out with a bill for the free importation of altars, shrines, baptismal fonts, mosaics, pulpits, communion tables, and other articles of related character, to which bill the Senator from Pennsylvania has offered an amendment relating to income taxes to be collected by cities.

Now we are confronted by the amendment offered by the distinguished Senator from New Hampshire pertaining to a subject which we debated at length last year. It would undo what we passed last year, and as the Senator from Oklahoma has pointed out, it was a bill which had the support of the Treasury Department.

I feel sure, as the Senator has intimated, if we adopt the amendment of the distinguished Senator from New Hampshire, we will be doing a great injustice to the schools, hospitals, churches, and other institutions which are very much interested in the free entry of all the articles listed in the bill before us.

I hope that my colleague from New Hampshire, whose friendship I cherish, will see fit to withdraw his amendment, because it certainly will be the subject of extensive debate before we could permit the enactment at this late hour of major legislation which will completely undo existing law.

Mr. COTTON. Mr. President, will the Senator from New York yield?

Mr. KEATING. I yield to the Senator from New Hampshire provided I do not lose the floor.

Mr. COTTON. I simply say to the distinguished Senator from Pennsylvania, for whom I have the most profound respect, that he opened up this question, and he is asking for a second pound of flesh. If he will withdraw his amendment, I will withdraw mine, and the law will repose just as it was when we came here today. Otherwise, I shall press my amendment.

Mr. KEATING. Mr. President, if such an arrangement can be made, I shall be happy to yield the floor. But I shall not yield it unless unanimous consent is requested for that purpose.

Mr. CLARK. Mr. President, will the Senator from New York yield? I could not hear what he said.

Mr. KEATING. I shall be happy to yield to the Senator from Pennsylvania for a question only. A suggestion has been made by the distinguished Senator from New Hampshire that he would be happy to withdraw his amendment if the distinguished Senator from Pennsylvania would withdraw his, in order that the many religious societies which are interested in the free entry of religious monuments and other articles might have the relief to which they seem to me to be entitled.

I know that all of us, whatever our race, religion, or creed, or of no creed whatsoever, are anxious to have this done. I fear the adoption of the amend-

ment of the distinguished Senator from New Hampshire might jeopardize the basic legislation.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. KEATING. I yield to the Senator from Pennsylvania without losing my right to the floor.

Mr. CLARK. I hope the Senate is in a mood to seek a vote on the Cotton amendment, the Clark amendment, and the bill. I think I can say with some certainty that if the Cotton amendment is adopted, the bill will not pass the House before it adjourns. I have every reason to believe that if the Clark amendment is adopted, the bill will pass the House and will be signed by the President.

Of course, the Senator from New York and any other Senator who wishes to help defeat either or both amendments at this time of evening, can certainly do so, by talking at length if he wishes to do so. I ask him in all candor not to do that, but to let the Senate vote on the Cotton amendment.

If the Cotton amendment is adopted, I shall be perfectly happy to withdraw my amendment.

In my opinion, if the Cotton amendment is adopted, the bill will not become law. I think we ought to pass the bill in a form in which it will be enacted into law. I hope the Cotton amendment will be rejected.

Mr. KEATING. Mr. President, I believe the answer of the distinguished Senator from Pennsylvania is good. I am informed that there is a movement afoot to add to this measure an amendment relating to the Chicago water diversion. Unless there is a disposition on the part of interested Senators to withdraw their amendments, I very much fear that fonts, altars, pulpits, and communion tables will be in jeopardy.

Mr. CASE of South Dakota. Mr. President, will the Senator from New York yield?

Mr. KEATING. I yield provided I do not lose the floor.

Mr. CASE of South Dakota. If the Senator from South Dakota correctly understands the parliamentary situation, it is that the yeas and nays have been ordered on the Cotton amendment to the Clark amendment. Therefore, the Cotton amendment could not be withdrawn except by unanimous consent; and I should object to its being withdrawn.

However, the Senator from Pennsylvania could withdraw his amendment, on which the yeas and nays have not been ordered, and that would carry the Cotton amendment down with it. In that way, we could return to the original bill.

The PRESIDING OFFICER. The Senator from South Dakota has stated a correct interpretation of the parliamentary situation.

Mr. AIKEN. Mr. President, will the Senator from New York yield?

Mr. KEATING. Mr. President, I ask unanimous consent that I may yield to the distinguished Senator from Vermont without losing the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. AIKEN. I am sure the Senator from New York does not realize the position in which the Senators from Vermont are being placed by this proposed legislation tonight. We bring up a bill, first, to provide for the free importation of headstones so long as they have some statuary connected with them. If this language is not properly interpreted, it will mean that the second largest industry in Vermont will go down the drain, because I think the second largest manufacturing industry in Vermont is headstones and other articles made from granite and marble, which would be disastrously and severely affected by the enactment of the bill.

If it becomes necessary to vote for the amendment offered by the Senator from New Hampshire in order to save Vermont's headstone industry, then we will lose an equal share of the State's revenue which is now being collected from New Hampshire residents who find it more profitable to work in Vermont than they do on their own side of the Connecticut River.

New Hampshire can make an offer like this because it has other sources of revenue in the southeast corner of the State. They have an institution known as Rockingham Racetrack. It is not far from the Massachusetts border. I understand a good many million dollars a year flow up north into New Hampshire. A considerable part of this money never goes back over the border.

New Hampshire is not satisfied with that, however. Another racetrack has been established in the other corner of the State, where Massachusetts and Vermont come together, and the spending power of some Vermonters has been seriously reduced since that institution was installed.

The Senator from New York, of course, might not have sympathy for us, because only 15 minutes' drive from the Vermont border is Saratoga.

I simply ask the Senate: Please let us in Vermont keep something. We would like to keep the headstone industry. We would like to keep some of the money which has been in the State, as well. However, the Senator from Vermont is really perplexed, if he has come to the point where he has to vote for the amendment of the Senator from New Hampshire in order to preserve the headstone industry of Vermont.

Mr. KEATING. Mr. President, I must first reply to the Senator from Vermont. I think his point is well taken. I call his attention to the fact that this proposal is directed very much at Vermont, because it refers to "statuary" as defined in the law.

I know that Vermont marble is the finest there is. It is sometimes alleged that it comes from New Hampshire. I have heard that from the Senator who has offered the amendment.

His attack is directed squarely at the State of the distinguished Senator from Vermont and I am very sympathetic with him. I hope he is equally sympathetic with the fight in which I am cast, in which the distinguished Senator from New Hampshire, in his eagerness and zeal to protect the interests of his own people, and in that Daniel Webster manner to which we have become accustomed—states that he is injuring those States which are now acting in accordance with the law which we passed, and are permitting this deduction to be made.

Employees in a given State who come from another State, and use all the facilities and have police and fire protection must help to provide these vital public services. They do not bring a police brigade with them. They do not bring a fire engine with them. They do not bring a full supply of drinking water with them when they come from neighboring States to work in the State of New York.

We feel that that proportion of the tax which is properly apportioned to their total earnings—that is, the earnings which they make in New York—is properly subject to the New York State income tax.

I hope the distinguished Senator from Pennsylvania will take advantage of the parliamentary suggestion made by the Senator from Vermont and will withdraw his amendment. That will dispose of the parliamentary tangle into which we have gotten ourselves.

The proper way to resolve this entire problem is by establishing a joint committee on Federal-State economic relations. Many Senators, including myself, have introduced such legislation. There is much merit in the observations made by the distinguished Senator from New Hampshire. He should be heard. He should have a forum other than this body, at this hour of the night. He should be able to present his case in orderly fashion, and such a committee would be able to consider it.

I ask unanimous consent that I may yield again to the Senator from Vermont, without losing the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. AIKEN. Mr. President, the Senator from New York has referred to Daniel Webster. I should like to point out that New Hampshire's second institution of parimutuel learning is practically on the spot where Daniel Webster had his case against the devil. All I say is that it is too bad that Daniel is not there now, because I think he would have another case. [Laughter.]

Mr. KEATING. Mr. President, I hope the Senator from Pennsylvania will see his way clear to withdraw his amendment.

Any proposal to limit the power of the States to tax the personal incomes of nonresidents earned within such States is of great interest to the State of New York. New York derives approximately $30 million annually in revenue from such taxes, primarily from New Jersey and Connecticut residents who work in New York City and other metropolitan areas of New York.

I am entirely in sympathy with the problems the distinguished Senators from Connecticut and New Jersey and New Hampshire face in this connection, and I hope they will be equally sympathetic with the efforts I am making to

see that there be no interference with this very important $30 million of annual revenue to the State of New York.

Mr. BUSH. Mr. President, will the Senator from New York yield?

Mr. KEATING. Mr. President, I ask unanimous consent that I may yield to the Senator from Connecticut, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUSH. I wish to join the Senator from New York in urging the Senator from Pennsylvania to withdraw his amendment. It happens that at this time New York and New Jersey and Connecticut, through their Governors, are in the process of negotiation respecting the matter of taxes by one State upon the citizens of another State who may earn their livelihood, or part of it, within one of those States. The fact that these negotiations are under way would compel me—regardless of how I felt about the merits of the Clark amendment—to vote to kill it, no matter which way I had to vote to do so.

Therefore, I hope very much that the Senator from Pennsylvania will withdraw his amendment, and will permit us to proceed with the bill itself, as recommended by the Senator from New York.

Mr. KEATING. Mr. President, I am very grateful to the Senator from Connecticut for his suggestion and for the statesmanship attitude he has taken in this matter.

The Governors of the several States, including New York, affected by this bill are in the process of negotiation. I very sincerely hope the matter can be worked out.

I have always been sympathetic toward the Connecticut and the New Jersey residents affected by this problem. I think they have a case. I think they have a point to be made. The Governor of New York has evidenced a complete willingness to sit down with them. This has been evidenced by a number of conferences and discussions among the Governors. I feel sure that something which will be mutually satisfactory can be worked out.

Mr. CASE of New Jersey. Mr. President, will the Senator from New York yield?

Mr. KEATING. Mr. President, I ask unanimous consent that I may yield to the Senator from New Jersey, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CASE of New Jersey. I thank the Senator from New York for yielding to me.

I should like to ask him whether in any of these discussions he has heard any suggestion beyond the possibility of equalizing treatment, so far as deductions are concerned, as between residents of New York and residents of New Jersey, and whether any suggestion has been made to give residents of New Jersey who work in New York credit for the taxes they paid to the State of New Jersey—or, in substance, something similar to the reciprocity in regard to income tax payments, which New York allows, but which is not allowed in New Jersey, simply because New Jersey does not choose to raise its revenue by levying income taxes on New Jersey residents.

Mr. KEATING. I am not familiar with the negotiations which are going on, although I know there have been negotiations. I have confidence in the fairness and good faith of those who are conducting the negotiations for my State and for the other States involved.

Mr. CASE of New Jersey. If I may say——

Mr. KEATING. Mr. President, I ask unanimous consent that I may yield further to the Senator from New Jersey, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CASE of New Jersey. I thank the Senator from New York.

Let me say that I fully accept his utter good faith and sincerity here. He is not acting in character in his objection to this particular amendment; but that is an understandable fault, and he could not be expected easily to do otherwise.

The fact is—and I think I know this to be true—that in all the discussions about easing the burden of the New York income tax upon New Jersey residents, there has been no suggestion beyond a mere palliative of equalizing deductions from income received by New Jersey residents with those allowed New York residents; and there has been no suggestion of any real easing of the burden of double taxation upon New Jersey residents.

I thank the Senator from New York for yielding.

Mr. KEATING. I thank the Senator from New Jersey for his contribution.

I have not participated in the negotiations, and there is really no reason why I would have detailed knowledge about them. I have great confidence in those who are conducting them.

I am very grateful that the Senator understands the position in which I find myself—namely, that the State of New York is under attack by the Senator from New Jersey, through his amendment, probably not to the extent of the $30 million a year, but as regards any Federal employees who might be working in the State of New York and who might be coming there, daily, from the adjoining States.

Mr. COTTON. Mr. President, will the Senator from New York yield?

Mr. KEATING. Mr. President, I ask unanimous consent that I may yield to the Senator from New Hampshire, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COTTON. Mr. President, I merely wish to make clear that I was not in any sense attacking New York or any other State. It would be a gross violation of the rules of the Senate, and I would never dream of doing it. I expect the Senator from New York to uphold his State in all its privileges and rights.

I wish to say—and I shall be brief, because at this hour it is unfortunate to have this prolonged debate—that I was amazed at the statement made by my friend, the Senator from Pennsylvania, to the effect that if his amendment were adopted, it would be passed by the House and would be signed by the President.

I have information—which I think is perhaps nearly as accurate as that had by the Senator from Pennsylvania—that if my amendment is adopted and if this matter is reopened at this time, it will not pass the House. So probably we are engaged in this struggle fruitlessly, at this late hour.

Of course, the Senator from Pennsylvania may have more of a pipeline to the White House than I have, although he is not one of the Members whom I would expect to know what the President would do in any given set of circumstances—although perhaps the Senator does.

But I believe that the best thing which could be done under the circumstances would be for the Senator from Pennsylvania to withdraw his amendment, because it opens up, in the closing hours of the session, a situation about which many of us feel very strongly, as we have stated.

The amendment will not get us anywhere. So I hope the Senator from Pennsylvania will withdraw it. If his amendment were adopted and were tacked onto this bill, it would only relieve the distress of the Senator from Vermont, by resulting in the purchase of one of the famous Vermont tombstones to be placed over this legislation. [Laughter.]

Mr. KEATING. Mr. President, in reply to the statement made by the Senator from New Hampshire, I feel certain that the Senator from Pennsylvania does not have a pipeline to the White House that is not available to the Senator from New Hampshire, who, I know, is so highly regarded by the President of the United States.

I feel certain that there is no concrete basis for the statement of the distinguished Senator from Pennsylvania.

Mr. JOHNSTON of South Carolina and Mr. ANDERSON addressed the Chair.

Mr. KEATING. Mr. President, I ask unanimous consent that I may yield to the distinguished Senator from South Carolina——

Mr. ANDERSON. Mr. President, I have a very short privileged matter.

Mr. KEATING. I ask unanimous consent that I may yield to the distinguished Senator from New Mexico for a privileged matter, without losing the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONVEYANCE OF CERTAIN LAND OF THE UNITED STATES IN TRUST TO CITIZEN BAND OF POTAWATOMI INDIANS OF OKLAHOMA—RETURN OF BILL TO HOUSE

Mr. ANDERSON. Mr. President, I ask that the Chair lay before the Senate a request from the House for the return of H.R. 7990, a bill to convey certain land of the United States in trust to the Citizen Band of Potawatomi Indians of Oklahoma, with the Senate amendments thereto, and the message of the House thereon.

The PRESIDING OFFICER. The bill will be stated by title.

The CHIEF CLERK. A bill (H.R. 7990), to convey certain land of the United States in trust to the Citizen Band of Potawatomi Indians of Oklahoma.

Mr. ANDERSON. Mr. President, I ask unanimous consent that the request of the House may be complied with.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed, without amendment, the following bill and joint resolution of the Senate:

S. 3623. A bill to designate and establish that portion of the Hawaii National Park on the island of Maui, in the State of Hawaii, as the Haleakala National Park, and for other purposes; and

S.J. Res. 176. Joint resolution authorizing the preparation and printing of a revised edition of the Constitution of the United States of America—Analysis and Interpretation, published in 1953 as Senate Document No. 170 of the 82d Congress.

The message also announced that the House had passed the following bills of the Senate, severally with an amendment, in which it requested the concurrence of the Senate:

S. 1670. An act to provide for the granting of mineral rights in certain homestead lands in the State of Alaska; and

S. 3267. An act to amend the Act of October 17, 1940, relating to the disposition of certain public lands in Alaska.

The message further announced that the House had passed the following bills of the Senate, severally with amendments, in which it requested the concurrence of the Senate:

S. 1092. An act to provide for the construction of the Cheney division, Wichita Federal reclamation project, Kansas, and for other purposes;

S. 2195. An act to authorize the Secretary of the Interior to construct, operate, and maintain the western division of The Dalles Federal reclamation project, Oregon, and for other purposes; and

S. 3212. An act to direct the Secretary of the Interior to convey certain public lands in the State of Nevada to the county of Mineral, State of Nevada.

The message also announced that the House had agreed to the following concurrent resolutions of the Senate:

S. Con. Res. 86. Concurrent resolution authorizing the printing of additional copies of the hearings on employment, growth, and price levels;

S. Con. Res. 88. Concurrent resolution authorizing the printing of additional copies of the hearings on energy resources and technology;

S. Con. Res. 90. Concurrent resolution authorizing the printing of additional copies of the final report and indexes to hearings and reports of the Select Committee on Improper Activities in the Labor or Management Field;

S. Con. Res. 91. Concurrent resolution authorizing the reprinting of additional copies of hearings before the Subcommittee on Agreements for Cooperation of the Joint Committee on Atomic Energy on Amending the Atomic Energy Act of 1954 with respect to exchange of military information and material with allies during the second session of the Eighty-fifth Congress;

S. Con. Res. 96. Concurrent resolution authorizing the printing of a revised edition of the Internal Security Manual as a Senate document; and providing for additional copies;

S. Con. Res. 97. Concurrent resolution authorizing the reprinting of additional copies of the Joint Committee print entitled "Summary Analysis of Hearings, June 22–26, 1959, on Biological and Environmental Effects of Nuclear War" printed for the use of the Joint Committee on Atomic Energy during the 86th Congress, 1st session;

S. Con. Res. 99. Concurrent resolution to print as a Senate document a compilation of studies on United States-Latin American relations; and

S. Con. Res. 107. Concurrent resolution printing for the use of the Senate Committee on the Judiciary additional copies of certain publications of its Internal Security Subcommittee.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 8712. An act to amend the act of August 9, 1955, to authorize longer term leases of Indian lands on the Agua Caliente (Palm Springs) Reservation and the Seminole Reservations in Florida;

H.R. 12574. An act to amend the Longshoremen's and Harbor Workers' Compensation Act, so as to provide that an injured employee shall have the right to select his own physician, and for other purposes; and

H.R. 12777. An act to amend the Longshoremen's and Harbor Workers' Compensation Act, as amended, to provide increased benefits in case of disabling injuries, and for other purposes.

The message also announced that the House had agreed to a concurrent resolution (H. Con. Res. 693) authorizing the printing of additional copies of House Document No. 198 of the 84th Congress, entitled "The Commission on Intergovernmental Relations," in which it requested the concurrence of the Senate.

EXECUTIVE REPORTS OF COMMITTEE ON POST OFFICE AND CIVIL SERVICE

Mr. MANSFIELD. Mr. President, as in executive session——

Mr. KEATING. Mr. President, I ask unanimous consent that I may yield to the distinguished Senator from South Carolina, who I understand has some nominations to present, without losing the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON of South Carolina. Mr. President, from the Committee on Post Office and Civil Service I report favorably 173 nominations for postmasters.

Both Senators in each State have recommended these nominations. There is no opposition to them. Everything has been cleared.

I ask unanimous consent to file the reports and to act on the nominations, since we will not be able to put them on the Executive Calendar. I ask that the nominations be confirmed.

Mr. KEATING. Mr. President, I wish to commend the distinguished Senator from South Carolina for the action he has taken.

The PRESIDING OFFICER. The unanimous-consent request was that the names be submitted and acted upon.

Is there objection? The Chair hears none.

Mr. JOHNSTON of South Carolina. Mr. President, I ask that the nominations be considered en bloc.

The PRESIDING OFFICER. The question is on agreeing to the nominations en bloc.

Without objection, the nominations are considered en bloc; and, without objection, they are confirmed.

Mr. JOHNSTON of South Carolina. Mr. President, I ask that the President be notified immediately of the nominations today confirmed.

The PRESIDING OFFICER. Without objection, the President will be so notified.

(For nominations confirmed, see end of today's proceedings.)

IMPORTATION OF CERTAIN ARTICLES FOR RELIGIOUS PURPOSES

The Senate resumed the consideration of the bill (H.R. 4384) to amend paragraph 1774 of the Tariff Act of 1930 with respect to the importation of certain articles for religious purposes.

Mr. KEATING. Mr. President, I wish to propound a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KEATING. If I were to move to table the amendment offered by the distinguished Senator from Pennsylvania, and that motion did not prevail, would I then be entitled to recognition on the amendment offered by the distinguished Senator from New Hampshire?

The PRESIDING OFFICER. The Chair is advised that the Senator would then have lost the floor.

Mr. KEATING. A further parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KEATING. Would I then be entitled to gain the floor before action was taken on the so-called Cotton amendment?

The PRESIDING OFFICER. The Senator may make a request to regain the floor. If he speaks first and is so recognized, he then has the floor.

Mr. KEATING. What I mean is, would I be entitled to the floor prior to action on the Cotton amendment?

The PRESIDING OFFICER. The amendment would still be subject to debate.

Mr. KEATING. The Cotton amendment is subject to debate?

The PRESIDING OFFICER. Yes.

Mr. KEATING. I move to lay on the table the amendment offered by the Senator from Pennsylvania.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment offered by the Senator from Pennsylvania.

Mr. CLARK. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. CLARK. The motion is to table which amendment? The Clark amendment is not the pending business. The yeas and nays have been ordered on the Cotton amendment.

The PRESIDING OFFICER. The Chair is advised it is in order to move to table the primary amendment, and it would take the secondary amendment with it.

Mr. CLARK. Mr. President, will the Senator yield so I may make a statement?

The PRESIDING OFFICER. A motion to table is not debatable.

The question is on agreeing to the motion to table.

Mr. COTTON. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. COTTON. Mr. President, I suggest the absence of a quorum.

Mr. President, I thought the Chair stated there was not a sufficient second.

The PRESIDING OFFICER. There was a sufficient second.

Mr. COTTON. I withdraw the suggestion of the absence of a quorum.

Mr. KUCHEL. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. KUCHEL. Will the Chair state the motion before the Senate?

The PRESIDING OFFICER. The question before the Senate is on agreeing to the motion to table the Clark amendment. The yeas and nays have been ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from North Dakota [Mr. BURDICK], the Senator from Colorado [Mr. CARROLL], the Senator from Illinois [Mr. DOUGLAS], the Senator from Mississippi [Mr. EASTLAND], the Senator from Arizona [Mr. HAYDEN], the Senator from Alabama [Mr. HILL], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Oregon [Mr. LUSK], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Georgia [Mr. RUSSELL], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

I further announce that the Senator from Missouri [Mr. HENNINGS] is absent because of illness.

I further announce that, if present and voting, the Senator from North Dakota [Mr. BURDICK], the Senator from Colorado [Mr. CARROLL], the Senator from Illinois [Mr. DOUGLAS], the Senator from Mississippi [Mr. EASTLAND], the Senator from Arizona [Mr. HAYDEN], the Senator from Missouri [Mr. HENNINGS], the Senator from Alabama [Mr. HILL], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from Ohio [Mr. YOUNG] would each vote "nay."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BEALL] is necessarily absent.

The Senator from Iowa [Mr. MARTIN] is absent by leave of the Senate on official business.

I also announce that the Senator from Kansas [Mr. CARLSON], the Senator from Arizona [Mr. GOLDWATER], and the Senator from Massachusetts [Mr. SALTONSTALL] are necessarily absent.

The result was announced—yeas 33, nays 47, as follows:

[No. 320]

So the motion to table Mr. CLARK's amendment was rejected.

Mr. KERR. Mr. President, I move to table the amendment offered by the Senator from New Hampshire [Mr. COTTON].

Mr. COTTON. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment offered by the Senator from New Hampshire [Mr. COTTON]. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from North Dakota [Mr. BURDICK], the Senator from Colorado [Mr. CARROLL], the Senator from Illinois [Mr. DOUGLAS], the Senator from Mississippi [Mr. EASTLAND], the Senator from Arizona [Mr. HAYDEN], the Senator from Alabama [Mr. HILL], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Montana [Mr. MURRAY), the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Georgia [Mr. RUSSELL], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

So the motion to table Mr. COTTON's amendment to the amendment of Mr. CLARK was agreed to.

Mr. CLARK. Mr. President, I shall not detain the Senate long. I merely wish to point out that a rather substantial majority of the Senate has voted that it does not wish to defeat the Clark amendment. It has been said that the Senate is the only legislative body in the world which is unable to act when a majority of its Members is ready to act. Under our rules that is true. A vote on the

merits of the Clark amendment can be prevented by any one Senator.

I am conscious of having taken probably more time than I should have taken on the last night before the adjournment of the Senate. I have no desire whatever to defeat the major bill to which my amendment is offered. I hope Senators will not avail themselves of their undoubted right to discuss the amendment, because in that case the only decent thing to do would be to withdraw it, and I would not wait long before I did withdraw it.

However, I say to Senators who oppose the amendment if they want to have it defeated by my withdrawing it, that is their right, under the rules of the Senate.

I hope that will not be done. I hope Senators will permit the amendment to come to a vote and that it will be passed. All I can say to my colleagues is: "I am in your hands, gentlemen. Do as you will with me."

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified, offered by the Senator from Pennsylvania [Mr. CLARK].

Mr. CASE of South Dakota. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from North Dakota [Mr. BURDICK], the Senator from Illinois [Mr. DOUGLAS], the Senator from Mississippi [Mr. EASTLAND], the Senator from Arizona [Mr. HAYDEN], the Senator from Alabama [Mr. HILL], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Georgia [Mr. RUSSELL], the Senator from Ohio [Mr. YOUNG] are absent on official business.

I further announce that the Senator from Missouri [Mr. HENNINGS] is absent because of illness.

I further announce that, if present and voting, the Senator from North Dakota [Mr. BURDICK], the Senator from Illinois [Mr. DOUGLAS], the Senator from Mississippi [Mr. EASTLAND], the Senator from Arizona [Mr. HAYDEN], the Senator from Missouri [Mr. HENNINGS], the Senator from Alabama [Mr. HILL], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Georgia [Mr. RUSSELL], the Senator from Ohio [Mr. YOUNG] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from Maryland [Mr. BEALL] is necessarily absent.

The Senator from Iowa [Mr. MARTIN] is absent by leave of the Senate on official business.

I also announce that the Senator from Kansas [Mr. CARLSON], the Senator from Arizona [Mr. GOLDWATER], and the Senator from Massachusetts [Mr. SALTONSTALL] are necessarily absent.

The result was announced—yeas 50, nays 32, as follows:

[No. 322]

So Mr. CLARK's amendment, as modified, was agreed to.

Mr. CLARK. Mr. President, I move that the Senate reconsider the vote by which the amendment was agreed to.

Mr. JOHNSON of Texas. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. HART. Mr. President, for myself and on behalf of the distinguished senior Senator from Michigan [Mr. MCNAMARA], and the distinguished junior Senator from Massachusetts [Mr. KENNEDY], I offer an amendment and ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. At the end of the bill it is proposed to add the following new section:

SEC. —. The Plumbers Union Local Numbered 12 Pension Fund, which was established by a collective bargaining agreement effective September 1, 1954, and which has been held by the Internal Revenue Service to constitute a qualified trust, under section 401(a) of the Internal Revenue Code of 1954, and to be exempt from taxation under section 501(a) of said Code, for years ending on or after June 3, 1959, shall be held and considered to have been a qualified trust under said section 401(a), and to have been exempt from taxation under said section 501(a), for the period beginning on September 1, 1954, and ending on June 3, 1959, but only if it is shown to the satisfaction of the Secretary of the Treasury or his delegate that the trust has not in this period been operated in a manner which would jeopardize the interests of its beneficiaries.

Mr. HART. Mr. President, the amendment is identical with several which were agreed to earlier this week on other bills. I am advised that the amendment is acceptable to the chairman. Is my understanding correct?

Mr. KERR. Mr. President, the amendment is acceptable to the Committee on Finance. It is also acceptable to the Committee on Ways and Means of the House of Representatives, on the basis of others which they have taken similar to it. The amendment is acceptable to the Treasury. I regard it as a noncontroversial amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Michigan.

The amendment was agreed to.

Mr. MCCARTHY. Mr. President, I have an amendment at the desk. The amendment was considered by the Committee on Finance. I should like to ask one or two questions of the Senator from Oklahoma with regard to the amendment, which relates to a rather technical question of the carryover of certain losses of a local public transit system.

My information is that the amendment is acceptable to the Committee on Ways and Means, or at least to the chairman of that committee. I am hopeful it will be acceptable to a majority of the members of the Committee on Finance. However, it is somewhat controversial and somewhat technical. I inquire of the senior Senator from Oklahoma whether he has any opinion with regard to the proposed legislation.

Mr. KERR. The Senator from Oklahoma is not averse to the measure. He things it has merit and is intended to be for the benefit of a worthy taxpayer. However, I have had occasion during the evening to discuss the amendment again with representatives of the Treasury, and they advise me that they are in opposition to the amendment and feel that they would be required to advise the Executive of their opposition to the amendment. That is the only information I can give to the Senator from Minnesota, much as I should like to be able to give him different information.

Mr. MCCARTHY. Is it the opinion of the senior Senator from Oklahoma, then, that if the amendment were offered, adopted, and added to the bill, the entire bill, including whatever it might carry to the White House, would be in grave danger of being vetoed?

Mr. KERR. That is the opinion of the Senator from Oklahoma.

Mr. MCCARTHY. Does it appear to the Senator from Oklahoma that this will be the last tax measure upon which the Senate and Congress will have an opportunity to act in this session?

Mr. KERR. I cannot answer that question. I hope it will be; but then my hopes in that matter are not binding either on the Senate or the House.

Mr. MCCARTHY. The chances are that this may be the last tax measure, and if I were to offer that amendment now, it would prejudice and endanger everything in this bill?

Mr. KERR. I believe that is correct because, under the circumstances as I

view them, I doubt if there would be time for a conference.

Mr. McCARTHY. Mr. President, in view of the statement by the Senator from Oklahoma, and my own judgment as to the situation, I ask unanimous consent that I may have printed at this point in the RECORD a statement with respect to the proposed legislation. I withdraw my amendment.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MCCARTHY

CARRYOVER OF CERTAIN LOSSES OF LOCAL PUBLIC TRANSIT SYSTEMS

This provision relates to the net operating loss deduction. It is concerned with cases where street railways incurred large initial losses in converting to bus operations, losses so large that they cannot fully offset against income through the 2-year loss carryback or 5-year loss carryforward.

This provision provides that such losses, incurred in the period January 1, 1951, up to January 1, 1960, to the extent they cannot be offset against income through the carryback and carryforward provisions are to be treated as if they were losses sustained in the last taxable year before January 1, 1960 (or the last taxable year to which the losses may be carried if later). Thus, in effect, it generally allows an extra 5-year carryforward for these losses incurred in the years 1951–59 where they arise from conversions to bus operations. This extra 5-year carryforward will generally start with the year 1960.

This amendment treats with losses sustained in converting from a street railway system to buses by the Twin City Rapid Transit Co. of the Minneapolis-St. Paul metropolitan area. Its enactment will benefit its riders by allowing the company, for income tax purposes, an additional 5 years in which to absorb all or part of a remaining conversion loss of approximately $5,200,000.

Former management of this company has recently been convicted in Federal District Court in Minneapolis of defrauding the company at the time the company converted from streetcars to buses. The then management negligently ignored the adverse tax impact of a rapid conversion which was completed in about an 18-month period.

Had this company then been under ordinary prudent management, such conversion would have been accomplished over such period of years as would have been necessary to fully absorb the conversion loss sustained.

Small wage earners make up the core of bus riders. Values built up by them over the years should not be allowed to be forever lost because of corrupt management, over which bus riders had no control. The bus riders are the ultimate losers because the system's losses will have to be made up by higher fares. The riders will be paying Treasury a windfall not intended by Congress.

The result from a tax collection standpoint is that the Government comes out the same by the terms of this bill as it would have under ordinary careful management. The bill is not retroactive but applies to 1960 earnings on taxes payable in the year 1961 and to earnings of the company during the ensuing 4 years.

About a year ago the company was reorganized, and it is now operated under a board of directors dominated by community leaders, with a professional busman as general manager.

The Internal Revenue Code provides that any transit company may convert from a street railway to buses over a period of years, and losses thereby sustained are deductible against income. Other transit companies, when changing from streetcars to buses, took full advantage of the loss carryover provision in the law by converting over a period of many years. Treasury has recognized that this company sustained a conversion loss of $11 million.

The amendment does equity and assures to the company and its riders that the company will pay no more or no less in income taxes than it would have paid had its conversion been made over a longer period of time.

While many examples of remedial legislation such as this could be cited, perhaps the most specific in point is Public Law 189 passed by the 80th Congress in 1947. That act allowed retroactive relief to seven specified railroads involved in receivership proceedings by allowing them to utilize the 2-year net operating loss carryover benefits not otherwise allowable under the provisions of the code then in effect. Treasury made its report that it had no objection to the enactment of Public Law 189.

Mr. COOPER. Mr. President, I offer an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. At the end of the bill it is proposed to add the following new section:

SEC.—(a) The duty-free treatment provided for scrap tobacco and filler tobacco described in item B in the schedule to paragraph 2 of article II of the agreement between the United States of America and the Republic of the Philippines concerning trade and related matters during a transitional period following the institution of Philippine independence, signed at Manila on July 4, 1946, as revised by the agreement of September 6, 1955, shall apply to only such Philippine articles falling within the class specified in item B in the schedule to that paragraph 2 of article II as are certified by the Government of the Republic of the Philippines to have been allocated for exportation to the United States of America free of duty under the paragraph.

(b) This section shall take effect on the thirtieth day after the date of enactment of this Act.

Mr. COOPER. Mr. President, I believe I am correct in saying that the provisions of this amendment are the same as those contained in H.R. 3392, which was passed by the House. I believe also that I am correct in saying that this amendment, as H.R. 3392, has been considered by the Committee on Finance. I understand there is no objection to its being accepted. It does not involve a difficult problem.

This provision is the same as H.R. 3392 which was unanimously reported by the House committee and passed by the House. Its purpose is to limit imports of certain Philippine tobaccos that may be charged to the U.S. duty-free quota to those tobacco exports licensed by the Philippine Government, for charge against the quota.

The trade agreement between the United States and the Republic of the Philippines of July 4, 1946, as revised on September 6, 1955, provides for a duty-free import quota of 6,500,000 pounds of imported scrap and filler tobaccos of Philippine origin per year. Under the agreement this quota is to be reduced in progressive stages every 3 years until January 1, 1974, when the amount of the quota becomes nil. The present quota is 5,850,000 pounds per year. The Philippine Government has historically allocated the tariff-free quota among its tobacco producers based upon their past production records. To assure that the producers will receive the benefit of their allocated portions of the quota, the Philippine Government has controlled exports of such merchandise to the United States through an export licensing arrangement. Traditionally the tobacco exported from the Philippines to the United States has been of the cigar-filler types. The Philippine Government's export licensing arrangement has also had the effect of safeguarding the interests of traditional U.S. importers of such Philippine tobacco.

Recently, however, considerable quantities of low-quality, flue-cured tobacco, grown in the Philippines, have been exported to the United States. Although such tobacco has not been licensed by the Philippine Government for export to the United States, it was shipped to a third country and later transshipped to the United States.

This provision would prevent the circumvention of the control by the Philippine Government over the exports of Philippine tobaccos to the United States by providing that U.S. customs authorities shall only admit free of duty under the Philippine tobacco quota such tobacco as the Philippine Government has licensed for export to the United States free of duty under the provisions of paragraph 2 of article II of the Philippine-United States Trade Agreement.

The Government of the Republic of the Philippines has asked for United States assistance in administering its regulations on tobacco exports and to that end has asked that the United States accept for entry under the duty-free quota only those Philippine articles covered by the quota certificates and permits to ship issued by the Philippine Government.

Mr. President, I ask the Senator from Oklahoma if he will express his views upon the amendment.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator from Kentucky yield?

Mr. COOPER. I yield.

Mr. WILLIAMS of Delaware. I understand the majority leader is about ready to call up the sugar bill. I do not believe we shall be able to complete action on this bill in its entirety prior to that time. I was wondering if the Senator from Kentucky would be willing to withhold his amendment momentarily, so that while the Senate is working on the sugar bill the members of the Committee on Finance can consider the Senator's amendment.

Mr. COOPER. I do not want to hold up action on the sugar bill; but if my understanding is correct, H.R. 3392 has been passed by the House, and the Committee on Finance has no objection to it.

Mr. WILLIAMS of Delaware. Is the Treasury Department in favor of the Senator's amendment?

Mr. COOPER. It has been passed by the House.

Mr. WILLIAMS of Delaware. I do not recall any recommendations by the

Treasury Department in connection with this item.

Mr. KERR. If my information is correct, the bill has been passed by the House. So far as I know, it is entirely noncontroversial. It has not been approved by the Committee on Finance for the very simple reason that it was not presented to that committee.

The chairman of the Committee on Finance is present. It is his opinion that the bill is meritorious. It is the opinion of the Senator from Oklahoma that it is meritorious. So far as I am concerned, I recommend its approval.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kentucky.

The amendment was agreed to.

Mr. BUTLER. Mr. President, I offer an amendment and ask that its reading be dispensed with, but that it be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is at the end of the bill to add the following new section:

SEC. —. (a) Section 188 of the Internal Revenue Code of 1939 (relating to different taxable years of partner and partnership is amended—

(1) by striking out "if", and inserting in lieu thereof "(a) General Rule.—"if"; and

(2) by adding at the end of such section 188 the following new subsection:

"(b) Two-Man Partnership.—For the purpose of this chapter, the death of one of the partners of a partnership consisting of two members shall not, if the surviving partner so elects within one year after the date of enactment of this Act, result in the termination of the partnership or in the closing of the taxable year of the partnership with respect to the surviving partner prior to the time the partnership year would have closed if neither partner had died or disposed of his interest."

(b) The amendment made by subsection (a) shall apply with respect to taxable years of a partnership beginning after December 31, 1946, to which the Internal Revenue Code of 1939 applies. If refund or credit of any overpayment resulting from the application of the amendment made by subsection (a) of this section (including interest, additions to the tax and additional amounts), or an election under subsection (a), is prevented on the date of enactment of this Act, or within one year from such date, by the operation of any law or rule of law (other than section 3760 of the Internal Revenue Code of 1939 or section 7121 of the Internal Revenue Code of 1954, relating to closing agreements, and other than section 3761 of the Internal Revenue Code of 1939 or section 7122 of the Internal Revenue Code of 1954 relating to compromises), such election, or refund or credit of such overpayment, may, nevertheless, be made or allowed if such election is made or claim therefor is filed within one year after the date of enactment of this Act. No interest shall be allowed or paid on any overpayment resulting from the enactment of this Act.

Mr. BUTLER. Mr. President, this amendment has been cleared by the Finance Committee as a floor amendment, and I am advised by the chairman of the committee that he will accept the amendment. And I think the Senator from Oklahoma will accept it.

Mr. ANDERSON. Mr. President, will the Senator from Maryland yield?

The PRESIDING OFFICER (Mr. MUSKIE in the chair). Does the Senator from Maryland yield to the Senator from New Mexico?

Mr. BUTLER. I yield.

Mr. ANDERSON. Is not this a provision, however, that the President vetoed?

Mr. BUTLER. Yes, when it was in a private bill. But this provision has not been vetoed. An explanation of the bill is to be found in the RECORD.

Mr. ANDERSON. But this is the very provision the President vetoed.

Mr. BUTLER. No, it is not. The President vetoed a private bill—and did so erroneously, I think and, I believe, without just cause. But this provision has never been before the President.

Mr. ANDERSON. How does it differ from the private bill which was vetoed?

Mr. BUTLER. It changes the partnership division, and makes the law applicable to 2-man partnerships, rather than to 3-man, 4-man, and 5-man partnerships, and so forth. Furthermore, I do not think the provision will affect any but this one person.

Mr. GORE. Mr. President, I have been listening as best I could to the adoption of tax amendments at midnight on the night of the sine die adjournment; and now there has been presented a bill for retroactive tax relief—a provision which has been vetoed by the President of the United States, and now is offered as an amendment at 4 minutes past 1 in the morning.

Mr. BUTLER. Mr. President, who has the floor?

Mr. GORE. Mr. President, I yield for a parliamentary inquiry.

Mr. BUTLER. The Senator from Tennessee yields? I have the floor, Mr. President; and I do not yield.

Mr. GORE. I understood the Chair to recognize me.

The PRESIDING OFFICER. The Senator from Tennessee has the floor.

Mr. BUTLER. Mr. President, I have the floor, do I not?

Mr. GORE. Mr. President, the amendment is subject to debate. I requested recognition, and was recognized.

Mr. BUTLER. I had the floor. How did I get taken off the floor?

Mr. GORE. Mr. President, I shall desist, in order to let the Senator from Maryland proceed.

Mr. BUTLER. I wish to state that the hour has nothing to do with the amendment. This is just an amendment to the income tax code. It is perfectly proper as a part of this bill. It has been passed by the Finance Committee, by a vote of 15 to 2. It happens that the Senator from Tennessee was not one of those who voted for it. If he wishes to speak against it, that is his privilege; he can speak at length, as he may see fit. But the amendment is not going to be withdrawn; I shall insist on having a vote taken on the amendment.

ORDER OF BUSINESS

Mr. JOHNSON of Texas. Mr. President, will the Senator yield to me, for a statement?

Mr. GORE. I yield.

Mr. JOHNSON of Texas. Mr. President, in view of the controversy which prevails with regard to this amendment, and in view of the fact that unless we act on the sugar bill at a reasonable hour, I am fearful that it will not be acted on by the House, because at a much later hour the House may not be there to act. I wonder whether it will be agreeable to the Senator who is handling this measure to have the pending bill temporarily laid aside, so that we may try to proceed with the consideration of the sugar bill, under a unanimous-consent agreement. Then perhaps we can work out our problems here and can try to get both of the bills passed. But we need to get the sugar bill to conference, if there is to be a conference. The House is waiting on us. And it will not do us any good to work on this bill after the House goes out.

The PRESIDING OFFICER. Is there objection?

Mr. CLARK. Mr. President, reserving the right to object, I wish to ask a question: If we adopt the proposed procedure, will not it kill all chance of having the Senate pass the measure now pending and have it go over to the House?

Mr. JOHNSON of Texas. I do not think so. I will try to get an agreement, in connection with the sugar bill, of 30 minutes on amendments and 30 minutes on the bill, so that the sugar bill may be passed and may be sent to conference; and then we shall be able to work on any other measures we have in process this evening. That is what I hope to do.

Mr. BUTLER. Mr. President, if the pending bill is temporarily laid aside, in order to permit the Senate to take up the sugar bill, following the disposition of the sugar bill, will the bill now pending be taken up again, and will it then have its present status?

Mr. JOHNSON of Texas. Yes, and that is what I shall ask.

Mr. President, I ask unanimous consent that the pending bill and the amendment to it be temporarily laid aside, and that the Senate proceed to the consideration of House bill 13062, the sugar bill, reported by the Finance Committee; that, in accordance with the usual form, there be not to exceed 30 minutes on amendments and 30 minutes on the bill, to be equally divided between the proponents and the opponents.

The PRESIDING OFFICER. Is there objection?

Mr. ENGLE. Mr. President, will the Senator from Texas yield?

Mr. JOHNSON of Texas. I yield.

Mr. ENGLE. With reference to the amendments, will the rule of germaneness apply?

Mr. JOHNSON of Texas. Yes.

Mr. ENGLE. Will the Senator accept the amendments at the desk?

Mr. JOHNSON of Texas. If they comply with the rule of germaneness.

Mr. ENGLE. I have an amendment at the desk.

Mr. JOHNSON of Texas. It is germane to the sugar bill?

Mr. ENGLE. I am not sure.

Mr. JOHNSON of Texas. If it is germane, it will be in order.

Mr. GORE. Mr. President, reserving the right to object, those of us who are in the rear of the Chamber cannot hear.

The PRESIDING OFFICER. The Senate will be in order.

Mr. JOHNSON of Texas. The Senator from California has asked whether an amendment which he has at the desk will be germane if offered as an amendment to the sugar bill. I had not previously heard of the amendment; and I now propound to the Chair or to the Parliamentarian the question whether the amendment will be germane to the sugar bill.

The PRESIDING OFFICER. The Chair understands that the amendment of the Senator from California will not be in order if a rule of germaneness is applied in connection with amendments to the sugar bill.

Mr. DIRKSEN. Mr. President, that looks like a pistol effort. When the majority leader is trying to have action taken on a measure for which the House is waiting, it would not be fair for an attempt to be made to have the Senate act on an amendment which relates to dates and walnuts.

Mr. JOHNSON of Texas. There are plenty of other bills to which such an amendment could be proposed; and the sugar bill needs to go to conference.

Mr. ENGLE. I have discussed the amendment with the chairman, and it has been accepted by both sides.

Mr. DIRKSEN. But it has no business as an amendment to the sugar bill.

Mr. JOHNSON of Texas. Furthermore, it would not be acceptable to the President, and thus we would not get a Sugar Act.

I would have no objection to having the Senator offer the amendment. As a matter of fact, I should like to see it offered as an amendment to another bill. But I do not want to have the sugar bill vetoed.

Mr. ENGLE. I do not, either.

The PRESIDING OFFICER. Is there objection?

Mr. LAUSCHE. Mr. President, I have grave doubts about the wisdom of collaborating in an effort to save time, if in the process of attempting to save time I am going to aid in the procedure of tying about 8 or 9 ungermane amendments to a tariff bill.

Mr. JOHNSON of Texas. But we propose that the pending bill be laid aside.

Mr. LAUSCHE. If the Senator from Texas will listen, he will understand that I said I do not want to collaborate in an effort to save time, by entering into an agreement in regard to consideration of the sugar bill, if the result will be that the time thus saved will be used for the purpose of offering numerous new amendments to the statuary bill. How far are we going?

I may as well say now that if this train of events is to continue, I contemplate offering an amendment to tie to this statuary and altar bill a prohibition against the malicious destruction of communications lines—either telegraph, telephone, or otherwise; and I also contemplate offering an amendment which will bring before the Senate the passport bill, which has not been brought up.

However, I am not going to agree to try to save time, in order to make possible a continuation of this parade. So I object.

Mr. BUTLER. Mr. President, will the Senator yield for a moment?

Mr. LAUSCHE. I do not have the floor.

The PRESIDING OFFICER. The Senator from Texas has the floor.

Mr. LAUSCHE. It is said that the consent agreement is merely on the sugar legislation. I repeat, the time we shall save on sugar legislation will be devoted to this spurious and sort of foreign method of getting legislation enacted, tying it on to the altar bill and the church statuary bill. If we start with taxes, then we will get into labor laws, and all the others.

Mr. BUTLER. Mr. President, who has the floor?

Mr. JOHNSON of Texas. Mr. President——

The PRESIDING OFFICER. The Senator from Texas.

Mr. BUTLER. Mr. President, will the Senator yield to me so I may make a brief comment to the Senator from Ohio?

Mr. JOHNSON of Texas. If I have the floor. I wanted to get an agreement. Perhaps we ought to go over until tomorrow.

Mr. BUTLER. I was perfectly willing not to offer my amendment, if the Senator from Pennsylvania had withdrawn his amendment. I had no desire to tack these many amendments the Senator is complaining of on to this bill. I said I would not offer it if he would withdraw his amendment. This amendment has been passed by the committee by a vote of 15 to 2, and there is no reason why it should not be offered at this time.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. BUTLER. I yield.

Mr. ANDERSON. I wish the Senator would check the records of the Finance Committee. This matter was not passed by a vote of 15 to 2. The clerk polled the members of the Committee on Finance as to whether it should come to the floor. I am one who voted "no," because it is contrary to the rules of the Senate to do this kind of thing. I think that is what the vote was. I wish the Senator would check the records.

Mr. BUTLER. Is it contrary to the rules to offer an amendment?

Mr. ANDERSON. No; it is contrary to poll Members, because they should be personally present.

Mr. BUTLER. I do not know how the vote was arrived at, but there was a vote of 15 to 2 in favor of offering the amendment by the Finance Committee of the U.S. Senate.

Mr. LAUSCHE. Mr. President, an amendment will be offered to give subsidies to the fluorspar mining industry. That is the next amendment in order. Last week we gave a subsidy to zinc and lead.

Mr. BUTLER. I hope my position is clear. I had no desire to encumber the bill.

Mr. LAUSCHE. Mr. President, I think I have the floor.

Last week we gave subsidies for lead and zinc. Today it is going to be given to fluorspar. It is not going to be given except after a very vigorous fight on the floor. I am not going to tolerate fluorspar being given preference when no action is contemplated to be taken on bills on the calendar that involve the very safety of the Nation. The Atomic Energy Commission, the Defense Department, and the civil defense are begging for legislation that will make it a Federal crime to maliciously destroy telegraph and telephone lines and other communication facilities needed for the security of the country. No thought is given to that proposal. The State Department is begging for legislation to enable it to stop Communists from going to the Soviet. No thought is given to that. Yet the greatest significance is being given to a lot of claptrap propositions here.

I will not cooperate, in the matter of saving time, when the Senate refuses to listen to the plea of the Civilian Defense, the Defense Department, and the Atomic Energy Commission to enact legislation that will make it a Federal crime to destroy communication lines.

How can it be said that subsidies for fluorspar are important, but the security of the country, in trying to make certain that our communication lines will be kept intact, should be looked upon indifferently? How can it be said that statuary or altar legislation is important, while in the same breath we refuse to do anything about passports?

I believe I have some concept of what the security of the country means. Not a single piece of legislation passed here tonight is as important as the passport bill and the communications bill. We are burying our heads, railroading through gifts and subsidies and relief bills, but not a word is said about the security of the country. We talk about the Congo, and Katanga, and Cuba, and East Berlin. We talk about espionage. When we are asked to do something, we turn deaf ears to the pleas of the people of the country and those who are responsible for the maintenance of security within our land.

AMENDMENT OF THE SUGAR ACT OF 1948, AS AMENDED

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of H.R. 13062.

Mr. LAUSCHE. Is that the sugar bill?

Mr. JOHNSON of Texas. Yes.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 13062) to amend the Sugar Act of 1948, as amended.

Mr. LAUSCHE. Mr. President, I object.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. DIRKSEN. Mr. President, I submit a substitute.

The PRESIDING OFFICER. The Chair will state to the Senator from Illinois that a substitute is not yet in order.

Mr. DIRKSEN. I will leave it at the desk and call it up as soon as it is.

The PRESIDING OFFICER. The clerk will state the first committee amendment.

Mr. BYRD of Virginia. Mr. President, I ask unanimous consent that the committee amendments be considered and adopted en bloc.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The committee amendments agreed to en bloc are as follows:

On page 3, line 15, after the word "subsection", to strike out "to the extent that such further purchases are in excess of an amount equivalent to the amount established under section 202(e)"; in line 23, after the word "to", where it appears the second time, to strike out "December 31, 1960" and insert "March 31, 1961"; on page 4, line 3, after the word "from", to strike out "any foreign countries, without regard to allocation, but with preference" and insert "domestic producers or from foreign countries, without regard to allocation, but among such foreign countries purchase preference shall be given", and in line 8, after the word "commodities", to insert a colon and *"And provided further,* That nothing in this Act shall be construed as a waiver of the power of Congress at any time to allocate, adjust, or readjust the sugar quotas in such manner as Congress may prescribe;".

Mr. BYRD of Virginia. Mr. President, the Committee on Finance, to whom was referred the bill (H.R. 13062) to amend the Sugar Act of 1948, as amended, having considered the same, report favorably thereon with amendments and recommend that the bill as amended do pass.

The bill, H.R. 12311, which became law on July 6, 1960, extended the Sugar Act until March 31, 1961, and delegated authority to the President to limit purchases of sugar from Cuba. The present bill, H.R. 13062, is an extension of the principles of that act with certain new authorizations and limitations until the close of December 31, 1961.

The House bill was amended by the Finance Committee by deleting a phrase that would have resulted in allocating to the Dominican Republic large additional amounts of sugar when such did not seem to be the intention of the House-passed bill. This was, therefore, in the nature of a technical amendment. A further amendment provided that no purchases for 1960 may be discontinued or deferred and authorization for such purchases shall be made in time to permit shipment of the entire amount to be received in the United States prior to March 31, 1961. The House bill would have required that the entire amount be received prior to December 31, 1960.

The bill was also amended to add the authorization to the President to purchase supplies of sugar from domestic as well as from foreign sources. The House bill would have required the President to purchase additional sugar supplies needed because of the reduction in the Cuban quota entirely from foreign sources. The Finance Committee sought to avoid this discrimination against domestic suppliers and amended the bill widening the President's discretion.

The Finance Committee also added to the bill a caveat as follows:

And provided further, That nothing in this Act shall be construed as a waiver of the power of Congress at any time to allocate, adjust, or readjust the sugar quotas in such manner as Congress may prescribe.

The Finance Committee is aware that serious problems have arisen since the last extension of the Sugar Act. Furthermore, that extension is due to expire early in 1961 and before that time sugar growers both in this country and abroad should know how much to plant. There is the problem of obtaining adequate supplies of sugar and the conjunctive problem of allocations to friendly foreign countries. It seems highly desirable that an extension of the President's authority be granted for a longer period, and the Committee recommends that the present bill, as amended, be adopted.

Mr. DIRKSEN. Mr. President, for myself and the Senator from Oregon [Mr. MORSE], I offer a substitute amendment which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The LEGISLATIVE CLERK. It is proposed to strike all after enacting clause and insert:

That section 408(b) of the Sugar Act of 1946, as amended, is amended by striking "March 31, 1961" where it first appears and inserting in lieu thereof "December 31, 1961", by striking the language "and for the three-month period ending March 31, 1961" and inserting in lieu thereof "and for each year beginning in 1961", and by inserting immediately before the colon in subparagraph (iii) a semicolon and the following: "except that any amounts which would be purchased from the Dominican Republic under the foregoing provisions of this subparagraph (iii) need not be purchased or may be purchased from other foreign countries, or domestic producers without regard to allocation."

SEC. 2. Section 412 of said Act is amended to read as follows:

"SEC. 412. The powers vested in the Secretary under this Act shall terminate on December 31, 1961, except that the Secretary shall have power to make payments under Title III under programs applicable to the crop year 1961 and previous crop years."

SEC. 3. Sections 4501(c) and 6412(d) of the Internal Revenue Code of 1954 are amended by striking out "September 30, 1961" in each place it appears therein and inserting in lieu thereof "June 30, 1962."

Mr. DIRKSEN. Mr. President, perhaps I can summarize this whole problem in 8 or 10 minutes.

In the small hours of the morning on July 3 we completed action on a sugar bill. The President asked for flexibility and permissive power to deal with the situation whenever Cuban sugar was cut off and the Cuban sugar quota reduced, so that he would have authority to fill the deficit in the American sugar bowl by buying where he thought he should buy in the national interest.

We modified the President's request, but he had to accept it, because we adjourned and went to the political conventions.

On the 6th of July the President issued his proclamation. That was necessary under the existing Sugar Act. First the President had to make apportionments. We gave him no choice in the matter, and he had to apportion in accordance with what the law said.

Under existing law the President had to apportion 322,000 tons to the Dominican Republic regardless of what our estimate may have been of Rafael Trujillo and his associates.

There was an increase in the American sugar bowl, and the Dominican Republic got part of it. The Dominican Republic had a quota of 81,000 tons in 1959, and as a part of the increase in the sugar bowl was given an additional 50,000 tons. As the law stands today, no matter how the President or we or the Organization of American States may feel about it, the President is under a legal obligation, at least, to give the Dominican Republic another 322,000 tons, for a total of 484,000 tons.

Since all of that took place, there was a meeting in San Jose, Costa Rica, beginning in the middle of August. The meeting was attended by the foreign ministers of the American Republics, including our own Secretary of State, and long deliberations were had. When the meeting was concluded, the Organization of American States voted unanimously to condemn the Dominican acts of aggression and intervention against Venezuela, culminating in an attempt on the life of the President of Venezuela, Mr. Betancourt, and they resolved to break diplomatic relations with the Dominican Republic and to interrupt, partially, economic relations with that country.

The United States joined with other American Republics in approving this measure, so we severed diplomatic relations, but we preserved our consular relations.

Despite that meeting, attended by the representatives of Latin American Republics and the United States, we still find that under the law, as we left it in July, no matter what the embarrassment, no matter how awkward it may be, the Chief Executive of this country must still buy or authorize the purchase of and ultimately purchase 484,000 tons of sugar, unless we give him some relief from that responsibility.

It was on that basis that the House of Representatives finally passed a sugar extension bill. I am interested in only one section, which is the offensive section, section 5.

What does it provide? I shall tell Senators what it provides. I shall make it as brief and as explicit as possible. It contains a proviso which says, in effect, "If this bill, passed by the House, goes into effect, first, to get the President off the hook, there have to be collective economic sanctions agreed upon by the United States and the others pursuant to treaty."

In other words, we have to meet again, and if we wish to give relief to the President for the year 1960 the meeting has to be consummated before the 15th day of October, which is only 6 weeks from now.

But there is an additional provision in the bill which says, in effect, "Not only must there be collective, effective sanctions before the President can discontinue purchases from Cuba, but also there must be effective specific actions to implement such sanctions undertaken by a majority of the treaty signatories."

If there were 16 signatories, it is necessary that 9 of them establish, under the House bill, that they have taken effective specific actions to implement the sanctions. Most of the countries in South America do no business with the Dominican Republic whatever. How could one get a specific sanction under this amazing and fantastic language which has been conjured up in the House bill?

When collective sanctions are taken and then there are specific effective actions to implement the sanctions, the President may discontinue purchases. So the sanctions and implementation for 1960 must be agreed upon before the 15th day of October, and if there is no agreement, the President, under the House bill, is directed not to discontinue or to defer authorizations and purchases.

So the handcuffs are on the President of the United States, notwithstanding the exhibition of good will at San José, where we met with the other Latin American Republics, and where we joined in against Trujillo for his acts of aggression. Page after page of specific instances of such aggression were submitted before the Finance Committee in session this afternoon.

This substitute would simply extend the act from March 31, until December 31, of 1961, and then it would give the President the additional power that he is not forced to purchase from the Dominican Republic. He can buy from other foreign countries or he can buy from domestic producers. The provision does not mean that the President must cut off Trujillo. He can assess the whole situation. Maybe Trujillo will become a better citizen and the President can conduct himself accordingly, in determining whether he shall have additional sugar quotas. But as the question stands tonight, the President must authorize, and ultimately purchase, an additional 322,000 tons of sugar. Under the House bill he is mandated to do so by a certain date, and that date was the 31st of December.

The committee, I understand, made a change. They made the date the 31st of March. That change would provide 6 months instead of 3, and the only reason for the proposed change is to soften the impact when sugar moves to the market. But it does not remove the handcuffs from the President.

Are we going to put the President in this humiliating, awkward, and embarrassing position in the eyes of the leaders of the Latin American Republics by saying, "Congress will tie your hands, and you will deal with Trujillo whether you like it or not"? I cannot imagine a more humiliating position in which to place the President of the United States.

But that is what this complicated and prolix language in the House bill provides. I think we ought to be satisfied to extend the bill to the end of 1961, and give the President some authority to buy from other foreign countries and from domestic producers, and thereby subserve the national interest. That is the whole story. I am through.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. AIKEN. Inasmuch as copies of the bill are not available to Senators, I was somewhat surprised to hear the Senator from Illinois read the phrase about collective sanctions. I think that is a mistaken idea. The charge of Venezuela against the Dominican Republic was made in the United Nations, and the case was referred to the Organization of American States.

Mr. DIRKSEN. That is correct.

Mr. AIKEN. The Organization of American States is in no position to exercise collective sanctions. That organization can report to the United Nations, and then each member of the Organization of American States can individually impose sanctions if it sees fit to do so. I believe Mexico and one or two other countries have done so. There certainly would not be nine Latin American countries, in my opinion, that would impose sanctions upon the Dominican Republic because, as the Senator from Illinois has said, many of them do not do business with them.

The purpose of the bill we considered on the night of July 3, when there were two copies of the bill available for 100 Senators to read, was undoubtedly to give an enormous windfall to the Dominican Republic. I made the prediction in the Chamber that night that if that bill passed, someone would make a killing. It was not the Dominican Republic or the American interests that operate sugar plantations there that made the killing, because the President did not allot the additional 200 percent increase in quotas to the Dominican Republic. It happened to be the refiners who made the killing out of that action, because the refiners' price of sugar rose to $9.70, almost the highest in history, or at least in recent history. The price of raw sugar dropped back, but the wholesale price of sugar today from the refiners is still up at $9.70, and the refiners are doing wonderfully well on that little legislation that was passed on July 3.

The bill passed by the House provides that the President would be required to buy 320,000 extra tons of sugar from the Dominican Republic, because of the window dressing put in the bill about collective sanctions, and the implementation of the sanctions by the majority of the signatories—I think there were 19 of them—to the findings of the meeting.

The bill is another effort to force the President to buy an additional 320,000 tons of sugar from the Dominican Republic. I do not say that they should not have some increase. I do not know what that increase should be.

Mr. DIRKSEN. We have given them 50,000 tons.

Mr. AIKEN. They have a substantial allotment. I think over one-third of the sugar produced in the Dominican Republic is produced by one American sugar company there. When representatives come to my office, I do not know whether they are coming from Trujillo or from the sugar company. They all have the same end objective, and that is to sell more sugar to the United States.

It is a good company. I will say that. It is a very efficient company and one of the largest in the world, if not the largest. But the idea of saying to the President of the United States, "You will operate our domestic affairs in accord with the desires of the majority of the American States" is a fantastic idea. We do not want to start any precedents of that kind. We say we are going to conduct our domestic affairs in accordance with the desire of the majority of the states of the Western Hemisphere, and as much as I like those countries, and as much as we want to do business with them—we should do all the business we can with them—we do not want to adopt any such fantastic notion as that.

But this provision would not work. The House bill is simply another method of requiring the President to give the Dominican Republic a 200-percent increase in the quota—250,000 tons additional added to the 120,000 tons that they have now.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. AIKEN. I yield.

Mr. ANDERSON. I doubt if the House bill provides that at all.

Mr. AIKEN. I am sure it does.

Mr. ANDERSON. I wish the Senator would point that out, because we received testimony this afternoon that it would give the Dominican Republic 130,000 tons of sugar in the House bill.

Mr. DIRKSEN. They had a total of 120,000, including the 50,000 increase.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. DIRKSEN. I will yield in a moment. I always like to look at the language which the legislative carpenters submit to us, and let the language speak for itself. It is easy to interpret. This is the language in the House bill. We can make the interpretation for ourselves. I skeletonize only a little, but do no violence to the text. It reads:

> If at any time after this act goes into effect, collective economic sanctions against one or more of the countries from which purchases are to be made under the provisions of this subsection are agreed upon by and between the United States and other countries, pursuant to treaty—

There are the collective economic sanctions. It does not say "or." It says "and."—

> and effective specific actions to implement such sanctions are undertaken by a majority provided in the treaty of such other treaty signatories—

Then and only then—

> the President may discontinue, in whole or in part, and for such periods of time as he may deem necessary, further purchases from such country or countries under this subsection.

That is crystal clear to me.

Mr. ANDERSON. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. ANDERSON. I find I misstated the situation. The Senator from Vermont and the Senator from Illinois are correct. The amount is 330,000 tons. We had so much testimony on the subject I understood it was 130,000 tons. I am informed that I was in error.

Mr. DIRKSEN. Now I read the rest of the language:

> Except that for the calendar year 1960 unless such sanctions are agreed upon and implemented prior to October 15, 1960, no purchases under this subsection for 1960 may be discontinued or deferred and authorizations for such purchases shall—

I emphasize—

> shall be made in time to permit shipment of the entire amount to be received in the United States prior to December 31, 1960.

We give the President 6 weeks in the calendar year 1960 to consummate all these sanctions. We mix up the international relations and foreign policy and the domestic sugar policy, and then say to the President, "You have 6 weeks to get these collective economic sanctions. You have 6 weeks in which to get specific effective implementation of the sanctions. If you do not do it in 6 weeks, you may not discontinue or defer the purchases."

What kind of business is this? No wonder the President is so intense about it tonight. No wonder I have had a dozen calls from the White House since 6 o'clock. This involves our relations in this whole hemisphere. This is not a matter of a few thousand tons of sugar. There is involved here the relationship of this great Republic with its sister republics in this hemisphere. If we want to do the greatest disservice that has ever been done to the hemisphere in the last half century, the way to do it is to let the House dictate this sugar policy.

I have been told that they will not take it. I do not care. I was determined to speak my piece. This issue involves more than sugar. It is more than beets and cane. This determines in large part how sweet and felicitous will be the relationships of our country with our sister republics to the south. I for one will not tie the hands of the Chief Executive, or any Chief Executive who follows him in the White House, and put him in a humiliating position. I would not do that to the man I might hate worst of all on earth, if I hated anyone at all.

Mr. CAPEHART. Mr. President, will the Senator yield?

Mr. DIRKSEN. I yield.

Mr. CAPEHART. I think we should take a look at the other side of the coin, because I agree this is a very serious matter. What I do not understand is this. The law we are talking about, which was passed on July 3, was fully understood by the Secretary of State and the President. They knew it when they went to San José and agreed to the sanctions against the Dominican Republic. Why did they not say to these people down there, "We have a law, passed on July 3, which requires that we do certain things. We will agree to sanctions, but you cannot ask us to violate a law, because we do not know whether Congress will repeal the law or whether they will not repeal it."

The Senator said a few moments ago that the President's hands were tied.

Mr. DIRKSEN. Does the Senator agree?

Mr. CAPEHART. Yes; but he tied them himself. At San José he could just as well have reserved the right to carry out the law passed by Congress, even though it may be a bad law—and I do not know whether it is a bad law—but they were down there with their eyes open and they knew the law existed. They knew there was such a law on the statute books. Why did they not reserve the right to agree to these things and to live up to the law passed by Congress, and come back to Congress and ask Congress to repeal the law?

Mr. DIRKSEN. I will give the Senator the answer right there.

Mr. CAPEHART. Let me state the question first.

Mr. DIRKSEN. I will give the answer right now. In the first place, this is all the President could get. We were here in the small hours of the morning. We argued back and forth over commas and parentheses and conjunctions and words. We did not give him what he wanted. At the last minute there was no choice for him but to accept it.

The second answer is, if the Senator had been Mr. Herter sitting around the conference table at San José, would he have been willing to make the confession, "I do not think we can get this out of Congress"?

What would have happened to the conference? It would have fallen flat. I have nothing more to say. I yield the floor.

Mr. CAPEHART. Mr. President, I cannot agree that the President of the United States or Mr. Herter would have embarrassed themselves at San José had they frankly explained the situation in which they found themselves. I am not so certain that they did the right thing under the circumstances.

We have broken off diplomatic relations with the Dominican Republic, and we will undertake sanctions against it. That country has a dictatorship. I do not like it. A great many other people do not like it. But the country has been friendly to the United States. It has cooperated with the United States.

On the other hand, Cuba has kicked us and abused us and cussed us and embarrassed us, and it has done everything under the sun to hurt us. Yet we hear very little, if anything, about sanctions against Cuba. We are not breaking off diplomatic relations with Cuba. We do not even break off diplomatic relations with Russia. For some unknown reason—or perhaps for a known reason—we go down to San José and get ourselves bound up in a situation which is very embarrassing to this Nation, and embarrassing to the President of the United States, and we do it with our eyes open, because we knew the law was in existence when we made the agreement at San José.

It might be said that it was done on the morning of July 3, but should not have been done. I agree. I think it was wrong. Nevertheless, it was done. Are we to impose sanctions? Are we to go back upon our allies? Are we going to say that we have evidence which indicates that we have to do this, but nevertheless we shall do something else? That is the other side of the coin.

I think we must get out of this situation. I am not adverse to the proposal made by the able Senator from Illinois, but I think it is about time someone talked about the other side of the coin.

I do not mind saying that the people of Indiana are very much disappointed over this action and are very much disappointed that we shall break off diplomatic relations with a country which has never done anything to injure the United States while we continue to do business with Cuba and Mr. Castro.

How much can we take? How far can we go? To me, this kind of action simply does not make sense. Perhaps it does to others, but to me it does not make sense. I do not understand it. Frankly, I should like to know who made the decision. I might go so far as to say that I should like to have the matter investigated to find out who made the decision.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. CAPEHART. I yield.

Mr. BENNETT. I point out that in the recent Costa Rica conference, the sugar problem was not involved at all. The bill came from the House after the Costa Rica conference was finished and the reference to sanctions in the bill is yet to be developed in a later conference. Mr. Herter was in no position to speak about sanctions. He was not involved in the language of the proposal of the bill when he was in Costa Rica.

Mr. CAPEHART. There was a law when Mr. Herter was in Costa Rica which provided that under certain circumstances we would buy a certain amount of sugar from other countries, including the Dominican Republic.

Mr. BENNETT. That is correct; and the President was living up to that law.

Mr. CAPEHART. The President was living up to the law until——

Mr. BENNETT. He is living up to it tonight.

Mr. CAPEHART. He is living up to it tonight, but he has asked Congress to change the law because he made certain agreements at Costa Rica.

Mr. BENNETT. No; he made no agreements which affect this law.

Mr. CAPEHART. Then I do not understand what the able Senator from Illinois [Mr. DIRKSEN] was talking about. He said the President's hands were tied.

Mr. BENNETT. May the Senator from Utah point out that if the House bill is passed, the President's hands will be tied to this extent. By the bill we passed last July, we asked the President to buy 322,000 tons of sugar from the Dominican Republic before next December 31.

The House sends us a bill which provides that we shall not let the President wait until December 31; he must buy the sugar by October 15. The only way we can get out of buying it is to have further collective action—treaties; and then to have the treaties implemented, all by October 15. I think that ties the President's hands.

Mr. CAPEHART. The point I am trying to make—perhaps I have not made it—is that the President, and the Secretary of State when he was at San José, Costa Rica, knew of the law as it stands tonight, and as it stood then, passed last July 3.

Mr. BENNETT. That is correct.

Mr. CAPEHART. They knew that under the law they were required to buy X amount of sugar from the Dominican Republic.

Mr. BENNETT. That is correct.

Mr. CAPEHART. Being law-abiding citizens and Government officials, they expected to live up to the law.

Mr. BENNETT. That is correct.

Mr. CAPEHART. Why did not the Secretary of State, when he was at San José, reserve the right to buy an extra amount of sugar from the Dominican Republic and invoke sanctions?

Mr. BENNETT. They did not invoke sanctions. No economic sanctions were invoked.

Mr. CAPEHART. Does the Senator mean that other Latin American countries will not invoke economic sanctions against the Dominican Republic?

Mr. BENNETT. They do not have to on the basic of the Costa Rica Convention.

Mr. CAPEHART. In other words, is the United States the only country that will take any action? Will we discontinue buying sugar?

Mr. BENNETT. We have already bought 130,000 tons from the Dominican Republic, but the President wants the power to decide whether to buy another 322,000 tons.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. CAPEHART. I yield.

Mr. CURTIS. I shall support the Dirksen substitute. The House bill not only ties the hands of the President; it ties the hands of Congress. The matter of a sugar bill is domestic legislation. It is legislation which involves consumers and farmers. It has a very important bearing upon our foreign policy.

By the formula set up in the House bill, Congress delegates to a group of foreign nations, by treaties, the determination of where we shall buy our sugar. It is more far reaching than many of the proposals whereby the United States has delegated its sovereign powers to international bodies or foreign countries, than we have heard of yet.

Why are we in this predicament? We are in it because of the impotence of Congress. The Committee on Finance has not had an opportunity to hold hearings on the Sugar Act, although everyone knew that the act will expire on the last of December this year.

The House sent us a bill in July, and in the middle of the night we were running around with papers, trying to pass a bill, so that Congress could adjourn. There was not a political convention to be held for a solid week. I made the suggestion on the floor that the bill be referred to the Committee on Finance, that the committee hold hearings, and that we write a Sugar Act which would be fair and just to the farmers and consumers, and would be friendly and fair to all our foreign neighbors from whom we buy. Instead, the leadership, or the lack thereof, drove on for adjournment that night, not for the public good; the public good was sacrificed. The desire of many farmers was sacrificed.

Now a proposal is brought before us on the night we are to adjourn, whereby the hands of Congress would be tied. It would depend upon what group of foreign nations had in their control the power to decide where the United States will buy its sugar.

This is an important part of our foreign relations. It is also important domestically. Many farmers in my State would like to have an opportunity to produce sugar. They would like an opportunity to come before a committee of Congress and tell their story. But time after time they have been denied the opportunity because somebody has brought a bill before the Senate a few hours before we adjourned in the middle of the night.

Copies of the House bill are available. The substitute is not an ideal way in which to legislate. Nevertheless, we are forced to do so because the public good has been cast aside and the Congress has been maneuvered for the advantages of an individual bill.

Mr. CHAVEZ. Mr. President, will the Senator yield?

Mr. CAPEHART. I yield to the Senator from New Mexico.

Mr. CHAVEZ. I believe I know the Latin American republics about as well as any Senator present. I am not asking anybody's permission to talk American. I talk that way. I agree completely with the Senator from Indiana. We like to say how much we love Latin America. But when it comes to sincerity of purpose, we fail completely.

I recall the last time the Sugar Act was before the Senate. I remember Mr. Holland, of the State Department, standing outside that door, trying to persuade Senators to cut off Cuban sugar. But what are we doing about Mexican sugar? About Peruvian sugar? About Puerto Rican sugar? The Commonwealth of Puerto Rico is a part of the United States of America.

So I say in this instance that we should do the right thing, if we mean it. Let us not say how much we love Latin America and then when it comes to a showdown fail them because we only want the sugar beet growers of Nebraska to have the benefits. I want it, and I will protect it, and I will fight for them. But, by the eternal, if we intend to get along with Latin America, we will not do it by taking care of Nebraska and New Mexico sugar beet seed. We shall have to do it by getting along with them.

I know we just love Latin America—and soak her every time we get a chance, and get all her natural resources. Ninety-eight percent of the copper of Chile comes to the United States, and the rubber of Brazil comes to the United States. If we mean to get along with Latin America, let us be fair with Latin America.

This is a good sugar bill; and I agree with the Senator from Indiana.

Mr. MORSE. Mr. President, I wish to speak on several aspects of this subject.

The Senate might well refresh its memory of the Constitution of the United States and take note of the fact under the Constitution it is the responsibility of the Chief Executive of this land to administer the foreign policy. That is a solemn obligation of the President, not of the House or the Senate.

I say most respectfully that in my opinion the House bill in its present form is not only an affront to the incumbent President of the United States, but it is also an affront to the Presidency of the United States, because in my judgment the bill in its present form is an effort by the House of Representatives to exercise prerogatives that belong to the President and to the Presidency.

The situation in Latin America is exceedingly critical. The President, as our Commander in Chief and as our leader, in this hour of crisis is in a very difficult situation, as regards Latin America, and particularly in light of the San José conference. The President of the United States, acting through his Secretary of State, is conducting himself in accordance with his constitutional prerogatives.

PREROGATIVES OF PRESIDENT IN FOREIGN RELATIONS

Mr. President, we are overlooking what has happened since the 3d of July. We are overlooking the fact that the President of the United States sent his foreign policy representative, the Secretary of State, to act for the President, to sit in a foreign policy conference, where evidence was taken. It was found that the Government of the Dominican Republic was guilty of certain acts that, in my judgment, clearly justified the action taken in Costa Rica and clearly justified the action that has been taken by our President.

The evidence showed that the Dominican Republic Government engaged in a conspiracy to assassinate the President of Venezuela, and followed a policy that sought to disrupt the Government of Venezuela. On the basis of that evidence, the President of the United States, acting through his agent, the Secretary of State, and in keeping with the Presidential prerogatives under the Constitution of the United States, has followed a very definite course of action.

In view of what has happened since the 3d of July—facts that we did not know early on the morning of July 3, but which are now known, I am shocked that the House of Representatives would do what it has done, and passed a sugar bill, which will embarrass the President of the United States throughout Latin America, if that action stands.

The Senate has the solemn responsibility to come to the assistance of the President and to give the House of Representatives a second chance in connection with this matter, for I refuse to believe that once reason comes to prevail in the House, the House will underwrite the course of action it has already taken in connection with this matter.

JULY ACTION BY CONGRESS UNFORTUNATE

But let us consider the situation in the early hours of the morning of July 3. There were some of us who sought to get the Senate to change the course of action it finally took, before it took it. We lost by a vote of 30 to 29. There was those of us who urged, at about 3 a.m. that morning, that the Senate grant to the President, as our Commander in Chief, an opportunity to take action as our constitutional leader in the field of foreign policy, and in that connection to exercise the prerogative and the power that he wished to exercise, namely, the power to use the discretion which, on the basis of the facts as they developed in regard to the Cuban sugar situation, caused him to determine in the weeks that followed how the sugar allotment should be handled. That is what some of us sought to give to the President, and that is what the President was requesting.

ACTION OF SAN JOSÉ CONFERENCE

Oh, it can be said that the President signed the measure we finally passed. But he did not sign it because he liked it. He signed it because he hoped the worst would not come to pass. But it did come to pass, and the President was put into this embarrassing situation on the basis of the evidence which unfolded at the Costa Rica conference.

Plots such as that by the Dominican Republic against President Betancourt of Venezuela have been cause for war throughout the history of nations. Let Senators imagine what result an assassination plot against our President by another power would bring about.

But Venezuela did not invade or attack the Dominican Republic. She sought collective action, first in the United Nations and then in the Organization of American States.

This is really a test of whether we believe in collective action to keep the peace, or whether we stay with the law of the jungle.

In my judgment the Secretary of State could not have honorably taken any other action than what he did take; the only honorable course of action open to him was to go along with the representatives of the other American States, on the basis of the evidence which was presented at the Costa Rica conference.

We can muddy these waters by bringing the Cuban situation into the consideration of the situation as regards the activities of the Dominican Republic vis-a-vis Venezuela. But I say that to bring Cuba into our consideration of that other situation is as irrelevant as talking about something Mary Smith has done when it is John Doe who is being tried for a crime.

The fact is that the Dominican Republic got a fair trial at the Costa Rica conference, and was found guilty.

In participating in that conference and that conclusion, we have followed a course of action which, under the provisions of the Constitution, the President alone has the power to follow.

DISCRETIONARY POWER SHOULD BE GIVEN PRESIDENT

Now what are we to do? Are we to say that after the Dominican Republic has been found guilty, on the basis of the evidence taken at the Costa Rica conference, we now shall say to the President, "But we are now going to force you to buy from the guilty party 372,000 tons of sugar"? That is what the House has said—to the embarrassment of the President.

What should we do? I think the Senator from Illinois has struck the correct chord. I believe we should pass the Dirksen proposal, of which I have the honor to be a cosponsor, and again should say, in effect, "Mr. President, in view of the developments since July 3, we propose to give you the discretion, as our Commander in Chief, to settle this sugar matter in accordance with your best judgment, until the next session of Congress, at which time we will hold the hearings which ought to be held and can take testimony in regard to a new sugar act."

The sugar act we passed on the morning of July 3 was one on which the House of Representatives had not held even 1 minute of hearings. It was a sugar act that Members of the House of Representatives themselves concocted, with no basis of an official record of a hearing. They dumped it into the lap of the Senate—as some of us pointed out—in those early hours on the morning of July 3, and said, in effect, to the Senate, "Take it or leave it."

There were those of us who believed then that we should meet the challenge of the House. We urged adoption of a resolution which would give the President the discretionary power that he needed, and make clear to the House that, come January, we would conduct some hearings which would give to all parties concerned, including domestic producers, an opportunity to attend the hearing and to make their case.

I said then, and I repeat tonight, that we were very unfair to domestic producers when we passed that measure on July 3.

We were unfair, too, to a good many of our friends in Latin America. We were unfair to Brazil. We were unfair to Colombia. We were unfair to Venezuela. We were unfair to El Salvador and Guatemala. We were unfair to Ecuador. We were unfair to Mexico. We were unfair to many countries of the hemisphere which have been begging for sugar allotments.

They were entitled to a hearing. As we passed that bill on the morning of July 3, there sat in the galleries of the Senate, diplomatic representatives from a whole group of Latin American countries, our friends, who were shocked by the course of action the Congress of the United States took on that early morning.

I close by saying, most respectfully, that, in my opinion, what we should do is pass the Dirksen proposal and give to the President the discretionary power he is going to need to lead us through the foreign policy crisis in Latin America. In January we can come back here and proceed to conduct hearings for a complete revision of our sugar policy, giving to our domestic producers and friends in Latin America an opportunity to make the record.

More than that, by means of this amendment, we will recognize that when we get involved in a foreign policy issue and the crisis is upon us, we rally behind the President of the United States, no matter who he is or what party he comes from; and we do not seek to undercut him and undermine him by handcuffing him and putting him in a position where he will be held up to a ridiculous posture before the eyes of our friends in Latin America and elsewhere in the world.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. MORSE. I yield to the Senator from Vermont.

Mr. AIKEN. Will the Senator from Oregon permit me to say, lest anyone get the wrong impression, that we have been increasing our purchases of sugar from most of the Latin American countries. We have decreased our purchases of sugar from Cuba. We are keeping the sugar purchases from the Dominican Republic where they were. We have not given that country any increased business.

We gave Peru an order for 250,000 tons more of sugar than her quota called for. Peru could furnish only 165,000 tons.

We gave a very large increased order to Mexico. I do not recall what it was, but I think it was 160,000 or 175,000 tons.

We gave increased orders to the small Latin American countries that had quotas. Then we needed more sugar, so we bought 100,000 tons from Brazil. Today I understand Brazil has 300,000 tons which she would like to sell to us, and for which she would, in all probability, accept American surplus farm commodities in exchange.

Mr. President, that is very important. It is important that, as far as possible, we make these purchases where we can increase our own markets for American farm commodities. There is a great opportunity in Latin America, if we can get to doing business with them, and get sugar from them.

I think we have probably done Cuba a disservice over the years by making her a one-commodity country and dependent on sales of sugar. If Cuba diversifies as a result of our cutting our sugar purchases from her, she will be better off in the long run, although, of course, no one knows what is going to happen in the meantime.

However, we have been increasing our business with Latin American countries.

Mr. MORSE. I thank the Senator from Vermont.

In closing, I want to make two points very briefly. The first is the one just made by the Senator from Vermont. We have an opportunity, as we write a new sugar bill, to strengthen our economic relations with many of our friends in Latin America.

The Senator from Vermont mentioned Brazil. He is quite right. Brazil has in storage surplus sugar; and we have in storage a great deal of surplus agricultural commodities, including wheat and other products.

I happen to know because I was briefed on it today. When we come to work out a sugar bill in January, an opportunity will be made available to us

for an exchange of substantial quantities of American surplus agricultural products, including wheat to Brazil, for sugar. That is true of other Latin American countries.

I close by saying that we are dealing here, really, not with the problem of sugar; we are dealing here with the problem of American foreign policy. We are dealing with an attempt on the part of some in Congress to intervene in American foreign policy by seeking to dictate to the President, through sugar legislation, the policy he must follow as our Commander in Chief and as our Chief in the field of foreign policy in carrying out diplomatic relations with foreign powers.

It is a form of subterfuge that the House of Representatives has engaged in, and I am for giving the House of Representatives an opportunity to correct what I think is a grievous error.

Mr. President, as one who has stood on the floor and disagreed with President Eisenhower when I thought he was wrong on many domestic issues, I plead for support of my President and your President in regard to the matter of foreign policy, to strengthen his hand, and not slap him in the face by adoption of the kind of sugar bill that has been sent to us by the House of Representatives.

I yield the floor.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. ELLENDER. Mr. President, I do not want to take too much of the time of the Senate; on August 24 I spoke for over an hour and a half on this subject, reviewing the various details of what took place in Costa Rica at the OAS conference. I also reviewed the history of sugar legislation, as it has developed during recent months.

As Senators will recall, I voted against the so-called Emergency Sugar Act which was sent to the White House during the wee hours of the morning just prior to our July recess. I voted against that bill for two reasons: first, since it only extended the existing law through the first 3 months of 1961, and since I do not believe it is possible for any administrator to administer what is essentially a 1-year program, over a 3-month period, I took the position that the act was actually worse than no new legislation at all. Second, I feared that once the Department of State was given any leeway at all in handling offshore quotas, the entire system of quotas would be used as a pawn in the game of international politics which the State Department is trying to play in the Latin American area—a game, I might say, at which our diplomats apparently lack quite a bit of proficiency.

In my judgment, Mr. President, my vote in July was right; my predictions have come true. The State Department has managed to pervert and rape the system of priorities set up in that act, priorities very carefully written into the law, specifying how and in what manner any reduction in Cuba's quota was to be supplied.

The San José Conference has been alluded to in this debate. An effort has been made to lead the Senate into believing that, in some manner, the House bill, as reported just a few hours ago by the Senate Finance Committee, has tied the President's hands, that it denies him the power to comply with the declaration of the OAS conference with regard to the Dominican Republic.

The fact is, Mr. President, that the San José declaration did not involve the imposition of economic sanctions against the Dominican Republic; the declaration does not cover anything except breaking diplomatic relations, and imposing restrictions upon trade in arms and weapons of war.

Mr. President, if the conference at Costa Rica of the Organization of American States had desired to impose further economic sanctions against the Dominican Republic that could and doubtless would have been done. But this was not the case at all. I read from the declaration:

> The conference agrees:
> 1. To apply the following measures:
> (a) Breaking of diplomatic relations of all the member states with the Dominican Republic.

That we have done, Mr. President; we have met that obligation, if, indeed, it can properly be called an obligation.

> (b) Partial interruption of economic relations of all the member states, with the Dominican Republic, beginning with the immediate suspension of trade in arms and implements of war of every kind.

This, Mr. President is the only sanction on commerce approved by the OAS. If the Organization of American States had desired to broaden this prohibition it could have done more, but it did not.

This bill would not tie the President's hands in meeting the terms of the San José declaration, nor, Mr. President, would this bill have any detrimental effect upon our relations with countries to the south of us, despite what some Senator may say.

What the bill would accomplish, however, is of great importance, for, in addition to protecting and assisting our domestic sugar producers, it would have enormous value in the field of foreign affairs. For one thing, it would serve notice that the Congress is not going to participate or condone, much less permit, the President of the United States to bend over backward to placate Betancourt of Venezuela.

We are in effect going on record as opposing further concessions to Venezuela or any other country unless that nation and others are willing to join us in collective action. We have heard much from the State Department about the need for meeting the crisis in the Caribbean through collective efforts. This bill says that when collective efforts are undertaken, Uncle Sam stands ready to fulfill any obligations which such action may require, vis-a-vis the Dominican Republic, but that the United States is not going to unilaterally impose economic sanctions against the Dominican Republic, far beyond those required or envisioned by the San José declaration.

The fact is, Mr. President, that the United States was outbargained in San José. We concurred in efforts to chastise the Dominican Republic—we bowed down to Betancourt's demands for action against that country, without obtaining anything more than a weak slap on the wrist by the OAS against Castro. The resolution finally adopted with regard to Cuba did not even mention that country by name. In effect, we were outtraded, and came away from San José with the bad end of the deal. I, for one, am not going to vote to make a bad bargain even worse by giving to the State Department authority to proceed unilaterally far beyond the collective action required under the San José declaration. I am not going to be a party to any more bowing and scraping before Betancourt and some of the other countries until they are willing to cooperate with us, and help us. When Betancourt decides to embargo oil sales to Cuba, when the OAS decides to invoke collective economic sanctions against Cuba, when the OAS determines to broaden its declarations against the Dominican Republic, then, and only then, should the United States even consider exercising or requesting the power which the amendment offered by my distinguished friend from Illinois proposes.

Mr. President, we are in an all-or-nothing-at-all position. The House will never accept the language of the proposed substitute even should it be adopted. The net result is we will end up with a big goose egg in the way of sugar legislation. Certainly, this result will not help the President. Furthermore, it would offer the prospect of grave injury to our domestic producers of sugar, as well as to consumers of sugar. On the other hand, rejection of the substitute will permit prompt action by the House on the bill, a bill which, I remind Senators, endorses the concept of collective action in Latin America, a concept which the Department of State has declared to be the proper one.

I urge Senators to view this matter realistically, to vote down the substitute, and to quickly approve the bill as reported by the Finance Committee.

Mr. ERVIN. Mr. President, will the Senator yield for a question?

Mr. ELLENDER. I yield for a question.

Mr. ERVIN. Speaking of the Constitution, does not the Constitution provide that the Congress shall have the power to regulate commerce with foreign nations?

Mr. ELLENDER. The Senator is correct.

Mr. ERVIN. Is not the request of the President in essence a request that Congress transfer to the President, to be exercised through the State Department, the power to regulate commerce with foreign nations in respect to sugar?

Mr. ELLENDER. There is no doubt about that, Mr. President.

Let me say one more thing, Mr. President. I have heard it said that unless the President is given the authority proposed in the substitute, the United States will be left in a position where it will be unable to place itself on record as being opposed to dictatorships.

I frankly do not know whether the Dominican Republic is a dictatorship at this time. Trujillo is not in power; a

reform government is in charge there. Much progress has been made, amnesty has been given to political refugees, opposition parties are operating openly, municipal elections are scheduled for this winter and national elections next spring. These are not the symbols of a dictatorship.

But even if the Government of the Dominican Republic were a dictatorship, is not the Government of Cuba an even more intolerable dictatorship? Is not Castro, linked as he is with Moscow and Peiping, dependent as he is upon the firing squad and the all-night harangue, a dictator? And, since he is, why should the United States find it necessary to punish the Dominican Republic to appease certain governments which continue to trade with, support, and defend the Castro dictatorship? Why should Uncle Sam do all the yielding? Why must we do all the bowing?

If Mr. Betancourt and a few others want to do away with dictatorships in the Caribbean, why do they not agree to sanctions against Cuba, instead of actually deleting mention of Castro's Cuba from the weak, watered-down resolution which was finally approved by the OAS?

Mr. President, I again express the hope that this amendment will be defeated, and that the bill as reported by the Finance Committee will be approved by the Senate.

The PRESIDING OFFICER. The question is on agreeing to the substitute amendment offered by the Senator from Illinois.

Mr. DIRKSEN. Mr. President, are there any other Senators who wish to be heard?

Mr. President, I ask for the yeas and nays on the substitute amendment.

The yeas and nays were ordered.

Mr. LONG of Louisiana. Mr. President, one or two things should be made clear before we vote. The Senate should be reminded that we are presently operating under a Sugar Act which was passed in July. Senators have not made it clear that in July we gave the President the principal thing for which he asked.

The purpose of the bill passed in July was to confer authority for the President to cut the Castro sugar quota. Under the law the President would have been required to buy more rather than less sugar from Cuba, and he did not wish to buy more sugar from Cuba. That was what the President insisted upon and demanded.

This Senator was one of those who supported the position that the President ought to be able to reallocate the Cuban quota however he wished to reallocate the Cuban quota. We could not get that. The House was absolutely adamant on that. In that respect the House had its way, but the Executive was given the principal thing the President desired, which was the ability to buy sugar elsewhere than from Cuba.

It was not so important to the administration where the sugar was bought as it was that the administration not be required to buy it from Cuba. That was the important point at the time.

It is clear to this Senator, and I suppose it is clear to other Senators, that the act told the President how he was going to buy sugar.

Insofar as the negotiations were carried on in Costa Rica, I, for one, would be curious to know what authority the President had to make an agreement without the consent of the Congress which was in violation of the act of Congress which the President signed into law. If the President has authority under his power in international affairs not to follow a law we passed in July, to which he affixed his name, then he still has the authority not to obey the law with regard to anything we write in a law now. If he has that authority under his powers in regard to international affairs, we cannot make him follow the law in this instance if we could not make him follow it in the other case.

My impression is that the President is not buying sugar from the Dominican Republic as the law directs him.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. LONG of Louisiana. I yield to the Senator from Utah.

Mr. BENNETT. So far as the Senator from Utah knows, the President made no agreement at Costa Rica involving sugar.

With respect to the agreement to buy sugar from the Dominican Republic or any other country, as outlined in the July law, I think the President has to carry out that mandate. I think the President has until December 31 to carry out the mandate.

There was nothing in the law which said the President had to buy the sugar 10 days after the law was passed. The President is not as yet in violation of the law passed last July. I think the effect of the House bill, as it came over today, would be to say to the President, "You cannot have until December 31; you can have only until October 15."

Mr. LONG of Louisiana. If our distinguished Republican leader could assure us that the adoption of his amendment would not mean that we would kill the bill that we have here, this Senator would find considerable appeal to it. But I fear that that is what the result would be. The House rules are such that a single objector can prevent this bill from being considered when it goes back to the House. Unless I miss my guess, such will be its fate. If we are in that kind of situation, and it is a matter of having this bill or getting no bill, we had better take this bill, because if we do not, several things will happen that we will not like.

One of the results will be that the sugar supply of this country will be in jeopardy when we return in January. We were previously in a situation where we could buy sugar with a 6-day delivery date. Because of changes and the cessation of trade with Cuba, we must look to a 6-week delivery date, because many areas from which we will be buying sugar are much farther removed.

The domestic sugar producers, the cane producers particularly, are in an embarrassing position because they must plant their crops a year in advance. They need to know where they stand and what their acreage rights are. The beet producers are not in quite so difficult a position, but they also have a problem themselves in knowing whether they can plant their crops and if they can have some assurance that they can make a profit when they harvest the beets.

Those are the problems that we have. I for one wonder where the Republican leadership of the House of Representatives is. This bill passed in the House of Representatives, I am told, without a dissenting vote. Now the bill may go to conference and, if the amendment carries, we would attempt to impose upon the House conferees the will of the Senate, which will be a divided will compared with unanimity in the House of Representatives. As one who has participated in such a conference in July with the Senator from Utah [Mr. BENNETT], I will tell the Senate that is no easy task to overcome the House position.

I feel satisfied that those, such as the Department of Agriculture, who have the responsibility of seeing that the public gets sugar and that we do not have to buy it at an outrageous price, would rather be able to buy sugar and make available a steady supply without disrupting the market.

Insofar as concerns the statement that the President's hands are tied, I suggest that they would not be nearly as badly tied by the provision of this bill as they were by the provisions of the bill that he signed into law in July, because that bill provided he would buy sugar from the Dominican Republic. It gave him no out whatsoever.

I am sure the President has some good Republican leadership in the House, but he did not get a vote in the House of Representatives.

If the President wishes to get around the Sugar Act, I suggest that he make a treaty with some nation, bring it to the Senate, and I would be willing to vote to ratify such a treaty. That kind of approach would let him do whatever he wishes to do about the sugar quota, if he feels he must obey a mandate of the OAS. But it looks to me as though if we vote for the proposed amendment, we may very well find ourselves in a position in which we will not have an act, and our entire domestic sugar supply will have been disrupted. What we buy, we shall be buying in such a chaotic market that prices can skyrocket.

Therefore, I suggest that the bill is much better than nothing. I fear that nothing is what we will have if we do not take the bill that the Senate Finance Committee has recommended.

Mr. ELLENDER. Mr. President, will the Senator yield?

Mr. LONG of Louisiana. I yield.

Mr. ELLENDER. I point out to my colleagues certain language of the amendment, which in my judgment the House would not accept. As a consequence, there would not be a bill. The language is as follows:

> Except that any amounts which would be purchased from the Dominican Republic under the foregoing provisions of this subparagraph 3 need not be purchased or may be purchased from other foreign countries or domestic producers without regard to allocation.

In other words, under existing law Dominican Republic growers are entitled to sell a certain amount of sugar in the United States. Passage of this amendment would be a direct repeal of what we provided for in July.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. LONG of Louisiana. I yield.

Mr. BENNETT. I should like to ask a question of the Senator from Illinois.

Mr. LONG of Louisiana. I ask unanimous consent that I may yield without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BENNETT. The point has been made, and I think there may be much merit to it, that if we pass one bill in the Senate, and the House of Representatives has passed a completely different bill, we may have no bill. I should like to ask the Senator from Illinois whether or not he believes, if the House-passed bill were adopted and became the action of both Houses, the President would accept this straitjacket on his power.

Mr. DIRKSEN. Mr. President, the question was addressed to me earlier this evening on two occasions, and I made a special call to make inquiry. I inquired not more than 15 or 20 minutes ago.

Mr. President, I can say with authority that if the House bill is sent to the White House, the ratio is 100 to 1 that it will be disapproved by the President of the United States.

The PRESIDING OFFICER. The question is on agreeing to the amendment in the nature of a substitute offered by the Senator from Illinois. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BUTLER (when his name was called). On this vote I have a pair with the senior Senator from Mississippi [Mr. EASTLAND]. If he were present and voting he would vote "nay." If I were at liberty to vote, I would vote "yea." I therefore withhold my vote.

The rollcall was concluded.

Mr. MANSFIELD. I announce that the Senator from North Dakota [Mr. BURDICK], the Senator from Illinois [Mr. DOUGLAS], the Senator from Mississippi [Mr. EASTLAND], the Senator from Arizona [Mr. HAYDEN], the Senator from Alabama [Mr. HILL], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Oklahoma [Mr. KERR], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Georgia [Mr. RUSSELL], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

I further announce that the Senator from Missouri [Mr. HENNINGS] is absent because of illness.

I further announce that, if present and voting, the Senator from North Dakota [Mr. BURDICK], the Senator from Illinois [Mr. DOUGLAS], the Senator from Arizona [Mr. HAYDEN], the Senator from Missouri [Mr. HENNINGS], the Senator from Minnesota [Mr. HUMPHREY], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from Ohio [Mr. YOUNG] would each vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Maryland [Mr. BEALL] are necessarily absent.

The Senator from Iowa [Mr. MARTIN] is absent by leave of the Senate on official business.

I also announce that the Senator from Kansas [Mr. CARLSON], the Senator from Arizona [Mr. GOLDWATER], and the Senator from Massachustts [Mr. SALTONSTALL] are necessarily absent.

If present and voting, the Senator from Maryland [Mr. BEALL] would vote "yea."

The result was announced—yeas 62, nays 17, as follows:

[No. 323]

Douglas	Kefauver	Saltonstall
Eastland	Kennedy	Young, Ohio

So Mr. DIRKSEN's amendment, in the nature of a substitute, was agreed to.

Mr. DIRKSEN. Mr. President, I move that the Senate reconsider the vote by which the amendment was agreed to.

Mr. JOHNSON of Texas. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ENGLE. Mr. President, is the amendment I have at the desk in order?

The PRESIDING OFFICER. The Chair rules that the amendment is not in order.

The amendment was ordered to be engrossed, and the bill to be read a third time.

The bill (H.R. 13062) was read the third time, and passed.

Mr. CHAVEZ. Mr. President, on the last vote, on the amendment of the Senator from Illinois, I voted "No." I want to be recorded as voting "No."

The PRESIDING OFFICER. The Senator from New Mexico is so recorded.

EXPRESSION OF APPRECIATION BY SENATOR LUSK

Mr. LUSK. Mr. President, yesterday when I was not on the floor, the distinguished Senator from Mississippi [Mr. STENNIS] paid a tribute to me. This morning I read his statement in the RECORD. Undeserved as I know the compliment to be, I wish, nevertheless, to acknowledge it and to thank my friend for having thus given public expression to his generous sentiments.

I shall always cherish, and be grateful to him, not only for the words he uttered yesterday, but for his uniform kindness to me from the day I became a Member of this body. The distinguished Senator from Mississippi is of a warm and generous nature, a gentleman of abounding charity. I have never heard him speak ill of anyone. I consider it one of the high privileges of my life to have known him and to have enjoyed his friendship.

Mr. President, as my service here is fast drawing to a close, I trust that I will be pardoned if I detain the Senate a little longer for a few words, some of them of a personal nature. I came to the Senate last March by appointment of the Governor of Oregon, imbued with a profound sense of respect for the U.S. Senate. During my brief period of service, my association with the distinguished Members of this body, the opportunity that I have had to learn, at firsthand, the magnitude and the complexity of the problems with which the Senate must deal, and to observe the unremitting toil, the high intelligence, and the devotion to duty which are brought to the accomplishment of the task of making laws which will serve the public interest—all this has immeasurably increased the respect which I held for the Senate of the United States, and the representatives of the 50 States of the Union which compose it.

We live in these closing hours of the 86th Congress in a great moment of history, and in a time of deadly peril to our country. The decisions we make today may determine the fate of America tomorrow. There has never been a time in our history which called for the exercise of greater wisdom and prudence on the part of those in places of responsibility, or for greater faith in our free institutions of Government on the part of all our people. We have never known a more urgent need for unity—not the sort of unity which results from the suppression of freedom of religion and speech and the press, but the unity which derives from a common and lofty purpose to preserve our American ideals, and defend ourselves against the Communist threat to the destruction of our civilization. And I suggest that essential to that unity is the existence of a spirit of charity and good will among us, and a rejection of that hateful vice of intolerance, concerning which the distinguished Senator from Tennessee [Mr. KEFAUVER], spoke so eloquently yesterday.

Mr. President, as I leave the Senate, I wish to express to all of you my sense of gratitude for your cordial reception of me, and for the privilege of having served with you. I would particularly acknowledge the fine spirit of coopera-

tion manifested by my colleague, the able and distinguished senior Senator from Oregon [Mr. MORSE].

And I pray that in all its future deliberations and decisions, so vital to the welfare of our country and the people of the world, the Senate will have the guidance of divine providence.

IMPORTATION OF CERTAIN ARTICLES FOR RELIGIOUS PURPOSES

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1980, H.R. 4384.

The PRESIDING OFFICER. The bill will be stated by title.

Mr. GORE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Tennessee will state it.

Mr. GORE. At least one Senator in the rear of the Chamber could not hear one word which the Senator from Texas uttered.

Mr. JOHNSON of Texas. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 1980, H.R. 4384, the bill which was under consideration before the Senate considered the sugar bill.

The PRESIDING OFFICER. The bill will be stated by title.

The CHIEF CLERK. A bill (H.R. 4384) to amend paragraph 1774 of the Tariff Act of 1930 with respect to the importation of certain articles for religious purposes.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

Mr. JOHNSON of Texas. I do not know whether the Senator from Maryland is available or not.

The PRESIDING OFFICER. The Senate will please be in order.

Mr. GORE. Mr. President, I make the point of order that the Senate is not in order.

The PRESIDING OFFICER. The Senate will be in order. Senators will take their seats.

Is there objection to the request of the Senator from Texas?

Mr. JOHNSON of Texas. Mr. President, I moved that the Senate proceed to the consideration of the bill.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Texas.

Mr. LAUSCHE. Mr. President, I ask for a yea and nay vote. This is a motion to bring up the statuary and religious articles bill.

Mr. JOHNSON of Texas. Mr. President, I have moved to return to the consideration of the bill which was under consideration when I asked the Senator from Maryland to permit me to move that the Senate proceed to the consideration of the sugar bill. I am only keeping my agreement with the Senator from Maryland and with the rest of the Senate, and I propose to keep it. If the Senate does not want to agree to the motion, that is a matter for the Senate to decide. I am agreeable to giving the Senator the yeas and nays on the motion.

Mr. GORE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Tennessee will state it.

Mr. GORE. Did not the Senator from Texas ask unanimous consent to lay aside the bill?

The PRESIDING OFFICER. The Senator from Texas moved to proceed to the consideration of the bill.

Mr. JOHNSON of Texas. I did not ask unanimous consent. I moved to proceed to the consideration of the bill, and the Senator from Ohio has asked for the yeas and nays on the motion to proceed.

The PRESIDING OFFICER. There is a sufficient second. The yeas and nays are ordered, and the clerk will call the roll.

The Chief Clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from North Dakota [Mr. BURDICK], the Senator from Illinois [Mr. DOUGLAS], the Senator from Mississippi [Mr. EASTLAND], the Senator from North Carolina [Mr. ERVIN], the Senator from Arizona [Mr. HAYDEN], the Senator from Alabama [Mr. HILL], the Senator from Minnesota [Mr. HUMPHREY], the Senator from North Carolina [Mr. JORDAN], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Georgia [Mr. RUSSELL], and the Senator from Ohio [Mr. YOUNG] are absent on official business.

I further announce that the Senator from Missouri [Mr. HENNINGS] is absent because of illness.

I further announce that, if present and voting, the Senator from North Dakota [Mr. BURDICK], the Senator from Illinois [Mr. DOUGLAS], the Senator from Mississippi [Mr. EASTLAND], the Senator from North Carolina [Mr. ERVIN], the Senator from Arizona [Mr. HAYDEN], the Senator from Missouri [Mr. HENNINGS], the Senator from Alabama [Mr. HILL], the Senator from Minnesota [Mr. HUMPHREY], the Senator from North Carolina [Mr. JORDAN], the Senator from Tennessee [Mr. KEFAUVER], the Senator from Massachusetts [Mr. KENNEDY], the Senator from Montana [Mr. MURRAY], the Senator from Wyoming [Mr. O'MAHONEY], the Senator from Georgia [Mr. RUSSELL], and the Senator from Ohio [Mr. YOUNG], would each vote "yea."

Mr. KUCHEL. I announce that the Senator from New Hampshire [Mr. BRIDGES] and the Senator from Maryland [Mr. BEALL] are necessarily absent.

The Senator from Iowa [Mr. MARTIN] is absent by leave of the Senate on official business.

I also announce that the Senator from Kansas [Mr. CARLSON], the Senator from Arizona [Mr. GOLDWATER], and the Senator from Massachusetts [Mr. SALTONSTALL] are necessarily absent.

The result was announced—yeas 78, nays 1, as follows:

So the motion was agreed to; and the Senate proceeded to consider the bill.

Mr. JOHNSON of Texas. Mr. President, we were considering this bill and the Butler amendment to it when I asked the Senator from Maryland to yield the floor. I did so in order that we might consider the sugar bill, in the hope that it could go to the other body. Now that has been done. Therefore, in accordance with my understanding with the Senator from Maryland, and out of respect for his courtesy and his fairness to me, we are back at the point at which we were when he yielded to me.

Mr. BUTLER. I thank the Senator from Texas. I shall not take more than 5 minutes, at the most.

Mr. GORE. Mr. President, will the Senator from Maryland yield?

Mr. BUTLER. I yield.

Mr. GORE. Not that it makes any difference, but the Senator from Tennessee yielded to the Senator from Texas at that time.

Mr. BUTLER. That is correct; and I will yield to the Senator from Tennessee, if he desires that I do so.

Mr. GORE. No; I shall speak after the Senator from Maryland has spoken.

Mr. BUTLER. I thank the Senator from Tennessee.

Mr. President, this case is one of extreme hardship to one individual taxpayer. He was a member of a two-man partnership. His partner died. He made his tax return and paid all the taxes that he thought were due.

Five years retroactively, the Treasury levied a deficiency against him based upon the bunching of 23 months income into one tax year amounting to about $101,000. The claim draws interest of about $600 a month.

A private bill was passed by the House and the Senate, without any difficulty whatever. The Judiciary Committees of both Houses saw the justice of the bill. The Treasury said it would oppose the bill, but admitted the claim was equitable.

But after the bill had been vetoed by the President, there was only one other

way to bring the matter before the Senate, and that was the way I have pursued at this time—namely, to amend the law, so that the bill would be retroactive. Returning to the merits of the claim I remind the Senate that the fourth circuit was the only circuit in the Nation that construed the law requiring the bunching of income as in this case. If he had lived in New York, Philadelphia, San Francisco, St. Louis, or any other place in the Nation other than in the fourth circuit, the tax would never have been assessed against him, because all the other circuits construed the law so as not to require bunching. But he happened to live in the fourth circuit; and the fourth circuit—contrary to the decisions in the other circuits—decided the case against him.

Immediately after the deficiency was levied against him, Randolph Paul, one of the most eminent tax lawyers in the United States, was so outraged about the matter that he immediately went to the House of Representatives; and the House immediately acted. The House clarified the law, so that no one else could be caught by the Treasury interpretation under which this man had been caught.

The Senate did the same thing; and in its report the Senate committee very strongly indicated that it was terrible to bunch income and recommended to the Senate that the law be changed so that no one else under similar circumstances could be caught.

He then filed a writ of certiorari in the Supreme Court of the United States. The Treasury Department, through the Department of Justice, made representations to the Supreme Court of the United States to the effect that inasmuch as the Congress had changed the law, so that no one else could be caught, the question was moot, and the Court should do nothing to relieve this man. And the Supreme Court of the United States, even though there was the conflict in the circuits and even though the Court ordinarily would have accepted jurisdiction, refused to review the case.

Therefore this man is left with a liability of $101,000 arising out of the bunching of almost 2 years' income into 1 year. He is the only man who has been caught in that way; no other American citizen can be caught in that way. In my opinion the case has great merit.

Following those facts, as I told the Senate, I had no difficulty whatever in having the Senate Judiciary Committee and the House Judiciary Committee take favorable action on a private relief bill. This man should have relief. The two Houses passed the bill willingly. The bill went to the White House, and was vetoed, even though, as I have said, the Treasury admitted that the claim was equitable.

I say to the Senate that the law should never operate so oppressively; and when one citizen has, as a result of the construction or interpretation placed by only one circuit of the many circuits in the Nation, been obligated to pay a $101,000 tax, drawing interest of $600 a month, which practically has ruined him, certainly that is a hardship which this body should relieve.

When the Finance Committee heard this matter, when I told the committee what the facts were, on a poll of the committee, when the bill was first offered, the committee voted 15 to 2 to grand this man some relief and to clear the amendment which I have submitted here tonight as a floor amendment.

Mr. PASTORE. Mr. President, will the Senator from Maryland yield?

Mr. BUTLER. I am very happy to yield.

Mr. PASTORE. Did the President give a reason for his veto?

Mr. BUTLER. He gave as the reason that only one man could be relieved by such action, and that the bill would be a bad precedent.

I think the man is eminently entitled to relief; and this amendment, as it is drawn—and I placed an explanatory statement in the RECORD, 2 or 3 days ago—is very technical; but I can assure the Senate that the Treasury has not pointed out to me a single instance in which anyone else could be affected by the proposed law.

I admit it is retroactive, and I do not like retroactivity any more than anyone else does. But the Treasury has been unable to point to one case in which anyone else has been similarly treated. I say to the Senate that we should treat taxpayers fairly and impartially; and one man, under the circumstances which exist in this case, is entitled to have his tax computed on the same basis as other taxpayers.

We should treat them impartially; and one man, under the circumstances of this case, should not be forced to pay a tax that will bankrupt him.

I ask the Senate to agree to this amendment for the second time. It adopted it once, without any controversy at all. When the question came up as a relief bill from the Judiciary Committee, it was passed on the Consent Calendar. The House passed the bill on the Consent Calendar. This man is entitled to relief, and I plead with Senators to give him relief.

Mr. GORE. Mr. President, I shall not detain the Senate any longer than the distinguished Senator from Maryland took in presenting the amendment. With one exception, to which I shall refer presently, I think the Senator presented the case accurately. I think he has presented it fairly.

Let me begin by saying that an equitable claim can be presented here on the ground of hardship. I submit, however, that all of us have numerous taxpayers who can present cases of hardship. I think this case certainly has merit. I shall not undertake to go into the technicalities. I do raise the question of the advisability of the Senate considering amendments that have not been reported from committees at this time of night, very technical amendments to the Internal Revenue Code.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. BUTLER. I merely wished to make the point that I felt the amendment had been cleared by the committee, had been considered by the committee, and had been cleared as a floor amendment.

Mr. GORE. To the extent that the committee was polled, the Senator is entirely correct. I think the senior Senator from Maryland was entirely fair in stating to the Senate earlier that he would not have presented this amendment except that other Senators were presenting amendments to the Finance Committee bill; and if other Members were going to do so, he said he claimed the right. And if he succeeds in that right, perhaps I have a few in my pocket. All of us have amendments which we would like to see adopted. Where do we stop in amending the Internal Revenue Code?

I said I would refer to one instance in which I cannot concede that the able Senator from Maryland was accurate. He has said this affects only one taxpayer. I submit that cannot be shown.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. BUTLER. I thought I said the Treasury had not been able to demonstrate to me that it affected more than one taxpayer. I have asked them repeatedly, and they have not told me of anyone else it would affect.

Mr. GORE. If the Senator said that, that is a correct statement.

Mr. BUTLER. I intended to say that.

Mr. GORE. Then it is the correct statement.

Let me point out that if later we find there is a series of taxpayers who turn up in this category, it would by no means be the first experience of the Senate in that respect. There is no way we have to determine how many other taxpayers may be similarly affected by the amendment. It is retroactive tax relief, and, insofar as I now know, it would be for the relief of a single taxpayer.

I should venture the suggestion, however, that others would suggest this proposal amends the law retroactively. The amendment is retroactively to the law. It is not relief for this particular taxpayer. I am sure the Senator will agree with that. It is a retroactive amendment to the law. Is that correct?

Mr. BUTLER. I so stated.

Mr. GORE. Mr. President, I shall not detain the Senate. The Senator from Maryland has presented it fairly.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. MONRONEY. The Senator spells out that this proposal will become a part of the permanent tax code. Is that correct?

Mr. GORE. As the Senator has fairly said, this is not an amendment for the relief of one taxpayer; this is a retroactive amendment of the law and would affect all taxpayers who fall within these circumstances.

Mr. MONRONEY. And it continues on and on until the amendment itself is repealed, if any taxpayer, under a similar situation and circumstances, can establish that same participation or claim.

Mr. GORE. That is right.

Mr. MONRONEY. If this man is in bad condition, if he has been unjustly dealt with, if the present President has vetoed a private bill in his relief, would it not be possible, in the new session of the Congress, with a new President, for the Judiciary Committees of both Houses, within their proper jurisdiction, to pass private bills, taking this matter up de novo in the new Congress, in the regular machinery for establishing private claims?

Mr. GORE. I think the answer is "Yes." I would support the position the President took even on a private relief bill. No showing has been made that this tax has been unjustly or unlawfully laid. A showing has been fairly made by the Senator from Maryland that a hardship has occurred, because under the provisions of the law, the tax over a 23-month period was telescoped into a 12-month period. Is that correct?

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. BUTLER. The income of 23 months was telescoped into 1 year, and the taxpayer was denied his day in court, because the Congress changed the law, thereby stripping him of relief, and then hit him over the head with their own amendment. It would be like going into court with a very good case, and then having the Congress change the law so that there would be no case and there would be no rights. Congress changed the rule in the middle of the game.

Mr. GORE. I respectfully suggest that the last statement is not exactly correct. Congress changed the law, but it did not change it for the period under which the law applied to the taxpayer. The tax was assessed in accordance with the law. The case has been adjudicated. The Supreme Court refused certiorari. A bill for his private relief was passed. The President vetoed it. Now we are asked to amend the law retroactively, not for the relief of one taxpayer, but for the relief of any taxpayer who might find himself in this circumstance; and we do not know how many there may be.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Maryland.

Mr. KUCHEL. Mr. President, I ask for a division.

Mr. ANDERSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KUCHEL. Mr. President, I ask unanimous consent that further proceedings under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KUCHEL. Mr. President, I ask for a division.

The PRESIDING OFFICER. A division is in order. The question is on agreeing to the amendment offered by the Senator from Maryland [Mr. BUTLER].

On a division, the amendment was agreed to.

Mr. MANSFIELD. Mr. President, I had intended to offer an amendment which had been proposed by my senior colleague [Mr. MURRAY], the Senator from Illinois [Mr. DIRKSEN], the Senator from Kentucky [Mr. COOPER] and by me. The amendment would have provided a small measure of relief for our hard-pressed domestic fluorspar industry. This is the only remaining bill to which the particular amendment could have been offered.

In view of the fact that the tax bill now before us has been amended several times and may not get out of conference because of these additions, I have decided on my own responsibility not to offer this amendment at this time, but I express the hope that a proposal of this nature will be considered next year and that this industry will be given the consideration which it deserves because of the precarious condition in which the industry finds itself.

Mr. President——

The PRESIDING OFFICER. The Senator from Montana.

TRIBUTES TO SENATOR LUSK

Mr. MANSFIELD. Mr. President, I wish to take this time to pay my compliments to a Member of the Senate who will be leaving us shortly. He is a modest man. He is a man of great integrity and fine character. He has served with us in a fashion which has endeared him to all of us. I refer to the junior Senator from Oregon [Mr. LUSK].

I have watched him closely since he came here. I think he does us credit. I wish to have the RECORD show that I have been impressed with this man, that I believe he has made a great and a real contribution to the Senate, and that I, for one, will be sorry to see him leave this Chamber. It is with affection, respect, and comradeship that we have come to know him and as we will remember him. I hope he will visit us often and give us of his sagacity and wisdom. He has left his mark and it is a good one.

Mr. JOHNSON of Texas. Mr. President, earlier today I discussed with the Senator from Montana the statement he has just made. I wish to associate myself with his remarks and to pay my high respects and deep appreciation to the able junior Senator from Oregon for his friendship, for the manner in which he has served as a Senator from that great State, for his frequent appearances as Presiding Officer of this body, and for his complete cooperation with the leadership at all times. It has been a great pleasure to serve with him in this body.

Mr. MORSE. Mr. President, I am very happy that the Senator from Montana [Mr. MANSFIELD] and our wonderful majority leader [Mr. JOHNSON of Texas] have paid this tribute to HALL LUSK, who is the junior Senator from Oregon at the present time. I wish to associate myself with their comments.

HALL LUSK has one of the most brilliant judicial records in the history of our State. He served not only on the circuit bench, but also for many years on our Supreme Court bench, with distinction. He is a man of ingrained judicial temperament. All my colleagues in the Senate who have come to know him have come to experience not only the wonderful judicial temperament of HALL LUSK, but also the wonderful man behind that temperament.

It has been a great pleasure for me to be associated with him these past few months in the Senate. I shall always cherish those memories.

Mr. DIRKSEN. Mr. President, I believe it is related that the late distinguished Senator from Virginia, Carter Glass, when he served in the House of Representatives, did not get on his feet to make a speech for 13 years, yet he was one of the most effective legislators in either the House or the Senate and won national acclaim. I think it is living proof that a person can serve quietly, unostentatiously, diligently, and render a great service to his State.

I have observed Senator LUSK. I have had the pleasure of knowing his brother, Rufus Lusk, for at least 20 years. He lives in Washington, and used to be a regular attender at all the meetings of the House District Committee, as my distinguished friend from West Virginia knows. He made a great contribution to this community.

He is a man of conservative instincts, yet never noisy and always self-effacing. What a great job he did.

I have observed Senator LUSK. He has not been window dressing like some of us, but he has always been in his place. He has presided with distinction and dignity.

Tonight it is my pleasure to salute him as a Member of this body and to wish him well.

Mr. MAGNUSON. Mr. President, I wish to associate myself with the remarks of the other Members of the Senate regarding my good neighbor from Oregon, but I also wish to say, from my heart, it has been pleasant to have him here. He has added a great deal to the representation of the Pacific Northwest in the United States Senate. I wish him well whatever he may do, whether he pursues another distinguished career in the judiciary or even, as a Democrat, tries to come back to the Senate. I shall walk across the Columbia River to say a few words in his behalf.

Mr. THURMOND. Mr. President, I wish to be associated with the laudatory remarks being made about the junior Senator from Oregon. It has been a great pleasure for me to be associated with this fine gentleman in the Senate. I have had occasion to be with him in the Senate Wednesday prayer group, and on other occasions. He has impressed me as being a man of strong character and integrity, of high principles and lofty ideals.

We shall miss him when he leaves. He has contributed a great deal as a Senator. He is a man of keen intellect and profound legal ability. His contributions in the Senate have been very worth while.

I express the hope that he will have every success and happiness in the years to come.

Mr. HOLLAND. Mr. President, I know of no Senator who, having been here only a short while, has made a greater impression upon the Senator

from Florida than has the distinguished and capable junior Senator from Oregon. I have always associated him in my mind with two great jurists who served in the Senate in former years; the great Senator from Georgia, Mr. George, and the great Senator from Nevada, Mr. McCarran.

I think that he, as they did, has brought seasoned character and the fine judgment which comes from presiding in the highest court of the State. I have observed his voting, his careful consideration of the measures being debated, and his great consideration for his colleagues. He has always been conscientious in attendance. Everything about him has distinguished him as one who is truly outstanding.

We shall miss him very greatly. I think he has made a true contribution to the Senate during the few months he has been here. I wish to tell him, since I come from far-away Florida, that I shall think of him always with affection and I shall think of him frequently as having added dignity, stature, moderation, and the ability to make hard decisions, as I have seen him make them on several votes, in such a way as to command the very deepest respect of all of us.

Mr. ROBERTSON. Mr. President, I wish to join my colleagues in expressing my pleasure in being associated with so fine a gentleman as the junior Senator from Oregon, and to assure him of our regret that he was not elected for a full term of 6 years in the U.S. Senate. The junior Senator from Virginia regrets that because of the lateness of the hour and other pressing matters he does not have time to say what he would like to say about this splendid colleague, but he does wish to mention that he soon found out that the junior Senator from Oregon was a great admirer of Thomas Jefferson, and that endeared him to the Senator from Virginia.

Mr. RANDOLPH. Mr. President, I endorse the sentiments which have been significantly expressed at this hour this morning in reference to the splendid service, yet modest in nature, of the junior Senator from Oregon. I have been privileged to be his seat mate during the time that he has been in this body. We have chatted in amiable fashion very often. We have discussed pending measures on occasion, and we have even joked about some of the rather unusual procedures which from time to time occur in this forum.

But underlining all of this personal tribute and understanding which I now express toward him, there has been on my part a very genuine respect for the qualities of mature judgment which identified the man who now leaves his colleagues in person, but will remain with them in memory.

Mr. CLARK. Mr. President, it seems appropriate to complete this circle and to have a damn Yankee from north of the Mason-Dixon line and east of the Mississippi Basin join in tribute to the distinguished junior Senator from Oregon. I would like to indicate my strong concurrence in everything that has been said so far, and to leave with him the additional thought that I hope I made a friend of him, as he has certainly made a friend of me during the few short months we have been able to serve together.

Mr. CHURCH. Mr. President, I wish to join in the well deserved tributes that are being given here tonight to my friend and neighbor the junior Senator from Oregon. Judge LUSK is a man of whom it can be truly said he is a gentleman and a scholar. I wish him well in the years ahead. It has been a privilege to know him, and I look forward to a continuance of the friendship we have made in this Chamber.

Mr. GRUENING. Mr. President, I wish to join in these well deserved tributes to so good a friend as Senator LUSK. He has worthily filled the seat occupied by our beloved and distinguished colleague Dick Neuberger. I think Oregon can feel that there has been no gap in the able representation from that State in the junior Senatorship. I have been very happy to know the junior Senator from Oregon. I think he has served with great distinction. I have noted his very faithful attendance on the committees on which I share membership with him, and I certainly wish him well in the future and hope that we shall see him in these parts often.

Mr. KUCHEL. Mr. President, there are many kinds of people who populate the American States on the Pacific Ocean, and I am glad as a Californian to pay my respects to a distinguished citizen of Oregon who for many years has graced the highest judicial body in his State government, and who for the past several months has lent distinction to his State and to himself as the junior Senator from Oregon here in the Senate Chamber.

I remember very well the occasion upon which I first met Judge LUSK, when his colleague, the senior Senator from Oregon [Mr. MORSE], and his wife invited western Senators to meet Judge LUSK as he arrived here to take his oath of office. His suite in the new Senate Office Building and mine are fairly close together, but beyond that he and I have served together as members of the Interior and Insular Affairs Committee. I have had an opportunity to speak with him not only officially concerning the problems which confront us but also personally as to his and my State, and some of our friends, whom we find to be mutual friends.

With all of that background I wish to join those who have spoken before me and say to a very fine gentleman, a very distinguished American, and one who is a friend of all of us here in this Chamber, that I join with them in wishing for him and for his family many, many happy years in the future.

Mr. BIBLE. Mr. President, I should like to associate myself with these well-deserved remarks that have been made about our distinguished Senator from the State of Oregon. I have had many close contacts during his service here. We will miss him as he moves on again into private life.

Mr. LAUSCHE. Mr. President, I would feel delinquent unless I expressed to Senator LUSK my gratitude for the privilege of having been associated with him for this period, which is all too brief.

I have learned to know, Senator LUSK, of the genuineness of your spirit and character. You possess a simplicity which is tremendously rich. I could not help admiring the precision of your mind and the objectivity with which you approach all the problems which came before you as a Senator.

I can well understand why your tenure as a judge in the State of Oregon was so lengthy.

I shall always remember you most affectionately. I shall feel that I have been enriched, spiritually and intellectually, through my association with you.

Mr. YARBOROUGH. Mr. President, I desire to express my appreciation for the privilege of having served in the Senate with Senator LUSK.

As we look at the roster of Senators and their experiences, and the fine experiences of this body, we find that more Members have served in the lower House, probably, than in any other one type of service.

They are followed by a large group of Senators who have served as Governors of their States. Then follow those who have served as judges in the lower courts.

However, I do not believe there is any Member of this body who has served on the bench as long as Judge LUSK.

As a former appellate judge, he has brought to this body the wealth of his many years of experience in the careful review of records and in the careful weighing of judgments, based upon a very careful consideration of the positions of the parties. It is that type of temperament which adds to the overall capacity of the Senate.

It has been a real pleasure to serve with Judge LUSK. I join with all my colleagues in expressing our commendation for his service, and our gratitude for the privilege of serving with him.

Mr. LUSK. Mr. President, until about an hour ago, I was disposed to resent the strange custom of the U.S. Senate to stay in session all night when it was about to adjourn. But since listening to all these very flattering words of tribute, I have decided it is a good idea to stay in session until 4 o'clock in the morning. [Laughter.]

I cannot find words to express adequately my sense of gratitude and appreciation for what has been said here this evening, and for the kind and charitable spirit which inspired your remarks.

I came to the Senate under appointment by Governor Hatfield, of Oregon, last March, imbued with a profound sense of the greatness of this tribunal.

My experience here and the opportunity that has been given me to observe the work of the Senate, the complexity and magnitude of the questions with which the Senate has to deal, the high level of intelligence, the unremitting toil, and the devotion to duty which the Members of this body bring to the task of passing laws in the public interest, have served to increase beyond measure my esteem for the U.S. Senate.

I have enjoyed my service here. At times I have felt a sense of inadequacy and, as my friend, the Senator from Ohio [Mr. LAUSCHE] says, a sense of frustration. But for me it has been a wonderful experience and a source of satisfaction to have had a few months in the Senate of the United States, endeavoring to the best of my ability to serve the country which all of us love.

The 86th Congress approaches adjournment in a great moment of history and at a time of deadly peril. It is well for our country that it is represented in the Senate by Members of the caliber of those who are here; and it should be well for the country, also, if all of us were united, not with the kind of unity that is produced by the suppression of freedom of speech and freedom of religion, and freedom of the press, but with the sort of unity which comes from a lofty purpose to preserve American ideals and a purpose to keep ourselves strong against the great evil of communism that threatens us. And this is also a time, I venture to suggest, when the country should reject the temptation presented by the ugly evil of intolerance, concerning which the Senator from Tennessee [Mr. KEFAUVER] spoke with such eloquence a day or two ago.

Mr. President, I leave the Senate regretfully. I feel that I have made friends here from whom I do not like to part; and I leave with the hope and the prayer that all the future deliberations and decisions of this great body will be guided by divine providence.

[Applause, Senators rising.]

AMENDMENTS OF DISTRICT OF COLUMBIA REDEVELOPMENT ACT OF 1945

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 3688) to amend the District of Columbia Redevelopment Act of 1945, as amended, and the act approved December 20, 1944, as amended, and for other purposes, which were, to strike out all after the enacting clause, and insert:

That the first section of the Act approved December 20, 1944 (58 Stat. 819), as amended (sec. 1-244, D.C. Code, 1951 edition), is amended by adding at the end thereof the following new subsection:

"(1) To enter into leases of, or to grant revocable permits for the use of, the public space over or under Ninth Street Southwest in the District of Columbia to an extent not inconsistent with the use of such street by the general public for the purpose of travel, and in connection with any such lease or permit to impose such terms, including but not limited to the deposit of bond or other security, and to provide for the payment of such rents or fees as the Commissioners may, in their discretion, determine to be necessary or desirable, but the Commissioners shall, in connection with entering into a lease for, or granting a permit for, the use of public space over said street in the District of Columbia, provide as a condition of any such lease or permit that such space shall not be used by the lessee or permittee in such manner as to deprive any real property not owned by such lessee or permittee of its easements of light, air, and access."

And to amend the title so as to read: "An Act to amend the Act of December 20, 1944, with respect to certain powers of the Board of Commissioners of the District of Columbia."

The PRESIDING OFFICER. Without objection, the question is on agreeing to the House amendments.

Mr. BIBLE. As a brief explanation of the purpose of the amendments, the amendments would permit the Redevelopment Land Agency of the District of Columbia to proceed immediately with the construction in Southwest Washington by permitting the bridging over or the tunneling under of Ninth Street in the southwest section. The bill as amended restricts such authority specifically to bridging over or tunneling under streets and highways in the District exclusively to the Ninth Street area. The Commissioners of the District of Columbia, as well as the authorities of the Redevelopment Land Agency, deem the passage of the bill to be of the utmost importance and essential at this session. Without its passage, the construction will not progress on this major unit. It is must legislation, I believe, for the District of Columbia.

I move that the Senate concur in the House amendments.

The matter has been checked thoroughly with the ranking minority member of the Senate District Committee as well as the distinguished minority leader.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Nevada [Mr. BIBLE].

The motion was agreed to.

CONVEYANCE OF CERTAIN PUBLIC AND ACQUIRED LANDS IN STATE OF NEVADA TO COUNTY OF MINERAL, NEV.

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 3212) to direct the Secretary of the Interior and the Administrator of General Services to convey certain public and acquired lands in the State of Nevada to the county of Mineral, Nev., which were, on page 3, strike out all after line 15, over through and including line 2, on page 4; on page 4, line 3, strike out "4." and insert "3.", and on page 4, line 10, strike out "5." and insert "4.".

Mr. BIBLE. Mr. President, the purpose of the amendments is to strike section 3 from the bill and to require the purchaser of the land to purchase it as a unit, and not in parcels or parts of the entire unit. The amendments have been discussed with the ranking minority member of the Committee on Interior and Insular Affairs, and likewise with the acting chairman of the Interior and Insular Affairs Committee, as well as with the ranking majority leader of that committee. They have also been checked with both the majority and minority leaders. I am sure they meet with their approval. I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Nevada.

The motion was agreed to.

LEGISLATIVE ACTIVITIES OF THE COMMITTEE ON THE DISTRICT OF COLUMBIA FOR THE 2D SESSION, 86TH CONGRESS

Mr. BIBLE. Mr. President, I submit a statement from the Committee on the District of Columbia, reporting on the legislative activities of the Committee on the District of Columbia for the 2d session of the 86th Congress. I ask unanimous consent that it may be printed in full in the body of the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR ALAN BIBLE

As chairman of your Committee on the District of Columbia, I am honored to present to the Senate a report of the activities of your committee for the 2d session of the 86th Congress.

Your committee has seen one of the busiest and I believe legislatively productive periods in some years, as the statistics and explanations I will present hereafter fully support. However, in some important areas such as the District's fiscal plight and the crisis at the juvenile court, Congress has not faced up to the realities as they exist today here and now.

Your committee is probably unique among Senate committees by virtue of the great variety of problems, running the gamut of legislative proposals, coming before it, and serving not unlike the upper house of a State legislature and city council combined. Constitutionally, the Congress is the legislative arm for the District.

Many of us believe the District's legislative housekeeping duties should be delegated by the Congress to a locally elected body, giving to this voteless National Capital City true representative self-government. However, the Congress has not yet seen fit to approve this step although the Senate has passed such home-rule legislation five times in the last 11 years.

Mr. President, since I realize the fact that few Members of this distinguished body beat a path to the door of this committee for service, I believe that my colleagues on this committee are most deserving of the gratitude of the entire Congress, the people of the District of Columbia, and the country generally for the long hours they spend in office conferences, hearings, and executive sessions to tend to the business of the Nation's Capital City.

May I further take this opportunity to express my deep appreciation to my subcommittee chairmen who so unselfishly gave of their time and energies. They are my distinguished colleague, the very effective and hard-working senior Senator from Oregon [Mr. MORSE], who is chairman of the Public Health, Education, Welfare and Safety Subcommittee; my warm friend and the capable junior Senator from Delaware [Mr. FREAR], who is chairman of the Fiscal Affairs Subcommittee; my close friend and willing worker, the senior Senator from Maryland [Mr. BEALL], whose long service both in the Senate and House on the District Committees, made his work most valuable as chairman of the Business and Commerce Subcommittee; and the distinguished junior Senator from Indiana [Mr. HARTKE], whose great energy, skill, and experience in municipal government as the mayor of a great city, has been invaluable to our committee as chairman of the Judiciary Subcommittee.

To the other committee members, the junior Senator from South Dakota [Mr. CASE], a distinguished former chairman of the full committee; and to the junior Senator from Vermont [Mr. PROUTY], whose past

service in the House, has been genuinely valuable to our committee, I wish to express my sincere thanks and deep appreciation for the hours they gave to our committee.

Mr. President, I believe the Senate this year and the Congress made real strides in the field of constructive legislation for the District of Columbia.

Probably foremost was recognition by the Congress of the great metropolitan growth of Washington, D.C., and its diversified attendant problems. For the first time and in this year of the decennial census, Congress acknowledged the Federal responsibility for aiding metropolitan development of Washington and its mushrooming suburban communities. Congress, by joint resolution, called on all Federal agencies to cooperate with development of such areas.

To implement this Federal policy declaration, the Congress created the National Capital Transportation Agency to make plans to develop new mass rapid transit facilities for the metropolitan area. Congress authorized the District to construct a $25 million sewer to connect Dulles International Airport with the District system, a far-reaching step in a long and continuing fight to keep the Potomac River sufficiently free of pollution to serve as Washington's drinking supply.

Authorization was given for the District to borrow up to $32 million to assist in this sewer construction plus some modernization of the District's local sewerage system.

Looking at the District's financial plight, I believe most strongly that Congress has no choice but to face squarely into this problem early next year. Under present revenue forecasts and based on expenditure authorizations voted by the Congress, the District will require additional revenue to finish out the current fiscal year in 1961. In my judgment, Congress must increase the Federal payment above the $25 million voted the last several years and must appropriate a sum nearer to the $32 million authorization voted several years ago. In combination with an increased Federal payment, Congress must conclude whether additional taxes in some form must be imposed on District residents to meet the expenditure-versus-revenue squeeze. Certainly, it must be an increased Federal payment or increased taxes and probably both.

In the improvement of judicial machinery, I believe it most regretful that the Congress has not seen fit to meet squarely the increasingly grave problems of the District's juvenile court. The Senate's action early last year in approving two more judges for the overburdened juvenile court has not been implemented in the other body. Instead, a deplorable situation is growing worse with the youngsters, their parents and Washington citizenry the major losers. I am hopeful that early next year, if additional judges are not the answer, then those opponents will propose a workable alternative.

A real beginning was made by the establishment of a legal aid agency whereby indigent defendants in criminal cases may secure constitutionally guaranteed legal counsel. The Senate established this agency to permit agency lawyers to represent indigent defendants, thereby taking a burden from members of the bar unskilled in criminal practice.

This committee approved a bill outlawing mandatory capital punishment in the District, the only jurisdiction in the country with such a requirement, believing the District must get into step with other States in this field.

The Senate approved legislation to protect the public from unethical practices of certain unscrupulous used-car dealers and finance companies in squeezing exorbitant finance and insurance charges from unsuspecting purchasers.

Likewise, the Senate handled legislation which was enacted into law requiring the bonding of fly-by-night home improvement contractors and making more stringent their licensing requirements.

In the field of better law enforcement, the Senate this year authorized an additional 100 policemen, bringing the total Metropolitan force up to the present strength of 2,522, only 192 men short of the authorized force. Inauguration of the canine corps to aid patrolmen has served as an additional crime deterrent.

With the help of added police vigilance, more policemen, and anti-loitering regulations as suggested by this committee 1 year ago, juvenile hoodlumism has shown a decline.

As an added incentive to attract and keep capable police officers, the Senate approved a salary increase for policemen, together with firemen, bringing this force to a higher level in pay scales for the major cities of the country, the fourth increase in the last 10 years.

In an effort to curb increasing traffic fatalities, the Senate passed legislation permitting the courts to increase jail sentences for traffic violations from 10 to 90 days.

To stop a spreading practice, the Senate approved legislation to require written prescriptions for the purchase of certain cough syrups with a high narcotic content.

Urban renewal and redevelopment occupied the attention of the Senate with approval of legislation to implement new construction and modernization of the Potomac River, District of Columbia waterfront area. Committee approval was given to a bill to permit a bridging over and tunneling under 9th Street Southwest to make possible construction of a 1,000-room hotel in the Southwest redevelopment program.

The committee authorized an investigation of the slow progress of urban renewal and redevelopment in the District after recurring complaints from residents, developers and business interests. Preliminary staff inquiries will precede public hearing slated early next year.

In the education field, the Senate authorized establishment of a junior college division at D.C. Teacher's College to meet an increasing demand for qualified teachers. As a further incentive to keeping present teachers and recruiting new instructors, the Senate approved a 7½ percent salary increase, giving to new teachers with a bachelor's degree $4,800 per annum. This increase now places the District's school system as the second highest among cities of over 500,000 population in the Nation, exceeded only by Chicago, Ill. The District will rank first for all metropolitan cities for teachers with a master's degree, with an entrance salary of $5,300.

The committee continued to show its strong interest in the free elementary school lunch program, initiated at the committee's insistence during the 85th Congress. Hearings, which were printed, pointed up the progress made to extend the service to more eligible children. As of May 31, 1960, 2,843 children from 1,709 families were participants.

In the public welfare field, the Senate approved a bill consolidating the District's public assistance laws, providing a 1-year residence requirement and making uniform the classes of relatives responsible for providing support to the dependent and needy. Hearings, which were printed, pointed up recommendations of District welfare officials governing unified public assistance improvements.

Two health regulatory measures won Senate approval. The District Commissioners were empowered in one bill to set standards and criteria for the regulation of the practice of physical therapy and a second bill empowered the Commissioners to regulate the practice of practical nursing, a step urged to meet acute needs for patient care where registered and trained nurses are not required.

The Senate approved a committee-passed bill authorizing a Federal grant to the Convalescent Hospital of Washington for construction of a 333-bed hospital for the chronically ill, the convalescent, and persons requiring nursing home care.

The committee also empowered its standing Subcommittee on Public Health to investigate the cost of medical care in the District of Columbia.

I include the report in the body of the RECORD at the conclusion of my statement. It includes a summary statement and statistical table of committee action on matters referred to it.

In connection with this activity report, I should like to draw the Senate's attention to one overall figure. The committee in the 86th Congress had referred to it for action a total of 208 matters, including Senate bills, House acts, resolutions, and nominations. The committee's active consideration of these matters stands as a commendable record in which the Senate should take justifiable pride.

REPORT OF ACTIVITIES OF THE COMMITTEE ON THE DISTRICT OF COLUMBIA, 2D SESSION, 86TH CONGRESS, AUGUST 31, 1960

The Committee on the District of Columbia received for consideration in the 2d session, 86th Congress, the following:

Senate bills	61
House bills	27
Senate resolutions	1
Senate joint resolutions	1
Senate concurrent resolutions	2
Nominations	4
Grand total	96

During the session, there were reported to the Senate from the Committee, 27 Senate bills, 21 House bills, and 2 Senate concurrent resolutions. One Senate bill and two House bills remain on the Senate Calendar.

Of the 27 House bills referred to the Senate, 5 are pending before the committee.

Twenty-two bills and acts have become public law as of this date. (August 31, 1960.)

Fifty-seven hearings were held by subcommittees on Senate bills and 17 hearings were held by subcommittees on House bills.

The full committee held hearings on two nominations.

The full committee met in executive session on five occasions.

A subcommittee field trip of an investigatory nature was made in connection with crowded conditions at the dependent children's center at Junior Village.

Following is statistical data of actions by the Senate District of Columbia Committee during the 2d session, 86th Congress:

Number of bills, acts, resolutions, and nominations referred to committee	96
Number of bills, acts, resolutions, and nominations reported to Senate	44
Number of bills, acts, and resolutions in process (hearings held)	4
Number of bills, acts, and resolutions indefinitely postponed within committee, including consolidation	17
Number of bills, acts, resolutions, and nominations awaiting final action	31

Number of bills, acts, and resolutions received during the 1st session of the 86th Congress upon which the committee has acted during the 2d session:

Senate bills reported favorably	7
House acts reported favorably	1
Senate bills in process	5
House acts in process	1
Senate bills postponed indefinitely	9
House acts postponed indefinitely	1

Comparative statistical data of action by the Senate District of Columbia Committee during the 1st and 2d sess. of the 85th Cong. and the 1st and 2d sess. of the 86th Cong.

	1st sess., 85th Cong.	2d sess., 85th Cong.	1st sess., 86th Cong.	2d sess., 86th Cong.
Number of bills, acts, resolutions, and nominations referred to committee	105	68	112	96
Number of bills, acts, resolutions, and nominations reported to Senate	42	36	53	44
Number of bills, acts, and resolutions in process (hearings held)	9	1	7	4
Number of bills, acts, and resolutions indefinitely postponed within committee, including consolidation	21	16	27	17
Number of bills, acts, and resolutions awaiting initial action	35	15	26	29
Hearings held by subcommittees on Senate bills	38	34	64	57
Hearings held by subcommittees on House bills	11	7	18	17
Hearings held by subcommittees on resolutions		3	8	
Total hearings held by subcommittees	49	44	90	74
Hearings by full committee on bills, resolutions, and nominations	4	4	7	2
Full committee meetings	9	7	7	5

The following is a list, by title and number, of all bills, acts, and resolutions passed by the Senate during the 2d session of the 86th Congress. Those that became law are indicated by the public or private law number.

S. 675, to regulate the practice of physical therapy by registered physical therapists in the District of Columbia.

S. 2131, to amend the Motor Vehicle Safety Responsibility Act of the District of Columbia.

S. 2306, to exempt from taxation certain property of the National Woman's Party, Inc., in the District of Columbia.

S. 2363, to provide for more effective administration of public assistance in the District of Columbia.

S. 2446, to amend the District Civil Defense Act so as to more adequately meet the needs of the District in case of attack or a major disaster.

S. 2671, to exempt from taxation certain property of the American War Mothers, Inc.

S. 2954, to exempt from the District of Columbia income tax compensation paid to alien employees by certain international organizations. Public Law 86–522.

S. 2979, to authorize the Administrator of General Services to make grants in cash and land to the Convalescent Hospital of Washington, D.C., Inc., for the purpose of enabling the corporation to establish a convalescent and chronic disease hospital in the District of Columbia.

S. 3194, to amend the acts of March 3, 1901, and July 15, 1939, as amended, so as to exempt the District of Columbia from paying fees in any of the courts of the District of Columbia.

S. 3195, to exempt from taxation certain property of the Army Distaff Foundation.

S. 3257, to amend the District of Columbia Traffic Act, 1925, as amended, to increase the fee charged for learners' permits.

S. 3258, to amend the Alcoholic Beverage Control Act to permit the collection of excise taxes on distilled spirits by a reporting system.

S. 3304, to amend the act relating to the small claims and conciliation branch of the municipal court of the District of Columbia.

S. 3305, to amend the District of Columbia Traffic Act, 1925, as amended, to increase the maximum imprisonment for traffic violations from 10 days to 90 days.

S. 3415, to exempt from taxation certain property of the American Association of University Women, Education Foundation, Inc., in the District of Columbia.

S. 3416, to provide for the restoration to the United States of amounts expended in the District of Columbia in carrying out the Temporary Unemployment Compensation Act of 1958.

S. 3616, to deny to the District of Columbia, in suits on claims arising out of the negligent operation of vehicles owned or controlled by it and operated by its employees in the performance of their official duties, the defense of governmental immunity, to relieve such employees of liability in such cases to third persons. Public Law 86–654.

S. 3648, to authorize the Commissioners of the District of Columbia on behalf of the United States to transfer from the United States to the District of Columbia Redevelopment Land Agency title to certain real property in said District.

S. 3688, to amend the District of Columbia Redevelopment Act of 1945 so as to authorize the Redevelopment Land Agency to eliminate or restore all slum or blighted areas whether residential or nonresidential and to develop such areas for whatever uses are determined to be appropriate.

S. 3727, to provide for the bonding of persons engaging in the repair, remodeling, alteration, conversion, or modernization of residential property; to impose limitations on the assertion of mechanics' liens where payment has been made for work in connection with the repair, remodeling, alteration, conversion, or modernizations of residential property.

S. 3834, to increase the maximum amount which may be borrowed by the District of Columbia for use in the construction and improvement of its sanitary and combined sewer systems.

S. 3835, to authorize the District of Columbia Civil War Centennial Commission to plan and carry out in the District of Columbia civic programs in commemoration of the 100th anniversary of the Civil War and for other purposes.

S. 3867, to exempt from taxation certain property of the National Guard Association of the United States in the District of Columbia.

S. Con. Res. 82, extending the Joint Committee on Washington Metropolitan Problems.

S. Con. Res. 101, authorizing public hearings and recommendations on the bills S. 3193 and H.R. 11135, by the Joint Committee on Washington Metropolitan Problems.

H.R. 1844, to amend the Life Insurance Act to allow the writing of group life insurance to employees of trade associations. Public Law 86–579.

H.R. 7124, to require the payment of tuition on account of certain persons who attend the public schools of the District of Columbia.

H.R. 8289, to accelerate the commencing date of civil service retirement annuities.

H.R. 9451, to amend the act of July 19, 1954, to exempt from taxation certain additional property of the Veterans of Foreign Wars of the United States in the District of Columbia, and to provide that the tax exemption granted the property of the Veterans of Foreign Wars of the United States in the District of Columbia shall be effective with respect to taxable years beginning on and after July 1, 1959. Public Law 86–430.

H.R. 9737, to amend the act of March 3, 1901, to eliminate the requirement that certain District of Columbia corporations be managed by trustees the majority of whom are citizens of the District of Columbia. Public Law 86–436.

H.R. 10000, to amend further certain provisions of the District of Columbia tax laws relating to overpayments and refunds of taxes erroneously collected. Public Law 86–528.

H.R. 10021, providing a uniform law for the transfer of securities to and by fiduciaries in the District of Columbia. Public Law 86–584.

H.R. 10183, to amend the Fire and Casualty Act regulating the business of fire, marine, and casualty insurance in the District of Columbia. Public Law 86–526.

H.R. 10683, to provide for the regulation of finance charges for retail installment sales of motor vehicles in the District of Columbia. Public Law 86–431.

H.R. 10684, to amend the District of Columbia Life Insurance Act to revise certain mortality tables and payments. Public Law 86–530.

H.R. 10761, to provide for the representation of indigents in judicial proceedings in the District of Columbia. Public Law 86–531.

H.R. 10921, to amend the District of Columbia Life Insurance Act relative to investment of funds by life insurance companies.

H.R. 10952, to authorize the National Society Daughters of the American Colonists to use certain real property in the District of Columbia as the national headquarters of that society. Public Law 86–675.

H.R. 10964, to amend the Life Insurance Act of the District of Columbia to provide for the regulation of the business of writing variable annuity contracts. Public Law 86–520.

H.R. 11135, to aid in the development of a coordinated system of transportation for the National Capital region; to create a temporary National Capital Transportation Agency, to authorize negotiation to create an interstate agency; and for other purposes. Public Law 86–669.

H.R. 11415, to provide for the designation of a portion of the District of Columbia as the "Plaza of the Americas", Public Law 86–460.

H.R. 11931, to amend the act of March 3, 1901, with respect to the time within which a caveat to a will must be filed in the District of Columbia. Public Law 86–674.

H.R. 12063, to authorize the Commissioners of the District of Columbia to plan, construct, operate, and maintain a sanitary sewer to connect the Dulles International Airport with the District of Columbia system. Public Law 86–515.

H.R. 12563, to amend the act to provide additional revenue for the District of Columbia by increasing and changing certain fees for motor vehicles.

H.R. 12584, to amend the Uniform Narcotic Drug Act for the District of Columbia to require a physician's prescription for purchase of medicines or preparations containing one-sixth of a grain or less of dihydrocodeinone or any of its salts per fluid ounce. Public Law 86–668.

H.R. 12993, to amend the District of Columbia Teachers' Salary Act of 1955, as amended.

H.R. 13053, to increase the salaries of officers and members of the Metropolitan Police force and the Fire Department of the District of Columbia, the U.S. Park Police, the White House Police, and for other purposes.

The following is a list of nominations confirmed by the Senate:

Randolph C. Richardson, of the District of Columbia, to be associate judge of the

municipal court for the District of Columbia for the term of 10 years, vice George D. Neilson, term expired.

Thomas C. Scalley, of the District of Columbia, to be associate judge of the municipal court for the District of Columbia for a term of 10 years.

GRANTING OF MINERAL RIGHTS IN CERTAIN HOMESTEAD LANDS IN STATE OF ALASKA

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 1670) to provide for the granting of mineral rights in certain homestead lands in the State of Alaska, which was, on page 2, line 10, after "lease," insert: "insofar as the lease pertains to the quitclaimed lands,".

Mr. BARTLETT. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Alaska.

The motion was agreed to.

DISPOSITION OF CERTAIN PUBLIC LANDS IN ALASKA

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 3267) to amend the act of October 17, 1940, relating to the disposition of certain public lands in Alaska, which was, on page 1, line 7, after "value" insert "(but not less than $1.25 per acre).".

Mr. BARTLETT. Mr. President, I move that the Senate concur in the House amendment.

The PRESIDING OFFICER. The question is on the motion of the Senator from Alaska.

The motion was agreed to.

CONSTRUCTION, OPERATION, AND MAINTENANCE OF WESTERN DIVISION OF THE DALLES FEDERAL RECLAMATION PROJECT, OREGON

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 2195) to authorize the Secretary of the Interior to construct, operate, and maintain the Western division of the Dalles Federal reclamation project, Oregon, and for other purposes, which were, on page 2, line 19, after "fund" insert "within a 50-year period from the date of the first delivery of water from the facilities authorized by this legislation", and on page 4, strike out lines 3 through 5, inclusive, and insert:

SEC. 3. There is hereby authorized to be appropriated for construction of the works authorized by this Act not to exceed $6,000,000, plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuations in construction costs as indicated by engineering cost indices applicable to the types of construction involved herein.

Mr. ANDERSON. Mr. President, these are rather minor amendments which the House has inserted. The bill is in about the same shape as it was when it passed the Senate. I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from New Mexico.

The motion was agreed to.

CHENEY DIVISION, WICHITA FEDERAL RECLAMATION PROJECT, KANSAS

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 1092) to provide for the construction of the Cheney division, Wichita Federal reclamation project, Kansas, and for other purposes, which were, on page 2, line 6, strike out "Act" and insert "Acts", and on page 5, strike out lines 16 through 18, inclusive, and insert:

SEC. 9. There is hereby authorized to be appropriated for construction of the works authorized by this Act not to exceed $18,274,000, plus or minus such amounts, if any, as may be justified by reason of ordinary fluctuations in construction costs as indicated by engineering cost indices applicable to the types of construction involved herein.

Mr. ANDERSON. The House merely substitutes the word "acts" where the bill used the word "act." It adds a financial limitation, which is agreeable. We have cleared it with both sides of the aisle. I move that the Senate concur in the amendments of the House.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from New Mexico.

The motion was agreed to.

IMPORTATION OF CERTAIN ARTICLES FOR RELIGIOUS PURPOSES

The Senate resumed the consideration of the bill (H.R. 4384) to amend paragraph 1774 of the Tariff Act of 1930 with respect to the importation of certain articles for religious purposes.

Mr. MANSFIELD. Mr. President, are there any further amendments to be offered to the bill?

Mr. AIKEN. Mr. President, I wish to ask a few clarifying questions. I should like to have the attention of a member of the Committee on Finance in regard to H.R. 4384. It permits the importation of statuary for several purposes, including cemeteries. May I inquire if it is intended to permit the free importation of headstones or mausoleums, or anything of that nature when statuary comprises a part of the material?

Mr. KERR. It is my understanding that it would not.

Mr. AIKEN. It does not?

Mr. KERR. That is correct.

Mr. AIKEN. Headstones could not be imported free because they had a figure carved on them. Is that correct?

Mr. KERR. The Senator is correct.

Mr. COOPER. Mr. President, I ask consent to place in the body of the RECORD at a point prior to the passage of H.R. 4384, a statement regarding the amendment to assist our domestic fluorspar industry, offered by myself, the Senator from Montana [Mr. MURRAY], and the Senator from Illinois [Mr. DIRKSEN].

I also ask consent to have printed in the RECORD as a part of my remarks, a copy of a letter addressed by Senators MURRAY, DIRKSEN, and myself to our colleagues, with an explanatory statement.

There being no objection, the statements and letter were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR COOPER

I had joined with Senators DIRKSEN and MURRAY in introducing an amendment to H.R. 10548, to provide relief for our domestic fluorspar industry, and I had hoped that it would be possible to secure its adoption. Later we joined in proposing it as an amendment to H.R. 4348, the bill now under consideration.

Because other amendments have been added which make the final passage of the bill by both Houses very doubtful, and taking into consideration the agreement of the leaders to give our amendment early consideration at the next session, we have concluded that it would not be favorable to tie this amendment to H.R. 4348. We will press for its adoption at the next session of the Congress.

U.S. SENATE,
August 18, 1960.

DEAR COLLEAGUE: We have introduced an amendment to H.R. 10548 designed to provide some small measure of relief for our hard-pressed domestic fluorspar industry.

Fluorspar is essential to the production of steel, aluminum, atomic energy, and to the rocket and missile program. It is also used to produce aerosol products, plastics, paints, glass, enamelware, and provides the fluorine for our fluorine chemical industry.

As late as World War II our domestic fluorspar mines provided all of the fluorspar necessary to meet our defense needs. Now foreign fluorspar, the production of which has been stimulated by grants, gifts, stockpile purchases and barter contracts, has achieved a rate of production which threatens to take over completely the domestic fluorspar market.

The last Tariff Commission investigation (there have been three), reported to the Senate February 29, 1960, points out that domestic production, January to September 1959, was only 55 percent of that of the same period in 1958; that 1958 commercial shipments of acid grade fluorspar were 33 percent under the 1954–57 average; that employment in the fluorspar industry declined in 1959 by 51 percent; and that the aggregate net profits of the industry, before taxes, were only 5.4 percent for January to June 1959.

The overall condition of the industry has worsened since this report was made, and some relief now appears absolutely essential if this Nation is to have a domestic fluorspar industry.

Attached is a report of the Illinois State Geological Survey. This governmental agency is probably better advised on the fluorspar industry than any other. We refer you in particular to page 20 of the report containing a one-paragraph summary of the fluorspar problem.

Considering what has recently happened to our supply of nickel and cobalt in Cuba and the attendant Mexican repercussions, and what is happening in Africa, it seems unwise to us that we should allow our domestic fluorspar industry to close and to let the United States become completely dependent upon foreign sources for our supply. Our principal foreign sources of fluorspar are Mexico and Italy.

The amendment we have proposed would sustain domestic production at about 30 percent of our domestic consumption requirements and would enable the fluorspar mining industry to maintain itself at a de-

gree of readiness which we consider the bare minimum for national safety.

An explanation of the amendment is attached, and your support is earnestly solicited.

Sincerely yours,

JAMES E. MURRAY,
U.S. Senator.
EVERETT MCKINLEY DIRKSEN,
U.S. Senator.
JOHN SHERMAN COOPER,
U.S. Senator.

EXPLANATION OF THE PROPOSED FLUORSPAR AMENDMENT

The fluorspar amendment provides for incentive payments to domestic producers of fluorspar in order to promote mining, development, exploration and research for the material.

The payments are limited to $10 per ton on acid grade fluorspar and $7.50 per ton on metallurgical and ceramic grade. The total tonnage is limited to not more than 100,000 tons per year on acid grade and not more than 90,000 tons per year of metallurgical and ceramic grades. The maximum annual cost would be $1,675,000. The program would terminate June 30, 1965.

To receive an incentive payment the producer must first sell the fluorspar to a consumer. Captive producers are excluded from the amendment. (There are only three.) Only the smaller independent producers are eligible for participation.

The payments provided for on acid grade are less than those approved by the Senate when it passed the minerals stabilization program, which was approved by the House Interior Committee but defeated in the House. The amendment embodies the same principle as was approved last year by the Senate Interior Committee.

The amendment would not have the effect of cutting back imports, but rather would permit the domestic producers to hold on to that small portion (about 30 percent) of the market they now supply, and which, without some relief as now proposed, they will certainly lose.

The Secretary of the Interior is authorized in the amendment to establish regulations for the administration of the program, but such regulations shall assure equitable distribution of the benefits of the program—throughout the domestic industries. This means that the Secretary could limit tonnages to producers so that the program would benefit all producers.

The PRESIDING OFFICER. The bill is before the Senate and open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. KERR. Mr. President, I ask unanimous consent that in the engrossment of the Senate amendments, the Secretary of the Senate be authorized to correct or make such clerical or technical changes as may be necessary.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, I move that the Senate reconsider the vote by which H.R. 4384 was passed.

Mr. JOHNSON of Texas. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BIRTHDAY ANNIVERSARIES OF SENATORS PROUTY AND SALTONSTALL

Mr. DIRKSEN. Mr. President, I never cease to marvel at the wealth of governmental talent which comes to the U.S. Senate. I am thinking particularly today of WINSTON L. PROUTY, a Member of the Senate.

He served as the mayor of his town. He was a member of the Vermont House of Representatives, and Speaker of that distinguished body in 1947. He was elected to four terms in the National House of Representatives, and was elected a U.S. Senator in 1958. He is a stalwart member of the Committee on Labor and Public Welfare and other committees. This is his birthday anniversary, and I wish to join in tribute and in salute to our distinguished colleague from Vermont.

Today we also observe the birthday anniversary of still another New Englander. I like him immensely. He shows that rare restraint which is in keeping with the very great New England tradition. He served as Speaker of the Massachusetts House of Representatives, and as Governor for three terms. He was chairman of the New England Governors' conference, and also of the National Governors' conference. He has been a Member of the Senate for 16 years.

He is one of those great balance wheels. It is a joy to have him around and to be able to sit with him and drink from that great font of New England wisdom.

So today it is not only Senator PROUTY's birthday, but it is also Senator LEVERETT SALTONSTALL's birthday. We pay tribute to both Senators.

REGULATION OF MASS TRANSIT IN THE WASHINGTON, D.C., METROPOLITAN AREA

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of Calendar No. 1975, House Joint Resolution 402.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate resumed the consideration of House Joint Resolution 402 granting the consent of Congress for the States of Virginia and Maryland, and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, D.C., metropolitan area and for other purposes.

DU PONT-GENERAL MOTORS DECISION BY SUPREME COURT

Mr. FREAR. Mr. President, for the past 2½ years the junior Senator from Delaware has sought passage of legislation to protect the direct interests of a quarter of a million American investors who are threatened with heavy and in some cases confiscatory tax penalties. The threat arises, as a result of a decision by the Supreme Court in the so-called Du Pont-General Motors case whereby the Du Pont Co. may have to divest itself of its holdings of General Motors stock acquired more than 40 years ago.

If this divestiture occurs, Du Pont shareholders who receive the General Motors stock will under a ruling of the Internal Revenue Service be required to pay taxes on it at ordinary income rates.

The legislation which I have endeavored to have approved to remove the threat of this drastic penalty has now been the subject of thorough hearings before the Senate Finance Committee and the House Ways and Means Committee. Both of these committees have approved the legislation though in somewhat different forms.

I might add, that there would be a tax under these bills of approximately $75 million and, of course, Mr. President, would clearly constitute a windfall to the Treasury Department.

In addition to favorable committee action in the House and Senate, the Treasury Department has also approved this legislation as well as the Department of Justice which is charged with administering our antitrust laws.

It would thus seem that this bill now on the Senate Calendar in amendment form ought to be promptly enacted in behalf of the 250,000 American investors whom we represent here.

Indeed, Mr. President, far more than this number are involved for if divestiture occurs without appropriate legislation, the 750,000 General Motors shareholders would also be affected by the probable unfavorable impact on the value of their stock when the divestiture process takes place.

All told then, about 1 million Americans and their families—innocent victims in this long drawn-out legal battle which has now consumed more than 11 years—may bear the unjust tax consequences unless we act.

The junior Senator from Delaware had earnestly hoped that final plans to bring up this legislation before Congress adjourned could be realized.

It is a source of deep personal disappointment that he has not been able to do so because of failure to resolve some differences.

Now at this late hour it would seem unfair to precipitate a lengthy debate which appears to be impending if the issue is brought to the floor.

As an alternative, I express the hope that when the new Congress convenes in January—and if the junior Senator is present—cooperative efforts will be successfully undertaken whereby appropriate legislation can be promptly approved.

In the meantime, if the Supreme Court again reverses the decision of the lower court on the appeal taken by the Department of Justice, it is to be hoped that the assurance of congressional action in behalf of the shareholders involved will lessen the dismay and disappointment which confronts these individuals through our inability to resolve the issue at this Congress by the legislation which is now before us.

I understand also, Mr. President, that the Finance Committee has been assured by the Treasury Department that

no question of retroactivity will be involved.

Mr. KERR. Mr. President, I congratulate the distinguished junior Senator from Delaware for the statement he has just made in support of legislation for which he has labored so long and so patiently. I pay tribute to him for the diligent and persevering manner in which he has worked for the passage of this measure. Certainly the cause for which he has worked is just. His statement in no way indicates the lessening of interest; on the contrary, it serves notice that he is ready to continue his worthy effort.

I am sorry that he finds it necessary to lay the work aside for this session of Congress, but I am confident that the legislative record he has already established, including the approval of bills by the Committee on Finance, will constitute a strong endorsement when it is presented to the new Congress in January.

Mr. President, the senior Senator from Oklahoma also had an amendment to H.R. 5547, which embodies the text of S. 3618.

The amendment imposes a fixed duty on lead of 2 cents plus a flexible additional tax of 1 cent a pound to be applied when the price of lead falls below 13½ cents, and removed when the price reaches 14½ cents a pound, and imposing a fixed duty on zinc of 1½ cents a pound, plus a flexible additional duty of 0.7 cent a pound to be applied when the price of zinc falls below 12½ cents a pound, and removed when the price of zinc reaches 13½ cents a pound.

It is the opinion of the senior Senator from Oklahoma that that amendment should have been adopted at this session. It will be the ambition of the Senator from Oklahoma to introduce this proposed legislation and to work for its passage at the next session of Congress.

Mr. JOHNSON of Texas. Mr. President, I have listened to the statement just made by the able senior Senator from Oklahoma [Mr. KERR]. I desire to associate myself with it. I do not know of any Member of this body who is more beloved than the distinguished junior Senator from Delaware [Mr. FREAR]. He has been very diligent in seeking to have this proposed legislation passed. I regret it has not been possible to have it scheduled before the Senate and debated at this session. I appreciate the patience, consideration, and cooperation which the Senator from Delaware always extends to each Member of the Senate. I treasure his friendship.

NUCLEAR POWER FOR OUTER SPACE

Mr. ANDERSON. Mr. President, I had intended to address the Senate on the Subject "Nuclear Power for Outer Space." The hour is late and the statement is long. I therefore ask unanimous consent that the statement be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR ANDERSON

NUCLEAR POWER FOR OUTER SPACE

As Chairman of the Joint Committee on Atomic Energy, I regard it as my duty to report to the Congress from time to time on atomic energy matters. On other occasions I have expressed my philosophy on the role of the Joint Committee. We stand as guarantors to the other Members of the Congress that all is well behind the veil of official secrecy, and that if all is not well, we will seek to tell you what is wrong.

Today I would like to report on the nuclear space program—on the program for the development of nuclear rockets and space electrical power systems. I shall tell you of the importance of these projects and propose specific national objectives for their development.

In this nuclear space program, many items can still be causes of worry. Despite dramatic technical accomplishments, the program is being administered on a low-key basis which is not as dynamic as many of us would like.

On last Monday, August 29, the Joint Committee saw classified movies of the highly successful test of the Kiwa-A prime nuclear rocket experiment which was held in Nevada on July 8 of this year. We also heard representatives of AEC and NASA discuss the future programs, schedules, and organization.

After months of delay they have finally come up with an integrated organization physically housed within AEC for the direction of the nuclear rocket program. I hope that the program will be directed with the initiative and drive necessary for success, but more of that later.

The utilization of atomic power in outer space offers the greatest opportunity for the United States to create a climate of world good will through leadership in peaceful space exploration. This matter could be as important as the hydrogen bomb debate in the early 1950's or the Manhattan project decision in 1942. Few things deserve more serious reflection, for we can now be missing a great opportunity while sowing the seeds of another prestige disaster.

The scientists and technical experts have described the atomic-space frontier. Our national laboratories like the Los Alamos scientific laboratory have come up with the ideas. We lack only policy, purpose, management, and fiscal support. The secret veto of neglect has been used with abandon. Too many men in positions of power sell American astronautics short.

There is no national policy for the utilization of nuclear rockets and other nuclear space applications. There is developmental effort, reluctantly and partially funded, but no program complete with schedule, timetables, and specific direction. There is a complex arrangement of Government agency control which has caused confusion, conflict, and the potential for wasteful duplication.

These are some of the problems in brief. I will describe them more fully later.

Nuclear rocket development is not new. It has been under way since 1955 in project Rover, at the Los Alamos scientific laboratory of the Atomic Energy Commission.

There has been substantial progress. There was a ground test a year ago of the first Rover test reactor—Kiwi-A—and that month of a second improved test reactor—Kiwi-A prime. These were experimental devices leading up to prototype design. Both successful tests have met technical expectations.

There is nothing exotic about Rover. In a chemical rocket, fuels burn, eject from the rocket and produce thrust. In a nuclear system there is no combustion. A light element such as hydrogen is passed over a nuclear reactor, is heated and thrust is produced with higher specific impulse. This scientific term "specific impulse," is only a measurement of thrust per unit weight of fuel consumed. What it all boils down to it more payload, more usable weight in outer space.

Another nuclear space application is the use of small atomic reactors to supply secondary or auxiliary electrical power for space vehicles. Here development has also been going on since 1955. The Atomic Energy Commission has been developing these reactors in the Snap program. There are several types of Snap power sources but the reactor units are best represented by the so-called Snap VIII, an atomic power source which would be capable of generating some 30 to 60 kilowatts of electricity in outer space.

These two programs in the nuclear space technology are mature. There is more than enough background information for policy formulation.

Nuclear rocket propulsion is the most advanced form of rocket boosting for this and the next decade and as the House Committee on Science and Astronautics puts it, "propulsion is the key to space travel."

Nuclear propelled rockets promise the capacity to put large payloads into outer space at an early date. They are the key to interplanetary travel, to manned expeditions to the moon, and to the safe return of astronauts from lunar or interplanetary explorations. They are the key to all that is big, important and earthshaking when we speak of astronautics.

As the chairman of the Atomic Energy Commission, John McCone said last fall, "nuclear power offers to rockets the most energy per unit mass of any fuel source presently known. In fact, it is the only source of energy which promises the large quantities of power necessary to carry increasingly larger payloads into outer space."

Col. Jack L. Armstrong assigned to the Atomic Energy Commission said it another way, "The nuclear systems offer us an opportunity to take a jump over the Russians."

Almost every astronautical expert in the world, behind the iron curtain or in the free world, sees nuclear propulsion as indispensable to space exploration. Few serious published works, Russian or American, fail to say this. In fact, the Soviet publications emphasize it.

In the most recent edition of "Ordnance," the publication of the American Ordnance Association, Mr. Richard Deupree analyzes the Soviet program and foresees that their large space rocket will have a nuclear sustainer booster.

Testifying before the Joint Committee on Atomic Energy this year, Dr. Krafft Ehricke said that to ignore nuclear rockets is to flirt with obsolescence. He said this:

"The universe is run by nuclear energy. Space will be conquered only by manned nuclear-powered vehicles. Planning anything else for the late sixties is, in my opinion, flirting with obsolescence almost from the start.

"I would like to express my strong conviction that the nuclear engine is for astronautics what the combustion engine is for aeronautics. It is the only means of obtaining complete independence operationally from the earth to the extent to which it is necessary to explore the planets of our solar system. I am firmly convinced that the surest way to cripple the U.S. space capability in the seventies would be to cripple its nuclear engine development in the sixties."

An industry report submitted in these same Joint Committee hearings claimed that neglect of nuclear rockets would leave the United States a second class world power.

There seems to be little need to continue this documentation. Who will question the importance of nuclear rocket development?

The experts also agree that if satellites or space vehicles are to serve any utilitarian function. They must have big blocks of auxiliary electric power which only nuclear energy can supply. Otherwise, satellites are so much junk littering the universe. Without internal power, satellites and space vehicles are relatively useless. It costs many millions of dollars to launch one of these objects from the earth, and it strikes me as wasteful not to assure that they have powerful sources of electric energy capable of generating power for long periods of time—for years rather than months.

Electric power will be needed for human needs on manned missions—for environmental controls: water, food, and oxygen regeneration. It is needed to power communications, scientific, and other equipment on manned and unmanned missions and to supply power to continuous low-thrust electrical propulsion engines. Here the experts say that the important space explorations will require electricity in the range of at least 1 megawatt—1,000 kilowatts of electricity. This can only come from nuclear power, but of all our space requirements of the future, this may be the longest leadtime item. We should get on with this job now.

The prospect of power in these major dimensions, for propulsion and support, could be the opportunity for leadership we have been seeking. Haven't we been casting about for a leap forward in which we can get the jump on the Russians? The conquest of outer space through American nuclear technology represents a golden opportunity for leadership which could capture the imagination of the peoples of the world.

In today's world, national prestige is no longer derived from military power alone—many other things are equally important. The Soviet space satellites were not military weapons but they had no little effect on the prestige of the Soviet Union. Our prestige must be raised by doing the important things in space—not multiplying the petty and unimportant. To assess what we stand to lose, we must almost rely on the quasi-axiom that no world power can allow a major area of science and technology to pass it by and hope to control even its own internal destiny.

George B. Allen, Director of the U.S. Information Agency, has represented this point of view. He said:

"Probably the most significant result of the Soviet successes is a change in the overall impression of the people of the world about the Soviet Union. In public opinion parlance we speak of this as the revised Soviet image, the change goes beyond the field of space technology. It covers all of Soviet science and technology plus Soviet military power. Before Sputnik I, few people of the world believed the Soviet was currently in a position to challenge America in the broad fields of science, technology, and production. Now the sputniks and luniks are taken as evidence that the Soviet Union is able to challenge America successfully in all these fields including production. It is hardly an overstatement to say that space has become, for many people, the primary symbol of world leadership in all areas of science and technology."

Livingston T. Merchant, Under Secretary of State for Political Affairs said:

"Soviet accomplishments in this field (outer space) are witness to strong scientific technical and industrial capabilities, organizational effectiveness and concentrated effort and they reflect growing military strength. These are sobering facts but the danger to ourselves would come not from the recognition of these facts but from the refusal to recognize them."

Now I recognize that we are doing somewhat better in terms of the number of small satellites we are putting into orbit. We are developing some sophisticated instrumentation. But the Russians are putting up much larger space vehicles, the last of which carried a veritable menagerie of animals, plus television. Only by nuclear power can we surpass the Russians on any long-term basis.

I would add another and perhaps more important consideration for our objectives should be broader than merely the attainment of prestige. To my way of thinking the nuclear space effort should be part of our atoms for peace program and our entire space effort should be dedicated to creating a world climate in which peace can become possible.

From the time of the first atom bomb and Hiroshima, we have all sought some reasonable approach to nuclear weapons disarmament. After World War II the United States went to the United Nations with a plan for control of atomic weapons, but it was blocked by the Soviets. Since then our dilemma has continued behind a facade of slogans. For 15 years we have sought to provide for our defense and yet seek safe ways to disarm.

The late Senator Brien McMahon grappled with this problem and proposed that we create a climate of peace in which responsible disarmament talks could proceed. He suggested that this climate could be created were the United States to demonstrate on a worldwide basis its willingness to use its atomic technology for peaceful purposes. President Eisenhower adopted Senator McMahon's idea and proposed an atoms for peace program.

I will not now dwell on the fate of "atoms for peace" but it is plainly evident that little has been accomplished.

Now we have another opportunity to show our willingness to use the atom peacefully and constructively. We can again pledge our dedication to the peaceful aspects of atomic energy and its use in the exploration of outer space. Perhaps this could be a start toward creating that climate of Senator McMahon's dream. Last year in a Harpers magazine article Dr. Lee Dubridge described the vast scientific, intellectual, and physical value of exploring the universe. We can donate this bounty of knowledge to the world at large and create an atmosphere in which our world problems would seem insignificant.

I have discussed the opportunity. Let's examine the problems of policymaking and administration in this nuclear-space program.

Following executive branch recommendations, the National Aeronautics and Space Administration was established in 1958 for the ostensible purpose of advancing a program of peaceful outer space development. If military space needs evolved, then under the law the Department of Defense could have jurisdiction.

In the case of the nuclear rocket, NASA took over the jurisdiction formerly exercised by the Air Force. Quite properly, and I must say commendably, the Air Force and Navy have continued nuclear rocket studies—paper analyses of possible military missions. In any reference I might make to jurisdictional conflict or duplication, I do not include these very proper Navy or Air Force studies. They should be carried forward and if necessary expanded to make sure the potential of nuclear rockets for defense application is explored.

NASA has jurisdiction over the nuclear vehicle system and under the Atomic Energy Act the Atomic Energy Commission is charged with the development of the integral nuclear reactor propulsion system. Here there is clear delimitation in the outer space and atomic energy laws. Nuclear development is under the jurisdiction of the AEC. Vehicle decisions as well as developing nonnuclear components is NASA's job.

To my way of thinking this duality of agency jurisdiction is not a serious problem. In other years and other atomic energy situations we faced and solved similar problems. In fact, in every AEC developmental effort for the military, from bombs to aircraft or powerplants for Antarctica, very workable management methods have evolved. Appropriate joint offices within the AEC were created or existing joint offices were used.

The function of such a joint office is demonstrated by the case of the nuclear submarine. The development of the submarine was handled by the Navy and the nuclear reactor system by the AEC. To assure unified direction a "two-hat office" was created and Admiral Rickover was put in charge of a naval reactors branch of the AEC. Admiral Rickover represented both the Navy and Atomic Energy Commission and unified the efforts of each.

The same arrangement has not existed in the nuclear-space program. Instead there have been two camps—and sometimes it seems like two armed camps. Early this year, I urged that an integrated office be established in the Atomic Energy Commission. Despite much talk of a proposed move toward the creation of a NASA reactors branch in the Atomic Energy Commission, to assure unified control, months and months passed and nothing happened. In the interim there has been most able direction of the nuclear work under Gen. Irving Branch and Col. Jack Armstrong.

At the Joint Committee's executive session on Monday, we were told officially of the establishment of an integrated office in AEC. But I will be interested to see whether the NASA official who heads up the office in the Atomic Energy Commission can get his orders any faster from NASA now that he is over in AEC.

Although I called attention months ago to the need for an industrial organization to be selected to get into harness with the Los Alamos Laboratory, we were told Monday that it will be many more months before they will select one.

This year the House Committee on Science and Astronautics found NASA had no program for a manned expedition to the moon in this decade. The Associate Administrator of NASA pointed out that a manned lunar expedition just could not be accomplished in this decade but said it could be accomplished in the 1970's using a nuclear rocket, a saturn sized vehicle with refueling in flight, or the so-called Nova engine.

In testimony before the same committee, General Branch said a nuclear propulsion booster could be ready for space flight in the midsixties without any trouble. He told the committee that the state of the art in nuclear propulsion is such that he was confident AEC could provide the necessary power if the vehicle were developed to use the power. General Branch also told the House committee that he was "not completely satisfied" with NASA's request for and uses of of nuclear power. He added, "We can go faster than they want us to go right now."

The agency charged with the job of promoting astronautics seems to have little desire to have powerful boosters developed for lunar exploration. NASA doesn't seem to consider the challenge of the sixties very challenging. Let's pray the Soviets have equally timid souls in their space program.

Only this year, the able chairman of the House Appropriations Committee, CLARENCE CANNON, probed this two-agency situation. He noticed that NASA had requested appropriations for work in nuclear development. In fact, Mr. CANNON found one $10-million

item identified as being for nuclear development. Mr. CANNON also found other areas of potential duplication and reminded everyone the national space laws call for the avoidance of an unnecessary duplication of effort and facilities among Government agencies. He wanted assurance that there would *not* be overlapping nuclear work carried forward by agencies other than AEC.

In response to Mr. CANNON'S questions the Chairman of the Atomic Energy Commission pointed out that he could not review NASA's budgets nor control them. The Chairman said that he was going to look into the matter but added that this was up to the Bureau of the Budget.

As I recall the purpose of the Bureau of the Budget, it is to prevent waste and duplication. But the Bureau seems so busy these days with stopping accomplishment that it can neglect its main mission. Earlier this year the Bureau cut funds for the Rover project by 25 percent. Only after a major effort on the part of the Joint Committee and the Atomic Energy Commission were these funds restored.

Now let's look at the program. NASA has published a 10-year space program but fails to list a nuclear rocket mission. There is no program for nuclear rocket demonstration.

The old NACA was sold to Congress as the proper agency to handle outer space because of alleged "in house" technical competence. But the talent doesn't seem to come into play when policy must be formulated. Perhaps NASA just gets a budget ceiling and no technical decisions can be made which would disturb the cash quota.

In a speech several years ago, I called attention to the original cutbacks of the Rover nuclear rocket project by Secretary of Defense Wilson. It was quite apparent at that time that some of the manufacturers of conventional rocket fuels and equipment were not anxious to have a nuclear competitor.

NASA appears to be following the same questionable tradition. It has taken one step in the direction of making nuclear rocket policy. They have gone outside for help. They are now going to ask the aircraft companies to study the whole thing and tell them what their policy should be for first flight testing a nuclear rocket. NASA representatives have already said the first test should be as an upper stage of a Saturn booster—a booster which won't be ready for some years. Will their contractors see it differently? I suspect not.

The question probably is no longer open and the possibility of ground launching will probably be ignored. One could also worry that some of these aircraft companies have vested interests in the chemical rocket systems—but let's be real—you have to get policy someplace.

This policymaking by contract could also fit the scheme of budgetary life. It takes months to select an aircraft company and more months for them to study. You can't spend developmental funds while you're selecting and studying. Clear-cut decisionmaking is passé.

As I understood the National Aeronautics and Space Act, a council headed by the President was established to set overall space policy. This year the administration proposed the elimination of the Space Council and interestingly enough any participation by the Chairman of the Atomic Energy Commission who sits on the Council. I presume that in anticipation of this legislative proposal being enacted—the Council has quit doing business.

I will not say that the administration is disinterested in policy questions relating to outer space. This year they were quick to come to Congress and for changes in the outer space patent laws and the right to turn over to private industry the patents developed with Government funds. I also suspect that they will quickly resolve the policy question of assigning radio frequencies in outer space to private industry. It seems there is neglect only when questions of major national policy are involved.

Under present programing it will be at least 1964 before a unit such as Snap VIII could be used to generate electric power in outer space. Probably it will be some years later. The fact of the matter is that there is also no policy for utilizing nuclear electric power resources.

Not only is it important to note that there is no specific program but the development of a 30-kilowatt unit is grossly inadequate for the 1960's. As I said earlier nuclear electric power sources in the range of 1 megawatt are needed, that is 1,000 kilowatts as compared to 30. Here the technical experts are also in agreement and I understand that informally the NASA program chiefs say the same thing.

Still, no program is under way to develop a 1 megawatt space atomic-electric power system. The Air Force recognized this void and initiated a study of a 300-kilowatt unit, 10 times bigger than Snap VIII, but short of the 1-megawatt goal, but here the problem of AEC jurisdiction again arises. The Air Force under the Atomic Energy Act should not develop atomic reactors. This is a job for the AEC. Surely the temptation must be great in the Air Force to violate the Atomic Energy Act and do some developmental work instead of just paper studies. Those of us who have been concerned with the preservation of civilian control in atomic energy must oppose this. Instead, the Atomic Energy Commission should be given the green light to initiate work on larger power units.

Since there is no national program for nuclear space applications, and reluctance to initiate one, I propose some national objectives. I propose that Congress, by resolution, call for the acceptance of these objectives if the Executive proves unwilling.

I urge that the following be incorporated into our 10 year outer space program and be considered as part of our atoms-for-peace program.

(1) A test flight of a nuclear rocket prototype, including operation of facilities for the generation of electricity in outer space by nuclear energy should be completed by the end of 1964. In this mission the great payload advantage of nuclear power should be demonstrated.

(2) A manned expedition to the moon utilizing nuclear rockets and nuclear electric power sources should be undertaken as soon as possible before the end of the 1960's.

(3) the maximum development possible in nuclear rockets and nuclear electric power sources (in excess of 1 megawatt) is to be undertaken so that by the end of the 1960's more extensive explorations of our solar system can be programed.

Adopting these proposals into our national program would not cause serious technical disruption. There is adequate scientific manpower and resources. I can assure you of the abundance of nuclear scientists and engineers. Available talent and facilities can be found with ease from our national laboratories and industrial installations.

But decisions are needed. For one thing there will have to be a national decision on the relative priorities of the nuclear rocket and the so-called Nova chemical rocket. One effort tends to duplicate the other and doing both might be wasteful. Here the experts again lend guidance when they say that the era of big chemical rockets will pass when the nuclear systems are developed. In addition, decisions must be made as to timetables and proper funding.

In but a few words I submit a plan. Its accomplishment would be an incomparable scientific achievement. A total nuclear demonstration in outer space surely would enhance our world prestige such as we have been seeking with atoms for peace. The technical byproducts and scientific and military value of our demonstration would be great. Being first in the world to launch unmanned and manned nuclear-space expeditions would have worldwide effects not unlike those Mr. Allen describes. Would not the eyes of the world turn back toward us as the leaders in science and technology?

There are those who leave the impression that it is unpatriotic to call for improvements in our national defense and space effort. They say we are in green pastures of strength and greatness and if we can sit silently, the world will never know the difference. This suggested ban on constructive criticism could start a system not unlike communist democratic centralism under which policy once handed down by the state it is no longer subject to criticism. Surely we can rise above this and permit the freedom to propose greatness for our Nation.

Hanson Baldwin has said that most people in Europe now accept U.S. military inferiority as a fact. Sputnik created this impression, not criticism.

In the case of nuclear space applications I end a silence of some months and plead for greatness. Let's end our melancholy mediocrity in astronautics. Let's get on with the job. Let's be the first to display the nuclear reactor as a valuable tool for the exploration of the solar system. If we try and fail, future generations can commend our pioneering spirit. If we succeed the universe can be theirs.

ACCOMPLISHMENTS OF THE JOINT COMMITTEE ON ATOMIC ENERGY IN THE 86TH CONGRESS

Mr. ANDERSON. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a statement of the accomplishments of the Joint Committee on Atomic Energy in the 86th Congress.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

ACCOMPLISHMENTS OF THE JOINT COMMITTEE ON ATOMIC ENERGY IN THE 86TH CONGRESS

INTRODUCTION

Since its creation by the Atomic Energy Act of 1946, the role of the Joint Committee on Atomic Energy has remained essentially unchanged, but the scope of activities which fall under the aegis of the Joint Committee has greatly increased. The most pronounced area of increased development has been in the field of the peaceful uses of atomic energy. Perhaps it would be worth while at this point to briefly outline the functions of the Joint Committee.

First of all, the Joint Committee on Atomic Energy is the only Joint Committee of the Congress which has legislative powers and responsibilities. All bills dealing with atomic energy, as provided by the Atomic Energy Act of 1954, are referred to the Joint Committee on Atomic Energy.

Secondly, the Joint Committee has a so-called watchdog function in which the Joint Committee reviews the activities and reports of the AEC and other agencies engaged in atomic energy work to see that progress is made and the public interest is served.

A third function is the committee's informational role wherein the committee provides information to the Congress and the public on the unclassified aspects of atomic energy.

And finally, and by no means least significant, is the positive or creative function of the Joint Committee in which it recommends policies and programs and changes in order to keep the atomic energy program moving.

The major accomplishments of the Joint Committee during the 1st session of the 86th Congress may be summarized as follows:

AEC AUTHORIZATION BILL

The Joint Committee, after extensive hearings, reported out an AEC facility authorization bill for fiscal year 1960 (S. 2094 and H.R. 7537) of $179,941,000 to authorize new construction projects for the atomic energy program. The bill also authorized funds for the cooperative power reactor demonstration program and for cooperation with Euratom. It authorized certain important design and engineering studies and extended the compulsory licensing provisions for atomic energy patents for another 5-year period, to end September 1, 1964. The bill passed the Senate and House on June 15, 1959, and was approved by the President on June 23, 1959 as Public Law 86–50.

FEDERAL-STATE COOPERATION

The Joint Committee compiled information relating to cooperation between the Federal Government and the individual States in the atomic energy field prior to public hearings on this subject. Following public hearings and further consideration by the committee, the junior Senator from New Mexico and Congressman DURHAM introduced identical bills (S. 2568 and H.R. 8755) to amend the Atomic Energy Act of 1954, as amended, to clarify the relationship and to delineate the areas of responsibility between the Atomic Energy Commission and individual States. S. 2568 passed the Senate and House on September 11, 1959 and was approved by the President on September 23, 1959 as Public Law 86–373.

The principal provisions of the bill authorized the AEC to withdraw its responsibility for regulation of certain types of materials—principally radioactive isotopes—but not over more hazardous activities such as the licensing and regulation of reactors. The bill requires compatibility of Federal and State radiation standards, and authorizes programs to assist the States to assume independent regulatory jurisdiction.

The bill also established a Federal Radiation Council to advise the President on radiation matters similar to the Council recently established by Executive order. It did not modify the basic functions of the Council but increased its membership from four to five members, plus such other members as the President shall appoint.

OTHER BILLS

The Joint Committee reported out a bill to amend section 251 of the Atomic Energy Act of 1954, as amended, to provide for the submission to Congress by the AEC of an annual rather than a semiannual report. This bill (S. 1197) passed the House on June 2, 1959 and was approved by the President on June 11, 1959 as Public Law 86–43.

The Joint Committee reported to the House a bill (H.R. 5105) to increase the AEC 1959 authorization by $1,300,000 for the Phermex installation at Los Alamos, N. Mex. An identical bill (S. 1228) was passed by the House on June 2, 1959 and was approved by the President on June 11, 1959, as Public Law 86–44.

This additional authorization enabled construction to proceed on the Phermex project as a part of our nuclear weapons program.

The AEC "omnibus bill" (S. 2569–H.R. 8754) passed the Senate on September 9, 1959, and the House on September 11, 1959. It was approved by the President on September 21, 1959, as Public Law 86–300.

The bill amends the Atomic Energy Act to authorize the AEC to enter into agreements for the performance by the Commission of certain services, including the reprocessing of irradiated fuel elements with material licensees (reactor manufacturers and fuel suppliers) as well as with facility licensees (reactor operators and utilities) as previously authorized.

The bill also amends the Atomic Energy Act to provide, in substance, that members of the General Advisory Committee and other AEC advisory committees will not be subject to certain conflict-of-interest statutes solely because of compensation from nonprofit educational institutions.

AGREEMENTS FOR COOPERATION

Peaceful uses

In accordance with Section 123 of the Atomic Energy Act of 1954, as amended, four new agreements for the peaceful uses of atomic energy were submitted to the Joint Committee in 1959. These agreements were with Vietnam, Panama, the International Atomic Energy Agency, and Euratom.

The agreement with the International Atomic Energy Agency provides for the transfer of fissionable material for peaceful uses in accordance with the objectives outlined by the President in his atoms-for-peace speech in 1953.

The Euratom agreements provide for a cooperative effort between our country and the Euratom nations to assist them in achieving their goal of 1 million kilowatts of power from nuclear reactors by 1963–65. Also, an accompanying research and development program jointly undertaken by the United States and the Euratom nations would seek to improve the fuel cycles of these reactors with a view to ultimate achievement of economic nuclear power in that area in the foreseeable future.

In addition, eight amendments to existing agreements were submitted to the Joint Committee. These amendments were for the purpose of reflecting the present AEC policy with respect to the percentage of enriched uranium available for use in reactor experiments, research reactors and material test reactors.

MUTUAL DEFENSE

Six proposed agreements for cooperation for mutual defense purposes and one proposed amendment to an existing agreement for cooperation for mutual defense purposes were submitted to the Congress by the President in accordance with subsection 123(d) of the Atomic Energy Act of 1954, as amended by Public Law 85–479. These agreements were with Great Britain, Canada, France, Netherlands, West Germany, Turkey, and Greece. In accordance with subsection 123(d) it was required that these agreements and the amendment lie before the Congress for a period of 60 days, during which time they could not become effective. Following the prescribed 60-day period if the Congress did not pass a concurrent resolution of disapproval, they would become effective.

During these 60 days the Subcommittee on Agreements for Cooperation of the Joint Committee reviewed the proposed agreements and received testimony in executive session and public hearings from representatives of the Department of Defense, the State Department, and the Atomic Energy Commission, and others desiring to testify. The subcommittee then unanimously concluded and reported to the Joint Committee that the proposed agreements and amendment were in conformance with the letter and the spirit of the Atomic Energy Act of 1954, as amended. The Joint Committee on July 13, 1959, met and adopted the report on the agreements and interposed no objections to the proposed amendment and agreement.

The mutual defense agreements with our NATO allies are intended to strengthen our NATO shield against Communist aggression.

I think it is well to note at this juncture that the Congress, and especially this body, does not normally concern itself with review of this type of executive agreement before it becomes effective. But our distinguished colleague, CARL DURHAM, then chairman of the Joint Committee, who, I regret to say, is retiring this year after 22 years of service to the country, and other members of the committee wanted to provide every assurance of full congressional consideration of matters so important as these. Therefore, in 1958 the Joint Committee amended the Atomic Energy Act to include a provision which would give the Congress an opportunity to review, and, if necessary, by concurrent resolution disapprove each such agreement. I believe that the careful attention and close scrutiny of these agreements, as evidence by the report (H.R. 672), speaks for itself.

HEARINGS

During the first session of the 86th Congress, the Joint Committee on Atomic Energy and its subcommittees held a total of 161 public and executive hearings. Since 25 publications, consisting of reports and hearings, were printed by the Joint Committee during the first session, amounting to over 11,000 pages. (See Joint Committee print, "Membership, Legislation, and Publications Through 86th Congress, 1st session" for a complete list.)

1. Status of the atomic energy industry (section 202):

The Joint Committee held hearings in February 1959 on the development, growth, and state of the atomic energy industry. These hearings are held annually in public session pursuant to section 202 of the Atomic Energy Act of 1954, and this year the major area covered was that of the country's civilian atomic power program.

2. Patents:

The Joint Committee held 3 days of public hearings in March on atomic energy patent policies and procedures. Prior to these hearings the Joint Committee staff prepared two volumes of "Selected Materials on Atomic Energy Patents" to assist individuals in preparing for these hearings. Subsequent to the hearings the Joint Committee placed in the AEC authorization bill (Public Law 86–50) a section which authorized the extension of the compulsory licensing provisions for patents relating to atomic energy for a period of 5 years.

3. Employee radiation hazards and workmen's compensation:

Five days of public hearings were held during March of this year on this important subject. The committee also published a study on the subject of hazards and compensation to employees which included the views of Federal agencies, State governments, organized labor, industry, and other interested groups. This study and the hearings will serve as basic documents for future legislative action.

4. Fallout from nuclear weapons tests:

Extensive public hearings were held on the environmental effect of radioactive fallout from nuclear weapons tests. The twin purpose of this hearing was first to bring up to date information which had been gathered since the first public fallout hearings conducted by the Joint Committee in 1957, and, second, to put before the public the varied opinions of experts in the fallout and related fields and to bring out whatever facts were available relating to this potential hazard. Testimony from scientific experts reflected that there was no danger from past tests, but that if tests are continued over the next two generations or less of the same pattern and intensity as the past 5 years, a hazard to the world's population could result.

5. Effects of a nuclear war:

The Special Subcommittee on Radiation held 5 days of public hearings on the biological and environmental effects of a hypothetical nuclear war. The experts who testified or presented papers believed that the Nation could survive an attack of the magnitude outlined for the purpose of the hearing. A summary-analysis on the testimony

was printed on August 31, 1959. The complete transcript of the hearings was published in September 1959.

The two most interesting results of the hearings were first, they showed that nuclear war of this magnitude, however horrible it is to contemplate, would not result in annihilation of human race from fallout, and secondly, it was indicated that adequate civil defense shelters would have lowered total U.S. fatalities in this hypothetical war from about 25 percent of the population to about 3 percent of the total fatalities estimated on the basis of no shelters.

6. Waste disposal:

The Special Subcommittee on Radiation of the Joint Committee held 5 days of public hearings on industrial radioactive waste disposal in January and February 1959, and also on July 29, 1959. The hearings were held for the purpose of gathering the latest data from scientific experts in the atomic energy and related fields. It was the committee's desire to bring before the Congress and the public, in layman's language, information on the various types of radioactive wastes, their management, and the AEC research and development program.

The special July 29 hearing was scheduled because of the Joint Committee's concern over the National Academy of Sciences' recommendations of possible close-off-shore ocean disposal sites for dumping low-level radioactive waste.

During the January–February hearings testimony was received from 33 scientists, and 50 technical papers on the subject were submitted for the record. Five volumes of testimony on all phases of the waste-disposal problem were printed.

7. ANP program:

The Joint Committee held its first public hearing in the 13-year history of the ANP program, on the progress that our country is making in getting a nuclear aircraft into flight. In the last 11 years of the 13 years the program has been under way, the Joint Committee has held numerous classified hearings during which its members, and particularly our distinguished colleague from the House, MELVIN PRICE, had urged both the Department of Defense and the Atomic Energy Commission to establish a concrete objective for the accomplishment of early nuclear flight.

The public hearing brought out into the open for the first time the divergence of opinion which exists within the executive agencies on the requirements and target dates for early flight. Perhaps most importantly, it brought out the difficulties within the executive agencies involved, in establishlishing clear-cut goals and setting specific dates for the accomplishments of nuclear aircraft flight.

8. Linear electron accelerator:

Public hearings were held jointly by the Subcommittee on Legislation and Research and Development on a proposal originally recommended by the President's Advisory Panel to authorize $105 million to construct a 10,000-foot linear electron accelerator capable of creating energy up to 10 to 15 million electron volts. On June 3, 1959, a bill (H.R. 7544) was introduced and referred to the Joint Committee. The Joint Committee held executive and public hearings on this subject and continued its review of this project during 1960. Congressional action taken is discussed under AEC authorization legislation, fiscal year 1961.

9. Joint Committee hearing aboard the ing aboard the nuclear submarine *Skipjack* below the waves on April 11, 1959, in order to receive a report from Vice Adm. H. G. Rickover, Chief, Naval Reactors Branch, Atomic Energy Commission, and Comdr. W. W. Behrens, commanding officer of the U.S.S. *Skipjack*, on the operation of the *Skipjack*, which had completed its sea trials on March 10, 1959, some 32 days earlier, and also to observe firsthand the operation of this outstanding submarine. It was during this trip that the *Skipjack* achieved new records of depth and speed.

10. Presentation of medal to Admiral Rickover:

One of the most pleasant assignments that the Joint Committee has undertaken this session was the presentation of a congressional medal to Adm. Hyman G. Rickover for his great contributions to our Nation. It was the initiative of the Congress last year in authorizing this medal, which we feel perhaps spurred on the Navy to promote him to vice admiral and thus assure his leadership in nuclear energy for the next few years.

11. Civilian nuclear-power seminar:

The Joint Committee held a 3-day informal seminar in January of 1959 with representatives of industry, public and private utilities, and reactor experts for the purpose of exploring the possibility of how best to achieve economically competitive nuclear power. The information obtained during these valuable talks was used by the Joint Committee in the development of the fiscal year 1960 civilian power provisions in the authorization bill.

As a result of the Joint Committee recommendations over the last several years, the AEC submitted a report of its ad hoc committee in January 1959 which closely paralleled those recommendations made by the Joint Committee on Atomic Energy staff report of August 1958. The Commission also announced it was undertaking to develop a 10-year atomic-power program for consideration in the next session.

We were pleased that the Joint Committee has been able to encourage the Atomic Energy Commission to carry out the congressional mandate of 1958 to begin construction of a gas-cooled reactor prototype. It was also through the urging of the Joint Committee that definite progress was made in 1959 toward the development and construction of the convertible Hanford production reactor which will provide plutonium for weapons and, subject to further authorization, can produce large quantities of electric power.

BASIC RESEARCH FACILITIES

The Joint Committee this first session increased the requested AEC authorization for physical research by some $4 million. This was in line with its action in 1958 in stepping up AEC's physical research program. Also, largely through the efforts of the Joint Committee, funds previously authorized for physical research have been released by the Bureau of the Budget this year.

Last, but certainly not least, the Joint Committee increased the authorization for biology and medicine by $1 million for research in the area of fallout.

CLASSIFIED ACTIVITIES

In addition to the public hearings discussed above, the Joint Committee, of course, held a number of executive hearings and considered classified testimony and reports on the weapons program, test suspension and detection, the naval reactor program, and other important classified activities.

AUTHORIZATION OF APPROPRIATIONS FOR ATOMIC ENERGY COMMISSION FOR FISCAL 1961

Mr. ANDERSON. Mr. President, I ask unanimous consent to have printed at this point in the RECORD, a statement relating to the authorization of appropriations for the Atomic Energy Commission for the fiscal year 1961.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE MAJOR ACCOMPLISHMENTS OF THE JOINT ATOMIC ENERGY COMMITTEE DURING THE 86TH CONGRESS, 2D SESSION

AUTHORIZATION OF APPROPRIATIONS FOR THE AEC FOR FISCAL YEAR 1961

The Joint Committee held extensive hearings and reported out bills (S. 3387, accompanied by Senate Report No. 1277, and H.R. 11713, accompanied by House Report No. 1525) to authorize appropriations for the AEC for the fiscal year 1961 program.

The bill authorized $211,476,000 for new construction projects affecting all aspects of the AEC program, including production of special nuclear materials, manufacture of atomic weapons, reactor development, physical research, and biology and medicine.

The Joint Committee on Atomic Energy recommended the addition of three projects to the bill submitted by the AEC:

1. Project 61–d–10, $13 million, for power reactor project for the Antarctic;

2. Project 61–f–8, Materials Research Laboratory, University of Illinois, $5,600,000; and

3. Project 61–f–9, Radiation Laboratory, Notre Dame University, $2,200,000.

The Joint Committee revised project 61–f–7, linear electron accelerator, to provide $3 million for design and engineering rather than $107,200,000 for construction at this time. As a result, the amount requested by the administration was reduced from $293,876,000 to $211,476,000.

The bill also authorized an additional $40 million for use in the cooperative atomic power program.

The bill was considered on the floor of the House on May 6, 1960, and in the Senate on May 10, 1960, and passed by both Houses in the form recommended by the Joint Committee, and signed by the President as Public Law 86–457.

JOINT COMMITTEE HEARINGS

During the 2d session of the 86th Congress from January to September 1960 the Joint Committee on Atomic Energy and its subcommittees held a total of 83 public and executive hearings. Some 17 publications consisting of reports and hearings were printed by the Joint Committee during this session. (A complete list is attached at the conclusion of this statement.)

FOOD IRRADIATION

Three days of public hearings were held on food irradiation during January and March. The hearings in January were held in order to review the history and background of the program and to discuss current and proposed plans of the Defense Department, including the reasons for the sudden cancellation in October 1959 of the $7.5 million Army Food Irradiation Center. The hearings in March were held to find out what progress had been made in developing specific programs originally discussed at the aforementioned January hearings. As a result of the committee's inquiries and hearings the food irradiation research program has been kept alive.

STATUS OF THE ATOMIC ENERGY INDUSTRY (SEC. 202)

The Joint Committee held hearings in February on the development, growth, and state of the atomic energy industry. These hearings are held annually in public sessions pursuant to section 202 of the Atomic Energy Act of 1954. The major focus of this year's hearings was on the Atomic Energy Commission's 10-year civilian atomic power-program. Some of the other subjects covered in the 7 days of hearings were the military reactor programs, maritime reactor

programs, AEC contract policies and how they affect industry, and industrial development and uses of radioisotopes.

FRONTIERS IN ATOMIC ENERGY RESEARCH

The Subcommittee on Research and Development held hearings in March on Frontiers in atomic energy research. These hearings included one of the first public congressional reviews of the peaceful uses of nuclear explosives (Plowshare). Also featured was a review of controlled thermonuclear reactions (Sherwood), advanced reactor applications, nuclear space propulsion and auxiliary power, and a review of direct energy conversion and solar energy systems. The purpose of the 4 days of hearings was to bring forth new and worthwhile concepts in the nuclear energy field and to bridge the gap between the men with the ideas in our Nation's laboratories and the authorities with the power to give the go-ahead in future development.

A summary analysis of these hearings was prepared in order to bring before the public, in layman's language, a concise version of these hearings.

NUCLEAR TEST DETECTION

The Special Subcommittee on Radiation and the Subcommittee on Research and Development held 4 days of public hearings in April 1960 on the technical aspects of detection and inspection controls of a nuclear weapons test ban. The purpose of these hearings was to bring to the Congress and the public in an understandable manner information on all phases of this problem. Testimony was received from over 20 scientific and technical experts who represented wide cross sections of scientific knowledge on this complex subject and many of the witnesses who testified had been outspoken on both sides of the nuclear test ban controversy. A summary analysis of these hearings was released by the Joint Committee some 2 weeks after the hearing, with the hearings themselves published in July 1960.

INDEMNITY AND LIABILITY

The Subcommittee on Research and Development and Radiation held hearings on April 26 and 27, 1960, to consider atomic energy indemnity and liability problems, and also reactor and radiation safety factors and criteria including site selection and the operations of the Advisory Committee on Reactor Safeguards.

RADIATION STANDARDS

The Special Subcommittee on Radiation held 7 days of public hearings in May and June on radiation protection criteria and standards, their basis and use. The main focus of these hearings was to clarify some of the confusion and misunderstanding by the public and the scientific community concerning the basis and use of radiation standards. In addition it was hoped that these hearings would help achieve a better understanding of how the Federal Government and the State governments are organized to develop radiation protection standards.

Prior to these hearings the staff of the Joint Committee assembled in an advanced committee print selected material on radiation protection criteria and standards. This background material was used in connection with these hearings. The full hearings will be published in September 1960 together with a summary-analysis prepared by the staff.

COMMUNITIES

Open hearings on community problems at Los Alamos were held in Los Alamos on December 7, 1959. Testimony and statements for the record were received from AEC officials and residents of the Los Alamos community with respect to housing problems, use of the airport, AEC policy on commercial leases, a long-range plan for Los Alamos community development, and other matters.

On June 13, 1960, a public hearing was held by the Subcommittee on Communities to receive testimony from representatives of the AEC and the Housing and Home Finance Agency concerning proposed amendments to the Community Act of 1955 and the status of atomic energy communities in Oak Ridge, Tenn., Richland, Wash., Sandia Base, and Los Alamos, N. Mex.

AGREEMENTS FOR COOPERATION

The Subcommittee on Agreements for Cooperation met on June 22, 1960 to receive testimony from AEC and the State Department on proposed amendments to agreements for cooperation with Argentina, Brazil, Canada, China, Greece, Israel, New Zealand, the Philippines, Portugal, Switzerland, and Thailand and on the proposed agreement for cooperation with Indonesia. An additional agreement for cooperation between the United States and Euratom was also proposed.

On both March 30 and June 22, 1960 the Joint Committee received testimony from the AEC and the State Department on proposed agreements with the U.S.S.R. and Yugoslavia in the peaceful uses of atomic energy.

JOINT COMMITTEE HEARING ABOARD THE GEORGE WASHINGTON

The Joint Committee met in executive session aboard the Polaris missile firing nuclear submarine, the SSB(N) 598 *George Washington*, below the waves on April 9, 1960. Rear Adm. W. F. Raborn, Deputy Director, Bureau of Ships, Navy Department, reviewed, to date, the progress development program of the Polaris missile system. Following Admiral Raborn's presentation, Vice Adm. Hyman G. Rickover, Assistant Director for Naval Reactors, AEC, discussed in detail the present status of the nuclear submarine safety program. Due to the timeliness and informative scope of both presentations, it was decided that a public print of the hearings would be issued after removal of the classified information in the transcript. This print will be available in September 1960.

CONFIRMATION OF AEC COMMISSIONERS

The Senate section met in public session on March 15, 1960 to consider the nomination of Mr. Robert E. Wilson for appointment to the Atomic Energy Commission to serve the term of the late Commissioner Harold Vance as well as to receive an appointment to a full 5-year term as Commissioner ending June 30, 1965. Mr. Wilson was confirmed on March 18, 1960.

On May 27, 1960, the Senate section met in public session to consider the nomination of Mr. Loren K. Olson for appointment to the Atomic Energy Commission to serve the remainder of the term expiring June 30, 1962 of Mr. John F. Floberg, retired. Mr. Olson was confirmed as a Commissioner by the Senate on June 2, 1960.

REVIEW OF INTERNATIONAL ATOMIC POLICIES AND PROGRAMS (M'KINNEY REPORT)

The Joint Committee requested Mr. Robert McKinney, a former U.S. representative to the IAEA, to make a study of the U.S. international atomic energy programs and policies. Mr. McKinney reported to the Joint Committee on June 30, 1960, on his findings. On August 24, 1960 the Joint Committee met to review the McKinney report. The Committee then agreed, by vote of 10 to 7, to publish the report subject to two conditions normally applicable to reports by consultants:

1. The document is a study prepared for the Joint Committee on Atomic Energy and is not a committee report; and

2. Such corrections and additions to the text as the author of the report may desire may be made prior to publication.

The report is in 5 volumes containing approximately 1,500 pages. It is expected to be published in September 1960.

REVIEW OF REPORTS ON TECHNICAL AND ECONOMIC FEASIBILITY OF ADDING ELECTRIC GENERATING FACILITIES TO NEW PRODUCTION REACTOR AT HANFORD, WASH.

A study by R. W. Beck & Associates was prepared at the request of the Joint Committee to review reports by the Federal Power Commission, Stone & Webster Engineering Co., and others, on the technical and economic basis for installing electrical generating facilities for the new production reactor at Hanford, Wash.

ROLE OF THE NATIONAL LABORATORIES

The Joint Committee is publishing as a committee print a report it requested from AEC on the future role of the AEC laboratories. Comments on the report were requested from industry, educational institutions, national laboratories, special interest groups, and Federal and State agencies and will be published with the report.

NUCLEAR ROCKET PROGRAM

On July 8, 1960, members of the Joint Committee visited the Nevada test site to witness the performance of a nuclear rocket power experiment. This was the second in a series of experiments aimed at developing a nuclear rocket engine for space travel.

CLASSIFIED ACTIVITIES

In addition to the public hearings mentioned above the Joint Committee held a number of executive hearings and considered classified testimony on weapons development and weapons custody. Also, testimony was received on the aircraft nuclear propulsion. Projects Rover and Pluto, the naval reactor program, test suspension, and detection activities, and the semiannual briefings from the Central Intelligence Agency.

ROVER NUCLEAR ROCKET PROJECT

Mr. ANDERSON. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a notice and statement relating to a hearing which was held on the Rover nuclear rocket project on February 15, 1960.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

HEARING ON ROVER NUCLEAR ROCKET PROJECT SCHEDULED FOR FEBRUARY 15, 1960

A hearing on the status and prospects of the Nation's nuclear rocket project, called Project Rover, has been scheduled for Monday, February 15, 1960, it was announced today by Senator CLINTON P. ANDERSON, chairman of the Joint Committee on Atomic Energy.

The hearing will be held in executive session since a number of aspects of the project are presently classified by the executive department.

Senator ANDERSON indicated that he was concerned over heavy cuts made in AEC budget requests for the Rover project for fiscal year 1961, and the lack of clear-cut objectives for the project. In this connection, Senator ANDERSON stated:

"I am very concerned over the cuts made in the AEC construction and operating requests for the Rover project, which are being made at a time when we should consider accelerating rather than decelerating the program. Nuclear rocket propulsion, according to our best scientific calculations, is the most promising space propulsion system capable of propelling large payloads to the planets and back to the earth. As a result

of the highly successful Kiwi-A ground test experiment of last summer, I had expected that the program would be stepped up. But instead we seem to be moving into a period of stretchout, indecision, and drift comparable to the aircraft nuclear propulsion (ANP) project."

Senator ANDERSON stated that top AEC and NASA officials had been requested to testify, as well as the officials of the AEC Los Alamos Laboratory who actually carry on the research and development program. Questions which will be considered include the following:

1. The effect of cuts in budget requests for 1961 and thereafter, particularly in relation to facilities, and advanced projects beyond the Kiwi-type ground test reactor experiments;

2. The need for establishing objectives and target dates for the program, particularly as to a target for testing a flight prototype soon instead of in 1970;

3. The facilities and manpower required for an expanded and accelerated program necessary to meet urgent objectives established under No. 2;

4. The effects and necessity of security classification on the Rover program.

In a concluding statement, Senator ANDERSON stated:

"I have difficulty seeing how this project can be classified when the military have set no requirement for it, and NASA does not even mention it in its 10-year program. These agencies are so busy with projects using conventional fuels that we should consider giving AEC full responsibility for the nuclear Rover project up through the prototype testing stage."

STATEMENT BY SENATOR CLINTON P. ANDERSON, CHAIRMAN OF THE JOINT COMMITTEE ON ATOMIC ENERGY, FOLLOWING CLOSED HEARING BY THE JOINT COMMITTEE ON ROVER NUCLEAR ROCKET PROJECT, MONDAY, FEBRUARY 15, 1960

The Joint Committee on Atomic Energy held a hearing today on the status and prospects of the Nation's nuclear rocket project, called Project Rover, to cover the topics announced in the JCAE statement last Tuesday, February 9.

This hearing was called because of concern about the reported cutbacks in AEC requests for construction and operating funds for the Rover program and to inquire about whether, as a result of the successful ground test experiment by the Los Alamos Laboratory at the Nevada test site in July 1959, the program should not be accelerated rather than decelerated.

In order to discuss more concretely means of arriving at some definite program objectives, target dates, and organizational arrangements, which would expedite the program, our staff director wrote to the Commission and NASA, outlining our views on these matters.

In the hearing I was happy to find that John McCone, AEC Chairman, had appealed to the Bureau of the Budget last week to restore the funds for the Rover project. As I understood it, he was able to persuade them to request the full authorization of $20 million for facilities for the project but was unable to obtain any relief on actual construction funds for fiscal year 1961 or for operating funds, except by reprograming. Nonetheless, his strong support of the program is encouraging.

It was further brought out that the results of these budget cuts could stretch out the target date for feasibility ground tests of the nuclear rocket engine by at least a year. No firm objectives for flight testing of a nuclear rocket have been established, according to the testimony today but it was indicated that the general flight test dates have been moved back 2 years.

The AEC has now declassified the funding arrangements and some of the target dates for the Rover project. These may be summarized as follows:

	Original date	Wilson stretchout (1957)	Current proposed stretchout
1. Target dates for ground test feasibility of rocket engine	*Target* 1960	*Target* 1963	*Target* 1964
2. Target for flight test of nuclear rocket	1965	1968	1967–69

	Original AEC request to BOB	BOB request to Congress	Remarks
Construction funds:			
Authorization	$20,000,000	$13,000,000	Revised by BOB to $20,000,000.
Funding for fiscal year 1961	13,000,000	5,000,000	$5,000,000.
Funding for fiscal year 1962	7,000,000	8,000,000	Unknown.
Operating funds: Funding for fiscal year 1961	22,800,000	18,000,000	No change after AEC appeal.

This stretchout of the project and the lack of firm objectives and target dates should be a matter of great concern to the Congress and the Nation. As I pointed out in my opening statement at the hearings today (a copy of which is attached), the Director of our U.S. Information Service has indicated that our outer space propulsion program is of the greatest importance to the U.S. prestige in the world today.

Therefore, it would seem to be the part of wisdom to engage in a separate accelerated nuclear rocket program, a field in which we stand a chance to surpass the Russians in the next 10 years. Nothing in the testimony in our closed hearing indicated that the United States could not engage in a successful accelerated nuclear rocket program if the appropriations asked by AEC are supplemented somewhat and if a real impetus were given to the program at the highest governmental levels.

The Joint Committee and its staff intend to investigate this problem further. We intend to hold further hearings on this subject at appropriate times to see what progress can be made.

OPENING STATEMENT BY SENATOR CLINTON P. ANDERSON, CHAIRMAN OF THE JOINT COMMITTEE ON ATOMIC ENERGY, AT HEARING ON THE ROVER NUCLEAR ROCKET PROJECT, FEBRUARY 15, 1960

I have called this hearing to look into the programs and plans for the Rover nuclear rocket project.

As you know the Joint Committee on Atomic Energy has for a number of years concerned itself with the Rover nuclear rocket program. The interest of some of us goes back to early in 1955 when the nuclear rocket program was set up as a formal project at Los Alamos and Livermore.

Developments since then have confirmed our beliefs in the potential of nuclear rocket engines. The far greater prospect of growth of the nuclear system compared to advanced future chemical systems is one of the primary reasons for our interest in the Rover project. As was brought out in our public hearings in February 1958, the nuclear rocket has a specific impulse two and one half times that of conventional chemically fueled rockets.

The importance of our space program was pointed out very succinctly by George V. Allen, Director of the U.S. Information Agency in his testimony before the House Committee on Science and Astronautics on January 22, 1960, which he said:

"Our space program has an importance far beyond the field of the activity itself. It bears on almost every aspect of our relations with people of other countries and on their view of us as compared with the U.S.S.R. Our space program may be considered as a measure of our vitality and our ability to compete with a formidable rival, and as a criterion of our ability to maintain technological eminence worthy of emulation by other peoples."

The importance of looking ahead more to systems of space propulsion with a real potential beyond the chemical system now receiving the most attention in the United States is brought out in Werner von Braun's testimony before the same committee on February 2, 1960. Von Braun, during testimony concerning estimates of where the Russians would be when we finally developed the chemical Saturn system, said he thought we would have to keep running and that he thought that it was quite likely and logical that the Russians have much larger rockets under development.

Therefore, considering the importance of attaining leadership in the field of space propulsion technology and the great potential of nuclear propulsion compared to chemical rockets, we want to be assured that looking to the future, the Rover program is receiving the proper emphasis.

The recent cuts in Rover budget requests seem incongruous with the above situation. This apparent decrease in interest in the Rover program is particularly puzzling in the light of the successful nuclear rocket experiment conducted last July in Nevada.

That is why I have asked the Atomic Energy Commission, National Aeronautics Space Administration, and Los Alamos Scientific Laboratory representatives to appear here today. We want to know what the status of the program is and what the objectives are.

We have sent letters to the AEC and NASA outlining the specific items we would like to go over today. These items are as follows:

1. Present status and plans for the Rover program;

2. The effect of cuts in budget requests for 1961 and thereafter, particularly in relation to facilities and advanced projects beyond the Kiwi-type ground test reactor experiments;

3. The need for establishing objectives and target dates for the program, particularly as to a target for testing a flight prototype soon.

4. The facilities and manpower required for an expanded and accelerated program necessary to meet urgent objectives established under No. 3.

5. The effects and necessity of security classification on the Rover program.

I would like to place these letters in the record. We also sent an outline of suggested Rover program objectives, target dates, and organization to the AEC and NASA on which we would like to receive your comments today. I would like to place this suggested outline in the record also.

Now I understand that Mr. McCone is going to lead off the testimony today.

CONGRESS OF THE UNITED STATES,
JOINT COMMITTEE ON ATOMIC ENERGY,
February 11, 1960.

Dr. T. KEITH GLENNAN,
Administrator, National Aeronautics and Space Administration, Washington, D.C.
Gen. A. R. LUEDECKE,
General Manager, U.S. Atomic Energy Commission, Washington, D.C.:

As you know the Joint Committee is very interested in the early development of the nuclear rocket propulsion system under the Rover program. We are hopeful that something constructive will come from discussions at our hearing on this subject scheduled for Monday, February 15, 1960.

In order to facilitate discussions during the hearing Senator ANDERSON asked me to supplement my letter of February 8, 1960, to outline some objectives, target dates, and organizational proposals for your consideration. We would appreciate your review and comments on these points during the hearing.

The suggested outline we have developed is aimed at first establishing firm operational objectives tied to a functional flight test schedule and with clear-cut organizational responsibilities for the program.

1. Basic performance specifications for the rocket engine for flight-test should be established immediately. These performance specifications could be based on upper stage requirements for Saturn with a target date for launching from upper stage by 1966 or 1967. However, it appears more desirable to set performance requirements independent of the Saturn research and development program to eliminate dependence on the results of another research and development effort.

2. A schedule for research and development work to meet the requirements for the commencement of ground-launched prototype tests in 1964 should be established. If the 1964 date cannot now be met, what would be the earliest date for such tests and the required schedule for research and development?

3. Responsibility for the development of the nuclear rocket through the flight test phase of an integrated prototype propulsion system should be assigned to the Atomic Energy Commission, with the understanding that the National Aeronautics and Space Administration will provide the Commission with consultation and assistance.

Sincerely yours,

JAMES T. RAMEY,
Executive Director.

NUCLEAR ROCKETRY

Mr. ANDERSON. Mr. President, I ask unanimous consent to have printed at this point in the RECORD an article entitled "Nuclear Rocketry: How Are We Doing?" written by Jay Holmes and published in the magazine Missiles and Rockets for March 21, 1960.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NUCLEAR ROCKETRY: HOW ARE WE DOING?—UPCOMING CONGRESSIONAL HEARING MAY RESULT IN CALLING IN INDUSTRY TO SPEED DEVELOPMENT

(By Jay Holmes)

Controversy over the timetable and the means of developing America's first nuclear rocket—muffled until now by security classification of the pertinent facts—should break fully into the open this week. Further, there's the possibility that an industry contractor will be brought in to speed development.

At stake in a hearing before the Joint Congressional Atomic Energy Committee March 24, is a propulsion system capable of carrying a crew of explorers to the Moon—and perhaps later to Mars and Venus. The specialists agree that nuclear propulsion systems will be lighter and less expensive than chemicals for carrying heavy payloads for traveling long distances or both.

As the struggle behind closed Government doors gradually emerged into public sight last week, three viewpoints became apparent. Those choosing sides in the debate are lining up behind:

A high-gear program to fly a nuclear rocket as soon as technology will allow—backed by many Atomic Energy Commission officials and Senator CLINTON P. ANDERSON, Democrat, of New Mexico, chairman of the Atomic Energy Committee. ANDERSON has proposed bringing in an industrial contractor soon.

A program calling for full-speed ground testing but a more cautious approach to flight testing—favored by some officials of the National Aeronautics and Space Administration.

A slowdown—proposed by the Bureau of the Budget.

Two high AEC officials close to the nuclear rocket program—Brig. Gen. Irving L. Branch and Col. Jack L. Armstrong—have said the AEC could develop nuclear propulsion for a manned moon expedition in less than 10 years if such a requirement were given them. Armstrong said he spoke in terms of a 20,000-pound payload.

Two NASA officials—Deputy Administrator Hugh L. Dryden and Harold E. Finger, chief of nuclear engines, have reported their agency wrote to the Budget Bureau urging that AEC be permitted to conduct ground testing as fast as technology allows. However, Dryden said a manned moon expedition would be impossible in this decade regardless of progress in propulsion. Solving the problems of reentry from a lunar distance will take longer than 10 years, Dryden predicted.

Budget Bureau officials maintained their customary silence. However, word got out that the Bureau softened its slowdown stand following an appeal by AEC Chairman John A. McCone.

The controversy over the nuclear rocket—Project Rover—was brought into the open by Senator ANDERSON a week before his committee held a closed hearing February 15. He issued a statement after the first hearing and more facts came to light when the House Committee on Science and Astronautics took open testimony February 26. Still more are expected when the atomic energy group holds its open hearing on Rover, Thursday, as part of a 4-day series. "Frontiers of Atomic Energy Research."

Senator ANDERSON has proposed that, to speed the Rover development, complete responsibility be assigned to the AEC through the flight test phase, an industrial contractor be brought in soon to work with the AEC's Los Alamos Scientific Laboratory and the first flight test be scheduled for 1964 or as soon as possible thereafter.

TECHNICAL CONTROVERSY

In addition to the political dispute over funding and schedule, a second argument—largely technical—has nuclear propulsion experts divided. This latter dispute concerns the nature of the first flight test—likely to be conducted in the mid-1960's. One group favors a direct launching from the ground. Another group prefers that the first test be from orbit.

In general, AEC officials prefer ground launching while NASA's tend to favor orbital start. However, neither agency is unanimous.

Although discussions center on technical points, the argument is by no means purely technical. The AEC's Armstrong maintains stoutly that ground launching is the surest way to the first accomplishment of a feat that he says will command tremendous international prestige—the first nuclear-propelled flight in space. "I'd like to see the Stars and Stripes on this one," Armstrong told the Science and Astronautics Committee.

NASA's Finger contends that in the long run more prestige will come to the nation that accomplishes experiments more nearly related to the eventual scientific use of a nuclear rocket. "I think the first practical use of a nuclear rocket will be as an upper stage of the Nova vehicle," Finger said.

Armstrong, deputy chief of the AEC's Aircraft Nuclear Propulsion Office, has proposed the construction of the first flyable Rover by the mid-1960's. AEC calculations call for a bird weighing 40,000 pounds, with a rocket generating 52,000 pounds thrust at liftoff and continuing for more than 5 minutes. The device would carry a 1,000-pound scientific payload to an altitude of about 1,000 miles. Unprotected by a nose cone, the vehicle would be destroyed upon reentry into the atmosphere.

Finger said he believes the first nuclear rocket can be flown just as quickly if it is started from orbit. But even if the orbital flight plan should cause a delay of as much as a year, the NASA official said, he still would prefer it.

PROJECT REVIEW

Senator ANDERSON reviewed the history of Project Rover in a statement he issued at the close of the February 15 hearing. He reported that:

The project began in 1955 as an AEC-Air Force program, with a 1960 target date set for completion of the engine's feasibility ground tests. In 1957, Secretary of Defense Charles E. Wilson downgraded Rover's priority, reduced its projected funding level and stretched out the time schedule. The feasibility ground tests were rescheduled for 1963.

The AEC successfully conducted its first test of a reactor device for Rover last summer.

This winter, the program was stretched out again. At the instance of the Bureau of the Budget, President Eisenhower moved the feasibility test back to 1964. Funds requested by the AEC for the 1961 fiscal year were reduced by $12.8 million—about 31 percent. Mr. Eisenhower's 1961 budget called for $28.5 million for nuclear rocket propulsion—$23 million for the AEC and $5.5 million for NASA—which had taken over the original Air Force role of responsibility for developing nonnuclear components of the vehicle.

NASA announced at about the same time the broad outlines of a 10-year program of expected progress in rocketry. The program included no mention of a nuclear rocket. NASA spokesmen said it was not included because they did not feel sure an operational nuclear rocket could be developed within a decade. The first launching of the Nova booster—with its 6 to 9 million pounds of chemical thrust—was set for fiscal 1968 with two more the following year.

ANDERSON said before the hearing that he had believed Rover would be speeded as a result of last year's successful experiment. "But instead," he said, "we seem to be moving into a period of stretchout, indecision, and drift comparable to the aircraft nuclear propulsion project."

The Senator said the committee's examination would include the effect of security classifications.

"I have difficulty seeing how this project can be classified when the military have set no requirement for it and NASA does not even mention it in its 10-year program," he said.

Following the first hearing, committee sources said AEC officials defended the security classification on the ground that America still seems to be ahead of the Soviet Union in nuclear technology.

However, the Rover development schedule was declassified in part. ANDERSON reported that the Budget Bureau had increased its spending authorization for Rover in fiscal years 1961 and 1962 after an appeal by AEC Chairman McCone. However, no more money was allowed. The AEC had requested $20 million for construction in the 1961–62 fiscal years. The Budget Bureau cut this to $13 million. After the protest, the AEC was told that the other $7 million might be shifted to Rover by reprograming.

On March 8, ANDERSON made public a letter from John F. Floberg, acting AEC Chairman, disclosing that the Commission had reprogramed to add $8 million in construction funds and $3 million in operating money to Rover for fiscal 1961.

For the construction funds, $4.4 million was taken from Eniwetok Proving Ground construction, $1.9 million from the Tonopah Test Range in Nevada, and $1.7 million from additions to the electrical power system at the National Reactor Testing Station, Arco, Idaho. The operating funds were taken from the Euratom program.

At the Science and Astronautics Committee hearing February 26, NASA's Dryden and Finger testified they had supported the AEC's proposed schedule in a letter to the Budget Bureau. Afterward, Missiles and Rockets asked Finger whether NASA had supported AEC's request for the funds necessary to carry out the schedule.

"No," he replied. "We did not feel it was up to our agency to say whether the AEC budget should be $2.6 billion or $2.61 billion.

TRANSFER CONSIDERED

Senator ANDERSON has said the Joint Committee on Atomic Energy will consider whether Rover should be transferred entirely to the AEC.

"I frankly doubt that very effective administration of a project of this nature can be achieved through policy direction provided by an interagency coordinating committee," ANDERSON said in letters to McCone and NASA Administrator T. Keith Glennan. "I believe that one man and one staff should provide the overall project direction as has been done with the case of the nuclear submarine under Vice Adm. (Hyman G.) Rickover. * * *

"But the most important thing to get this project off the ground is that there must be a genuine sense of enthusiasm and urgency at the highest levels to give impetus to the project."

ANDERSON said he was heartened by the AEC's support of the project, "I only wish," he added, "that the rest of the executive branch, and particularly NASA and the Bureau of the Budget, would show a greater interest."

What is the mission of a nuclear rocket? The first point that must be made clear is that nuclear propulsion is justified primarily by its potential capability of delivering large payloads, of traveling long distances, or both.

Industry points out that if you think big in space travel, you must think in terms of nuclear propulsion. A nuclear reactor and its shielding make up a very large item, both of weight and cost. But as space vehicles grow larger, the time must come when the savings in propellant consumed will more than make up for the cost of the reactor system.

A nuclear reaction releases a tremendous amount of energy—millions of times as much as in the most furious chemical reaction. If we could convert all or even a large part of this energy to useful thrust, the nuclear rocket would provide specific impulses hundreds of thousands of times as great as for chemical systems.

One program in progress shows good promise of converting nuclear energy into useful thrust. Project Orion, conducted for the Advanced Research Projects Agency of the Defense Department by General Dynamics Corp., envisages a vehicle propelled by a series of low-yield nuclear explosions.

However, project Orion is in a very early study stage. No one has yet developed a plan for early construction of such a vehicle. Also, testing might run afoul of an international ban on nuclear bomb testing.

Project Rover, however, takes a more conventional approach. The rocket will carry a large tank of liquid hydrogen, which will be boiled to a gas, heated by passage through the bowels of a nuclear reactor and expanded through a nozzle. The nozzle will be regeneratively cooled by the liquid hydrogen.

The AEC calculations of the Rover nuclear rocket's specific impulse are classified. However, nuclear scientists have published assumptions in the 700–800 second range—compared with 300 seconds for the lox-kerosene combination in the Saturn and F–1 chemical rockets.

At a specific impulse 2½ times as great, it is obvious that much less propellant will be required for a specific mission with a nuclear rocket than with a chemical rocket. On the other hand, the nuclear reactor and its shielding will weigh more than the auxiliary hardware required by the chemical rocket.

Thus, for smaller tasks, the chemical rocket is more practical. But as we increase the size of the desired payload, the size of the fuel tanks, pumps, and other equipment increases in steady proportion. A three-stage vehicle based on the 6-million-pound thrust Nova cluster would stand as tall as a 24-story building. For fuel alone, the cost of launching 50 tons might run into the millions of dollars. For the many tests required to develop reliability in the vehicle, the cost is fantastic.

In the case of the nuclear rocket, however, the weight and cost of auxiliary equipment do not increase so rapidly. A reactor should not double in weight each time we double its output. As a matter of fact, if better materials can be developed, it may be possible to increase the output of a reactor with little or no increase in weight.

As we increase the total impulse of a nuclear rocket, we must increase the propellant supply. But since the specific impulse of a nuclear rocket is greater, the amount of propellant required rises more slowly than in a chemical rocket. Since the reactor weight remains relatively stable, the payload fraction of the nuclear rocket steadily increases as its size increases, while that of the chemical rocket remains stable.

TEN YEARS FOR CROSSOVER?

The specialists are far from agreement on when the crossover in favor of nuclear propulsion is likely to take place. It is certainly a decade away. And it depends on such imponderables as how fast the overall space program will actually progress in the 1960's.

The first truly economic nuclear-propelled vessel might be a spaceship to carry a fairly sizable crew of explorers to the Moon. Or a smaller group to Mars or Venus.

Meanwhile, however, smaller vehicles must be built to test the concept in operation. The first will obviously be based on Kiwi-A, the nonflying prototype engine tested successfully last July 1.

This is the nub of the flight-test dispute: A series of ground tests, including the second scheduled for next summer, is to be completed by 1963.

Next comes the construction of a flyable rocket in a time not specified but apparently about 2 years. Armstrong would launch from Eniwetok, a Pacific island where the AEC has extensive facilities for nuclear bomb testing.

Finger notes that the projected development timetable for Project Saturn, the space vehicle based on the eight-engine cluster with 1½ million pounds of thrust now under development at the new NASA facility at Redstone Arsenal, Ala.

By 1965, Finger points out, the booster should have developed a high degree of reliability and the powerful liquid hydrogen-burning upper stages should be available to propel the heavy nuclear rocket into orbit.

The NASA official feels the rocket should be started in space, after its orbit has been stabilized. The primary reason, Finger said, is that such a test is closest to the actual early mission of a nuclear rocket.

SAFETY

A second reason is the question of safety. "We take a cold reactor in orbit," the NASA official declared. "If it fires, it goes farther out. If it doesn't, it is still cold and relatively harmless."

Finger said the hazard of possible atmospheric contamination is a factor weighing against a ground launching, although not a primary one.

All the specialists agreed that the amount of atmospheric contamination caused by a Rover launching would be a tiny fraction of the contamination caused by a small nuclear bomb.

The primary question, Finger declared, is to design an experiment that will provide a maximum amount of information, and speed development to the maximum. "Let's try to design a program so that we can do a useful mission with it the first time," he said.

Armstrong maintained that a start from orbit is the most difficult way he knows to test a reactor device. It must be operated completely by remote control. Furthermore, the low level of knowledge about conditions in space makes it impossible to anticipate all the conditions that exist in orbit.

Nevertheless, Armstrong said, there are some reactors that should only be started from orbit—for instance, a SNAP II reactor, designed to provide auxiliary power in a space vehicle. "To all intents and purposes, this is an inanimate object at launching," he remarked. "We want to have the orbit stabilized and determined to be correct before we start the reactor."

Armstrong argued that the major consideration is the prestige value of sending the first nuclear-propelled vehicle into space. It isn't just a stunt, he said, because the first flight would be a small model of the ultimate primary mission of nuclear propulsion. It will have all the major components of a space ship—reactor, shielding, hydrogen tank and payload—and will lift from the ground in the same way.

SHIELDING

Since shielding on the first flight must be kept to a minimum, he said, equipment in the scientific payload would have to use tubes instead of transistors. Also on the subject of shielding, he noted that some would be necessary in any case to protect against Van Allen radiation. Not much more is needed to shield against the reactor, he added.

To help settle the issue, NASA plans to have a study of all aspects of the problem made by an industrial contractor. Finger said he hopes to circulate bids on the study within a month or two. The contract would be awarded about a month afterward, and the study would take from 6 to 9 months.

The contractor will seek to learn what type of test program will provide the most meaningful results in terms of development of the rocket. "The study may not provide us with the answers," Finger said, "but it

will give technical information on which it will be possible to base judgments."

He said the cost of the study would be paid with fiscal year 1960 funds. He declined to estimate how much would be involved.

Shielding is of course but one of a host of technical problems that must be solved in designing a nuclear-propelled vehicle. Actually, it may be one of the easiest. Everyone's design of a nuclear-propelled vehicle calls for reactor and rocket in the rear, a large liquid hydrogen tank in the middle and payload in the nose.

Since the vehicle is long and narrow, the distance between reactor and payload tends to reduce the intensity of the radiation. In addition, the hydrogen tank and its contents act as a very effective shadow shield.

In the reactor itself, the problems are not so easily solved. First and foremost is a need to develop a reactor that operates at a much higher temperature than usual. The temperature of a reactor varies according to its application and its specific design characteristics. A typical temperature for a power reactor on the ground might be in the neighborhood of 1200° F. To develop specific impulses in the range of 700–800 seconds, using hydrogen as the propellant, the temperature must be brought up to the range of 2700°–4500° F.

However, even if the temperature cannot be brought quite that high, there is still a performance gain over chemical systems. Dr. Raemer E. Schreiber, who heads the scientific group working on Rover at the AEC's Los Alamos Scientific Laboratory, has calculated that hydrogen propellant has a specific impulse of 400 seconds—the top figure for a chemical reaction—with a nuclear reactor operating at only 660° F.

Specific impulse increases with the square root of the absolute temperature of the exit gas. Thus the performance increases with temperature. Specific impulse also increases in inverse proportion to the average molecular weight of the exit gas. This is why hydrogen, the lightest element, must be chosen as the propellant.

At a specific impulse of 800 seconds, Schreiber said in an article in the fall-winter edition of the Air University Quarterly Review, about 20 kilowatts are required to produce a pound of thrust. Thus, he said, a 50,000-pound thrust engine requires about 1,000 megawatts of power. In his testimony before the House committee, Armstrong said the latest AEC calculations called for an engine with 52,000 pounds thrust for the first test.

The biggest reactors in existence on the ground put out less than 1,000 megawatts. The largest in this country, the Dresden Nuclear Power Station, started up at Morris, Ill., last year by Commonwealth Edison Co., will have a maximum output of 626 thermal megawatts. The reactor for the nuclear ship *Savannah*, to be started this year, will put out 69 thermal kilowatts. Nuclear submarine reactors have about the same capacity.

A nuclear rocket big enough to lift a 750-ton spaceship must develop upward of 2 million pounds of thrust. Hence, it requires a reactor that generates about 40,000 megawatts, more than 40 times as much as the most powerful reactor in existence today. This gives an idea of the advances in technology necessary before the nuclear spaceship can be flown. It makes clear why the most optimistic estimates of the timetable are in excess of 10 years.

THIRD POSSIBILITY

In addition to ground-launch and orbital stage, there is a third possible method of testing a nuclear rocket: as an upper stage, started on the ground but not put in operation until the chemical stage burns out.

Finger says there is no consideration of a test of this sort at first because the first nuclear rocket developed would not be of a size that would be easy to mate with an existing chemical booster.

However, some in industry have been suggesting combinations. There is some talk, for instance, about the possibility of using a Titan first stage to lift the nuclear stage above the atmosphere.

In flight-testing such a device, a trajectory would be chosen such that, if the nuclear rocket failed, it would just fall into the ocean. This would be a relatively harmless inventory of U^{235} in a noncritical configuration.

If it should fail on leaving the atmosphere, it would probably burn up on reentry. Thus the absence of a suitable nose cone is protection for those below.

As for the inbetween case, where the reactor starts too slowly and stops within the atmosphere, the amount of fission produced would be small. This is because the amount of fission products varies with the power level and time at which the reactor operates.

HYBRID NUCLEAR

Krafft A. Ehricke, of General Dynamics' Convair Division, has been pluming for an interesting hybrid nuclear-chemical engine that may combine the advantages of the nuclear booster and the nuclear upper stage lifted by a chemical booster.

Ehricke's design calls for two liquid hydrogen-lox booster engines that would give the overall system initial velocity, fed by a relatively small ringshaped lox tank. When the lox runs out, at an altitude of 120,000 to 140,000 feet, the booster would fall off, just as the Atlas booster engines. Then the hydrogen flow would be directed through the reactor for the remainder of the mission.

At last month's National Missile/Space Conference in Washington, Ehricke declared that a choice must be made soon between chemical and nuclear propulsion for the generation of booster rockets after Saturn.

Ehricke said a decision should be made this year on whether to push Project Rover or Rocketdyne's 1½-megapound F–1, which is designed to be clustered into a booster generating between 6 and 9 megapounds thrust. The development schedules for the F–1 and Rover make them closely competitive. However, the F–1 is funded for $41 million in President Eisenhower's 1961 budget, almost double the $23 million in the AEC budget for Rover.

The overall total for chemical rocket development by NASA alone is $390 million, more than 13 times as much as the AEC–NASA total for nuclear rocket propulsion.

ROVER SCHEDULE

What is the Rover test schedule? "This is not a crash program," says Armstrong. "It is moderately paced by the degree of success. Between experiments, there is construction to do."

Armstrong says the first experiment last summer, which was designated "Kiwi-A," "proved to us we were on the right track."

Another test is scheduled for the coming summer. It will be designated "Kiwi-A Prime." "We shall probably ask many of the same questions," Finger said. "Many more reactor tests will be required, to supply much necessary data," the NASA official declared. "We are hoping to move rapidly. We need money, but that is not all."

If the program were to be speeded, Finger said, there would be the problem of running several test reactors concurrently. Also, since a test releases some long-lived fission products, it is necessary to wait until the site cools before approaching it.

MATERIALS PROBLEM

Developing a high-temperature reactor, Finger declared, is largely a materials problem. "We are looking at the whole range of high-temperature materials, asking such questions as whether they are compatible with uranium compounds; will they corrode more readily under intense radiation; do they react with hydrogen at high temperature; and what are their structural and other physical properties, such as neutron cross section, when combined with uranium?"

Another major materials problem, he said, is the effect of radiation on the properties of materials at cryogenic temperatures. Liquid hydrogen, the only propellant under consideration, boils at −423° F. NASA has contracted with the Georgia Division of Lockheed Aircraft Corp. for a major research project.

"It may be possible to protect materials, such as with shielding," Finger remarked. "However, if these material tests prove negative, we may conclude that the Rover rocket is simply not feasible."

AEC's Armstrong has this view of feasibility:

"To establish the feasibility of a nuclear rocket reactor, one must in effect build a prototype. All experiments prior to that are useful and necessary tools.

"Theoretically, you could prove the feasibility of any nuclear device without regard to the end requirements as it pertains to the engineering requirements such as light weight, compactness, etc. However, you might end up with something that couldn't be built. Naturally, we do not proceed in this manner. In demonstrating feasibility, we always keep the end objective and the engineering requirements in mind."

The AEC official declined to estimate how many experiments might be required to demonstrate the feasibility. "I have tried to avoid any such indication," he said.

The time between experiments is no sure indication of the pace of the program, Armstrong continued. "If we ran two experiments in one summer, it might not be as much of an increase in pace as if we stopped one line of experimentation and built new facilities to begin another—resulting in a long period in between."

At this week's hearing, the Atomic Energy Committee will try to determine how much increase in pace is possible. James T. Ramey, the committee's executive director, has asked Dr. T. Keith Glennan, NASA Administrator, and Gen. A. R. Luedecke, AEC General Manager, to comment on this outline of suggestions by the committee:

Immediate establishment of performance specifications for the engine for flight test.

A schedule calling for ground launching at the earliest possible date.

Complete responsibility for development assigned to the AEC through the flight test phase—with the proviso that NASA will provide consultation and assistance.

"We want to be assured that, looking to the future, the Rover program is receiving the proper emphasis," Senator ANDERSON declared.

ESTABLISHMENT OF JOINT AEC–NASA NUCLEAR PROPULSION OFFICE

Mr. ANDERSON. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a news release relating to the establishment of a joint AEC–NASA Nuclear Propulsion Office.

There being no objection, the release was ordered to be printed in the RECORD, as follows:

JOINT AEC–NASA NUCLEAR PROPULSION OFFICE ESTABLISHED

John A. McCone, Chairman of the Atomic Energy Commission, and Dr. T. Keith Glennan, Administrator of the National Aeronautics and Space Administration, today

announced the establishment of a joint AEC–NASA Nuclear Propulsion Office (NPO). The new office will consolidate the work which has been carried out by organizations in each agency to develop nuclear energy for space missions.

Harold B. Finger, Chief of Nuclear Propulsion for NASA, was named Manager of the joint office. The Deputy Manager will be Milton Klein who has been Assistant Manager for technical operations of the AEC's Chicago Operations Office.

The new Office will be staffed by employees drawn from both the AEC and NASA. It will be located at the AEC headquarters at Germantown, Md.

The NPO will integrate the project Rover nuclear powered rocket developmental programs which had been carried out previously by the AEC through its National Reactors Branch of the Division of Reactor Development and the nuclear propulsion organization in NASA's Office of Launch Vehicles.

In accordance with the statutory responsibility of both agencies, the AEC will have primary responsibility in this program for the development of all reactors and their components, including those for flight missions specified by the NASA; NASA will have primary responsibility for research and development of non-nuclear components and integration of the nuclear components in engines and vehicles of rocket systems.

The Rover program was initiated in 1955 by the AEC and the Air Force. When NASA was established in 1958, Air Force responsibility in this program was transferred to NASA.

Development of the reactor system is being carried out by the Los Alamos Scientific Laboratory, operated for the Commission by the University of California. Tests of two reactors, Kiwi-A and Kiwi-A Prime, have been conducted at the AEC's Nevada test site in July of 1959 and July of 1960. A third reactor, Kiwi-A 3, is scheduled to be tested later this year.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had passed, without amendment, the following bills of the Senate:

S. 1663. An act directing the Secretary of the Interior to convey certain property in the State of North Dakota to the city of Bismarck, N. Dak.; and

S. 3399. An act to authorize the exchange of certain property within Shenandoah National Park, in the State of Virginia, and for other purposes.

The message also announced that the House had agreed to the amendment of the Senate to each of the following bills of the House:

H.R. 383. An act to authorize the annexation of certain real property of the United States by the city of Wyandotte, Mich.; and

H.R. 12759. An act to amend title V of the Agricultural Act of 1949, as amended, and for other purposes.

The message further announced that the House had agreed to the amendments of the Senate to the bill (H.R. 10548) to amend the Helium Act of September 1, 1937, as amended, for the defense, security, and the general welfare of the United States.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2565) to promote effectual planning, development, maintenance, and coordination of wildlife, fish, and game conservation and rehabilitation in military reservations.

The message further announced that the House had passed a bill (H.R. 12622) to amend chapter 85 of title 28 of the United States Code relating to the jurisdiction of the United States district courts, and for other purposes, in which it requested the concurrence of the Senate.

THE EISENHOWER ERA MADE POSSIBLE THE MUCH GREATER ACHIEVEMENTS OF THE PEOPLE

Mr. DIRKSEN. Mr. President, in a recent issue of Life appeared an editorial under the caption, "The Eisenhower Era Made Possible the Much Greater Achievements of the People."

The sentiment expressed in this editorial is worthy of wide currency, and it merits a place in the CONGRESSIONAL RECORD. So I submit it with the request that it be included as a part of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE EISENHOWER ERA MADE POSSIBLE THE MUCH GREATER ACHIEVEMENTS OF THE PEOPLE

In Chicago, where he won it from Bob Taft in the acrid battle of 1952, Dwight D. Eisenhower this week surrenders the leadership of the Republican Party. The record of his administration may be only one major campaign issue, since both NIXON and KENNEDY are bound to emphasize new goals and policies for a new age. But Eisenhower's record is well worth inspection.

Of the many flaws the Democrats will find in it, historians will probably agree at least on one. There is some substance to the charge that Ike has rather reigned than ruled. He has tended to assume, as you can in the Army but not in the White House, that an order once given is self-executing; a certain lack of follow-through has marred some of his best intentions, notably the rejuvenation of the Republican Party. He has been an easy boss. But that is not to echo the commoner (and mistaken) charge that he does not make decisions. Ike has made plenty of decisions. And most of them were right.

The duty he saw in taking office was to heal the wounds of 20 years of highly partisan government and chronic emergency. It was his genius to give the latent unity and good will of the American people a chance to recover and grow. He has been the least "divisive" of modern Presidents—and the most widely beloved.

Reinhold Niebuhr, no conservative, said Ike "rebuilt American conservatism into a viable political instrument." He gave a suspicious generation the reassuring experience of living safely and prosperously under a Republican government again—salutary for the people and for the Republican Party too.

Such a government had to do more correcting than innovating. In our foreign alliances, Ike's long suit, he has preserved and developed previous lines of U.S. policy, but to them he has made two contributions of enormous importance.

The first was to modernize and strengthen our military posture and bring it into the missile era on a "long-pull" basis—i.e., no more crash emergency programs or budgetary zigs and zags. Though there is room for marginal argument, the essential truth is that when Ike leaves office America will still be, as he found it, the strongest military power in the world.

President Eisenhower's second contribution was to rob the Communists of their most insidious propaganda weapon, Khrushchev's pretended guardianship of world peace. Ike personally shot down that phony Picasso peace dove. He did it by his personal dedication to peace, by his atoms-for-peace offer to the U.N., by his dramatic open-skies proposal at Geneva in 1955, by stopping the Suez war, by his serious pursuit of disarmament and by his good-will travels. He has made the cause of peace so much his own that Jim Farley, only the other day, could accuse him of "peace-at-any-price" leadership. That charge won't wash. Ike has twice faced down Communist threats of war in the Formosa Strait. He has not flinched under Russian pressure on Berlin. He took bold action in the Middle East. He has kept the peace without surrendering any point of strength. The Russian empire is no larger than it was in 1952 (in fact smaller by eastern Austria). The Chinese Empire, though larger by North Vietnam and Tibet, is surrounded by stronger and more alert free neighbors than it was before Ike and John Foster Dulles took charge.

Ike used to be called a lucky President. His luck has run out lately at Sverdlovsk, Paris, and Tokyo. But let not these setbacks be confused with flaws in the solid structure of allied political, military, and economic strength built in the Eisenhower era.

The economic performance has been especially spectacular. Abroad, the Eisenhower policies have encouraged a rebirth of private trade and investment that has lifted the whole Western World and parts of Asia to amazing levels of prosperity. Europe has never been in healthier shape. We still need a new approach to the underdeveloped Southern Hemisphere, but even Latin America has improved politically, if not economically, in Ike's time.

At home the case is open and shut. The Eisenhower economic policy has been virtually a textbook model of how to befriend and stimulate a free market system. He and his aids have handled two recessions with precise skill. Real wages and consumption have risen steadily, and profits and savings have remained healthy. He has led a tireless war on excessive Government spending which has at last brought inflation under control. The $1.1 billion surplus announced last week is a symbol of this victory for a sound dollar.

Ike's government has helped finance the building industry while it set an alltime record of 8 million new homes in less than 8 years. It has launched a whole new highway system, 23 space satellites and 20 atomic submarines. It has expanded the Union by two new States and created seaports on the Great Lakes.

Ike's government has maintained, not without difficulty, a high standard of integrity in Federal officeholders. His Cabinet has seen some stellar performers (Dulles, Brownell, Rogers, Anderson, Mitchell, et al.) and even the unfortunate Benson deserves respect for his persistent attack on Congress' scandalous farm policy.

Ike's government has appointed more scores of good judges than any previous one. This great improvement in the judiciary, essential to the Nation, is the kind of achievement to which voters and political writers give too little heed.

Ike's government has shifted the rate of Negro political and economic progress into high gear.

But all these achievements are only part of the great story of progress in the Eisenhower era. In a Nation with a constitutional Government, where freedom to act is left to individuals and unofficial groups, a full evaluation must include credit or blame for how the Nation as a whole behaves. The

greatest deeds of his era are what the people, responsive to their renewed liberty, have done for and by themselves.

Democrats charge that Ike's preoccupation with the budget has "starved" our public services. Yet total public spending—Federal, State and local—is nearly twice what it was in Truman's time and most of the increase has been in welfare (nondefense) services. Of our school system, so rightly under scrutiny, an impressive fact is how it has grown in teachers, classrooms and students, with little Federal aid. But even more important: scholastic standards have risen sharply.

Not Federal but private and local spending have changed our urban skylines these last 8 years; and distributed more books and music than ever; and produced more goods and services of every kind. The Federal Government did not develop automation, nor discover the Salk vaccine, nor make American architecture a new wonder of the world; nor cause more Americans to travel abroad than ever before; nor double the annual gifts to higher education; nor raise our birth rate to a record height. The American people did all these—and more. They did them under the benign and permissive Eisenhower sun.

A certain dissatisfaction has crept into the last months of the Eisenhower era—the anti-tailfin syndrome, the puritan nostalgia, the hunger for new national purpose. And that is healthy, for it shows that Americans have not been entirely corrupted by their own success. But let's face it: it is success, not failure, that causes our unease. Ike leaves us reunited, rested, self-enriched and newly appreciative of our liberty. As a people we are (or should be) firmly prepared for our next testing. The Kennedy or Nixon era will be different. It may be grim or it may be great. It can scarcely be more sunny or fruitful than these Eisenhower years, in which so many age-old visions of the good life first became real.

A SOUND DOLLAR IS ESSENTIAL FOR THE REPUBLICAN AND NATIONAL GROWTH PROGRAM

Mr. DIRKSEN. Mr. President, in a recent issue of Life there appeared an editorial on the subject of "A Sound Dollar Is Essential for the Republican and National Growth Program." This editorial is so timely that I believe it merits wide diffusion among readers everywhere, and for that reason I ask unanimous consent that it be included as a part of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A SOUND DOLLAR IS ESSENTIAL FOR THE REPUBLICAN AND NATIONAL GROWTH PROGRAM

The 1960 conventions have launched a campaign in which foreign policy will evidently be the overriding issue. Senator KENNEDY made the choice with his bold decision to attack Eisenhower's diplomatic record. Candidate NIXON attempted to mousetrap him by making it an even bigger issue. Picking Lodge for his running mate to emphasize the point, he met KENNEDY's "new frontiers" by envisioning a whole new world to be brought about by the political defeat of communism. NIXON proposes "a grand new strategy which will win the battle for freedom for all men and women without a war." He tells Khrushchev that "his grandchildren will live in freedom." He promises a complete reorganization of all relevant Government activities "into one powerful economic and ideological striking force" to go on the offensive.

In the oversimple terms of the political columnists, NIXON is running against Khrushchev, KENNEDY against Eisenhower. If that were all, NIXON should win. But precisely because foreign issues are paramount, and because a national decision to take the offensive against communism is so serious, one should defer judgment on this issue until the campaign has thrown more light on the real party difference. Senator KENNEDY may convince us that he can handle the Communist menace more surely than NIXON. So let's listen.

On another issue, however, the difference between the two parties has been rather conclusively established already. They take two distinct attitudes on the American economic system, how it works and what the Government should do about it. The Democrats, on the balance of the evidence, want to change our system; the Republicans want to encourage and develop it. The Democrats want to change it by putting more and more of it under Government control. The Republicans want to encourage it by maintaining confidence in the dollar and by stimulating private activity.

"I serve notice here and now that, whatever the political consequences, we are not going to try to outpromise our opponents * * * we are not going to try to buy the people's votes with their own money," said NIXON last week. Even if he wanted to try, the Democrats' utopian platform leaves him little or no room for it. The Republicans can only hope that their promises, because fewer than those of the Democrats, will be considered more realistic. And the Republicans emphasize one promise that should appeal to every voter who understands the real relation between his personal interest and the Nation's. This promise is fiscal responsibility, which means a sound and stable dollar.

Millions of voters will doubtless think this a stuffy and tedious issue; and there are also many who, having learned to profit from it, actively favor inflation. All those in favor of inflation should vote for KENNEDY. Not that he openly espouses inflation—but his record and his platform place on him the burden of proving that, as President of the United States, he will be a champion of fiscal responsibility. Perhaps his campaign will prove this; we hope so, for the issue is very serious. So far, the Republicans have the best of it.

Both platforms and candidates are dissatisfied with the recent "growth rate" of the U.S. economy—i.e., the annual increase (now around 3 percent) in the total output of all goods and services, from B–70's to shoeshines. The Democrats want to set a new national target of 5 percent growth a year; the Republicans refuse to pick a number but want to "quicken the pace." NIXON says the difference is not over ends but means. Certainly all Republicans including Nelson Rockefeller, who also wanted to set a 5 percent or 6 percent target, reject the means of "massive government spending, creeping inflation and far-reaching government controls"—the means that are implied in the Democratic platform.

The Democrats claim that a 5 percent growth rate will produce an extra $10 billion of Federal revenues a year and so permit balanced budgets without higher taxes, at least for the time being. But the Democratic promises, if fully enacted, would cost a lot more than $10 billion a year. Moreover, they specifically promise cheaper money and looser credit policies than the Republicans; and this, combined with their expansive attitude toward the Federal budget, is bound to make inflation a cancerous danger again—not only to Americans at home but to America's economic position in the world. As though recognizing the danger they would create, the Democrats in their platform hint at the restoration of price controls (which means ration books and/or black markets).

The Republicans, by contrast, consider a stable dollar indispensable to their growth program. That program emphasizes not bigger Federal spending but tax reform (a particular NIXON hobby), an attack on "featherbedding practices by labor and business" and other steps to encourage private "initiative and investment, productivity, and efficiency."

The Republicans' concern for a sound economy must be respected by anyone who knows anything about the world economic situation. After years of foreign aid, the dollar is no longer the world's hardest currency. If the dollar is to keep enough strength to support a strong U.S. foreign policy, then U.S. exports—and U.S. costs—must remain competitive. The Republican platform recognizes this problem. The Democrats virtually ignore it and their inflationary program would make it worse. Even if price controls could be foisted on the American public they are useless in foreign markets.

The Republican case is that the natural expansion of a stable dollar economy benefits more people than a feverish, artificial, inflationary expansion. There are two reasons for thinking so. First, the Republican formula works; it has obviously been working well these last 7 years, with personal incomes up, taxes lower and inflation under control. Nor was this a mere laissez faire achievement; it took a lot of doing. Not the least impressive part was the remarkable recovery from the whopping $12 billion Federal budget deficit of 1959—which helped end a recession but also caused a serious drain on our gold—to the $1 billion surplus just recorded for 1960. President Eisenhower and his aides, notably Secretary Anderson, fought hard for that achievement against what could have been—and under a Democratic President probably would have been—a spendthrift Congress.

Apart from the fact that it works, Republicans have another reason for their insistence on fiscal integrity and a free economic system. This is the only system compatible with the American belief in personal freedom under a strong but limited government. Said Republican Keynoter WALTER JUDD:

"Republicans believe that that government is best, not which does most for its citizens directly, but which makes it possible for most citizens to do most for themselves. * * * I can work my girl's arithmetic problem better for her than she can work it for herself. * * * And she would like to have me do it for her. But I don't do it. Not because I don't love her or want her to succeed—but because I do."

The idea of limited government was once the core of the Democrats' philosophy, which they abandoned after 1933. They thought it had been forever discredited by a series of governments that tried to do too little. It wasn't. Neither party today, as the Eisenhower record and the Republican platform both testify, will try to do too little. The Democrats promise to do too much. It is fortunate for the cause of freedom that the Republicans still recognize the eternal importance of limits.

LEGISLATIVE PROGRAM

Mr. MORSE. Mr. President, I should like to have the attention of the majority leader for a moment. We are about to return to the debate on the District of Columbia Compact Commission proposal which we were discussing some hours ago. At the time when we laid it aside, I was about to finish the argument I was making in support of my amendment.

I shall shortly return to it; but I should like to know the plans of the majority leader—whether it is in contemplation that we shall take a recess to a later time this day; or whether it is the

plan, insofar as the Senate is concerned, to adjourn sine die.

Mr. JOHNSON of Texas. I had hoped that we would have adopted the sine die adjournment resolution before now.

We do have some nominations and some resolutions from the Committee on Rules and Administration, on which we wish to act; and we hope to pass on the compact.

If we are going to become involved in any extended debate, I would hope we would be able to consider the sine die resolution, and then take a recess until 12 o'clock.

Mr. MORSE. Then I shall proceed to make a summary argument in regard to the compact and my reasons for opposing it in its present form.

REGULATION OF MASS TRANSIT IN THE WASHINGTON, D.C., METROPOLITAN AREA

The Senate resumed the consideration of the joint resolution (H.J. Res. 402) granting the consent of Congress for the States of Virginia and Maryland and the District of Columbia to enter into a compact related to the regulation of mass transit in the Washington, D.C., metropolitan area, and for other purposes.

Mr. MORSE. Mr. President, I wish to say to the Senator from Virginia [Mr. ROBERTSON] that, as he well knows, I was one of the cosponsors, with him, of the original resolution for a compact; and I am still a stanch believer that a compact commission should be created.

However, after examination of the evidence, I reached the conclusion that the resolution as originally introduced—and I reached this conclusion as one of the authors of the original proposal—was in need of modification along the lines of the amendment I have offered, which is pending.

I shall now quickly summarize my position on it. I had been reading the argument which was presented in the testimony by Mr. Chalk, the president of the District of Columbia transit system. I shall not complete the reading of that argument; but I now ask unanimous consent, Mr. President, that the entire argument of Mr. Chalk be printed in the RECORD at the conclusion of the remarks I shall now make.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MORSE. Mr. President, I wish to say that we need to keep in mind the fact that Mr. Chalk is president of the District transit system. He has a tremendous investment in that system. I think he is deserving of fair treatment, not discriminatory treatment, by the Congress. I think he is deserving of not being put in a position where the organization of the commission itself could conceivably work against his fair interest, and that is why I have offered the amendment.

I have not offered the amendment which Mr. Chalk sought. The amendment he sought was that the District of Columbia Commissioners be three in number, and that Virginia and Maryland have one commissioner, each. But I think that would be unfair to Maryland and to Virginia.

But likewise, I say most respectfully, I think the compact in its present form is grossly unfair to the District transit company, grossly unfair to the riding public in the District of Columbia, and grossly unfair to the District of Columbia as a whole.

I want the Senate to keep in mind what some of the lurking dangers of this unbalanced commission are, so far as its representation is concerned. I want to point out, as I said earlier this evening, that 80 percent of the riders who are involved in the metropolitan transit system, including Maryland, Virginia, and the District of Columbia, are District of Columbia riders. Therefore, I think we have a duty to see to it that we provide in the compact a procedure which will insure fairness in the protection of the District of Columbia transit interests, along with those of Virginia and Maryland.

My amendment proposes that the District of Columbia have two members of the commission, Maryland have one, and Virginia have one.

What will that kind of representation require? It will require that the commission really will, in most controversial issues, have to get together to work out a compromise settlement.

The real fear of Chalk and others who take his position is that what can happen under this representation system, as it has been brought to the Senate by the committee, is that Maryland and Virginia can gang up on the Chalk interests and proceed, by concert of action, to adopt commission policies which would be to the great detriment and disadvantage of the Chalk interests, the District of Columbia transit riders, who are about 80 percent of the total riding population of the metropolitan Washington area, and, in the long run, to the disadvantage of the District of Columbia itself.

I point out that there is a strong point in the argument Mr. Chalk makes in his testimony.

By the way, the attorney for the District of Columbia Transit Co. has submitted a legal brief on the legal objections of the company to the compact in its present form; and I ask unanimous consent that the brief be published in the RECORD, together with the testimony of Mr. Chalk, which I have already obtained consent to have introduced in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. JOHNSON of Texas. Mr. President, will the Senator yield?

Mr. MORSE. Yes, I yield.

Mr. JOHNSON of Texas. I wonder if the Senator will be agreeable, in view of the fact that the House has gone out, and it looks as if we are going to be unable to conclude our work now, to an understanding that we resume consideration of this matter in the morning.

Mr. ROBERTSON. Mr. President, will the Senator yield to me?

Mr. MORSE. I yield.

Mr. ROBERTSON. I thought I had an assurance from the distinguished Senator from Oregon that in 5 minutes he could summarize his speech and we could vote.

Mr. MORSE. Let me say I tried to cooperate, but if the Senator wants to get tough, he will never get the bill passed. I said I was going to try to finish this as quickly as I can, and I will if I am permitted to; but if the Senator wants to raise the issue, I have support to block passage. I do not intend to take any comment from anybody on the floor of the Senate as to how long I am going to talk. I will talk just as long as I desire. I intend to finish, and it is not going to take very long. I hope the Senator will listen to the logic of my argument, because otherwise we are going to do a great injustice to the District of Columbia transit system, and we are going to raise problems which will plague us in the next few years before the District of Columbia Committee, of which I am a member.

I am trying to avoid that and I am trying to give a warning now that if the Senate wants to adopt a very reasonable amendment which will protect Maryland, Virginia, and the District of Columbia, it will adopt the Morse amendment.

If the Senate does not wish to adopt my amendment, it can defeat it, because I have no intention—and I told the Senator from Virginia that I had no intention—and I do not appreciate the innuendo of his comment—of blocking the passage of the bill; and I have not done so. I am, however, going to finish my argument. I have been very patient and very cooperative in this matter; and now I am not going to yield to anybody. I am going to finish my argument. Senators can all go home. I will not yield to any Senator.

Mr. JOHNSON of Texas. Mr. President——

Mr. MORSE. I do not yield to anybody.

I think there is great merit in the argument of Mr. Chalk, president of the D.C. Transit System. I may point out that article 4 of the compact provides that the expenses of the Commission shall be borne by the signatories in the proportion that the population of each signatory within the metropolitan district bears to the total population in the metropolitan district.

Take a look at that argument. What is proposed is to have a commission of three, one from Virginia, one from Maryland, and one from the District of Columbia; but the expenses of the commission are going to have to be paid on the basis of the proportion that the population of each signatory within the metropolitan district bears to the total population in the metropolitan district.

What does that mean? That means the District of Columbia is going to have to pay out of all proportion the expenses of the commission as compared with Maryland and Virginia.

It means that the two commissioners, one from Maryland and one from Virginia, have a majority vote, and can proceed to run up the expenses of the

commission. Under article 4, the District of Columbia would have to pay out of all proportion, because the large majority of the population falls to the District of Columbia.

Do not forget also, Mr. President, that we are dealing here with transit riders within the District; and most of the riders from Maryland and Virginia in the metropolitan area use private cars. The mass transportation riders are, by a large percentage, within the District of Columbia. This is another example of the discriminatory features of the compact that is being offered by the Senator from Virginia [Mr. ROBERTSON] and the Senator from Michigan [Mr. HART].

What does the Senator from Oregon propose to do? He proposes only that the representation of the District of Columbia be increased by one, to give the District of Columbia two members of the commission, and to give Virginia and Maryland one each. In that way the 80 percent proportion that the District of Columbia has in the whole picture will be protected.

I think that is fair. I think that is equitable. It is the burden of my argument. It is the thesis I have been leading up to. And if Senators will give me the time to finish the thesis—and I am about through—I am making a plea for fairness and equity for the District of Columbia. I make it as a member of the District of Columbia Committee, on which I served for many years.

I can see now arising problems which will flow from the compact if the Senate adopts it in this form without the Morse amendment.

The argument of the Senator from Virginia and others is that if the amendment of the Senator from Oregon is adopted, the matter will have to go back to the Legislatures of Virginia and Maryland, and the Legislature of Maryland does not meet until 1962. That is too bad, but it is no argument in support of the claim that we ought to pass a discriminatory bill that one of the States may not have a new legislative session until 1962.

The two legislatures adopted this compact in the first instance. They were perfectly willing to adopt a compact which I believe to be discriminatory in its features in the first instance. I wish to say, in fairness to the area, the legislatures ought to be willing to have a short session, if they think it is important to act before 1962, to get the proposal corrected on the basis of the amendment I have offered.

That is my case, Mr. President. I submit my amendment.

EXHIBIT 1

STATEMENT OF O. ROY CHALK, PRESIDENT, D.C. TRANSIT SYSTEM, INC.; ACCOMPANIED BY HARVEY SPEER, COUNSEL

Mr. CHALK. Good morning, Mr. Chairman. My attitude is definitely adverse.

Senator HART. That I know.

Mr. CHALK. I would like to express my appreciation for the opportunity of appearing before this subcommittee and expressing the views of the D.C. Transit System. May I be permitted—I believe we have gone into quite a bit of detail to present our views in this matter, and I think they are all so important and there are so many complicating factors that to rush through them, I think, would be unfair to the bill. I know that you will read this, I am sure of that, but I think that I can go through it rather hurriedly.

Senator HART. We would welcome your going through it without hurry.

I have indicated that when this committee must recess, as we must, for the executive meeting of the full committee, I know that we shall not have finished—surely we shall not have finished with all of the other witnesses. Therefore, those who will not be heard, and who would like to make their statement on the record, we shall make an effort to resume the hearing this afternoon. Failing that, we shall try to hear the remainder of the testimony at the very earliest possible time next week.

Mr. CHALK. With your permission, sir, in considering House Joint Resolution 402, Congress has two separate duties to discharge. First, under the Constitution, Congress must approve all compacts between the States. The issues involved under this constitutional mandate are usually discharged without much controversy. But where, as here, the interests of the District of Columbia are involved in the compact, Congress has an additional responsibility. In such cases, Congress must pass upon the substantive effects which the compact will have upon the internal affairs of the District. In this latter case, we submit that the subject matter of the compact should be studied not only by this subcommittee, but also by the District Committees which are familiar with all the transportation problems affecting the District of Columbia. Until all of those interrelated problems are considered, Congress should not take action on a bill as important and controversial as House Joint Resolution 402. In this connection, this subcommittee may wish to note that as far back as records are available to us, we find that all compacts affecting the interests of the District of Columbia have gone not to the Judiciary Committees but to the substantive committees concerned with the subject matter of the compacts.

Before discussing the specific objections which we have to the bill before this subcommittee today, I would like to review in a few minutes that portion of the background and history of House Joint Resolution 402 which is particularly pertinent to today's hearings.

The bill before this subcommittee today has been widely described as the first step of a three-stage overall transportation plan for the so-called National Capital region. This transportation plan originally contemplated three separate stages. The first stage contemplated the enactment and approval by Congress of a compact creating a tristate regulatory commission consisting of one representative of each of the States of Virginia and Maryland and the District of Columbia, to exercise complete regulatory jurisdiction over mass transportation in the Washington metropolitan area. The Compact Commission contemplated by the first step is the very same Commission which is the subject of the bill before this subcommittee today (H.J. Res. 402). Under the overall transportation plan, this Compact Commission was contemplated only as a temporary Commission. Later in my testimony, I will describe in greater detail the problems created by the fact that the proposed Compact Commission is intended to be only temporary. I will also point out why the proposed Commission is no longer necessary or desirable in view of the recent developments relating to the second and third steps in the three-stage series.

The second stage of the transportation plan originally contemplated the creation of a Federal agency which would be empowered to acquire and develop certain transportation facilities deemed necessary to the accomplishment of the objectives of the overall transportation plan. Under the original transportation plan, this agency was also to be only a temporary agency.

The legislation embodying the second step (S. 3193 and H.R. 11135) has already been approved and reported out favorably by both the Senate District Committee (on June 23, 1960) and the House District Committee (on June 23, 1960) and is now pending on the calendars of both Chambers. Later in my testimony, I will describe at length how the bills now pending before both Chambers have bypassed the Compact Commission of House Joint Resolution 402 and how they have rendered House Joint Resolution 402 obsolete and undesirable.

The third and final stage of the overall transportation plan contemplated the enactment of either a Federal corporation or a tristate proprietary agency to take over as successor to both of the prior two stages, with the added power and authority not only to regulate all transportation in the area but also to build, own, and operate substantially all of the mass transportation facilities in the National Capital region. This third and final stage is also embodied in and has become an important part of S. 3193 and H.R. 11135 which are now pending on the calendars of the Senate and House.

The overall transportation plan has been the subject of 5 years of study and research for which the Congress has already appropriated and expended in excess of $500,000. Since this study first began, the overall transportation plan has been the subject of extensive hearings over the years before the special Joint Committee on Washington Metropolitan Problems, appointed to study the mass transportation problem.

In May and June of 1958 the joint committee held extensive hearings on the overall transportation plan which were reported in 392 pages of printed testimony.

At the next session of the Congress, in November 1959, the joint committee held 5 full days of hearings on the overall transportation plan which were reported in 1,070 pages of printed hearings.

In the early days of this session, the administration, acting through the Budget Bureau, sent to the Congress and caused to be introduced the bills to which I have referred earlier (S. 3193 and H.R. 11135), representing the second and third stages of the overall three-stage transportation plan. These bills were subsequently the subject of still further hearings before the joint committee in May 1960, which hearings were reported in 299 pages of printed testimony.

As part of the study and research on the overall transportation plan, numerous reports and studies have, over the years, been prepared by the staff of the joint committee and by the many organizations working on the overall plan. The reports of these various groups are now so numerous and so extensive that they occupy over 15 reports weighing in excess of 20 pounds of printed testimony and material.

It has become abundantly clear to all those intimately connected with the overall transportation plan and its long-range objectives that the most effective way to accomplish the long-range objectives of the overall transportation plan was to bypass and abandon the Compact Commission of the first step and, in place thereof, to enact the long-range legislation contemplated by S. 3193. Thus, the Budget Bureau and the administration have devoted their time, energy, and attention to the second and third stages of the transportation plan and they have caused S. 3193 to be introduced and pressed forward in this session of the Congress, bypassing the Compact Commission of the first stage.

Senator HART. Mr. Chalk, may I interject at this point that the committee has been joined by the distinguished Senator from New York, Mr. KEATING, whom you probably know.

Mr. CHALK. Of course.

It is a privilege to appear before you, Senator KEATING.

The members of this subcommittee may wonder how and why the Compact Commission bill has come so far if it is so unnecessary and so undesirable. There are basically two reasons. First, the Compact Commission bill was never referred to and has never been considered by the respective District Committees of the House and Senate. Instead, the bill was sent in the House, as in the Senate to the Judiciary Committee, which regarded its role as strictly that of passing upon the constitutionality and the legal form of the resolution. Those persons who may have opposed the bill on the substantive merits, if they had been able to participate in hearings on the merits, were unable to pass any judgment on the merits of the bill since the hearings held related only to the constitutionality and the legal issues. To hold a hearing on the merits would have involved a hearing on all three stages of the transportation plan, which the House Judiciary Committee was unwilling to do.

The second reason House Joint Resolution 402 has come so far even though it is bad legislation is that it has been strongly pushed, almost as a personal crusade, by Robert E. McLaughlin, who appeared before you this morning, and who is President of the Board of Commissioners of the District of Columbia, and at one and the same time, Chairman of the National Capital Planning Commission, which is sponsoring House Joint Resolution 402. Instead of concentrating on the long-range transportation problems, Bob McLaughlin has given unbelievably high priority to this temporary Compact Commission and low priority to S. 3193, while at the same time his own administration has given low priority to the Compact Commission and high priority to S. 3193.

One wonders what inspires the small group of dedicated persons who are still fighting so valiantly for the enactment of House Joint Resolution 402. It certainly couldn't be the patronage involved. The pressure from these individuals for passage of House Joint Resolution 402 has been tremendous and almost unexplainable. If House Joint Resolution 402 is enacted into law, it will be due primarily to the supreme efforts of one man, Robert E. McLaughlin. He has worked so hard on the bill that he can aptly be described as the father of the Compact Commission.

One next wonders why Virginia and Maryland have been so persistent in their efforts to press for enactment of the compact bill. The interest of these two States in the Compact Commission and their great desire for its enactment can readily be seen from the advantages which they achieve at the expense of the transit riders and the people of the District of Columbia. Later in my testimony, I will show how the Governors of the States of Virginia and Maryland will gain control of mass transportation within the District without completely yielding corresponding control over intrastate transportation in their respective States.

The Congress is well aware of how the Virginia and Maryland States have long envied the sovereignty of the District of Columbia. Over the years, in various ways, such as in this bill, the political sovereignties of Virginia and Maryland have sought to exercise greater and greater sovereignty over the affairs of the District. Now, at long last, they achieve their goal by acquiring jurisdiction and patronage over the lifeline of the District.

Before describing in detail our opposition to House Joint Resolution 402 and the defects in the bill, I would like to make one further observation about the background and history of the Compact Commission.

Our problem throughout the history of this bill has been that we have been unable to get anyone to give favorable consideration to the two sets of important changes which would have made the bill acceptable to us.

The argument made by the proponents of the bill in refusing to accept our changes is that the bill must be accepted in its present form lest changes require resubmission of the bill to the Legislatures of Virginia and Maryland, which have already approved it in its present form. This argument is deceptive and misleading, because neither of the Legislatures of Virginia and Maryland had any hearings on the bill before it passed those legislatures, nor did those legislatures give any notice or opportunity for D.C. Transit System, Inc., or the interests of the District to be heard or to express their views on the proposed Compact Commission. The Compact Commission bill was pressed through the Virginia Legislature without hearings or notice to the public. The Compact Commission bill was similarly pressed through the Maryland Legislature without any hearings or notice. Once the Compact Commission was passed by those two legislatures in its present form, all parties affected by it were told they must accept it without change lest it require resubmission.

Senator KEATING. Do you know whether the actions of the Virginia or Maryland Legislatures were unanimous?

Mr. CHALK. I did not hear you.

Senator KEATING. Was the action of the Virginia and Maryland Legislatures unanimous?

Mr. CHALK. No, it was not unanimous.

Senator KEATING. Do you know what the vote was?

Mr. CHALK. I am not sure of the vote. There was, I believe, some strong opposition from labor sources.

This argument is invalid to the extent that there are serious defects and bad legislation in the proposed bill. It appears to us at D.C. Transit that it is presumptuous for the proponents to expect the Congress to enact bad legislation merely because the proponents failed to perfect their legislation in the proper manner by submitting it to all of the parties concerned before it was submitted to the Legislatures of Virginia and Maryland. Having come up with a bad bill, the proponents must now take full responsibility for making the required improvements in the bill, even if that requires resubmission of the bill to the Legislatures of Virginia and Maryland.

As the members of the subcommittee know, the House Judiciary Committee has reported out House Joint Resolution 402 with a 52-page report filed on May 18, 1960. In this report, it is stated, in effect, that the only views expressed in opposition to the bill were those expressed by D.C. Transit System, Inc. This observation is misleading.

Senator KEATING. Let me interrupt to ask counsel, if I may, whether the action of the House was unanimous in this.

Mr. GREEN. I have no figures on that.

Senator HART. My impression in earlier testimony from Congressman FOLEY was that there was no opposition.

Mr. CHALK. It was a voice vote, sir.

The committee knows the Compact Commission has been proposed and is being pressed forward by the two groups which were granted congressional funds for the purpose of making the long-range transportation study, both headed by Bob McLaughlin; namely, the National Capital Planning Commission and the National Capital Regional Planning Council.

During the 5 years of study and research, experts and specialists were retained to study and make recommendations on the overall three-stage transportation plan. The expert group retained for the study—the Institute of Public Administration in New York—filed its report, which was subsequently published by the Joint Committee on Washington Metropolitan Problems, in August 1959, under the heading "Preliminary Financial and Organizational Report Regarding Metropolitan Transportation." I have with me today several copies of their report which I would like to hand to the chairman of the subcommittee, with the request that it be included at the end of my testimony in the printed hearings of this proceeding.

I would like to call the attention of this subcommittee to two of the comments made in the report of the Institute of Public Administration on the proposed Compact Commission of House Joint Resolution 402. On page 17 of the report of the Institute of Public Administration, the following conclusion is stated:

"In short, the arrangement (i.e., Compact Commission) is one of limited powers, with no assurance of effectiveness. It rates high on only one test—feasibility. It rates low on the requirements of flexibility, comprehensiveness, responsiveness to public needs and desires, and financial adequacy."

In addition to the above critical analysis, the institute has made one other observation about the proposed Compact Commission of House Joint Resolution 402. Summarizing its views as to the alternatives presented for solving the transportation problems of the National Capital region, the Institute of Public Administration made the following observations on page 24 of its report:

"The first alternative is to follow through with the proposed interstate compact regulatory agency, in full recognition of the fact that it will be of limited effectiveness in mass transportation improvement, and of little or no effectiveness in the improvement of traffic and parking controls."

Senator HART. May I interject for the record that Senator CARROLL, of Colorado, has joined us in the course of your testimony.

Mr. CHALK. Senator CARROLL, it is a privilege to be with you.

May I assume that this report will be made a part of the record?

Senator HART. It will be made a part of the record.

Mr. CHALK. From the above-quoted excerpts from the report of the Institute of Public Administration, it is clear that others beside D.C. Transit find the provisions of the proposed Compact Commission to be objectionable. The only reason that no other witnesses have appeared in opposition to the proposed compact is that we of D.C. Transit are the only transit company which represents the transportation interests of the persons traveling within the District of Columbia.

The House committee report on House Joint Resolution 402 states that all the other transit companies support the bill. This conclusion is misleading because it implies that the other transit companies represent the interests of the riders within the District of Columbia. Such fact is just the opposite from the truth. The reason the other transit companies do not oppose House Joint Resolution 402 is that they are all suburban or local in character. None of them are incorporated within the District of Columbia nor do any of them represent the interests of those persons who ride transit services within the District of Columbia. To the extent the interests of the riders of the District of Columbia differ from the interests of the riders of the suburban communities, the other local transit companies have interests adverse to those of D.C. Transit.

The principal reason the suburban companies are not opposed to House Joint Resolution 402 is that two commissioners out of the three proposed commissioners will have more than ample power and authority to outvote the single representative of the District of Columbia on matters where the in-

terests of the District differ from those of the suburban communities.

The House committee report on House Joint Resolution 402 also tends to minimize the opposition of D.C. Transit to the Compact Commission. In terms of the number of witnesses who appeared before the House committee, the House committee report implies that the opposition to the bill was slight in comparison to the support for the bill. In this connection, the report emphasized that the Virginia and Maryland transit companies did not strongly oppose the bill. An examination of the facts indicates that although D.C. Transit may only have been one of many witnesses, it accounts for 80 percent of transportation of passengers within the National Capital region. We of D.C. Transit represent 80 percent of all of the transit business done by all of the transit companies in the National Capital region. Accordingly, our testimony should be accorded four times as much weight as was accorded to the testimony of all of the suburban transit companies together.

My testimony so far has been on the general background atmosphere which has surrounded the advancement of House Joint Resolution 402. We at D.C. Transit do have specific objections to certain provisions which must be made before the bill is enacted into law. Our objections are primarily of two general types. In the first place, we have very serious constitutional and legal objections to House Joint Resolution 402. Our legal objections were presented to the House Judiciary Committee, are part of its printed hearings, and need not be repeated here. Suffice it to say that the House report did not answer all our legal objections. Secondly, we have substantive objections to the provisions of House Joint Resolution 402 which we feel must be corrected before the bill can be acceptable to the Congress and to the people of the District of Columbia.

One of our major legal objections made before the House Judiciary Committee is one which also involves serious policy considerations. This objection is so serious that in 1954 President Eisenhower vetoed a similar compact commission for this same reason. The objection is that House Joint Resolution 402 discriminates against the District and in favor of Virginia because House Joint Resolution 402 gives the Compact Commission jurisdiction over intrastate transportation within the District while in the same bill Virginia refuses to yield to the Commission similar jurisdiction over its intrastate transportation. In passing, I would like to note that the House report on House Joint Resolution 402 makes no reply to this legal objection. On a related issue, President Eisenhower in 1954 vetoed a previous compact commission bill, saying:

"Its failure to include the Virginia segment of the metropolitan area within the jurisdiction of the proposed Commission is a fundamental deficiency. Through this omission of an integral and important part of the greater economic community, a system of fragmented and divided regulatory authority is continued. What is worse, the Federal Government is placed in the position of treating the carriers and persons within one segment of the area on a different and discriminatory basis from those in the remainder of the area. In the absence of any substantial grounds for this differentiation, the measure is unacceptable even as a temporary expedient (CONGRESSIONAL RECORD, vol. 100, pt. 12, p. 15567)."

Notwithstanding the views of President Eisenhower in 1954, House Joint Resolution 402 once again fails to give the Compact Commission complete jurisdiction over Virginia intrastate transportation. Not only do we regard this omission as discriminatory and unfair, but we also regard it as illegal and unconstitutional. In the hearings before the House Judiciary Committee, we filed a memo on the illegality and unconstitutionality of this fatal error. The House report did not even comment on nor discuss this subject. It must be assumed that the House committee could find no valid legal reply.

As I have mentioned briefly in my earlier testimony today, the proposed resolution of House Joint Resolution 402 is discriminatory against the interests of the District of Columbia and it favors the suburban communities of Virginia and Maryland.

The transit interests which the resolution discriminates against are both those of the riding public and of the transit company. The source of the discrimination is in the regulatory framework of the proposed Commission. Under House Joint Resolution 402, the new Commission would consist of three Commissioners, each a political appointment from each of the three jurisdictions participating in the compact. It is widely conceded that the Commissioner from Virginia, appointed by the Governor of Virginia, would owe his allegiance and interests to the suburban companies of Virginia origin and to the transit interests of the suburban communities of Virginia. Similarly, the Commissioner from Maryland would owe his allegiance and interests to the suburban companies of Maryland origin and to the transit interests of the suburban communities of Maryland. Only one of the three Commissioners would have a primary interest in the welfare of the riding public and the transit companies of the District of Columbia. Notwithstanding the fact that the transit operations within the District of Columbia constitute the greatest proportion, i.e., over 80 percent of all of the metropolitan area transportation in the three States, the District of Columbia would only be represented by one Commissioner out of the three Commissioners under the compact. Experience has taught regulated companies that, under similar circumstances, the downtown interests would be outvoted and would suffer to the advantage of the suburban interests.

As a suggestion to solve the discriminatory feature, we and others have urged that there be five commissioners, of which at least three be representatives of the District of Columbia. Even this proportion is favorable to the suburbs since transit operations in the District of Columbia account for approximately 80 percent of the transit operations in the entire Washington metropolitan area. The response of the supporters of the resolution to our suggestion has been that such a change would require that the bill go back to each of the other two States for resubmission to their respective legislatures. This answer is the same response which the proponents give to all constructive suggestions for the bill notwithstanding the fact that both Virginia and Maryland passed the bill without public hearings in either case and without notice to any of the parties or interests concerned.

In response to our proposal that the interests of the District can be outvoted by the suburban communities, the proponents of the bill have argued that the interests of the District are adequately protected by the so-called veto power in article VI. There is no protection to the District in the veto power because such veto power is limited to matters which are solely "intrastate." I have been advised by our attorney that, under current judicial decisions, it is quite probable that, wherever the District's interests clash with the suburban interests, few, if any, matters will be "solely intrastate." Accordingly, the veto power cannot be counted upon to resolve the problems of conflicts of interests between the District and the suburban communities.

In response to our concern about the attitudes of the various commissioners, the House Judiciary Committee in its report on House Joint Resolution 402 makes the following observations (at p. 28):

"It has been urged that the District of Columbia, having only one representative on the proposed commission and hence only one vote, could possibly suffer because of unfair, unreasonable, or collusive action by a combination of the other commissioners from the two compacting States. Of course, such a circumstance can work to the detriment of any compacting party. The committee, however, is not apprehensive about this circumstance since under article X of the compact each of the signatories is pledged to faithful cooperation with the other signatories."

The above-quoted excerpt from the House Judiciary Committee report shows the fallacy and error in the basic premise of the Compact Commission. This basic premise is that all jurisdictions will treat the transit interest of each other on an equal footing and with equal fairness. We have positive evidence here today in black and white to prove that the Commonwealth of Virginia has no intention of the kind of "faithful cooperation" contemplated in the House report.

An example of the lack of good faith shown on the part of the Commonwealth of Virginia on the subject of faithful cooperation and fairness is a new statute which was enacted into law in Virginia on March 31, 1960. This bill represents a hostile attitude and flagrant challenge to the transit interest of the District of Columbia, Maryland, and all States surrounding Virginia.

I would like to hand to the chairman and members of the subcommittee at this point the act of the General Assembly of Virginia of March 31, 1960, which is an act to provide for the regulation of special or charter party transportation. This act prohibits the carrying on of business as a common carrier for charter or special party service without first obtaining a certificate of public convenience and necessity. The new law, as most new laws of similar nature, provides the usual "grandfather clause," granting companies and persons who were lawfully engaged in such business on January 1, 1960, the automatic right to obtain a certificate of public convenience and necessity by virtue of their "grandfather" rights. This grandfather clause is quite customary and is similar to provisions in the Interstate Commerce Act and other similar regulatory statutes.

The hostility and discrimination against the District companies is contained in the fact that the "grandfather" rights are limited to Virginia corporations even though non-Virginia corporations were on January 1, 1960, entitled the same "grandfather" status.

Section 56-338.61 of the Virginia statute of March 31, 1960, provides that the "grandfather" rights will not be accorded a nonresident or a foreign corporation. This means then that although we of D.C. Transit have "grandfather" rights, we will be discriminated against because we are a District of Columbia corporation.

At this time I would like to hand up to the chairman and members of the subcommittee permit No. CP-468 which we obtained from the Virginia State Corporation Commission on June 17, 1957, for transportation of passengers within the Commonwealth of Virginia for special or charter party purposes.

Mr. Chairman, I would like to request that a copy of the act of the General Assembly of Virginia of March 31, 1960, and the copy of our permit No. CP-468 of June 17, 1957, from the Virginia State Corporation Commission be included at the end of my testimony as part of the printed hearings of today's proceeding.

Senator HART. Without objection, this will be done.

Mr. CHALK. When the new Virginia statute I have just referred to was first publicized, we at D.C. Transit made every effort possible to discourage the Virginia authorities from enacting it into law. All of the persons concerned admitted that the law was directed against D.C. Transit. The enactment into law of such a discriminatory bill directed at D.C. Transit is a far cry from the protests of fairness, good faith and faithful cooperation discussed in the House Judiciary Committee report.

The reality of the regulatory pattern of the proposed 3-man Compact Commission is that we of D.C. Transit have much to fear from a Commission where Virginia and Maryland have two out of three votes, in circumstances where 80 percent of the transportation is within the District of Columbia.

We have urged before and we urge again that the regulatory framework of the proposed Commission be expanded from three to five members, of which at least three should represent the District of Columbia. All of the persons with whom we have spoken about our problem in the District of Columbia have agreed that this change is a minimum change necessary to make the bill fair and equitable to the interests of the District of Columbia. The fact that the bill must go back to the Virginia and Maryland Legislatures does not militate against perfecting the bill for the minimum protection necessary for the interests of the District of Columbia.

Our objection to the 30-man composition of the Compact Commission is our first substantive objection to House Joint Resolution 402. We have one other substantive objection to House Joint Resolution 402. We sincerely believe that House Joint Resolution 402 will compound, confuse and complicate the regulatory pattern in the District of Columbia, particularly in view of the imminent enactment of S. 3193.

House Joint Resolution 402 has been billed as a simplification of the existing regulatory machinery. It has been argued by its proponents that it substitutes one regulatory agency for the four present regulatory agencies. It is argued by the proponents that the proposed Compact Commission would replace the regulatory functions of the PUC, the Maryland PSC, the Virginia State Corporation Commission and the ICC. This claim simply is not true.

It might well be possible to propose a Compact Commission which might replace the existing four agencies. House Joint Resolution 402 simply does not accomplish the job.

On this issue, D.C. Transit is supported by the testimony of the Public Utilities Commission at the House Judiciary Committee hearings on House Joint Resolution 402. Commissioner Kertz testified in the House hearings that one very important oversight in House Joint Resolution 402 is its failure to give the proposed Compact Commission the PUC's responsibility for making the so-called gasoline tax determination required by section 9 of our franchise. As Commissioner Kertz testified, this gas tax determination requires as much regulatory agency effort as a full-scale rate case would require. As Commissioner Kertz testified, House Joint Resolution 402 produces the curious result that the Compact Commission would regulate our rates with full-fledged rate hearings while, at the same time, the PUC would have to make a separate and independent determination of our gas tax liability under section 9 of our franchise with a full-fledged hearing on that issue. In its report on House Joint Resolution 402, the House Judiciary Committee admitted reluctantly on page 23 as follows:

"Since the compact does not give an affirmative grant of power to the Washington Metropolitan Area Transit Commission to levy, assess, or collect taxes, it is clear that the duties of the Public Utilities Commission of the District of Columbia with respect to the determination of the liability of D.C. Transit System, Inc., for the motor fuel tax, as specified in that company's franchise, is not transferred to the Washington Metropolitan Area Transit Commission."

The above-quoted excerpt from the House report points up the fact that the proposed Compact Commission is not and can never be a replacement for the PUC so long as the major responsibility of gas tax determination is left with the PUC.

Another reason the Compact Commission is not an adequate replacement for the PUC is because of the failure of House Joint Resolution 402 to give the Compact Commission authority over the conversion program contemplated by section 7 of our franchise. Thus, although the Compact Commisison will regulate our fares and routes and services, the PUC will continue to have the duty and obligation to pass upon the timing and propriety of our conversion program. The result will be that both the Compact Commission and the PUC will have to make separate and independent determinations upon separate and independent records and evidence on the subject of routes and schedules and types of service, including conversion.

Both of the failures of House Joint Resolution 402, which I have just mentioned, are matters in which the PUC concurs with my conclusions. If there is any doubt, I recommend that the subcommittee call as a witness Commissioner Kertz, or any other member of the Public Utilities Commission itself.

House Joint Resolution 402 does not eliminate the duplication and confusion of the present regulatory machinery. The Compact Commission does not replace the four existing agencies. On the contrary, it adds a fifth regulatory agency to the four agencies already existing.

If, moreover, S. 3193 is enacted into law as we expect it will be, the Compact Commission will not be the fifth regulatory agency added to four already existing agencies, but it will become the sixth added to the five then-existing agencies.

We at D.C. Transit are not unaware of the demands being made for a simplified regulatory machinery for the transportation problems of the local area. We believe that the problems will be substantially solved by the passage of S. 3193, and that the temporary Compact Commission contemplated by House Joint Resolution 402 will be unnecessary and completely obsolete.

Although we believe that no new regulatory machinery is necessary, we are, nevertheless, prepared to make an affirmative counter-proposal to House Joint Resolution 402 for dealing with the regulatory problems within the National Capital region.

Subsequent to the hearings before the joint committee on S. 3193, we prepared and submitted for the consideration of the joint committee a proposal which would have amended the Interstate Commerce Act itself to give to the Interstate Commerce Commission all of the jurisdiction now vested in the PUC over intrastate transportation of passengers within the District of Columbia, and, in addition, give to the ICC jurisdiction over the interstate transportation of persons within the National Capital region. By this simple device, if a single regulatory machinery is desired, such machinery could be established within the framework of the ICC and the Interstate Commerce Act.

By way of summary of our substantive objections to House Joint Resolution 402, I would like to point out that our substantive objections are primarily on two basic issues:

1. The composition of the proposed Commission should be expanded from three to five members, at least three of whom should represent the District of Columbia; and

2. The confusion and complications in regulatory agency responsibility should be eliminated by transferring to the Compact Commission the gas tax determination under section 9 of our franchise and the conversion determination under section 7 of our franchise; one other way to simplify the confusion and complications which will result from the proposals of House Joint Resolution 402 is for all of the regulatory jurisdiction for the National Capital region to be transferred to the Interstate Commerce Commission itself.

Although the above changes will make House Joint Resolution 402 acceptable to D.C. Transit, I want to emphasize again our view that no Compact Commission is needed in the light of the imminent passage of the regulatory machinery of S. 3193. In this connection, I would like to repeat and reemphasize that House Joint Resolution 402 was originally proposed as and is still described as a "temporary" Compact Commission to fill the period of time until the regulatory machinery of S. 3193 can become effective. When S. 3193 is passed, House Joint Resolution 402 will become obsolete, outdated, and undesirable.

I have given the broad policy reasons why generally we find House Joint Resolution 402 obsolete and undesirable in view of the imminent passage of S. 3193. In addition to the broad policy reasons, there are technical inconsistencies between S. 3193 and House Joint Resolution 402.

For example, the Compact Commission is supposed to specify the routes over which the carriers shall operate while at the same time the Agency of S. 3193 is supposed to prepare an overall transit development program showing what routes it believes most appropriate.

Another example is that the Compact Commission is supposed to promote its concept of an integrated system while at the same time the Agency of S. 3193 is supposed to include in its transit development program its proposal for "coordinated and efficient service" on an integrated basis.

Still another example is that the Compact Commission is supposed to require transit companies where necessary to provide such additional service as it deems necessary, while at the same time the Agency of S. 3193 is supposed to enter into contracts or agreements for the provision of such additional service as it deems necessary.

Still another example is that the Compact Commission is supposed to create and develop a consulting board while at the same time the Agency of S. 3193 is supposed to appoint and create its own advisory and coordinating committees.

Still another example is that the advisory board of the Compact Commission is supposed to prepare a study of transportation services while at the same time the Agency of S. 3193 is also supposed to be making studies and recommendations.

The overlap and confusion which will result from just the few comparisons I have already made is quite obvious and points up how unnecessary and undesirable House Joint Resolution 402 will be when S. 3193 is enacted into law.

In summation, we are opposed to House Joint Resolution 402 because it will be obsolete, unnecessary and even undesirable when S. 3193 is enacted into law. But, even apart from S. 3193, we are opposed to House Joint Resolution 402 because its three-member Commission is discriminatory in composition and because its jurisdictional provisions are not sufficient for it to replace the four existing agencies. If some further regulatory machinery is needed, over and above S. 3193, it should be achieved through transferring the present PUC functions to the ICC and not by creating a fifth separate agency on top

of and in addition to the four present agencies.

I do thank you gentlemen for your indulgence.

Senator HART. Mr. Chalk, the committee thanks you for making a statement concerning a matter which is very complicated and, I think, very difficult to understand.

May I inquire if Senator CARROLL has any questions?

Senator CARROLL. I may say to Mr. Chalk that I was not here at the opening of your hearing. I have read your statement. I shall read it again.

The thing that concerns me a little bit, and I have to be very brief, because we have another meeting coming up here, but I did want you to know we shall certainly consider everything you have said, this question of the three members—do you feel that the District of Columbia just having one member would be injurious to the position of your transit company?

Mr. CHALK. I feel we would be in great jeopardy with just one member because of the prejudicial interests of the other members which have been demonstrated, such as this bill of Virginia.

Senator CARROLL. Have you ever submitted in the hearings in the House a financial statement of what your investment is, what your return is?

Mr. CHALK. It is generally known; it is on public record, sir, with the Public Utilities Commission.

Senator CARROLL. The reason I mentioned that is this: You are certainly permitted a fair rate of return as a public utility. Even though you are limited to a three-man Commission, I can understand your apprehension, but they could do nothing that would injure your rate of return from your company, because it would be confiscatory and would seem to be——

Mr. CHALK. Things of that nature have happened.

Senator CARROLL. Well, I do not think that legally they can do that, and I think it would not be the purpose of this legislation. The real problem is, how do we solve this mass transportation problem? You have been very helpful by your suggestion of putting it into the ICC. But the difficulty is, the backlog of cases is so great, I do not know how you could expedite, actually, the solution of this difficult problem by going into ICC. Nevertheless, it is something to look into.

I thought I ought to mention for the record that even though there is a three-man Commission, and I am inclined to agree with you that where you have a Virginia and Maryland and one from the District of Columbia, and that is where the great capital investment is, and this is where the great mass transportation problem is centered and must be solved, and they could both, of course, in the majority against the District of Columbia, they cannot interfere, legally and constitutionally with your rate of return in my opinion.

Mr. CHALK. Senator, this bill that was pasesd in Virginia has nothing to do with rate of return. Yet it has adversely affected our earning capacity.

Senator CARROLL. Well, then, if you should come under this compact, if that is true and we bind you by Congress approving this compact and you are substantially affected, I do not think you would have the slightest difficulty coming before the Congress or before any ratemaking body—if you had said that this body would now fix your rates and your fares—did I understand you to say that?

Mr. CHALK. That is correct, sir.

Senator CARROLL. If it is confiscatory, they will not get away with it, and they should answer for that.

Mr. CHALK. You mean they should not get away with it.

Senator CARROLL. I think no board will sustain, because Congress approves the compact, we are not going to put into the hands of Maryland or Virginia or the Commissioner of the District of Columbia, where we know we have to have a well-ordered transit system here and your investment must run into the millions of dollars—you say this is all a matter of public record. What is the capital investment in round figures of the transit system?

Mr. CHALK. Upward of—we have invested in this company—recently, we purchased $13 million worth of new equipment. The original purchase price was $13,500,000. I would say upward of $20 million-odd have been involved in this company.

Senator CARROLL. So in round figures, just so we have an investment here of $25 million by a corporation, a private corporation, that is managing our transit system in the District of Columbia. Now, to place that within the power of a commissioner from Virginia or Maryland—my point is, they could not impair that. You are entitled to a reasonable rate of return.

Mr. CHALK. May I suggest, sir, that if Maryland or Virginia acted unfairly as you say it is possible they would do, this unfair act on the part of Virginia would result in higher fares for the people of the District of Columbia. Surely, we shall get our rate of return, but you are hurting the people of the District of Columbia by letting Virginia and Maryland hurt the District transit system. There is a point you should consider.

Senator CARROLL. I think that is a good point, but again, I cannot understand why they would deliberately raise the fare to the injury of their people here. You mean to the advantage of the people in Virginia?

Mr. CHALK. I gave an example of this bill, which established grandfather rights for everybody in Virginia except those who were not Virginia corporations. And this is deliberately at us, because we are the only ones who were a District of Columbia corporation. It was directed right at our hearts and that is not favorable.

Senator CARROLL. Is that the crux of the problem, that this is really a spillover of people—I am speaking of people living in the District of Columbia and Virginia and Maryland whose duties are principally in the District of Columbia, and I just cannot conceive why they would be—when you talk about discrimination on fare, what we are really trying to do is get these people to work and get them home again, and on a transportation system, as cheaply as we can consistent with your fair rate of return.

Mr. CHALK. Senator, S. 3193 would take this entire picture into consideration. It is just about to come up for enactment. I am sure that the moment that is enacted, this entire bill and its inadequacies will be eliminated or should be eliminated.

Senator CARROLL. I am not familiar with the legislative history of S. 3193. How long has that been pending?

Mr. CHALK. This has been pending for 5 years, sir. This is the mass transit survey. Hearings were completed before Senator BIBLE weeks ago. The recommendations and the bill have been introduced by the House and the Senate, and I think they have been reported out favorably and are due for enactment at any moment.

Senator CARROLL. If we should approve this resolution——

Mr. CHALK. You came in after I mentioned that, and that is why I repeat it.

Senator CARROLL. If we should approve this resolution, which involves the Compact Commission, that would not later on, if it becomes obsolete by virtue of S. 3193, we would still be taking a step forward, would we not?

Mr. CHALK. No; you would have two commissions then, one of which is wholly unnecessary, and one probably in conflict—it is possible—with the views of the other commission. You would be creating a bit of a chaotic condition, in my opinion. It was suggested originally as a temporary expedient until stage 2, which is S. 3193, came into existence. This was the original concept. They were taking three stages: First, a temporary stage which was the tristate compact; second, a stage when the mass transit survey was created and has been created, and long hearings—and this is the result of all the hearings right in front of me—have been completed. S. 3193 is the result of that.

Now, the temporary nature has already expired.

Senator CARROLL. I thank you, Mr. Chairman.

Senator KEATING. May I ask one question?

Senator HART. Yes, Senator KEATING.

Senator KEATING. Does not S. 3193 contemplate a planning commission, not a regulatory commission?

Mr. CHALK. No; they are ultimately regulatory. They are given quite extensive powers.

Senator KEATING. In that bill?

Mr. CHALK. In that bill.

Senator KEATING. Just one question with reference to another comment you made about the possibility of passing the resolution resulting in higher fares for the District people at the expense——

Mr. CHALK. Because of any capriciousness that might result from the others.

Senator KEATING. It is not quite possible that an integrated system would do away with a great deal of duplication and overlapping and permit lower fares all around, rather than higher fares?

Mr. CHALK. This is contemplated under 3193.

Senator KEATING. Is it not possible under the present compact?

Mr. CHALK. I do not believe it is, sir; no, sir. Commissioner Kertz testified to that specific question.

Senator HART. Is there anything further?

Mr. CHALK. Incidentally, Senator, you inquired as to the majority in Maryland, whether it was unanimous or not. It passed by a majority of one in the Maryland Senate, which indicated a rather confused state within that area.

Senator CARROLL. Well, this is a confused situation. When you have a District of Columbia under the Federal Government, you have portions of Virginia and Maryland—I happen to live in Maryland, myself, but I never think of it as Maryland, we are so close to the District of Columbia line. We are fighting transportation all the time, and it is these dividing lines, which are legal and existing, but in another sense, very unrealistic. No sensible Commissioner from Virginia or Maryland or, I should hope, from the District of Columbia, would do anything but work for an integrated system, as the able Senator from New York has said, to reduce the fares to get better service for the people, to give you a chance to expand and convert, and give you a fair rate of return, and I hope not interfere too much with your operation. Because the decisions largely have to be made by your company in connection with this regulatory body.

Mr. CHALK. If it had built-in safeguards such as three members for the District as against two of the other, then I think it would have some element of fairness.

Senator CARROLL. May I say, there is another safeguard? We local councilmen will be seated, from time to time, watching the situation.

Senator HART. On that close vote in the Maryland Legislature—was the question of 80 percent of the volume of transit being represented by only a third, a factor in that vote?

Mr. CHALK. No, sir, that was not the issue.

Senator HART. Mr. Chalk, thank you very much.

Mr. CHALK. Thank you, Senator.

EXHIBIT 2

(Memorandum re unconstitutionality and legal inadequacy of House Joint Resolution 402, prepared by D.C. Transit System, Inc., before Subcommittee No. 3 of the Committee on the Judiciary, House of Representatives)

House Joint Resolution 402 is opposed by D.C. Transit System, Inc., both on substantive grounds and because, in its present form, it is both unconstitutional and legally inadequate. The substantive matters have been dealt with separately at the hearings on House Joint Resolution 402. This memorandum is limited to the constitutional and other legal issues raised by House Joint Resolution 402.

I

House Joint Resolution 402 is unconstitutional because it would be an impairment of D.C. Transit's franchise

Public Law 757, 84th Congress, 2d session (70 Stat. 598) (hereinafter sometimes referred to as D.C. Transit's "franchise"), granted to the D.C. Transit System, Inc., an exclusive franchise to operate a mass transportation system of passengers for hire within the District of Columbia and between the District and points within the Washington metropolitan area. This franchise is a binding, contractual obligation between Congress and D.C. Transit, the impairment of which by legislative act would be unconstitutional. *Grand Trunk Western Railway Company* v. *City of South Bend* (227 U.S. 544, 57 L. Ed. 633); *Southern Pacific Company* v. *City of Portland* (177 Fed. 958 (D. Ore. 1910)); *Perry* v. *United States* (294 U.S. 330, 79 L. Ed. 912); and *Hepburn* v. *Griswold* (75 U.S. 603, 19 L. Ed. 513, 526). These and other cases too numerous to include here clearly establish the limitation on the authority of Congress to impair the obligation of its contracts.

It is clear that House Joint Resolution 402, if adopted and implemented, would result in an impairment of the rights of D.C. Transit under its franchise.

House Joint Resolution 402 is part of a 3-stage program of the so-called mass transportation survey and plan for Washington which is presently the subject of extensive hearings and study by the Joint Committee on Washington Metropolitan Problems.

The mass transportation plan proposes three separate development stages. For the first stage, the plan calls for the enactment and approval by Congress of a compact creating a tristate regulatory commission consisting of representatives of the States of Maryland and Virginia and of the District of Columbia to exercise complete regulatory jurisdiction over mass transportation in the Washington Metropolitan Area. The commission proposed by the plan is the very same one which is involved in House Joint Resolution 402. Under the plan, this compact commission would be only a temporary stage as a first step in a 3-stage series.

As a second stage, the mass transportation plan calls for the creation of a Federal corporation which would be empowered to acquire and develop the facilities necessary to the accomplishment of the plan's objectives. Under the plan, this Federal corporation would also be only a temporary stage as a second step in a 3-stage series.

As the third and final stage, the plan contemplates the enactment by Maryland, Virginia, and the Congress, on behalf of the District of Columbia, of a proprietary agency by way of interstate compact which would take over as successor to both the regulatory agency and the Federal corporation. Under the plan, this proprietary agency would have the double obligation of owning and operating the major part of the transportation facilities, and, at the same time, of serving as the administrative agency which regulated the operations of those private companies which were still operating related feeder service.

House Joint Resolution 402, if adopted, would be unconstitutional as an impairment of the contract between Congress and D.C. Transit evidenced by D.C. Transit's franchise because it would represent a substantial modification of important substantive rights of D.C. Transit.

Among the substantive changes which would be made by the proposed compact of stage 1 is the jurisdiction granted the new compact commission over questions relating to the persons or companies which control transit companies and over questions relating to the transfer or other disposition of such controlling interests. This substantive provision is not present in any of the regulatory statutes of the District of Columbia which regulate D.C. Transit and under which D.C. Transit agreed to accept the franchise.

Another significant substantive change would be made by the proposed compact of stage 1 would be the change in the substantive rights presently governed by existing administrative procedures. For example, under the Interstate Commerce Act, carriers within the District of Columbia can obtain and have obtained temporary authority which, once granted, can extend so long as there is pending an application for the equivalent permanent authority which has not been finally disposed of. Because it sometimes takes years before such permanent authority rights are finally disposed of, temporary authority, once obtained, would be automatically extended under such circumstances for several years. We of D.C. Transit have just such a situation in our contract carrier authority granted to us by the Interstate Commerce Commission for our Government contract service. Under the proposed compact of stage 1, our substantive rights under the Interstate Commerce Act would be seriously and adversely affected.

Another substantial modification of important substantive rights of D.C. Transit would be in the manner and form of the regulation of D.C. Transit under the proposed compact of stage 1. Although section 12 of D.C. Transit's franchise permits the transfer of the jurisdiction of the District of Columbia Public Utilities Commission to some other agency, the franchise does not permit any transfer of the jurisdiction of the Interstate Commerce Commission to any other agency and particularly to a non-Federal agency such as the tristate compact commission contemplated by stage 1 of the plan. If D.C. Transit were to be made subject to such regulatory authority on such terms and conditions, such a change in substance and form of regulation would constitute a breach of the franchise contract and a deprivation of rights to the extent D.C. Transit did not receive precisely the same substantive rights as it has had under the Itnerstate Commerce Act and the rules and regulations thereunder. To such extent, the proposed compact would be unconstitutional.

Another substantive right of D.C. Transit which would be affected by the proposed compact of stage 1 would be the inequitable and unfavorable regulatory atmosphere under which D.C. Transit would be forced to operate, an atmosphere under which D.C. Transit would never have accepted the franchise on August 15, 1956, when it accepted the more equitable and favorable atmosphere of the existing regulatory authorities.

The proposed new compact commission of stage 1 would consist of three commissioners, each a political appointment from each of the three jurisdictions participating in the compact. Thus, the commissioner from Maryland would be appointed by the Governor of the State of Maryland and would owe his allegiance and interests to the Maryland Governor. The commissioner from Virginia would be appointed by the Governor of the Commonwealth of Virginia and would owe his allegiance and interests to the Virginia Governor. Out of the three-man agency, only one would be interested in the welfare of the District of Columbia. Notwithstanding the fact that the transit operations within the District of Columbia constitute the greatest proportion of all metropolitan area transit operations in the three States, the District of Columbia would only be given one commissioner under the proposed compact. Thus the District of Columbia transit companies, which account for approximately 80 percent of the gross transit revenues of the Washington metropolitan area, would be subject to the rule of a commission where two out of the three commissioners would have a loyalty to and a preferred interest in the local suburban rural transit companies of their respective States. Such arrangement would be discriminatory to the people of the District of Columbia and to franchised transit company of the District of Columbia, D.C. Transit.

The potential damage to the people and transit companies of the District of Columbia from a three-man commission is obvious when it is recognized that the commissioners from Maryland and Virginia would be more interested in the suburgan interests of their respective States than in the transit operations within the District of Columbia. It is conceivable and quite probable that the surburban interests of Maryland and Virginia would vote together in matters involving a controversy between the interests of the intra-District operations vis-a-vis the suburban operations. Such result would necessarily follow from the fact that there is one transit company (D.C. Transit) which has virtually an exclusive franchise within the District and which is in competition with numerous other local suburban rural carriers in Maryland and Virginia. Thus, D.C. Transit accounts for over 78 percent of the transit revenues within the entire Washington metropolitan area. There are numerous matters in which the interests of D.C. Transit conflict with those of the suburban carriers in the rural areas.

The concept of one transit commission for the entire area would only be a feasible concept if all areawide transit operations were performed by one areawide transit company. Areawide regulation must necessarily be concurrent with areawide ownership and integration of existing companies.

Still another defect of the proposed compact commission of stage 1 is in the failure to resolve a conflict in jurisdiction between the Public Utilities Commission of the District of Columbia and the proposed compact commission of stage 1 over the motor vehicle fuel tax certification provided for by section 9 of D.C. Transit's franchise. Although the new proposed commission is claimed to eliminate duplication of jurisdiction over transit operations, the result in the fuel tax matter is a serious, wasteful, and perhaps damaging duplication. The new proposed compact does not change the matter of fuel tax certification required of the Public Utilities Commission annually by section 9 of the franchise. But this certification requires independent rate-of-return determinations which would duplicate or conflict with those required separately of the proposed compact commission.

For all the above reasons, the new compact of stage 1, if adopted, would represent an impairment of the contract rights agreed upon between Congress and D.C. Transit in the franchise, as proposed, and it would constitute a deprivation of D.C. Transit rights without due process of law. The proposed new compact would, accordingly, be unconstitutional. *Grand Trunk Western*

Railway Company v. *City of South Bend, supra; Southern Pacific Company* v. *City of Portland, supra; Perry* v. *United States, supra;* and *Hepburn* v. *Griswold, supra.*

II

House Joint Resolution 402 is unconstitutional because it would be an improper delegation of congressional power

Quite apart from the impairment of contract issue, House Joint Resolution 402 would, if adopted, be unconstitutional for other very serious reasons. If adopted, it would be unconstitutional as an improper delegation of authority over intra-District transportation to a non-Federal compact commission, particularly in view of the special favored position of the Commonwealth of Virginia, which is given control over intra-District transportation while refusing to concede jurisdiction over its own intrastate transportation.

Under the proposed compact commission of stage 1 and the proposed compact proprietary agency of stage 3, Virginia would be highly favored over Maryland and the District of Columbia, at the expense mostly of the District of Columbia.

The basis for congressional authority over the District of Columbia is found in U.S. Constitution, article I, section 8, clause 17 which provides that Congress shall have power—

"To exercise exclusive Legislation in all Cases whatsoever, over such District (not exceeding ten Miles square) as may, by Cession of particular States, and the acceptance of Congress, become the Seat of the Government of the United States."

The effect of the above-quoted clause is to lodge sovereignty over the District in the United States and to vest exclusive legislative power in the Congress, *Metropolitan Railroad Co.* v. *District of Columbia* (10 U.S.C. 19, 132 U.S. 1, 33 L. Ed. 231). The construction of the term "exclusive" as used in the clause has occasioned sharp differences of opinion concerning the extent to which Congress may delegate its legislative power over the District. The opposing lines are perhaps most clearly drawn in the arguments which attend the perennial proposals for home rule legislation. The printed records of joint hearings before the subcommittee on home rule and reorganization of the House and Senate Committees on the District of Columbia, 80th Congress, 2d session, and before the Committee on the District of Columbia of the House, 86th Congress, 1st session, supply an extensive exposition of the pros and cons involved. To the extent that they address themselves to the legal question of the extent of Congress' authority to delegate its legislative power over the District of Columbia, those records are helpful here. They do not, however, involve the question of the constitutionality of legislation providing for the concurrent jurisdiction of three States over the internal affairs of the District of Columbia and to that extent the problem presented by the mass transportation plan goes far beyond the home rule issue and is very unique unto itself.

Since the early case of *Cohen* v. *Virginia* (19 U.S. (6 Wheat.) 262 (1821)), the first significant decision in which the U.S. Supreme Court dealt with the question whether Congress may delegate its legislative power over the District, many such decisions have been recorded. Without exception, they relate to instances of the exercise by subordinate governmental bodies within the District of powers delegated to them by the Congress. These cases include: *Washington* v. *Eaton* (29 Fed. Cas. 345, No. 17228 (C.C.D.C. 1833)); *Grant* v. *Cooke* (7 D.C. 165 (1871)); *District of Columbia* v. *Saville* (8 D.C. (1 MacArth.) 581 (1874)); *United States* v. *May* (9 D.C. (2 MacArth.) 512 (1876)); *Roach* v. *Van Riswick* (11 D.C. (1 MacArth. & M.) 171 (1879)); *Cooper* v. *District of Columbia* (11 D.C. (1 MacArth. & M.) 250 (1880)); *District of Columbia* v. *Waggaman* (15 D.C. (4 Mackey) 328 (1885)); *Smith* v. *Olcott* (19 App. D.C. 61 (1901)); *Coughlin* v. *District of Columbia* (25 App. D.C. 251 (1905)); *United States Ex rel. Daly* v. *MacFarland* (28 App. D.C. 552 (1907)); *Johnson* v. *District of Columbia* (30 App. D.C. 520 (1908)); *United States* v. *Cella* (37 App. D.C. 433 (1911)); *Welch* v. *Cook* (97 U.S. 541 (1878)); *Stoutenburgh* v. *Hennick* (129 U.S. 141 (1889)); *Metropolitan Railroad Co.* v. *District of Columbia* (132 U.S. 1 (1889)); and *District of Columbia* v. *John R. Thompson Company* (346 U.S. 100 (1953)). These cases represent litigation spanning a period of more than 130 years. No single one of the above-mentioned cases provides a definitive formula for measuring the extent to which Congress may delegate its legislative power over the District. Taken together, these cases raise grave doubt as to the constitutionality of home rule legislation. Such legislation would commit power over internal affairs of the District to the people most directly concerned, the residents of the District. But if the legality of entrusting such matters to local control is questionable, it is even more doubtful that Congress may constitutionally share its jurisdiction over the District of Columbia with the States of Maryland and Virginia, particularly where, as will be shown, Virginia is favored even over Maryland.

The framers of the Constitution intended that power over the seat of the National Government should be reserved exclusively for exercise by that Government. They intended that such control be denied any one State or any combination of States other than the National Government itself. In effect, exclusive power over the seat of Government was reserved to all the States for exercise by all of them through their representatives in Congress. Indicative of their intent are the following remarks of James Madison in the Federalist Papers No. 43:

"The indispensable necessity of complete authority at the seat of government, carries its own evidence with it. It is a power exercised by every legislature of the Union, I might say of the world, by virtue of its general supremacy. Without it, not only the public authority might be insulted and its proceedings interrupted with impunity; but a dependence of the members of the General Government on the state comprehending the seat of government, for protection in the exercise of their duty, might bring on the national councils an imputation or influence, equally dishonorable to the Government and dissatisfactory to the other members of the confederacy. This consideration has the more weight, as the gradual accumulation of public improvements at the stationary residence of the government would be both too great a public pledge to be left in the hands of a single State, and would create so many obstacles to a removal of the Government, as still further to abridge its necessary independence."

Story, in his "Commentaries on the Constitution of the United States," fourth edition, 1873, volume II, section 1229, supplies us with evidence of the conditions which motivated the grant of exclusive power over the District:

"In the enumeration of the powers of Congress, which is made in the eighth section of the first article, we find that of exercising exclusive legislation over such District as shall become the seat of government. This power, like all others which are specified, is conferred on Congress, as the legislature of the Union; for, strip them of that character, and they would not possess it. In no other character can it be exercised. In legislating for the District they necessarily preserve the character of the legislature of the Union; for it is in that character alone, that the Constitution confers on them this power of exclusive legislation."

And at sections 1224 and 1226, in language equally applicable to the District clause. Story refers to the power of Congress over other areas ceded to the National Government.

"Section 1224: The other part of the power, giving exclusive legislation over places ceded for the erection of forts, magazines, etc., seems still more necessary for the public convenience and safety. The public money expended on such places, and the public property deposited in them, and the nature of the military duties which may be required there, all demand that they should be exempted from State authority. In truth, it would be wholly improper, that places, on which the security of the entire Nation may depend, should be subjected to the control of any member of it.

"Section 1226. The power of Congress to exercise exclusive jurisdiction over these ceded places is conferred on that body, as the legislature of the Union; and it cannot be exercised in any other character."

Certainly the District of Columbia, no less than the other "ceded places" is a District upon which the security of the entire Union does depend. Its importance in this respect has increased with the passage of time. The necessity for exclusive Federal control over the District of Columbia is as compelling today as it was when the Constitution was written. From these authorities, it is manifest that the Founding Fathers intended that the control of Congress over the internal affairs of the District be exclusive and that it not be concurrent with or subject to the States of Virginia and Maryland.

In *District of Columbia* v. *John R. Thompson Co., supra,* the Supreme Court of the United States described the term "exclusive" as contained in the District clause, as follows:

"But it is clear from the history of the provision that the word 'exclusive' was employed to eliminate any possibility that the legislative power of Congress over the District was to be concurrent with that of the ceding States. See the Federalist, No. 43; Elliot's Debates (2d ed. 1876), pages 432, 433; 2 Story, Commentaries on the Constitution of the United States (4th ed. 1873), section 1218."

In *O'Donoghue* v. *United States* (289 U.S. 516, 77 L. Ed. 1356), 53 Supreme Court 740, the Supreme Court commented on the nature of the District of Columbia and the necessity for national control over its internal affairs as follows:

"How different are the status and characteristics of the District of Columbia. The pertinent clause of the Constitution (art. 1, sec. 8, cl. 17) confers the power on Congress to 'exercise exclusive legislation * * * over such district * * * as may * * * become the seat of the Government of the United States.' These are the words of permanent governmental power.

"Over this District Congress possesses 'the combined powers of a general and of a State government in all cases where legislation is possible.' *Stoutenburgh* v. *Hennick* (129 U.S. 141, 147, 32 L. Ed. 637, 638, 9 S. Ct. 256). The power conferred by article 1, section 8, clause 17, is plenary; but it does not exclude, in respect of the District, the exercise by Congress of other appropriate powers conferred upon that body by the Constitution, or authorize a denial to the inhabitants of any constitutional guaranty not plainly inapplicable. Circuit Judge Taft, afterwards Chief Justice of this court, speaking for himself, Judge Lurton, afterwards as associate justice of this court, and Judge Hammond, in *Grether* v. *Wright* ((C.C.A. 6th) 75

Fed. 742, 756, 757), after reciting the foregoing clause and the organization of the District under it, said:

"'It was meet that so powerful a sovereignty should have a local habitation the character of which it might absolutely control, and the government of which it should not share with the States in whose territory it exercised but a limited sovereignty, supreme, it is true, in cases where it could be exercised at all, but much restricted in the field of its operation. The object of the grant of exclusive legislation over the District was, therefore, national in the highest sense, and the city organized under the grant became the city, not of a State, not of a district, but of a Nation. In the same article which granted the powers of exclusive legislation over its seat of government are conferred all the other great powers which make the Nation, including the power to borrow money on the credit of the United States. He would be a strict constructionist, indeed, who should deny to Congress the exercise of this latter power in furtherance of that of organizing and maintaining a proper local government at the seat of government. Each is for a national purpose, and the one may be used in aid of the other.'"

In view of these authorities, Congress relationship to the District of Columbia could be appropriately described as that of a trustee for the 50 States of the Union. Each of these States has an interest in the management of the affairs of the District. Their rights in this respect are guaranteed them by the District clause of the Constitution, and it would subvert the design of the Constitution if two of the States, Maryland and Virginia, were to be accorded favored positions of control over internal District of Columbia affairs.

The interstate compact features of stages one and three of the proposed mass transportation plan are without precedent in the annals of compact legislation. Historically, the compact device has been used chiefly for the settlement of boundary disputes between States with some extension of its use in recent years for the control and development of interstate rivers and harbor facilities. For the most part, existing compacts are nonregulatory and nonproprietary in nature. None of them involve the degree of regulation over the internal commerce of a member State contemplated by the compact proposals of the mass transportation plan. Had such regulation been included in any such compact in the manner proposed in the plan, it is safe to assume the respective compacts would never have materialized. Just as the Founding Fathers were anxious in the Constitution to preserve the independence of the District from control by States outside the District, so also do the States jealously and selfishly guard and fight for their own respective sovereignties.

The present mass transportation plan, itself, presents a glaring example of the jealous, selfish attitude on the part of the States. The plan creates a metropolitan district and purports to be areawide in the application of its transportation development, and regulatory programs. Actually, the regulatory phases of the plan are not areawide in scope. The Virginia portion of the metropolitan district is specifically exempted from the regulatory provisions of the plan. Under its State constitution, Virginia feels that it is unable to submit its internal traffic to external control. It is nonetheless interested in acquiring a share in the regulation of the critical and important internal traffic within the District of Columbia. Such an arrangement is disadvantageous for and discriminatory against the people of the District of Columbia.

In the District of Columbia, the authority of Congress is not merely paramount. It is exclusive. It is authority held in trust for the 50 States of the Union. As the cases cited above have indicated, the authority of particular States, such as Maryland and Virginia, over the District of Columbia may not be enlarged at the expense of the remaining 48.

The Congress should be alert to the precedent embodied in the interstate compact proposals of House Joint Resolution 402. Today, tristate control of mass transit is proposed. Tomorrow may see proposals for tristate administration of all local government functions. House Joint Resolution 402 is a step in that direction and subverts the intent and design of the Founding Fathers as set forth in the Constitution. The crux of any metropolitan problem which may exist in this area is the National Capital. Congress must preserve exclusive control over the District of Columbia in order to provide all governmental functions necessary to administer the District for the benefit of all of the 50 States. Such authority constitutionally cannot and should not be delegated to a tristate compact agency, particularly where one State (Virginia) gains a preferential and discriminatory position by refusing to yield its own sovereignty to the tristate agency.

III

The suspension provisions of section 3 of House Joint Resolution 402 are so vague and general that they fail to meet the minimum requirements for precise specification

In addition to being unconstitutional, House Joint Resolution 402 is legally inadequate because those of its provisions which are supposed to suspend existing statutes are so vague and general that they fail to meet the minimum requirements for precise specification.

Section 3 of House Joint Resolution 402 provides, in part, as follows:

"Section 3. [U]pon the effective date of the compact and so long thereafter as the compact remains effective, the applicability of the laws of the United States, and the rules, regulations, and orders promulgated thereunder, relating to or affecting transportation under the compact and to the persons engaged therein * * * is suspended, except as otherwise specified in the compact, to the extent that such laws, rules, regulations, and orders are inconsistent with or in duplication of the provisions of the compact: * * *."

Thus, the language proposal for suspension of the numerous complicated existing statutes is merely a general, vague catchall provision that fails to specify precisely what is being suspended, how, where, or when.

It is well settled that the inclusion of general language of suspension in legislation suspends no more than what would be suspended or repealed by implication if such legislation were enacted omitting such general language of suspension, *Great Northern Ry. Co.* v. *U.S.* (155 Fed. 945 (8th Cir. 1907), aff'd 208 U.S. 452 (1908)); *Hoague-Sprague Corporation* v. *Frank C. Meyer Co.* (31 F. 2d 583 (D.C. N.Y. 1929)). Similarly, the proposed language of section 3 of House Joint Resolution 402 suspends only such statutes as would be repealed by implication even in the absence of section 3.

The important consideration which Congress should bear in mind is that the courts do not favor repeal by implication such as is attempted by House Joint Resolution 402. *U.S.* v. *Greathouse* (166 U.S. 601, 41 L. Ed. 1130 (1897)); *Frost* v. *Wenie* (157 U.S. 46, 39 L. Ed. 614 (1895)); *U.S.* v. *Healey* (160 U.S. 136, 40 L. Ed. 369 (1895)). As the above-cited cases indicate, the courts make every effort possible to avoid repeal by implication.

Since section 3 of House Joint Resolution 402 suspends only such statutes as would be repealed by implication if the resolution were adopted without section 3, and since the courts do not favor repeal by implication, adoption of House Joint Resolution 402 in its present form, would almost certainly run afoul of the minimum requirements established by the courts. In such case, House Joint Resolution 402 would undoubtedly be held to have suspended none of the more complicated and technical statutes. The result owuld be a never-ending legal battle as to which statutes were or were not suspended and, as a result, as to the constitutionality of House Joint Resolution 402.

IV

Conclusion

For the reasons stated above in points I, II, and III, it is respectfully submitted that House Joint Resolution 402 is legally inadequate and clearly unconstitutional.

Mr. ROBERTSON. Mr. President, I have only a word or two to say.

For 4 years this problem has been studied by three different commissions. We appropriated $400,000 for the National Capital Planning Commission, for the National Capital Regional Planning Council, for the Commission of the District of Columbia, Maryland, and Virginia. They all united on the bill. The distinguished Senator from Oregon cosponsored the bill with me. It was passed unanimously by the House. It was reported unanimously by the Senate Committee on the Judiciary.

The interests of 2 million residents around the District of Columbia are involved. Unless we can work out something with regard to automobile traffic, because of the inadequacy of connecting bus service, ingress and egress from the District of Columbia will be simply impossible in less than 5 years. It now takes an hour, when it should take only 20 minutes, to come to the District from Virginia or Maryland.

The amendment was fully considered by these agencies. They turned it down. It was fully considered by the House. The House turned it down.

The interests of the District of Columbia would be fully protected by the three men. The one from the District of Columbia would have a veto power over anything which applied only to the District of Columbia.

The Senator talks about 80 percent of the traffic, but the District of Columbia has 700,000 people, while there are 2 million or more in the suburbs. These are the ones about whom we should be concerned.

There is nothing in the bill which would do any injustice to the Capital Transit Co. To add the amendment as the Senator admitted, will kill the bill.

I hope the amendment will be defeated and that we shall then pass the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Oregon.

Mr. MORSE. Mr. President, I suggest the absence of a quorum.

Mr. JOHNSON of Texas. Mr. President, will the Senator withhold his suggestion?

Mr. MORSE. Mr. President, I withhold my suggestion.

ORDER FOR RECESS UNTIL 12 O'CLOCK NOON TODAY

Mr. JOHNSON of Texas. Mr. President, there is some executive business to be considered. I had anticipated we would consider the sine die adjournment resolution tonight. We have the compact bill and two or three others to consider. The House is going to be in session today. I wonder if we could not come in at noon and continue this discussion, as well as handle the executive calendar and pass some House bills which came over yesterday, and then look forward to passing the sine die adjournment resolution.

If that is agreeable to the Members of the Senate, I ask unanimous consent that when the Senate concludes its business, it stand in recess until 12 o'clock noon.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

RETIRED PAY RECOMPUTATION ACT OF 1960

Mr. BRIDGES. Mr. President, it is now apparent that this postconvention session of the 86th Congress will soon adjourn. I had hoped that action could have been taken on a number of matters which now will have to await the 87th Congress.

Nevertheless, I would not want us to adjourn unless some note was taken—and even some action still taken at this late date—on a measure which is worth the attention of this body.

This legislation deals with the retirement pay of many veterans who have served their country well.

The bill to which I refer is H.R. 11318, the Retired Pay Recomputation Act of 1960, which passed the House last May 12.

This measure was recommended by President Eisenhower last January.

He again urged its enactment when the Congress reconvened earlier this month.

The bill relates to the so-called 1958 Military Pay Career Incentive Act. A cost-of-living pay increase of 6 percent was approved at that time, but the 100-year traditional tie-in of retired pay to current base pay was not provided.

The bill now recommended by the President would, to a large extent, correct some of the inequities in cases where men who retired 2 years ago actually receive less pay than those who are retiring today.

The 1958 act was to serve as an incentive for officers to make the service a career. It did so, but at the same time an arbitrary date of June 1, 1958, was set for the incentive period to begin.

Thus, some officers who retired before that date, today receive less retirement pay than do officers—of the same rank and service—who retired after June 1, 1958.

The President has asked that this be corrected.

It is still hoped that this bill, H.R. 11318, will receive consideration at this session so the Senate can pass it. In doing so, as Secretary of Defense Gates has said, and I quote:

> We will be keeping faith with those who kept faith with their country, particularly during the dark and dangerous days of World War II, and to all who have given the best years of their lives in loyal, honorable service in our armed services.

Mr. President, I hope that the Congress will follow the recommendations of the President and Secretary of Defense.

If we are unable to obtain action on this bill in the closing hours of this session, I am hopeful that prompt attention can be given this desirable measure in the early weeks of the 87th Congress.

In the meantime, the Senate Armed Services Committee has approved a long-needed study of the entire armed services retirement system.

I am in complete accord with such an undertaking. I am sure that this study will go a long way toward eliminating any of the inequities that exist in present law. The morale factor of our armed services is important, and I believe this bill, as passed by the House, should become law as soon as possible in order that all of our retired military personnel are on the same pay basis.

THE PENNSYLVANIA RAILROAD STRIKE VERSUS DEMOCRACY

Mr. BRIDGES. Mr. President, critics of American democracy frequently level the charge that we show a marked incapacity to manage our own affairs.

Enemies of democracy, of course, have long been mouthing that our system carries the seeds of its own failure and eventually will wear out and fall apart.

Now, the best refutation of such bilge is performance: the day in, day out management of our affairs—private, corporate, and governmental.

History attests to the fact that our American system of private enterprise has produced the greatest abundance of any civilization in recorded time; our standard of living is the envy of the world, and we are still on the march.

Mr. President, this has all been brought about because all of us have done, and are doing, our part to make the American system work. It has come about because American citizenry recognizes our mutuality of interest, because we have played the game according to the rules.

One of the basic elements of the American system is fair play. And this accords to the other fellow his rights, and treats with him accordingly. Inherent in this great American system is responsibility: individual responsibility, group responsibility, and responsibility of employee and employer.

In view of these few, basic philosophical observations, I am somewhat dismayed to learn from the public print and other media of information, that one of the major railroads of the country, a carrier whose history parallels the growth and development of our Nation, is threatened to be struck at midnight Wednesday, August 31.

Mr. President, I would say this is not playing the game, according to our American scheme of things. We have a stable and prosperous national pastime—baseball—because we learned a long time ago that the umpire must be boss—he must run the game, he calls the play, and the players abide by his ruling. Otherwise every rhubarb on the diamond would invite a free-for-all and no game could possibly be completed.

In the case of the rail dispute at hand, the umpire has called the play and made his decision. Not only once but twice. The President appointed an Emergency Fact Finding Board to inquire into this matter and its rulings were accepted by management—although many of the recommendations would impose heavy additional costs on the railroad—but the union, because it could not have its own way 100 percent, will not go along. There are 24 brotherhoods on the Pennsylvania Railroad. It is my understanding this dispute involves only 2 of those 24 unions, affecting 20,000 employees out of a total of 75,000.

This is contrary to the American pattern and to the traditional way of settling rail disputes in this country. Implicit in the thinking that went into the Railway Labor Act was the understanding on the part of management and labor that the way to settle differences was through responsible negotiations. It has become the tradition in the railroad industry that the trains are kept running while disagreements are continuously discussed, and settlements peaceably arrived at.

The Members of this body know full well the general facts relating to the railroads of this country. We have had to deal with this question in recent years owing to the financial straits the carriers found themselves in. They need fiscal help and relief, not additional unwarranted cost burdens saddled on them. And apart from the carriers themselves, the Nation can ill afford a major railroad tieup at this time when the need is for an expanding and flourishing economy and the increased requirements of the national defense program are going to make a greater demand on the transportation system of the United States.

Mr. President, it is a truism that no strike was ever won without the support of public opinion. Every factor in this situation warrants an abandonment of a strike threat, and a continuation of negotiations until the issues have been resolved. Keep the trains running.

AUTHORIZATION TO HAVE PRINTED IN THE RECORD A SPEECH ENTITLED "THE REPUBLICAN RECORD"

Mr. BRIDGES. Mr. President, I ask unanimous consent to have inserted in the final CONGRESSIONAL RECORD for the 2d session of the 86th Congress, at such time as it is printed, a speech which I have prepared for delivery, entitled "The Republican Record."

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATOR JAMES H. KYLE, "FORGOTTEN" AUTHOR OF LABOR DAY BILL

Mr. MUNDT. Mr. President, as we proceed to adjourn this final session of the 86th Congress at a time when most Americans will be preparing to celebrate what we have come to call a long weekend, on the occasion of Labor Day, let us stop and recall for a few minutes just how the legislation to establish a national holiday for labor came about.

The year 1901 was indeed an eventful year in our American history.

It was in this year that two of our greatest Americans met their death—one, the result of an assassin's bullet; the other through illness.

Most Americans know something about the first man, for he was President William McKinley, who met death as the result of bullets fired from the gun of Leon Czolgosz while attending the Pan-American Exposition in Buffalo, N.Y.

The other, also an Ohioan by birth, and another lawmaker, passed into political and public obscurity. His name was James Henderson Kyle.

It is appropriate that we should pay tribute to Senator Kyle and to remember him, for it was his bill which passed the Congress back in 1894 that established Labor Day as a national holiday.

He was a Congregational minister by avocation. And in a few short weeks, without any prior political activity to his credit, he was, from November to March, elevated from his ministry into the Senate of these United States from my own State of South Dakota.

He came to South Dakota back in 1885 as minister to the people of Iroquois and Aberdeen, S. Dak. He came from his home in South Dakota to the Senate in Washington in 1891 as neither Democrat nor Republican, but as an Independent, although he is credited—or charged—with alining himself with the Democratic Party on most of the issues of the day.

During his first term in the Senate, he became chairman of the Senate Committee on Education and Labor where he was able to further the very things which he had advocated in a Fourth of July speech in 1890 in Aberdeen—the speech which actually launched his political career.

Senator Robert J. Gamble of South Dakota, a fellow colleague of Kyle's said of him:

> He always gave special interest to the rights of the individual, the safeguarding and elevation of labor, the integrity of the home and the extension of national legislation for its protection. He also believed in the broadening and elevating influences in our national life of higher education. He specially emphasized his interest in these questions when Chairman of the Committee on Education and Labor, and also as chairman of the Industrial Commission, which conducted such an extended and exhaustive investigation covering the vital and complex questions of our industrial life.

Former Gov. M. Q. Sharpe, of South Dakota, in an address in Cedarville, Ohio, on Labor Day, September 2, 1946, added:

> It is remarkable that a man trained in the ministry, whose work prior to his advent into the national scene had been in the fields of ministry, raising money for a small college, hailing from a State almost devoid of industry and devoted to agrarian life should have achieved such an important place in Congress so quickly.

Senator Shelby Moore Cullom of Illinois remarked at the time of Senator Kyle's death:

> His inclination was to deal with education and labor questions. His mind inclined to these subjects. He was always specially interested in the success of schools and colleges and in the laborers of the country and thought, rightly, that, as between the poor and the rich, the poor man was entitled to be specially cared for and protected in these days of combinations of capital and organized trusts.

This was a time in history when the John D. Rockefellers were pictured as monsters—with their hands on the throats of the common man—and when William Jennings Bryan had gained his fame and nearly the Presidency with his "Cross of Gold" talk.

Kyle was a man of few speeches, but when he did speak, he had something to say.

And it was this Senator from a new and small agrarian State who proposed legislation making Labor Day a national holiday.

And although there is some controversy as to when the idea actually originated to observe Labor Day and whether the Knights of Labor in New York City or the New York City Central Labor Union originated the observance, it has been confirmed that the Knights of Labor had nothing officially to do with the declaration of such a holiday.

The idea that a day be set apart for the laboring people was first made public by a resolution at a meeting of the Central Labor Union held on May 8, 1882, when Mr. Peter J. McGuire, then general secretary of the Brotherhood of Carpenters and Joiners and later vice president of the American Federation of Labor suggested the first Monday in September be made the day to pay tribute to American industry.

Mr. McGuire's reasoning behind this day was "It would come at the most pleasant season of the year, nearly midway between the Fourth of July and Thanksgiving, and would fill a wide gap in the chronology of legal holidays."

The first Labor Day observance was not held on the first Monday in September; instead, it was on Tuesday, September 5, 1882, when about 10,000 union members marched up Broadway in New York City after which they spent the remainder of the day in Elm Park with all sorts of amusements provided.

Mr. President, it is 78 years ago to the very day that we will be observing Labor Day 1960.

Numerous labor leaders spoke to the crowds from 2:30 in the afternoon until nightfall that first Labor Day observance, and the celebration was such a success, it led to the establishment of an annual affair.

The next Labor Day was on a Wednesday, September 5, 1883, and the parade on that occasion was reported as an "imposing demonstration of the Central Labor Union."

In 1884, it was decided by the Central Labor Union to hold the celebration on the first Monday in September and central labor bodies in other cities were urged to celebrate that day as a universal holiday for workingmen.

The American Federation of Labor unanimously adopted a resolution on October 7, 1884, that the first Monday in September of each year be set apart as a laborers' national holiday, and we recommend its observance by all wage workers, irrespective of sex, calling, or nationality.

In the following years, municipal ordinances officially recognized Labor Day. State legislative recognition was developed only as a result of a campaign conducted by organized labor, and 23 States had enacted Labor Day laws by the end of 1893.

Oregon was first, by passage of an original law on February 21, 1887, designating Labor Day as the first Saturday of June. This was changed to the first Monday in September in February 1893 so as to conform with the general accepted scheme of observing the first Monday of September.

Back in 1886, the A.F. of L. convention recommended that Labor Day on the first Monday in September should be observed "until it shall be as uncommon for a man to work on that day as on Independence Day."

Increased interest in setting aside a day for honoring the workers of America, and the American Federation of Labor efforts for national recognition of the day, resulted in Senator Kyle's introduction of a bill in the Senate on August 28, 1893. It read:

> *Be it enacted, etc.*, That the first Monday in September in each year, being the day celebrated and known as labor's holiday, is hereby made a legal public holiday, to all intents and purposes, in the same manner as Christmas, the 1st day of January, the 22d day of February, the 30th day of May and the 4th day of July are now made by law public holidays.

The bill was introduced during a special session of the 53d Congress which President Grover Cleveland had called so that the serious financial question confronting the country might be considered.

Similar legislation was introduced by Representative Amos J. Cummings of New York and Representative Robert E. De Forest of Connecticut.

The Kyle bill was, according to the CONGRESSIONAL RECORD for that day, "read twice by its title, and referred to the Committee on Education and Labor."

Representative De Forest and Representative Cummings' bills were referred to the respective House Committee on Labor.

Committee Chairman Kyle, on February 13, 1894, reported the bill to the Senate without amendment; the House Labor Committee reported favorable action on the Cummings bill on May 15 of that year.

Although there was no opposition to passage of the bill in either House of Congress, it is interesting to note some of the comment made when the bill ap-

peared on the Senate Calendar for action on June 22, 1894.

The remarks were made by Senator Kyle:

I should like to say for the information of those who do not know that something like 23 States of the United States have now settled upon the first Monday of September or the 1st day of October. In order to make the observance uniform, that all may enjoy vacation privileges upon the same day, the labor organizations of the country have united in asking that the first Monday of September be set apart as a holiday.

Senator William B. Allison of Iowa asked if "the day mentioned in the bill is the 1st day of September?"

Senator Francis M. Cockrell of Missouri informed him it was the first Monday of September, but he thought it "ought to be the 1st day of September," and moved striking of the word "Monday" and insertion of the word "day," so as to read the "1st day of September."

Senator John H. Mitchell of Oregon noted it would then fall on Sunday every few years.

Senator Cockrell told that the Fourth of July falls on Sunday and so does "any fixed holiday fall upon Sunday occasionally."

Senator Mitchell thought it should be fixed to fall on a week day.

Senator John Sherman of Ohio next commented on Senator Mitchell's remarks and thought it best to leave the date the first Monday in September if that was what the labor organizations wanted and if 23 States had already obliged with that date. He thought it better to have a weekday anyway, since he did not encourage holidays on Sunday for there "is too much old Presbyterianism in me for that."

Senator Cockrell didn't like to encourage holidays on Sunday either, but he figured if there was to be any sort of symmetry in our holiday scheme, "this one ought to be fixed on the 1st day of the month, just as we have the Fourth of July, the 25th of December, the 30th of May, and so on, for public holidays."

He didn't object to "letting it go," and thereby withdrew his amendment if anyone objected to it.

Senator Sherman next commented:

We had better leave it the first Monday, as we now create the holiday. The Fourth of July was created by the great event, and could not be changed.

Vice President Adlai E. Stevenson announced the amendment from the Missouri Senator was withdrawn.

The bill was then reported to the Senate, engrossed for a third reading, read and passed.

One day later, the Kyle bill was delivered to the House side and laid before that body.

On June 26, with the Cummings Labor Day bill already on the House Calendar where it undoubtedly could not be reached for a number of weeks it was decided by Representative Lawrence E. McGann of Illinois, chairman of the House Labor Committee, to place the Kyle bill which had the same text as the Cummings bill, before the House. This thereby caused a substitution of the Kyle bill for the Cummings bill before the House where, "There being no objection, the bill was considered, ordered to a third reading; and being read the third time, was passed."

Three steps remained, even though the Kyle bill had passed both the Senate and the House of Representatives before it would become a part of our Federal statutes. Three steps remained which would insure for Senator James Henderson Kyle of South Dakota the credit for having legislation passed which was indeed a commendable recognition for the common man—the workingman—the laborer.

On June 27, the bill was enrolled in both Houses and duly signed by the Speaker, Mr. Charles F. Crisp, of Georgia, and the Vice President. This was the first and second step.

Next, and finally, on June 29, 1894, it was announced by Mr. O. L. Prudent, one of President Cleveland's secretaries, that "the President on the 28th instant approved and signed the act—S. 730—making Labor Day a legal holiday."

By 1900, Labor Day was officially recognized by most of the States. Not until 1923, did the last State, Wyoming, fall into line.

In Wisconsin and Wyoming, Labor Day is set by the Governors, but in effect, they designate the first Monday in September for observance.

And at no time, as far as a search of the CONGRESSIONAL RECORD indexes goes, is it disclosed that the question of changing the day of Labor Day observance been raised or discussed in the Congress.

Tradition and practice have established the first Monday in September to acknowledge the part American workers have played in the economic growth of our Nation.

Since the holiday was created by concerted action and not by fixed event of any kind, it is feasible to change the date of observance, but such a change would be complicated by the fact that Federal law and each individual State law would have to be amended, since each jurisdiction is separately controlled by independent legislation on the subject.

Samuel Gompers, when reporting to the 1894 A.F. of L. convention, stated:

National Labor Day—It affords me pleasure to be able to report that the demand made by the American Federation of Labor for making the first Monday in September of each year a legal holiday passed Congress and was made a law on June 28, 1894.

It is amazing, Mr. President, to note that in many of the papers and articles which tell about the establishment of Labor Day as a national holiday, little or no mention is given to the man who was responsible for first introducing the bill in the Congress.

I hope it has been possible to convey to those students of Americana who are interested in our past and present and future, what part James H. Kyle, a minister and U.S. Senator, played in this great event for the laboring people of the United States.

In the words of former South Dakota Governor M. Q. Sharpe:

Too few know Senator Kyle for what he was. Today our politicians, our labor leaders, our statesmen could well pause to study the life, the character, the activities, of James H. Kyle and to follow his rule of life, to support the just, to eschew the partisan, to dignify labor, and to represent all of the people of his constituency without regard to their political affiliation.

If the life of the man who conceived of a national Labor Day, who served as chairman of the first great industrial commission, which he had sponsored by appropriate legislation and which commission by its research and study laid the groundwork for better conditions for labor and better relations with labor, could but be studied by the friends and foes of labor alike, it would reveal to them a policy that might * * * eliminate much of the unrest and turmoil of these times. Senator Kyle would have made a splendid arbiter for he was able to command the respect of friend and foe alike. Perhaps we may again have a man arise to meet this emergency who can, like Kyle, create a middle ground on which all may meet, confer, and serve their Nation with the same devotion that characterized this Ohioan who made South Dakota his home.

Mr. President, a man who served his Nation so impartially and with serious dedication at all times.

KAISER INDUSTRIAL TECHNOLOGY

Mr. BYRD of West Virginia. Mr. President, "We must be able to enjoy the results of technology, which are order and efficiency and profusion of goods—and at the same time enjoy what human beings have always held to be of supreme importance: Liberty and the possibility of spontaneity."

These penetrating words of Aldous Huxley point out quite clearly how important and meaningful our recent space explorations are to us. I, for one, am extremely proud of our industry-Government-military space team. In particular though, I am especially proud, and understandably so, of one of our community neighbors in Jackson County, W. Va.—the Kaiser Aluminum & Chemical Corp.

I have just learned that aluminum produced by that company was used in the Echo I balloon; the engines of the historymaking Discoverers XIII and XIV satellites; the X–15 rocket aircraft; and the Thor Delta and Thor Agena missiles. As many of you know, the largest aluminum rolling mill in the United States, if not the world, is the Kaiser plant in Ravenswood, W. Va.

During the 5 years that the Kaiser plant has been operating there, the company and its people have contributed a great deal to the industrial and cultural expansion of West Virginia. With their annual payroll of some $15.5 million, providing employment for more than 3,100 West Virginians, Kaiser's very presence has served as a stimulus to attract allied industries to our State.

While our experience with the Kaiser people has been primarily with their aluminum company affiliate, many of my colleagues in the Senate are familiar with the worldwide activities of Kaiser Industries Corp., its parent company, and the contribution it has made to greater international understanding. I would like to review for a moment just a few of the activities of the parent company and its affiliates since the first of the year.

In January, Kaiser Aluminum and Delto Metal Co., Ltd., one of the largest fabricators of nonferrous products in the United Kingdom, organized a new fabricating company in the United Kingdom—James Booth Aluminium, Ltd. Kaiser Aluminum International is participating with Pechiney, of France, and Spanish interests in three privately owned and operated aluminum producing and fabricating companies in Spain. In addition, Kaiser, with the French and Spanish interests, have joined in the formation of a new company to operate a reduction plant in northern Spain. Kaiser Aluminum and the Birla interests in India have completed plans to establish an integrated aluminum producing industry there. At the request of the Ghana Government, Kaiser Aluminum is sponsoring the organization of a consortium to build and operate a reduction plant.

Kaiser Center, the largest office building west of the Mississippi River and general headquarters for the Kaiser organization, has just been completed in Oakland, Calif.

Kaiser Engineers International is just beginning work on the third phase of the gigantic Snowy Mountains hydroelectric scheme in Australia. In Africa, these engineering specialists are completing the preliminary dam site work for the important Volta River project in Ghana. In addition, they have begun construction of a 100,000-ton cement plant in India.

Kaiser engineers are participating in a joint venture for the construction of Atlas operational missile launching complexes at Plattsburgh AFB, N.Y., and Walker AFB, N. Mex.

The National Steel & Shipbuilding Co., acquired by Kaiser early this year, launched in June the second of six freighters for the American Export Lines.

Kaiser Hawaii Kai Development Co., a wholly owned subsidiary of the H. J. Kaiser Co., is well along in the development of the new resort-residential city of Hawaii Kai, located on 6,000 acres near Honolulu. Initial master planning provides for 11,000 homes, business sections, and a central civic center, apartments, beach resort hotels, a golf course, and a marina with 20 miles of waterfront homesites.

Willys Motors, Inc., received contracts to produce 4,010 Jeep Fleetvan mail trucks for the U.S. Post Office Department and 5,228 commercial and military Jeep vehicles and spare parts. These latter contracts provide for 605 vehicles for the U.S. Marine Corps, 623 vehicles for the Venezuelan Army under the U.S. military assistance program and 4,000 vehicles for the Turkish Army. Willys Motors, Inc., also established Jeep assembly and distribution facilities in the Union of South Africa.

Industrias Kaiser Argentina S.A., IKA, an affiliate of Willys, and Lockheed Aircraft Corp. have established the first aircraft manufacturing venture in South America by a U.S. industry. IKA also expanded its vehicle line to include the Bergantin and Renault Dauphine passenger cars. It also makes the Kaiser Carabela passenger car and Jeep vehicles. In addition, the company established the first automobile financing company in Argentina.

Willys-Overland do Brasil, São Paulo, Brazil, an affiliate of Willys Motors, expanded its product line through the introduction of the Aero Willys and Renault Dauphine cars.

Permanente Cement Co. has just announced plans to construct a multimillion dollar cement plant in Alaska. Dedication of Hawaii's first cement plant was held earlier this month by the company.

This brief recount of some of Kaiser's present activities points out very emphatically why we in West Virginia are so proud to have one of the growing Kaiser companies in our community.

TRIBUTE TO SENATOR O'MAHONEY

Mr. McGEE. Mr. President, day before yesterday I took note on this floor of the closing activities in this body of my senior colleague, Senator JOSEPH C. O'MAHONEY. I placed in the RECORD a long, long list of the legislative measures with which he has been associated during the more than quarter century of his service in the U.S. Senate.

Since my remarks last Monday he has been accorded yet another great honor. The National Committee for a Representative Congress, a nonpartisan group of public spirited citizens created to help outstanding Senators and Congressmen whose courageous positions in the public interest may excite political attacks from outside special interests or pressure groups, has just presented to my senior colleague a citation entitled: "Award for Outstanding Representative Public Service."

The text of the scroll reads as follows:

FOR AN OUTSTANDING RECORD FOR DISTINGUISHED SERVICE AS A U.S. SENATOR

In adhering steadfastly to the principles of representative government;

In rendering highly constructive services to the people of Wyoming, faithfully and vigorously representing their ideals and objectives and making many important contributions to the welfare, progress, and betterment of that State;

In standing forth as a fighting champion of the people, determined to make democracy work, and to keep government of the United States truly "Of the people, by the people, and for the people";

In serving with unflagging zeal as a judicial expert, continually alert and vigilant against the passage of any law which might abridge the constitutional protections of our citizens;

In building through his brilliant record as a U.S. Senator an enduring monument to himself by daily deeds and actions—be it highly intellectual judicial discourse in Senate debate, or kindly graciousness to an employee, each reflecting the O'MAHONEY touch of greatness, shadows from the Star of David. The outstanding record of a man gifted with the power of seeing far into the future, while not forgetting the past or neglecting the present—a man who lives but to serve his God, his fellow men, his country—with honor, courage, ability, and unswerving devotion to the public trust. A Senator of undimming eminence, wholeheartedly dedicated to faithfully serving America and democracy with unselfish disregard for any personal political consequences—another great American whose like will not be seen again.

According to the tradition of the National Committee for a Representative Congress, the group usually confines its citations to Senators seeking reelection; a recent case in point being the distinguished Senator from Tennessee, ESTES KEFAUVER.

But in the present instance, they singled out Senator O'MAHONEY's impending retirement to do him special honor. In the words of the chairman of the organization, Mr. Robert Austin, submitted to the Senator:

Although you are retiring, we feel that you have such an outstanding record of representative public service, and have authored so much legislation beneficial to the lives of all our citizens, that you certainly would be entitled to our suport if you were seeking reelection. We are, therefore, highly pleased to present to you our committee's formal "Award for Outstanding Representative Public Service," the text of which was written by your longtime friend and admirer, Charlie Kress.

I am confident that I speak the sense of this body, the U.S. Senate, in endorsing the expression of the National Committee for a Representative Congress as reflecting the sense of many, many of Senator O'MAHONEY's colleagues and friends.

I request also, Mr. President, that an editorial appearing in tonight's Evening Star be included in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

A GENUINE LIBERAL

Senator O'MAHONEY sang his Senate swan song on Monday evening. Retiring at the end of this session, he has introduced the last bill that will carry his name as a sponsor. One of the tributes paid him on the Senate floor came from his junior colleague from Wyoming, Senator MCGEE, who placed in the CONGRESSIONAL RECORD a list of laws sponsored or cosponsored by Senator O'MAHONEY in his 27 years of Senate service. The list, printed in small type, filled more than two pages of the CONGRESSIONAL RECORD.

The laws he helped to make are many. But we doubt if the enactment of any of them required more hard work, more skill in the legislative art, more courage, or exemplified more genuine liberalism in the best meaning of a much-abused term, than what he did to prevent the enactment of bills that might have become law.

One of these was the Roosevelt court-packing proposal. Senator O'MAHONEY came to the Senate as a dependable New Dealer and a stanch supporter of Franklin D. Roosevelt. But he made his choice and fought the bill with everything he had. He helped defeat it. Years later, in 1957, he took leadership in the fight against the proposal to deny jury trials in the civil rights bill. An acknowledged champion of civil rights, he won his point, and by winning it contributed to passage of the first civil rights bill since Reconstruction.

Because he was always considered a liberal Senator, his position on these and some other proposals brought him harsh criticism as a traitor to his cause. While popular concepts of liberalism change, however, Senator O'MAHONEY never did. He leaves the Senate with a fine record. "I owe allegiance to the people only," he used to say. In return they gave him their respect—and he takes it with him into retirement.

TRANSACTION OF ADDITIONAL ROUTINE BUSINESS

By unanimous consent, the following additional routine business was transacted:

EXTENSION OF TERMINATION DATE OF MEXICAN FARM LABOR PROGRAM—TELEGRAM

Mr. WILEY. Mr. President, I ask unanimous consent to have printed in the RECORD a telegram I have received from John C. Lynn, legislative director of the American Farm Bureau Federation, favoring an extension of the termination date of the Mexican farm labor program.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
August 31, 1960.

Hon. ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.:

Respectfully recommend your favorable vote for H.R. 12759, Calendar No. 1971, scheduled for Senate consideration possibly today, to extend termination date Mexican farm labor program from June 30, 1961, to December 1, 1961. This would provide farmers assurance, when operating and financing plans and arrangements being made this winter and next spring, that farm labor situation would not be disrupted in middle of season.

JOHN C. LYNN,
Legislative Director, American Farm Bureau Federation.

ADDITIONAL REPORTS OF COMMITTEES

The following additional reports of committees were submitted:

By Mr. HILL, from the Committee on Labor and Public Welfare, without amendment:

H.R. 12699. An act to cancel a deed of trust to the United States from the Predecessor in name of Gallaudet College and any evidences of indebtedness related to the same transaction, to quiet the college's title to property belonging to it, and for other purposes.

By Mr. BYRD of Virginia, from the Committee on Finance, with amendments:

H.R. 13062. An act to amend the Sugar Act of 1948, as amended (Rept. No. 1940).

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

H.R. 1526. An act for the relief of F. P. Tower, Lillie B. Lewis, the estate of Manuel Branco, John Santos Carinhas, Joaquin Gometz Carinhas, and Manuel Jesus Carinhas (Rept. No. 1941);

H.R. 3536. An act for the relief of Guadalupe Villarreal, Jr. (Rept. No. 1942);

H.R. 8166. An act for the relief of the Crum-McKinnon Building Co., Billings, Mont. (Rept. No. 1943);

H.R. 9715. An act for the relief of Otis Drinkhard (Rept. No. 1944); and

H.R. 11322. An act for the relief of Col. Joseph A. Nichols (Rept. No. 1945).

By Mr. McCLELLAN, from the Committee on the Judiciary, without amendment:

H.R. 11380. An act for the relief of Mr. Joe J. Farmer (Rept. No. 1946).

ADDITIONAL BILL INTRODUCED

Mr. JAVITS, by unanimous consent, introduced a bill (S. 3924) for the relief of Pearl Cantor (A11581501), which was read twice by its title, and referred to the Committee on the Judiciary.

AUTHORIZATION FOR INSERTIONS IN RECORD FOLLOWING ADJOURNMENT

Mr. HAYDEN. Mr. President, I ask unanimous consent that Senators may be permitted to make insertions in the RECORD following the adjournment of Congress until the last edition authorized by the Joint Committee on Printing is published; but this order shall not apply to any subject matter which may have occurred or to any speech delivered subsequent to the adjournment of Congress.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRINTING OF COMMITTEE ACTIVITY REPORTS

Mr. HAYDEN. Mr. President, with reference to the printing of committee activity reports for the session, as chairman of the Joint Committee on Printing, I wish to remind the chairmen of all committees that the Joint Committee on Printing has very properly ruled that the printing of such reports, both as committee prints and in the RECORD, is duplication, the cost of which cannot be justified.

It is requested that committee chairmen decide whether they wish these reports printed as committee prints or in the RECORD, since the Government Printing Office will be directed not to print them both ways.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, August 31, 1960, he presented to the President of the United States the following enrolled bills:

S. 1066. An act to revise the boundaries and change the name of Fort Donelson National Military Park, and for other purposes;

S. 1214. An act to amend the act of March 11, 1948 (62 Stat. 78), relating to the establishment of the De Soto National Memorial, in the State of Florida;

S. 1870. An act to provide for examination, licensing, and regulation of practical nurses, and for practical nursing education in the District of Columbia, and for other purposes;

S. 2131. An act to amend the Motor Vehicle Safety Responsibility Act of the District of Columbia approved May 25, 1954, as amended;

S. 2575. An act to provide a health benefits program for certain retired employees of the Government;

S. 2633. An act to amend the Foreign Service Act of 1946, as amended, and for other purposes;

S. 3416. An act to provide for the restoration to the United States of amounts expended in the District of Columbia in carrying out the Temporary Unemployment Compensation Act of 1958;

S. 3648. An act to authorize the Commissioners of the District of Columbia on behalf of the United States to transfer from the United States to the District of Columbia Redevelopment Land Agency title to certain real property in said District;

S. 3835. An act to authorize the District of Columbia Civil War Centennial Commission to plan and carry out in the District of Columbia civic programs in commemoration of the 100th anniversary of the Civil War; to authorize the Commisssioners of the District of Columbia, the Secretary of the Interior, and the Secretary of Defense to make certain property of the District and of the United States available for the use of such Commission; to authorize the said Commissioners to make certain regulations and permit certain uses to be made of public space, and for other purposes; and

S. 3867. An act to exempt from taxation certain property of the National Guard Association of the United States in the District of Columbia.

RECESS

Mr. JOHNSON of Texas. Mr. President, if no other Senator desires to address the Senate, I move that the Senate stand in recess until 12 o'clock noon.

The motion was agreed to; and (at 4 o'clock and 24 minutes a.m., Thursday, September 1, 1960) the Senate took a recess until 12 o'clock meridian of the same day.

NOMINATIONS

Executive nominations received by the Senate August 31, 1960:

The following-named persons, who were appointed during the last recess of the Senate, to the positions indicated:

ASSISTANT ATTORNEY GENERAL

Robert A. Bicks, of New York, to be an Assistant Attorney General, vice Victor R. Hansen, resigned.

FEDERAL COMMUNICATIONS COMMISSION

Charles H. King, of Michigan, to be a member of Federal Communications Commission for the unexpired term of 7 years from July 1, 1954, vice John C. Doerfer, resigned.

FEDERAL POWER COMMISSION

Paul A. Sweeney, of Maryland, to be a member of the Federal Power Commission for the remainder of the term expiring June 22, 1963, vice John B. Hussey, deceased.

The following-named persons to the positions indicated:

NATIONAL CAPITAL TRANSPORTATION AGENCY

H. Holmes Vogel, of the District of Columbia, to be Administrator of the National Capital Transportation Agency (new position).

To be members of the Advisory Board of the National Capital Transportation Agency (new positions):

Donald C. Hyde, of Ohio.
S. Moran McConihe, of Maryland.
Harland Bartholomew, of Missouri.
William H. Moss, of Virginia.

Edward Burling, Jr., of the District of Columbia.

POSTMASTERS

MARYLAND

G. Lucille Bunting, Bishopville, Md., in place of H. R. Ringler, retired.

MICHIGAN

Marie A. Pitts, New Buffalo, Mich., in place of J. M. Littlejohn, resigned.

OHIO

Alonzo D. McGlumphy, Martins Ferry, Ohio, in place of O. C. Frantz, retired.

OREGON

John R. Nieland, Canby, Oreg., in place of H. I. Brown, retired.

SOUTH CAROLINA

Ernest R. Baker, Pickens, S.C., in place of R. T. Hallum, Jr., resigned.

TEXAS

Grattus H. Pamplin, McKinney, Tex., in place of D. O. Davis, retired.

ALABAMA

Armstead L. Hayes, Notasulga, Ala., in place of J. G. Rea, retired.

ALASKA

Thomas L. Jackson, Sr., Kake, Alaska, in place of R. R. Martin, resigned.

ARIZONA

Eva H. Sutherlin, Thatcher, Ariz., in place of F. M. Martin, removed.

CALIFORNIA

Rollo L. Van Slyke, Port Hueneme, Calif., in place of A. J. Haycox, retired.

Katherine O. Bogendorfer, Van Nuys, Calif., in place of E. D. Gibson, retired.

ILLINOIS

Mary A. Tipsord, Cooksville, Ill., in place of O. L. Dean, deceased.

MISSISSIPPI

John R. Long, State College, Miss., in place of H. E. Wamsley, retired.

MISSOURI

Anton Foss, Hunnewell, Mo., in place of J. E. White, retired.

MONTANA

Elwin Claire, Wolf Point, Mont., in place of W. B. McCracken, transferred.

NEW YORK

Robert F. Schiener, Sardinia, N.Y., in place of M. C. Cudoba, deceased.

Dorothy R. DuMond, Ulster Park, N.Y., in place of C. H. Schoonmaker, retired.

OKLAHOMA

Deryl D. Milford, Byars, Okla., in place of D. E. Jones, transferred.

PENNSYLVANIA

Floyd G. Kulp, Franconia, Pa., in place of N. L. Kulp, retired.

Milton F. Ward, Tioga, Pa., in place of R. S. Kayzer, retired.

PUERTO RICO

Roberto DeJesus Correa, Loiza, P.R., in place of H. F. Matos, retired.

SOUTH CAROLINA

Hosea A. Weathers, Fountain Inn, S.C., in place of W. J. Hill, retired.

William E. Spears, Union, S.C., in place of J. W. Wilbanks, retired.

TENNESSEE

David F. Ross, Cottagegrove, Tenn., in place of R. B. Cox, transferred.

ALABAMA

Julia G. Oliver, Panola, Ala., in place of A. G. Schmitz, retired.

FLORIDA

James V. Harper, Orange Park, Fla., in place of R. L. Luga, transferred.

IOWA

Hansel A. Lowe, Maxwell, Iowa., in place of E. L. Wood, retired.

LOUISIANA

Beatrice A. Croft, Pride, La., in place of J. L. Townsend, retired.

MINNESOTA

Sanferd B. Gullickson, Cottonwood, Minn., in place of E. M. Kolhei, deceased.

NEBRASKA

Wilber H. Roesch, Falls City, Nebr., in place of A. E. Elam, retired.

NEW JERSEY

Ralph H. Donnell, Park Ridge, N.J., in place of J. J. McNally, retired.

NEW YORK

Robert K. Baker, Argyle, N.Y., in place of A. C. Hall, retired.

Wilbur S. Williams, Hudson Falls, N.Y., in place of L. F. Howland, retired.

NORTH DAKOTA

Wilfred J. Haas, Hazen, N. Dak., in place of Ronald Keeley, deceased.

OHIO

Robert D. Fisher, Beach City, Ohio, in place of W. J. Miller, retired.

Joseph J. Smerke, Gates Mills, Ohio, in place of K. H. A. Haberecht, resigned.

Paul L. Rood, Westerville, Ohio, in place of S. O. Kreischer, retired.

OKLAHOMA

Ford H. Sims, Martha, Okla., in place of W. O. Rowsey, deceased.

PENNSYLVANIA

George D. Yoder, Ashland, Pa., in place of H. J. Betz, deceased.

William E. Thumma, Millersville, Pa., in place of J. M. Hartman, deceased.

Walter H. Hoffman, Strasburg, Pa., in place of C. W. Johnston, retired.

SOUTH DAKOTA

Inez I. Haenfler, Avon, S. Dak., in place of L. V. Marek, retired.

TEXAS

Arlene H. Burks, Blossom, Tex., in place of L. H. Clark, retired.

Milton B. Ford, Slaton, Tex., in place of T. E. McClanahan, retired.

Junius D. Metz, Waco, Tex., in place of L. C. Alexander, retired.

CONFIRMATIONS

Executive nominations confirmed by the Senate August 31, 1960:

POSTMASTERS

ALABAMA

Jimmie N. Puccio, Clio.
Thomas H. Christian, Northport.
Doctor F. Gibson, Wadley.

ARKANSAS

Rex Hutchison, Evening Shade.
Harold D. Byrd, Gassville.
Lillian T. Biggers, Hampton.
Jake M. Dunn, Pocahontas.

CALIFORNIA

Joe L. Miller, Bishop.
Elizabeth A. Waite, Cambria.
Howard C. Denton, Los Altos.
Harold E. Purpus, Millbrae.
Sylvan C. Smith, San Pedro.
Katherine O. Bogendorfer, Van Nuys.

COLORADO

Howard W. Cross, Grand Junction.

CONNECTICUT

Salvatore J. Puglisi, Middleton.

FLORIDA

Benjamin C. Grunig, Callahan.
Francis E. Earl, Tarpon Springs.

GEORGIA

Fred Daves, Jr., Calhoun.
John C. McCrary, Hardwick.
Charles L. Strickland, Jesup.
Rodolph Broach, Putney.
Horace U. Whitaker, Rutledge.

IDAHO

Albert W. Miller, Gooding.
Milan M. Casper, Rigby.

ILLINOIS

Clarence B. O'Marah, Eureka.
Raymond H. Burklund, Paxton.
Beulah B. Reynolds, Russell.
Vern W. Graham, Sugar Grove.

INDIANA

Geraldine Z. Marsteller, Russellville.

IOWA

Daniel H. Maxwell, Spencer.
Dale M. Magnussen, Traer.
Wayne C. Smith, Waterloo.
Charles E. Boyles, Woodward.

KANSAS

Eugene L. Foland, Almena.
Richard R. Simmons, Ashland.
John J. Hein, Beulah.
Earl F. Giesick, Leoti.
Elmer E. McAferty, McLouth.
Norman C. Raleigh, Medicine Lodge.
Earl A. Montford, Selden.
Clyde F. Christenson, Tescott.

KENTUCKY

Randall C. Day, Jr., Whitesburg.

LOUISIANA

Willie S. Fussell, Amite.
Boyd Wilkins, Jr., Columbia.
Sharon B. Parker, Sikes.
Herthel S. Devall, Springfield.

MAINE

Karl T. Spruce, Bradley.
Wallace H. Campbell, Fort Fairfield.
Marion P. Davis, Hebron.

MARYLAND

Donald M. Sturtevant, Landover.

MASSACHUSETTS

Edward B. Waite, Jr., Southboro.
Ruth I. Morey, South Lincoln.
Frank Baldwin, South Wellfleet.
Henry J. LaFrance, Tyngsboro.
Paul P Skorput, West Stockbridge.
Gerturude C. Bardwell, Whately.

MICHIGAN

Ralph W. Menerey, Brimley.
Paul Richard Conklin, Fremont.
Otto Klein, Jr., Harrisville.
Loraine W. Gardner, Hartland.
Robert C. Steger, Lathrup Village.
Frederick E. Reyer, Marshall.
Paul A. Racheter, Pigeon.

MINNESOTA

John P. DeGreeff, Chandler.
Marvin L. Lorentz, Hastings.
John A. Butson, Vernon Center.

MISSISSIPPI

Charles W. Erwin, Duncan.
Marie R. Shepherd, Silver City.

MISSOURI

Vincil C. Esther, Linn Creek.

MONTANA

Pearl M. Murr, Flaxville.

NEBRASKA

Raymond W. Pettinger, Burchard.
Dale W. Farmer, Callaway.
Richard A. Smith, Jr., Grafton.
Oliver T. Brown, Kenesaw.
Warren G. Schlesiger, Millard.
Stanley D. Montgomery, Royal.
Forrest H. Bahm, Shelby.
Alfred L. Madsen, Winnebago.

NEW HAMPSHIRE

Gordon M. Smith, Barnstead.

NEW JERSEY

Machael A. DeLorenzo, Dover.
James L. Elberson, Wenonah.
Arlton W. Pilling, Woodbury.

NEW YORK

George M. Wood, Allentown.
Ethel Gowdey, Bloomingburg.
Mae M. Gibbs, East Nassau.
Marguerite J. Fadale, Lily Dale.
Ethel M. Hare, Limestone.
Hubert F. McMaster, Nunda.
Muriel M. Bonini, Oscawana.

NORTH CAROLINA

Elizabeth B. Brinson, Arapahoe.
Mary S. Rittenbury, Leasburg.
Elvin C. Cox, Ramseur.
Joseph P. Hamilton, Whitakers.

NORTH DAKOTA

Lillian E. Johnson, Horace.

OHIO

Frank P. Jackson, Jr., Ashley.
Harold E. Weikert, Covington.
Raymond E. Sprunk, Fremont.
Jacque E. Mintchell, Jackson Center.
Donna L. Griffith, Pedro.
Phyllis J. Dundon, Rootstown.
William J. List, Struthers.
Russell H. Miller, Yellow Springs.

OKLAHOMA

Minnie E. Kocher, Avant.
Lily J. Westfall, Carney.
Leon J. Mattox, Howe.
Tom F. Bonner, Idabel.
William W. Dorsett, Medford.

OREGON

L. Houston Valentine, Jacksonville.
Kenneth P. Lanning, Lebanon.

PENNSYLVANIA

Robert J. Talley, Chadds Ford.
John M. Harshaw, Jr., Conneaut Lake.
Thomas S. Duncan, Edinbury.
Francis G. White, Ferndale.
Francis J. Dillon, Glenside.
Clarence L. Hampton, Holicong.
Lawrence C. Viehdorfer, Karthaus.
Samuel S. Detwiler, Kimberton.
John A. Schultz, Neshaminy.
Eleanor M. Johnston, New Alexandria.
Raymond Carlson, New Stanton.
Robert Laird, Jr., Reynoldsville.
Robert V. Webster, Roaring Branch.
Henry H. Arnold, Robertsdale.
Gertrude H. Althouse, Sadsburyville.
Wilson D. Puhl, Sanatoga.
Lisle Robert Johns, Shelocta.
Donald J. Rowlands, Slatington.
Edgar F. Benner, State College.
Albert L. Bloss, Union City.
Robert C. Guth, Vanderbilt.
Charles W. J. Whitcroft, Villanova.
Lester R. Gordon, Warrington.
Stewart C. McCullough, Wattsburg.
Leona P. Waters, Wiconisco.
James J. Brogan, Sr., Woodlyn.
Dorothy G. Sacks, Woxall.
William J. Zepp, York Springs.

RHODE ISLAND

Henry K. Mook, Charlestown.
Edward C. Borders, Foster Center.
David A. Arnott, Shannock.
Reginald L. Campbell, Tiverton.

SOUTH CAROLINA

Ernest R. Baker, Pickens.
Hosea A. Weathers, Fountain Inn.
David J. Hoffman, Sharon.
William E. Spears.

SOUTH DAKOTA

Wayne E. Hansen, Mount Vernon.
Edna C. Forsyth, Northville.
James A. Muldoon, Presho.

TENNESSEE

Rubye S. Hill, Dandridge.
E. Neil Muzzall, Henry.
M. Frances Long, Palmer.
Robert A. Emerson, Saulsbury.

TEXAS

James E. Watson, Barry.
Harold O. Real, Converse.
Wayne H. Lowrance, Denton.
James E. Winder, Springlake.
Jack H. Montgomery, Weimar.
Raymond J. Hruska, West.
Gustave C. Cooper, Windom.
Robert B. Richardson, Wylie.

VERMONT

Raymond L. Domey, Marshfield.
Alfred E. Turner, Saint Johnsbury Center.
Virginia A. Peterson, South Ryegate.
Ellery G. Giles, Wardsboro.
Alton A. Ellis, West Pawlet.

WEST VIRGINIA

Margaret E. Martin, Stirrat.

WISCONSIN

Robert L. Mink, Clyman.
Oren P. Neville, North Prairie.
Roy A. McMahon, Pardeeville.
William S. DeWitt, Sayner.
Earl E. Malles, Trempealeau.
John P. Tracy, Wausaukee.
Leonard M. Rohde, Weyauwega.

HOUSE OF REPRESENTATIVES

WEDNESDAY, AUGUST 31, 1960

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

Philippians 2: 5: *Let this mind be in you, which was also in Christ Jesus.*

Almighty God, grant that daily we may respond more eagerly to the Master's call and dedicate ourselves anew to every noble cause that will make life blessed and meaningful for all mankind.

Teach us to recognize, in men everywhere, the bonds of our common humanity and reveal the good in others which hitherto we have failed to see because of our blindness and ignorance.

Forgive us for being guilty of those attitudes of pride and superiority, of bigotry and prejudice, which stifle and destroy the spirit of brotherhood we should cultivate and cherish.

Show us how we may break down every barrier we are tempted to raise even in religion, whose concepts and creed men honestly hold by reason of training and tradition, or choice and conviction.

Inspire us to follow the more excellent way of charity and have within our hearts a new birth of the principles of our blessed Lord.

Now may the grace of our Lord Jesus Christ, the love of God, and the fellowship of the Holy Spirit be with us all. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 12993. An act to amend the District of Columbia Teachers' Salary Act of 1955, as amended.

JAMES MADISON MEMORIAL COMMISSION

The SPEAKER. Pursuant to the provisions of section 1; Public Law 86-417, the Chair appoints as members of the James Madison Memorial Commission the following Members on the part of the House: Mr. SMITH of Virginia, Mr. SLACK, Mr. POFF, and Mr. MOORE.

CALL OF THE HOUSE

Mr. CONTE. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently no quorum is present.

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll and the following Members failed to answer to their names:

[Roll No. 198]

Anderson, Mont.	Grant	Murray
Auchincloss	Gray	Pilcher
Barden	Green, Oreg.	Powell
Baumhart	Hays	Preston
Blitch	Hébert	Rogers, Mass.
Boggs	Hess	Shipley
Bolling	Irwin	Smith, Kans.
Bowles	Jackson	Smith, Va.
Breeding	Kilburn	Taylor, N.Y.
Celler	Lafore	Thompson, La.
Curtis, Mass.	Landrum	Thompson, N.J.
Davis, Tenn.	McMillan	Vinson
Doyle	McSween	Willis
Durham	Magnuson	Withrow
Flynn	May	Young
Fogarty	Miller, Clem	
	Mitchell	

The SPEAKER. On this rollcall 380 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

SECOND SUPPLEMENTAL APPROPRIATION BILL, 1961

Mr. THOMAS. Mr. Speaker, I call up the conference report on the bill (H.R. 13161) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 2211)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13161) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 4, 27, 28a, 31, 33, 36, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 59, 65, 66, 76, and 78.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 21, 26, 28, 29, 57, 74, 79, 80, 81 and 82, and agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$750,000"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert "$100,000"; and the Senate agree to the same.

Amendment numbered 19: That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree

to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$10,000"; and the Senate agree to the same.

Amendment numbered 20: That the House recede from its disagreement to the amendment of the Senate numbered 20, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert "$75,000"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert "$24,000"; and the Senate agree to the same.

Amendment numbered 24: That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert "$200,000"; and the Senate agree to the same.

Amendment numbered 25: That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment, as follows: In lieu of the matter proposed by said amendment insert:

"BUREAU OF FOREIGN COMMERCE

"Salaries and expenses

"For an additional amount for 'Salaries and expenses', $500,000, of which not to exceed $40,000 may be transferred to the appropriation for 'Salaries and expenses,' General Administration."

And the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,200,000"; and the Senate agree to the same.

Amendment numbered 60: That the House recede from its disagreement to the amendment of the Senate numbered 60, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$919,450"; and the Senate agree to the same.

Amendment numbered 64: That the House recede from its disagreement to the amendment of the Senate numbered 64, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$9,393,900"; and the Senate agree to the same.

Amendment numbered 67: That the House recede from its disagreement to the amendment of the Senate numbered 67, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,425,000"; and the Senate agree to the same.

Amendment numbered 68: That the House recede from its disagreement to the amendment of the Senate numbered 68, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,050,000"; and the Senate agree to the same.

Amendment numbered 75: That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert "$275,000"; and the Senate agree to the same.

Amendment numbered 77: That the House recede from its disagreement to the amendment of the Senate numbered 77, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$750,000"; and the Senate agree to the same.

Amendment numbered 83: That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert "$125,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 3, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 23, 30, 34, 35, 37, 56, 58, 61, 62, 63, 69, 70, 71, 72, 73, 84 and 85.

Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13161) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

FUNDS APPROPRIATED TO THE PRESIDENT

Amendment No. 1: Inserts title as proposed by the Senate.

Amendment No. 2—President's Special International Program: Deletes Senate proposal to appropriate $986,800.

Amendment No. 3—Special Foreign Currency Program: Reported in disagreement.

Amendment No. 4—Administrative expenses, Overseas Surplus Agricultural Commodity Donations: Deletes language proposed by the Senate. If the administration feels that this auditing should be done, the conferees have no objection to the International Cooperation Administration doing the work within presently available funds.

Mutual Security

Amendments Nos. 5 through 15: Reported in disagreement.

Department of Agriculture

Amendment No. 16—Foreign Agricultural Service: Reported in disagreement.

Amendment No. 17—Forest Service: Appropriates $750,000 instead of $700,000 as proposed by the House and $800,000 as proposed by the Senate.

Department of Commerce

Amendment No. 18—Office of Field Services: Appropriates $100,000 instead of $207,500 as proposed by the Senate.

Amendment No. 19—West Virginia Centennial Celebration: Appropriates $10,000 instead of $5,000 as proposed by the House and $15,000 as proposed by the Senate.

Amendment No. 20—Bureau of the Census: Appropriates $75,000 instead of $150,000 as proposed by the Senate.

Amendment No. 21—Coast and Geodetic Survey: Inserts title.

Amendment No. 22—Salaries and expenses: Appropriates $24,000 instead of $284,000 as proposed by the Senate.

Amendment No. 23—Construction and equipment: Reported in disagreement.

Amendment No. 24—Business and Defense Services Administration: Appropriates $200,000 instead of $291,500 as proposed by the Senate.

Amendment No. 25—Bureau of Foreign Commerce: Appropriates $500,000 of which not to exceed $40,000 may be transferred to the appropriation for "Salaries and expenses, General administration", instead of $1,000,000 and transfer authority of $83,000 as proposed by the Senate.

Amendment No. 26—Bureau of Public Roads: Corrects typographical error.

Amendment No. 27—Weather Bureau: Deletes the Senate proposal to appropriate $50,000 for "Salaries and expenses".

District of Columbia

Amendment No. 28—Executive Office: Appropriates $47,700 as proposed by the Senate.

Amendment No. 28a—Courts: Appropriates $75,000 as proposed by the House instead of $155,000 as proposed by the Senate.

Amendment No. 29—Capital outlay: Inserts title.

Amendment No. 30—Public building construction: Reported in disagreement.

Amendment No. 31—Department of Sanitary Engineering: Deletes Senate proposal to appropriate $3,838,000.

Department of Health, Education, and Welfare

Amendment No. 32—Food and Drug Administration: Appropriates $1,200,000 instead of $1,000,000 as proposed by the House and $1,528,000 as proposed by the Senate.

Amendment No. 33—Office of Education: Appropriates $2,225,000 for land-grant college aid as proposed by the House instead of $6,000,000 as proposed by the Senate.

Amendment No. 34—Public Health Service: Reported in disagreement.

Amendment No. 35—Social Security Administration: Reported in disagreement.

Independent offices

Amendment No. 36—Advisory Commission on Intergovernmental Relations: Appropriates $28,500 as proposed by the House instead of $57,000 as proposed by the Senate.

Amendment No. 37—Foreign Claims Settlement Commission: Reported in disagreement.

General Services Administration

Amendment No. 38—Repair and improvement of public buildings: Deletes the Senate proposal to appropriate $2,000,000 for construction of fallout shelters.

Amendments Nos. 39 through 54—Construction, public buildings projects: Delete Senate proposal to appropriate $5,289,000 for construction of fallout shelters in new public buildings, and delete increases in the limitation on cost of various public buildings.

Amendment No. 55—General provisions: Deletes language proposed by the Senate repealing Section 303 of the Independent Offices Appropriation Act, 1961.

Historical and Memorial Commissions

Amendment No. 56—George Washington Carver Centennial Commission: Reported in disagreement.

Amendment No. 57—James Madison Memorial Commission: Appropriates $10,000 as proposed by the Senate instead of $5,000 as proposed by the House.

Amendment No. 58—U.S. Territorial Expansion Memorial Commission: Reported in disagreement.

Amendment No. 59—National Capital Transportation Agency: Appropriates $250,000 as proposed by the House instead of $500,000 as proposed by the Senate.

The Panama Canal

Amendment No. 60—Canal Zone Government: Appropriates $919,450 instead of $593,750 as proposed by the House and $950,700 as proposed by the Senate.

Amendment No. 61—Canal Zone Government: Reported in disagreement.

Amendments Nos. 62 and 63—Capital outlay: Reported in disagreement.

Panama Canal Company

Amendment No. 64—Limitation on general and administrative expenses: Authorizes $9,393,900 for administrative expenses instead of $9,375,600 as proposed by the House and $9,412,200 as proposed by the Senate.

Department of the Interior

Amendment No. 65—Office of Saline Water: Appropriates $400,000 for salaries and expenses as proposed by the House instead of $500,000 as proposed by the Senate.

Amendment No. 66—Office of Coal Research: Restores House limitation of $200,000 for administration and supervision.

Amendment No. 67—Bureau of Land Management: Appropriates $1,425,000 for management of lands and resources instead of $1,350,000 as proposed by the House and $1,500,000 as proposed by the Senate.

Amendment No. 68—Bureau of Indian Affairs: Appropriates $2,050,000 for construction instead of $1,800,000 as proposed by the House and $2,450,000 as proposed by the Senate.

Amendment No. 69—Bureau of Indian Affairs: Reported in disagreement.

Bureau of Reclamation

Amendments Nos. 70, 71, 72, and 73: Reported in disagreement.

Geological Survey

Amendment No. 74—Surveys, investigations, and research: Appropriates $300,000 as proposed by the Senate.

National Park Service

Amendment No. 75—Construction: Appropriates $275,000 for construction instead of $500,000 as proposed by the Senate. The amount provided is for the acquisition of land for the Castillo de San Marcos National Monument, Florida.

Fish and Wildlife Service

Amendment No. 76—Bureau of Commercial Fisheries: Appropriates $100,000 for management and investigations of resources as proposed by the House instead of $300,000 as proposed by the Senate.

Amendment No. 77—Construction of fishing vessels: Appropriates $750,000 instead of $500,000 as proposed by the House and $1,000,000 as proposed by the Senate.

Amendment No. 78—Administrative provisions: Deletes Senate language authorizing the purchase of police-type motor vehicles.

Department of Justice

Amendments Nos. 79 and 80—Legal activities and general administration: Insert Senate language authorizing appeal on matters of law for either party, instead of only for the United States as provided by the House.

Legislative branch

Architect of the Capitol

Amendment No. 81—Salaries: Deletes House proposal appropriating $8,200 for salary increases of the Architect of the Capitol, the Assistant Architect of the Capitol, and the Second Assistant Architect of the Capitol. This item was deleted at the insistence of the Senate conferees who are very sympathetic but want it taken up in the regular bill next year.

Department of State

Amendment No. 82: Inserts title as proposed by the Senate.

Amendment No. 83: Appropriates $125,000 for salaries and expenses, instead of $250,000 as proposed by the Senate.

Amendment No. 84—United States Citizens Commission on NATO: Reported in disagreement.

Treasury Department

Amendment No. 85—Bureau of the Public Debt: Reported in disagreement.

ALBERT THOMAS,
MICHAEL J. KIRWAN,
CLARENCE CANNON,
BEN F. JENSEN,
JOHN TABER,
Managers on the Part of the House.

Mr. THOMAS. Mr. Speaker, may I summarize for the membership what has been done in this conference report?

When this supplemental appropriation bill left the House, we had some 40 items in it. The bill carried in round figures about $91 million, which showed a reduction of about $27 million in round figures under the budget estimate. The bill went to the other body and the other body added about 31 items. Roughly, there were 86 amendments when we went to conference.

We bring back to you in the conference report 56 amendments on which there is no argument and on which there is complete agreement.

We bring back to you separately 30 items in disagreement. Eleven of those items have to do with mutual security and two items are, in my judgment, minor items dealing with the Panama Canal. So that leaves 17 items that are technically in disagreement when in truth and in fact, there is no disagreement.

The items added by the other body raised the House figures by approximately $214 million. This conference report reduces that $214 million increase in the amount of $208 million. In other words, when the bill left the House you had $91 million. In conference the House figure was increased only $6 million out of the increase of $214 million added in the other body.

Mr. Speaker, that is the picture in a nutshell. Your conferees have worked on this diligently and we gave it the best we have. I do hope you will adopt the conference report.

Mr. Speaker, in the absence of any questions, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

The SPEAKER. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 3: Insert:

"SPECIAL FOREIGN CURRENCY PROGRAM

"For purchase of Indian rupees which accrue under title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704), for the purposes authorized by section 104(m)(A) of that Act, to remain available until expended, $1,300,000, of which not to exceed $2,500 may be expended for representation."

Mr. THOMAS. Mr. Speaker, I offer a motion which I send to the Clerk's desk.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 3 and concur therein with an amendment, as follows: In lieu of the sums of "$1,300,000" and "$2,500" named therein, insert "$650,000" and "$1,250", respectively.

Mr. THOMAS. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the motion offered by the gentleman from Texas [Mr. THOMAS].

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 5: On page 3, line 3, insert "MUTUAL SECURITY."

Mr. THOMAS. Mr. Speaker, this amendment No. 5 is merely a heading, two words, "Mutual Security." We will straighten that out at the end of the session when we have disposed of the meat of mutual security.

Mr. Speaker, I ask unanimous consent that it be passed over.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

DEFENSE SUPPORT

For an additional amount for defense support, as authorized by section 131(b) of the Mutual Security Act of 1954, as amended, $65,000,000.

Mr. THOMAS. Mr. Speaker, I understand there is some opposition to this amendment. I understand the gentleman from Michigan [Mr. FORD] is opposed to it.

The SPEAKER. Is the gentleman going to offer a motion?

Mr. THOMAS. Yes, Mr. Speaker. I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House insist upon its disagreement to the amendment of the Senate numbered 6.

Mr. FORD. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. FORD moves that the House recede and concur in the amendment of the Senate numbered 6.

Mr. GARY. Mr. Speaker, will the gentleman yield?

Mr. THOMAS. In just a moment, please.

Mr. GARY. I wanted to ask for a division of the motion.

Mr. THOMAS. Will the gentleman please withhold that motion at this time and see if we cannot get along expeditiously? I want to yield time to the gentleman from Michigan.

Mr. Speaker, I yield 5 minutes to the gentleman from Michigan [Mr. FORD].

Mr. FORD. Mr. Speaker, this is an effort to restore to the mutual security bill $65 million which the President recommended to the defense support item.

During the consideration of the mutual security bill on the floor of the House. I offered an amendment to the bill for the defense support item bringing the total to $675 million. The amendment was defeated by a narrow

margin. The other body, in the consideration of the same bill, did raise the figure to a total of $675 million. In conference between the House and Senate the figure of $610 million was agreed on. The mutual security bill has been approved by both the House and the Senate. The other body in the consideration of this second supplemental appropriation bill added $65 million to the defense support item, taking the amount up to that authorized by the authorization bill. My effort today is to restore the full amount to the authorization figure of $675 million.

May I say this—I have said it on many occasions—that the defense support item is just as essential to the mutual assistance program as the money for guns, aircraft, and ships in our military assistance portion of the mutual security program. We provided in 1961 $1,800 million for the purely military assistance portion of the mutual security program. That money is to buy guns, ammunition, and aircraft. The defense support program is to provide economic assistance to our allies who are standing with us on the periphery of the Soviet Union and Red China. Those are the countries that have received guns, tanks, ammunition, and aircraft. Those are the countries who have troops in the field surrounding the Soviet Union and Red China. Those are the countries which are making maximum effort in a military way but who need economic aid and assistance so that their troops can have rifles on their shoulders, man aircraft, and man ships that aid and assist us in containing the Soviet and Red China aggression. It does not make sense, in my judgment, for us to give to those countries, such as Turkey, Greece, and Spain and the others that are on the periphery of the Soviet Union and Red China, unless we help them economically so that their economies will be stable. They cannot effectively man armies unless they can keep their economy strong; and believe me, this defense support provides that essential assistance to these strong countries and fine allies that are with us in this great struggle.

The statement will be made that this will take us right up to the authorization figure. That is true, but I point out to you that authorization bill cut the President's budget by $49 million, a 7-percent reduction. So, even if you vote to recede and concur in the Senate figure, the President's figure for defense support will be reduced by 7 percent.

It seems to me that if we are to get the maximum benefit from past expenditures that we have put into military hardware in our mutual security program, we must properly and adequately fund the defense support program. I believe that receding and concurring with the Senate on this item will provide vitally essential funds for those countries that are on the borders of the Soviet Union and Red China, countries which are underdeveloped, who cannot provide the soldiers and the equipment unless they are able to maintain stability and strength in their economy. It is my deep conviction and honest belief that we would do irreparable damage unless we should recede and concur in this amendment and agree with the Senate position. I hope and trust that our efforts today on both sides of the aisle will be for strength, will be for close liaison and agreement with our allies. We can show our stanchest allies that we are with them if we recede and concur and agree with the Senate.

Mr. THOMAS. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Louisiana [Mr. PASSMAN].

Mr. PASSMAN. Mr. Speaker, most of the Members know the position the Foreign Operations Subcommittee on Appropriations has taken. The House has supported the position of the committee on two different occasions. If I may, I will give you a brief résumé of the items before us.

We had long hearings this year on this item. The subcommittee then recommended an amount that it believed was sufficient. The full Appropriations Committee, when we reported the bill, supported the subcommittee. We reported the bill to the House, and the House supported the position of the committee. The distinguished gentleman from Michigan [Mr. FORD] at that time offered an amendment to put back in the bill $50 million, and the House voted it down.

At a subsequent date the bill went to the other body and they restored in full the amount of money the House had taken out. On last Thursday we went to conference. The conferees agreed that we had a good bill, and we reached a compromise. We brought the bill back to the floor and at that time the President's message was read on the floor of the House and the House again supported the position of the committee. We made a lot of concessions in the conference. We allowed an additional $100 million for the contingency fund in the bill that has not been authorized as yet by the Congress. We put the $100 million in because the President had asked for it.

Senator BRIDGES had supported an amendment on the floor of the Senate related to an earmarking of funds for Spain.

We receded and concurred with the Senate amendment so as to provide an additional $10 million to Spain above the House allowance.

Mr. Speaker, the following morning after the Senate conferees had agreed to the conference bill and the conference report had been passed by both the House and Senate, not 13 hours later, they started hearings to put money back in this bill. I do not know that we have ever had anything like this happen before—not since my time in the House that I know of.

Senator RUSSELL, the distinguished Senator from Georgia, had the following to say when he was appointed to serve as a conferee on this bill:

> Mr. President, I respectfully ask to be excused from service on the conference committee on the bill. I was a member of the conference on the mutual security bill, and after a full and free conference, the Senate conferees unanimously agreed to the original figures in the conference bill. I do not feel that I could now represent the Senate's new viewpoint and support this effort to restore items already handled through the ordinary legislative process. As a matter of fact, I could not face the Members of the House after signing the original conference report and seriously insist that they reverse their position only a day or two after the original conference. Therefore, I ask to be excused.

That same day I received a letter from another conferee, Senator STENNIS, in which he had the following to say:

> This is just a special personal word to congratulate and commend you and to express my deep appreciation and admiration for the splendid work you have done on the mutual security appropriations bill for this year, as well as former years. Your knowledge of the various programs and the operation of each is unsurpassed and not equaled on Capital Hill.
>
> It was a treat and a revelation for me to serve as a member of the conference committee this time, and I realize even more than heretofore the wonderful contribution you are making. You gave us just a lot of sound common sense and a fine factual appraisal of the subject.

Mr. Speaker, may I call to the attention of the House the fact that we now have approximately 5,333 employees in the mutual security program scattered in about 76 nations of the world. Your committee has had a hard time handling this appropriation legislation.

In our hearings one State Department employee told the House Members: "Do not put words in my mouth."

At another time one of the witnesses who appeared before our committee said: "I have not read your report."

Now, Mr. Speaker, we have had a difficult time. May I say at this time, without approving any additional funds in this bill this mutual security program has to its credit $8,486 million against $8,111 million last year. Your committee has worked hard to bring this program under control, and I trust you will again support the position of the House as you have on the other occasions and especially when you approved the conference report on last Friday.

Mr. THOMAS. Mr. Speaker, I yield 5 minutes to the distinguished minority leader, the gentleman from Indiana [Mr. HALLECK].

Mr. HALLECK. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include letters.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HALLECK. Mr. Speaker, I rise in support of the motion offered by the gentleman from Michigan [Mr. FORD], and I trust it will be agreed to. It is essential to the well being, the welfare and the national security of our country. I shall also support a motion subsequently to be made dealing with the $26 million involved in what is known as special assistance. I think it ought to be clearly understood, as the gentleman from Michigan has so well pointed out, that these items have to do with the defense of our own country. They have to do with our national security.

I think it is so important that as far as I am concerned I want the roll to be called in order that we may see where our people stand.

Through the years I have supported this program. I was majority leader in the House which initiated the program. Through the years we have had various difficulties in determining what the exact amount ought to be and sometimes it was difficult to say how much. But, on the whole, I have gone along with the program when my President was in power and when the President of the opposition party was in power.

Mr. Speaker, I think it is important that we consider the situation in the world today. The gentleman from Louisana is an ardent advocate of his position—and we all love him and respect him and admire him, but he cannot be infallible about these things, no matter how much time he may put in on the questions involved. But we know that in the world situation this is no time to let down our guard.

Mr. PASSMAN. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I am sorry. I cannot yield, for I have just a few minutes.

Mr. PASSMAN. The gentleman mentioned my name.

Mr. HALLECK. I did, but in a flattering fashion. I have no quarrel with the gentleman except in this instance, in which he and I just do not see alike.

Now, I think it is a misnomer—and I have said this before—to call this foreign aid. It is not foreign aid. We are not giving this defense support money, as the gentleman from Michigan said, to maintain these armies and forces just to be doing it or just to be spending that money. Of course not. What we want to do is to have some friends in the world who have some of the sinews of war, to the end that we not be isolated with the Soviet threat on our borders. Rather is it to our advantage to, so far as we can, isolate them and maintain our operations and the operations of friendly nations who still believe in freedom and have a measure of freedom or a great deal of freedom, so that we are not overwhelmed by force of arms.

Mr. PASSMAN. Mr. Speaker, will the gentleman yield for one question while he is getting some water?

Mr. HALLECK. I do not need any water, I will say to the gentleman. I do not know how much more time the gentleman from Texas can give me. If the gentleman can give me an additional minute, I will be glad to yield.

Mr. THOMAS. I yield the gentleman 1 additional minute.

Mr. PASSMAN. Is it not true that we have already spent for this foreign aid program in excess of $128 billion since World War II? For the past 6 years, since it has been my privilege to chair this subcommittee, we have reduced the President's request by approximately $5 billion, and any time we made any reduction whatsoever, is it not true that you made the same claims that you are making today?

Mr. HALLECK. Now, let me just say to the gentleman that it was President Truman who first proposed programs like this. As I remember, it was the interim aid to France and Italy that was one of the first, and I responded to that request, and I am glad I did in the light of history.

Mr. PASSMAN. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I do not yield now. I want to answer the question. Then I remember it was aid to Greece and Turkey, and again I responded. And I do not believe the gentleman from Louisiana even would contend that those moneys were misspent or that that aid was not helpful in the defense of the free world, including the United States of America. Then we were given the Marshall plan. With respect to that I responded in a Republican Congress, may I say, and the help that has been given, in my opinion, has saved whole nations from going under the Communist yoke; nations that are now standing at our side.

Heavens on earth. Why contend about some of these things, because that has been our experience.

Now, if the gentleman will permit me——

Mr. PASSMAN. Will not the gentleman answer my question?

Mr. HALLECK. The President has told us by letters to me and other leaders and in a statement made to the press these very compelling things:

First, there is at the moment a great acceleration of events in the world that make our readiness and security measures even more critically necessary. This intensification he speaks of has come about at least in part since this mutual security budget was first approved by the House.

Second, the size of the cuts proposed will, in his judgment—and these are his exact words—"jeopardize the security of the country."

Third, postponement of these funds—and, I refer particularly, so far as I am concerned, to the two items on which this effort will be made—to January or later may, he said, irretrievably cripple us later.

The latest developments in the Congo show us what could suddenly develop during the 4 months the Congress is away. The President has got to have the funds to do the job.

Fourth, both parties and all the major national candidates are publicly on record in support of an adequate program of this kind. If we must err in these matters, as far as I am concerned, I want to err on the side of doing too much and not too little.

The President has told us of his estimate of the problem. May I say to you that, as the Speaker has just indicated—and that was followed by applause in which I joined—it is proposed that we adjourn sine die tonight. I want to join in every effort, in every way I can, to bring about that adjournment. If we adjourn sine die tonight, we will be leaving Washington, the Congress will not be in session, and then for the next 4 months the President of the United States—and he is the President of all of us—will carry the prime responsibility for the maintenance of our security.

I shall insert in the RECORD the letter addressed to me and the statement made by the President the other day, in connection with my remarks.

But he feels so strongly that to enable him to adequately defend our country these additional items, which come to only $91 million, should be in this bill, that so far as I am concerned I am going along with President Eisenhower as I have gone along with previous Presidents.

The President's letter of August 26 and his public statement of the same date follow:

Hon. CHARLES A. HALLECK,
House of Representatives,
Washington, D.C.

DEAR MR. HALLECK: I am deeply disturbed by the action yesterday of the conference on the mutual security appropriation. I cannot state too strongly my belief that a cut of this size will jeopardize the security of the country.

I am writing Senator JOHNSON and Senator DIRKSEN urging that the Senate reject this conference report should, despite all our efforts, the House approve it. I hope I can count on your cooperation in leading the House to recommit the bill so that the final action can conform fully to the national interest.

Both political parties and all of the major national candidates are publicly committed to the support of an adequate mutual security program. No one can responsibly contend that this conference report and the amounts approved constitute adequacy in today's world.

In view of the worldwide scope of this program and the necessity for planning so far ahead in such an effort, time is of the essence. These critical matters simply will not wait until the Congress returns in January, then to assess the results of its actions taken now. There is at the moment such an acceleration of events in the world that we must be forearmed at all times and ready to deal with critical situations as they develop. It must be evident to the Congress from the speed with which the situation in Africa recently developed that we must stay ready and that our free world security programs, economic and military, must be kept continuously adequate. Postponement of these funds needed now may irretrievably cripple us later.

I enclose a public statement that I have just released.

I am sending an identical letter to Speaker RAYBURN.

Sincerely,

DWIGHT D. EISENHOWER.

STATEMENT BY THE PRESIDENT

I am gravely concerned by the conference action on mutual security appropriations.

I have repeatedly stated that the appropriation of the full $4,086 million authorized is vitally needed. Moreover, needs which have developed since my original request, particularly the emergency in the Congo, have made necessary an additional $100 million for the contingency fund.

Only day before yesterday, by a 67–26 vote, the Senate approved the additional $100 million and at the same time increased last month's House appropriation of $3,584 million by $297 million. The conference, while approving the $100 million increase in contingency funds, virtually disregarded the Senate restoration in the basic mutual security budget. It accepted only $31 million—one-tenth of the $297 million restoration that the Senate had just overwhelmingly approved.

In short, the conference recognized the need for $100 million of new funds but at the same time slashed by $265 million the budget to which these new funds are to be added.

This cut would sharply curtail support indispensable to the defense of allies now under intensified Soviet pressure and deny aid urgently needed by other friendly nations

struggling under the gravest difficulties to make progress in freedom.

Not only are the funds now provided by the conference inadequate, but also a number of administrative restrictions were retained which would impair the management of the mutual security program.

Surely, in the world situation now confronting our country, the Congress will not accept these recommendations which fall so short of the need.

I urge that this appropriation be returned to conference. We must, for America, correct its deficiencies.

A congressional rejection of this request will hamper greatly the Nation's Chief Executive who succeeds me next January. Upon him will fall the heavy responsibility of continuing to guide our country in a troubled world. He, no less than I, must have adequate funds to do the job.

Mr. THOMAS. Mr. Speaker, I yield to the gentleman from Michigan [Mr. HOFFMAN], for a unanimous-consent request.

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, we have just listened to a forceful and impassioned plea from the minority leader, our distinguished colleague from Indiana [Mr. HALLECK] that we support this amendment.

We have under consideration the conference report on the second supplemental appropriation bill. On page 3 we find the amendment under discussion, which I understand is the one offered by the gentleman from Michigan [Mr. FORD], a member of the Appropriations Subcommittee and of the full committee, which, under the heading "Mutual Security—Defense Support" calls for an additional $65 million.

This amount is in addition to the billions heretofore appropriated for what is commonly known as foreign aid or a continuation of the Marshall plan, which followed World War II.

It was General Marshall, who under President Roosevelt was the active officer in charge of our national defense, who at that time told us that he did not know where he was the evening preceding the strike of the Japanese at Pearl Harbor—a statement which I have never been able to accept.

It was about that time that General Marshall adopted and gave his name to a policy which was obviously based upon the theory that the United States of America no longer with safety could depend upon its own ability to protect its future national security. It was then determined that by giving other nations aid and assistance, not only military assistance but help of all kinds, that we could purchase not only the friendship but the military support of other nations.

In pursuance of that thought, we have continued to pour out to other nations not only billions upon billions of dollars, not only tons of munitions of war but food and supplies of every kind plus technical assistance, disclosing to other nations our most improved methods of producing not only items which enter into commerce but implements of war.

Because of the help we have given her, Russia has become our rival in both domestic and warlike production, in military power, in scientific advancement. She has entered upon a conquest of the world encouraged by our contributions.

In lieu of bending our every effort to the advancement of our own ability to produce necessities as well as things desirable, and weapons of all kinds, we have expended a large part of our resources of all kinds to aid other countries and other nations which we hoped would deter the advancement of Russian might, buy us allies in other countries in time of need.

We have not only attempted to contain Russia, and in that effort often unsuccessfully, but we have established outposts, military bases of all kinds, at many points throughout the world. We have extended ourselves so far, our line of defense is so thin, that it is problematical whether we will at any of those points be able to successfully defend ourselves should war come.

This though we have placed excessive tax burdens upon our people, continued to draft them for military service, while the cost of a bare existence to the average individual goes ever higher. And the ruler of the Congo defies civilization.

My point is that our first line of defense is here at home. That that defense consists not only of the ability and knowledge to produce the most adequate weapons of destruction, but that fundamentally it depends upon our sound economic policy—that a bankrupt nation never will be able to defend itself.

As we look at the world picture given us each day by television, radio, and press, we realize and must admit that we are in a most humiliating and weakened situation. Because of our very alliances we can no longer assert our might as we wish in defense of American property, American lives, American national security.

Castro defies us. We are helpless until we have secured the consent of the other nations in the OAS, the members of the United Nations, various other international groups. Because we have surrendered so much of our sovereignty, entered into so many alliances, have the characteristic of keeping our word in a group which has no claim to consistency, we no longer are a sovereign nation, or an independent people.

This amendment for an additional $65 million offered by our distinguished colleague from Michigan [Mr. FORD] supported by that politically ambitious group of Young Republicans who seek political victory for the party in the coming election, not only seek but demand our support for this amendment, and for others which undoubtedly will be offered.

It is my feeling that as a representative of the people of my district, I am bound to speak and to vote for measures which will retain the independence of the individual and of my country, which will not destroy our sovereignty, which will continue to give us opportunity which, if rightly used, will be followed by prosperity and freedom for the individual and the States, and an unassailable position for my country.

It is with regret that I cannot on this occasion go along with my distinguished leader and his Young Turks, the partisan political shock troops of today, in support of this amendment.

In my humble judgment, foreign aid has proved to be ineffectual, an excessive burden to our people, which results in a denial, because of a lack of funds, of many things to which they are entitled, and it has not—it will not—bring us the desired results.

Moreover, and as a full and complete answer to this request, as has been stated on the floor, our President now has under his control $250 million, any part or all of which can be used by him at his discretion. Two hundred and fifty million of unused dollars.

If to insure our national security another $65 million is needed, the President has it in that $250 million. It is my understanding that today we will also be asked for $22 million for technical cooperation with other nations; for $26 million for another purpose.

Day following day requests come from industry—big and little—and from constituents, including the aged, and the members of other groups, for aid.

It is obvious that funds at our disposal, or which can be raised by taxation, however great they may be, are limited.

There is in my mind as we consider this measure a suspicion that because our political opponents accuse us of a lack of national defense, we should here on the floor, by this and two other amendments (7) and (8), answer that charge by granting an additional unneeded $113 million.

Though threatened as some have been by party leadership, unintimidated because history tells us that no nation has been able to purchase security, some cannot support this bill. That independence of the individual and security of the Nation is maintained only when a people remain strong, independent, and rely primarily upon their own ability to defend themselves. I seem to recall that in military might, in ability to defend ourselves, our presidential candidate told us, and he of all persons should know for he is at Ike's elbow, that we are in no way inferior to Russia.

A continuation of our past and present policy of casting our dollars broadcast, our technical knowledge and methods of production throughout the world, much if not all of which falls on barren ground, will produce for us nothing at all other than a humiliating submission and a continued payment of blackmail to other nations. For example, like the present proposal to give the comparatively ignorant and indolent people of the Congo American tax dollars.

Regretfully, I must refuse to go along with the demands of the minority leader [Mr. HALLECK] who sometimes jumps the party line when it does not conform to his personal ideas or with the wishes of a presently politically powerful group—the Young Turks—apparently looking

for positions of influence in what they hope to be the coming administration. In obedience to the wishes of those I represent, my vote must be cast against the granting of the additional sums called for by this amendment much as I dislike refusing to follow my politically powerful colleague, the gentleman from Michigan [Mr. FORD] who offered the amendment. The welfare of our own people should have first consideration. A vote for this amendment, that is, to add $65 million to this appropriation when the President already has at his disposal an unobligated $250 million, would be inconsistent with the principles which I have always followed.

Mr. THOMAS. Mr. Speaker, I yield 3 minutes to the gentleman from Maine [Mr. COFFIN].

Mr. COFFIN. Mr. Speaker, perhaps it is not often that I would join with the minority leader on a program in which he believes so passionately, but this time I do and I think a good many on our side of the aisle do. We went through this battle before. I think it is irony, I think it is hypocrisy for either party to thump the tub throughout the land in the next 2 months, calling for stronger defense, if we do not restore what is, essentially, defense moneys.

My only regret is that we cannot put back into this bill not only defense support, but also untie many of the restrictions which do not cost money, but nevertheless tie the hands of people who are expected to administer the program—the ICA Administration, the Development and Loan Fund Administration, the Inspector General.

I hope these motions are successful. I hope that these restrictions are removed. I hope that as many on the other side of the aisle will join us in our attempt to remove these restrictions. But I agree wholeheartedly with the statement that we cannot leave here in good conscience, leaving the President, who is the President of all of us, in the shape he will be in if this is not restored and if other corrective measures are not taken.

Many of you who will be leaving are coming back. I am not coming back. It is a source of great sadness to me to see that our attitude toward this essential program, which has never been more vital than it is this year, is somewhat cavalier, that at times it constitutes a virtual abandonment of our individual judgments as Members of this Congress to any committee or subcommittee, however able, devoted and dedicated it may be. On this issue, as in very few other issues, the deepest self-searching, the most keen and farsighted dedication on the part of every Member is required.

And so, Mr. Speaker, I urge not only that we restore this money to defense support as part of our vital defense effort in this vitally critical year of 1960, but that we consider with great sympathy and favor other motions that will be made to put back into this bill some flexibility, some discretion; to take off restrictions so that our administrative people can operate programs effectively, the objective of which all of us say we want. The proof of the pudding, however, is in the eating and in my opinion it will lie in how we vote on these several motions.

Mr. THOMAS. Mr. Speaker, I yield 3 minutes to our beloved friend from New York [Mr. TABER].

Mr. TABER. Mr. Speaker, when this particular item we are considering at this time was before the committee I supported it. When the bill was on the floor here I supported a motion by the gentleman from Michigan [Mr. FORD] to insert this item in the bill.

The reason for this item is this: Are we going to have placed over in Europe and other places an enormous number of soldiers of our own, or are we going to continue to try to keep those who have been carrying the burden of surrounding Russia, like Greece, Turkey, and those countries in the Far East: Korea, the Philippines, and Taiwan, and that sort of thing? Those people, if they are with us, save us from having to have a great lot of troops in our Army that we do not have now. They leave us where we are able to use our troops as sort of shock troops, to move them around from place to place where they can be of the most service.

Frankly, I do not believe that there is anything in this bill at all which is more important than the item of defense support, because it provides for the clothing and the food for a lot of these people who could not have it otherwise.

Mr. FORD. Mr. Speaker, will the gentleman yield?

Mr. TABER. I yield to the gentleman from Michigan.

Mr. FORD. I think the argument can logically and rationally be made by those who overall in the past have been basically opposed to the mutual security program. Even though they have voted against the program generally, here is an essential isolated program which is a part of the total. This is a vital and integral part of our own national security. They can be opposed to the mutual security program as a whole, but they could be favorably inclined to, and they could, endorse the military and defense support aspect of this vital operation.

Mr. THOMAS. Mr. Speaker, I yield 1 minute to the gentleman from Iowa [Mr. JENSEN].

Mr. JENSEN. Mr. Speaker, I am not an authority on this particular matter but I think I know something about the condition of our Treasury at this time. Bob Anderson, the Secretary of the Treasury, gave us quite a lecture last January 20. He came before the full committee at the request of the chairman, the gentleman from Missouri [Mr. CANNON]. I am frank to say that he scared some of us pretty badly by giving us a clear picture of our financial status and in no uncertain terms.

This bill, Mr. Speaker, was considered very thoroughly by the regular committee. It is not proper legislative procedure when after a committee has held long hearings and finally come to an agreement, and the other body has come to an agreement, and the conferees have ironed out their differences and brought the conference report back in full agreement relative to the foreign aid bill, that we must then accept this kind of legislative action. I contend it is a pretty black blot on the intelligence of the House of Representatives.

Mr. THOMAS. Mr. Speaker, I yield 5 minutes to the gentleman from Virginia [Mr. GARY].

Mr. GARY. Mr. Speaker, I would like first to explain the parliamentary situation on this bill. A motion has been made for the House to recede and concur in this amendment. I have asked that the motion be divided so that the vote will be taken on just one point, and that is whether this House is going to stick by its committee and by previous commitments or whether the House will recede and do the will of the bureaucrats and the other body. It is going to be that simple. I do not want any dollar mark involved in this, Mr. Speaker. It is purely and simply a question of principle. This House thrashed this measure out from beginning to end in the mutual security appropriation bill, and it then went to the other body. The other body put back practically all the money the House cut from the bill. Then we sat down in conference and we had a solemn agreement which, mind you, was reduced to writing. This was a written agreement. It was approved by both the House and the other body. Shortly thereafter the agreement was broken by inserting the funds in this supplemental bill. I want to ask the House this one question: Does the vice of breaking agreements which we condemn so vehemently in our enemies become a virtue when it is practiced by the Congress of the United States?

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. GARY. I yield to the gentleman from Indiana.

Mr. HALLECK. I would like to understand the parliamentary situation. In other words, if I understand the gentleman correctly, if there is a division of the question, then, the House first votes on the question of whether or not we are going to recede; is that correct?

Mr. GARY. That is right.

Mr. HALLECK. Of course, if that motion to recede does not carry, then the $65 million has been knocked out of the bill.

Mr. GARY. Then the position of the House will have been upheld. The $65 million is not in the bill. The $65 million will not be put in this bill, where it does not belong.

Mr. HALLECK. In other words, if the gentleman will yield for just one moment further, the first vote that would occur then would be on the question whether or not the House would recede.

Mr. GARY. That is correct.

Mr. HALLECK. And if the House does not recede, then we have defeated the purpose of the motion offered by the gentleman from Michigan [Mr. FORD]. That will be the practical effect; is that correct?

Mr. GARY. That is correct. It will keep the $65 million out of this bill, which is as it should be, and will carry out the agreement of the House and the other body which was solemnly entered into in conference and approved by both the House and the other body. Any

other procedure, Mr. Speaker, under these circumstances will absolutely destroy our whole congressional committee system. After our committee has sat day after day, week after week, and month after month to hear these matters, if our recommendations are thrown in the trash basket, what incentive do we have to hold hearings next year and to collect information on the program? All that is left for us to do is to simply follow the bureaucrats downtown and do whatever they bid. Does the House of Representatives intend to become a puppet of the bureaucracy downtown? If so, then I say I will have no pride and feel no honor in being a Member of this great body.

Mr. Speaker, I believe the House of Representatives will rise above such action and I trust that the House will vote to recede.

Mr. THOMAS. Mr. Speaker, I yield 5 minutes to the distinguished majority leader the gentleman from Massachusetts [Mr. McCORMACK].

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. Briefly.

Mr. HALLECK. I want to observe that supplemental appropriation bills add money regularly to appropriations therefor made in regular appropriation bills. So there is no violence done in the action here proposed.

Mr. McCORMACK. Mr. Speaker, the gentleman from Louisiana [Mr. PASSMAN] has done an outstanding job, in my opinion, as chairman of the subcommittee. I know his views on legislation of this kind. I have had many talks with him, and I think he has made a great chairman of the Subcommittee on Appropriations. I commend him as highly as I possibly can. But the situation we are in today is no reflection upon him or his committee. We are faced with a situation where the question involved is the amount of $65 million for defense support. The gentleman from Virginia [Mr. GARY] says that it is not a question of dollars but a question of principle. I did not figure that the conferees, in adjusting differences, involved so much principle as it involved ironing out differences between the two Houses. If there is any principle involved, the principle is what effect this $65 million would have upon our national defense, because defense support is a part of our national defense.

The observation made by the gentleman from Indiana [Mr. HALLECK] in connection with supplemental bills has a binding effect, and certainly if the argument made by the gentleman from Virginia [Mr. GARY] was to be followed out to its ironclad conclusion, once the conferees met and agreed and both branches approved a conference report, particularly in connection with appropriation bills, no supplemental budget could be sent up during the remainder of that fiscal year.

When the conference report came up last week, the situation was different than it is today. We are faced with a new situation from a parliamentary angle. When the conference report came up last week we were in a position where this particular motion could only be made with the greatest of difficulty, if made at all. When the original bill came up, those who believed in increasing the appropriations were faced with another primary important matter. Every effort was concentrated upon that effort to increase the appropriation.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield.

Mr. GROSS. Did the distinguished majority leader support the move made when the foreign aid bill was originally before the House to put this money back in at that time?

Mr. McCORMACK. May I say that the gentleman from Massachusetts was away from Washington on that occasion, but I sent word down asking to be paired in favor of the amendment to increase.

Mr. FORD. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield.

Mr. FORD. It was my amendment that tried to put this money in at the time the bill was on the floor and the distinguished majority leader, before the vote was taken, helped materially in trying to get assistance in this area.

Mr. McCORMACK. I think I have answered the gentleman's question.

Mr. PASSMAN. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the gentleman from Louisiana.

Mr. PASSMAN. I am fond of the majority leader, but I am glad to know his position on the mutual security bill because I thought he had a different position. But do you realize that the conference on the mutual security allowed $491 million more than we allowed this agency last year?

Mr. McCORMACK. Yes.

Mr. FORD. We approved this bill.

Mr. McCORMACK. That is true, but last year was 1959; we are now in 1960. The world situation has changed a lot in the last year; much water has gone over the dam in the last year. The problems confronting us, grave as they were last year, are much graver this year.

In support of the amendment in connection with the $65 million, the Speaker has authorized me to state that he concurs with my position and that he hopes the amendment will be agreed to.

I might also say that in the other body the Democratic nominees for the Presidency as well as the Vice Presidency, were instrumental in this, and due to their leadership I think I can fairly say that this amount was included. But, discussing this point, if we are going to err in judgment, I prefer to err on the side of strength, rather than on the side of weakness.

Mr. THOMAS. Mr. Speaker, I am going to talk briefly and then I am going to move the previous question on the motion of the gentleman from Michigan.

I sincerely think the motion of my beloved friend, and there is no finer Member not only in this House, but any other place, ought to be voted down. Let me see if I can summarize, because I do not think anybody can add anything to what has been said on this entire program in the last 10 years. It is pretty difficult for me to disagree with my personal friend and my beloved majority leader. But that has nothing in the world to do with this bill.

There is nothing that affects this bill today that did not affect it a week or 10 days ago when the other body marched up the hill; then when they got the word from the bureaucrats, politely and obediently marched right down the same hill.

There is nothing partisan in this matter as far as I am concerned and I do not think there ought to be any partisanship on either side of the aisle in this matter. It is all our money. We are all trying to do the right thing, and the purpose of it, if you please, is to protect us all. If there is a good part of the program—let us be frank about it—it should be this military aid. But let us see about the partisanship in the matter. Who knows who is going to be President next year? It looks to me as though it would be very close. Why should our beloved President want to bind his successor whether it be our distinguished Vice President or the distinguished Senator from Massachusetts. Why tie their hands? Let us be frank about it. This is a matter that is in the control of the President of the United States, whoever he may be. You have only 4 months before he takes office. Why cheapen the Congress? Do we not have the authority and the duty to appropriate? Is it not our duty and our exclusive jurisdiction to legislate? Then why tell us: "If you do not do this I will veto it"? I am not being partisan; I am just talking plain horsesense. I am jealous of the House and its rights and prerogatives. We are a constitutional body the same as the executive branch, and in this field it is our duty to appropriate and to legislate, and not that of any bureau.

But let us talk about a few dollars now. You have in the regular bill over $3.7 billion this year, which is, in round figures, $500 million more than last year for this program. But let us be frank again, the whole program is in ill repute. You know that and I know that. If you do not know it, go back home and talk to your people. I repeat, go back home and talk to your people if you do not think the whole program is in ill repute.

For this defense support you have $610 million. How in the world can anybody allocate that and get it into the program by January? You know it cannot be done. It cannot be spent in under 7 or 8 months. Is that all he has? Not by a jugful. In the foreign aid bill that the other body has marched up the hill one day and down the next on, there is $250 million more in emergency funds that can be used for identically this purpose. So add it up, get to your arithmetic, and that is $860 million. Can he allocate that between now and January 1? We are going to be back here—that is, the Congress is—and I hope every sitting Member is back at that time.

So, what is the urgency here now? None whatsoever. They have $860 million. I repeat, nothing has happened in

the last two weeks that would warrant an increase of one penny.

Mr. Speaker, I hope the Members of the House will vote down the amendment offered by my able, lovable, and distinguished friend from Michigan.

Mr. Speaker, I move the previous question.

The previous question was ordered.

Mr. GARY. Mr. Speaker, I have no desire to quibble over dollars in this matter. I withdraw my request that the vote be divided so that we may take the vote on the entire motion at one time.

The SPEAKER. The question is on the motion offered by the gentleman from Michigan [Mr. FORD], that the House recede and concur in the Senate amendment.

Mr. GROSS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 203, nays 193, not voting 35, as follows:

NOT VOTING—35

Anderson, Mont.	Hébert	Pilcher
	Hess	Preston
Auchincloss	Jackson	Rogers, Mass.
Baumhart	Kilburn	Roosevelt
Bolling	Lafore	Sheppard
Buckley	Landrum	Shipley
Davis, Tenn.	McMillan	Smith, Kans.
Doyle	McSween	Taylor, N.Y.
Durham	Magnuson	Thompson, La.
Flynn	Mitchell	Vinson
Grant	Morgan	Willis
Green, Oreg.	Murray	Withrow

So the motion was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Auchincloss for, with Mr. Smith of Kansas against.

Until further notice:

Mr. Hebért with Mr. Hess.

Mr. Doyle with Mr. Jackson.

Mr. Buckley with Mr. Baumhart.

Mr. Magnuson with Mrs. Rogers of Massachusetts.

Mr. Sheppard with Mr. Withrow.

Mr. Thompson of Louisiana with Mr. Taylor of New York.

Mr Morgan with Mr. Lafore.

Mr. Roosevelt with Mr. Kilburn.

Mr. LANE changed his vote from "nay" to "yea."

Mr. BASS of Tennessee changed his vote from "nay" to "yea."

Mr. MORRISON changed his vote from "yea" to "nay."

Mr. WALTER changed his vote from "nay" to "yea."

Mr. MINSHALL changed his vote from "nay" to "yea."

Mr. BOSCH changed his vote from "nay" to "yea."

Mr. O'KONSKI changed his vote from "nay" to "yea."

Mr. KILGORE changed his vote from "nay" to "yea."

Mr. HOLLAND changed his vote from "nay" to "yea."

The result of the vote was announced as above recorded.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 7: Page 3, line 8, insert:

"TECHNICAL COOPERATION

"For an additional amount for technical cooperation, as authorized by section 304 of the Mutual Security Act of 1954, as amended, $22,000,000."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House insist upon its disagreement to the amendment of the Senate numbered 7.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 8: Page 3, line 12, insert:

"SPECIAL ASSISTANCE

"For an additional amount for special assistance, as authorized by section 400(a) of the Mutual Security Act of 1954, as amended, $26,000,000."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House insist upon its disagreement to the amendment of the Senate numbered 8.

Mr. TABER. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. TABER moves that the House recede and concur in Senate amendment numbered 8.

Mr. THOMAS. Mr. Speaker, I yield 5 minutes to the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Speaker, this amendment would provide $26 million more which would bring the special assistance item up to the authorization figure. It has been one of the most important links in trying to keep this whole worldwide structure together. I do not believe they can very effectively get along without it. There are not enough funds on hand to meet what is required in connection with the operation of the mutual security program.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. TABER. I yield.

Mr. GROSS. What is in the fund at the present time?

Mr. TABER. There is not very much left.

Mr. GROSS. How much?

Mr. TABER. In this account there is $230 million.

Mr. GROSS. What is the purpose of the special assistance fund? Give us some information, since you want so much more money.

Mr. TABER. It is to help countries where they have situations arise that they are unable to take care of themselves.

Mr. GROSS. Give us some example of a situation that might arise that this fund will provide for.

Mr. TABER. When we had the Near East trouble a year ago, it took a lot of money out of this fund. Libyan and Jordan propositions took a lot of money out of it, and there are other similar situations which arise from time to time which require attention.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. TABER. I yield to the gentleman from Massachusetts.

Mr. CONTE. Is it not true, Mr. TABER, that we have a program in Morocco, Jordan Tunisia, Bulovia, Libya and Sudan, many trouble spots in the world; we have the malaria eradication program, water supply programs, educational programs, disaster relief, Project Hope, and tropical Africa program.

Mr. TABER. Yes; but you have more than that. The most important thing that is involved in this picture are the payments that are made to these people in the Middle East and Near East, and in that part of the world where they give us rights to maintain airfields so that we can get around the world. Otherwise, we would be in a lot of trouble without something of that kind to take care of it.

Morocco, Ethiopia, Saudi Arabia, Iran and, when you get over into Pakistan and into the Far East countries, you strike that thing all the time. This is where they get the money to operate that sort of thing.

I hope the motion will be adopted.

Mr. THOMAS. Mr. Speaker, I yield a minute to the gentleman from Texas [Mr. POAGE].

Mr. POAGE. Mr. Speaker, I take this time to make an announcement before we discuss the pending matter. Roberta Levering, the 13-year-old daughter of our colleague, ROBERT LEVERING, has had a bull named "General" adjudged the grand champion of the Ohio Hereford State Fair exhibit. I thought the membership would like to congratulate Miss Roberta Levering on her splendid achievement.

Mr. THOMAS. Mr. Speaker, I yield 5 minutes to the gentleman from Louisiana [Mr. PASSMAN]

Mr. PASSMAN. Mr. Speaker, while we are attending to the American taxpayers' business, I would like to have the attention of the House.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman from Iowa.

Mr. GROSS. Does the gentleman think we are attending to the taxpayers' business here in view of the last vote which added $65 million to a program already overloaded with money?

Mr. PASSMAN. Mr. Speaker, at this particular moment the mutual security program for fiscal year 1961 amounts to $8,551 million, the highest it has been in 5 years. We are now on the way back up the hill on this uncontrolled program.

May I say, Mr. Speaker, as the mutual security program started off last year, they had to their credit for special assistance $418,489,000. Today, without the funds proposed in the amendment now under consideration they have to their credit $429,489,000, which is in excess of $10 million more than they had available last year.

May I respectfully call to your attention, Mr. Speaker, that prior to this special assistance item we had an account known as the development assistance appropriation. You have not heard of an appropriation for the development assistance program for 5 years. But notwithstanding the fact that you have substituted the special assistance title for development assistance, the agency still has to its credit $57,769,000 in the old development assistance account.

Mr. Speaker, there is no justification for the amendment before the House at this time. We covered this item in our subcommittee hearings. We covered it in our full committee, and I think, with the support of the gentleman from New York [Mr. TABER], we covered it on the floor of the House. We covered it in conference and we brought it back to the floor of the House, and, so far as I know, there has been no attempt—and as chairman of this subcommittee, it would appear that I would be let in on these things—not one attempt in the full committee, or on the floor of the House when the bill was brought up to add any funds to this appropriation. We reached a speedy agreement in conference. We came back to the floor and the House supported the position of the conferees.

I want to reiterate, if I may, that prior to this particular item of $26 million in this bill, we had the development assistance program. The special assistance program succeeded the development assistance program but they still have unexpended in that account $57,769,000. In special assistance alone at this moment you have available $10 million more than you had last year. And, in the overall program there is available in excess of one-half billion dollars above last year.

I believe the House knows that there is no justification whatsoever for any increase for this item as agreed to on several different points in our deliberations.

Mr. FORD. Mr. Speaker, will the gentleman yield?

Mr. PASSMAN. I yield to the gentleman from Michigan.

Mr. FORD. The gentleman from Louisiana said nobody had taken exception to this item. I am sure his memory could be refreshed by the fact that at the time of the conference report and the signing of it I did take exception to this item, along with the defense support.

Mr. PASSMAN. Let me put it this way. There was no attempt at any point along the way in the full committee, or on the floor and back to the floor with the conference report to increase this amount. There is no need to do it today.

Let us remember, Mr. Speaker, that we represent 180 million Americans, and we have already withdrawn from the Treasury in excess of $2 billion more than we deposited in the Treasury during the first 2 months of this fiscal year. Along with that we have a public debt of over $280 billion, and we are appropriating billions of dollars in excess of what we are taking in.

Mr. Speaker, I trust in the interest of what is right and what is fair that you vote down this amendment.

Mr. THOMAS. Mr. Speaker, I yield 3 minutes to the gentleman from New Jersey [Mr. GALLAGHER].

Mr. GALLAGHER. Mr. Speaker, the gentleman from Louisiana asked for the justification of this amendment. I say that the justification of the amendment rests in our continuing to accept our responsibliity as leader of the free world. If we are about to yield our leadership, then, of course, this entire mutual security program should be scrapped. But if not then we should accept our responsibility—vote to reverse the cut. Our duty in the House today is to improve our position of freedom and independence and with it the ability to extend these blessings to all who desire them.

The slashes which the opponents of this program have imposed undercuts the whole structure of American financial support to our allies and friends which is designed to help them maintain their freedom and independence.

There has been a question as to the programs which come under the scope of special assistance. I, therefore, would like to mention within the time allotted to me some of the more important aspects of this program.

SPECIAL ASSISTANCE

The difference: The Senate version appropriates $26 million for this purpose to supplement the $230 million in the mutual security appropriation bill. The House version contains no funds for this purpose.

Executive branch position: The executive branch strongly favors the Senate version. The appropriation of $26 million below the amount authorized is extremely severe. It disregards the political requirements which govern the planning and use of this appropriation, and the hard-core nature of the request of the executive branch for $268.5 million.

Part of the irreducible hard-core of the request is the $123 million programmed for Morocco and Libya—where base rights provide significant military advantage to the United States; for Jordan—which, without our support, would certainly collapse with accompanying violence which could spread; and for Afghanistan—on the Soviet border and target of major Soviet effort.

With the amount provided by the mutual security appropriation, after these four major hard-core programs, only $107 million would be available for all other requirements which total $145.5 million. To meet this reduction, a cut

of 26 percent would have to be made, on the average, in all other special assistance programs.

Yet proponents have urged the essentiality of various of these special assistance programs. The House Committee on Foreign Affairs urged maintenance of the programed figure for the special program for tropical Africa and in its report recommended a higher level for Israel. The Senate Committee on Foreign Relations recommended full retention of the tropical Africa program and of the health and related welfare activities. The House Appropriations Committee indicated that their reduction was not to affect the malaria eradication program.

In addition, examination of other special assistance programs will demonstrate that such a slash of more than 26 percent would result in incalculable loss in U.S. influence and to our interests. Programs in critical Bolivia and Haiti, in world-spotlighted Berlin, in Tunisia, Israel, and Burma, activities to support the United Nations Emergency Force and American-sponsored schools abroad would all be subject to gross curtailment or would have to be eliminated. Even the elimination of three or four of these, a course clearly not in our interests, would still make it necessary to reduce sizably the remaining programs.

Mr. PASSMAN. Mr. Speaker, will the gentleman yield?

Mr. GALLAGHER. I yield to the gentleman from Louisiana.

Mr. PASSMAN. Mr. Speaker, will the gentleman give some credit to the subcommittee and the full committee that considered this bill? We took over 10,000 pages of transcript, 3,000 pages of printed testimony, 4 months of hearings, some of them going as late as 11 o'clock at night. We had the support of the subcommittee, the full committee and of the House and House approval of the conference. Does not the gentleman think that this item has had a pretty good going over?

Mr. GALLAGHER. Yes, sir.

Mr. PASSMAN. I thank the gentleman very much.

Mr. GALLAGHER. I would like to compliment the gentleman from Louisiana and say that his committee did work hard and diligently on this. I would like to say, also, that the Committee on Foreign Affairs of which I am a member has worked just as hard. And it is our opinion that this amount is justified. We differ merely in approach to our national security.

Mr. PASSMAN. Mr. Speaker, will the gentleman yield further?

Mr. GALLAGHER. I yield.

Mr. PASSMAN. Does the gentleman not realize that the Senate conferees led the House conferees into a trap? They got us to recede on the $100 million item for the contingency fund that this House has not authorized as yet. They led us into a trap and today through some misunderstanding the House is not supporting the committee.

Mr. GALLAGHER. I do not believe this was a trap. This supports the original authorization and I again request the House to support the motion of the gentleman from New York.

Mr. THOMAS. Mr. Speaker, I yield such time as he may require to the gentleman from North Carolina [Mr. WHITENER].

Mr. WHITENER. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina.

There was no objection.

Mr. WHITENER. Mr. Speaker, during my service in the Congress I consistently have opposed appropriations for the so-called mutual security program. While I believe that the United States has a duty to assist our oversea allies in opposing communism, I have never been convinced that the huge sums we have appropriated over the years have been spent to the best economic, political, and military advantage of the United States.

Few people in our country have realized the magnitude of the foreign aid program. It is difficult for us to comprehend the extent to which our taxpayers' money has been used in all parts of the world.

In the beginning, the American people were led to believe that foreign aid expenditures would be temporary. The initial purpose in voting billions of dollars for oversea nations was to put their war-ravaged economies on a sound basis and thus protect them from the inroads of communism.

Billions of American dollars were made available for Europe and the Far East. The march of communism, to a great extent, was halted. Between 1945 and 1950 the United States had succeeded in restoring the economy of Europe, and the economic situation among our friends in the Far East had been stabilized.

Mr. Speaker, there were those in our Government, however, who looked upon foreign aid, not as a temporary measure of assistance to oversea nations, but as a permanent program for the United States. Through the years, therefore, the base of our oversea spending was extended, and the foreign aid program became an integral part of our relations with other countries.

That is the situation in which the United States finds itself today. We have become so accustomed to trying to solve our international problems with dollars that it sometimes seems we have no other foreign policy. Under such a program there is no end, of course, to the vicious cycle of oversea spending to which the United States unfortunately has been committed.

It will continue until such time as the Congress reexamines the entire foreign aid program and adopts a more realistic approach to our foreign relations. The United States cannot purchase friends overseas. We cannot persuade the world to oppose communism through grants of money. The will to survive in freedom must come from within each individual nation. Until such time as some of the nations we are helping exhibit such a will all the economic and military assistance we are capable of giving will accomplish nothing other than the insolvency of the United States.

Mr. Speaker, I believe in helping those countries who indicate a genuine will to resist communism. I do not believe, however, in spending money we do not have but must borrow to support governments cooperating with the Communists, and which, in many instances, hold the United States in contempt. Since the end of World War II the United States has spent for economic assistance to oversea nations the staggering sum of $70,362 million. This tremendous sum has been appropriated year after year, and our national debt has shown a corresponding increase. With a national debt in excess of $286.6 billion the United States has a debt far greater than the combined national debts of the rest of the nations of the world. We have engaged in every type of foreign aid program from building sawmills in Formosa to providing funds for the operation of foreign universities.

One of the principal reasons, Mr. Speaker, that has made it impossible for me to support mutual security appropriations has been the corruption, mismanagement, and lack of planning that has characterized our oversea spending operations. The subcommittee for review of the mutual security programs of the House Foreign Affairs Committee issued an interim report on February 15, 1959, which reveals some startling facts. The subcommittee found that an examination of five of our economic development projects in Pakistan and Formosa demonstrated that it has been the practice of those administering the mutual security program to obligate appropriated funds for specific projects many months, and even years, before detailed plans and arrangements for carrying out the projects were formulated. This, of course, has resulted in waste and is indicative of the mismanagement in the foreign aid program.

In our military assistance program the subcommittee found that in one country the record in a motor pool showed enough tires had been supplied during the course of 1 year to make 44 tires available for every truck on hand. It also found that other examples of poor stockkeeping in our military assistance program were abundant. In one instance only one carburetor for 2½-ton truck engines was found to be in stock for an entire Army. It also found in another case that a supply of a particular ammunition item adequate for 185 years was on hand.

The subcommittee was also critical of the fact that apartment houses were found to be under construction overseas using materials and equipment that had been made available by the United States for military construction.

These are examples, Mr. Speaker, of what is happening with our money in many parts of the world. It is hard to believe that such practices can effectively advance the prestige of the United States and combat the spread of communism. During the past several months a number of countries that have received generous portions of American aid throughout the years have adopted policies inimical to the best interests of the United States. Laos, for instance,

has been saturated with American dollars. For the past several years we have supported practically the entire economy of Laos, but communism is still present in the country. Within the past several weeks a regime has been installed which is not to the best interests of the United States. We have been very generous with both Ethiopia and India. Yet these nations maintain a neutral position, and while accepting assistance from the United States they also accept funds from Soviet Russia.

In Africa we have assumed the burden of financing the new nations that are emerging in that troubled area of the world. Two of them, Guinea and Ghana, have been in existence for a very short time and have received large grants of American aid. I regret to say, however, that these countries are oriented toward the Soviet Union. In spite of this fact, we continue to give them our money.

We are all familiar with the turbulent situation existing in the Congo. I do not think anyone can say that a stable government exists in that former Belgian possession, or that the country's premier, Patrice Lumumba, is a friend of the United States. The administration, however, requested the Congress recently to make available $100 million for the Congo in spite of these facts.

Mr. Speaker, there is another grave area where our foreign aid expenditures are reacting to the disadvantage of the United States. Over the years our tax dollars have helped to create industries overseas which, by the use of cheap labor, are manufacturing products for sale in the United States at a price below that of similar American-made products. As a result of this practice our textile, watch, pottery, bicycle, leather, and even steel industries, to name a few, are suffering severe economic distress.

Imports of foreign-made goods are exceeding the export of American products by $4 billion annually. This has created an alarming situation with respect to the gold reserves of the United States. Since the beginning of 1958 the U.S. gold reserve has shrunk by $3.7 billion. Since 1958 more dollars have left the United States each year than have come in. This is the first time that such a situation has arisen since the Civil War, and there is no present hope in sight that the trend will be reversed. Unless something is done, however, to halt the flow of American dollars abroad the United States will soon be faced with the stark reality of a depleted gold reserve.

The textile industry has been the basic American industry most hard hit by our foreign aid operations. In a 10-year period from April 3, 1948, to June 30, 1958, the United States has paid for $141,019,000 worth of textile machinery to be installed in foreign countries. This great sum of money is in addition to vast sums we have loaned through the Export-Import Bank for the export of textile machinery.

American foreign aid funds have helped to build and equip new textile mills in Japan, India, Pakistan, West Germany, and a number of other nations. The result of this ill-advised generosity has been a flood of cheap textile products on the American market and the loss of thousands of jobs for our textile employees. Textile employment in the United States shows a steady decline; yet we in the Congress who have attempted to halt the flow of foreign-made textile products have met with no encouragement from the present national administration. The foreign aid program has helped to create a new textile industry overseas which is today in direct competition with our domestic textile economy.

Some idea of the magnitude of the problem facing the American textile industry can be seen when we realize that foreign textile products are flooding the United States at a rate equivalent to more than 500,000 bales of cotton per year. During June of this year the importation of cotton cloth established a record volume—50,720,032 square yards were imported. This volume is an increase of 41 percent over May of this year. During the first half of 1960 the importation of cotton cloth exceeded by 207 percent the volume imported during the first half of 1959.

Mr. Speaker, this is a grave matter to the people I am privileged to represent in the Congress. My congressional district has the largest concentration of textile manufacturing plants to be found in the United States. The jobs of many thousands of my constituents are at stake in this matter as well as the economic stability of North Carolina. I cannot, therefore, support any program of oversea spending which will encourage the importation of cheap textile products to this country with a resulting loss of jobs for my constituents.

Mr. Speaker, it is time for the Congress to reexamine our whole foreign aid program, together with the impact that it is having on the survival of basic American industries. We must, of course, continue to assist our proven friends in their battle for survival against communism. We cannot, however, keep up our present indiscriminate rate of spending and maintain our own economic solvency. A strong and economically sound United States of America is the best hope of mankind for survival in this tragic era. If the United States falters economically there can be no hope for the survival of the rest of the world. I believe the present hodgepodge of foreign aid programs is hindering, rather than advancing, the best interests of our Nation. It is time for the Congress to face this basic fact, and until such time as we adopt a more realistic approach to foreign aid spending I shall oppose all appropriations for such purpose.

Mr. THOMAS. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Mr. Speaker, I hope that the House will recede on this amendment. The special assistance part of the program is 13 percent of the entire U.S. economic aid. It affects 22 of the great allies and friends of the United States. As the gentleman from New Jersey [Mr. GALLAGHER] just pointed out, the $123 million of this fund is for countries such as Morocco and Libya. In Morocco we have the largest air base outside of the United States. In Jordan, if we did not have this particular kind of help at this time you would certainly have a collapse with accompanying violence, which could spread, as well as in Afghanistan on the Soviet border, and a target of the major Soviet effort.

Taking the amount provided by the mutual security appropriation, after these four major hard-core programs, only $107 million would be available for all other requirements, which total $145.5 million. To meet these reductions a cut of 26 percent would have to be made on the average in all other special assistance programs.

The Senate has programed a special program for tropical Africa, and stated that we have to have $20 million for tropical Africa. The House and the Senate recommended a higher level for Israel. The Senate Committee on Foreign Relations recommended full retention of the tropical Africa program and of the health and related welfare activities. The House Appropriations Committee stated in language that said in effect, let us not do anything to the malaria eradication program, which is an excellent program. We find ourselves in the ridiculous position of saying, do not touch the tropical Africa program; do not touch the malaria eradication program; do not touch this program, do not touch that program. But yet they made an across-the-board cut which will go deep into all of these programs.

Mr. Speaker, these programs are in critical areas such as in Bolivia, in Haiti, in the world-spotlighted Berlin, in Tunisia, in Israel, which I have already mentioned, and in Burma. They sponsor activities in the schools abroad, such as the American University of Beirut. I am sure my good chairman, who feels very strongly about the American University at Beirut, would not want to see anything done here today to hurt that particular program. Unless we restore this $26 million, all of these worthwhile programs will have to be reduced.

Mr. THOMAS. Mr. Speaker, I yield 3 minutes to the gentleman from Iowa [Mr. GROSS].

Mr. PASSMAN. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I am happy to yield to the gentleman from Louisiana.

Mr. PASSMAN. I think I should apologize to the members of the Subcommittee on Appropriations handling this legislation. We did go to the other body for a conference. They had added $100 million for the Congo. The item had no hearings in our committee. We agreed to put the $100 million item into the contingency fund for the Congo that has not yet been authorized by the House of Representatives. That is why some of us on the subcommittee feel so very badly that the other body would attempt what they appear to be succeeding in doing.

Mr. GROSS. Mr. Speaker, we have heard the same old specious arguments here this afternoon, the same old platitudes about how the world is going to end unless we vote added millions upon millions of dollars into this bill. I do

not know about the taxpayers in Massachusetts, Indiana, New York, Minnesota, and especially Michigan, where only a few months ago that State could not even meet their payrolls, where teachers' salaries went unpaid. Apparently everything is lovely and the goose hangs high in New York, Indiana, Michigan, Massachusetts, and other States, some of whose Representatives are the chief spokesmen this afternoon for adding more millions to this foreign giveaway. It is different in the State of Iowa, where farm income continues to go down and cost of operations for farmers continues to increase. We do not have this kind of money out there, and we would appreciate help from Michigan, Indiana, Minnesota, New York, and Massachusetts, where you are apparently so well fixed you can afford to support the spending of billions in foreign countries, whose slogan now seems to be, "You give us the money and we will give you trouble."

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield.

Mr. HOFFMAN of Michigan. Let me tell the gentleman about the goose that hangs high in Michigan. Did the gentleman ever smell a goose that has hung high a long time?

Mr. GROSS. Not for some time.

Mr. HOFFMAN of Michigan. You know after a while what happens, how it pollutes the air?

Mr. GROSS. Yes.

Mr. HOFFMAN of Michigan. That is what this program has been doing.

Mr. GROSS. If this amendment is adopted, perhaps we should put all the rest of them in, and make this bill good and rich. Must this Nation be put through bankruptcy to convince a comparatively few people that our country cannot forever bear burdens of this kind?

Mr. PASSMAN. The taxpayers are entitled to a better break than that.

Mr. THOMAS. Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota [Mr. JUDD].

Mr. JUDD. Mr. Speaker, it ought to be pointed out that this amendment is on all fours with the previous amendment as two essential elements of our total defense. There are two kinds of countries to which we give aid in these two amendments. First, those to which we are giving military assistance. Defense support is to give them enough economic assistance so they can keep in the field and use effectively the military forces we have helped them build up. Second, special assistance goes to countries with which we do not have military alliances, to which we are not giving military aid in any significant degree, but which occupy strategic positions around the periphery of the Iron Curtain or have facilities that are important to us, or whose survival as independent nations is important to the free world.

When you are playing football it is not enough to have a good end, then skip a man, have a good guard, then skip another man, and have a good tackle. You have to have a whole line, not one with gaps in it.

This special assistance goes to those countries in the line that do not get military assistance and defense support, but have to have economic assistance if they are to maintain their own independence, keep their place in the line, and keep secure the strategically located and essential air and other bases we have in those countries.

If Jordan as one such country, were to be sent a message by us at this time of internal crisis that we are cutting down special assistance for it, I think anyone can see what might easily happen there.

We must look at the total picture. We are not talking about charity or philanthropy or a giveaway. This is an essential part of our own overall defense system. If we weaken any of the elements of that defense system, we weaken the whole thing. All who voted "aye" on the defense support amendment should vote "aye" on this one also. They are on a par. After all, this is a global struggle and the Communists are operating in every country in every conceivable way against us. We cannot win by doing a good job to help some to become strong, and at the same time to do too little to strengthen other countries that are equally essential, in part because of their strategic location. We must have a total program, and these two amendments put together will give us that total program.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. JUDD. I yield to the gentleman from Indiana.

Mr. HALLECK. I would just like to observe with reference to the statement I made earlier on the amendment just adopted that this amendment now pending is the second one of the motions that I said I would support, and which I think is so essential to the security of the country. I just want to take this moment to express the hope that this motion will be supported.

Mr. JUDD. Mr. Speaker, if all who voted "aye" on the previous amendment will vote "aye" on this amendment, then our total defense system in other countries is in balance, and while no one can guarantee that something may not go wrong, this the best way to insure against it. We have a resourceful and relentless enemy and if we do not adopt this amendment, we are running the risk of weak spots or gaps in our defenses.

The SPEAKER. The time of the gentleman has expired.

Mr. THOMAS. Mr. Speaker, I yield 2 minutes to the gentleman from Wyoming [Mr. THOMSON].

Mr. THOMSON of Wyoming. Mr. Speaker, it is with some reluctance that I take the well of the House at this particular point in the debate, but I feel so strongly about a principle involved that I am compelled to do so. That principle is simply to protect the prerogatives of the legislative branch of our Government.

Not only by custom, but by our very Constitution itself, the legislative is given certain prerogatives and responsibilities when it comes to appropriating the taxpayers' money.

Perhaps I am more aware of this and feel more strongly about it than do some others, by reason of my service on the House Appropriations Committee. Have you stopped to think that if we recede from the House position and agree to the amendments of the Senate, as is now being proposed, we will, in effect, be abdicating our prerogatives and our responsibilities.

Our great President has been very diligent in protecting the prerogatives of the Executive. Even though this once meant the veto of a bill which I sponsored, and which at the time was most upsetting to me, still, on reflection, I respect him as the Chief Executive for guarding the prerogatives of the Executive and maintaining the balance of power so wisely provided in our Constitution.

Similarly, though, we must zealously guard the position of the legislative, or the foundations upon which this country is built will be in danger.

I have grave differences with respect to our foreign aid program, but leaving that out and assuming for purposes of this argument that we are traveling in the right direction, the fact still remains that the Congress, after careful hearings and consideration—particularly on the part of the House—has acted in each body, compromised the differences in conference. You will note the net reduction in any of these fields is only approximately 10 percent.

We have a responsibility to see that the taxpayers' money is well spent. Each dollar should be carefully examined and justified. Under the budget process, requests start at the lowest level, go through the agency to the department, to the Bureau of the Budget, and finally to the President. Then they are submitted to the Congress. They start out with a lot of "fat" in them. No matter how closely they are scrutinized in this bureaucracy, no Secretary of a department, no Director of the Bureau of the Budget, and no Chief Executive is possibly going to discover all of them. That is why we hold, on the House side particularly, long and arduous hearings before our appropriations subcommittees, in an effort to represent the taxpayers.

As a rule of thumb, most of our subcommittees feel that if we do our work well, we should be able to save some money on every department's budget, without jeopardizing any worthwhile program.

If we recede and concur on this amendment, it simply means that we say that in the area of foreign aid, we are going to give a blank check and that no cuts will be allowed. Regardless of how I might feel about the economic foreign aid program, I could not allow this to happen without registering my protest.

Permit me to illustrate by referring to two subcommittees with which I am particularly familiar, because they are the subcommittees on which I serve.

First, I will speak as a member of the House Appropriations Subcommittee on Interior Department and Related Agencies. Hearings are held first on this bill in each session, and it is the first bill to

be brought to the floor of the House in each session of Congress. This is the bill that has been characterized as the "all-American bill." It provides the funds for our public lands, for the Bureau of Mines to conduct mineral research, and so forth, for the Geological Survey, for Fish and Wildlife, for our forests, for our national parks, and our American Indians, and I could go on down the line.

In spite of the importance of all of this to our country as a whole, and particularly to the area which it is my privilege to represent, I sit in committee and search for ways in which we can cut expenditures. I do this because I know that in any government operation, there is always a place where you can save money. I further know that in saving money, oftentimes you can improve the quality of the program, by cutting out the bureaucrats which tend to "load in" by reason of any bureau's tendency to grow. Sometimes, I support cuts that are most difficult, and oftentimes refrain from trying to put in additional funds, because I know that since this is the first bill to be considered, it might well set a pattern. If we go over the budget or do not cut, then a precedent is set.

Basically, though, as I see it, I can act with clear conscience because I know that there are places for saving. In 1959, we cut the budget requests on this bill by 12 percent. This year, we started with a low base but still cut it about $7 million. In so doing, we keep the executive department's feet to the fire to practice economy in government. That is the principal weapon which was given to the Congress by the Constitution, and is a weapon to be used for good government.

The other subcommittee on which I serve is the Subcommittee on Defense Appropriations. Even in this area, we make cuts in the exercise of our legislative prerogative. This year, we cut a budget request of $13 billion for military procurement by 3 percent, and made it stick in conference. Why? We did this because the evidence before our committee showed that contracting practices, and so forth, could be tightened up, and we were satisfied that we could make this cut without interfering with the defense program, but at the same time forcing, through exercise of the legislative prerogative, obtaining more for the taxpayer's dollar.

After investigation, on the House side we cut our own military appropriation for personnel and administration in the Washington, D.C., metropolitan area by 10 percent. We did this to slow down the operation of Parkinson's law, which, as you know, is the tendency of any agency to grow bigger. Even after conference with the Senate, the final action of the Congress was to cut this by roughly 5 percent. No one has complained about these cuts.

But the sponsors of this amendment say that if we cut one dime from this request for economic foreign aid, we are endangering the security of the United States. Are they prepared to take the floor of this House and say that the mutual security agency within the State Department—or the foreign aid section, as it would be more popularly referred to—is perfect; that they have no excess personnel? I doubt that. In fact, every responsible check that has been made would indicate exactly the reverse.

Yet, when we cut a budget request of $675 million by $65 million, which is less than 10 percent, on defense support, we are told by the State Department that our security is in danger.

Do not be confused by nomenclature. Defense support is not military assistance. It is simply a rather recent new terminology for economic foreign aid, devised in an attempt to get around the disrepute of the foreign aid program by that name.

We now have before us a proposition with respect to special assistance. This is still just another relatively new name for foreign economic aid. The budget request was $256 million. The House appropriated $206 million. The Senate passed the full $256 million requested. In conference, we compromised our differences and agreed to $230 million. Again, this $26 million which it is attempted to restore by this action constitutes only about 10 percent.

I fail to understand how we can cut appropriations for our own forests, for our own minerals development, and so forth—yes, if you please, how we can cut appropriations for our own military—for our own Army, Navy, and Air Force, without jeopardizing the security, yet cannot cut 10 percent on the worldwide public works program that this country seems to have undertaken, without jeopardizing our security.

If we succumb to the proposition that we must restore every dime of the Department's request, then we have completely abdicated our legislative prerogatives and responsibilities under the Constitution, to see that the taxpayers' money is well spent.

I know that we can make cuts here and probably do the program a lot of good, by forcing better management. I think the gentleman from Louisiana, who has looked into this probably more than anyone else, would agree on that.

Mr. PASSMAN. Does the gentleman agree that in the old development assistance program, of course, they have changed the name, they still have $57 million and that they have not been able to spend that for 5 or 6 years and cannot even find any way to obligate that money?

Mr. THOMSON of Wyoming. I am pleased the gentleman mentions that. Also his statement calls attention to the fact that names have been juggled so that foreign economic aid which was discredited is now called development loan, defense support, special assistance, and so forth—they are all new names to make foreign economic aid more palatable.

The SPEAKER. The time of the gentleman has expired.

Mr. THOMAS. Mr. Speaker, I doubt if I can add anything new to this proposition.

Mr. ANDERSEN of Minnesota. Mr. Speaker, will the gentleman yield for a brief question?

Mr. THOMAS. I yield.

Mr. ANDERSEN of Minnesota. Is there any aid at all for the farmers of America in this bill?

Mr. THOMAS. I am sorry, but there is not.

Mr. Speaker, I hope the amendment offered by my distinguished, beloved, and outstanding colleague from New York [Mr. TABER] is voted down. I am going to ask for the yeas and nays on the motion.

A great many speakers on both sides of the aisle have pointed out many, many worthwhile projects in this program. There is no doubt about it. There are many, many worthwhile projects in this program. Also, there are some that have been very poorly screened and those officials who poorly screened those projects have brought that ill repute to the program that I mentioned a while ago.

Now this motion is for what? Twenty-six million dollars. The question you have to decide is whether they need that $26 million. Let me address myself to that one question. Do they need this $26 million? What do they have in this program? We appropriated less than a week ago how much? Two hundred and thirty million dollars. Now, does that $230 million tell the whole story? No, it does not. It is written in the authorization act that if any of these programs need any more money in addition to what has already been appropriated, up to 20 percent, may be transferred to a particular appropriation. Your total program is $3.7 billion. Just see how much money you could put under this program if you wanted to. Two hundred and thirty million dollars, plus 20 percent transfer, if he wants to use it, he could spend the $250 million contingency fund in this program.

Let us be practical. There is hardly that much money in the world. You have 4 months before we will be back here again. Could the President possibly put in the pipeline, allocate this much money in 4 months? Of course not. He could not possibly spend it under 6 or 7 months, and the Congress will be back here before then.

Mr. PASSMAN. Mr. Speaker, will the gentleman yield?

Mr. THOMAS. I yield to the gentleman from Louisiana.

Mr. PASSMAN. When the bill went to the other body, $42 million in unobligated funds was stricken out in the House bill. The Senate put it back. We agreed to that. I forgot to mention that.

Mr. THOMAS. I thank the gentleman. That makes available an additional $42 million.

I respectfully ask my colleagues to vote this down on the theory that it is not needed at this time.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the motion.

Mr. THOMAS. Mr. Speaker, on that I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 177, nays 216, not voting 39, as follows:

[Roll No. 200]

Davis, Tenn.	Landrum	Taylor, N.Y.
Doyle	McSween	Thompson, La.
Durham	Magnuson	Vinson
Flynn	Miller, N.Y.	Withrow
Forrester	Minshall	
Grant	Mitchell	

So the motion was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Hébert for, with Mr. Forrester against.

Mr. Buckley for, with Mr. Landrum against.

Mr. Doyle for, with Mr. Pilcher against.

Mrs. Green of Oregon for, with Mr. Preston against.

Mr. Auchincloss for, with Mr. Smith of Kansas against.

Mr. Miller of New York for, with Mr. Thompson of Louisiana against.

Mr. Sheppard for, with Mr. Shipley against.

Mr. Magnuson for, with Mr. Barden against.

Mr. Roosevelt for, with Mr. Brooks of Louisiana against.

Mr. Kilburn for, with Mr. Withrow against.

Mr. Holifield for, with Mr. McSween against.

Mr. Hays for, with Mr. Grant against.

Until further notice:

Mr. Anderson of Montana with Mr. Hess.

Mr. Carnahan with Mr. Minshall.

Mr. Durham with Mrs. Rogers of Massachusetts.

Mr. Vinson with Mr. Taylor of New York.

Mr. Hogan with Mr. Baumhart.

Mr. Flynn with Mr. Lafore.

Mr. MACHROWICZ changed his vote from "nay" to "yea."

Mr. BOGGS changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the motion offered by the gentleman from Texas [Mr. THOMAS].

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 9: Page 3, line 16, insert the following:

"GENERAL ADMINISTRATIVE EXPENSES

"For an additional amount for general administrative expenses, as authorized by section 411(b) of the Mutual Security Act of 1954, as amended, $2,000,000."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House insist upon its disagreement to the amendment of the Senate numbered 9.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 10: Page 3, line 20, insert "DEVELOPMENT LOAN FUND".

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House insist upon its disagreement to the amendment of the Senate numbered 10.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 11: Page 3, line 21, insert the following: "For an additional amount for advances to the Development Loan Fund as authorized by section 203, $75 million, to remain available until expended."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House insist upon its disagreement to the amendment of the Senate numbered 11.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 12: Page 3, line 24, insert the following: "The limitation on the amount available for administrative expenses of the Development Loan Fund covering the categories set forth in the fiscal year 1961 budget estimates for such expenses is $2,150,000."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House insist upon its disagreement to the amendment of the Senate numbered 12.

Mr. COFFIN. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. COFFIN moves that the House recede and concur in Senate amendment No. 12.

Mr. THOMAS. Mr. Speaker, I yield 3 minutes to the gentleman from Maine [Mr. COFFIN].

Mr. COFFIN. Mr. Speaker, if this motion to recede and concur is passed, what you will be doing is to take off a limitation on the administrative expenditures for the Development Loan Fund of $1,800,000 and substitute the figure of $1,250,000. The sum of $350,000 is involved here. This is not new money. This is merely a restriction on the administration in the Development Loan Fund.

Mr. Speaker, the hard facts of the matter are these: The Development Loan Fund is your creation. It was created a couple of years ago and it has now developed to the point where it needs its personnel to police these loans to see that engineering data which you require are supplied; to see that proper accounting is done; to see no funds are disbursed unless they are properly planned and accounted for. These are your requirements. You have a right to see that they are carried out so that the Development Loan Fund, as it reaches the full potential of its operations, remains true to the concept which you had in this Chamber when you authorized it. By tying the hands of the Development Loan Fund you not only refuse to allow them to increase their personnel to handle the workload that arises in the followup work as a loan actually gets into the disbursing stage, but you will have to reduce some of the personnel that they have now. This, my fellow Members, is false economy of the worst sort.

Mr. Speaker, I have said all I think can be said on this. This is not new money.

Mr. LINDSAY. Mr. Speaker, will the gentleman yield?

Mr. COFFIN. I yield to the gentleman from New York.

Mr. LINDSAY. Mr. Speaker, I should like to commend the distinguished gentleman from Maine. His point is well taken with reference to the operation of the Development Loan Fund. It seems to me, unless the preferential motion offered by the gentleman from Maine is adopted, the effectiveness of the Fund and its operation will be seriously impeded.

Mr. COFFIN. I thank the gentleman.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. COFFIN. I yield to the gentleman from Iowa.

Mr. GROSS. The gentleman used the expression "your creation." Would the gentleman make an exception?

Mr. COFFIN. I would be happy to except the gentleman from Iowa.

Mr. GROSS. I did not help to create this agency and I will not help to perpetuate it.

Mr. COFFIN. I doubt if anyone was really misled.

So, in short, Mr. Speaker, here is an important vehicle of foreign policy. It is one of the best things we have done in recent years, and here you are being asked to put a ball and chain on it by this limitation which does not save the taxpayers of this country a bloody penny.

Mr. JUDD. Mr. Speaker, will the gentleman yield?

Mr. COFFIN. I yield to the gentleman from Minnesota.

Mr. JUDD. I commend the gentleman from Maine for offering his preferential motion because it offers the real way to save money. It merely seeks to authorize, out of the total amount in the bill, enough funds to permit good administration so that a minimum of money will be wastefully or improperly used. We hear complaints always about bad projects. The Development Loan Fund needs to have enough staff to screen properly the projects for which loans are requested so as to make sure that we get the most benefits out of the large amounts of money in the Fund.

The SPEAKER. The time of the gentleman from Maine has expired.

Mr. THOMAS. Mr. Speaker, I yield such time as he may require to our beloved colleague, the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Speaker, I was the chairman of the Committee on Appropriations when the first appropriation for the Marshall plan, so-called, was before the House. Out of a total of $4 billion we allowed $12 million for administrative expenses. We found that they could not use all of that money. Ever since then the amount that has been dumped in for administrative expenses has increased each year until it has gotten completely out of hand and this great big administrative machinery handling all this money has just gotten so cumbersome that you cannot make heads or tails of it. Now they have this Office of Inspector General and Comptroller. Did you ever hear of such a thing? The Inspector General also is the auditor and the two jobs are not compatible. I hope this House will not allow any increase and will not put in any of these increases which have no justification whatsoever, if you want a decent and honest Government.

Mr. THOMAS. Mr. Speaker, I yield 3 minutes to the gentleman from Michigan [Mr. BENTLEY].

Mr. BENTLEY. Mr. Speaker, we are dealing with the first of four points in disagreement between the conferees, which are basically questions of language rather than of amounts. The first one, as has been explained by the gentleman from Maine, is a difference of $350,000 in the ceiling for administrative expenses for the Development Loan Fund. That is amendment No. 12.

Amendment No. 13 is an amendment in which the Senate version provides that funds which have been deobligated may be reobligated.

The third amendment deals with a change in the technical cooperation proviso.

Amendment No. 15, the last of the so-called language amendments, increases the ceiling for the administrative expenses of the Office of Inspector General and Comptroller.

Mr. Speaker, I have a great deal of respect for the members of the Appropriations Committee. I am certain that they sincerely feel, by insisting upon their resistance to the Senate language, that they are keeping the proper legislative reins and checks upon the executive branch. On the other hand, I think it also fair to point out that the executive branch is just as concerned about the failure on the part of the House version to include this language in these four instances as they were previously about those various reductions upon which we have been voting.

We have all criticized this mutual security or foreign aid program from time to time. We have criticized it because of the amounts contained in various parts of the program. We have also criticized it because of its administrative weaknesses, lack of efficiency, and wastefulness. I sincerely believe that the executive branch is endeavoring to improve the administration and operation and efficiency of this program. They have asked for a certain amount of flexibility. They have asked for an increase in administrative expenses to permit them, so they say, to bring more efficiency, better operation, and better administration into the program. I hope when you come to vote on amendment No. 12 and the next three amendments that the Members will take into consideration that the executive has promised that if it gets the language of the Senate version in these cases it can improve the administrative part of this program, and at the same time they state that in the long run the taxpayers will be saved money.

The SPEAKER. The time of the gentleman from Michigan has expired.

Mr. THOMAS. Mr. Speaker, I am going to speak 2 or 3 minutes, and then move the previous question.

I hope this amendment of my able friend, the gentleman from Maine [Mr. COFFIN], is defeated. The reason I say that is that it is absolutely unnecessary. What does it do? It makes available about $350,000 more, an increase of 15 percent in the administrative costs. How many employees do they have in the foreign aid program already? You cannot segregate them into this compartment and that compartment. They are all over the lot. There are 11,000, but that is not all. If you add the contract personnel both at home and on the scene, you can add another 43,000 to it, making, in round figures, 54,000.

Mr. Speaker, I hope the amendment is voted down.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the motion offered by the gentleman from Maine.

The motion was rejected.

The SPEAKER. The question recurs on the motion of the gentleman from Texas.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 13: page 4, line 4, insert "Funds appropriated under each paragraph of rule I of the Mutual Security and Related Agencies Appropriation Act, 1961 (other than appropriations under the head of military assistance), including unobligated balances continued available, the respective funds appropriated by this Act, and amounts certified pursuant to section 1311 of the Supplemental Appropriation Act,

1955, as having been obligated against appropriations heretofore made for the same general purpose as such paragraph, which amounts are hereby continued available for the same general purpose, may be consolidated in one account for each paragraph."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House insist upon its disagreement to the amendment of the Senate numbered 13.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 14: Page 4, line 15, insert "The proviso in the paragraph headed 'Technical Cooperation, General Authorization' in title I of the Mutual Security and Related Agencies Appropriation Act, 1961, is amended to read as follows: *'Provided*, That every project or activity financed from funds made available for the fiscal year 1961 for such assistance and for which an estimate has not been submitted, shall be reported to the Committees on Appropriations of the Senate and the House of Representatives.'."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House insist upon its disagreement to the amendment of the Senate numbered 14.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 15: Page 4, line 24, insert "The limitation on the amount available for expenses of the Office of the Inspector General and Comptroller, as established by section 533A of the Mutual Security Act of 1954, as amended, is $1,762,000."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House insist upon its disagreement to the amendment of the Senate numbered 15.

Mr. JUDD. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. JUDD moves that the House recede and concur in Senate amendment numbered 15.

Mr. THOMAS. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota [Mr. JUDD].

Mr. JUDD. Mr. Speaker, this amendment would increase by $762,000 the amount available for the Office of Inspector General and Comptroller for administrative expenses.

Mr. Speaker, almost all of the criticisms we hear of the mutual security program are with respect to reports of laxness, inefficiency, and waste. I have seen some of the laxness, and inefficiency, and instances of bad judgment, and so on. Sometimes we have been unable to get figures that would jibe; one set of figures would not agree with another set. So our committee last year devised this Office of Inspector General and Comptroller to center authority for inspection in one place. The chairman of our committee, the gentleman from Pennsylvania [Mr. MORGAN], sponsored it and the committee and Congress adopted it.

I do not believe we ought to put large amounts of money into any program without having some outside agency, or a separate office within the agency, with authority to inspect all operations, find out whatever is wrong, and try to correct it, or at least to expose it. I do not like to hear about bad messes only after they have happened.

Existing law vests the Inspector General with authority to investigate and stop bad practices where he finds them, and report back to the Secretary of State so the agency can correct them. This program is less than 2 years old. It has not had adequate time or opportunity to get really started. If we want to save money and everybody wants that, we must give the Office sufficient funds so it can do the job it ought to, saving your tax dollars and mine. With the $1 million already in the bill plus $762,000 proposed for this Office, it can do what we set it up to do. This seems to me so clearly a matter of good common sense and a sound way to improve the operations of mutual security program that I hope this amendment to recede and concur in the Senate amendment will be adopted.

Mr. TABER. Mr. Speaker, will the gentleman yield?

Mr. THOMAS. I yield to the gentleman from New York. I would like to have his observations on this.

Mr. TABER. I have had experience, and the gentleman from Minnesota has had experience, with this situation. We have found that this combination of Comptroller and Inspector General does not work at all.

For instance, on this technical cooperation program where they asked for an additional $22 million which the House refused to them a few minutes ago, we found after asking the different witnesses who were supposed to be in charge of it what they had done but we could not find out anything. We sent a couple of men downtown where they were supposed to be running a school.

We were told before the men went down there that the school would be running from 1 to 5 that afternoon. They found it was not running at all—there were no students there. If we are going to have that kind of operation we never will get anywhere, and the program will not amount to anything.

For that reason I cannot go along with this item, although I would like to see somebody with the capacity and the strength to go ahead and put this thing across and have it done properly. I have been disturbed for years about this sort of thing. We have had this in front of all of us for some time, and it is not because we did not give them enough money. We gave them enough money, but there is nobody in charge who has the strength to correct the situation and do the job.

Mr. JUDD. Mr. Speaker, will the gentleman yield?

Mr. TABER. I yield to the gentleman from Minnesota.

Mr. JUDD. There is no way that the Congress can appoint personnel. If the present incumbent is not satisfactory, we ought by protest to try to get rid of him. But will not the gentleman agree that we ought either to cut off funds for the Inspector General entirely and abolish the Office or else give it the funds necessary to do the job?

Mr. TABER. We should abolish the Office entirely. It is absolutely impossible to have the official that has charge of all the expenditures to do the other work, too.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. TABER. I yield to the gentleman from Iowa.

Mr. GROSS. The gentleman from Minnesota called this an outside agency. It is the most inside agency in the Government, or one of them.

Mr. TABER. It is worse than that.

Mr. GROSS. If we are going to spend money to enlarge the Government bureaucracy, let us give the money to the General Accounting Office and tell the foreign giveaway outfit that they must open up their records so the General Accounting Office can see how the billions are being spent.

Mr. TABER. That is right.

Mr. THOMAS. Mr. Speaker, I yield 5 minutes to the gentleman from Louisiana [Mr. PASSMAN].

Mr. PASSMAN. Mr. Speaker, this office came before our committee last year and asked us to recommend that they operate without limitation for the first year. We followed that recommendation and placed no limitation on its expenditures. At the end of the year they had spent twice what they said they would spend. This year they asked for $1,250,000, at a subsequent date during the hearings they raised that to $1,750,000. Then later they said "we do not even know whether that is sufficient." Your committee then recommended $1 million, and the conference agreement provided $1.2 million, which is only $50,000 below the budget estimate.

Mr. THOMAS. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan [Mr. FORD].

Mr. FORD. Mr. Speaker, as everyone here knows, I do not like to take a position contrary to the views of my good friend and colleague, the gentleman from New York [Mr. TABER]; but in this particular instance it is my judgment that the position taken by the gentleman from Minnesota is correct.

We have been after the ICA and the related agencies to do a better job. There have been instances of carelessness in programing, and poor execution, limited to a very small degree, but those instances have popped up.

It was the view of the Congress last year that we should set up an Inspector General who would be responsible to ferret out and to prevent these instances that exist in the program. I think this was a good step. Personally, I believe the Office of Comptroller and Inspector General should be divided, but that has not been done.

My recollection is that the basic legislation provides it shall be one person. I hope we can change this situation, but if we are going to pin responsibility on

the Inspector General to do the job we have assigned him, then we must adequately finance his office; otherwise, the ICA will come back to us and say "Yes, you sent us to correct a situation, but you did not give us enough money to accomplish it."

I believe the position taken by the gentleman from Minnesota is sound. If we do that then I think we can look forward to a real job being done in scrutinizing the program and straightening out some of the problems that exist.

Mr. JUDD. Mr. Speaker, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Minnesota.

Mr. JUDD. One of the real advantages of office is that it enables us to pinpoint responsibility. Heretofore when we heard that something is wrong somewhere, it is hard to find out just who is responsible for it. Now if a Congressman sees something that does not seem proper, or a traveler comes back and asks "How does it happen that I saw so and so happening in a particular country?" the Inspector General has to have the answer—or else. I think we ought to have some place and some person from whom to get the information that is necessary.

Mr. PASSMAN. Mr. Speaker, will the gentleman yield?

Mr. FORD. I yield to the gentleman from Louisiana.

Mr. PASSMAN. Is it not true that we permitted the Office to operate without a limitation on its expenses last year?

Mr. FORD. That is correct.

Mr. PASSMAN. When they came in this year they first asked for $1,250,000.

Mr. FORD. That is my recollection.

Mr. PASSMAN. And at a subsequent date they informally increased that amount.

Mr. Speaker, remarks have been made on the floor today, not only in connection with this item, but also in connection with several other amendments, that if the funds approved today are insufficient the Committee will receive sympathetically in January a request for increased funds or a relaxation of limitations and language in the bill. It is my understanding, as chairman of the Foreign Operations Subcommittee of the House Appropriations Committee, that the funds provided and the limitations approved today are the ceilings for the year, and in my opinion, it would be wise for the agency to program the funds approved today accordingly.

Mr. THOMAS. Mr. Speaker, I yield to the gentleman from Iowa [Mr. GROSS].

Mr. GROSS. Mr. Speaker, it is very interesting that when the $65 million amendment was before the House, everything was sweetness and light in this foreign giveaway program; nothing at all wrong. Now we hear proponents admitting that something smells; that there has been a bad odor for a long time. I just do not understand the situation. Maybe the gentleman from Texas can help me out.

Mr. THOMAS. The gentleman from Iowa is right, as he usually is.

Mr. Speaker, this amendment, above all, should be voted down. In the first place, let us see what it does. It is admitted that there is something wrong in the office. Are you going to cure it by giving them more money? This amendment increases the amount of money the office has by what amount? Thirty-three and one-third percent. You are going to cure what is wrong by giving them more money. The office is judge and jury. The Agency ought to come in with some requested legislation to provide a sound program.

Mr. Speaker, this amendment is certainly unsound; a 33⅓-percent increase over and above the budget estimate. Why, it is unthinkable.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the preferential motion offered by the gentleman from Minnesota [Mr. JUDD].

The motion was rejected.

The SPEAKER. The question is on the motion offered by the gentleman from Texas [Mr. THOMAS].

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 5: Page 3, line 3, insert "Mutual Security".

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede and concur in the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 16: Page 5, line 5, insert "For an additional amount for 'Salaries and Expenses,' $275,000; and in addition, $170,000 of the funds appropriated by section 32 of the Act of August 24, 1935, as amended (7 U.S.C. 612c), shall be merged with this appropriation and shall be available for all expenses of the Foreign Agricultural Service in carrying out the purposes of said section 32."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 16 and concur therein with an amendment, as follows: In lieu of the sums of "$275,000" and "$170,000" named in said amendment, insert "$137,500" and "$100,000", respectively.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 23: Page 6, line 20, insert:

"CONSTRUCTION AND EQUIPMENT

"For the purpose of obtaining a suitable site for construction of a Coast and Geodetic Survey Seismological Laboratory, the Secretary of Commerce is authorized, on behalf of the United States, to lease from the Isleta Indian Tribe, and the Isleta Indian Tribe, with the approval of the Secretary of the Interior, is authorized to lease to the Secretary of Commerce, for a minimum term of 25 years with provisions for renewal, approximately seven hundred and fifty acres, more or less, of tribal land on the Isleta Indian Reservation; such land being situated in sections 5, 6, 7, and 8, township 8 north, range 5 east, New Mexico principal meridian, county of Bernalillo, State of New Mexico. Any lease entered into hereunder shall provide for an annual rental not in excess of $1,200, and shall prescribe the terms and conditions under which the tribe may jointly use that portion of the leased area not specifically needed for the Laboratory. The construction of the Laboratory, on the land leased hereunder, shall be undertaken by the Secretary of Commerce, on behalf of the United States, and the Secretary shall provide, in connection therewith, such structures, appurtenances and facilities as may be necessary or desirable in furtherance of the purposes and requirements of such Laboratory, and shall provide for the repair, maintenance, alteration, or improvements thereof."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 23 and concur therein with an amendment, as follows: Delete the last sentence thereof.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 30: Page 10, line 19, insert:

"PUBLIC BUILDING CONSTRUCTION

"For an additional amount for 'Capital outlay, public building construction' for construction projects as authorized by the Act of June 6, 1958 (72 Stat. 183), including acquisition of sites; preliminary survey at the Receiving Home; preparation of plans and specifications for the following buildings: Eliot Junior High School addition, new elementary school in the vicinity of Eleventh and Clifton Streets Northwest, and Bancroft Elementary School addition; erection of the following structures, including building improvement and alteration and the treatment of grounds: Kenilworth Elementary School addition, new junior high school in the vicinity of South Dakota Avenue and Hamilton Street Northeast, Deal Junior High School addition, additional dormitory at the Youth Correctional Center, cowbarn and dairy facility at the Workhouse, laundry addition at the District of Columbia Village, children's cottages at the Junior Village, and a chapel at the Cedar Knoll School; equipment for new buildings; advanced planning for various recreation units; $25,000 for purchase of equipment for new school buildings; and permanent improvements of buildings and grounds (including purchase and installation of furnishings and equipment) of correctional and welfare institutions, and other District of Columbia buildings; to remain available until expended, $6,170,800 of which $900,000 shall not become available for expenditure until July 1, 1961, and $330,100 shall be available for construction services by the Director of Buildings and Grounds or by contract for architectural engineering services, as may be determined by the Commissioners, and the funds for the use of the Director of Buildings and Grounds shall be advanced to the appropriation account, 'Construction services, Department of Buildings and Grounds'."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 30 and concur therein

with an amendment, as follows: In lieu of the matter proposed, insert the following:

"PUBLIC BUILDING CONSTRUCTION AND DEPARTMENT OF SANITARY ENGINEERING

"For an additional amount for 'Capital outlay, Public Building Construction' and 'Capital outlay, Department of Sanitary Engineering', for construction projects as authorized by the Act of April 22, 1904 (33 Stat. 244), the Act of May 18, 1954 (68 Stat. 105), and the Act of June 6, 1958 (72 Stat. 183) and as submitted to the Congress in House Document Numbered 403 of June 1, 1960, such sums as may be necessary, but no obligation shall be incurred for any item or project proposed in said document which will (1) result in a deficit in the general fund of the District of Columbia, or (2) exceed the estimated cost as submitted therein to the Congress."

The motion was agreed to.

The SPEAKER pro tempore (Mr. ALBERT). The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 34: Page 13, line 14, insert:

"PUBLIC HEALTH SERVICE

"Assistance to States, general

"For an additional amount for 'Assistance to States, general', $3,070,000, including funds to provide project grants for public health training pursuant to section 309 of the Public Health Service Act, as amended."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 34 and concur therein with an amendment, as follows: In lieu of the sum named therein insert "$2,500,000".

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 35: Page 14, line 1, insert:

"SOCIAL SECURITY ADMINISTRATION

"Grants to States for public assistance

"The amounts made available for 'Grants to States for public assistance', in the Department of Health, Education, and Welfare Appropriation Act, 1961, shall be available for grants for medical assistance for the aged, as authorized by the Social Security Amendments of 1960".

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 35 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 37: Page 15, line 16 after "$145,000" insert "including allowances and benefits similar to those provided by title IX of the Foreign Service Act of 1946, as amended, as determined by the Commission; expenses of packing, shipping, and storing personal effects of personnel assigned abroad; rental or lease, for such periods as may be necessary, of office space and living quarters for personnel assigned abroad; maintenance, improvement, and repair of properties rented or leased abroad, and furnishing fuel, water, and utilities for such properties; hire of passenger motor vehicles abroad; insurance on official motor vehicles abroad; and advances of funds abroad; $290,000: *Provided*, That the limitation under this head in the General Government Matters Appropriation Act, 1961, on the amount available for expenses of travel, is increased from '$10,000' to '$30,000'."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 37 and concur therein with an amendment, as follows: In lieu of the sum of $290,000 named therein, insert: "$145,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 56: Page 18, line 21, strike out "$125,000" and insert "$25,000:".

Mr. THOMAS. I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 56 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert: "$37,500, of which not to exceed 15 percent shall be available for salaries and administrative expenses:".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 58: Page 19, line 6, insert:

"UNITED STATES TERRITORIAL EXPANSION MEMORIAL COMMISSION

"Funds previously appropriated under this head shall remain available until expended."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 58 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 61: Page 19, line 23, insert ": *Provided*, That $325,700 of this amount shall become available only upon enactment into law during this calendar year of legislation providing pay increases for policemen, firemen, and teachers of the District of Columbia."

Mr. THOMAS. I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 61 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 62: Page 20, line 6, strike out "$121,000" and insert "$134,200,".

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House insist upon its disagreement to the amendment of the Senate numbered 62.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 63: Page 20, line 7, strike out lines 7 through 10 and insert ": *Provided*, That no part of the foregoing amount shall be available for any expenses related to the construction of any quarters, exclusive of provision of utility connections and costs of the Canal Zone Government, at at average cost in excess of $9,000 per unit."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate No. 63 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment, insert ": *Provided*, That no part of the foregoing amount shall be available for any expenses related to the construction of any quarters at an average cost in excess of $9,000 per unit".

Mr. BOW. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. BOW moves that the House recede and concur in Senate amendment No. 63.

Mr. THOMAS. Mr. Speaker, I yield 5 minutes to our beloved friend from Ohio [Mr. BOW].

Mr. BOW. Mr. Speaker, this is an item that takes care of some building by the Panama Canal Company in the Panama Canal Zone. It concerns housing for employees of the Panama Canal Company.

I am the ranking minority member on the regular subcommittee handling this item. The gentleman from Georgia [Mr. PRESTON] is chairman of the committee. We have studied this problem together and we are in agreement that this housing should be built. It was first thought the housing could be built for $10,000 a unit. The House committee reduced this to $9,000 a unit, and we have gone along with this.

However, there is this problem that we face. If we have the House language of $9,000 a unit we will be required to build the housing, bring in the utilities, and prepare the landsite at $9,000, and we just will not be able to prepare the housing for that price. The construction of the housing, yes, but we will have to go into some jungle area in the Panama Canal Zone, clear it, and prepare it for building, and then bring in the utilities. This is not like many places where we build housing, where the land is already prepared and we can just move in. We will have to prepare the site. It cannot be done for $9,000 if we have to do all that. The construction, yes, but the preparation of the site and bringing in the utilities, no.

Under the Senate language we can build the housing and stay within the limitation of $9,000, and also prepare the site.

I submit, Mr. Speaker, if we are to do what the House has urged we do, take care of proper housing for the employees in this area, we are going to have to accept the Senate limitation, make our housing construction $9,000, but give us a chance to clear the land.

Mr. THOMAS. Mr. Speaker, I yield myself 4 minutes.

Mr. Speaker, it is very seldom that I or any of our colleagues disagree with the distinguished gentleman from Ohio. I work with him in a good many activities. He is an able and distinguished Member of this body, and I mean both of those words—"able" and "distinguished." But may I disagree with him in this particular matter.

This is the picture: This is in the Canal Zone, but who set it up? The taxpayers of the United States set it up. They want to replace 500 houses. We do not object to it. It is going to have to be done. It should be done. But let us be frank about it, I think it is a young public housing project, because it is going to have to bear a subsidy of $40 to $50 per month per occupant.

This is the only point of difference: These are replacement houses, and the bill has a limitation on the amount of money they can spend on a house. The land costs nothing. The Government already owns it. So we put in a limitation of $9,000 per unit, for one bedroom, two bedrooms, three bedrooms, and, if they need it, four bedrooms; but the average must be $9,000. We have some housing in our part of the country, and I daresay you have it in your sections, that do not cost $9,000 for the house. Nine thousand dollars plus free Government land is going to build them a much better house than they have now.

I hope we can respectfully disagree with our friend the gentleman from Ohio [Mr. Bow] at this time. It does not happen too often.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the preferential motion offered by the gentleman from Ohio [Mr. Bow].

The motion was rejected.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas [Mr. THOMAS].

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 69: Page 23, line 1, insert ", of which $250,000 shall be available for payment to the Parshall, North Dakota Special School District Numbered 3 for the construction of school facilities which shall be available to Indian children."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 69 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore (Mr. ALBERT). The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 70: On page 23, line 8, insert ": *Provided*, That the limitation under this head in the Interior Department Appropriation Act, 1955, on the amount available toward the emergency rehabilitation of the Crescent Lake Dam project, Oregon, is increased from $297,000 to $305,000."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 70 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 71: On page 23, line 17, strike out "Construction and Rehabilitation" and insert "Upper Colorado River Basin Fund".

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 71 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 72: On page 23, line 24, strike out "Construction and Rehabilitation" and insert "Upper Colorado River Basin Fund".

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 72 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 73. On page 24, line 1, insert:

"ADMINISTRATIVE PROVISIONS

"After August 31, 1960, the position of Commissioner of the Bureau of Reclamation shall have the same annual rate of compensation as that provided for positions listed in 5 U.S.C. 2205(b), so long as held by the present incumbent."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 73 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 84: On page 27, line 6, insert:

"UNITED STATES CITIZENS COMMISSION ON NATO

"For necessary expenses of the United States Citizens Commission on NATO, including personal services as authorized by section 3(4) of S.J. Res. 170 without regard to civil service and classification laws; travel, subsistence, and other expenses of the Commission and its staff; hire of passenger motor vehicles; printing and binding without regard to section 11 of the Act of March 1, 1919 (44 U.S.C. 111); $300,000, of which not to exceed $3,000 may be expended for entertainment: *Provided*, That not to exceed $100,000 may be expended for meetings and conferences pursuant to section 3(5), S.J. Res. 170; to remain available until January 31, 1962."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 84 and concur therein with an amendment, as follows: In lieu of the sums of "$300,000" and "$3,000" named therein, insert "$150,000" and "$1,500", respectively; and delete the proviso.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. THOMAS. I yield to the gentleman from Iowa.

Mr. GROSS. May I ask the gentleman from Texas if there has been some saving made in providing for this brand new junketing commission that is being set up by the Congress and which I voted against?

Mr. THOMAS. I will say to our friend from Iowa that we just saved one-half of it. We cut it half in two.

Mr. GROSS. I commend the gentleman and the conferees. I wonder if the gentleman, before he finishes and relinquishes the floor, and I understand that he is just about to the end of the amendments, if he could give us any idea as to how much this bill, which started out to be a rather innocuous deficiency appropriation bill, has been increased since it left the floor of the House?

Mr. THOMAS. The other body added $214 million. The conferees agreed to only $6 million over the House figure and the House just voted to add $65 million more. So the total is $71 million over the House and a reduction in the Senate figure of $143 million.

Mr. GROSS. I thank the gentleman for the information.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas [Mr. THOMAS].

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 85: On page 27, line 19, insert:

"TREASURY DEPARTMENT

"Bureau of the Public Debt

"Administering the Public Debt

"Not to exceed $375,000 of the unobligated balance of the appropriation for 'Administering the public debt,' fiscal year 1960, shall remain available during the current fiscal year for expenses of advance refunding of the public debt."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 85 and concur therein.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. THOMAS. Mr. Speaker, I ask unanimous consent that all Members may have 3 legislative days in which to extend their remarks on the conference report.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. GEORGE. Mr. Speaker, earlier this year certain buildings at Haskell Institute in Lawrence, Kans., were found to be unsafe by engineers of the Bureau of Indian Affairs. In addition, considerable renovation of the existing utility systems at the school is badly needed.

While conditions at Haskell are now such that temporary facilities must be sought until the condemned buildings are replaced, I am indeed happy that these needs have been recognized and that the second supplemental appropriation bill approved today by the House contains emergency funds to alleviate the crisis which has developed at the institute.

Haskell's history goes back to the 47th Congress during which the Honorable Dudley C. Haskell, Representative of Kansas' Second Congressional District and chairman of the Indian Affairs Committee, was instrumental in obtaining approval of legislation authorizing the establishment of an Indian Institute.

Haskell Institute opened on September 1, 1884, on a site of approximately 280 acres of land donated by citizens of Congressman Haskell's home city of Lawrence, Kans. The first president of the school was Dr. James Marvin, a former chancellor at the University of Kansas.

Although the initial enrollment was 14 people—all boys—the institute now has a coed enrollment of well over 1,000. Haskell's student body includes young people from widely scattered reservations, largely in the Western and Southwestern United States, who do not have access to adequate educational facilities in their own communities.

The curriculum at Haskell is designed to achieve two main goals. First, in consideration of the welfare of its students who will return to their home communities after they finish school, the institute strives to train its young people for leadership, to teach them how to improve the economic conditions of their people, and to provide them with social training that will help them live happier and richer lives. In addition, Haskell prepares many of its students for vocational employment in order that they may make a living in a highly competitive economic system.

The success of the institute in achieving these goals can be seen in their 100 percent placement record established in recent years for graduates who received vocational training, and in the leaders Haskell has produced in government, industry, and sports.

The people of Kansas, and particularly those of the city of Lawrence, join with me, Mr. Speaker, in expressing our gratitude to the Honorable ALBERT THOMAS, chairman of the Appropriations Subcommittee, and the Honorable CLARENCE CANNON, chairman of the full committee, as well as to the committee members, for their efforts in obtaining $2,050,000 in order that a construction start may be made at this great Midwest institute.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment bills and a joint resolution of the House of the following titles:

H.R. 8156. An act for the relief of Jack Kent Cooke;

H.R. 12383. An act to amend the Federal Employees' Compensation Act to make benefits more realistic in terms of present wage rates, and for other purposes; and

H.J. Res. 311. Joint resolution authorizing the erection of a statue of Taras Shevchenko on public grounds in the District of Columbia.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills and joint resolutions of the House of the following titles:

H.R. 4306. An act to provide education and training for the children of veterans dying of a service-connected disability incurred after January 31, 1955, and before the end of compulsory military service;

H.R. 8665. An act to amend the act entitled "An act to establish a memorial to Theodore Roosevelt in the National Capital" to provide for the construction of such memorial by the Secretary of the Interior.

H.J. Res. 721. Joint resolution for the relief of certain aliens; and

H.J. Res. 784. Joint resolution amending the act of July 14, 1960, to extend the time within which the U.S. Constitution 175th Anniversary Commission shall report to Congress.

The message also announced that the Senate had passed bills and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 1689. An act to create the Freedom Commission for the development of the science of counteraction to the world Communist conspiracy and for the training and development of leaders in a total political war;

S. 3901. An act to authorize the erection of a memorial in the District of Columbia to Gen. John J. Pershing; and

S. Con. Res. 115. Concurrent resolution to print additional hearings on Senate Resolution 94, relating to the compulsory jurisdiction of the International Court of Justice.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10960) entitled "An act to amend section 5701 of the Internal Revenue Code of 1954 with respect to the excise tax upon cigars."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12536) entitled "An act relating to the treatment of charges for local advertising for purposes of determining the manufacturers sale price."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12659) entitled "An act to suspend for a temporary period the import duty on heptanoic acid."

U.S. CONSTITUTION 175TH ANNIVERSARY COMMISSION

Mr. BYRNE of Pennsylvania. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the resolution (H.J. Res. 784) amending the act of July 14, 1960, to extend the time within which the U.S. Constitution 175th Anniversary Commission shall report to Congress, with Senate amendments, and concur in the Senate amendments.

The Clerk read the title of the resolution.

The Clerk read the Senate amendments, as follows:

Page 2, after line 2, insert:

"SEC. 2. (a) Section 2(a) of the National Housing Act is amended by (1) striking out '1960' and inserting in lieu thereof '1961', and (2) striking out the last sentence of the first paragraph thereof.

"(b) Section 401(d) of the Housing Act of 1950 is amended by striking out '$1,175,000,000', '$125,000,000', and '$50,000,000' and inserting in lieu thereof '$1,675,000,000', '$175,000,000', and '$100,000,000', respectively.

"(c) Section 203(a) of the Housing Amendments of 1955 is amended by striking out '$100,000,000' and inserting in lieu thereof '$150,000,000'."

Amend the title so as to read: "Joint resolution amending the Act of July 14, 1960, to extend the time within which the United States Constitution One Hundred and Seventy-fifth Anniversary Commission shall report to Congress, and including certain amendments relating to housing."

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania [Mr. BYRNE]?

There was no objection.

The Senate amendments were agreed to.

A motion to reconsider was laid on the table.

INCREASE OF SALARIES OF OFFICERS AND MEMBERS OF THE METROPOLITAN POLICE FORCE, FIRE DEPARTMENT OF THE DISTRICT OF COLUMBIA, U.S. PARK POLICE, AND WHITE HOUSE POLICE

Mr. DAVIS of Georgia. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 13053) to increase the salaries of Fire Department of the District of Columbia, the U.S. Park Police, the White House Police, and for other purposes, with Senate amendments, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert: "That each employee of the District of Columbia or of the United States whose salary is fixed and regulated by the District of Columbia Police and Firemen's Salary Act of 1958 (72 Stat. 480) shall receive, in addition to the compensation provided by such Act, compensation at the rate

of 7.5 per centum of the basic compensation provided by such Act.

"SEC. 2. (a) Retroactive compensation or salary shall be paid by reason of this Act only in the case of an individual in the service of the District of Columbia or of the United States (including service in the Armed Forces of the United States) on the date of enactment of this Act, except that such retroactive compensation or salary shall be paid (1) to any employee covered in this Act who retired during the period beginning on the day following the first day of the first pay period which began on or after July 1, 1960, and ending on the date of enactment of this Act for services rendered during such period and (2) in accordance with the provisions of the Act of August 3, 1950 (Public Law 636, Eighty-first Congress), as amended, for services rendered during the period beginning on the first day of the first pay period which began on or after July 1, 1960, and ending on the date of enactment of this Act by any such employee who dies during such period.

"(b) For the purposes of this section, service in the Armed Forces of the United States in the case of an individual relieved from training and service in the Armed Forces of the United States or discharged from hospitalization following such training and service, shall include the period provided by law for the mandatory restoration of such individual to a position in or under the Federal Government or the municipal government of the District of Columbia.

"SEC. 3. For the purpose of determining the amount of insurance for which an individual is eligible under the Federal Employees' Group Life Insurance Act of 1954, as amended, all changes in rates of compensation or salary which result from the enactment of this Act shall be held and considered to be effective as of the date of enactment of this Act.

"SEC. 4. The provisions of this Act shall become effective on the first day of the first pay period beginning after July 1, 1960.

"SEC. 5. Any person who shall retire for age after serving at least thirty years as Director of the Federal Bureau of Investigation shall receive an annuity during the remainder of his life equal to the salary payable to him at the time of his retirement."

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The Senate amendments were agreed to.

A motion to reconsider was laid on the table.

ASSISTANCE IN THE DEVELOPMENT OF LATIN AMERICA AND IN THE RECONSTRUCTION OF CHILE

Mr. O'NEILL. Mr. Speaker, by direction of the Committee on Rules, I call up the resolution (H. Res. 637) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 13021) to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes. After general debate, which shall be confined to the bill, and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Massachusetts [Mr. O'NEILL] is recognized.

Mr. O'NEILL. Mr. Speaker, I yield myself such time as I may consume, and at the conclusion of my remarks, I yield 30 minutes to the gentleman from Illinois [Mr. ALLEN].

Mr. Speaker, House Resolution 637 makes in order H.R. 13021, a bill to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes. It is an open rule with 2 hours of general debate.

There are four major provisions in the bill. One, recommending that steps be taken for the implementation of the policy to help South America and authorize $500 million to carry out the social development program set forth in a statement of policy that is contained in the bill.

There is also included in the bill $100 million for Chile. This is a special reconstruction and rehabilitation program that is planned for Chile because of the recent earthquakes that devastated that country.

The bill also carries $100 million for our South African neighbors, but as I understand, the chairman of the committee will offer a motion to strike that from the bill.

While this bill is an authorization, actually no appropriation will be made this year. This is to meet a special request by the President of the United States that we give aid and assistance for the purpose of the improvement of conditions of rural life in South American nations, the improvement of housing for the native population, through educational and training facilities, and for the improvement of basic sanitation facilities.

Mr. BAILEY. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from West Virginia.

Mr. BAILEY. Would the gentleman interpret the expression he used, "educational and training facilities" to include the building of school classrooms in Latin America under the heading of aid to education?

Mr. O'NEILL. I would say possibly so.

Mr. BAILEY. So far as they cannot do that here at home, I am opposed to the legislation and to the rule.

Mr. O'NEILL. I want to assure the gentleman I have been for Federal aid to education. That was my stand on a matter that has been pending before the Rules Committee, but even though there seems to be some difficulty in being able to get it to the floor of the House, I do not believe we should vote against this bill or penalize our South American neighbors because of that.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from Iowa.

Mr. GROSS. Why the haste to pass this bill now if it cannot become effective this year? Why can we not pass it at the next session of Congress?

Mr. O'NEILL. As I understand, there is a meeting of the American nations in Bogota next Saturday, and it is the desire of the administration and the State Department that our representatives at that conference may go armed with what they expect the policy will be in the matter of brotherhood, friendship, and a spirit of willingness to help our South American neighbors.

Mr. GROSS. Is there any doubt about that as far as the United States is concerned?

Mr. O'NEILL. I, like the gentleman, am curious as to what our South American policy will be. I asked the chairman of the committee, but he could not tell me very much about what the State Department was planning. I am not acquainted with what is going on, but I honestly and personally believe this is good legislation and ought to be enacted.

Mr. GROSS. In other words, it is a promise to pay on the part of the United States; is that it?

Mr. O'NEILL. I would say that is so.

Mr. GROSS. And they must know at this meeting in South America all about our willingness to cough up money when they want it without this legislation.

Mr. O'NEILL. All I can say is this is an administration request that was brought to the Committee on Foreign Affairs by Mr. Dillon, Under Secretary of State. They seem to think there is an urgent necessity that our representatives when they go to the meeting be armed with this type of legislation.

Mr. GROSS. There are some bureaucrats somewhere that want to spend more money, I take it.

Mr. FLOOD. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from Pennsylvania.

Mr. FLOOD. Mr. Speaker, I asked the gentleman to yield for this purpose: As you know, I am for this rule, and I certainly will be for the bill. But I would like to bring to the attention of the Members of the House that last night in Panama City a great mob of Panamanians went to the airport and there they met the Panamanian Foreign Minister who was returning from the Latin American Conference at San Jose, Costa Rica. They carried him on their shoulders—thousands of them—to the Panamanian Foreign Office, and there the Foreign Minister made this announcement, that he, the Foreign Minister of Panama, met privately and secretly with the Secretary of State of the United States of America, Mr. Herter; that they discussed the question of Panamanian sovereignty over the Panama Canal and the Canal Zone. Now, Mr. Speaker, and my friend from Massachusetts, you all know that on the resolution introduced by the distinguished gentleman from Alabama [Mr. SELDEN], this House on a rollcall vote of 382 to 12 said to the

President and to the Secretary of State that any question of sovereignty over the Panama Canal must be dealt with only by revision of a treaty with Panama because the United States of America is sovereign there by treaty, an absolute sovereign.

The Foreign Minister told the Panamanians, and on the first page of the Washington Post this morning is the statement made by the Foreign Minister of Panama, that the American Secretary of State, Mr. Herter, agrees with the position of Panama, contrary to the Constitution of the United States, contrary to the law of the land, which a treaty is. I have brought this matter to the attention of the House for several years, and I now think I have the right to ask: Did the Secretary of State, Mr. Herter, meet with the Foreign Minister of Panama bilaterally or secretly at Costa Rica. If he did, what did they talk about?

The American people and the Members of this House have a right to know what agreements did they make, if any. Has the Secretary of State reported this to the President of the United States? If he did, what did he report? If he did not, why did he not? Is he going to? What is he going to report?

Mr. Speaker, it is my conclusion that the minute this Congress adjourns sine die there will be an Executive order issued by the President of the United States upon the recommendation of the Secretary of State to permit the Republic of Panama to fly its flag over all ships passing through the Panama Canal and over the Panama Canal Zone, thereby recognizing sovereignty in Panama, which will be a foot in the door, and as sure as you are sitting there, Mr. Speaker, Panama with the help of Nasser, with the approval of Castro, and the active cooperation of this Latin American Red league, is going to demand total sovereignty and kick you out of the Panama Canal. Mark my words on that.

Mr. O'NEILL. Mr. Speaker, I urge the adoption of the rule.

Mr. ALLEN. Mr. Speaker, I yield myself such time as I may require and I ask unanimous consent to proceed out of order.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ALLEN. Mr. Speaker, I was shocked to read in the morning newspapers that the Pennsylvania Railroad is expected to be closed down by a strike at midnight tonight for the first time in its 114-year history. In fact, lots of its service, both freight and passenger, has already been discontinued because trains cannot reach their destination before the deadline of midnight.

During my entire 28 years of service in this Congress I have had great admiration and respect for the railroad brotherhoods of this country, their leaders and the individual members themselves. There are 24 such railroad brotherhoods, only 2 of which are involved in this situation, representing only 20,000 railroad workers out of a grand total of 930,000 in the country. One of the unions involved is the TWU—Transport Workers Union presided over by Mike Quill. This union represents 15,000 of the 20,000 members. Incidentally, the TWU is only on the Pennsylvania Railroad and does not represent the railroad workers on any other railroad in the country. I am informed that neither the president of the TWU nor the top officials of that union have ever worked one single day for any railroad. This is very unfortunate, for I sincerely believe that if they ever had, their attitude would be completely reversed and more in line with the other 910,000 workers throughout the country.

I am not familiar with the merits of this controversy, but I do know that a neutral referee was appointed, who was acceptable to both the unions and management; that the unions rejected his recommendations and that the railroad management accepted them. Further, that the President appointed an Emergency Fact Finding Board—that the union rejected its recommendations and that railroad management accepted them.

I feel very deeply—that in the public interest—in behalf of the economic welfare of the country—and in the interest of our national defense, that this Congress should go on record as strongly urging the two unions involved, as well as the management of the Pennsylvania Railroad, not to break off their present negotiations, not to go on strike at midnight, but rather to sit in conference continuously hour by hour and day after day, if necessary, until some sort of agreement is reached.

Mr. O'NEILL. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. MARTIN].

Mr. MARTIN. Mr. Speaker, I ask unanimous consent to speak out of order.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MARTIN. Mr. Speaker, I was necessarily absent on Monday trying to penetrate the fog of New York City coming back here in an airplane. So, I was unable to join in the many tributes paid to my friend and my old friend, the gentleman from Illinois [Mr. ALLEN]. So, before the expiration of this Congress, I would like to, with your indulgence, do that.

Mr. Speaker, it is difficult for one to say farewell to a loyal friend of 28 years. The parting is softened by the realization that while LEO ALLEN, of Illinois, is laying down his work here in Congress, he will continue to be near us.

LEO ALLEN has been a great legislator; one of our best in the 28 years he has been a Member of Congress. He is a man of courage; a man of convictions, and he never wavered in those convictions. He made friends easily and he never failed in his loyalty to one to whom he gave his friendship.

I was thrown into a close association with LEO when he first came here, when we both lived at the University Club, or as it was then called, the Racquet Club. In those early days we established a firm friendship that grew stronger with the passing of the years.

As a member of and twice chairman of the Rules Committee, he was in a strategic position where his opportunity was great to shape the course of legislation. And, of course, that prominence carried with it the need for the greatest courage and resolutions. LEO never wavered.

On the football fields of the University of Michigan and as a soldier in the First World War, he served with fidelity and distinction.

That LEO should retire at so young an age came as a great shock to his legion of friends. Illinois loses a great voice in our national affairs and the country a faithful, conscientious, and wise legislator that it can ill afford to lose.

To all of us who have been privileged to enjoy his warm friendship, his service here will ever remain an inspiration. As he goes back to his work in private life, we wish for him continued success, good health, and the fullest measure of happiness. His good wife and fine family can well be proud of the record he leaves here.

Mr. O'NEILL. Mr. Speaker, I yield 7 minutes to the gentleman from Massachusetts [Mr. MCCORMACK].

Mr. McCORMACK. Mr. Speaker, while I am supporting the rule and this bill, I recognize that the American people are greatly concerned over our reverses of recent years throughout the world and at our loss of prestige. This is particularly so since the death of the late John Foster Dulles. Whether or not we agreed with the late Secretary, everyone recognized that he was firm in his position, that he was a man of strong character and great courage, that he knew the evil intent and purposes of international communism and that he was the one man throughout the world whom the Communist leaders in the Kremlin and elsewhere feared and respected through fear, particularly so far as our present administration is concerned.

One thing is certain, that there was no uncertainty in the leadership of John Foster Dulles. The fact that our prestige has been shaken cannot be denied.

It is only natural for the American people to ask the question, Why? One thing is certain, that the Democrats are not responsible for our loss of prestige. I can refer to a number of events that have happened but I will confine myself to Cuba. I will not refer in detail now to the poor judgment in the handling of the U–2 incident, or the failure of the summit meeting or the Japanese episode, and a number of others.

For years we have seen the direct efforts and the indirect efforts on the part of the Soviet Union to hurl themselves over Western Europe, and we found Western Europe containing them until recently, when they jumped over Western Europe and landed in Cuba under Castro. They have not only leaped over Western Europe but the Soviet Union has hurled itself over free Europe and within 90 miles of our country. Not only that, but it is using Cuba as a base to threaten

us in the Caribbean and, in fact, in all of South America. Cuba, under Castro, is a threat to every South American country as a Communist base directly aimed at the United States.

We have seen American citizens arbitrarily arrested, their rights under international law ruthlessly violated, Americans insulted, American property confiscated, and the Castro regime intentionally allying itself with the Soviet Union as an instrument and avenue of Soviet subversion of South American countries.

It was only the other day we witnessed Castro's latest outburst boasting of his close relationship with and reliance on the Soviet Union. We witnessed the arrogance of Castro's representative at the recent meeting of the Organization of American States. This meeting certainly produced interesting results in many respects. Even there we find the prestige of our country and her standing weakened and impaired.

Secretary Herter offered a reasonable resolution in relation to the Dominican Republic. I do not necessarily say that I subscribe completely to that resolution, but in connection with the tough resolution that was offered by other South American countries it was a reasonable one. The South America countries introduced one imposing all kinds of sanctions and breaking off diplomatic relations with the Dominican Republic. The tough resolution was adopted. We have severed diplomatic relationships with this country, with a country and people that have been friendly to us and, above all, strongly opposed to communism. As a matter of fact, the Dominican Republic and her people have been the strongest anti-Communist country and people of all the South American countries.

I do not subscribe to any dictatorship, but I recognize the fact that in practically all South American countries there is one form or another of dictatorship. I am concerned with the relationship of our country to these countries in connection with the national interests of our country. We break off relations with an anti-Communist country but retain diplomatic relations with the Soviet Union, the cause of world unrest, and also with the Castro regime in Cuba. In other words, our country did not have influence enough at the recent meeting of the Organization of American States to have our resolution adopted, and pending on the agenda was another resolution seeking direct action and placing the South American countries in direct action in connection with the Castro regime in Cuba. Secretary Herter wanted a resolution put squarely before the conference condemning the Soviet Union for their efforts to spread their influence in the hemisphere, calling upon Cuba to "reject and repudiate" such moves. We know what happened. A mild resolution was adopted. The toughest resolution possible was adopted against another country that is anti-Communist, and a much milder resolution was adopted against a regime in Cuba that openly boasts of its Communist affiliation and uses that in defiance of the United States of America and for subversive purposes among the countries of South America.

So we find on the one hand the American resolution against the Dominican Republic which was rejected would have been a much more common-sense approach than the one that was adopted. On the other hand, we find our resolution of firmness against the Castro regime also rejected. So it clearly shows that our influence and prestige among the nations of South America have been sharply impaired and weakened. These things cause us to do a little thinking and to do a little wondering, whether or not the day is approaching when we have to do some reevaluating of our foreign policy. I say that as one who has always been strong for mutual assistance. I have evidenced that today on an earlier vote. But, I recognize the fact that the national interest of my country comes first and when I see these things happen—when I see the pincer move from behind the Iron Curtain to Cuba, just 90 miles off our coast; when we see what has happened in Laos and when we realize what are going to be the consequences of what is happening there—as I say, when I see this pincer move going on, then we all must realize that what we need is strong and firm leadership—leadership that the world will respect and that the Soviet Union will also respect and know that such leadership means what they say. What we have to do is to come back to the policy of peace through strength.

Mr. ALLEN. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio [Mr. Bow].

Mr. BOW. Mr. Speaker, I rise in support of this resolution and in support of the bill. Unlike the distinguished majority leader who says he has always been for mutual security and evidenced it here today, I cannot say that. I have ever since I have been a Member of the House opposed the bills that have come here on mutual security, and I so voted today. However, this is a bill that I can support. This is a policy that I can support. I believe our relationship with Latin America is undoubtedly the most important of all the world. It has been my privilege as a member of the State Department appropriation subcommittee to travel in almost all the countries of South America and Central America and to know many of their people and to learn of their aspirations and their thinking. You hear sometimes and you read sometimes headlines of anti-Americanism. I do not think there is very much of that. I think there is a feeling of neglect by some of our neighbors to the south of us, that we have in the past shown some neglect of their problems while we have taken care of some of the problems of those who are not so close to us. I believe if we strengthen our relationship within the hemisphere that it will strengthen us in our fight for the free world. It seems to me, as I have traveled throughout much of the world, that we are looking back over our shoulders at history. We are looking at the years in the past and trying to bring them back to today. But, as you travel through the Latin American countries, it seems to me we are facing the horizon and looking forward and not looking backward—we are looking forward to an area of the world that has great possibilities and potentials not only for themselves, not only for our Western Hemisphere, but for the whole free world and for the liberation of the captive nations of the world.

I have a feeling that they are our good neighbors. They are our friends, and I think we can strengthen that friendship by the adoption of this resolution and this bill now pending before the House.

I find myself today supporting this kind of mutual security, because I think it can strengthen us. I hope that many others will consider that these are our neighbors, these are our friends, and I hope that in the debate, when we are considering these matters, that those who oppose it will not discuss too strongly the question of Cuba. I feel badly about Cuba. I agree with the majority leader. We can lead through strength and develop strength and unity in the Western Hemisphere. But let us not in anything we may say lead the Cuban people to believe that we are opposed to the Cuban people. Let us let them know that we are their friends; that it is Castro and the communistic government of Cuba that we oppose and that we of the free world, and we of North America and of the United States are still their good friends and want to bring liberty back to them.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. BOW. I yield.

Mr. McCORMACK. I thoroughly agree with the gentleman's statement. The gentleman will remember that I referred to the Castro government, and I know the majority of the Cuban people have friendship for us.

Mr. BOW. I did not mean in anything that I said to infer anything else from the gentleman's remarks, but I am fearful that in the heat of this debate somebody will refer to Cuba that will be an aspersion upon the people and not upon Castro and their communistic government.

Mr. BAILEY. Mr. Speaker, will the gentleman yield?

Mr. BOW. I yield.

Mr. BAILEY. How would the gentleman explain the proposition that since we have severed diplomatic relations with the Dominican Republic we have put $8 million at their disposal; $51.9 million for Cuba in an appropriation authorized by this legislation.

Mr. BOW. I would say if we look at that we will stop, look, and listen and see why it did happen, but I cannot believe I would say that we should not take care of our neighbors. If we look at our own country where we have spent millions, we can find some difficulties there.

Mr. BAILEY. Why did we curtail the Cuban sugar quota except to deprive them of the funds necessary to finance the program the Communists are trying to carry on in Cuba? Now you are giving them a lot of money to replace that money.

The SPEAKER. The time of the gentleman from Ohio [Mr. Bow] has expired.

Mr. ALLEN of Illinois. Mr. Speaker, I yield the gentleman 5 additional minutes.

Mr. BOW. Does the gentleman want me to yield further?

Mr. BAILEY. I said, How can we justify cutting the sugar quota in Cuba in order to deprive them of funds to carry on the regime they are carrying on, and at the same time giving them cash out of the Treasury?

Mr. BOW. I would say I feel sure that as long as the Castro regime is in power none of the funds we may authorize here would be used in Cuba. But I would assume also that when the Castro regime is out, when there is democracy in Cuba, that perhaps this help would go to them. But certainly none of these funds would go to Cuba as long as Castro is there.

Mr. BAILEY. Not unless the Congress will appropriate the money authorized.

Mr. BOW. That is correct. And then it would be with the limitation that none of it should be used while Castro is there.

Mr. HALEY. Mr. Speaker, will the gentleman yield?

Mr. BOW. I yield to the gentleman from Florida.

Mr. HALEY. Of course the gentleman says we are speaking from a position of strength. I am wondering how the adoption of this resolution and this bill will put us in a position of strength. The gentleman is aware of the fact that in the last 14 years in the Latin American countries we have poured $7,409 million of the taxpayers' money.

I want to say to the membership of this House we will only be able to speak from a position of strength when we have a firm foreign policy and stop our giveaway policy, because we are never going to buy from the other nations of the earth the respect of those people by American dollars.

Mr. BOW. I agree with the gentleman to this extent: We will not buy their friendship, but let me say to the gentleman that I have had the pleasure of meeting many fine people from many countries of Latin America and have spent considerable time with them. They are a proud people; they are not asking for handouts, and you are not going to be able to buy their friendship. They do not want handouts. What they want is our support, and that is what I want to give them. I believe this money will come back to us. I do not think this will be a handout operation.

In assessing the quality of the Latin American people let me call the gentleman's attention to what has happened in our own Commonwealth of Puerto Rico. Sure, they are American citizens, and fine citizens, but they have made wonderful strides in the development of their Commonwealth. They have done a great job. I am sure the other countries of Latin America can do likewise with support and guidance from us.

Mr. HALEY. I think the gentleman must realize that in the past 20 or 25 years our foreign policy has been an open checkbook. That is the reason we do not have the respect of the people of the earth.

Mr. BOW. Yes. But that is not the case where we have helped people to help themselves. The people who shall administer this program could well look to the Commonwealth of Puerto Rico for advice and assistance in carrying out any program we may establish.

Mr. Speaker, Luis Ferre, of Puerto Rico, is one of the most loyal Americans I have ever known. He and men like him should be used by our Government in their area of the world.

Luis Ferre recently made a statement in this regard that I should like to call to the attention of the House.

This is what Mr. Ferre has to say on the subject:

But, with the permission of the chairman, I would like to add some remarks on America's general relationship with Latin America and the way in which we Republicans can most effectively advance hemispheric solidarity so needed at this time. I would be deeply grateful if you would relay this part of the record to Senator COOPER and the Foreign Affairs Subcommittee.

As I suggested, before, we Puerto Ricans have had a unique opportunity for understanding both North America and Latin America. Since the end of World War II, we know that the United States has, necessarily, been preoccupied by Communist aggression in all parts of the world. But, while largely anti-Communist, Latin America's first attention has been on another question: how to rise up out of poverty and attain the bounteous life that their northern neighbor has shown to be within the grasp of 20th century man.

Thus, we have begun to appreciate the Latin America argument that our country has tended to neglect the nations of the South. Our eyes have been on Europe and Asia, and we have too much taken Latin America for granted.

We are now obviously discomfited. Defections from the area of freedom among the Latin American nations are a major threat to our national security.

Furthermore, we acknowledge that while many of the Latin American nations must be classified as underdeveloped areas, they have a greater relative importance than many other such areas, because of their ability to so eloquently articulate complaints against the United States and because of their common Western European heritage. In Latin America, after all, college graduates, trained technicians and skilled workmen are not counted on one's fingers. On the contrary, there are millions of superbly educated people among the Latins—all too many of whom are unfortunately too ready to accept and bespeak the anti-Yanqui line because of a lack of understanding of our basic objectives and aspirations.

To be sure, the United States has extended a great deal of help to Latin America—particularly in the last few years. American free enterprise has accepted the greatest part of the responsibility. According to the Chase Manhattan Bank, for instance, private U.S. investment in Latin America amounted to more than $8 billion in 1958 alone. More than that, the Export-Import Bank has long played a significant, although too modest role in promoting Latin American development. And, more recently, the United States undertook a 45-percent share in underwriting the $1 billion Inter-American Development Bank. In addition, there is growing hope that U.S. protectionism—particularly in the form of quotas—can be eased, so that alleged domestic needs no longer so drastically depress the economies of our southern neighbors.

Moreover, during just the last couple of weeks the administration has indicated its intention to launch a further loan-development program. I heartily applaud it for the somber statistics of the want that exists in Latin America—the torrential birthrates, the meager per capita incomes, the tragic lack of sanitation and health facilities—show the need—I must say that much more must be done.

But before making one concrete economic proposal, I shall point out that there is one all-important way in which we can bolster our relations with Latin America—and particularly with the youth cadres who so energetically—perhaps with unnecessary and damaging desperation aspire and lead in the revolution of rising expectations.

The key words here are "revolution of positivism." We must reawaken the knowledge that we are a revolutionary people, that in all of history no other nation has so successfully thrown off and smashed the burdens that man has borne for so long—poverty and tyranny.

We are free and prosperous. It is only through the near achievement of the American dream that the revolution of rising expectations ever occurred in the first place.

Whether a young Latin American is more impelled toward the cause of political liberty or technological progress, the fact is that his original heroes were American—say Abraham Lincoln and the Wright brothers. The essential thing is that we forcefully demonstrate that their values are still truly alive in our modern America, that we relive their dreams every day.

That is, we must embrace the knowledge that we have been and continue to be the most revolutionary country in the world.

Our great principle is our faith in the people. As a result we have approached very near the goal of winning complete freedom for all of our citizens and have virtually eliminated class antagonisms. America's development of a prosperous, all-inclusive middle class, by the way, completely knocks the props out from under the Communist theory. The opportunity for human realization, both material and spiritual, offered by our system can be, therefore, as it has in the past, an inspiration to have-not peoples throughout the world.

The principles that have allowed us to grow, then, will link us more closely than ever with the Latin American people. They have already done so with the people of Puerto Rico—the best proof to the world of how these principles operate successfully under a free society.

However, while I espouse ideas as the most important vehicle by which America can reach and restrengthen its relations with Latin America, there is also a need for concrete, material action. The objective is both to reduce the want of the underdeveloped nations and, at the same time, to sell the West's social and cultural system. Therefore, let me add one specific suggestion:

In approaching the underdeveloped nations of all the world—not just Latin America—let us join together with the now prosperous nations of Western Europe in a plan for "prosperity with freedom." Working with Great Britain, France, West Germany, Italy, Austria, and all the other have nations of free Europe, let us enlist free enterprise as our real missionary.

Business should be encouraged to make further massive investments in the underdeveloped nations. To prove the validity of our system of industrial democracy and social responsibility, the plants established by the Western businessmen should establish high wage rates, afford a broad range of social benefits, encourage labor organization development and open up opportunities for local capital participation.

The Western Governments should get behind this movement, not only by enacting the sort of tax laws that will encourage this missionary force, to go abroad, but also by

setting aside funds and techniques to compensate investors against the risk of expropriation or other arbitrary political action. This would be a much more positive way to help our friends.

A program of this sort, needless to say, would not, and could not, meet every need. Yet if our prime reliance as a society of free men is upon ourselves, instead of big government, it seems to me that we must allow free enterprise an important role in our program of assistance to the underdeveloped gain friends and understanding throughout nations of the world. I am confident we can the Western Hemisphere if we encourage this kind of a truly missionary zeal to take hold more and more.

May I thank you for your patience to let me present our case and my views. I appreciate this opportunity very much. Thank you.

Mr. Speaker, these are the words of a great American, a Latin American citizen of the United States. He deserves the confidence of the people of Puerto Rico and the States of the Union.

I hope he shall have the ear of our State Department. I am sure he can give guidance to them in this important work.

Mr. O'NEILL. Mr. Speaker, I yield the remainder of my time to the gentleman from Mississippi [Mr. WILLIAMS].

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WILLIAMS. Mr. Speaker, reports of the atrocities being committed in the Congo in recent weeks have shocked the sensibilities of the entire civilized world. Reports of children coming out of the Congo with mutilated hands, the unprovoked beating of American and Canadian airmen, stories of literally hundreds perhaps thousands of criminal assaults upon members of the white minority in the Congo, certainly have stirred the emotions of the world.

For weeks, since these reports began to come out of the Congo I have waited for one of our many civil rights advocates whose hearts are always bleeding for what they call the persecuted Negro minority in the South, to rise on the floor to deplore these rapes and assaults against the civil rights of the white minority in the Congo. But, alas, I have waited until the last day of the Congress and they are silent as the tomb.

Therefore, Mr. Speaker, I am introducing today a resolution, and I would certainly hope that even though it is the last day and we are in the closing hours of this Congress, that the leadership of this body and of the other body might permit the consideration under suspension of the rules or in some other manner of this or a similar resolution.

I shall read this resolution. It is self-explanatory and it is drafted in line with the resolution which was adopted by Congress in 1958, expressing our sympathy for the Hungarian people:

Whereas the riots and disorders following the granting of independence to the Republic of the Congo resulted in heinous atrocities committed against innocent European and American men, women, and children; and

Whereas the perpetrators of these outrageous crimes were members of the Army of the Republic of the Congo; and

Whereas no apparent official effort has been made by appropriate authorities to bring to justice the criminals; and

Whereas the inhuman savagery rampant in the Congo shocks the conscience of decent mankind: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress of the United States to express through the organs of the United Nations and through all other appropriate channels, the deep sense of indignation of the United States at these acts of barbarism; and be it further

Resolved, That it is the sense of the Congress of the United States that the President of the United States express through all appropriate channels the sympathy of the people of the United States for the victims of Congolese brutality and their families.

Mr. Speaker, in connection with my remarks I shall include a copy of a preliminary report on the atrocities committed by the Congolese Army against the white population of the Republic of the Congo before the intervention of the Belgian forces. This report is dated August 1960, and is an official publication of the Belgian Government information service:

A PRELIMINARY REPORT ON THE ATROCITIES COMMITTED BY THE CONGOLESE ARMY AGAINST THE WHITE POPULATION OF THE REPUBLIC OF THE CONGO BEFORE THE INTERVENTION OF THE BELGIAN FORCES

(Report by His Excellency L. Merchiers, Minister of Justice of Belgium)

(NOTE.—On July 28, 1960, Mr. L. Merchiers, Minister of Justice of Belgium, gave to the press the following preliminary report on the atrocities committed by the Congolese Army against white people in the Congo, which motivated the intervention of the Belgian armed forces. When Mr. Kanza, Minister of the Congo to the U.N., appeared before the Security Council, he qualified these atrocities as petits abus, minor abuses. When Mr. P. Lumumba, Prime Minister of the Congo, addressed the press at the U.N., he declared that possibly a few European women had "been disturbed in their honor". Later, when in Canada, Mr. Lumumba stated that nothing of the kind had happened. When he was confronted with the declaration of the American Ambassador to the Congo, Mr. C. Timberlake, who, on his arrival from the Congo, declared that American missionaries had been raped by Congolese, Mr. Lumumba, according to the press, denied this. In the meantime, the press reported that 291 Belgian women had testified to the ignoble treatment they had suffered, that about 300 men had been brutalized and beaten and that about 20 men had been killed.)

Events in the Congo, following the mutiny of the Congo Armed Forces, rapidly took a tragic turn, which forced the Belgian Government to take urgent measures to protect white residents, both Belgian and foreign. These measures were dictated by human considerations and the imperative duty to save men, women and children who found themselves in immediate and extreme danger.

These measures had become for the Belgian Government an inescapable moral duty following the mutiny of the Congo Armed Forces which were in charge of maintaining order in the country.

A number of Congolese leaders have tried to mislead world opinion by casting doubts on the tragic reality of the facts. In view of this, the Belgian Government decided that it was its urgent duty to inform the world about the acts of violence and the atrocities that have taken place.

In relation to the scope of the mutiny, the number of persons killed seems to have been relatively small, at least on the basis of the information that is at present available. It is impossible to say at this stage how many of the people that are missing, were killed.

On the other hand, the acts of abasement of human dignity, of humiliation, of the most extreme actions against mankind and the civilized conception of human values, were the rule, as if there had been given an order to do all that was possible to humiliate men and women but to avoid before world opinion, the reproach of massacres.

The Belgian Government intends to bring all the facts to light. By royal decree of the 16th of July 1960, a commission of inquiry was created, in charge of investigating all the acts of violence perpetrated against human beings in the Congo since the day when Belgium freely and generously granted independence to that country.

In order to insure the objective and independent character of the commission, it is composed exclusively of high judges of Belgian courts. It is presided over by a counselor of the Cour de Cassation. Its three members are counselors at the courts of appeal of the realm.

The commission is not under the control of the Government: its sole obligation toward the authorities is to submit a report on its mission and findings. It has extensive powers and it can call on the cooperation of courts and judges in the country, on the police and even on private individuals.

Cases are investigated by judges, public prosecutors, members of the bar, as well as by the usual personnel of the police and the gendarmerie.

Some inquiries are conducted by women investigators who are in charge of collecting information of a very personal and delicate nature: women judges, women inquirers, social assistants and women doctors.

All these steps were taken to enable victims and witnesses to be heard at home or at a place of their own choice, with the tact and discretion required by the situation.

The Belgian radio has broadcast appeals to induce victims and witnesses who were not approached by the investigators, to take the initiative of making a statement either in writing to the Commission of Inquiry, Palace of Justice, Brussels, or of getting in touch directly with the police station of their own choice.

The commission is taking every precaution to keep its investigation as discreet as possible. It refuses to communicate the names of the victims and the witnesses and other elements of information which might help to identify the persons that were questioned.

The preliminary results of the thorough and extensive investigation which the commission is undertaking at present, are only cursorily described in the following pages.

The commission started its investigation on the 17th of July, the flow of witnesses continues and what information we possess at the present moment is only a fraction of what we shall have the profound regret to learn later.

However, it must be stressed that the facts described in the present preliminary report are among those which the commission can retain as established and proved as of now. Cases which left the slightest doubt have been omitted until they can be verified on the basis of evidence given by direct and impartial witnesses. On the other hand, it was not possible to publish in this preliminary report all the information which the commission has already verified. A complete report may be published later, probably in the form of a white book.

It is with reluctance that the often painful details that follow are published. The events are described as tactfully as possible. But in view of some of the statements which cast a doubt on the real savagery of which the whites in the Congo were the victims, the Belgian Government thinks that it is necessary to provide full information on some acts which have been proved for certain, even if the publication of them may seem offensive to certain codes of decency.

The report that follows only gives a fragmentary picture of what happened: (1) in the province of Léopoldville, (2) in the Kasai province, (3) in the Equator province.

I. PROVINCE OF LEOPOLDVILLE

A. Kisantu and Inkisi

Mrs. ——— was at home on the 5th of July, 1960, at Kisantu with her mother and four children. Around 4 p.m. African soldiers pushed her in a bedroom, and raped her, all four of them in turn. Between 7 and 8 p.m. 12 soldiers and an African gendarme came back to the house. After having pushed out the husband and the children, the 12 soldiers raped her in the same room. Altogether Mrs. ——— was raped 16 times.

Miss —— was at Inkisi with three friends in the night of the 5th to the 6th of July. African soldiers seized her, threw her on the floor and maltreated her over her whole body in view of raping her. A Congolese chauffeur succeeded in chasing them away. Miss ——— thus escaped raping, but is at present under treatment.

On the 6th of July 1960, at Inkisi, Mr. ——— was slapped in the face and hit with rifle butts by African soldiers who took him to prison. With two other white men, whom he named, he was forced during more than 1 hour and a quarter to flatten coils of barbed wire with his bare feet.

When he was taken out of prison, he was hit in the spine with a rifle butt so hard that he fell on the ground, whereupon he was hit over the whole body in the same manner. After this, he was brutally dragged back to his home. During the night, African soldiers returned to his house and forced Mr. ——— and two other white men to stay with uplifted arms in the backyard of the house. Meanwhile, a number of soldiers attempted to rape the women in the house.

At Inkisi, on July 6 1960, Mrs. ——— only just escaped raping, thanks to a nervous crises of a friend, which frightened the assaulters.

On the 6th day of July 1960, at Inkisi, Miss ——— was at home around 8:30 p.m. with three friends, when five or six soldiers entered the house. Two or three of them dragged one of the young women in a room. When she cried for help, Miss ——— burst into the room where her friend was fighting the assaulters, but the soldiers grasped her and dragged her from one side to another of the room. They tried to rape her, tearing her clothes and hitting her. But they did not succeed. A black policeman put an end to the scene. A few minutes later, a Congolese sergeant broke into the room and tried several times to rape one of the ladies in the presence of her four children. The lady fainted two or three times. The soldier thereupon attacked another young lady and dragged her into an adjoining room from which cries for help could be heard. The soldier remained about fifteen minutes with his victim.

B. Banza-Boma

On the 5th day of July 1960, Mrs. ——— was at Banza-Boma with a very small child. Mrs. ——— said that she was two months pregnant. Soldiers forced her to come out on the barza. She was raped by four soldiers in succession.

Mrs. ——— said that around the same time a lady, whose name she mentioned, was raped at Banza-Boma.

At Banza-Boma, on the 6th of July 1960, around noon, Mrs. ——— was raped by a Congolese soldier at gunpoint, after her husband had been taken away by soldiers accompanied by the secretary of the ABAKO at Madimba.

C. Matadi

On the 8th day of July, at Matadi, the Swiss subject N—— was arrested around ten o'clock by Congolese policemen. At the Damoi camp, he was hit in the back with rifle butts, while a policeman told him, literally: "that's independence". Later he was insulted, humiliated and hit with rifle butts.

At Matadi, on July 8 around 11 o'clock, 12 Congolese policemen arrived in the city and, threatening with rifles, took away the valid male population.

Mrs. ——— had taken refuge in a house with four other ladies and children. The policemen returned to loot the house, smash the doors, and break the windows. One of the Congolese policemen entered the room where the women and children were together. He took away a girl of 14, threatening with his gun. When she heard the cries of horror and pain of the child, Mrs. ——— realized that the policeman was raping her. After that, Mrs. ——— was also raped.

When Mrs. ——— cried, the policeman put his knife on her throat. Mrs. ——— noticed traces of blood, offering proof that the girl was raped. After Mrs. ——— two other ladies were raped.

The fourth lady escaped, thanks to the intervention of an African priest and a European.

On July 8, at Matadi, Mrs. ——— was staying in a villa together with six other ladies. A Congolese patrol burst into the house, smashing the door. Several of them were wearing civilian clothes, others were in uniform. Mrs. ——— was isolated in a bedroom and raped.

Mrs. Z was at Matadi, on July 8, around 1 o'clock at noon, when three soldiers of the Force Publique came to search the house. One of them raped Mrs. Z.

D. Sanda

Mrs. ——— was arrested by approximately 10 soldiers of the Force Publique at her home in the Seke-Banza territory on July 9. She was taken to Sanda. She was assaulted, kicked over her whole body, and dragged over the ground by her hair. Around 11 o'clock at night, four soldiers, among them a Congolese noncommissioned officer, forced her, together with another lady, to work for 2 hours in the savannah under the menace of their guns. They were severely injured.

Back home, the two ladies were separated. One of them was raped three times by the noncommissioned officer, according to what Mrs. ——— heard.

Mrs. ——— herself was raped three times by three different soldiers.

The following morning, Congolese soldiers twisted her hand, which is still bandaged.

A third and a fourth lady, the latter Portuguese, could avoid being raped by offering 500 francs to soldiers during the same night of the 8–9th of July. Like the others, they were forced to pluck weeds, under the menace of death.

E. Zanzi-Kua

Mr. ——— was staying at Malanga and during the night of the 11th of July fled in the direction of Angola. A convoy of 7 cars was attacked at Zanzi-Kua near the offices of the ABAKO. One of the cars was carrying his wife and his two daughters. The car in front of his was stopped by Congolese. He tried to escape but was fired at several times. His wife was hit in the face by a bullet and dropped dead.

F. Kimpese

At Kimpese, on the 13th of July, around 6 p.m. about 12 soldiers and 100 civilians came to the house of Mr. ——— who was taken away by car with his wife and his three children below 16 in the direction of Leopoldville. The woman was separated from her husband, and in the car that took her away with her two youngest children, she was raped three times by the Congolese soldiers. They hit the child aged 9, and undressed a baby of two "to make sure that it was a boy."

Mrs. ——— was raped at Kimpese in the night of the 13th to the 14th of July, at the same time as Mrs. B. She was raped a second time, at the same time as five other women. The following day, on the road to Thysville, the women were placed in a line, and raped a third time, some of them in the presence of their children.

Mrs. A was raped four times at Kimpese in the night of 13–14th of July, in the presence of her child aged 3.

Mrs. X was raped 10 times at Kimpese in the night of the 13–14th of July, in the presence of her children, after her husband was roped and clubbed.

G. Wono (Thysville)

On the 13th of July, two families, among which that of Mrs. A at Wono, took refuge in the savannah, but they were discovered by Congolese policemen. The men were roped and pushed with a pregnant woman on a truck. Four other women were pushed on another truck and transferred to Kimpese where the women were shut in a small room with five other women and four children. Around nine at night one woman was taken out and raped, later two more underwent the same treatment, and later still Mrs. A was raped. She was taken back to the cell, but taken out again three or four times by a policeman who raped her each time.

The following day the families were pushed on a truck. At a stop, the soldiers dragged women and children into the bush and raped the former. Mrs. A was raped five or six times in the presence of her child and other children.

On the road to Thysville, she was hit in the right eye and still bears traces of it.

Mrs. A was thus raped at least 10 times.

Mr. ——— lived at Wono when on the 13th of July Congolese policemen broke into his house. They tied his hands together with telephone wire, and forced him on his knees. He was slapped in the face, clubbed and hit with rifle butts in the back and on the arms and kicked in his back and on his legs. Natives took part in this. His three companions received the same treatment. He was pushed on a truck by two Congolese, one of them holding him by the head and the other by the feet. At that moment the natives seemed to watch them with pity. While the women were pushed on the other truck, the whites were beaten again. The natives used violence trying to put rotten manioc into their mouth. At every stop between Wono and Kimpese, the prisoners were stoned and beaten by the natives. The brother of Mr. ——— escaped death thanks to a member of the ABAKO.

At Zombe, the men were roped together three by three by the neck, and were once more beaten up by the natives and the policemen.

Imprisoned at Kimpese, they had to lie down on the cement floor. They were obliged to urinate in their trousers and forced to drink from a cup in which the blacks had urinated. They were repeatedly beaten until dawn.

During the transfer to Lukala, they were beaten once more by the soldiers, beaten again at Lukula, and sent to Thysville, where they were looked after by a doctor.

H. Camp Hardy

On the 4th of July, after the 4 days of festivities which had marked the proclamation of independence, the whites noticed

diers was growing. At night, this excitement had become disquieting.

Armed with machetes, the threatening Congolese soldiers told their officers that they were now the masters. After they had broken into the munition depots, they were in fact so.

On the 5th, the officers assembled on the hill overlooking the European city, with their wives and children. In the night of the 5th and 6th of July, whites were detained in their houses. On the 6th, a Congolese delegation, which included Mr. Diomi, a Congolese cabinet minister, tried to restore calm among the Congolese. It saw how three officers from another camp had been seriously wounded by the Congolese soldiers, and brought back, some of them in a state of collapse, on stretchers to Camp Hardy. The same evening there was an intervention of President Kasavubu and Premier Lumumba and the officers returned to their home.

From the 7th to the 10th, the whites resumed work normally, but the Congolese did not show up.

On the 11th, in the afternoon, armed black soldiers disarmed the officers and noncommissioned officers, put them in prison, after having taken away their possessions, and beaten them with rifle butts.

At the same time, the whites of Sonankulu were imprisoned in the Thysville goal. They were humiliated, stripped, spat in the face, beaten, and ridiculed.

Finally, officers from the two camps and civilians among whom there were priests whose beard they attempted to burn, were locked in the same cell. They were left without anything to eat or to drink. It is true that some of them were given some water, but it seemed to come from the latrines. Others were permitted to have somebody send for food at home, but in the case of one soldier who fetched food, the wife of the officer who gave it to him was raped.

As to the acts of violence committed against men, following cases may be mentioned:

On the 6th of July, at Thysville, a man named C was taken by Congolese soldiers to Camp Hardy, under the hostile shouts of the population. He was beaten and, among others, he was hit with a rifle butt in the back.

The man named V was at Thysville, Camp Hardy, on the 5th and 6th of July. He was put in prison for 2 days without food, under the menace of an automatic weapon, with his wife and three children below 12. After he was set free, he was arrested again on the 11th around 3 o'clock in the afternoon. He was stripped like the others, hit with fists, feet, and rifle butts. Two of his companions were mortally wounded. For 2 more days they were left without drink or food. Soldiers attempted to drown them in a barrel filled with water, but a sergeant prevented them from doing so.

Mr. ——— lived at the military Camp Hardy at Thysville. On the 6th of July, and again on the 11th and 12th of July, he was beaten by native soldiers.

M, a Belgian officer, said that the situation deteriorated in the camp at Thysville on the 5th of July. The officers were practically prisoners, and two of them were beaten with sticks and stoned. On the 11th of July, M was put in a prison cell after having been beaten and hit with a rifle butt. For about 3 days, he and the other prisoners were without food or drink. At a certain moment, they received water, but M thinks that it was water from the latrines.

After the men had been made defenseless, the majority of the white women were raped.

Raping scenes have been described by the victims in lurid terms. The Congolese soldiers attacked all the women, even those that were visibly pregnant, women that had recently given birth to a child, and sick women. To get what they were after, they committed acts of violence and threatened with their weapons. In a great many cases, they threatened the children with death to make their mothers give in.

Some women were raped by a great many men in succession and could not tell the number of assaults committed against them. In many cases, these scenes took place in the presence of children and, in particular, in the presence of the children of the victims.

Some ladies sacrificed themselves to avoid the worst for their children or for a sick friend. Not all the girls escaped the soldiers' brutality.

It must be noted, that some of the victims lost consciousness as a result of the acts of violence. When they thought that their victims were dead, the soldiers ran away.

Of the 29 white women that have already been questioned by the Commission, 19, or two-thirds of them, have admitted that they were raped. This figure only includes the cases of rape certified by the statement of the victim, excluding the numberless attempts at rape.

Some women escaped the acts of violence, either by feigning absence (one of them shut herself up with her girl for 2 days in a washroom), or thanks to the intervention of a Congolese soldier who remained faithful.

These cases of rape present a serious danger of venereal contagion.

A FEW CONCRETE EXAMPLES

As stated already, the man named "V" was at the Hardy Camp, Thysville, on the 5th and 6th of July. He was imprisoned for 2 days without food, and his wife and three children aged less than 12, under the menace of an automatic weapon. After he was freed, he was arrested again on the 11th of July, around 3 o'clock in the afternoon. He was stripped, like the others, and hit with fists, feet, and rifle butts. Two of his companions were mortally wounded. For 2 more days they were deprived of food and drink. Soldiers tried to drown him in a barrel filled with water, but a sergeant prevented them.

On the same day (11th of July), his wife was assaulted in her bedroom. She was hit with fists and rifle butts by six soldiers, who got hold of her and made deep cuts in her arms, of which the Commission has found traces. They stripped her of her underwear and raped her. Six soldiers held her tight and motionless, while an undetermined number of soldiers raped her. They stood in line while waiting for their turn. Her three children were present at the scene crying loudly.

Other soldiers got hold of her daughter aged less than 12 and raped her several times.

Shortly afterward, three soldiers again entered her room and raped Mrs. Z in turn. While one of them raped her, the two others held her motionless. The children were again present.

Shortly after they left, other soldiers came to the house and raped Mrs. Z in the same manner.

These scenes continued from dusk until dawn.

Six of the European women living in the same street had been raped in the same circumstances.

The following day, the soldiers came back, but they found the house barricaded by the women. They set fire to the curtains, but a Congolese sergeant major stopped them and chased the soldiers away.

On the 13th, the soldiers again penetrated the house, but, despite the menace of weapons, Mrs. Z fled to the house of a neighbor where her children were able to join her.

The child of 11 who was raped was not questioned by the Commission. Her state of health does not permit it for the moment.

On the 11th of July, Mrs. ——— accompanied by her husband and two children, left Malanga-Gare, from a point known as Bloc 110. They were arrested by civilians of the ABAKO, searched, imprisoned, and beaten all night. They were all taken to Thysville, where they arrived on the 12th toward midnight. Mrs. ——— was alone in a cell with her children aged less than 7, when a group of about 10 soldiers arrived. One of them held her by the arms, another by the legs, a third held his hand on her mouth to prevent her from screaming, a fourth pulled her hair and slapped her face. She was raped a dozen times in the presence of the children who huddled in a corner together. This scene lasted from 2 till 4:30 in the morning. The family was saved by a white doctor.

As told already, M, who lived at the Hardy Camp at Thysville, was beaten twice by Congolese soldiers on the 6th and the 11-12th of July. His wife was the victim of acts of violence committed by four African soldiers. On the 11th, toward 6 p.m. two soldiers attempted to rape her. A third soldier succeeded. This lady said that nine-tenths of the white women at Camp Hardy were the victims of similar brutalities.

Mrs. ——— was on the 11th of July at the home of Mrs. B at Camp Hardy, Thysville, with a small child, while her husband had been put in prison by Congolese soldiers. The latter broke into the house, where, besides the aforementioned ladies, were Mrs. C 7 months pregnant, and Mrs. D with her small child. Mrs. A was taken back to her house. Soldiers started a fight to know who would have Mrs. A, who finally was handed over to two of them who belonged to the transport unit of Camp Hardy, and who both raped her. Later, she was taken back to Mrs. D's home, where she met Mrs. E, F, and G who told her that they had also been raped.

In the evening of the 12th of July, these ladies were taken back to their respective homes, except Mrs. B who later told Mrs. A that she had been raped by a Congolese soldier while she was alone. Mrs. A found her home looted.

Mrs. A was at Camp Hardy at the home of Mrs. B with Mrs. C, where all three of them were raped by Congolese soldiers in the presence of the children. The soldiers also scratched and hurt a baby of 9 months old.

Mrs. A was raped 10 to 15 times during two consecutive nights.

Mrs. ——— was at Camp Hardy at Thysville. She was pregnant. When she came home, two Congolese soldiers were waiting for her, and, menacing her with their weapons, pushed her into a room. One of them raped her once, the other twice. While one of them was raping her, the other was pointing his gun at her. Mrs. ——— is in danger of miscarriage.

On the 11th of July, toward 8 p.m., in the Thysville military camp, five or six soldiers searched the house of Mrs. ———. The first one who raped her, had previously taken her by the throat. She was raped by four soldiers. The fourth stayed with her all night to protect her against new assaults.

Mrs. ——— was at Camp Hardy, Thysville, on the 11th of July. Toward 9 in the evening, Congolese soldiers of the transport unit broke into her house. They hit her with rifle butts, put an automatic gun in her neck and a bayonet on her chest. Three or four times attempts were made to rape her. Soldiers pulled hair from her pubis and tried to make her swallow it. A soldier thrust his fingers, covered by something rough like sandpaper, into her. She was severely torn and fainted without recovering until the next day. She presumes that they continued their acts of torture. The scene took place in the presence of her son, aged 11.

Mrs. ——— is still under medical care.

Mrs. ——— was raped at gunpoint in Camp Hardy, Thysville, on the 11th of July, toward 6 o'clock at night, immediately after the arrest of her husband.

Toward 8 a.m. on the same day, the Congolese soldiers returned and again raped Mrs. ———, as well as a neighbor, threatening them or their children. The raping continued during the whole night of 12–13th of July. The scenes often took place in the presence of the children, among whom were two boys of 17 and 13 and a girl of 12.

The sentries, who were posted by a noncommissioned Congolese officer for the protection of the women, were the first to break into the house.

Mrs. ——— was at Camp Hardy, Thysville, when her husband was arrested on the 11th of July by Congolese soldiers. They searched the house and attempted to rape her in front of her son, aged 4, saying: "We are going to beat up your husbands and have a good time with you." She was hit with a rifle butt, and one of the children bit a soldier's leg. Three soldiers slapped the boy and put a bayonet to his heart, menacing him with their rifles, ready to shoot. They tried to rape Mrs. ———.

The soldiers burnt the hand of the mother with a lighted cigarette to show the child what they would do if she continued to put up resistance.

The boy was finally taken to another room. Mrs. ——— was raped continually from 6 till 8:30 p.m. At least a dozen Africans abused her. They left when they thought she would die.

On the 11th of July, Mrs. ——— and her family were in a convoy of seven cars with people being evacuated towards Angola. At 8 in the evening, the last four cars were stopped at Sensikua (Songolo). The captives were taken to the ABAKO offices. All of them were beaten by civilians with belts, feet and fists. Mrs. ——— was dragged by the hair from one room to another. The following day they were taken by Congolese soldiers to Camp Hardy, Thysville.

In the night of 12–13th of July Congolese soldiers attempted to rape Mrs. A, as well as Mrs. B and Mrs. C in the sentries' room, in the presence of their children. Some of them held the women, while others attempted to rape them. One of the soldiers threatened Mrs. A with his bayonet. Mrs. A's resistance was broken and she was finally raped by one soldier, and taken to a cell with her two young children who witnessed the scene. The soldiers returned to take away the children, whom, it seemed to her, she heard crying in the sentries' room. In the cell she was raped again by two soldiers. One held her by the throat, while the other abused her. At one moment, six soldiers were surrounding her. One of the soldiers who raped her, violently grasped and twisted her right breast. She was shouting at the top of her voice. Later, her children were brought back to her. She could hear her neighbor crying loudly, Mrs. B, who was the victim of the same acts of brutality.

A soldier returned to the cell, and exhibiting himself, demanded that Mrs. A yield to him. He threatened to take her little girl away, if she did not consent. Nevertheless, she resisted, but was slapped repeatedly in the face.

Mr. ——— confirmed that part of his wife's statement relating to the scenes they experienced together, and said that the men had been maltreated. He himself had been beaten, his shoes stolen and he was bound hands and feet. He was also beaten by members of the ABAKO.

He heard the cries of women, he recognized the sound of his wife's voice and realized that she was being raped.

Also at Camp Hardy, Thysville, in the night of the 11th of July, a group of about 10 soldiers, some of them drunk, came to the house of Lieutenant A, where they found his wife, Mrs. B, and a family of friends C.

The soldiers got hold of Mrs. A and Mrs. B, and took them to the room where their children were sleeping. Mrs. B was raped, even though she was pregnant for 5 months, by two soldiers in succession, who had threatened her children aged 5 and 3 so that she could fear for their lives. Mrs. B is at present receiving medical treatment. In the same room, Mrs. A was raped by soldiers on the bed in which the children slept. Mrs. C, who was taken to another room, was raped after soldiers had begun to hit her baby 9 months old.

Mrs. A the wife of a Belgian officer at Camp Hardy, Thysville, gave life to a baby on the 2d of July and left the hospital to return home. On the 11th, her husband and other Europeans were arrested by Congolese soldiers. She stayed at her home with three ladies and four children. Congolese soldiers came to search the house. They told Mrs. B and Mrs. C to go home. One of them slapped Mrs. B in the face, and tightly pressed her throat with a muffler, before taking back Mrs. C.

Mrs. A heard loud cries and learned that the soldier had tried to rape Mrs. C. Around midnight, after several attempts by Congolese soldiers to enter the house, six soldiers broke the windowpanes and penetrated into the bedroom where they found Mrs. A and her children, and Mrs. C and her child. They took away the child from Mrs. C and gave it to Mrs. A, dragged the mother in the living room from where loud crying could immediately be heard. While Mrs. A was in bed with two children, the soldier made four attempts to rape her, even though she was still torn and had several stitchings following her recent confinement.

Even though the act could not be fully perpetrated in view of the state of the victim, rape remains an established fact. Mrs. A said that during the night soldiers slapped her little boy aged 3½ because he cried. Meanwhile, Mrs. C had come back, she went to sleep with Mrs. A, and lost consciousness. Later she declared that five or six soldiers had raped and beaten her. Mrs. D told her later that although 2 months pregnant and under medical care, three soldiers had raped her. Mrs. A heard from Mrs. E that this woman had been raped countless times by the soldiers.

Mrs. X was at Camp Hardy at Thysville, when 17 women and children were evacuated by train on July 7. On the 11th, her husband was arrested. She was alone with her two children and was harassed several times by the soldiers. Her windowpanes were broken, soon a soldier crashed into the room, threw her on the floor and raped her. Another soldier came to the house the same day and raped her too. About noon, five soldiers arrived. They pointed their bayonets at her chest, threatening to kill her. All five raped her. She was thus raped by seven soldiers.

On July 11, at about 6:30 p.m., Mrs. X, at Thysville, received soon after the arrest of her husband, the visit of soldiers who searched the house and took away the money. One of her friends who was present was raped by a soldier under threats. This person was raped twice more between the 11th and the 13th of July. Mrs. X herself was raped on the morning of the 12th, although she was the mother of a 6-week-old child.

Mrs. X lived with her husband, an officer, and her two children, 7 and 10 years of age, at Thysville. On July 11, five soldiers rushed into the house. Three of them pushed her into the bedroom and each one raped her. They stole $300, in Belgian francs. On July 12, Mrs. X went to Mrs. B, where she found Mrs. C. Five soldiers broke the door down with their bayonets. Mrs. A was raped by two soldiers, one of them was among those who had raped her the day before. She heard that Mrs. C was raped also. She thinks—as nearly all the victims state—that a very great number of white women in Camp Hardy were raped. They are at present under medical care.

On the 12th, the civilians were released thanks to the intervention of Minister Ganshof van der Meersch and Mr. Diomi, Congolese Cabinet Minister.

On the 13th, the officers were released thanks to Minister Bomboko and to a newspaper man—a German, it seems. A convoy reached Leopoldville the same day. On the road, the refugees were injured and stoned. The soldiers first tried to send the men back to Thysville: a little further, they attacked the convoy and shot at it. The refugees were able to reach the airport thanks to the Belgian paratroopers.

II. KASAI PROVINCE

Luluabourg

In the afternoon of July 9, the soldiers of the Force Publique at the General Gilliard Camp, seized the munitions dump; they disarmed the officers and the noncommission Belgian officers and pushed them all, with their families, into the mess hall. Some of the commissioned and noncommissioned officers were molested and beaten. A lady and an adjutant who were driving to the camp, their car full of children, were subjected to gunshots.

Early in the evening of the 9th, a Belgian civilian who was inside the camp, was seriously wounded by a shot fired by a Congolese soldier. Taken to the hospital of Luluabourg, he was on the operating table when the soldiers attacked the hospital twice with machineguns. The surgeon who was operating on the wounded man could not give him the necessary care. A little later, about 20 men who were under siege in the Imokasai building, rushed out and succeeded, under the fire of soldiers, to evacuate the sick and the personnel of the hospital. After they left, it was completely ransacked. The wounded man died soon after his transfer from the hospital to the Imokasai building.

Immediately after the first turmoil, about 1,500 Europeans retrenched themselves in the Imokasai building; they soon were besieged by the Congolese troops who began to fire on them around 8 p.m. (July 9). The siege, with intermittant gunshots and machinegun fire, went on until the arrival of the paratroopers on the evening of the 10th. Some of the besieged were wounded. During the siege, the soldiers asked the besieged to surrender their arms but they refused.

A few Belgian members of the Congolese Security Service and their families had taken refuge in the Building of the Service at 9 p.m. They also were attacked by gunfire. Other Europeans had taken refuge in the Pax hospital.

On July 10, at 7 a.m., the doors were demolished and the place was ransacked by a Congolese military patrol. A noncommissioned soldier coming into a room where he found Mr. X, fired twice. Mr. X was hit in the belly while he had his hands in the air and while he cried: "Don't shoot, we have no arms."

As for the families who could not reach the Imokasai building, many of them were subjected to grave maltreatment. At the end of the afternoon of the 9th, jeeps and trucks with soldiers had spread through the town; the soldiers shot at passing cars, they looted houses and maltreated Europeans.

At about 7 p.m., a European civilian who was standing on his doorstep, was killed by two shots, fired by four soldiers in a jeep. Two families, comprising several children each, were molested and beaten. Mrs. Z was raped under threats by two policemen, in her house. Then the two families were taken to the military camp. The cars stopped in front of the prison and a crowd gathered, the soldiers declared that the prisoners had shot at them. The crowd got

excited, the two mothers were undressed, molested and beaten. They were imprisoned; the husbands were beaten, one of them still shows traces of the beatings. Mrs. Y was taken out of her house and raped on the road, in the presence of her three children and her husband who had been beaten before. Other women, among them an old lady, were undressed, molested, and humiliated in public.

In the afternoon of July 10th, the Belgium paratroopers arrived in Luluabourg. The whites were evacuated partly that same day, partly the next day.

III. EQUATOR PROVINCE

Boende

Boende was the end of the road for several government officials and settlers of the region. The sector seemed quiet until the 10th of July. On the 11th, as a result of the bad news from Ikela, the settlers and the officials tried to evacuate the women and the children. The settlers planned to come back, the officials wanted to remain at their posts. Their families left from Djolu, Befale, Bokutola, Befori and Lingomo, but the Congolese had already put up roadblocks at the instigation of the Force Publique (army) in order to prevent the whites from leaving. All those who were stopped on the roads, even if they tried to avoid Djolu by going to Bangui (former French Congo) by way of Libenge or Lisala, were sent to Djolu by the soldiers of the Force Publique.

As soon as they were arrested, they were searched and robber of their money and valuables. The men were allowed to keep their trousers, their shoes and shorts were taken away. They were bound tightly. Women and children were separated from the men. The number of prisoners at Djolu increased steadily. All of them were severely beaten by rifle butts, they were slapped and kicked, they were spat upon and injured by the soldiers, policemen, and also by civilian Congolese incited by the soldiers. Finally, the soldiers had to protect the prisoners against the native population who wanted to torture the white men and abuse the white women. The Congolese had herded together 40 white men, as many women and at least 8 children.

The imprisoned women were publicly raped, several of them with a child in their arms, surrounded by soldiers, policemen, and Negro civilians who all had penetrated into the cells.

Eight children were present, in tears, during these repeated rapes which went on the whole night of the 11th to the 12th of July, accompanied by armed menace; often the menaces were directed at the children in order to intimidate the mothers.

The wife of an official who resisted was knocked down by the Congolese.

At daybreak, the missionaries of Djolu who had also been arrested, arrived. There were three sisters, their clothes in shreds, their capes torn away, who had been maltreated. A special inquiry on this case is underway.

Some people arrived who had been wounded by firearms: a lieutenant and an official. A doctor was prevented from taking care of the lieutenant; later he received permission to do so, he put on a bandage but this was immediately torn off by a Congolese soldier who wounded the eyebrow of the injured man.

From the 12th of July, between 6 and 7 a.m., the transportation was done in the following manner: a dozen men, tightly bound so that when one of them fell, all the other followed. They were beaten. The same day, everybody was put on trucks. A lady suffered from a heart condition: a doctor finally was authorized to help her. When he arrived, he was driven away. They left for Mompono and arrived about 3 p.m. On the road, the native population insulted the prisoners, spat on them, threw sand, and sticks. Finally the Congolese soldiers who often stopped the convoy, were forced to protect the prisoners.

At Monpono the men were again locked up. At the prison there was a colonist wounded by three bullets in the thighs and one in the arm.

About 6 p.m., the prisoners were untied by a Congolese commander, taken to Boende on the 13th and to Léopoldville on the 14th.

A FEW TESTIMONIES

Trouble started again on July 11, in the region of Djolu. In a mission post of that region, Father X received a number of refugees, among them a man seriously wounded by a shot from a Congolese soldier. On July 12, Father X was arrested by two soldiers; he was beaten on his back and knees. He was forced to lie flat and later on to run. The refugees and the nuns were forced out of the Mission. The same day, July 12, the nuns, according to the testimony of one of them, were put in jail with two ladies and a baby. Negro soldiers attacked one nun and after a fierce struggle, raped her. Later, they attacked the second nun. Two men trampled her underfoot. The nun lost consciousness and another nun said the sister had died. The soldiers were frightened and fled while the other soldiers reproached the attackers for having killed, which was not allowed. At 5:30 a.m., the white prisoners, men and women, were taken to another prison. All of them were in the nude, the nuns and missionaries included, their hands bound in the back. They were locked up in a hut where already 20 women and children had arrived. The soldiers asked why the nuns were not members of the party of Lumumba and if they had sexual intercourse with the missionaries. They promised each sister a soldier for the night. Trucks brought the captives to Monpono under the limits of the black population.

On the 12th of July, Mrs. A, 4 months pregnant, was standing with her two young children, in a group of men and women: a number of drunken soldiers arrived. They bound the men, hand and foot, and beat them. There were five women and seven children. The women were taken to a dark room. All of them were raped several times. Mrs. A was raped 10 times. Three children, aged 7 to 9, were present at these scenes. Later, Mrs. A met nuns whose clothes had been torn and who told her that they had been raped at the Mission.

When Mrs. A was taken from Djola to Mompoka, the group of whites was attacked by an excited crowd. Several Europeans were wounded by the natives, armed with spears.

Mr. X of the Djola district declares—his statement being confirmed by his wife—that his wife was arrested by drunken soldiers on July 11, locked in a jail, together with four other ladies, while three sisters were imprisoned elsewhere.

The five ladies were raped, each of them at least 20 times, in the presence of seven children. Mrs. X having resisted, was horribly beaten with a rifle butt and with fists all over her body. One of her companions offered herself to avoid her daughter, age 8, being raped.

The soldiers came in relays. Black policemen joined the rapers.

Meanwhile Mr. X, together with 20 other men and 2 missioners were imprisoned. The men were bound, lying on the ground. All of them were hit 50 times with rifle butts. Mr. X witnessed the following scene; a Belgian officer was wounded. A doctor wanted to operate. In the midst of the operation, he was hit by a rifle butt. The officer howled in pain: the sergeant who had thrown the doctor to the ground hit the officer in the face with his rifle.

While the whites were taken by truck from Djola to Monpono, Mrs. X had a heart attack. A doctor tried to take care of her, a black sergeant threw her from the truck. She remained unconscious for a long time.

On the evening of the 12th, Mr. X was allowed to visit his wife. She had lost her memory. Her memory returned partially when she returned to Belgium.

An officer at Djolu, was attacked by soldiers of the Force Publique. He came to the assistance of the white people and was shot at by an automatic gun. He was wounded in the thigh. He was kicked and wounded in the face by rifle butts. Notwithstanding his wounds, he had to walk for a while to the Dongo prison where he was bound and locked up. The black soldiers prevented the doctor from taking care of him. The women in the group (eight of them, five among them nuns) were raped by the soldiers. The men were brutalized.

Mr. X states also that several whites he had seen had been tatooed by the Negroes: they had cut the white men with a knife, making a vertical mark between the eyes.

In the night of July 11, the Djolu post was evacuated by convoy. The convoy was stopped for a moment and the men were separated from the women. The women were brutalized and raped all night by the soldiers and the police. One woman who resisted was knocked down in the presence of her eight children. At dawn, three nuns joined the group. Two had been raped. Mrs. Y declared that she had been raped at least 20 times. During that time, the men, bound hand and foot, were beaten.

Mr. Z, head of a plantation, states that on July 11, he was taken to the prison of Bokokolo. Women and children were separated from the men. The men were bound, hand and foot, and then roped together: they were maltreated all night long. They heard the cries of the women and children, and of a lieutenant of Djolu who was seriously wounded. The black soldiers prevented a doctor from taking care of him; they beat the patient and the doctor with rifle butts.

On July 12, the nuns of the mission arrived in a pitiful state. They had been raped. A missionary who was with them, had seen the soldiers enter a place where women were hiding and come out later boasting to the husbands that they had had intercourse with their wives. The same day, the prisoners were taken by convoy to Monpono: on the road, at all the villages, roadblocks were put up to permit the local population to beat and insult the prisoners.

On the evening of July 11, Mrs. G and her family left Djolu. Arrested by Negro soldiers, they were taken to the Djolu prison, men were separated from women. A hundred to a hundred and fifty Negroes (soldiers, policemen, and civilians) came to the prison. Mrs. G was standing up with her 2 months' baby in her arms. In that position, Mrs. G, held by Negroes, was raped by others, all the while menaced by rifles. During that night, Mrs. G was raped about 20 times. She was hurled on the floor, the Negroes threw themselves on her. They tore her underclothes, tore at her pubic hair. The other women were also raped in the presence of their children. During the night of July 11, several Negroes tried to rape a 7-year-old girl. Then Mrs. G was again raped. All that time, the prisoners were menaced by guns. Mrs. G's baby was so maltreated that the mother considers it a miracle that it is still alive. The Negroes threatened to cook mother and child and eat them.

During that same night, Mrs. G was authorized to look for food and care for the baby and for her husband who was locked up with other men in a special room. She saw there a number of men, bound hand and foot, roped together, their faces bloody, half naked. Several had broken teeth. In order to feed them, she had to put a bottle to their lips and she had to give them soaked bread. A lieutenant, wounded in the leg by

gunfire, was lying in a pool of blood, his eyes and teeth bloody.

Mrs. G came back then, under armed guard, to the place where the women were kept: the rapes went on; at dawn she was taken to another room where she was raped again.

A number of nuns joined the prisoners. Three among them said that they had been raped. On the 12th of July, at about 8 a.m., the prisoners were led to the camp of Monpono. On the road, they were attacked by natives who shot arrows at them, throwing spears and sticks. Three soldiers again raped her on the road.

Mr. X states that on July 11, a convoy of cars was organized in Djolu, in order to evacuate the women and children. The first car was able to escape. The second one was destroyed by gunfire and the driver was hit. The third one was halted. The soldiers stole everything that the occupants had in their possession. The men were hit with rifle butts, bound together, hands behind their backs. At regular intervals, the soldiers loaded their guns, menaced the prisoners and hit them. Civilian Negroes did the same.

White women were locked up opposite the place where the occupants of the car were held. About 10 p.m., the men heard screams and shouts. Next morning, the white women declared that all night long they had been raped an undetermined number of times by soldiers and civilians. According to the testimony of every white woman, all of them were raped at least 20 times, in the presence of their children.

This preliminary report does not include all of the types of atrocities committed by the Congolese. In some cases men were castrated and women's breasts were cut off. These victims were forced to eat their own flesh.

Mr. O'NEILL. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

Mr. MORGAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 13021) to provide for assistance in the development of Latin America and in the reconstruction of Chile, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 13021, with Mr. THORNBERRY in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. MORGAN. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, I speak today in support of the bill H.R. 13021. This bill contains four major provisions, it contains a rather detailed expression of the sense of Congress in regard to the U.S. policy toward Latin America, and includes several recommendations for the implementation of that policy. Most Members of Congress will agree with the statement which is contained in section 1 of the bill.

Second. It authorizes an appropriation of $500 million for a new social development program in Latin America.

Let me emphasize here that no appropriation of funds under this authorization has been made or will be made during the present Congress. Any requests submitted to the next Congress would be based on a carefully worked out program and would only be for such amounts as may be fully justified.

Third. Mr. Chairman, the bill authorizes an appropriation of $100 million for rehabilitation and assistance to the Republic of Chile. This money was made necessary by reason of the great damage by earthquake and flood, which is still fresh in the minds of all of us.

Fourth. The bill also authorizes for the fiscal year a suspension of the application of section 551 of the Mutual Security Act as far as it applies to sections 411(b) and 411(c) of the act. This bill will give greater flexibility in meeting increased administrative costs which were not anticipated when the budget was prepared 12 months ago.

The bill as reported by the committee also includes an authorization for an increase in the contingency fund by an amount of $100 million. Mr. Chairman, it is the understanding, as I announced to the Committee on Rules yesterday, that as soon as the bill is open for amendment, the Committee on Foreign Affairs will propose an amendment striking section 4(a) which provides for the increase in the authorization for the contingency fund.

There has been some opposition to this authorization of $500 million in this bill on the ground that a detailed program for the use of the money has not been presented to the Congress. The argument has been made that if an appropriation is not yet needed, there is no point in voting an authorization, and the question "Why the hurry?" has been asked, and I am sure it will be asked here repeatedly this afternoon.

Let me say emphatically that action on this authorization is urgently needed and is vitally important to our foreign policy in Latin America. Let me say further that it makes a great deal of good sense for this Congress to vote this authorization before a detailed program of expenditures of the money has been worked out.

Let me just pause a moment to tell this House that before the executive branch did anything on this bill—and this is brought out in a colloquy between Mr. O'HARA and the Under Secretary of State, which appears in the hearings contained on pages 24 and 25—that Mr. Dillon also said this, that this bill, before it was presented in the other body, was taken to both the Democratic nominee for President and the Democratic nominee for Vice President, and they both approved it and supported the bill in the other body. It was also taken by the Executive to the Republican nominee for President and received full support. Mr. Dillon, when questioned as to the immediate need for this authorization, also spelled out the great emergency that exists. Let me say that he is already on his way to Bogotá for the meeting down there next Monday.

The bill carries language spelling out that the authorization is subject to such further legislative provisions as may be enacted. Both the authorizing committees and the Appropriation Committees will have a look at the program next year, and, as I just said, every project must be justified. I think that the emergency existing at Bogotá next Monday demands immediate action to give the Latin Americans definite assurance that it is the congressional intent that we are ready to do something to support their new social program. This is an emergency, and I think we certainly should give the Under Secretary of State the definite power to negotiate next week with people that I think we are going to depend on for friendship and support for a good many years.

I think every one of us here today will agree that the question as to whether or not the nations of Latin America go Communist will be determined by the Latin Americans themselves. It is basically an internal matter. The United States is in a position to give assistance, and the timing and effectiveness of our assistance may tip the scales in the right direction.

The fact remains, however, that the United States cannot shield the Latin American countries from communism or cannot drive out communism once it has gained a foothold. The responsibility rests with the government and people of the individual countries, and their action will determine the result.

Recent events have convinced the President and the Secretary of State that the Governments of Latin America are ready to make a new start in dealing with the problems of improving the living conditions and that they realize that fundamental and far-reaching reforms have to be undertaken.

The record of the Castro regime in Cuba has contributed substantially to this new attitude on the part of the governments of this hemisphere. Let me emphasize the fact that the Governments of Latin America are even more disturbed by what has happened in Cuba than we are in the United States. They recognize that the Castro line has great appeal to the malcontents and radical elements in their own countries, and that they face a danger of revolution and chaos.

The key event in this new movement on the part of the countries of Latin America to get underway a program of basic reform which will bring about a direct and tangible improvement in the lives of their people is a meeting which will begin on September 5—next Monday—in Bogotá, Colombia. This meeting, convoked by the Council of the Organization of American States, is the Third Meeting of the Special Committee to Study the Formulation of New Measures for Economic Cooperation. It is of vital importance that the U.S. representatives at this meeting be able to offer concrete evidence of support for the new programs which the Latin American nations propose to undertake.

These programs of social development have not yet been worked out. Before the United States appropriates funds to assist in these programs, our representatives have told the Latin American governments that it will be necessary to have specific programs worked out and justified in detail, and, even more important, that these programs will have

to be accompanied by basic legislative and institutional reforms in such matters as tax structure, land tenure, and legal procedure in order that new facilities provided under these programs may produce the benefits which are intended.

The Latin American governments understand that they have to undertake fundamental and painful readjustment. Many of them hesitate to undertake such readjustments unless there is assurance that money will be available to carry forward the social development programs which are necessary. It is, therefore, of vital importance that the Congress by approving this authorization give encouragement to the governments of Latin America to go ahead with the reforms and adjustments which are essential if the well-being of their people is to be significantly improved.

This is no time for us to take a "wait and see" attitude, or to tell our neighbors to the south to come back again next January. If we approve this authorization today, we can have hope that the Bogotá Conference will be successful and that a new era may be beginning in Latin America. If we fail to approve this authorization today, it is my judgment and that of those who are responsible for our foreign policy that the Bogotá Conference will not be a success, that the effect on the people of Latin America will be most discouraging, and that the Communists and the Castroites will find more receptive listeners to their propaganda.

I will not take the committee's time in discussing the authorization of $100 million for Chile. It is estimated that the total cost of reconstruction will be $450 million. The United States has already made some contributions through the Export-Import Bank, and it is my understanding that other nations will participate. There can be no doubt that Chile desperately needs this $100 million, and it is entirely consistent with our policy toward nations which have suffered catastrophes of this nature to make help available.

With respect to the increase in availability of administrative funds, let me elaborate on the issue involved. Section 551 of the Mutual Security Act reads as follows:

SEC. 551. Limitation on the use of the President's Special Authority.—The authority contained in section 403, 451, and 501 of this Act shall not be used to augment appropriations made pursuant to sections 103(b), 408, 411(b), and 411(c) or used otherwise to finance activities which normally would be financed from appropriations for administrative expenses.

This provision was put in at the initiative of the Senate Committee on Foreign Relations in 1959. Its purpose is to prevent the use of the contingency fund or other discretionary authority of the President to increase the authorization for administrative funds above that specifically approved by the Congress.

The administrative funds authorized and subsequently appropriated this year are based on budget estimates prepared a year ago. Events of recent months have changed the world situation significantly with the result that it will be necessary for the United States to establish personnel in a number of new locations which were not contemplated when the budget was made up last year. Further than that, it is true that the recent pay raise enacted by the Congress has imposed a severe burden on the administrative funds available.

For these reasons, the Executive strongly urges that for the current fiscal year the restriction contained in section 551 be suspended in order that action can be taken to deal with the urgent problems with which we are confronted. The provision contained in section 4(b) of the bill does not repeal section 551, and that limitation will continue in effect after the current fiscal year even though favorable action is taken by the Congress on the bill before us.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Pennsylvania.

Mr. FULTON. Mr. Chairman, I want to congratulate the gentleman on an excellent statement and join with him in recommending this proposal very strongly.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Iowa.

Mr. GROSS. I note that the bill was introduced by the gentleman presently in the well of the House by request. Is there any significance to that?

Mr. MORGAN. The message came up from the executive branch. The executive communication is set forth in full on page 40 of the printed hearings. It is not unusual for the chairman of any committee to introduce bills by request.

Mr. GROSS. Another question, if the gentleman will yield further. How did the committee arrive at the figure of $500 million?

Mr. MORGAN. That was the figure requested by the executive branch. The gentleman knows that the President sent a message to Congress, both branches of Congress, to be delivered when we returned. The $500 million figure was included in the President's message.

Mr. GROSS. So the gentleman received a letter or a communication from the President, or from someone in the executive branch of the Government, asking for $500 million and the Committee on Foreign Affairs dutifully put $500 million in the bill; is that about it?

Mr. MORGAN. That is correct, sir. I think we did our duty after hearing the presentation made by the Acting Secretary of State. I have already said that each and every project will have to be justified. This is a figure to be taken to Bogotá next Monday. I am certain everybody in this Congress, whether he is for or against foreign aid, recognizes that the Executive has initial responsibility for our foreign policy. The people who are running the Government now think that $500 million is the amount of money that will help to hold Latin America from going communistic. And the amount will have to be justified next year.

Mr. GROSS. Does not the gentleman think, since this is half a billion dollars, that we have some responsibility to the taxpayer?

Mr. MORGAN. I think we have a responsibility. I can assure the gentleman that next year, if the Democrats are in the majority and I head the Committee on Foreign Affairs, a detailed program for Latin America will have to be justified.

Mr. HALEY. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Florida.

Mr. HALEY. Mr. Chairman, the gentleman states that the emergency here is that our representatives are going to a conference and they must have this authorization; in other words, what the gentleman is saying to this Congress and what he is saying to the American people is that if our representative goes down there and he does not come there with half a billion dollars in his hand, he is not welcome. That is about it?

Mr. MORGAN. No, I am not saying that, sir. I do not agree with that statement, nothing like it. I am saying that our negotiator has to go down there with a definite expression of congressional intent. And as I said every dollar will have to be justified before it is appropriated.

Mr. HALEY. If the gentleman will yield further, is there any representative of any other government going down there with his checkbook in his hand, other than a representative of the American Government?

Mr. MORGAN. I think the gentleman will find that many of the countries of Latin America who are going to be at Bogotá next week discussing this program are prepared to make extreme financial sacrifices and undertake basic reforms in order to make this program effective.

Mr. HALEY. I might say this, that I hope they bring some money to put in with this amount of money.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Iowa.

Mr. GROSS. If these people are prosperous and are going to be able to offer these amounts themselves, if they are doing so well, why go down there with a blank check for $500 million? Why are we sending a delegation down there with a blank check up to $500 million, if these other countries are going to come in with some money?

Mr. GARY. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Virginia.

Mr. GARY. As I understand it, our representative, the Under Secretary of State, Mr. Dillon, is already on his way down there. He could not wait until he got this authorization. He is already on his way down there so he will be certain to be in a position to give enough of it away, without any question.

Mr. GROSS. Mr. Chairman, will the gentleman yield further?

Mr. MORGAN. I yield.

Mr. GROSS. Of course, I will say to the gentleman from Virginia, he may be pretty confident that the House of

Representatives at least, when it comes to giving away money all over the world, will fly a blank check down to him. It will be there.

Mr. GARY. He can spend it, too.

Mr. GROSS. He will be able to spend it, too, when he gets it.

Mr. ANDREWS. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Alabama.

Mr. ANDREWS. Can the distinguished chairman of the committee tell me whether or not this is the total amount planned to be expended in the South American countries, or is it a downpayment on an overall long-range program?

Mr. MORGAN. It is an overall long-range program. I can assure the gentleman that the $500 million will not be spent for several years. As I said previously, every dollar will have to be justified.

Mr. ANDREWS. I read recently that the head of one of the South American countries proposed to be helped by this money said that the plans for the development of his country would cost approximately $4 billion. Can the gentleman tell us how much the planned program for these South American countries will finally cost?

Mr. MORGAN. Of course the gentleman cannot know any such figure, because no such program has ever been worked out. This is a social development program, which includes better housing and improvement of education and basic sanitation. There are no big projects in this authorization. We might not use anywhere near the $500 million we are asking here. This is a statement of congressional intent, to show that this Congress really is ready to cooperate.

Mr. HALEY. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Florida.

Mr. HALEY. I would like the gentleman to explain to me the language appearing on page 4, beginning in line 12, providing that this is supposed to support the strengthening of free democratic trade unions to raise standards of living through improved management-labor relations.

What are we going to do down there, charter a lot of labor organizations? I should like to hear some explanation of this proposal.

Mr. MORGAN. Of course the gentleman knows that this is similar to language that is already in the Mutual Security Act, under which we operate all over the world. We are not going around organizing labor unions. We just encourage their establishment and development on a free and democratic basis because wherever you have free labor unions you do not have communism.

Mr. HALEY. What we are doing is that we are going to South American countries and meddle in their domestic affairs. We are going to send a bunch of termites who are spending our money all over the world down there to spend some more of our money.

Mr. MORGAN. If we do not help these people, and the gentleman lives closer to South America than I do, some day we will be sorry.

Mr. HALEY. If we stay out of Latin America and let them settle their affairs down there without interference by the Federal Government, I think everybody will be better off and you will not have to spend this money.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Iowa.

Mr. GROSS. Does the gentleman think the improvement of labor-management relations in South America would result in more imports into this country to displace more American workingmen?

Mr. MORGAN. No, I do not think so. On the other hand these labor unions ought to help reduce competition from cheap labor. I do not think it will hurt our foreign trade. There is nothing in this authorization to establish any factories in competition with American industry. This is a social development program, under which we are going to raise the standard of living of these people.

Mr. GROSS. How are you going to raise their standard of living without their marketing their products in this country? This is the best market for any foreign country.

Mr. MORGAN. If we did not have this trade with Latin America, where we already export almost $4 billion a year, we would be in bad shape. Our overall export situation would suffer. They are our best customers.

Mr. GROSS. Yes, and we are getting plenty from them, too.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Pennsylvania.

Mr. FULTON. This is a question of the foreign policy of the United States of America. Under the Constitution, the foreign policy is under the President. We are simply implementing in this Congress the foreign policy laid down by the President. I might add too that when we are implementing it, we are following out the program put in each of the platforms of each of the two parties and the people that are here objecting are the minority in each of the Republican and the Democratic Parties who want to go back rather than forward with the platforms that each of the parties have adopted just recently. Now when the parties have set up what they want to do and how they will run the country in the next 4 years, I think each of us should inspect his own conscience. While we may differ as to amount, I do not think we can cancel the whole policy of the United States that has been in operation these many years and now turn back on this minor bill, especially in regard to Latin America which certainly has been our good friend and some of our best customers so far.

Mr. MORGAN. Mr. Chairman, I yield to the gentleman from Pennsylvania [Mr. FLOOD].

Mr. FLOOD. Mr. Chairman, I am sure my distinguished colleague from my own State of Pennsylvania is aware of the current Panamanian situation. I hope he would have some opinion to express even though we do not have too many of the facts at this point.

Mr. MORGAN. I can assure the gentleman I am aware of the situation. I have examined the same press articles as the gentleman from Pennsylvania and I can assure the gentleman, I stand behind the resolution sponsored by the gentleman from Alabama.

Mr. FLOOD. I hope the chairman will inquire of the Secretary of State as to just what the intention is.

Mr. MORGAN. I intend to do so.

Mr. FLOOD. I thank the gentleman.

The CHAIRMAN The time of the gentleman has expired.

Mr. JUDD. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, let me first make a statement with reference to the earlier remarks of the gentleman from Pennsylvania [Mr. FLOOD]. I hope he has not left the floor, because after his statement on Panama earlier, we called up the Department of State and the following is a summary of the telephone conversation.

During the meeting in Costa Rica, Secretary Herter met both in public and in private sessions with each of the Latin American Foreign Ministers. The Foreign Minister of Panama raised the issue to which the gentleman from Pennsylvania [Mr. FLOOD] has referred. This also was raised in both open and private sessions of the Conference. Secretary Herter made no commitments. He admitted that this was a problem that had to be explored further, but no time was given or arranged as to when the problem could be resolved. There are many factors in our country that have to be considered and the Foreign Minister was advised as to that effect.

Mr. Chairman, the distinguished chairman of our committee [Mr. MORGAN] has explained the bill before us. May I add a few remarks about what seems to me to be the importance of it.

Mr. Chairman, the United States has an enormous stake in Latin America. No one needs to argue that point. First, from the standpoint of our security. We simply cannot be safe here no matter how much money we pour into our own defenses in this country if the Latin American countries are enticed away or scared away, or if they lose confidence in the stability and dependability of the understanding and support of the strongest country in the Western Hemisphere. Some people talk easily about the United States going it alone. They do not want to bother with Europe or Africa or Asia—as if we could ignore happenings there. Mr. Chairman, even they, I think, would admit that it is necessary as a minimum to have this whole hemisphere stable and secure, if the United States itself is to have the kind of national security that will allow us to cut down our expenditures for national defense and to use more of those funds for civilian purposes here at home.

Mr. Chairman, look also at the economic considerations. Reference has been made to how much aid we have

given to them. Well, we also sell $3½ billion to $4 billion worth of goods each year to Latin America. We buy a lot from them in exchange. We import oil from Venezuela, coffee from Brazil and other countries, bananas from Central America, metals from Chile and Bolivia, and so on.

It is one of the best illustrations of mutual trade between complementing economies from which both sides profit, that I know of anywhere in the world.

U.S. capital in the amount of about $11 billion is invested in Latin America. So when you consider the economic stake, it is tremendous.

Now, why this bill at this time? The administration had been preparing for some time, so we were advised, an overall program of this sort for Latin America. It has recognized that there is taking place in the world what has been called a revolution of rising expectations. The United States is probably more responsible for this revolution than anybody else. I spoke about this here several years ago. We in the Western World developed our high standard of living primarily because of certain ideas or concepts of our forefathers. They wrote "We hold these truths to be self-evident; that all men are created * * *". That is, they and we believe that there is a Creator. Man is created in His image. Man was given the capacity to make moral judgments; to reason; to listen to a small voice called conscience and then decide what is right and what is wrong. As a child of God, he had a sense of importance which made him respect himself and his neighbor. He had faith that his Creator wanted him to have a better life and would help him to get it, if he worked in harmony with moral laws. So our forefathers worked hard, and they made headway. When they were oppressed in Europe, they came to this country. Their philosophy and faith and the system based on them were sound, and there followed wonderful results.

Then what did we do? We took the concepts and values that meant so much to us, and shared them with people all around the world, just as everyone wants to share with his friends anything that he has found is good. Some of us were personally involved in this sharing. We spent years abroad trying to share our medical skills and our spiritual beliefs and values. You might say we went to countries which were sleeping giants and woke them up. We knew that we were doing a lot of good to the persons who came into our clinics when for example, we removed cataracts so that a man who was blind could see. But I suspect many of us did not realize to what extent we were changing the whole world; that we were starting a revolution which was irreversible. To many people who for centuries had been resigned in fatalism to hunger and illiteracy and disease and squalor, we brought our ideas and concepts as to the rights and worth of man; and they are not resigned to a status of inferiority any longer. They have seen what free men in the West have been able to do and they are determined to do the same. They are not going to continue to live any longer as they have been.

They are determined to have not only better material rewards but also equality of status as human beings. They are not willing to be treated as "lesser breeds without the law," with others looking down upon them as backward peoples. They are not going to accept an inferior position any longer.

Mr. Chairman, that revolution can no more be stopped than you can put a baby that has been born back into its mother's womb. The problem is how to help and guide the revolution, so that it will benefit the peoples themselves and the world, instead of harm them.

I remember a former Secretary of Agriculture being before our committee a decade or so ago. He said "We must find some way to get stability in areas of instability." I said, "I think probably that is right, because it was we who created the instability."

The countries of Asia and elsewhere had been stable for centuries. We took to them ideas and concepts that showed them it is possible for them also to improve their lot. They are going to move ahead one way or the other.

This revolution is on the march in Latin America. If we do not help them in a way that is constructive and sound and mutually helpful, then they will get help from somewhere else that they believe will enable them to get ahead.

That means they will accept Communist help, even though it will turn out to be the opposite and such action by them will cost us many times as much in the end as this bill could possibly cost. This is the situation behind the bill before us.

Why did not the administration present such a bill earlier? The basic reason is that while we have given a good deal of aid in Latin America, some of it has not been too productive because some of those countries have not seen the necessity to make certain essential changes in their own laws, in their tax structure, in land tenure, and in legal procedures, without which changes significant improvement is not possible.

It was not useful or wise to expand aid programs in Latin America, or elsewhere, until the cooperating countries are willing to do certain things themselves. Without that kind of action on their part, our aid would be palliative, but not curative.

Mr. Chairman, I have often thought that probably the biggest mistake Mr. Stalin made in his whole career was to start the invasion of South Korea, because it woke up the sleeping Western World. We have had testimony before our committee by our highest military authorities that if Stalin had delayed the Communist attack on South Korea 2 more years, while our milltary strength continued to deteriorate, he could have conquered us and the world. But the revelation of their objectives and purposes, and the exposure of our own weaknesses in the West, woke us up and we moved to rebuild our own strength and that of many other allied countries.

I daresay, Mr. Chairman, that Mr. Khrushchev may find that the biggest blunder in his career was to pull off the Castro operation in Cuba, if it proves to have revealed to all of us in the Western Hemisphere our weaknesses and the things each of its countries must do, individually and collectively, if they are to avoid the fate of the people of Cuba, and the hemisphere come to disaster.

Some have called this the Castro bill. It can be thought of that way only in terms of what Castro's actions in Cuba have done to awaken the countries of this hemisphere to what is already happening and what can happen in the future. There is an increased realization that they cannot delay longer in making the changes necessary to make outside aid more effective than in the past. Many of the countries are now prepared to do the things that will better enable them to get started on the right road. They have been shocked into action by what has happened in one Latin American country.

Mr. Dillon testified: "It is the new realization in Latin America that really made us feel that the time was right and that we should join in this to help them." So there are two main reasons why this bill is before us today: First, it is to give important and needed help to people who are our close friends and neighbors. Second, representatives from all these countries are going to meet next week with our representatives in Bogotá, and we want our representatives to be able to show that we are prepared to help them do the things that will enable them better to meet their problems.

The whole of Latin America is in need of increased attention if they and we together are to cure the grave difficulties and prevent the spread of unrest and disquiet there and eventually in our own country.

The chairman of our committee has made clear that we cannot say now just exactly what this program will be. No money will be made available for any projects until they have been carefully worked out and justified before our committees next year. No money is requested at this time. What we are doing is enabling our negotiators when they meet in Bogotá next week to demonstrate that the Congress of the United States recognizes the long overdue necessity for joint action to improve the conditions about which we are so concerned and that to the extent agreements can be worked out that are sound, Congress is willing to give such aid next year, project by project, as will produce economic and social development in the hemisphere, and the resulting greater security to all.

What is the alternative to such action? It is certain disintegration. So I think this proposal is sound, prudent, and necessary, and I am confident the Congress will overwhelmingly adopt it.

Mr. CHIPERFIELD. Mr. Chairman, will the gentleman yield?

Mr. JUDD. I yield to the gentleman from Illinois.

Mr. CHIPERFIELD. Mr. Chairman, I favor the passage of H.R. 13021, a bill

to provide for assistance in the development of Latin America and in reconstruction of Chile, and for other purposes.

Three years ago I went to South and Central America to determine if we were not giving too much military assistance in that area and if we were not giving too little aid in the economic field.

I came back with the definite opinion we should limit our military assistance because we found in some cases it was not used for internal security but sometimes used to maintain dictators in office.

I found there was a crying need for more economic aid in the very fields which this bill provides $500 million for; namely, improvement in the conditions of rural living and land use; second, improvement of housing and community facilities; third, improvement of educational systems and training facilities; and fourth, improvement in basic sanitation facilities.

Then this bill provides for $100 million for the reconstruction and rehabilitation of Chile. Certainly to help Chile after her great disasters from earthquakes and floods is but a humanitarian act and such assistance is absolutely necessary to help Chile maintain financial stability.

The bill also provides for increase of the contingency fund by $100 million.

The President has made this request to meet sudden developments such as has happened in the Congo and where other critical situations may develop. I believe this should be done.

This policy of economic aid for Latin America is long overdue and I certainly am glad it is being brought up at this time.

I strongly favor the passage of this bill.

Mr. MORGAN. Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. BURLESON].

Mr. BURLESON. Mr. Chairman, I take no pleasure in opposing the distinguished chairman and my colleagues on the Foreign Affairs Committee. I compliment the chairman as being a devoted man and an able leader, but I say this is the worst piece of legislation I have seen come to this floor in the years which I have been a Member of this body.

My good friend from Minnesota [Dr. JUDD] has just said, and so has the chairman of the Committee on Foreign Affairs, that they are unable to tell you what this money is for. Of course, they cannot tell you. No one knows. It is a rabbit-out-of-the-hat proposition.

I wholly agree with what the gentleman from Ohio [Mr. BOW] and our majority leader, the gentleman from Massachusetts [Mr. MCCORMICK] has said about temperance in this debate; that we should not say those things which would give ammunition to those who oppose us; to those elements who would hang on to every opportunity to make propaganda unfavorable to our country. I shall try not to do that.

I think this is "do something." That is what it is, "do something," but to do something we commit this Nation to $500 million, for something we do not know about.

There are two schools of thought. Some say, "Oh, this is a gesture." I would hate to think this is only a gesture. That would be dishonest to our friends and neighbors in Latin America. The fact is it is a long-term commitment in sums which are undefined, but it has been estimated to run into billions of dollars. For what? Well, there are some platitudes expressed. We are going to raise the standard of living, we are going to do many of those things which some of us oppose doing in this Nation, that is, furthering and encouraging socialism in Latin America.

But what a travesty this was down in San José; tragic that our people should agree to pass a major sentence upon a nation which has given us no difficulty, and a slap on the wrist to a regime which is obviously an agent of international communism. I shall say no more about that. I would like to say a great deal more but it is not good to furnish propaganda to those who really do not need any more furnished. They can dream it up themselves. It is not a compliment, either, to this Congress or to our friends to the south that we should come here with this type of legislation in order that our people down in Bogotá next week may tell the Latin American leaders that we are going to work out a program; that we are committing ourselves over the years to untold billions for some nebulous and vague type of cooperation. In other words, "to do something, just something, because we find ourselves in an untenable position, because we have let the attitudes between ourselves and our neighbors deteriorate. So we rush in with dollars. It is dollar diplomacy. That is what they have been talking about in Latin America, lo, for a half century and we will prove it by adopting this bill. We should know by this time, Mr. Chairman, that it takes more than dollars to make friends around this world. A rush to shower more money on Latin America is not going to put a mad dog of the Caribbean in the pound.

The great colossus to the north. Dollar diplomacy. And yet we are proving exactly what they say by holding this thing out in front. So, if we want "to do something," then we should strike out this second section. We should strike it out and leave the policy statement in the first part of this bill.

Mr. Chairman, I am for aid to Chile. That nation has suffered terribly by reason of the recent earthquake. They need help, but I shall offer an amendment to strike out section 2 of this measure which authorizes the appropriation of $500 million. With the first section, our people in Bogotá, meeting next week, will have the authority and the prestige to develop something to present to the next Congress meeting in January 1961.

I am not willing to write a blank check on the taxpayers of this country, beginning with one-half billion dollars as a first payment, without knowing what it is for. I am not willing at any time to commit this Nation to a policy of socializing other nations.

In addition, Mr. Chairman, now is the time to determine who are our friends and who are not. It is time also to exercise loyalty to those who are stable and to exhibit sternness toward those who are spreading the disease of communism in the Western Hemisphere.

Mr. JUDD. Mr. Chairman, I yield 10 minutes to the gentleman from Indiana [Mr. ADAIR].

Mr. ADAIR. Mr. Chairman, I think everyone in this Chamber and almost every person in our country wants to do what is necessary to help our friends to the south. We want to preserve our friendship and our neighborliness with Latin America. We are willing to do what is necessary in that respect. We are willing to spend what is necessary. But, we want to know what we are spending and for what it is being spent.

Now, what, monetarily, is in the bill before us here today? Three items: $500 million for Latin America generally; $100 million for Chile; and $100 million additional to the contingency fund, which is generally thought to be for Africa; in fact, it has been said it is for Africa. As to the latter, the chairman of the Foreign Affairs Committee has said he will move to strike that from the bill, because it was enacted into law a few days ago in connection with other legislation. That leaves us, therefore, with a bill authorizing $600 million.

Now let us look briefly at what has been happening. One day last week—Friday, I think it was—we passed legislation providing $100 million for the contingency fund, but we were in so much of a hurry to pass that legislation that we passed it without prior authorization. Secondly, today we have added to a bill previously passed by this House money which will also be used in our foreign aid or mutual security program. This was done hastily, and, in my opinion, not as a fully considered step. Now again we have before the House a bill requesting $700 million, pared down to $600 million, which is in addition to the other two steps to which I have made previous reference. In great haste, in the closing days of the Congress, we are here asked for these great sums of money. And, I think the Members of this body ought to know, in the light of our desire for speedy adjournment, that if we enact this legislation before us now, that that does not end the matter. This bill has to go back to the Senate again, because there are changes in wording which will require action by the other body.

As I have said, in this bill we are asked to authorize an appropriation of $600 million. As to the $500 million for Latin America, there is no program proposed. We do not know how the money will be spent. We do not know what it will be spent for. I should like to call the attention of this body to the fact that I hold in my hand here the hearings upon this bill for $600 million.

These are the hearings, in this little pamphlet. There was one man who testified before the Committee on Foreign Affairs, the Under Secretary of State, Mr. Dillon. There is also a statement in here from the Department of the Treasury. There is a statement in

opposition by the Citizens Foreign Aid Committee. That is the extent of the hearings which are printed for the Committee on Foreign Affairs and upon which the decision to report this bill out was made; the statement by Mr. Dillon, the cross-examination by members of the committee, the statement by the Treasury and the statement by the Citizens Foreign Aid Committee.

I say to you, Mr. Chairman, that a measure of this importance ought not to be presented to this House with no more study, no more investigation than is contained in these hearings.

It was said earlier that we must take this action because there is an emergency; we must show our support of those who will represent our country at Bogotá. Mr. Chairman, we have shown our support of what may be necessary for our representative at this coming conference at Bogotá to have. That was shown by the action of the other House in passing the two bills which were combined to make the one before us today. It was shown by the action of the House Committee on Foreign Affairs in reporting this bill out. I think we have shown a great willingness to do, I repeat, all that is necessary to support our friends and neighbors in Latin America, our friends and neighbors to the south of us. But to come before the Congress in this fashion, in the closing hours of the session, with a program which has been no more carefully worked out than this, it seems to me is a very unusual step and one which ought to be considered with the greatest of care.

A question was asked here a little while ago as to whether or not this $500 or $600 million would be the total cost of the program to be inaugurated here. I know of no one who has made himself familiar with the information that we have on these proposals who believes that this is other than a downpayment on a very long-term and expensive program.

Mr. MORGAN. Mr. Chairman, will the gentleman yield?

Mr. ADAIR. I yield to the gentleman.

Mr. MORGAN. I want to inform the gentleman—I am sure he has this information—that in the President's message he definitely urgently requests speed in this authorization. I have a letter in my hand from the Secretary of State, since his return, in which he again urgently asks immediate adoption of this authorization. The reason the committee moved with such speed is because of the demands of the short session and the urgency suggested to the committee by the executive branch of the Government.

Mr. ADAIR. I understand the position of the chairman, and he has been eminently fair in this matter. My position with respect to that, however, is that even though there is this great demand for action we ought to take time to explore the matter in more detail. If it means taking more time of the Congress I think that ought to be done rather than to try to embark upon a program of this sort, with these hearings which I consider were inadequate.

Mr. MORGAN. The gentleman knows that the time of the Congress is not what is involved here. It is a question of the meeting at Bogotá next Tuesday. That is the only meeting that will be held this year. The gentleman knows also that the President made this request back in July. The President could not make his request earlier because the Organization of American States had not had their final meeting until sometime near the end of June. It is just the way this matter has developed. Nobody is really responsible except that when Congress returned for this special session, the President, members of the executive branch, Members of Congress, and members of the committee felt that we had no excuse for going to Bogotá without some expression of congressional intent.

Mr. ADAIR. I would say to the gentleman that if it is for use at Bogotá, first of all, as I pointed out a little while ago, we have shown the disposition of Congress to give the representatives of this country what support they need.

Second, even though the conference will meet on the 5th, which I believe is the date, we could have taken a few more days, we could have heard a few more witnesses, we could have explored the matter a little more fully.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. ADAIR. I yield to the gentleman from Iowa.

Mr. GROSS. The President has sent a good many messages to Congress. Is it not true that he sent, probably in the same message about which the gentleman from Pennsylvania is talking, a 21-point program? Is the gentleman from Pennsylvania equally as interested in the other 21 points of the program and does he acquiesce in everything the White House sends down here?

Mr. HALEY. Mr. Chairman, will the gentleman yield?

Mr. ADAIR. I yield to the gentleman from Florida.

Mr. HALEY. I want to commend the gentleman for the statement he has made here today, and I concur in the greatest part of it. The gentleman asked why there is a sudden urgency here for this particular program. I want to give the gentleman the benefit of what I think is the urgency. The American people are beginning to find out a little more about this giveaway program. They are beginning to find out a little bit about its costs. So this Congress now has been confronted with first, the regular appropriation, and second, an emergency and supplementary program. The only emergency about this program is that they want to get the Congress of the United States committed to a program about which nobody can tell you the cost, and nobody can tell you what the money is going to be used for. In other words, the gentleman has correctly stated that this is just a downpayment on something that we do not know where it is going to go, what for, who is going to spend it, or anything else. The American people when they once catch up with this program are going to demand that it cease, because if you put this program to a vote of the American people I predict it would be defeated better than 9 to 1.

Mrs. CHURCH. Mr. Chairman, will the gentleman yield?

Mr. ADAIR. I yield to the gentlewoman from Illinois.

Mrs. CHURCH. May I offer this testimony to the gentleman from Indiana, who with some others including myself has long urged greater attention to Latin America. There is no Member of the House who approaches the problem of foreign affairs with greater interest and greater regard for the welfare of this Nation. For many years where the mutual security legislation has been under consideration, the minority on the Foreign Affairs Committee, of which the gentleman speaking is a very honored member, has published a report, in which we have insisted that more attention be paid to Latin America and its problems. We have thought that that assistance has been too long delayed. Will the gentleman in fairness to himself not repeat the statement which he made at the beginning of his remarks, that where these programs are brought up in detail for consideration, there is no one who will give more attention to the needs and the programs of Latin America than the gentleman from Indiana?

Mr. ADAIR. I thank the gentlewoman from Illinois.

If there were before us today nothing but the question of assistance for Chile, I do not think there would be anybody against it. I think anyone would be willing to give what is needed. That is my position. We want to do what is needed, but this is not the way to do it. It is our hope and intent to do all that is necessary to preserve the integrity of our hemisphere, the friendship of its peoples and prevent the spread of communism.

Mr. MORGAN. Mr. Chairman, I yield such time as he may desire to the gentleman from Florida [Mr. HALEY].

Mr. HALEY. Mr. Chairman, I am opposed to this program. I think it is a bad program. Nobody has explained to me the necessity for this hasty action.

Mr. Chairman, the day the House of Representatives reconvened was the 25th anniversary of the death of the beloved Will Rogers—the part Indian Oklahoma cowboy who started out as a comedian and wound up recognized as one of the great political philosophers of our time.

A bronze, remarkably lifelike statue of Will Rogers stands in the corridor just outside this Chamber. And if that statue could see, could hear, what we are being called on to do here today, I am sure that he would repeat—and repeat with sadness and emphasis—something he said three decades ago.

Will Rogers said—unfortunately with more truth than humor—that "our foreign policy is an open book—a checkbook."

We are meeting here today to prove—I fear—that what Will Rogers said 30 years ago is still the truth—to prove that our administrations, our Government, learns slowly, if it learns at all. We have a problem in our relations with some of our Latin American neighbors.

And what is the answer of President Eisenhower, and of the administration's

foreign policy advisers, of the President's State Department, his international cooperation administration, to this problem? It is, as we can all plainly see, what Will Rogers called an open book—an open checkbook.

In my years in Congress, Mr. Chairman, I have been puzzled by these foreign aid programs of ours. What started out to be doubt as to their usefulness soon turned into certainty that if they had any usefulness, it was not usefulness to the United States. And lately, that certainty has turned, in my mind and in my heart, to disturbance and outrage that we in Congress are asked year after year to continue these programs—and that year after year, we knuckle under to those demands of the administration.

But, in all candor, I must say that my sense of outrage over past administration requests in the foreign-aid field pale into near insignificance in comparison with my feelings about this proposition which is before us today. This proposal that we start an entirely new foreign-aid program—that we authorize the spending of a cold half a billion dollars of the taxpayers' money to start it—can be characterized, in my mind, in only one way: It is an indecent proposal.

It is so outrageous that the administration should have blushed with shame when it advanced the idea. And it is a proposal so indefensible that I cannot understand how any Member of the Congress can vote to approve it and then go home and find any way in which he can defend that vote. I will not need, when I go home, to defend my vote. My vote will be against this—and my vote will represent, not just what JIM HALEY thinks, but what an overwhelming number of his constituents, regardless of party, think also.

Mr. Chairman, I know that I should not call a proposal by the President of the United States offensive unless I have grounds to base that charge. I do have those grounds.

This proposal is offensive because it was made recklessly and without thought—as the expedient but haphazard answer to a problem to which the administration, after slumbering for 7 years, suddenly awakened just a few short months ago. It is misleading because it was first laid before us as an emergency matter; but the administration now has confessed that this immediate outlay we have been asked to approve is nothing more than the downpayment on another long-range foreign-aid program. And it is outrageous because the administration, although insisting that it must have this money, has no plan for its use.

And it is—in essence—just another scheme designed to confuse the American people and to confuse the membership of the Congress. The foreign aid program, as we all know, started out as a relatively simple thing after World War II. But the schemers and the do-gooders quickly realized that the only way to keep it not only alive but growing was to conceal some of its aspects.

As a result, over the years, we have been asked to vote for more and more hidden appropriations, for more and more lump sums for distribution for programs about which the administration refuses to tell us anything, and for more and more devices which, while actually foreign aid, have labels which are meant to conceal—if not meant outright to deceive this body and the American people.

This proposition we are faced with today is but another of those devices. We are told that there is a great emergency in our relations with our Latin American neighbors. But we are not told what that emergency is. We are told that this money is an absolute necessity to meet that emergency. But we are not told—because the administration's own spokesman cannot tell us—how this money will be used.

Moreover, we are told that the reason that the so-called emergency exists is that we have not heretofore included the Latin American nations in our foreign aid programs to any material extent. That statement is demonstrably untrue. It takes a little tracking down in a complicated maze of records and subterfuges—but when tracked down, the records show, Mr. Chairman, that in 14 years of foreign aid we have extended a helping hand to the Latin American nations in the amount of $7,900 million.

We are asked today to approve this outlay of another half a billion dollars to launch a new program which in the long run will amount to untold billions more. But we are given no opportunity to make any study of the proposal, or of the supposed need. Even if we had the opportunity, we could make no intelligent study—nor could the distinguished members of our foreign affairs and appropriations committees—because the facts needed for intelligent study are not available.

They are not available, Mr. Chairman, because the administration has not made any such facts available. The administration has not made the facts available because it has no facts, not even any plans, to lay before us. President Eisenhower's spokesman, Under Secretary of State Douglas Dillon, said so himself. In an official appearance before the foreign aid committee, Secretary Dillon said, in effect, "we sure do need the money. But we do not know what we are going to do with it when we get it."

The cold truth, it appears to me, is that there is no need at this time for any such program as is proposed here. The cold truth is that this half a billion dollars will be of more use to our own country and our own taxpayers if it is used to begin a reduction of the national debt. And, Mr. Chairman, if it is an absolute must that we just throw away another half a billion dollars, I think the time has come when we throw it away in our own country, for the supposed benefit of our own taxpayers, rather than to throw it away in lavish programs for the benefit of the people of other lands.

I plead with all of you, on both sides of the aisle, to examine your consicences and examine your hearts—and then join me in an effort to defeat this bill.

Mr. MORGAN. Mr. Chairman, I yield such time as he may desire to the gentleman from Texas [Mr. WRIGHT].

Mr. WRIGHT. Mr. Chairman, I think this is one of the most important and most timely subjects we could discuss here today.

Almost lost amid the fanfare and fireworks of this election year has been the aching problem of Latin America. It is time that we had a discussion of this subject, of what we are doing, and what we are not doing, to settle the seething ferment in our own hemisphere.

The 20 Republics of Central and South America and of the Caribbean are closer to us—and more important to us—than any other area of the world. They buy more of our goods and sell us more of theirs than any other group of nations. Theirs is the world's fastest growing population. Their continued friendship, from a cold and selfish military standpoint, is indispensable to our safety.

Today Latin America is a churning cauldron of conflict, of keyed up emotions and long-smothered aspirations gasping for air. The problem it poses cannot be swept under the rug, nor solved by a gesture. We must not allow it to be obscured in our preoccupation with other matters.

The President, obviously shaken by the recent turn of events, has called upon Congress in an 11th hour move to pass this bill to authorize $600 million for Latin American grants. One hundred million is for reconstruction in earthquake-smitten Chile.

The specific uses to which the remainder would be put are not entirely clear. We are told only that this authorization will strengthen the hands of our negotiators at the Inter-American Conference in Bogotá next month, and that the funds will probably go for potable water systems, vocational and technical training, and land utilization and settlement programs.

Let us not belittle the request. These are worthy goals. Yet the yawning need is not simply for more money. The problems will not be solved merely by money. The need is for a new outlook, for a new understanding, for a new approach.

We need to ask ourselves some searching questions. Why, in a land just 90 miles off our coast which owes its very independence to our sponsorship, can a man hold power while playing cozy games with the Communists and making our Nation the whipping boy of his ridiculous rantings?

Why is there such an unmistakable wave of sympathy throughout Latin America for "Castroism" as it is called? Why did the attempted "Good Will Tour" of our Vice President turn into a series of riots? Why did Guatemala succumb completely to the Communist lure 6 years ago? And what must we do today to reverse the situation?

Part of the answer lies in the unmistakable appeal of Castro's land reform promises throughout a region of the world where 1.5 percent of the people own more than half of all of the tillable acreage. In Venezuela, 90 percent of the land is owned by 3 percent of the people.

In most Latin American countries, the preponderant majority are tenant farmers, impoverished, deeply in debt and

without hope. Mired in the futility of a 20th Century feudalism, they see no promise of a brighter mañana through the slow and orderly processes.

Part of the answer lies in their tragic history of heartbreaking disappointments with corruptible leaders—and with the fact that the United States has too often been identified in Latin minds with unpopular and undemocratic local regimes which often have dispensed our largesse as though it were their own patronage and sometimes used our military assistance for their own internal purposes in the manner of police states.

A part of the truth is that they have seen in us the symbol of self-assumed superiority. The fact that we for the most part have refused even to try their language and have required them instead to use ours for communications between us has rancored.

And a part of the answer lies, of course, in the aggressive nature of the Communist propaganda menace. When the Voice of America was forced through a shortage of funds in 1953 to abandon its wave length to Guatemala, this was snapped up immediately by the Soviets and a few months later that country fell to the Red Arbenz regime.

Communist China, concentrating on Latin America as one of its chief targets, last year induced more than 400 Latin American opinion makers to visit its country. Students, educators, labor leaders, writers, and even political leaders were given expense free trips. Going one step further, Peiping and Moscow weekly beam throughout Latin American countries 74 hours of Spanish language broadcasts and 28 hours in Portuguese, the language of Brazil in which we seldom offer any broadcasts.

Where do we start in recapturing our lost prestige and in recreating the friendship so carefully nurtured over the years through the good neighbor policy? Let us start by showing that we stand for something, not only against something. Let us exert an influence in every country for regular, free elections—for the guarantee of individual liberties—for nonviolent local self-determination.

We could demonstrate that land reform may be achieved without Communist confiscation through a sort of Latin-American FHA, where we could join 50–50 with friendly governments not in gifts but in loan guarantees for tenant farmers to buy small parcels of their own to be paid out over the long pull from their own crops. Nothing stabilizes a people like home and farm ownership.

A friend of mine who is on a teaching fellowship in Central America says, "Most students do not have the money needed for books." Why not set up mobile lending libraries with inexpensively bound copies of the good American books in Spanish?

And let us require all our Government employees—and encourage privately employed Americans throughout Latin America—to learn their language. Our diplomats should stop giving the impression of cultivating only the cream of local society—the limousine and fur set—and of being disinterested in the "great unwashed," the average people to whom the Soviets are making their fervid appeal.

Labor leaders in Latin America often are the first targets of Soviet propaganda. Let us beat the Communists to the punch by an exchange program, bringing labor leaders here for visits in the homes of local American union officers—radio commentators for visits with American newscasters—teachers with teachers and newsmen with newsmen.

Let us show, in deeds as well as words, that we want not only to be understood but to understand them. Above all else, let us keep the reservoir of good will that we have left by behaving honorably. Let us never truckle to the corrupt nor appear to offer bribes. Honest respect begets true friendship which is infinitely better than pretended affection. "There was a time," sadly recalled an old Latin American hand with our Bureau of Public Roads, "when palabra ingles (the English word) meant something everywhere in the hemisphere. Today it means nothing." Let us make it mean something again.

Mr. MORGAN. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois [Mr. O'HARA].

Mr. O'HARA of Illinois. Mr. Chairman, for better or worse, and I think it is all for the better, the doors to the tomorrow are open. Peoples all over the world are flocking to those doors, new governments, and back of those governments, people, people who in the past have not had enough food, not enough dignity, not enough opportunity, not an equitable share in the sunlight. They yearn to leave the narrow life behind. Now they are rushing for the open door to a promising tomorrow. I would not want to see my country try to hold them back. I would like my country to be in the position of helping them go through the door and reach a brighter and more wholesome tomorrow. We are in one of the great periods of the long history of the world, a period of dynamic change as mankind climbs to a higher plateau than any we have known. In that climb it is my prayer that our beloved country will lead.

What is proposed here? This is nothing complicated. Either we live with our neighbors in the climate of true hemispheric solidarity or we will not survive. We cannot continue to take for granted their friendship unless we have shown to them that in us they have, indeed, a friend. It is not enough that we should supply a buying market for their coffee, their bananas, their oil, and their other products. They would wish stabilization in this buying market in order that their economies would not be subject to uncertain fluctuations. Whether working together in cooperation something in this direction can be achieved, I do not know. I can only hope that progress in this direction can be made.

But there are ways, sound and constructive ways, of expanding the gainful activities of our neighbors and doing it in a way that the benefits will go deeply into the grassroots. Working together the American Republics can raise the living standards of people who no longer are content endlessly to grapple with poverty and who, in this period of unrest all over the world, are rushing toward the open doors of a promising tomorrow.

May I stop for a moment to say that I have warm regard for my colleague, the gentleman from Indiana, and I agree with my colleague, the gentlewoman from Illinois [Mrs. CHURCH], that ROSS ADAIR makes a fine contribution to our committee. He says that the measure we are now considering should have been presented to our committee in January and then it might have been received, possibly with favor, if I understood the gentleman's remarks.

But, Mr. Chairman, the problem was not here in January. There was a developing storm in the Caribbean, and my colleagues will note that I do not pronounce the word Ca-ribb-ean. No pirate ever sailed on the Ca-ribb-ean. These storms daily gained momentum. It is an easy way out to put the blame on someone in Cuba or somebody elsewhere. We may not approve of what someone in a foreign land is doing, and we may regret his attitude toward us and wish that it were more in the approach of mutual understanding, but the foreign policy of our country I feel strongly should be built upon noninterference in the domestic affairs of another nation, and criticism, either friendly or unfriendly, of foreign personalities could give the unintended appearance of interfering in the domestic affairs of another nation. So I have sought always to avoid in my discussions on international matters reference to personalities.

Wherever you find disorder and you find large gatherings of people, you will find some cause or causes of discontent. It well may be that their emotions have been worked up, and that there has been an organized effort to excite but, nevertheless, at the bottom is something that is bothering people and makes them responsive.

The unrest in Latin America has been spreading. This unrest the Communists will seek with ever-increasing drive to utilize for purposes of ultimate enslavement. The fact is, that in a democratic government the peoples of any land, the peoples down to the humblest, will be benefited and dignity and contentment given to their lives, exactly as it has been done in our own beloved country.

We have our struggles and our shortcomings and sometimes we are slow in reaching desired objectives, but always we make progress and always the concept and the practice of social justice expands. So will it be in all the countries to the south of us, and as the peoples of those lands are rushing to the open doors of a promising tomorrow we as a good neighbor, working cooperatively with them, must lead the way. With them we must work to find some way, some program for social advancement, a program that will reach into the lives of the little people and will give brightness to their days and dignity and hope.

It is a most strengthening development in our hemispheric relations that the nations of this hemisphere are meeting at Bogotá to work out such a program. Our neighbors attending this conference

want some evidence that our great country is interested. That is all, just a showing of our interest and our sincerity. I do not like to hear this called a blank check or that Secretary Dillon is going down to give away money as a giveaway, or as a bribe for friendship. All of that is poppycock. This bill does not carry one cent of real money. It is an authorization, an authorization for appropriations that later may be made for a program that first must be submitted to and approved by the Congress. It is merely an evidence of our good intent to cooperate with the other American States when a program has been developed that these American States believe will be constructive and sound and attain the desired objective.

I was concerned when Secretary Dillon appeared before our committee. An authorization does not necessarily mean that any money is going to be appropriated. In Illinois we have been interested for many years in the Cal-Sag project, and it was 20 years after the voting of the authorization before 1 cent was appropriated to begin work. I said:

Mr. Secretary, is not this an idle gesture? Can we honestly go down there and say that because we have authorized it that means we are going to back it up with an appropriation?

I further said:

Won't they regard this as merely an idle gesture and therefore something dishonest?

This is Mr. Dillon's answer to my question and his answer is important, and I trust will be carefully noted by my colleagues:

I see your problem but if there is, as we hope, substantial support for this program in the Congress, I think they will take that as an indication of what may come in the future. Certainly I think they will look at the fact that when this program was approved by the Senate, both of the nominees for executive office, for President and Vice President, of the Democratic Party voted in favor of this, and do favor this program, and they know that this program is also favored by the present administration, including the Republican candidate on the other side.

I think they can be assured of support by the Executive, maybe modified in accordance with the way the new Executive will look at this matter next year.

Certainly I have talked with Senator KENNEDY in his capacity as a member of the Foreign Relations Committee, and he favors this program and was very pleased that it was not spelled out in greater detail, because while he thought that this was a good idea and that it was necessary to give the Latin Americans an idea of our support he felt the new administration, whichever it might be, should have an opportunity to take another look at and spell out the details of how this would be handled.

Mr. Chairman, I yield back the balance of my time.

Mr. JUDD. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. FULTON].

Mr. FULTON. Mr. Chairman, the problem here is whether we strengthen the hand of our United States representatives who are now leaving to negotiate next week on Latin America at the Bogota Conference. We should recognize our good friends and neighbors of Latin America and actually give them equal treatment with the countries the United States has previously aided under the Marshall plan.

As many of you know, there has been much criticism because the United States had first moved to aid European countries. Many of us know that it was because they had to be aided immediately to repair war damage and dislocation from world. That is an industrial area that had to be restored under the threat of aggression, and the threat was immediate at that time.

In Latin America are some of the best customers and best friends we in the United States have in this entire world. We are a Western Hemisphere republic. and these countries are neighbors and also Western Hemisphere people. We have the same heritage, and all face many of the same problems.

I would like to point out to you that this bill for economic aid to Latin America is a bipartisan measure, that in each of the Republican and Democratic parties, the leaders have said that we favor a program of this type for Latin America.

The Republican platform of 1960 has this quotation on Latin America and other countries:

In Latin America, Asia, Africa and the Middle East, people of ancient and recent independence have shown their determination to improve their standards of living, and to enjoy an equality with the rest of mankind in the enjoyment of the fruits of civilization. This determination has become a primary fact of their political life. We declare ourselves to be in sympathy with their aspirations. * * * We will encourage the countries of Latin America, Africa, the Middle East and Asia, to initiate appropriate regional groupings to work out plans for economic and educational development. We anticipate that the United Nations Special Fund would be of assistance in developing such plans. The United States would offer its cooperation in planning, and the provision of technical personnel for this purpose. Agreeable to the developing nations, we would join with them in inviting countries with advanced economies to share with us a proportionate part of the capital and technical aid required. We would emphasize the increasing use of private capital and government loans, rather than outright grants, as a means of fostering independence and mutual respect. The President's recent initiation of a joint partnership program for Latin America opens the way to this approach.

I would like to say to the House this is a joint partnership program approach for Latin America, that not only President Eisenhower but our previous President, Harry Truman, of the other party, has recommended economic aid, and technical assistance for the Latin American countries. Likewise, it is a constructive extension of the good neighbor policy that was proposed and entered into under President Roosevelt. It was a bipartisan approach.

May I point out that not only the Republican nominee for President, Mr. NIXON, but also the Democratic nominee for President, Mr. KENNEDY, have approved this bill and recommend the program.

Previously in 1959 both Senator JOHNSON and Senator KENNEDY, the presidential and vice presidential candidates, voted on foreign aid and favored such aid programs, and this was before politics of a predetermined nature of 1960 came into question.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. JUDD. Mr. Chairman, I yield the gentleman 5 additional minutes.

Mr. FULTON. Mr. Chairman, we find that when the 1959 foreign aid program was before the Senate, both Senator JOHNSON and Senator KENNEDY voted against a cut in the Development Loan Fund authorization. In 1959 both Senator KENNEDY and Senator JOHNSON voted against an amendment to require the President to submit a detailed estimate, country by country, on future foreign aid requests.

It is particularly appropriate to consider that second point here because there has been some comment made by the opponents to this bill that there should be submitted detailed country by country estimates on this kind of a foreign aid request. As we know, on this kind of social and economic aid program, such kind of a prior country by country estimate is impossible, because at Bogotá we are going to consult as to how these various countries can help themselves, then how we in the United States can work in partnership with these Latin American countries for peace and progress. So we must wait until these programs are set up country by country by consultation and cooperation. These proposals must be worked upon by our people in the State Department, and under the mutual security program, as well as the various programs such as the Development Loan Cooperation Fund, the Export-Import Bank, the International Bank for Reconstruction and Development, and others.

Mr. NIXON on May 21, 1958, expressed his sincere interest in Latin America. This proves that the Latin American interest and approach is a bipartisan policy. I will put that statement of Vice President NIXON in the RECORD.

It is as follows:

We must prove that * * * when private enterprise comes into Latin America * * * we do so not for the purpose of keeping in power a group of the elite (nor) of making the rich richer and keeping the poor poorer * * * but that * * * our policies are designed * * * to raise the standards of living of the miserably poor people all over Latin America * * * through a program of private enterprise of the 20th century enlightened type * * * combined with government assistance in those areas where private enterprise cannot do the job.

Mr. Chairman, I would like to point out further that I attended the Rio Economic Conference as an observer in 1954. At that time I recommended that the United States adopt a policy which would result during the current administration in $1 billion in economic and development aid through loans of the type of the Marshall plan aid or similar aid for nations in the Latin America and the Caribbean area. Since this proposal in

1954, the U.S. Government has to date already obligated $398.2 million in mutual security for nonmilitary assistance aid to Latin America.

On August 25, 1960, the House Committee on Foreign Affairs, of which I have been a member for almost 14 years, voted to report out the present bill introduced by our chairman, the gentleman from Pennsylvania [Mr. MORGAN], which we are discussing here, authorizing an additional $600 million in aid for Latin American nations. The $600 million authorization has already passed the other body and has been approved by the presidential candidates of both parties.

I am pleased to advise you that with this current $600 million new authorization, the total that has been obligated previously and presently authorized will be $998.2 million worth of U.S. economic aid for Latin America. As I stated to you, my recommendation in 1954 had been $1 billion, after having studied this matter and attended the Rio Economic Conference to see firsthand what the problems were, and I am glad to see that such a constructive program has now been implemented by the administration.

I would also like to point out to you that the U.S. sugar program of quotas and imports from Cuba into the United States and from various other countries, and territories of this country has always been a bipartisan program, supported by both the Republican and Democratic parties, so that I was glad to see that when we finished the last session of the Congress in the House on the last evening, the new sugar program of 1960 went through by not a disputed vote but by a unanimous voice vote.

I would like to point out that in the hearings on this bill before the House Foreign Affairs Committee, I questioned Secretary Dillon on the possibility of a proposal under this aid program, in connection with this $600 million authorization. As you know, I come from the city of Pittsburgh and the city of Clairton, Pa., known as the iron, steel, oil, coal, copper, aluminum manufacturing cities. I had questioned Mr. Dillon on whether we could not have the kind of a program that would try to use the surplus secondhand automobiles of this country, surplus trucks, railroad cars and equipment, motorcycles, and bicycles. My feeling is that if the Latin American people get transportation, that they will quickly progress and open up the backward areas, and resources, that are so badly needed. I am quoting from the hearings of the House Foreign Affairs Committee on the current bill for Latin American aid:

Mr. FULTON. I am interested particularly in transportation because I feel that will open new areas and enable localities and their people to move from isolation and poverty to progress, and access to resources and markets.

So this program then should include railroads, river transportation and roads, and would likewise include bridges and public works, would it not?

Mr. DILLON. That is correct. Roads are one of the main needs. For instance, in the Peruvian program, there is a very good region on the eastern slope of the Andes which had never been settled because it is hard to get across the Andes. You have to build roads through there and as soon as they are built, people move in and begin to settle there.

Mr. FULTON. I am glad to see that you are proposing to extend the Public Law 480 program, the distribution of U.S. agricultural surpluses abroad, as you have mentioned in your statement chiefly to Chile, but also throughout Latin America. I feel that is a very good move, as we in the U.S. Government should move promptly to dispose of our U.S. agricultural surpluses for good purposes among our friends and neighbors in Latin America who are among our best friends and customers.

Secondly, is there any way under this program where you could finance the moving of secondhand railroad equipment, automobiles, trucks, motorcycles and bicycles, as well as used planes and aviation equipment out of the United States, and put the South American people on good roads and in modern equipment? They might do better for themselves and it certainly would create whole new industries, create new employment, new uses of oil, steel, copper, electrical equipment and would certainly stimulate U.S. industry, increase employment and create millions of new customers for the basic industries of the United States and Latin America.

Mr. DILLON. That is something we will have to investigate.

At the time of the testimony of the gentleman from Pennsylvania [Mr. FLOOD], before the House Committee on Foreign Affairs on Friday, June 17, 1960, during a meeting of the Subcommittee on Inter-American Affairs, the following colloquy occurred:

Mr. FULTON (to Congressman FLOOD). The question then comes, should there be a corollary to your approach to the Monroe Doctrine that would say that within the various countries of the Western Hemisphere there should be mutual agreement against armed aggression and to forbid external pressures against the peace and security of the people of another country by subversive methods.

Mr. FLOOD. My answer is yes.

Mr. FULTON. You agree it would almost be necessary to have the Monroe Doctrine enlarged because one country is used as a base and then the operations are from there within the Western Hemisphere. So, that it is really a requirement of more than the Monroe Doctrine principles.

Mr. FLOOD. That is right.

Mr. FULTON. You use the Monroe Doctrine as a base for a change of U.S. policy in our hemisphere. I would go further than the Monroe Doctrine and add this policy as a necessary corollary for the protection of the individual countries and peoples in North and South America from armed attack and subversion by any outside power in Europe, Asia, or Africa, and also defend each country against armed attack, or outside pressures and subversion against the peace and security, by any other country of this hemisphere.

Mr. Chairman, we need a strong, firm U.S. policy for the Western Hemisphere based on the Monroe Doctrine and broadened to suit current needs, when we are faced with threats to our hemispheric security and progress through military power and new forms of subversion.

Mr. MORGAN. Mr. Chairman, I yield 5 minutes to the gentleman from Virginia [Mr. HARDY].

Mr. HARDY. Mr. Chairman, I asked for this time because there are one or two points I wanted to make in connection with this legislation and a few questions I would like to ask the Chairman of the Committee. From the examination that I have made of our foreign aid program all over the world, I have learned that we have made so many mistakes in administration, we have lost so many friends, that I hoped we would give greater attention to our activities in Latin America, to strengthen Western hemispheric ties and to establish a stronger democracy in the Americas.

In the debate here today, we have talked about sending our representatives to Bogotá with an indication of congressional intent. Even without this legislation, they will go to Bogotá with congressional intent clearly indicated because we have the mutual security program and its many provisions already in use or available for use.

I strongly support increased American aid to the countries of the Western Hemisphere. In a recent foreign policy address in my district, one of the main suggestions I made for improvement in our foreign aid program was that we should place primary emphasis on the development of the Western Hemisphere so that it can be economically independent and self-sufficient, permitting us to present a cohesive force of free peoples as democracy's answer to Communist slavery.

The bill which we are considering today contains a statement of policy for which I commend the Committee. I am disturbed, however, about section 2, which provides for an authorization of $500 million. I do not know how much will be needed for an adequate program in Latin America, and there is not any evidence that anyone else has factual knowledge to support any particular figure. What concerns me most is the fact that the administration apparently feels that a statement of policy must be accompanied by a definite dollar figure in order that our Latin American neighbors may be convinced of our sincerity. If this be true, it is indeed a sad commentary on the respect with which we are regarded. Is the ghost of dollar diplomacy haunting us even in the Western Hemisphere?

The report from the Foreign Affairs Committee states that they have been assured that the executive branch will not request appropriation of these funds until "comprehensive programs for their use have been worked out." In the absence of such programs, I question the wisdom of even authorizing such an appropriation, since we have found from past experience that earmarking of funds almost automatically leads to hasty, wasteful expenditures.

Once we have approved this authorization, we might as well face the fact that when we convene next year we will be asked to appropriate funds under it for any purposes to which the administration has in the meantime committed American support, whether we like them or not.

We will be told that as a result of this authorization the Latin American countries have been led to believe that $500 million will be appropriated, and if we do not appropriate that amount our southern neighbors will consider it a breach of faith.

Let any who feel this is an overstatement analyze the position in which we find ourselves today. We are told that we have to pass this bill because of what the Latin American countries have been

led to believe by the administration and that a failure to pass the bill will cause resentment among Latin American countries and a resulting loss of American prestige.

Step by step, then, we are led along the path beyond the point of no return.

In the past it has been established that the earmarking of funds in advance of detailed plans for their use has led to expenditures that were neither worthwhile nor economically sound. In those cases we were speaking of earmarking of appropriated funds. In this case, however, the administration has earmarked $500 million for Latin America not only before appropriation, but even before authorization, and now—today—we are told that we have to approve this extra-legal action or the foreign policy of the United States will suffer. I believe this constitutes a serious usurpation by the administration of a function which belongs to the Congress. There ought to be some way to stop administrative personnel from putting the Congress in this position.

Let me ask the distinguished chairman of the Committee on Foreign Affairs [Mr. MORGAN] why it is necessary, in this bill, to authorize an additional $500 million at this time. Why can we not use existing mutual security funds?

Mr. MORGAN. First I would like to explain to the gentleman that the Committee is not claiming any credit for the statement of policy. The statement of policy was offered in the other body by Senator MANSFIELD, Senator CAPEHART, and Senator MORSE. The House Committee on Foreign Affairs just added several small amendments. So credit for the statement of policy, which the chairman agrees is a very good one, goes to the other body.

Of course, the Chairman has to agree with the gentleman from Virginia that authority already is contained in the Mutual Security Act, and that what he suggests possibly could be done. But the dollar sign is necessary if we are going to make any progress, if we are going to move ahead with this new social program outlined in the bill for Latin America.

Mr. HARDY. Could we not accomplish the stated policy under existing authority? The Development Loan Fund was created for purposes such as these. Loans, as well as grants, can be made by the International Cooperation Administration. There is a substantial appropriation for special assistance, and one for defense support, and we have just increased the President's contingency fund by $100 million. Are there not any number of pockets in which funds could be found if specific dollar commitments were needed at Bogotá?

Mr. MORGAN. I think the gentleman is correct. But I want to say that the real incentive for this program does not come from this country, but it came out of the meetings held over a series of months by the Organization of American States.

Mr. HARDY. I appreciate that. But I repeat this one thought. The purpose we need to accomplish is to state a proper policy and then undertake to effectuate that policy through intelligent, imaginative use of existing legislation. That is what I would hope that we will do.

Mr. MORGAN. Mr. Chairman, I yield 2 minutes to the gentleman from West Virginia [Mr. BAILEY].

Mr. BAILEY. Mr. Chairman, when the distinguished gentleman from Minnesota [Mr. JUDD] discussed this bill earlier in the general debate he asked the direct question, "Why is this legislation necessary?" I want to ask the same question, "Why is this legislation necessary?"

Yesterday morning I was told that there would be no more meetings of the Rules Committee. Later in the day a meeting of the Rules Committee was held and this legislation was reported. Nobody in the House as far as I am informed knew anything about the existence of such legislation.

They refer to it as an emergency; an emergency, I ask you, that takes precedence over the welfare of the boys and girls of America that need the school construction bill that is presently bottled up in the Rules Committee?

I want to read from the Washington Daily News of today an interview with Judge SMITH, chairman of the Rules Committee. During the course of the interview the reporter wanted to know the judge's position, and he said:

> I just paddle along and take a licking when it comes, but I don't let it worry me.

He said:

> I've never conceived the role of the Rules Committee to be to report out for consideration on the floor everything everybody wants. Why, some of those bills are Rube Goldberg things.

A little later the article stated:

> The reason, in his view, is simple: The Federal Government's got no moral or constitutional right to get into the field of public education.

In other words, what my colleagues and I are trying to do for the boys and girls of this country is a Rube Goldberg proposition, in his view.

I am just making the point that this proposition is inexcusable as it appears before the House today for consideration. You are not giving these countries the money, you are just taking the opportunity to ram down the throat of the House an authorization for a new spending program abroad.

When the President took it on himself to chide and even laugh at the Democratic Members of the House because of their impotency and inability to agree on a program, I thought the "honeymoon" was over.

Mr. MORGAN. Mr. Chairman, I yield 5 minutes to the gentleman from Florida [Mr. FASCELL].

Mr. FASCELL. Mr. Chairman, the Congress of the United States and this House finds itself today in a peculiar political box from which I can see no chance of escaping without doing great damage to our international relations throughout the world. This is the practical aspect of the matter before us today.

It has been said that there is no urgency. Do you not feel that the growing Communist strength in Cuba is an urgent matter for the United States? Those who say there is no urgency, do you mean that there are no serious disputes between the inter-American states which is dangerous to the security of the United States and the free people of the world? When you say there is no urgency, do you mean that there was no emergency which caused the meeting of the Organization of American States? Can it be said that there is no urgency in the concern of our Latin neighbors about the tremendous impact of the economic revolution taking place all through Central and South America? Their votes at every conference reflect their concern over the feelings of their people. Do you mean that we in the United States should not recognize the Latin American attitude of today as an urgent matter?

Do you mean to say, when you say that there is no urgency, that you believe the Western Hemisphere is not really the bulwark of freedom for the free people in our fight against communism but rather that we are just going to open up Latin America to the Communists because those who object to this proposal do not have a good alternative? I have heard none mentioned here today.

Some do not like the dollar sign. I do not like it either. But it takes dollars properly used to effect the programs the Latins themselves have been urging to faster economic changes in a peaceful manner. Because we do not like the dollar sign are we going to open the door and let the commies come in and take over all of Latin America?

Do you mean to tell me there is no urgency in the meeting at Bogotá where the economic ministers will meet to determine a progressive and affirmative program for Latin America?

Do you mean to tell me there is no need in Latin America for the program as the Secretary testified before our committee program on page 5 of the hearings:

Such an authorization would provide a framework within which we and our friends from Latin America can develop new and more effective plans and programs for attacking the problems of social progress.

We envisage that the conference should agree upon the basic objectives of a program for social development which gives primary attention to needs in three broad areas: First, improvement of the conditions of rural living and land use; second, improvement of housing and community facilities; and, third, improvement of educational systems and training facilities.

Yes; that need is there. There is no question about that. We all know it and recognize it—no one here today disputes it.

Mr. Chairman, the gentleman from Virginia [Mr. HARDY] was correct when he said that there is no need for authorization, except for the money amount. Legally and technically you can accomplish all of the objectives of this Latin program, as pointed out by the Assistant Secretary on page 27 of the hearings under the mutual security program. But this bill is to emphasize our interest in

Latin America. It is demonstrative evidence of our sincere desire. Many people have insisted upon emphasis in Latin America, foreseeing the very difficulty we are in at this minute. The President's brother as far back as 1953, reported to the President of the United States the need for a new look at Latin America. The Foreign Relations Committee in the Senate and the Foreign Affairs Committee in the House have long ago reported on the economic revolution taking place in Latin America and the need for an affirmative and strong program and leadership by the administration. So what we have to do and what we are faced with today is the necessity for the Congress, even though we have existing legislation, to emphasize to Latin America and to the world that we want to do something and, finally, at long last, we are moving to answer the urgent needs in Latin America. All those who have advocated emphasis in Latin America are going to have their opportunity today to vote on a bill which provides a part of that emphasis.

Mr. HARDY. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Virginia.

Mr. HARDY. I am in complete accord that we need to do something to emphasize attention on Latin America and our attention to the needs down there. But would we not be in better shape to direct that attention be paid under the full resources of the existing law rather than providing additional funds just because somebody said we need a dollar sign?

Mr. FASCELL. If you could explain that in Latin America that would be fine, but the facts of life are that this bill is labeled a Latin American bill. This is the only way that clear emphasis can be had and the gentleman knows this. This is the only way you are going to get this idea across that the President finally recognizes the need for a new approach and the Congress is asked to support this new approach, notwithstanding that everything sought to be done can be done under existing law and obviously and admittedly has not been done. It would not do any good simply to reiterate support for Latin America under the mutual security bill at the Bogotá Conference.

Admittedly this bill—nor dollars alone—is not the sole answer to Latin America's economic needs—nor to communism in Latin America—but it does represent the United States' effort to improve an important facet of the whole problem.

This must be followed with a strong nonmonetary effort on the part of the United States and Latin American countries to formulate affirmative political and economic programs and climates conducive to free world objectives.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

STATEMENT OF POLICY

SECTION 1. (a) It is the sense of the Congress that—

(1) the historic, economic, political, and geographic relationships among the American Republics are unique and of special significance and, as appropriate, should be so recognized in future legislation;

(2) although governmental forms differ among the American Republics, the peoples of all the Americas are dedicated to the creation and maintenance of governments which will promote individual freedom;

(3) the interests of the American Republics are so interrelated that sound social and economic progress in each is of importance to all and that lack of it in any American Republic may have serious repercussions in others;

(4) for the peoples of Latin America to continue to progress within the framework of our common heritage of democratic ideals, there is a compelling need for the achievement of social and economic advance adequate to meet the legitimate aspirations of the individual citizens of the countries of Latin America for a better way of life;

(5) there is a need for a plan of hemispheric development, open to all American Republics which cooperate in such plan, based upon a strong production effort, the expansion of foreign trade, the creation and maintenance of internal financial stability, the growth of free economic and social institutions, and the development of economic cooperation, including all possible steps to establish and maintain equitable rates of exchange and to bring about the progressive elimination of trade barriers;

(6) mindful of the advantages which the United States has enjoyed through the existence of a large domestic market with no internal trade barriers, and believing that similar advantages can accrue to all countries, it is the hope of the people of the United States that all American Republics will jointly exert sustained common efforts which will speedily achieve that economic cooperation in the Western Hemisphere which is essential for lasting peace and prosperity; and

(7) accordingly, it is declared to be the policy of the people of the United States to sustain and strengthen principles of individual liberty, free institutions, private enterprise, and genuine independence in the Western Hemisphere through cooperation with all American Republics which participate in a joint development program based upon self-help and mutual efforts.

(b) In order to carry forward the above policy, the Congress hereby—

(1) urges the President through our constitutional processes to develop cooperative programs on a bilateral or multilateral basis which will set forth specific plans of action designed to foster economic progress and improvements in the welfare and level of living of all the peoples of the American Republics on the basis of joint aid, mutual effort, and common sacrifice;

(2) proposes the development of workable procedures to expand hemispheric trade and to moderate extreme price fluctuations in commodities which are of exceptional importance in the economies of the American Republics, and encourages the development of regional economic cooperation among the American Republics;

(3) supports the development of a more accurate and sympathetic understanding among the peoples of the American Republics through a greater interchange of persons, ideas, techniques, and educational, scientific, and cultural achievements;

(4) supports the strengthening of free democratic trade unions to raise standards of living through improved management-labor relations;

(5) favors the progressive development of common standards with respect to the rights and the responsibilities of private investment which flows across national boundaries within the Western Hemisphere;

(6) supports the consolidation of the public institutions and agencies of inter-American cooperation, insofar as feasible, within the structure of the Organization of American States and the strengthening of the personnel resources and authority of the Organization in order that it may play a role of increasing importance in all aspects of hemispheric cooperation; and

(7) declares that it is prepared to give careful and sympathetic consideration to programs which the President may develop for the purpose of promoting these policies.

AUTHORIZATION

SEC. 2. In order to carry out the purposes of section 1 of this Act, there is hereby authorized to be appropriated to the President not to exceed $500,000,000, which shall remain available until expended, and which the President may use, subject to such further legislative provisions as may be enacted, in addition to other funds available for such purposes, on such terms and conditions as he may specify. The Secretary of State shall keep the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House currently informed about plans and programs for the utilization of such funds.

The CHAIRMAN. The Clerk will report the committee amendments.

The Clerk read as follows:

Committee amendment: On page 4, line 4, strike the word "gradual" and on page 4, line 5, strike the words "common markets" and insert in lieu thereof "economic cooperation".

The committee amendment was agreed to.

The Clerk read as follows:

Committee amendment: On page 5, line 5, strike the last number "2" and insert in lieu thereof "1".

The committee amendment was agreed to.

The Clerk read as follows:

Committee amendment: On page 4, after line 11, insert the following: "(4) supports the strengthening of free democratic trade unions to raise standards of living through improved management-labor relations;" and renumber the following subsections.

The committee amendment was agreed to.

The Clerk read as follows:

Committee amendment: On page 5, line 7, strike "Secretary of State" and insert in lieu thereof "President" and in lines 8 and 9, strike "Secretary" and insert in lieu thereof "President".

The committee amendment was agreed to.

Mr. BURLESON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BURLESON: On page 5 strike out line 5 and all that follows down through line 17 on page 5, and renumber the following sections accordingly.

Mr. BURLESON. Mr. Chairman, in earlier remarks I indicated that in my opinion the effort in this legislation was to "do something."

Mr. Chairman, to leave in the statement of policy in this measure does something—I must say parenthetically I am not even enthusiastic about that but it makes clear our intent to discuss a program of assistance in Latin America. I think it is indicative of the interest of the people of this country that we are willing to discuss common and mutual problems.

Let our people in Bogotá next week discuss these problems on the basis of

the policy statements which are clear and concise in the first section, and delete this authorization which carries a promise that has no basis. It cannot be justified by any available information. I am for the Chilean aid. As I recall it, we have already sent about $25 million down there, and the estimate is it will take about $400 million to rehabilitate Chile after this catastrophic earthquake which occurred not long ago. The Chilean people need help. They have applied for an Export-Import Bank loan and I hope they will be able to qualify for it. All Latin America will be aware of our response to this situation.

So we leave that in the bill, and we leave these other things in the bill. As I understand it, the appropriation is provided for in the last section. That being the case, we would come out with a bill to assist Chile; we would come out with a bill which says that our people will, in conference and discussion with people of Latin America, devise programs to bring before this Congress at its next session, for its consideration.

Mr. Chairman, this proposal is without precedent. To have legislation of this nature and in this form presented to us is not complimentary to this Congress, it is not complimentary to our friends in Latin America. We are taking our friends in Latin America for a bunch of idiots, if I must be so blunt as to say so. But remember my colleagues we are making a promise, we are committing ourselves to undefined obligations and unidentified programs. Oh, yes, we are committing ourselves for a long time in advance, starting with $500 million. Why, eventually you will be looking at requests for billions of dollars. But I had rather look at a program like that which has substance, which has a plan, which has a purpose, which has described goals, than to bring in 15 cents' worth of a bill like this and ask me to support it. If and when aid to Latin America is decided upon it should be in a businesslike, orderly way, without setting a precedent like this. We justify "do something" by adopting the first and third sections of the bill. Then you have something for our people to talk about and to negotiate about next week in Bogotá.

Mr. HALEY. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from Florida.

Mr. HALEY. What the gentleman is saying is that we are starting a program here that no one has said what it is going to cost. We do not know whether it is $500 million or what this program will cost. The gentleman says, let us take the language of the resolution or certain parts of it, let them go down there and come back and submit to the Congress of the United States a program that we know where we are going, what we are going to spend, and so forth. That is all the gentleman is asking for.

Mr. BURLESON. The gentleman is correct.

Mr. ADAIR. Mr. Chairman, will the gentleman yield?

Mr. BURLESON. I yield to the gentleman from Indiana.

Mr. ADAIR. Is it not true that under the gentleman's proposal there would be much money or little money sent down there as if we adopt the bill in its present form? Would any appropriated funds be available immediately?

Mr. BURLESON. No funds will be available under the authorization until appropriated but certainly the representatives of the United States meeting with Latin American officials will commit us to this sum.

Mr. ADAIR. It would be an indication of our intent and desire to help them.

Mr. BURLESON. That is true, and there is clearly expressed in this bill a statement of policy. With that statement of policy and the action of the Congress in adopting the first section, will give our people all the prestige they will need to carry on the negotiations.

I trust, Mr. Chairman, that the amendment I offer will be accepted.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. MORGAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the gentleman from Texas is a most valuable member of the Committee on Foreign Affairs, and I certainly value his friendship and his work on the committee over a period of a good many years. And, I regret that today I have to rise in opposition to one of his amendments.

Mr. Chairman, this amendment strikes at the very heart of the bill. I cannot guarantee to this House that if we vote for this $500 million authorization that Latin America will not go Communist. But, let me say, that if we do not approve this $500 million authorization, we will knock the Bogotá Conference in the head. This is the heart of the bill, and if we adopt this amendment we will give the nations of Latin America a push in the wrong direction. I think this $500 million is vitally needed. It has been urgently requested by the President of the United States. Under Secretary of State Dillon made several appearances on the Hill not only before committees, but he conferred with the chairman of the Senate Foreign Relations Committee and he visited me. I know he visited all the nominees for President and Vice President, and they approved this authorization. It is urgently needed. Our representatives are going to Bogotá next week, and I think this House will be making a terrific mistake if they adopt the amendment offered by the gentleman from Texas.

Mr. SELDEN. Mr. Chairman, I move to strike out the last word and ask unanimous consent to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. SELDEN. Mr. Chairman, I address my remarks only to the sections of this bill which refer to Latin American aid, as I am unalterably opposed to the section which authorizes additional sums to the contingency fund to be used to stabilize the Communist-inclined government of the Republic of the Congo. It is my understanding, however, that the section dealing with an additional sum for the President's contingency fund will be eliminated by a committee amendment, which I certainly intend to support.

Mr. Chairman, by submitting this legislation to Congress on the eve of adjournment, the administration has presented us with the kind of dilemma posed by the question, "Have you stopped beating your wife?" The news of the administration's request for funds to embark on a new socially significant cooperative program with Latin America has been flashed to all the newspapers in that region. A refusal to enact this legislation could be interpreted by our friends in Latin America as congressional rejection of a program which they urgently require and have been urging for some time. On the other hand, congressional assent perforce implies that we give our wholehearted approval and support to the administration's proposal in its present form.

I retain grave doubts with regard to the authorization. I have no quarrel with the $100 million which is earmarked for reconstruction in Chile. All of us, I am sure, are sympathetic with the Chileans' heroic efforts to rebuild their country from the rubble left by a series of earthquakes.

My reservations pertain to the $500 million fund.

I am perturbed, in the first place, by the proposal's vagueness. We are told that the Inter-American Bank will probably administer the loan part of the program, amounting to 85 or 90 percent of the total. We are assured that the bank will apply certain fiscal criteria so that the loans will not be devoured by inflationary procedures. But, then again, we are informed that definite arrangements are yet to be worked out in Bogotá.

No one in the administration has yet made clear how the new program is to be coordinated with the existing mechanisms for aid to Latin America—the Export-Import Bank, the IMF, the IBRD, ICA, Public Law 480 loans, and the Development Loan Fund.

The administration has been unable even to tell us how they arrived at the figure of $500 million. It is a first installment, on we do not know what. In Secretary Dillon's words, "It could as well have been a different figure."

We are confronted with the argument that the administration has to go to Bogotá with the express backing of Congress spelled out—that the Latin Americans are weary and wary of repeated U.S. expressions of eagerness to cooperate, followed by inaction.

I am fearful that this hastily devised and vague legislation rammed through Congress in the waning hours of an emergency session may have the effect of raising the Latin American peoples' hopes beyond our ability to fulfill them.

The timing of the new aid program troubles me almost as much as its amorphous framework. Coming as it did on the eve of the Organization of American States meeting in Costa Rica to discuss the tense situation in the Caribbean, it unfortunately gave the appearance of a bribe dangled before the Latin American

Republics to support our position. It is no secret that the plan is referred to by many Latin Americans as "the Castro plan."

Secretary Dillon testified to the Foreign Affairs Committee that the timing of the proposal was an unfortunate coincidence—that plans have been in the mill for some time. According to Mr. Dillon, Castro's excesses have jarred Latin American leaders into a realization that social reforms in their countries are essential if chaos is to be averted. In other words, the Latin Americans themselves are now ready to take the necessary measures to overhaul their archaic economic and social structures which are essential if our aid is to be effective. He further pointed out that the visits earlier this year to Washington of Prime Minister Beltran of Peru and President Lleras Camargo of Colombia helped to convince the administration that Latin America needed funds for social-type reforms, while President Eisenhower's visit to South America reinforced this view.

I can but wonder why it took visits of the heads of state to convince the administration that conditions in Latin America are ripe for the kind of instability and chaos that invites Communist meddling. What were our diplomats in the 20 American Republics reporting in the last several years? What about the repeated warnings and pleas of the Latin American delegates to inter-American conferences?

Despite my misgivings in connection with this measure, I believe a well-rounded program of hemisphere economic cooperation to be the most effective weapon against the misery and unrest which make a desperate people willing to turn to alien doctrines in the hope of change.

The meeting which convenes next week in Bogotá presents an opportunity to hammer out, in cooperation with the other American Republics, methods to meet the challenge of Latin American stagnation and poverty. Also, I am aware that congressional rejection of this measure pledging our cooperation could have a demoralizing effect on the conference. For that reason I shall not oppose the measure on final passage provided an amendment has been adopted eliminating an additional sum for the President's contingency fund—section 4 of H.R. 13021.

At the same time, I sincerely believe this legislation could be further improved by cutting out reference to a specific figure. By adopting the amendment offered by the gentleman from Texas [Mr. BURLESON] we can retain the intent of this legislation, that is, the bipartisan support of Congress for a program of economic cooperation with the American Republics, without including a figure which all of us know was arrived at hastily and without due study. Only after the Bogotá Conference, when the administration has some firm idea of the kind of program we expect to undertake with our Latin American neighbors, can Congress authorize funds intelligently. For that reason, Mr. Chairman, I support the amendment offered by the gentleman from Texas.

Mr. GROSS. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I have listened attentively to the statements of the gentleman from Minnesota [Mr. JUDD] who is leading the support for this bill on the minority side and I have listened to the statements by the chairman of the Committee on Foreign Affairs [Mr. MORGAN] on behalf of this bill and up to this moment I have no information as to how, when, or where the half billion dollars is to be spent. I am perfectly willing to yield at this time if either of these gentlemen or anyone else speaking in behalf of this bill will tell me specifically how, when, and where the money is to be spent.

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Minnesota.

Mr. JUDD. The gentleman has been advised repeatedly that no one now knows exactly how, when, or where this money will be spent, if and when it is appropriated. The bill does not appropriate any money. It recognizes that we have to do something. What that something is to be, they are going to try to work out in Bogotá. If they come out with something sound and constructive, the proposals will come back to the Congress next January. If they do not, they will not. It is as simple as that.

Mr. GROSS. Do some members of the Committee on Foreign Affairs or some of the bureaucrats downtown lie awake dreaming up these proposals?

Mr. HALEY. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Florida.

Mr. HALEY. Of course the gentleman knows they spend practically all of their time down there figuring out how to give away this money.

I want to say this: The gentleman says he does not know how it is going to be spent. You think we ought to go ahead. Suppose the people who go in here and recommend this program say, "We want to put this money down there to support the Castro government." What about that?

Mr. JUDD. There is not going to be any money until and unless the Congress appropriates it next year. If it does appropriate funds, the Congress can work its will and provide that not a cent will go to Castro. To decide not to vote this aid to any of Latin America because some money conceivably might go to Castro through our own negligence would surely be seeing a ghost under the bed.

Mr. HALEY. The distinguished gentleman from Minnesota is not that naive. This authorization is a promise on the part of the U.S. Government to pour another half a billion dollars down assorted rat holes. You are committing this Government, you are committing the taxpayers of the United States to provide half a billion dollars whenever you authorize it. The gentleman from Minnesota [Mr. JUDD] has been here long enough so that I know he is not that naive.

Mr. GROSS. Of course this is a promise to pay. My friend from Florida is exactly right. All we have heard this afternoon is platitudes, nothing but platitudes and specious arguments about the necessity for spending some money somewhere, but nobody knows where. This would be one of the greatest injustices yet perpetrated on the taxpayers of this country, if this bill is adopted with section 2 in it.

Mr. FARBSTEIN. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from New York.

Mr. FARBSTEIN. I queried Mr. Dillon and asked him if he had any idea how the money was to be spent. The testimony, although it is not definitive, nevertheless gives some idea of what they propose to do with the money. Mr. Dillon said:

> Well, we mean by that if a country is willing to put up funds for new land resettlement programs, is willing to make an effort to broaden their tax base, for instance, so that there will be a progressive income tax—

That is talking about the various South American countries.

> and less tax on individual farmers—make reforms of that nature—if they are ready to set up agricultural credit institutions and make their own government funds available for them, well then we think there is a chance of success in the program, and we would pitch in and help.

Mr. GROSS. I assume this is the same Douglas Dillon who sat down in an office in the Capitol Building the other day, just off the Chamber, and pressured the House leadership to put $65 million in the deficiency appropriation bill earlier today. The gentleman can get his own time to read Dillon's statement. Someone else read it a while ago. He provides no specific information, and I am not interested in his statement. The chairman and the ranking minority member of the Foreign Affairs Committee say they have no idea of the projects. Let us get down to earth on this proposal. Let us strike out section 2, provide a a blank check for half a billion dollars to be taken from the pockets of the tax-statement of policy, and refuse to issue payers of this country.

Mr. RAYBURN. Mr. Chairman, I ask for recognition.

Mr. Chairman, for the last several days there has been talk all around here that we were going to pass a resolution that in the future by appropriations we might do something for our friends in these Americas. I do not know how you feel about it, but I can tell you how I feel about it. I know that there are forces on this earth that are working against everything that a loyal American loves and treasures. I do not know who across either ocean is going to be standing by us when the time comes in the clash of little worlds that are thrown at each other. I know this, that we live in the most dangerous period of the Christian civilization that we know and enjoy. I know these forces would destroy not only the things that we treasure and love, but they would destroy us. When that time comes, these Americas must stand together or we are going to have no more Americas. It seems to me that you might just as well strike the enacting clause
